Type of coating	VOC content limit (pounds of VOC per gallon of coating, excluding water and exempt solvents, as applied)
Primer	2.9
Primer for general aviation rework facility	4.5
Exterior primer for large commercial aircraft (components or fully assembled)	5.4
Topcoat	3.5
Topcoat for general aviation rework facility	4.5
Self-priming topcoat	3.5
Self-priming topcoat for general aviation rework facility	4.5
Chemical milling maskant, type I	5.2
Chemical milling maskant, type II	1.3

- (b) VOC content limits for specialty coatings.

--

Type of specialty coating	VC content limit (pounds of VOC per gallon of coating, excluding water and exempt solvents, as applied)
Ablative coating	5.0
Adhesion promoter	7.4
Adhesive bonding primer cured above two hundred fifty degrees Fahrenheit	8.6
Adhesive bonding primer cured at two hundred fifty degrees Fahrenheit or below	7.1
Antichafe coating	5.5
Bearing coating	5.2
Bonding maskant	10.3
Caulking and smoothing compounds	7.1

Chemical agent-resistant coating	4.6
Clear coating	6.0
Commercial exterior aerodynamic structure primer	5.4
Commercial interior adhesive	6.3
Compatible substrate primer	6.5
Corrosion prevention compound	5.9
Critical use and line sealer maskant	8.5
Cryogenic flexible primer	5.4
Cryoprotective coating	5.0
Cyanoacrylate adhesive	8.5
Dry lubricative material	7.3
Electric or radiation-effect coating	6.7
Electrostatic discharge and electromagnetic interference (EMI) coating	6.7
Elevated temperature Skydrol-resistant commercial primer	6.2
Epoxy polyamide topcoat	5.5
Fire-resistant (interior) coating	6.7
Flexible primer	5.3
Flight test coatings; all other	7.0
Flight test coatings: missile or single use aircraft	3.5
Fuel tank adhesive	5.2
Fuel tank coating	6.0
High temperature coating	7.1
Insulation covering	6.2
Intermediate release coating	6.3
Lacquer	6.9
Metallized epoxy coating	6.2
Mold release	6.5
Nonstructural adhesive	3.0
Optical anti-reflective coating	6.3
Part marking coating	7.1
Pretreatment coating	6.5
Rain erosion-resistant coating	7.1
Rocket motor bonding adhesive	7.4
Rocket motor nozzle coating	5.5
Rubber-based adhesive	7.1
Scale inhibitor	7.3
Screen print ink	7.0
Seal coat maskant	10.3
Sealants: extrudable, rollable, or brushable sealant	2.3

Sealants: sprayable sealant	5.0
Silicone insulation material	7.1
Solid film lubricant	7.3
Specialized function coating	7.4
Structural autoclave adhesive	0.5
Structural nonautoclavable adhesive	7.1
Temporary protective coating	2.7
Thermal control coating	6.7
Wing coating	7.1
Wet fastener installation coating	5.6

(2) VOC emission control system for a coating operation.

In lieu of the VOC content limit for a coating subject to paragraph (D)(1) of this rule, a VOC emission control system shall be used that achieves, for the coating employed and designated for control, an overall reduction of VOC emissions that is equal to or greater than eighty-one per cent by weight. Also, if the VOC emission control system includes a thermal or catalytic oxidizer, the control efficiency of the thermal or catalytic oxidizer for VOC emissions shall be at least ninety per cent by weight.

(3) The following coating applications are exempt from the VOC content limits listed in paragraphs (D)(1)(a) and (D)(1)(b) of this rule:

- (a) Aerosol coatings;
- (b) Touchup and repair coatings;
- (c) DOD classified coatings;
- (d) Coating of space vehicles; and
- (e) Coatings that meet the following low usage restrictions at the facility;
  - (i) Annual total usage of each separate coating formulation does not exceed fifty gallons; and
  - (ii) Combined annual total usage of such coating formulations does not exceed two hundred gallons.

(4) Except as otherwise provided in paragraph (D)(5) of this rule, a person shall use one or more of the following application methods for applying primers and topcoats (including self-priming topcoat) to aerospace vehicles or components:

- (a) Flow/curtain applications;

- (b) Dip coat application;
  - (c) Roll coating;
  - (d) Brush coating;
  - (e) Cotton tipped swab application;
  - (f) Electrodeposition (dip) coating;
  - (g) High volume low pressure (HVLP) spraying;
  - (h) Electrostatic spray application; or
  - (i) Other coating application methods that achieve VOC emission reductions equivalent to HVLP or electrostatic spray application methods, as determined according to the requirements in 40 CFR 63.750(i).
- (5) The following situations are exempt from the application method requirements specified in paragraph (D)(4) of this rule:
- (a) Any situation that normally requires the use of an airbrush or an extension on the spray gun to properly reach limited access spaces;
  - (b) The application of coatings that contain fillers that adversely affect atomization with HVLP spray guns and that the permitting agency has determined cannot be applied by any of the application methods specified in paragraph (D)(4) of this rule;
  - (c) The application of coatings that normally have a dried film thickness of less than 0.0013 centimeter (0.0005 inch) and that the director has determined cannot be applied by any of the application methods specified in paragraph (D)(4) of this rule;
  - (d) The use of airbrush application methods for stenciling, lettering, and other identification markings;
  - (e) The use of handheld spray can application methods; and
  - (f) Touchup and repair operations.
- (E) VOC requirements for cleaning operations.
- (1) Hand wipe cleaning operations.

- (a) Except as otherwise provided in paragraph (E)(1)(b) of this rule, any cleaning solvent employed in a hand wipe cleaning operation shall meet one of the following specifications:
  - (i) Meet the definition of an aqueous cleaning solvent; or
  - (ii) Have a VOC composite vapor pressure of 7.0 millimeters of mercury (3.75 inches of water) or less at twenty degrees Celsius (sixty-eight degrees Fahrenheit).
- (b) The following hand wipe cleaning operations are exempt from the requirements of paragraph (E)(1)(a) of this rule:
  - (i) Cleaning during the manufacture, assembly, installation, maintenance, or testing of components of breathing oxygen systems that are exposed to the breathing oxygen;
  - (ii) Cleaning during the manufacture, assembly, installation, maintenance, or testing of parts, subassemblies, or assemblies that are exposed to strong oxidizers or reducers (e.g., nitrogen tetroxide, liquid oxygen, or hydrazine);
  - (iii) Cleaning and surface activation prior to adhesive bonding;
  - (iv) Cleaning of electronic parts and assemblies containing electronic parts;
  - (v) Cleaning of aircraft and ground support equipment fluid systems that are exposed to the fluid, including air-to-air heat exchangers and hydraulic fluid systems;
  - (vi) Cleaning of fuel cells, fuel tanks, and confined spaces;
  - (vii) Surface cleaning of solar cells, coated optics, and thermal control surfaces;
  - (viii) Cleaning during fabrication, assembly, installation, and maintenance of upholstery, curtains, carpet, and other textile materials used in the interior of the aircraft;
  - (ix) Cleaning of metallic and nonmetallic materials used in honeycomb cores during the manufacture or maintenance of these cores, and cleaning of the completed cores used in the manufacture of aerospace vehicles or components;
  - (x) Cleaning of aircraft transparencies, polycarbonate, or glass substrates;

- (xi) Cleaning and cleaning solvent usage associated with research and development, quality control, and laboratory testing;
- (xii) Cleaning operations, using nonflammable liquids, conducted within five feet of energized electrical systems (energized electrical systems means any AC or DC electrical circuit on an assembled aircraft once electrical power is connected, including interior passenger and cargo areas, wheel wells and tail sections); and
- (xiii) Cleaning operations identified as essential uses under the Montreal Protocol for which the USEPA has allocated essential use allowances or exemptions in 40 CFR 82.4.

(2) Spray gun cleaning operations.

- (a) Except as otherwise provided in paragraph (E)(2)(b) of this rule, any spray gun to be cleaned shall be cleaned by one or more of the techniques specified in paragraphs (E)(2)(a)(i) to (E)(2)(a)(iv) of this rule.

- (i) Enclosed system.

- (a) Clean the spray gun in an enclosed system that is closed at all times except when inserting or removing the spray gun. Cleaning shall consist of forcing solvent through the gun.
  - (b) Visually inspect the seals and other potential sources of leaks associated with the enclosed system at least once per month. If leaks are found, repairs shall be made as soon as practicable, but no later than fifteen days after the leak was found. If the leak is not repaired by the fifteenth day after detection, the cleaning solvent shall be removed, and the enclosed cleaner shall be shut down until the leak is repaired or its use is permanently discontinued.

- (ii) Nonatomized cleaning.

Clean the spray gun by placing cleaning solvent in the pressure pot and forcing it through the gun with the atomizing cap in place. No atomizing air is to be used. Direct the cleaning solvent from the spray gun into a vat, drum, or other waste container that is closed when not in use.

- (iii) Disassembled spray gun cleaning.

Disassemble the spray gun and clean the components by hand in a vat, which shall remain closed at all times except when in use.

Alternatively, soak the components in a vat, which shall remain closed during the soaking period and when not inserting or removing components.

(iv) Atomized cleaning.

Clean the spray gun by forcing the cleaning solvent through the gun and directing the resulting atomized spray into a waste container that is fitted with a device designed to capture the atomized cleaning solvent emissions.

- (b) The cleaning of nozzle tips of automated spray equipment systems, except for robotic systems that can be programmed to spray into a closed container, shall be exempt from the requirements of paragraph (E)(2)(a) of this rule.

(3) Flush cleaning operations.

- (a) Except as otherwise provided in paragraph (E)(3)(b) of this rule, the used cleaning solvent of any flush cleaning operation shall be emptied into an enclosed container or collection system that is kept closed when not in use or captured with wipers provided they comply with the housekeeping requirements of paragraph (E)(4) of this rule.

- (b) Excluded from the requirements of paragraph (E)(3)(a) of this rule is any cleaning solvent that meets any of the following specifications:

(i) Meets the definition of an aqueous cleaning solvent;

(ii) Has a VOC composite vapor pressure of 7.0 millimeters of mercury (3.75 inches of water) or less at twenty degrees Celsius (sixty-eight degrees Fahrenheit); or

(iii) Meets the definition of a semiaqueous cleaning solvent.

(4) Housekeeping measures for cleaning solvents and solvent-laden cleaning materials used in cleaning operations.

- (a) Except for semiaqueous cleaning solvents and where excluded under paragraph (E)(4)(d) of this rule, all fresh and spent cleaning solvents shall be stored in nonabsorbent, nonleaking containers that are kept closed at all times except when filling or emptying.

- (b) Except where excluded under paragraph (E)(4)(d) of this rule, all used solvent-laden cloths and papers, and any other absorbent applicators used for cleaning, shall be placed in nonabsorbent, nonleaking containers or bags

that are kept closed at all times except when depositing or removing these materials from the container or bag.

- (c) Except where excluded under paragraph (E)(4)(d) of this rule, the handling and transfer of cleaning solvents to or from enclosed systems, vats, waste containers, and other cleaning operation equipment that hold or store fresh or spent cleaning solvents shall be conducted in such a manner that minimizes spills.
- (d) Excluded from the requirements of paragraphs (E)(4)(a) to (E)(4)(c) of this rule is the use of any cleaning solvent that meets any of the following specifications:
  - (i) Meets the definition of an aqueous cleaning solvent; or
  - (ii) Has a VOC composite vapor pressure of 7.0 millimeters of mercury (3.75 inches of water) or less at twenty degrees Celsius (sixty-eight degrees Fahrenheit).

(F) Compliance Dates.

- (1) Except where otherwise specified within this rule, any owner or operator of a facility that is subject to this rule shall comply with the requirements of this rule by no later than the following dates:
  - (a) For an aerospace manufacturing or rework facility for which installation commenced before the effective date of this rule, the compliance date is either twelve months after the effective date of this rule or the date of initial startup of the aerospace manufacturing or rework facility, whichever is later.
  - (b) For an aerospace manufacturing or rework facility for which installation commenced on or after the effective date of this rule, the compliance date is the date of initial startup of the aerospace manufacturing or rework facility.
- (2) For a VOC emission control system that is used for a coating operation to comply with paragraph (D)(2) of this rule, the owner or operator shall demonstrate the overall control efficiency of the VOC emission control system and the control efficiency of any thermal or catalytic oxidizer within the VOC emission control system by testing the coating operation and the VOC emission control system in accordance with paragraph (I) of this rule within ninety days after the coating operation's compliance date.
- (3) Additional testing of the coating operation and the VOC emission control system in accordance with paragraph (I) of this rule may be required by the director to ensure continued compliance.

## (G) Monitoring requirements for a VOC emission control system.

For a VOC emission control system that is used for a coating operation to comply with paragraph (D)(2) of this rule, the owner or operator shall meet the same monitoring requirements as contained in paragraph (H) of rule 3745-21-15 of the Administrative Code.

## (H) Procedures for the VOC content of a coating, the VOC content of a coating applied by a dip coater, the composition of a cleaning solvent, and the VOC composite vapor pressure of a cleaning solvent.

- (1) The VOC content of a coating shall be determined by the owner or operator in accordance with paragraph (B) of rule 3745-21-10 of the Administrative Code, wherein formulation data or USEPA Method 24 procedures (which include various ASTM measurement methods) may be employed.
- (2) VOC content of a coating applied by a dip coater (rolling thirty-day average VOC content).

The as applied VOC content of a coating applied by a dip coater shall be determined by the owner or operator as a rolling thirty-day average of the VOC content of the material (coating and thinner) added to the reservoir of the dip coater. The rolling thirty-day average VOC content ( $C_{30}$ ), expressed in pounds of VOC per gallon of coating, excluding water and exempt solvents, as applied, shall be calculated for each day of operation of the dip coater as follows:

$$C_{30} = \frac{\sum_{i=1}^n (A_{i,30})(C_{i,VOC})}{\sum_{i=1}^n (A_{i,30})(V_{i,VOC} + V_{i,solids})}$$

Where:

$A_{i,30}$  = amount of material i added to the reservoir of the dip coater during a thirty-day period consisting of the day of operation of the dip coater plus the previous twenty-nine calendar days, expressed in gallons.

$C_{i,VOC}$  = VOC content of material i expressed in pounds of VOC per gallon.

$V_{i,solids}$  = volume fraction of solids (nonvolatile matter) in material i.

$V_{i,VOC}$  = volume fraction of VOC in material i.

i = subscript denoting a specific material (coating or thinner) added to the reservoir of the dip coater during the thirty-day period.

n = total number of materials (coatings and thinners) added to the reservoir of the dip coater during the thirty-day period.

- (3) The composition of a cleaning solvent shall be based upon data supplied by the manufacturer of the cleaning solvent. The data shall identify all components of the cleaning solvent.
- (4) The VOC composite vapor pressure of a cleaning solvent shall be determined by the owner or operator in accordance with paragraph (S) of rule 3745-21-10 of the Administrative Code.

(I) Compliance tests for VOC emission control systems.

- (1) For a VOC emission control system used to comply with paragraph (D)(2) of this rule, the owner or operator shall conduct a compliance test to determine the capture efficiency of the capture system, the control efficiency of the control device (or each control device if a combination of control devices is employed), and the overall control efficiency of the VOC emission control system in accordance with paragraph (C) of rule 3745-21-10 of the Administrative Code wherein USEPA Method 25 or 25A shall be used for determining the concentration of VOC in a gas stream.
- (2) During the compliance test described in paragraph (I)(1) of this rule that demonstrates compliance, the owner or operator shall establish the operating limits (operating parameter values) for the monitoring devices required under paragraph (G) of this rule by following the requirements contained in paragraph (J)(2) of rule 3745-21-15 of the Administrative Code.

(J) Recordkeeping.

- (1) (General) All records specified under paragraph (J) of this rule shall be retained by the owner or operator for a period of not less than five years and shall be made available to the director or any authorized representative of the director for review during normal business hours. The following types of records are to be maintained by the owner or operator of an aerospace manufacturing or rework facility subject to this rule:
  - (a) Compliance demonstration records for coating operations.
  - (b) Compliance demonstration records for cleaning operations.
  - (c) Monitoring records for VOC emission control systems.

(2) Compliance demonstration records for coating operations.

For any coating operation subject to paragraph (D) of this rule, the owner or operator shall maintain the following records:

- (a) For each coating in use at the facility:
  - (i) The name and VOC content as received and as applied.
  - (ii) The type of coating, as identified in paragraphs (D)(1)(a) and (D)(1)(b) of this rule.
  - (iii) Where applicable, identification of the coating as designated for control pursuant to paragraph (D)(2) of this rule or exempted pursuant to paragraphs (D)(3)(a) to (D)(3)(e) of this rule.
- (b) All data, calculations, and test results (including USEPA Method 24 results) used in determining the VOC content of each coating, expressed in pounds of VOC per gallon of coating, excluding water and exempt solvents, as applied.
- (c) The amount (gallons) of each coating used each month at the facility.
- (d) For any coating operation controlled by a VOC emission control system:
  - (i) Identification of the coating line.
  - (ii) Documentation on the overall control efficiency of the VOC emission control system and the control efficiency of any thermal or catalytic oxidizer within the VOC emission control system, including design estimates and the results of compliance tests conducted pursuant to paragraphs (F)(2), (F)(3), and (I) of this rule.
  - (iii) For any coating that is controlled by the VOC emission control system, the name of the coating, the dates (or time periods) of control, and the amount (gallons) of such coating controlled each month.
- (e) Records pertaining to a rolling thirty-day average VOC content for a dip coater:
  - (i) For each day of operation, the gallons of each material (coating and thinner) added to the dip coater reservoir.
  - (ii) The VOC content (in pounds of VOC per gallon), volume fraction VOC, and volume fraction solids for each material added to the dip coater reservoir.

- (iii) For each day of operation, the rolling thirty-day average VOC content in pounds of VOC per gallon of coating, excluding water and exempt solvent, as applied, as determined in accordance with paragraph (H)(2) of this rule.
- (f) Records pertaining to the low usage coating exemption (for coating formulations elected by the owner or operator as being subject to the low usage restrictions under paragraph (D)(3)(e) of this rule):
  - (i) The name of each separate coating formulation;
  - (ii) The amount (gallons) used during the month at the facility for each separate coating formulation; and
  - (iii) The total amount (gallons) used during the calendar year at the facility for each separate coating formulation and for all such coatings formulations combined.

(3) Compliance demonstration records for cleaning operations.

For cleaning operations subject to paragraph (E) of this rule, the owner or operator shall maintain the following records, where appropriate:

- (a) The name, vapor pressure (i.e., VOC composite vapor pressure), and documentation showing the composition of each cleaning solvent used.
- (b) A listing of cleaning operations in which each cleaning solvent is used.
- (c) For each cleaning solvent used in hand wipe cleaning operations that complies with the water composition requirement under the paragraph (E)(1)(a)(i) of this rule or the VOC composite vapor pressure requirement under paragraph (E)(1)(a)(ii) of this rule:
  - (i) The name of each cleaning solvent used;
  - (ii) All data and calculations that demonstrate the cleaning solvent complies with either the water composition requirement or VOC composite vapor pressure requirement; and
  - (iii) The amount (gallons) of each cleaning solvent used each year, as determined from facility purchase or usage records.
- (d) For each cleaning solvent used in hand wipe cleaning operations that does not comply with the requirements under paragraph (E)(1)(a) of this rule, but is exempted under paragraph (E)(1)(b) of this rule:

- (i) The name of each cleaning solvent used;
  - (ii) A list of the exempted hand wipe cleaning operations set forth in paragraph (E)(1)(b) of this rule in which each cleaning solvent is used; and
  - (iii) The amount (gallons) of each cleaning solvent used each year, as determined from facility purchase or usage records.
- (e) For each cleaning solvent used in flush cleaning operations that complies with the water composition requirement under paragraph (E)(3)(b)(i) or (E)(3)(b)(iii) of this rule or the VOC composite vapor pressure requirement under paragraph (E)(3)(b)(ii) of this rule:
- (i) The name of each cleaning solvent used;
  - (ii) All data and calculations that demonstrate the cleaning solvent complies with either the water composition requirement or VOC composite vapor pressure requirement; and
  - (iii) The amount (gallons) of each cleaning solvent used each year, as determined from facility purchase or usage records.
- (f) For any enclosed spray gun cleaner subject to paragraph (E)(2)(a)(i) of this rule:
- (i) A record or schedule of visual inspections of the seals and other potential sources of leaks;
  - (ii) For each leak found:
    - (a) Identification of the type of leak;
    - (b) Date leak was discovered; and
    - (c) Date leak was repaired.

(4) Monitoring records for VOC emission control systems.

For a VOC emission control system subject to paragraph (G) of this rule, the owner or operator shall maintain the same monitoring records as specified under paragraph (K)(5) of rule 3745-21-15 of the Administrative Code.

(K) Reporting requirements.

(1) (General) The provisions under paragraph (K) of this rule describe the contents of reports and identify the reporting dates for the following reports:

- (a) Initial compliance status.
- (b) Semiannual compliance status.

(2) Initial compliance status report.

The owner or operator of an aerospace manufacturing or rework facility subject to this rule shall submit an initial compliance status report within sixty calendar days after the compliance date specified in paragraph (F) of this rule as follows:

- (a) For any coating operation subject to the VOC content limit of paragraph (D)(1) of this rule, the owner or operator shall state in the initial compliance status report the type of coating, the VOC content limit for the coating, and that only coatings meeting the applicable VOC content limit are to be employed, unless otherwise controlled pursuant to paragraph (D)(2) of this rule or exempted pursuant to paragraph (D)(3) of this rule.
- (b) For any coating that is applied by means of a dip coater, that is subject to the VOC content limit of paragraph (D)(1) of this rule, and that complies by the procedures of paragraph (H)(2) of this rule pertaining to a rolling thirty-day average VOC content, the owner or operator shall state in the initial compliance status report that only coatings meeting the applicable VOC content limit, as determined by the procedures of paragraph (H)(2) of this rule, are to be employed.
- (c) For any coating operation that is equipped with a VOC emission control system to comply with paragraph (D)(2) of this rule, the owner or operator shall submit in the initial compliance status report:
  - (i) Information on the types of coatings to be controlled.
  - (ii) Identification and description of each monitoring device employed to comply with the requirements of paragraph (G) of this rule.
  - (iii) The results of compliance tests conducted pursuant to paragraph (I) of this rule to determine the overall control efficiency of the VOC emission control system and the control efficiency of any thermal or catalytic oxidizer within the VOC emission control system.
  - (iv) A complete test report for any compliance tests of the VOC emission control system.

A complete test report shall include a brief process description, sampling site description, description of sampling and analysis procedures and any modifications to standard procedures, quality assurance procedures, record of operating conditions during the test, record of preparation of standards, record of calibrations, raw data sheets for field sampling, raw data sheets for field and laboratory analyses, documentation of calculations, and any other information required by the test method.

- (v) For any compliance tests of the VOC emission control system, the compliance test monitoring data recorded pursuant to paragraph (I)(2) of this rule, including the operating parameter values established for any monitoring device.
- (d) For cleaning operations subject to paragraph (E) of this rule, the owner or operator shall submit in the initial compliance status report:
  - (i) A description of the types of cleaning operations;
  - (ii) A listing of the cleaning solvents being employed in each cleaning operation; and
  - (iii) A statement that all cleaning operations are to comply with the applicable requirements under paragraph (E) of this rule.
- (3) Semiannual compliance status reports.

The owner or operator of an aerospace manufacturing or rework facility subject to this rule shall submit semiannual compliance status reports no later than thirty calendar days after the end of each six-month period to the appropriate Ohio environmental protection agency district office or local air agency. The first report shall be submitted no later than thirty calendar days after the end of the first six-month period following the compliance date. Subsequent reports shall be submitted no later than thirty calendar days after the end of each six-month period following the first report or no later than thirty calendar days after the end of each six-month period otherwise established within a permit issued for the aerospace manufacturing or rework facility. For each semiannual compliance status report, the owner or operator shall submit the following information for the six-month period covered by the report:

- (a) For any coating operation subject to paragraph (D)(1) of this rule, the owner or operator shall state in the semiannual compliance status report any changes to the previous reporting of the types of coatings and the VOC content limits for the coatings.

- (b) For any coating that is applied by means of a dip coater and that is subject to the VOC content limit of paragraph (D)(1) of this rule, the owner or operator shall state in the semiannual compliance status report any changes to the previous reporting of procedures for determining the VOC content of the coating.
- (c) For any VOC emission control system employed to meet paragraph (D)(2) of this rule, any changes to monitoring devices previously reported and required under paragraph (G) of this rule.
- (d) If any subsequent compliance tests of the VOC emission control system are conducted during the semiannual reporting period after the initial compliance status report has been submitted, the semiannual compliance status report shall include the results of each compliance test, a complete test report, and the compliance test monitoring data as described under paragraphs (K)(2)(c)(iii) to (K)(2)(c)(v) of this rule.
- (e) For cleaning operations subject to paragraph (E) of this rule, the owner or operator shall submit in the semiannual compliance status report any changes to the previous reporting of the description of the types of cleaning operations and the listing of the cleaning solvents employed in each cleaning operation.
- (f) Compliance certification for semiannual reporting period.

The owner or operator shall submit with the semiannual compliance status report, the following compliance certifications, where applicable:

- (i) For any coating that is subject to a VOC content limit of paragraph (D)(1) of this rule, the compliance certification shall state that only coatings which comply with the applicable VOC content limit have been used each operating day in the semiannual reporting period, or should otherwise identify the periods of use of coatings that did not comply, the reasons for such use of noncompliant coatings, and the amounts and VOC contents of each such noncompliant coating used. Use of a noncompliant coating is a separate violation for each day the noncompliant coating is used.
- (ii) For any coating that is applied by means of a dip coater, that is subject to a VOC content limit of paragraph (D)(1) of this rule, and that complies by the procedures of paragraph (H)(2) of this rule, the compliance certification shall state that only coatings which comply with the applicable VOC content limit, as determined by the procedures of paragraph (H)(2) of this rule, have been used each operating day in the semiannual reporting period, or should otherwise identify the periods of use of coatings that did not comply, the reasons for the use

of such noncompliant coatings, and the amounts and VOC contents of each such noncompliant coating used. Use of a noncompliant coating is a separate violation for each day the noncompliant coating is used.

- (iii) For any coating operation that is equipped with a VOC emission control system to comply with paragraph (D)(3) of this rule:
  - (a) The compliance certification shall state that the three-hour block averages of the monitoring parameters recorded pursuant to paragraph (K)(5) of this rule had complied with the operating limits (operating parameter values) for the monitoring parameters established under paragraph (J)(2) of this rule during of all periods of operation of the coating operation in the semiannual reporting period; or should otherwise identify the times and durations of all periods of noncompliance and the reasons for noncompliance.
  - (b) The compliance certification shall identify the times and durations of all periods during coating operation or control operation when the monitoring device is not working, as recorded pursuant to paragraph (J)(3) of this rule and paragraph (K)(5) of rule 3745-21-15 of the Administrative Code.
  - (c) For any capture system bypass line, the compliance certification shall identify the times and durations of all periods in which the captured VOC emissions were discharged to atmosphere instead of a control device, as recorded pursuant to paragraph (J)(3) of this rule and paragraph (K)(5)(f) of rule 3745-21-15 of the Administrative Code, and the reasons for the discharges to atmosphere.
  - (d) The compliance certification shall state that the overall reduction and control of VOC emissions, based on the most recent compliance test conducted in accordance with paragraph (I) of this rule, has met the requirements under paragraph (D)(2) of this rule for each coating designated for control during the semiannual reporting period, or should otherwise identify the periods of noncompliance and the reasons for noncompliance.
- (iv) For coatings subject to the low usage exemption under paragraph (D)(3)(e) of this rule, the compliance certification shall state that the usage of these coatings during the semiannual reporting period did not exceed the annual usage restrictions for the calendar year, or should otherwise identify for each noncompliance of any annual usage restriction the reasons for the noncompliant usage and the amounts and VOC contents of the coatings used in the noncompliant usage.

- (v) For cleaning operations subject to paragraph (E) of this rule, the compliance certification shall identify for the semiannual reporting period:
  - (a) Any instance where a noncompliant cleaning solvent is used for a hand wipe cleaning operation that is not exempted under paragraph (E)(1)(b) of this rule;
  - (b) Any instance where a noncompliant spray gun cleaning method is used;
  - (c) Any instance where a leaking enclosed spray gun cleaner remains unrepaired and in use for more than fifteen days;
  - (d) Any other instance of noncompliance with a requirement under paragraph (E) of this rule; and
  - (e) If the cleaning operations have been in compliance for the semiannual reporting period, a statement that the cleaning operations have been in compliance with the applicable requirements.
- (vi) The compliance certification shall identify and describe any corrective actions considered and implemented for any noncompliance being reported in the compliance certification.
- (vii) The compliance certification shall be signed by the responsible official of a Title V facility, as defined in OAC rule 3745-77-01 or the signatory authority under OAC rule 3745-31-02 for a facility that is not Title V, that owns or operates the aerospace manufacturing or rework facility.

(L) Requirements on applicability notification and permit application.

- (1) The owner or operator of an aerospace manufacturing or rework facility that is subject to this rule and that has an initial startup of coating or cleaning operations before the effective date of this rule shall notify the appropriate Ohio environmental protection agency district office or local air agency in writing that the facility is subject to this rule. The notification, which shall be submitted not later than sixty days after the effective date of this rule, shall provide the following information:
  - (a) Name and address of the owner or operator;
  - (b) Address (i.e., physical location) of the facility;

- (c) Equipment description and Ohio EPA application number (if assigned) of any coating or cleaning operations;
  - (d) Identification of the applicable requirements, the means of compliance, and the compliance date for the coating and cleaning operations under this rule;
  - (e) Regarding a permit for coating and cleaning operations, whichever of the following is applicable;
    - (i) Submission of an application for a permit-to-operate, modification, or renewal of a permit-to-operate in accordance with paragraph (B) of rule 3745-35-02 of the Administrative Code; or
    - (ii) Statement of intent to submit an application for a Title V permit or modification of a Title V permit in accordance with rule 3745-77-02 or rule 3745-77-08 of the Administrative Code, respectively.
- (2) The owner or operator of an aerospace manufacturing or rework facility that is subject to this rule and that has an initial startup of coating or cleaning operations on or after the effective date of this rule shall notify the appropriate Ohio environmental protection agency district office or local air agency in writing that the facility is subject to this rule. The notification, which shall be submitted not later than either the date of initial startup of the facility's coating or cleaning operations or sixty days after the effective date of this rule (whichever is later), shall provide the information listed under paragraph (L)(1) of this rule. The application for a permit-to-install under rule 3745-31-02 of the Administrative Code may be used to fulfill the notification requirements of this paragraph.

3745-21-20

**Control of volatile organic emissions from shipbuilding and ship repair operations (marine coatings).**

[Comment: For dates and availability of non-regulatory government publications, publications of recognized organizations and associations, federal rules, and federal statutory provisions referenced in this rule, see the "Incorporation by Reference" paragraph at the end of rule 3745-21-01 of the Administrative Code.]

(A) Applicability.

- (1) Except as otherwise provided in paragraph (A)(2) of this rule, this rule shall apply to any facility that meets both of the following conditions:
  - (a) The facility has shipbuilding or ship repair operations; and
  - (b) The facility is located in Ashtabula, Cuyahoga, Geauga, Lake, Lorain, Medina, Portage, or Summit county.
- (2) Excluded from the requirements of this rule is any facility that has the potential to emit for VOC of less than 25.0 tons per year for all shipbuilding and ship repair operations combined. However, this exclusion is not available for any facility that has, or once had, the potential to emit for VOC of equal to or greater than 25.0 tons per year for all shipbuilding and ship repair operations combined on or after the facility's compliance date specified under paragraph (F) of this rule.

(B) Definitions.

The definitions applicable to this rule are contained in paragraph (BB) of rule 3745-21-01 of the Administrative Code.

(C) Overall requirements for shipbuilding or ship repair operations.

Any owner or operator of shipbuilding or ship repair operations that are subject to this rule shall comply with the requirements of paragraphs (D) to (L) of this rule.

(D) VOC emission limitations for marine coatings.

- (1) Except as otherwise provided in paragraphs (D)(2) and (D)(3) of this rule, a person shall not apply any marine coating that contains VOC in excess of the VOC content limits specified in table A of this rule:

-Table A: VOC content limits for marine coatings<sup>a</sup>.-

Category of Marine Coating	Pounds of VOC per gallon of coating, excluding water and	Pounds of VOC per gallon of solids, as applied, if the	Pounds of VOC per gallon of solids, as applied, if the
----------------------------	--	--	--

	exempt solvents, as applied	temperature is equal to or greater than forty degrees Fahrenheit	temperature is less than forty degrees Fahrenheit <sup>b</sup>
General use coating	2.8	4.8	6.1
Specialty coating:			
Air flask coating	2.8	4.8	6.1
Antenna coating	4.4	12.0	N/A
Antifoulant coating	3.3	6.4	8.1
Heat resistant coating	3.5	7.0	8.9
High-gloss coating	3.5	7.0	8.9
High-temperature coating	4.2	10.3	13.3
Inorganic zinc (high-build) coating	2.8	4.8	6.1
Interior coating	2.8	4.8	6.1
Military exterior coating	2.8	4.8	6.1
Mist coating	5.1	18.7	N/A
Navigational aids coating	4.6	13.3	N/A
Nonskid coating	2.8	4.8	6.1
Nuclear coating	3.5	7.0	8.9
Organic zinc coating	3.0	5.3	6.7
Pretreatment coating	6.5	92.6	N/A
Repair and maintenance thermoplastic coating	4.6	13.3	N/A

Sealant coating for thermal spray aluminum	5.1	18.7	N/A
Special marking coating	4.1	9.8	N/A
Tack coating	5.1	18.7	N/A
Undersea weapons systems coating	2.8	4.8	6.1
Weld-through preconstruction primer	5.4	24.1	N/A

<sup>a</sup> The limits are expressed in two sets of equivalent units in the second and third columns of table A of this rule. Either set of limits may be used for the compliance procedure described in paragraph (H)(4)(a) of this rule, but only the limits expressed in units of pounds of VOC per gallon of solids (non-volatiles) shall be used for the compliance procedures described in paragraphs (H)(4)(b), (H)(4)(c), and (H)(5) of this rule.

<sup>b</sup> The limits in the fourth column of table A of this rule apply during cold-weather time periods, as defined under paragraph (BB) of rule 3745-21-01 of the Administrative Code. Cold-weather allowances are not given to coatings in categories that permit more than a forty per cent VOC content by volume. Such coatings are subject to the limits in second and third columns of the table in this rule regardless of weather conditions.

(2) VOC emission control system for a coating.

In lieu of the VOC content limit for any coating subject to paragraph (D)(1) of this rule, a VOC emission control system shall be used that achieves, for each coating employed and designated for control, an overall reduction of VOC emissions that is equal to or greater than the required overall control efficiency determined in accordance with paragraph (H)(5) of this rule. Also, if the VOC emission control system includes a thermal or catalytic oxidizer, the control efficiency of the thermal or catalytic oxidizer for VOC emissions shall be at least ninety per cent by weight.

(3) The following coating applications are exempt from the VOC content limits listed in paragraph (D)(1) of this rule:

(a) Aerosol coatings

(b) Unsaturated polyester resin (i.e., fiberglass lay-up) coatings (however, coatings applied to suitably prepared fiberglass surfaces for protective or decorative purposes are subject to this rule).

(c) Coatings that meet the following low usage restrictions at the facility:

(i) Total usage of each separate coating formulation does not exceed fifty gallons per rolling twelve month period; and

(ii) Total usage of all such coating formulations combined does not exceed two hundred fifty gallons per rolling twelve month period.

(E) Requirements for handling and transfer of marine coatings and thinners.

Any owner or operator of shipbuilding or ship repair operations shall ensure that:

- (1) All handling and transfer of marine coatings and thinners to and from containers, tanks, vats, drums, and piping systems is conducted in a manner that minimizes spills.
- (2) All containers, tanks, vats, drums, and piping systems are free of cracks, holes, and other defects and remain closed unless materials are being added to or removed from them.

(F) Compliance dates.

- (1) Except where otherwise specified within this rule, any owner or operator of shipbuilding or ship repair operations that are subject to this rule shall comply with the requirements of this rule by no later than the following dates:
  - (a) For shipbuilding or ship repair operations for which installation commenced before the effective date of this rule, the compliance date is either twelve months after the effective date of this rule or the date of initial startup of the shipbuilding or ship repair operations, whichever is later.
  - (b) For shipbuilding or ship repair operations for which installation commenced on or after the effective date of this rule, the compliance date is the date of initial startup of the shipbuilding or ship repair operations.
- (2) For a VOC emission control system that is used for a coating to comply with paragraph (D)(2) of this rule, the owner or operator shall demonstrate the overall control efficiency of the VOC emission control system and the control efficiency of any thermal or catalytic oxidizer within the VOC emission control system by testing the coating operation and the VOC emission control system in accordance with paragraph (I) of this rule within ninety days after the compliance date of the shipbuilding or ship repair operations.
- (3) Additional testing of the coating operation and the VOC emission control system in accordance with paragraph (I) of this rule may be required by the director to ensure continued compliance.

(G) Monitoring requirements for a VOC emission control system.

For a VOC emission control system that is used for a coating to comply with paragraph (D)(2) of this rule, the owner or operator shall meet the same monitoring requirements as contained in paragraph (H) of rule 3745-21-15 of the Administrative Code.

(H) Procedures for the VOC content and solids content of a coating and the determination of required overall control efficiency for controlled coatings.

- (1) The VOC content and solids content of a coating shall be determined by the owner or operator in accordance with paragraph (B) of rule 3745-21-10 of the Administrative Code, wherein formulation data or USEPA Method 24 procedures (which include various ASTM measurement methods) may be employed.
- (2) For each batch of coating that is received by the facility, the owner or operator shall:
  - (a) Determine the coating category and the applicable VOC limit as specified under in paragraph (D)(1) of this rule.
  - (b) Certify the as supplied VOC content of the batch of coating. The owner or operator may use a certification supplied by the manufacturer for the batch, although the owner or operator retains liability should subsequent testing reveal a violation. If the owner or operator performs the certification testing, only one of the containers in which the batch of coating was received is required to be tested.
- (3) In lieu of testing each batch of coating, as applied, the owner or operator may determine compliance with the VOC content limits using any combination of the procedures described in paragraphs (H)(4)(a) to (H)(4)(c) of this rule. The procedure used for each coating shall be determined and documented prior to application. However, the results of any compliance demonstration conducted by the owner or operator or any regulatory agency using USEPA Method 24 shall take precedence over the results using the procedures in paragraphs (H)(4)(a), (H)(4)(b), and (H)(4)(c) of this rule.
- (4) Compliance procedures for as applied VOC content of coatings.
  - (a) Coatings to which thinning solvent will not be applied.

For coatings to which thinning solvent (or any other material) will not be added under any circumstance or to which only water is added, the owner or operator shall comply as follows:

    - (i) Certify the as applied VOC content of each batch of coating.
    - (ii) Notify the persons responsible for applying the coating that no thinning solvent may be added to the coating by affixing a label to each container of coating in the batch or through another means.
    - (iii) If the certified as applied VOC content of each batch of coating used during any day is less than or equal to the applicable VOC content limit in paragraph (D)(1) of this rule (either in terms of pounds of VOC per gallon of coating, excluding water and exempt solvents, or pounds of

VOC per gallon of solids), then compliance is demonstrated for each day, unless non compliance is determined using USEPA Method 24.

- (b) Coatings to which thinning solvent will be added (coating-by-coating compliance).

For a coating to which thinning solvent is routinely or sometimes added, the owner or operator shall comply as follows:

- (i) Prior to the first application of each batch, designate a single thinner for the coating and calculate the maximum allowable thinning ratio (or ratios, if the coating shall comply with the cold-weather limits in addition to the other limits specified in paragraph (D)(1) of this rule for each batch as follows:

$$R = \frac{(V_S)(VOC_{limit}) - m_{VOC}}{D_{th}} \quad \text{Equation 1}$$

where:

R = Maximum allowable thinning ratio for a given batch (gallons of thinner per gallon of coating as supplied);

$V_S$  = Volume fraction of solids in the batch as supplied (gallon of solids per gallon of coating as supplied);

$VOC_{limit}$  = Maximum allowable as-applied VOC content of the coating (pound VOC per gallon of solids);

$m_{VOC}$  = VOC content of the batch as supplied [pounds VOC (including cure volatiles) per gallon of coating (including water and exempt compounds) as supplied]; and

$D_{th}$  = Density of the thinner (pounds per gallon).

If  $V_S$  is not supplied directly by the coating manufacturer, the owner or operator shall determine  $V_S$  as follows:

$$V_S = 1 - \frac{m_{volatiles}}{D_{avg}} \quad \text{Equation 2}$$

where:

$m_{\text{volatiles}}$  = Total volatiles in the batch, including VOC, water, and exempt compounds (pounds of volatiles per gallon of coating); and

$D_{\text{avg}}$  = Average density of volatiles in the batch (pounds per gallon).

- (ii) Prior to the first application of each batch, notify painters and other persons, as necessary, of the designated thinner and maximum allowable thinning ratio(s) for each batch of the coating by affixing a label to each container of coating or through another means.
- (iii) By the fifteenth day of each calendar month, determine the volume of each batch of the coating used, as supplied, during the previous month.
- (iv) By the fifteenth day of each calendar month, determine the total allowable volume of thinner for the coating used during the previous month as follows:

$$V_{\text{th}} = \sum_{i=1}^n (R \times V_b)_i + \sum_{i=1}^n (R_{\text{cold}} \times V_{b\text{-cold}})_i \quad \text{Equation 3}$$

Where:

$V_{\text{th}}$  = Total allowable volume of thinner for the previous month (gallons of thinner);

$V_b$  = Volume of each batch, as supplied and before being thinned, used during non-cold-weather days of the previous month (gallons of coating as supplied);

$R_{\text{cold}}$  = Maximum allowable thinning ratio for each batch used during cold-weather days (gallons of thinner per gallon of coating as supplied);

$V_{b\text{-cold}}$  = Volume of each batch, as supplied and before being thinned, used during cold-weather days of the previous month (gallons of coating as supplied);

$i$  = Each batch of coating; and

$n$  = Total number of batches of the coating.

- (v) By the fifteenth day of each calendar month, determine the volume of thinner actually used with the coating during the previous month.

- (vi) If the volume of thinner actually used with the coating [paragraph (H)(4)(b)(v) of this rule] is less than or equal to the total allowable volume of thinner for the coating [paragraph (H)(4)(b)(iv) of this rule], then compliance is demonstrated for the coating for each operating day of the previous month, unless a violation is revealed using USEPA Method 24.
- (c) Coatings to which the same thinning solvent will be added (group compliance).

For coatings to which the same thinning solvent (or other material) is routinely or sometimes added, the owner or operator shall comply as follows:

- (i) Designate a single thinner to be added to each coating during the month and "group" coatings according to their designated thinner.
- (ii) Prior to the first application of each batch, calculate the maximum allowable thinning ratio (or ratios, if the coating shall comply with the cold-weather limits in addition to the other limits specified in paragraph (D)(1) of this rule) for each batch of coating in the group using the equations in paragraph (H)(4)(b) of this rule.
- (iii) Prior to the first application of each "batch," notify painters and other persons, as necessary, of the designated thinner and maximum allowable thinning ratio(s) for each batch in the group by affixing a label to each container of coating or through another means described in the implementation plan specified in paragraph (J)(2)(a) of this rule.
- (iv) By the fifteenth day of each calendar month, determine the volume of each batch of the group used, as supplied, during the previous month.
- (v) By the fifteenth day of each calendar month, determine the total allowable volume of thinner for the group for the previous month using equation 3 in paragraph (H)(4)(b)(iv) of this rule.
- (vi) By the fifteenth day of each calendar month, determine the volume of thinner actually used with the group during the previous month.
- (vii) If the volume of thinner actually used with the group [paragraph (H)(4)(c)(vi) of this rule] is less than or equal to the total allowable volume of thinner for the group [paragraph (H)(4)(c)(v) of this rule], then compliance is demonstrated for the group for each operating day of the previous month, unless a violation is revealed using USEPA Method 24.

(d) A violation revealed through any approved test method shall result in a one-day violation for enforcement purposes. A violation revealed through the recordkeeping procedures described in paragraphs (H)(4)(c)(1) to (H)(4)(c)(3) of this rule shall result in a thirty-day violation for enforcement purposes, unless the owner or operator provides sufficient data to demonstrate the specific days during which noncompliant coatings were applied.

(5) Determination of required overall control efficiency for controlled coatings.

For a VOC emission control system that is used to comply with paragraph (D)(2) of this rule, the overall reduction of VOC emissions, that is, the required overall control efficiency (R), expressed in per cent by weight, shall be determined as follows for each coating designated for control:

$$R = [(C-L)/C](100)$$

Where:

C = VOC content of the coating designated for control, in pounds of VOC per pound of solids, as applied; and

L = VOC content limit under paragraph (D)(1) of this rule for the coating designated for control, in pounds of VOC per pound of solids, as applied.

(I) Compliance tests for VOC emission control systems.

- (1) For a VOC emission control system used to comply with paragraph (D)(2) of this rule, the owner or operator shall conduct a compliance test to determine the capture efficiency of the capture system, the control efficiency of the control device (or each control device if a combination of control devices is employed), and the overall control efficiency of the VOC emission control system in accordance with paragraph (C) of rule 3745-21-10 of the Administrative Code wherein USEPA Method 25 or 25A shall be used for determining the concentration of VOC in a gas stream.
- (2) During the compliance test described in paragraph (I)(1) of this rule that demonstrates compliance, the owner or operator shall establish the operating limits (operating parameter values) for the monitoring devices required under paragraph (G) of this rule by following the same requirements as contained in paragraph (J)(2) of rule 3745-21-15 of the Administrative Code.

(J) Record keeping.

- (1) (General) All records specified under paragraph (J) of this rule shall be retained by the owner or operator for a period of not less than five years and shall be

made available to the director or any authorized representative of the director for review during normal business hours. The following types of records are to be maintained by the owner or operator of shipbuilding or ship repair operations subject to this rule:

- (a) Compliance demonstration records for coating operations.
  - (b) Compliance demonstration records for the handling and transfer of marine coatings and thinners.
  - (c) Monitoring records for VOC emission control systems.
- (2) Compliance demonstration records for coating operations.

For any coating operation subject to paragraph (D)(1) of this rule, the owner or operator shall compile the following records on a monthly basis:

- (a) A copy of an implementation plan that addresses the coating compliance procedures under paragraph (H) of this rule and the recordkeeping procedures under paragraph (J) of this rule, including the procedures for gathering the necessary data and making the necessary calculations.
- (b) For coating formulations elected by the owner or operator as being subject to the low usage restrictions under paragraph (D)(3)(c) of this rule:
  - (i) The identification and gallons used during the month for each separate coating;
  - (ii) The total gallons used during the current rolling twelve month period (this month plus the previous eleven months) for each separate coating; and
  - (iii) The total gallons used during the current rolling twelve month period (this month plus the previous eleven months) for all such coatings combined.
- (c) Identification of the coatings used, their appropriate coating categories, and the applicable VOC limit;
- (d) Certification of the as-supplied VOC content of each batch of coating;
- (e) A determination of whether containers meet the requirements as described in paragraph (E)(2) of this rule;

- (f) The results of any USEPA Method 24 measurement test or approved alternative measurement test conducted on individual containers of coating, as applied; and
  - (g) The records specified under paragraphs (J)(3) and (J)(4) of this rule, where appropriate.
- (3) The records required by paragraph (J)(2) of this rule shall include additional information, as determined by the compliance procedures described in paragraph (H)(4) of this rule that each owner or operator followed:

- (a) Coatings to which thinning solvent will not be added.

The records maintained by an owner or operator demonstrating compliance using the procedure described in paragraph (H)(4)(a) of this rule shall contain the following information:

- (i) Certification of the as-applied VOC content of each batch of coating; and
  - (ii) The volume of each coating applied.
- (b) For coatings to which thinning solvent(s) will be added for coating-by-coating compliance.

The records maintained by an owner or operator demonstrating compliance using the procedure described in paragraph (H)(4)(b) shall contain the following information:

- (i) The density and mass fraction of water and exempt compounds of each thinner and the volume fraction of solids (nonvolatiles) in each batch, including any calculations;
- (ii) The maximum allowable thinning ratio (or ratios, if the coating operation complies with the cold-weather limits in addition to the other limits specified in paragraph (D)(1) of this rule for each batch of coating, including calculations;
- (iii) If an owner or operator chooses to comply with the cold-weather limits, the dates and times during which the ambient temperature at the coating operation was below forty degrees Fahrenheit (4.5 degrees Celsius) at the time the coating was applied and the volume used of each batch of the coating, as supplied, during these dates;
- (iv) The volume used of each batch of the coating, as supplied;

- (v) The total allowable volume of thinner for each coating, including calculations; and
  - (vi) The actual volume of thinner used for each coating.
- (c) Coatings to which the same thinning solvent will be added for group compliance.

The records maintained by an owner or operator demonstrating compliance using the procedure described in paragraph (H)(4)(c) of this rule shall contain the following information:

- (i) The density and mass fraction of water and exempt compounds of each thinner and the volume fraction of solids in each batch, including any calculations;
  - (ii) The maximum allowable thinning ratio (or ratios, if the coating operation complies with the cold-weather limits in addition to the other limits specified in paragraph (D)(1) of this rule) for each batch of coating, including calculations;
  - (iii) If an owner or operator chooses to comply with the cold-weather limits, the dates and times during which the ambient temperature at the coating operation was below forty degrees Fahrenheit (4.5 degrees Celsius) at the time the coating was applied and the volume used of each batch in the group, as supplied, during these dates;
  - (iv) Identification of each group of coatings and their designated thinners;
  - (v) The volume used of each batch of coating in the group, as supplied;
  - (vi) The total allowable volume of thinner for the group, including calculations; and
  - (vii) The actual volume of thinner used for the group.
- (4) For any coating operation controlled by a VOC emission control system to meet paragraph (D)(2) of this rule, the owner or operator shall maintain the following records:
- (a) Documentation on the overall control efficiency of the VOC emission control system and the control efficiency of any thermal or catalytic oxidizer within the VOC emission control system, including design estimates and the results of compliance tests conducted pursuant to paragraphs (F)(2), (F)(3), and (I) of this rule.

- (b) The following records on a monthly basis for any coating controlled by the VOC emission control system:
  - (i) The identification of the coating, and the dates (or time periods) of control.
  - (ii) For controlled coatings to which the owner or operator does not add thinning solvents, the owner or operator shall record the certification of the as supplied and as applied VOC content of each batch and the volume of each coating applied.
  - (iii) For controlled coatings to which the owner or operator adds thinning solvent on a coating-by-coating basis, the owner or operator shall record all of the information required to be recorded by paragraph (J)(3)(b) of this rule.
  - (iv) For controlled coatings to which the owner or operator adds thinning solvent on a group basis, the owner or operator shall record all of the information required to be recorded by paragraph (J)(3)(c) of this rule.
- (c) The monitoring records specified under paragraph (K)(6) of this rule.
- (5) Compliance demonstration records for the handling and transfer of marine coatings and thinners.

For the handling and transfer of marine coatings and thinners, the owner or operator shall maintain the following records on a monthly basis:

- (a) A copy of an implementation plan that addresses the procedures for ensuring compliance with the requirements for handling and transfer of marine coatings and thinners under paragraph (E) of this rule; and
  - (b) A determination on whether the requirements as described in paragraph (E)(2) of this rule are being met.
- (6) Monitoring records for VOC emission control systems.

For a VOC emission control system that is employed to meet paragraph (D)(2) of this rule, the owner or operator shall maintain the same monitoring records as specified under paragraph (K)(5) of rule 3745-21-15 of the Administrative Code.

(K) Reporting requirements.

- (1) (General) The provisions under paragraph (K) of this rule describe the contents of reports and identify the reporting dates for the following reports:

- (a) Initial compliance status report; and
  - (b) Semiannual compliance status reports.
- (2) Initial compliance status report.

The owner or operator of shipbuilding or ship repair operations subject to this rule shall submit an initial compliance status report within sixty calendar days after the compliance date specified in paragraph (F) of this rule as follows:

- (a) For any coating operation subject to the VOC content limit of paragraph (D)(1) of this rule, the owner or operator shall state in the initial compliance status report the type of coating, the VOC content limit for the coating, and that only coatings meeting the applicable VOC content limit are to be employed, unless otherwise controlled pursuant to paragraph (D)(2) of this rule or exempted pursuant to paragraph (D)(3) of this rule.
- (b) For the handling and transfer of marine coatings and thinners, the owner or operator shall provide an implementation plan that addresses the procedures for ensuring compliance with the requirements under paragraph (E) of this rule.
- (c) For any coating operation that is equipped with a VOC emission control system to comply with paragraph (D)(2) of this rule, the owner or operator shall submit in the initial compliance status report:
  - (i) Information on the types of coatings to be controlled.
  - (ii) Identification and description of each monitoring device employed to comply with the requirements of paragraph (G) of this rule.
  - (iii) The results of compliance tests conducted pursuant to paragraph (I) of this rule to determine the overall control efficiency of the VOC emission control system and the control efficiency of any thermal or catalytic oxidizer within the VOC emission control system.
  - (iv) A complete test report for any compliance tests of the VOC emission control system.

A complete test report shall include a brief process description, sampling site description, description of sampling and analysis procedures and any modifications to standard procedures, quality assurance procedures, record of operating conditions during the test, record of preparation of standards, record of calibrations, raw data sheets for field sampling, raw data sheets for field and laboratory

analyses, documentation of calculations, and any other information required by the test method.

- (v) For any compliance tests of the VOC emission control system, the compliance test monitoring data recorded pursuant to paragraph (I)(2) of this rule, including the operating parameter values established for any monitoring device.

(3) Semiannual compliance status reports.

The owner or operator of shipbuilding or ship repair operations subject to this rule shall submit semiannual compliance status reports no later than thirty calendar days after the end of each six month period to the appropriate Ohio environmental protection agency district office or local air agency. The first report shall be submitted no later than thirty calendar days after the end of the first six month period following the compliance date. Subsequent reports shall be submitted no later than thirty calendar days after the end of each six month period following the first report or no later than thirty calendar days after the end of each six month period otherwise established within a permit issued for the shipbuilding or ship repair operations. For each semiannual compliance status report, the owner or operator shall submit the following information for the six month period covered by the report:

- (a) For any coating operation subject to paragraph (D)(1) of this rule, the owner or operator shall state in the semiannual compliance status report any changes to the previous reporting of the types of coatings and the VOC content limits for the coatings.
- (b) For the handling and transfer of marine coatings and thinners, the owner or operator shall provide any change to the implementation plan identified in paragraph (K)(2)(b) of this rule that addresses the procedures for ensuring compliance with the requirements under paragraph (E) of this rule.
- (c) For any VOC emission control system employed to meet paragraph (D)(2) of this rule, any changes to monitoring devices previously reported and required under paragraph (G) of this rule.
- (d) If any subsequent compliance tests of the VOC emission control system are conducted during the semiannual reporting period after the initial compliance status report has been submitted, the semiannual compliance status report shall include the results of each compliance test, a complete test report, and the compliance test monitoring data as described under paragraphs (K)(2)(c)(iii) to (K)(2)(c)(v) of this rule.
- (e) The owner or operator shall submit with the semiannual compliance status report, the following compliance certifications, where applicable:

- (i) For any coating that is subject to a VOC content limit of paragraph (D)(1) of this rule, the compliance certification shall state that only coatings that comply with the applicable VOC content limit have been used each operating day in the semiannual reporting period, or should otherwise identify the periods of use of coatings that did not comply, the reasons for such use of noncompliant coatings, and the amounts and VOC contents of each such noncompliant coating used. Use of a noncompliant coating is a separate violation for each day the noncompliant coating is used.
- (ii) For the handling and transfer of marine coatings and thinners, the owner or operator provide any changes to the implementation plan that addresses the procedures for ensuring compliance with the requirements under paragraph (E) of this rule and shall submit information on any deviations from the implementation plan or the requirements of paragraph (E) of this rule.
- (iii) For any coating operation that is equipped with a VOC emission control system to comply with paragraph (D)(3) of this rule:
  - (a) The compliance certification shall state that the three-hour three hour block averages of the monitoring parameters recorded pursuant to paragraph (K)(5) of this rule had complied with the operating limits (operating parameter values) for the monitoring parameters established under paragraph (J)(2) of this rule during of all periods of operation of the coating operation in the semiannual reporting period; or should otherwise identify the times and durations of all periods of noncompliance and the reasons for noncompliance.
  - (b) The compliance certification shall identify the times and durations of all periods during coating operation or control operation when the monitoring device is not working, as recorded pursuant to paragraph (J)(3) of this rule and paragraph (K)(5) of rule 3745-21-15 of the Administrative Code.
  - (c) For any capture system bypass line, the compliance certification shall identify the times and durations of all periods in which the captured VOC emissions were discharged to atmosphere instead of a control device, as recorded pursuant to paragraph (J)(3) of this rule and paragraph (K)(5)(f) of rule 3745-21-15 of the Administrative Code, and the reasons for the discharges to atmosphere.

- (iv) The compliance certification shall state that the overall reduction and control of VOC emissions, based on the most recent compliance test conducted in accordance with paragraph (I) of this rule, has met the requirements under paragraph (D)(2) of this rule for each coating designated for control during the semiannual reporting period, or should otherwise identify the periods of noncompliance and the reasons for noncompliance.
- (v) For coatings subject to the low usage exemption under paragraph (D)(3)(c) of this rule, the compliance certification shall state that the usage of these coatings during the semiannual reporting period did not exceed the usage restrictions, or should otherwise identify for each noncompliance of any usage restriction the reasons for the noncompliant usage and the amounts and VOC contents of the coatings used in the noncompliant usage.
- (vi) The compliance certification shall identify and describe any corrective actions considered and implemented for any noncompliance being reported in the compliance certification.
- (vii) The compliance certification shall be signed by the responsible official of a Title V facility, as defined in OAC rule 3745-77-01 or the signatory authority under OAC rule 3745-31-02 for a facility that is not Title V, that owns or operates the shipbuilding or ship repair operations.

(L) Requirements on applicability notification and permit application.

- (1) The owner or operator of shipbuilding or ship repair operations that are subject to this rule and that have an initial startup of shipbuilding or ship repair operations before the effective date of this rule shall notify the appropriate Ohio environmental protection agency district office or local air agency in writing that the facility is subject to this rule. The notification, which shall be submitted not later than sixty days after the effective date of this rule, shall provide the following information:
  - (a) Name and address of the owner or operator;
  - (b) Address (i.e., physical location) of the facility;
  - (c) Equipment description and Ohio EPA application number (if assigned) of any coating operations;
  - (d) Identification of the applicable requirements, the means of compliance, and the compliance date for the coating operations under this rule; and

- (e) Regarding a permit for coating operations, whichever of the following is applicable;
  - (i) Submission of an application for a permit-to-operate, modification, or renewal of a permit-to-operate in accordance with paragraph (B) of rule 3745-35-02 of the Administrative Code; or
  - (ii) Statement of intent to submit an application for a Title V permit or modification of a Title V permit in accordance with rule 3745-77-02 or rule 3745-77-08 of the Administrative Code, respectively.
  
- (2) The owner or operator of shipbuilding or ship repair operations that are subject to this rule and that have an initial startup of shipbuilding or ship repair operations on or after the effective date of this rule shall notify the appropriate Ohio environmental protection agency district office or local air agency in writing that the facility is subject to this rule. The notification, which shall be submitted not later than either the date of initial startup of the facility's coating operations or sixty days after the effective date of this rule (whichever is later), shall provide the information listed under paragraph (L)(1) of this rule. The application for a permit-to-install under rule 3745-31-02 of the Administrative Code may be used to fulfill the notification requirements of this paragraph.

3745-21-21      **Storage of volatile organic liquids in fixed roof tanks and external floating roof tanks.**

[Comment: For dates of non-regulatory government publications, publications of recognized organizations and associations, federal rules, and federal statutory provisions referenced in this rule, see paragraph (HH) of rule 3745-21-01 of the Administrative Code titled "Referenced materials."]

(A) Applicability.

The requirements of this rule shall apply to any storage tank that meets all of the following criteria:

- (1) Tanks that store volatile organic liquids;
- (2) The tank is located in Ashtabula, Cuyahoga, Geauga, Lake, Lorain, Medina, Portage, or Summit county; and
- (3) The facility has a combined total potential to emit for VOC emissions equal to or greater than one hundred tons of VOCs per calendar year on or after May 27, 2005, from all of the following:
  - (a) All volatile organic liquid storage tanks;
  - (b) All non-CTG sources; and
  - (c) Unregulated emissions from CTG sources.

(B) The definitions applicable to this rule are contained in paragraphs (B) and (E) of rule 3745-21-01 of the Administrative Code.

(C) Storage of volatile organic liquids in fixed roof tanks.

- (1) Except where exempted under paragraph (C)(5) of this rule, no owner or operator of a fixed roof tank shall place, store, or hold any volatile organic liquid with a maximum true vapor pressure which is greater than 0.75 pounds per square inch absolute, but less than 11.1 pounds per square inch absolute, in any such tank, after the date specified in paragraph (G) of this rule, unless such tank is designed or equipped with one of the following vapor control systems:
  - (a) An internal floating roof meeting the requirements of paragraph (C)(3) of this rule; or
  - (b) A closed vent system and control device meeting the requirements of paragraph (C)(4) of this rule.

- (2) Except where exempted under paragraph (C)(5) of this rule, no owner or operator of a fixed roof tank shall place, store, or hold any volatile organic liquid with a maximum true vapor pressure which is equal to or greater than 11.1 pounds per square inch absolute, in any such tank, after the date specified in paragraph (G) of this rule, unless such tank is designed or equipped with a closed vent system and control device meeting the requirements of paragraph (C)(4) of this rule.
- (3) If the fixed roof tank is equipped with an internal floating roof, the following requirements and specifications shall be met:
  - (a) The internal floating roof shall rest or float on the liquid surface (but not necessarily in complete contact with it) inside a storage vessel that has a fixed roof. The internal floating roof shall float on the liquid surface at all times, except during initial fill and during those intervals when the storage vessel is completely emptied or subsequently emptied and refilled. When the roof is resting on the leg supports, the process of filling, emptying, or refilling shall be continuous and shall be accomplished as rapidly as possible.
  - (b) Each internal floating roof shall be equipped with one of the following closure devices between the wall of the storage vessel and the edge of the internal floating roof:
    - (i) A foam or liquid-filled seal mounted in contact with the liquid (liquid-mounted seal). A liquid-mounted seal means a foam or liquid-filled seal mounted in contact with the liquid, between the wall of the storage vessel and the floating roof, and extending continuously around the circumference of the tank.
    - (ii) Two seals mounted one above the other, so that each forms a continuous closure that completely covers the space between the wall of the storage vessel and the edge of the internal floating roof. The lower seal may be vapor-mounted, but both must be continuous.
    - (iii) A mechanical shoe seal. A mechanical shoe seal is a metal sheet held vertically against the wall of the storage vessel by springs or weighted levers and is connected by braces to the floating roof. A flexible coated fabric (envelope) spans the annular space between the metal sheet and the floating roof.
  - (c) Automatic bleeder vents shall be equipped with a gasket and are to be closed at all times when the roof is floating except when the roof is being floated off or is being landed on the roof leg supports. Rim space vents shall be equipped with a gasket and are to be set to open only when the internal floating roof is not floating or at the manufacturer's recommended setting.

- (d) Each opening in a non-contact internal floating roof, except for automatic bleeder vents (vacuum breaker vents) and the rim space vents, shall provide a projection below the liquid surface.
- (e) Each opening in the internal floating roof, except for leg sleeves, automatic bleeder vents, rim space vents, column wells, ladder wells, sample wells, and stub drains, shall be equipped with a cover or lid which shall be maintained in a closed position at all times (i.e., no visible gap) except when the device is in actual use. The cover or lid shall be equipped with a gasket. Covers on each access hatch and automatic gauge float well shall be bolted except when they are in use.
- (f) The sample well, which penetrates the internal floating roof for the purpose of sampling, shall have a slit fabric cover that covers at least ninety per cent of the opening.
- (g) Each penetration of the internal floating roof that allows for passage of a ladder shall have a gasketed sliding cover.
- (h) Inspection requirements.

The owner or operator of each storage vessel equipped with an internal floating roof, shall comply with the following inspection requirements:

- (i) Visually inspect the internal floating roof, the primary seal, and the secondary seal (if one is in service), prior to filling the storage vessel with a volatile organic liquid. If there are holes, tears, or other openings in the primary seal, the secondary seal, or the seal fabric, or defects in the internal floating roof, or both, the owner or operator shall repair the items before filling the storage vessel.
- (ii) For vessels equipped with a liquid-mounted or mechanical shoe primary seal, visually inspect the internal floating roof and the primary seal or the secondary seal (if one is in service) through manholes and roof hatches on the fixed roof at least once every twelve months after initial fill. If the internal floating roof is not resting on the surface of the volatile organic liquid inside the storage vessel, or there is liquid accumulated on the roof, or the seal is detached, or there are holes or tears in the seal fabric, the owner or operator shall repair the items or empty and remove the storage vessel from service within forty-five days. If a failure that is detected during inspections required in this paragraph cannot be repaired within forty-five days and if the vessel cannot be emptied within forty-five days, a thirty-day extension may be requested from the director in the inspection report required in paragraph (C)(3)(j)(iii) of this rule. Such a request for an extension must document that alternate storage capacity is unavailable and specify a schedule of actions the company will take that will ensure that

the control equipment will be repaired or the vessel will be emptied within thirty days.

(iii) For vessels equipped with both primary and secondary seals:

(a) Visually inspect the vessel as specified in paragraph (C)(3)(h)(iv) of this rule at least every five years; or

(b) Visually inspect the vessel at least once every twelve months as specified in paragraph (C)(3)(h)(ii) of this rule.

(iv) Visually inspect the internal floating roof, the primary seal, the secondary seal (if one is in service), gaskets, slotted membranes and sleeve seals (if any) each time the storage vessel is emptied and degassed. If the internal floating roof has defects, the primary seal has holes, tears, or other openings in the seal or the seal fabric, or the secondary seal has holes, tears, or other openings in the seal or the seal fabric, or the gaskets no longer close off the liquid surfaces from the atmosphere, or the slotted membrane has more than ten per cent open area, the owner or operator shall repair the items as necessary so that none of the conditions specified in this paragraph exist before refilling the storage vessel with a volatile organic liquid. In no event shall inspections conducted in accordance with this provision occur at intervals greater than ten years in the case of vessels conducting the annual visual inspection as specified in paragraphs (C)(3)(h)(ii) and (C)(3)(h)(iii)(b) of this rule and at intervals no greater than five years in the case of vessels specified in paragraph (C)(3)(h)(iii)(a) of this rule.

(i) Notify the director in writing at least thirty days prior to the filling or refilling of each storage vessel for which an inspection is required by paragraphs (C)(3)(h)(i) and (C)(3)(h)(iv) of this rule to afford the director or his authorized designee the opportunity to have an observer present. If the inspection required by paragraph (C)(3)(h)(iv) of this rule is not planned and the owner or operator could not have known about the inspection thirty days in advance of refilling the tank, the owner or operator shall notify the director at least seven days prior to the refilling of the storage vessel. Notification shall be made by telephone immediately followed by written documentation demonstrating why the inspection was unplanned. Alternatively, this notification including the written documentation may be made in writing and sent by express mail so that it is received by the director at least seven days prior to the refilling.

(j) Record keeping and reporting requirements.

The owner or operator of each storage vessel equipped with an internal floating roof shall keep records and furnish reports in accordance with the following:

- (i) Furnish the director with a report that describes the control equipment and certifies that the control equipment meets the specifications of paragraph (C) of this rule. This report shall be submitted in accordance with the requirements specified in paragraph (H) of this rule.
  - (ii) Keep a record of each inspection performed as required by paragraphs (C)(3)(h)(i) to (C)(3)(h)(iv) of this rule. Each record shall identify the storage vessel for which the inspection was performed and shall contain the date the vessel was inspected and the observed condition of each component of the control equipment (seals, internal floating roof, and fittings).
  - (iii) If any of the conditions described in paragraph (C)(3)(h)(ii) of this rule are detected during the annual visual inspection required by paragraph (C)(3)(h)(ii) of this rule, a report shall be furnished to the director within thirty days of the inspection. Each report shall identify the storage vessel, the nature of the defects, and the date the storage vessel was emptied or the nature of and date the repair was made.
  - (k) After each inspection required by paragraph (C)(3)(h)(iii) of this rule that finds holes or tears in the seal or seal fabric, or defects in the internal floating roof, or other control equipment defects listed in paragraph (C)(3)(h)(ii) or (C)(3)(h)(iv) of this rule, a report shall be furnished to the director within thirty days of the inspection. The report shall identify the storage vessel and the reason it did not meet the specifications of paragraph (C)(3) of this rule and list each repair made.
  - (l) The owner or operator shall keep copies of all reports and records required by paragraph (C)(3)(j) of this rule for at least five years.
- (4) If the fixed roof tank is equipped with a closed vent system and control device, as required by paragraph (C)(1)(b) or (C)(2) of this rule, the following specifications shall be met:
- (a) The closed vent system shall be designed to collect all VOC vapors and gases discharged from the storage vessel and operated with no detectable emissions, as indicated by an instrument reading of less than five hundred parts per million above background and visual inspections, as determined by the methods specified in 40 CFR 60.485(c).
  - (b) If a control device other than a flare is employed, the control device shall be designed and operated to reduce inlet VOC emissions by ninety five per cent or greater. The control efficiency shall be determined in accordance with paragraph (C) of rule 3745-21-10 of the Administrative Code.
  - (c) If a flare is used as the control device, it shall meet the specifications described in the general control device requirements specified in 40 CFR 60.18.

- (d) The owner or operator of each tank that is equipped with a closed vent system and control device other than a flare, to meet the control requirements as required in paragraph (C)(4) of this rule, shall meet the specifications identified in paragraphs (C)(4)(a) and (C)(4)(b) of this rule and shall submit, for approval by the director, an operating plan containing the information listed below:
  - (i) Documentation demonstrating that the control device will achieve the required control efficiency during maximum loading conditions. This documentation is to include a description of the gas stream which enters the control device, including flow and VOC content under varying liquid level conditions (dynamic and static) and manufacturer's design specifications for the control device. If the control device or the closed vent capture system receives vapors, gases, or liquids other than fuels from sources that are not designated sources under this rule, the efficiency demonstration is to include consideration of all vapors, gases, and liquids received by the closed vent capture system and control device. If an enclosed combustion device with a minimum residence time of 0.75 seconds and a minimum temperature of eight hundred sixteen degrees centigrade is used to meet the ninety-five per cent control requirement, documentation that those conditions will exist during all loading conditions is sufficient to meet the requirements of this paragraph.
  - (ii) A description of the parameter or parameters to be monitored to ensure that the control device will be operated in conformance with its design and an explanation of the criteria used for selection of that parameter (or parameters).
- (e) Operate the closed vent system and control device and monitor the parameters of the closed vent system and control device in accordance with the operating plan submitted to the director in accordance with paragraph (C)(4)(d) of this rule, unless the plan was modified by the director during the review process, in which case, the modified plan applies. The operating plan required by paragraph (C)(4)(d) of this rule shall be maintained by the owner or operator for the life of the control equipment and shall be made available to the director upon request.
- (f) Any approval granted by the director in accordance with paragraph (C)(4)(d) of this rule must be approved by the USEPA as a revision of the Ohio state implementation plan.
- (g) The owner or operator of each source that is equipped with a closed vent system and a flare, to meet the control requirements in paragraphs (C)(4)(a) and (C)(4)(c) of this rule, shall meet the requirements as specified in the general control device requirements of 40 CFR 60.18(e) and (f).

(h) Monitoring, record keeping and reporting requirements.

(i) After installing control equipment in accordance with paragraph (C)(1)(b) or (C)(2) of this rule (closed vent system and control device other than a flare), the owner or operator shall keep the following records:

(a) A copy of the operating plan; and

(b) A record of the measured values of the parameters monitored in accordance with paragraph (C)(4)(e) of this rule.

(ii) After installing a closed vent system and flare to comply with the control requirements of paragraph (C)(1)(b) or (C)(2) of this rule, the owner or operator shall meet the following requirements:

(a) A report containing the measurements required by 40 CFR 60.18(f)(1) to (f)(6), shall be furnished to the director as required by 40 CFR 60.8. This report shall be submitted within six months of the initial start-up date of the flare.

(b) Records shall be kept of all periods of operation during which the flare pilot flame is absent.

(c) Semiannual reports of all periods of time recorded under paragraph (C)(4)(h)(ii)(b) of this rule during which the pilot flame was absent shall be furnished to the director. These reports shall be submitted to the appropriate Ohio environmental protection agency district office or local air agency by July fifteenth and January fifteenth of each calendar year and shall cover the previous six-month period.

(i) The owner or operator shall keep copies of all reports and records required by paragraph (C)(4)(h) of this rule for at least five years.

(5) A fixed roof tank with a capacity less than forty thousand gallons is exempt from the requirements of paragraphs (C)(1) and (C)(2) of this rule.

(D) Storage of volatile organic liquids in external floating roof tanks.

(1) Except where exempted under paragraph (D)(2) of this rule, no owner or operator of an external floating roof tank shall place, store, or hold any volatile organic liquid in any such tank, after the date specified in paragraph (F) of this rule, unless:

(a) Each external floating roof is equipped with a closure device between the wall of the storage vessel and the roof edge. The closure device is to consist of two seals, one above the other. The lower seal is referred to as the primary seal, and the upper seal is referred to as the secondary seal.

- (i) Except as provided in paragraph (D)(3)(c) of this rule, the primary seal shall completely cover the annular space between the edge of the floating roof and tank wall and shall be either a liquid mounted seal or a shoe seal.
  - (ii) The secondary seal shall completely cover the annular space between the external floating roof and the wall of the storage vessel in a continuous fashion, except as allowed in paragraph (D)(3)(c) of this rule.
  - (iii) The tank shall be equipped with the closure device that meets the requirements of this rule after the next scheduled tank cleaning, but no later than the date specified in paragraph (G) of this rule.
- (b) Except for automatic bleeder vents and rim space vents, each opening in a non-contact external floating roof shall provide a projection below the liquid surface. Except for automatic bleeder vents, rim space vents, roof drains, and leg sleeves, each opening in the roof is to be equipped with a gasketed cover, seal, or lid that is to be maintained in a closed position at all times (i.e., no visible gap) except when the device is in actual use. Automatic bleeder vents are to be closed at all times when the roof is floating except when the roof is being floated off or is being landed on the roof leg supports. Rim vents are to be set to open when the roof is being floated off the roof leg supports or at the manufacturer's recommended setting. Automatic bleeder vents and rim space vents are to be gasketed. Each emergency roof drain is to be provided with a slotted membrane fabric cover that covers at least ninety percent of the area of the opening.
- (c) The roof shall be floating on the liquid at all times (i.e., off the roof leg supports) except when the tank is completely emptied and subsequently refilled. The process of filling, emptying, or refilling when the roof is resting on the leg supports shall be continuous and shall be accomplished as rapidly as possible.
- (2) The following external floating roof tanks shall be exempted from the requirements of paragraph (D)(1) of this rule:
- (a) Any tank that has a capacity of less than forty thousand gallons; or
  - (b) Any tank that contains a volatile organic liquid which, as stored, has a maximum true vapor pressure less than 0.75 pounds per square inch absolute.
- (3) Inspection and measurement requirements.

The owner or operator of an external floating roof tank shall:

- (a) Determine the gap areas and maximum gap widths between the primary seal and the wall of the storage vessel and between the second seal and the wall of the storage vessel according to the following frequency:
  - (i) Measurements of gaps between the tank wall and the primary seal (seal gaps) shall be performed during the hydrostatic testing of the vessel or within sixty days of the initial fill with a volatile organic liquid and at least every five years thereafter;
  - (ii) Measurements of gaps between the tank wall and the secondary seal shall be performed within sixty days of the initial fill with a volatile organic liquid and at least once per year thereafter; and
  - (iii) If any source ceases to store a volatile organic liquid for a period of one year or more, subsequent introduction of a volatile organic liquid into the vessel shall be considered an initial fill for the purposes of paragraphs (D)(3)(a)(i) and (D)(3)(a)(ii) of this rule.
- (b) Determine gap widths and areas in the primary and secondary seals individually according to the following procedures:
  - (i) Measure the seal gaps, if any, at one or more floating roof levels when the roof is floating off the roof leg supports.
  - (ii) Measure the seal gaps around the entire circumference of the tank, in each place where a one-eighth (1/8) inch diameter uniform probe passes freely (without forcing or binding against the seal) between the seal and the wall of the storage vessel, and measure the circumferential distance of each such location.
  - (iii) The total surface area of each gap described in paragraph (D)(b)(ii) of this rule shall be determined by using probes of various widths to measure accurately the actual distance from the tank wall to the seal and then multiplying each such width by its respective circumferential distance.
  - (iv) Add the gap surface area of each gap location for the primary seal and the secondary seal individually and divide the sum for each by the nominal diameter of the tank and compare each ratio to the respective standards in paragraph (D)(3)(c)(i) or (D)(3)(c)(ii) of this rule.
- (c) Make necessary repairs or empty the storage vessel within forty-five days of identification in any inspection for seals not meeting the requirements listed in paragraphs (D)(3)(c)(i) and (D)(3)(c)(ii) of this rule.
  - (i) The accumulated area of gaps between the tank wall and the mechanical shoe or liquid-mounted primary seal shall not exceed 10.0 square inches per foot of tank diameter, and the width of any portion of any

gap shall not exceed 1.5 inches. There are to be no holes, tears, or other openings in the shoe, seal fabric, or seal envelope.

- (ii) The secondary seal is to meet the following requirements:
  - (a) The secondary seal is to be installed above the primary seal so that it completely covers the space between the roof edge and the tank wall except as provided in paragraph (D)(3)(c)(ii)(b) of this rule.
  - (b) The accumulated area of gaps between the tank wall and the secondary seal used in combination with a metallic shoe or liquid-mounted primary seal shall not exceed 1.0 square inches per foot of tank diameter, and the width of any portion of any gap shall not exceed 0.5 inches. There shall be no gaps between the tank wall and the secondary seal when used in combination with a vapor mounted primary seal.
  - (c) There are to be no holes, tears, or other openings in the seal or seal fabric.

If a failure that is detected during inspections required in paragraph (D)(3)(a) of this rule cannot be repaired within forty-five days and if the vessel cannot be emptied within forty-five days, a thirty-day extension may be requested from the director in the inspection report required in paragraph (D)(4)(d) of this rule. Such extension request must include a demonstration of unavailability of alternative storage capacity and a specification of a schedule that will assure that the control equipment will be repaired or the vessel will be emptied as soon as possible.

- (d) Notify the director thirty days in advance of any gap measurements required by paragraph (D)(3)(a) of this rule to afford the director the opportunity to have an observer present.
- (e) Visually inspect the external floating roof, the primary seal, secondary seal, and fittings each time the vessel is emptied and degassed.
  - (i) If the external floating roof has defects, the primary seal has holes, tears, or other openings in the seal or the seal fabric, or the secondary seal has holes, tears, or other openings in the seal or the seal fabric, the owner or operator shall repair the items as necessary so that none of the conditions specified in this paragraph exist before filling or refilling the storage vessel with a volatile organic liquid.
  - (ii) For all the inspections required by paragraph (D)(3)(e) of this rule, the owner or operator shall notify the director in writing at least thirty days prior to the filling or refilling of each storage vessel to afford the director or his authorized designee the opportunity to inspect the storage vessel prior to refilling. If the inspection required by paragraph

(D)(3)(e) of this rule is not planned and the owner or operator could not have known about the inspection thirty days in advance of refilling the tank, the owner or operator shall notify the director at least seven days prior to the refilling of the storage vessel. Notification shall be made by telephone immediately followed by written documentation demonstrating why the inspection was unplanned. Alternatively, this notification including the written documentation may be made in writing and sent by express mail so that it is received by the director at least seven days prior to the refilling.

(4) Record keeping and reporting requirements.

The owner or operator of an external floating roof tank shall meet the following record keeping and reporting requirements:

- (a) Furnish the director with a report that describes the control equipment and certifies that the control equipment meets the specifications of paragraphs (D)(1) and (D)(3) of this rule. This report shall be submitted in accordance with the requirements specified in paragraph (H) of this rule.
- (b) Keep a record of each gap measurement performed as required by paragraphs (D)(3)(a) and (D)(3)(b) of this rule. Each record shall identify the storage vessel in which the measurement was performed and shall contain:
  - (i) The date of measurement;
  - (ii) The raw data obtained in the measurement; and
  - (iii) The calculations described in paragraph (D)(3)(b) of this rule.
- (c) Within sixty days of performing the seal gap measurements required by paragraph (D)(3)(a) of this rule, furnish the director with a report that contains:
  - (i) The date of measurement;
  - (ii) The raw data obtained in the measurement; and
  - (iii) The calculations described in paragraph (D)(3)(b) of this rule.
- (d) After each seal gap measurement that detects gaps exceeding the limitations specified by paragraph (D)(3)(c) of this rule, submit a report to the director within thirty days of the inspection. The report shall identify the vessel and contain the information specified in paragraph (D)(4)(c) of this rule, the date the vessel was emptied or the repairs made, and the date(s) of the repairs.

(E) Record keeping requirements for fixed roof tanks and external floating roof tanks storing volatile organic liquids.

(1) Any owner or operator of a fixed roof or an external floating roof tank that is not exempted pursuant to paragraph (C)(5) or (D)(2) of this rule shall maintain records of the following information in a readily accessible location for at least five years and shall make copies of the records available to the director upon verbal or written request:

(a) The types of volatile organic liquids stored in the tank;

(b) The maximum true vapor pressure (pounds per square inch absolute), as stored, of each liquid that has a maximum true vapor pressure greater than 0.5 pounds per square inch absolute; and

(c) The dimension and volume of each tank.

(2) The owner or operator of each storage vessel that is exempt pursuant to paragraph (C)(5) or (D)(2) of this rule shall maintain records of the following information in a readily accessible location for at least five years and shall make copies of the records available to the director upon verbal or written request:

(a) The dimension of the storage vessel; and

(b) An analysis of the capacity of the storage vessel

Each storage vessel with a design capacity less than forty thousand gallons is subject to no provisions of this rule other than those required by maintaining readily accessible records of the dimensions of the storage vessel and analysis of the capacity of the storage vessel.

(3) If an owner or operator places, stores, or holds in a fixed roof tank or an external floating roof tank, that is not exempted pursuant to paragraph (C)(5) or (D)(2) of this rule, any volatile organic liquid with a true vapor pressure which is greater than 0.75 pounds per square inch absolute and such tank does not comply with the requirements of paragraph (C)(1), (C)(2), or (D)(1) of this rule, the owner or operator shall so notify the director within thirty days of becoming aware of the occurrence.

(4) The owner or operator shall keep copies of all reports and records required by paragraphs (C)(3)(j), (C)(4)(h), (D)(4), and (I) of this rule for at least five years.

(F) Monitoring requirements for volatile organic liquid operations.

(1) Except as provided in paragraph (F)(4) of this rule, the owner or operator of each storage vessel with a design capacity greater than or equal to forty thousand gallons storing a liquid with a maximum true vapor pressure that is normally less than 0.75 pounds per square inch absolute shall notify the director within

thirty days when the maximum true vapor pressure of the liquid exceeds 0.75 pounds per square inch absolute.

- (2) Available data on the storage temperature may be used to determine the maximum true vapor pressure.
  - (a) For liquids in vessels operated above or below ambient temperatures, the maximum true vapor pressure is calculated based upon the highest expected calendar-month average of the storage temperature. For vessels operated at ambient temperatures, the maximum true vapor pressure is calculated based upon the maximum local monthly average ambient temperature as reported by the national weather service.
  - (b) For other liquids, the vapor pressure:
    - (i) Determined by ASTM method D2879-83;
    - (ii) Measured by an appropriate method approved by the director and USEPA; or
    - (iii) Calculated by an appropriate method approved by the director and USEPA.
- (3) The owner or operator of each vessel storing a mixture of indeterminate or variable composition shall be subject to the following:
  - (a) Prior to the initial filling of the vessel, the maximum true vapor pressure for the range of anticipated liquid compositions to be stored will be determined using the methods described in paragraph (F)(2) of this rule.
  - (b) For vessels in which the vapor pressure of the anticipated liquid composition is 0.5 pounds per square inch absolute or greater but less than 0.75 pounds per square inch absolute, an initial physical test of the vapor pressure is required; a physical test at least once every six months thereafter is required as determined by the following methods:
    - (i) ASTM method D2879-83;
    - (ii) ASTM method D323-82; or
    - (iii) As measured by an appropriate method approved by the director.
- (4) The owner or operator of each vessel equipped with a closed vent system and control device meeting the specifications of paragraph (C)(4) of this rule is exempt from the requirements of paragraphs (F)(1) and (F)(2) of this rule.

(G) Compliance dates.

The owner or operator of a facility that is subject to this rule shall comply with the requirements of this rule no later than the following dates:

- (1) For any storage of a volatile organic liquid which commenced operation after the effective date of this rule, the compliance date for the operation is the initial startup date of the operation or twelve months from the effective date of this rule, whichever is later.
- (2) For any storage of a volatile organic liquid which commenced operation before the effective date of this rule, the compliance date for the operation is twelve months from the effective date of this rule.

(H) Compliance certification.

- (1) The owner or operator of a facility that is subject to this rule shall notify the appropriate Ohio environmental protection agency district office or local air agency in writing within thirty days following the completion of any of the following requirements. For a volatile organic liquid storage operation subject to the volatile organic emission control requirements in paragraph (C)(1), (C)(2) or (D)(1) of this rule:
  - (a) The completion of installation and initial use of vapor control equipment employed for all tanks that store a volatile organic liquid; or
  - (b) The completion of any inspection and/or measurement requirements specified under paragraphs (C)(3)(h) and (D)(3) of this rule for all tanks that store a volatile organic liquid.
- (2) The compliance certification under paragraph (H)(1) of this rule shall provide the following, where applicable:
  - (a) A description of the requirements.
  - (b) A description of the vapor control equipment employed.
  - (c) A description of the monitoring devices.
  - (d) A description of the records that document continuing compliance.
  - (e) The results of any compliance tests, including documentation of test data.
  - (f) The results of any records that document continuing compliance, including calculations.
  - (g) A statement by the owner or operator of the affected facility as to whether the volatile organic liquid storage operation has complied with the requirement(s).

(I) Requirements on applicability notification, compliance certification, and permit application.

(1) The owner or operator of a facility that is subject to this rule and that operates a storage tank for volatile organic liquids with an initial startup date before the effective date of this rule shall notify the appropriate Ohio environmental protection agency district office or local air agency in writing that the volatile organic liquid storage tank is subject to this rule. The notification, which shall be submitted not later than sixty days after the effective date of this rule (or within sixty days after the volatile organic liquid storage tank becomes subject to this rule), shall provide the following information:

(a) Name and address of the owner or operator.

(b) Address (i.e., physical location) of the affected facility.

(c) Description of the volatile organic liquid storage tank and Ohio environmental protection agency emissions unit number (if assigned).

(d) Identification of the VOC emission requirement, the means of compliance, and the compliance date for the volatile organic liquid storage tank.

(e) Regarding an air pollution permit for the volatile organic liquid storage tank, whichever of the following is applicable:

(i) Submission of an application for an operating permit, a modification, or a permit-to-operate renewal in accordance with rule 3745-31-02 of the Administrative Code; or

[Comment: Applications requiring submittal prior to June 30, 2008, were submitted in accordance with Chapter 3745-35 of the Administrative Code.]

(ii) Submission of a statement of intent to submit an application for a Title V permit or revision of a Title V permit in accordance with paragraph (B) of rule 3745-77-02 or rule 3745-77-06 of Administrative Code, respectively.

(2) The owner or operator of a facility that is subject to this rule and that has a volatile organic liquid storage tank with an initial start-up date on or after the effective date of this rule shall notify the appropriate Ohio environmental protection agency district office or local air agency in writing that the volatile organic liquid storage tank is subject to this rule. The notification, which shall be submitted not later than either the date of initial startup of the volatile organic liquid storage tank or sixty days after the effective date of this rule (whichever is later), shall provide the information listed under paragraph (I)(1) of this rule. The application for an installation permit under rule 3745-31-02 of the

Administrative Code may be used to fulfill the notification requirements of this paragraph.

**Control of volatile organic compound emissions from offset lithographic printing and letterpress printing facilities.**

[Comment: For dates and availability of non-regulatory government publications, publications of recognized organizations and associations, federal rules, and federal statutory provisions referenced in this rule, see paragraph (HH) of rule 3745-21-01 of the Administrative Code titled "Referenced materials."]

(A) The requirements of paragraphs (B) to (I) of this rule shall apply to each lithographic printing or letterpress printing facility that meets all the following criteria:

- (1) The facility is located in Ashtabula, Cuyahoga, Geauga, Lake, Lorain, Medina, Portage, or Summit county; and
- (2) The facility employs letterpress printing or one or more of the following types of offset lithographic printing processes: heatset web, non-heatset web or sheet-fed; and
- (3) The facility has total actual VOC emissions, before the application of control systems and devices, from all lithographic and/or letterpress printing operations (including emissions from cleaning solutions used on lithographic and/or letterpress printing presses and fountain solutions) equal to or greater than three tons of VOCs per rolling twelve-month period.

(B) Exemptions.

- (1) The following operations are exempt from the fountain solution requirements as contained in paragraph (D)(3)(b) of this rule:
  - (a) Any sheet-fed press with a maximum sheet size eleven by seventeen inches or smaller.
  - (b) Any press with a total fountain solution reservoir capacity of less than one gallon.
- (2) The following operations are exempt from the requirement to install add-on controls as contained in paragraph (D)(1) of this rule:
  - (a) Any heatset web press with a maximum web width of 22.0 inches or less.
  - (b) Any heatset web press with potential VOC emissions from ink oil less than or equal to twenty-five tons per year before the application of controls.
  - (c) Any heatset web press used for book printing.

(C) Definitions.

The definitions applicable to this rule are contained in paragraphs (W) and (DD) of rule 3745-21-01 of the Administrative Code.

(D) VOC emissions control requirements.

- (1) Any person who owns or operates a subject heatset web offset lithographic or letterpress printing press with potential VOC ink oil emissions from the press dryer that are greater than twenty-five tons per year before the application of control systems and devices shall maintain the dryer air pressure lower than the pressroom air pressure at all times the press is operating and operate a control system that meets one of the following control requirement for that press:
  - (a) For a control system first installed before April 2, 2009 the control system shall reduce VOC emissions from each dryer by at least ninety per cent or maintain a maximum VOC outlet concentration of twenty ppmv, as hexane ( $C_6H_{14}$ ) on a dry basis, whichever is less stringent; or
  - (b) For a control system first installed on or after April 2, 2009, the control system shall reduce VOC emissions from each dryer by at least ninety-five per cent or maintain a maximum VOC outlet concentration of twenty ppmv as hexane ( $C_6H_{14}$ ) on a dry basis, whichever is less stringent.
- (2) Any person who owns or operates a subject heatset web offset lithographic printing press shall meet one of the following requirements for the fountain solution used on that press:
  - (a) If the fountain solution contains only alcohol substitutes, maintain the as-applied VOC content of the fountain solution at or below 5.0 per cent, by weight, and use no alcohol in the fountain solution.
  - (b) If the fountain solution contains alcohol:
    - (i) Maintain the as-applied VOC content of the fountain solution at or below 1.6 per cent, by weight; or
    - (ii) Maintain the as-applied VOC content of the fountain solution at or below 3.0 per cent, by weight, and refrigerate the fountain solution to sixty degrees Fahrenheit or less.
- (3) Any person who owns or operates a subject sheet-fed offset lithographic printing press shall meet one of the following requirements for the fountain solution used on that press:
  - (a) If the fountain solution contains only alcohol substitutes, maintain the as-applied VOC content of the fountain solution at or below 5.0 per cent, by weight.
  - (b) If the fountain solution contains alcohol:

- (i) Maintain the as-applied VOC content of the fountain solution at or below 5.0 per cent, by weight; or
  - (ii) Maintain the as-applied VOC content of the fountain solution at or below 8.5 per cent, by weight, and refrigerate the fountain solution to sixty degrees Fahrenheit or less.
- (4) Anyone who owns or operates a subject non-heatset web offset lithographic printing press shall maintain the as-applied VOC content of the fountain solution used on that press at or below 5.0 per cent, by weight, and use no alcohol in the fountain solution.
- (5) Where it can be demonstrated to the satisfaction of the director that a subject offset lithographic printing press cannot be operated with fountain solutions meeting the limits in paragraph (D)(2), (D)(3), or (D)(4) of this rule for reasons of technological and/or economic feasibility the permitting authority may establish site-specific limits based upon evidence of technological or economic infeasibility subject to approval by USEPA as a state implementation plan revision.
- (6) Any person who owns or operates a subject offset lithographic or letterpress printing press shall meet one of the following requirements for each cleaning solution used for cleaning on that press:
  - (a) Maintain the as-applied VOC content at or below seventy per cent, by weight; or
  - (b) Maintain the as-applied VOC composite partial vapor pressure at or below ten mm Hg at twenty degrees Celsius (sixty-eight degrees Fahrenheit).

The use of cleaning solutions not meeting the specifications of paragraphs (D)(6)(a) and (D)(6)(b) of this rule is permitted provided that the quantity used does not exceed one hundred ten gallons over any consecutive twelve-month period.
- (7) Any person who owns or operates a subject offset lithographic or letterpress printing press shall keep all solvent containers closed at all times unless filling, draining, or performing cleanup operations.
- (8) Any person who owns or operates a subject offset lithographic or letterpress printing press shall keep all solvent-laden shop towels in closed containers when not being used.

(E) Compliance dates.

- (1) The owner or operator of an offset lithographic or letterpress printing facility that is subject to this rule shall comply with the requirements of this rule no later than the following dates:
  - (a) For any subject offset lithographic or letterpress printing press for which installation commenced before April 2, 2009, the compliance date for the press is twelve months from April 2, 2009.
  - (b) For any subject offset lithographic or letterpress printing press for which installation commenced on or after the effective date of this rule, the compliance date for the press is the initial startup date of the press.
- (2) The owner or operator of an offset lithographic or letterpress printing facility that is subject to this rule shall demonstrate compliance with paragraph (D)(1) of this rule by testing the control device on each subject offset lithographic or letterpress printing press in accordance with paragraph (F)(1) of this rule according to the following:
  - (a) For any offset lithographic or letterpress printing facility subject to paragraph (E)(1)(a) of this rule, by no later than ninety days after the press's compliance date. In addition, the Ohio environmental protection agency may accept the results of an emission test conducted prior to the effective date of this rule, if the owner or operator provides information and data to the Ohio environmental protection agency which demonstrate that an approved USEPA emission test method was employed, that the operation of the press(es) was consistent with the current operating conditions and operating capacity, and that if the Ohio environmental protection agency had requested to witness the test, the test was witnessed by the Ohio environmental protection agency or its delegated agent.
  - (b) For any offset lithographic or letterpress printing facility subject to paragraph (E)(1)(b) of this rule, within one hundred eighty days after the press's compliance date.
- (3) Additional testing of a subject offset lithographic or letterpress printing press and its VOC emission control system in accordance with paragraph (F)(1) of this rule may be required by the director to ensure continued compliance.

(F) Compliance test methods.

- (1) For any heatset web offset lithographic or letterpress printing press that is subject to the requirements of paragraph (D)(1) of this rule, compliance shall be determined by performing emission tests in accordance with the following:
  - (a) For the purpose of demonstrating compliance with the emission control requirements paragraph (D)(1) of this rule, the affected source shall be run at typical operating conditions and flow rates compatible with scheduled production during any emission testing.

- (b) The negative dryer pressure shall be established during the initial test using an airflow direction indicator, such as a smoke stick or aluminum ribbons, or differential pressure gauge. Capture efficiency and continuous dryer air flow monitoring is not required.
- (c) The following USEPA test methods (in 40 CFR Part 60, Appendix A) shall be used to demonstrate compliance with the applicable emission control requirement in paragraph (D)(1) of this rule:
  - (i) USEPA method 1 or 1A, as appropriate, shall be used to select the sampling sites.
  - (ii) USEPA method 2, 2A, 2C, or 2D, as appropriate, shall be used to determine the velocity and volumetric flow rate of the exhaust stream.
  - (iii) USEPA method 3 or 3A, as appropriate, shall be used to determine the concentration of O<sub>2</sub> and CO<sub>2</sub>.
  - (iv) USEPA method 4 shall be used to determine moisture content.
  - (v) USEPA method 18, 25, or 25A shall be used to determine the VOC concentration of the exhaust stream entering and exiting the control device, unless the alternate limit of twenty ppmv as specified in paragraphs (D)(1)(a) and (D)(1)(b) of this rule is being met, in which case only the VOC concentration of the exit exhaust shall be determined. In cases where the anticipated outlet VOC concentration of the control device is less than fifty ppmv as carbon, USEPA method 25A shall be used.
    - (a) If the average concentrations in the outlet of a thermal or catalytic oxidizer measured by USEPA method 25A are found to be greater than fifty ppmv as carbon, USEPA method 18 or 25 may be used to determine non-VOC components (methane and ethane) to correct the outlet VOC readings, unless the director determines that the uncorrected USEPA method 25A results are acceptable.
    - (b) A compliance test shall consist of up to three separate runs, each lasting a minimum of sixty minutes, unless the director determines that process variables dictate shorter sampling times.
    - (c) USEPA method 25 specifies a minimum probe temperature of two hundred sixty-five degrees Fahrenheit. To prevent condensation, the probe should be heated to at least the gas stream temperature, typically close to three hundred fifty degrees Fahrenheit.
    - (d) USEPA method 25A specifies a minimum temperature of two hundred twenty degrees Fahrenheit for the sampling components

leading to the analyzer. To prevent condensation when testing heatset web offset presses, the sampling components and flame ionization detector block should be heated to at least the gas stream temperature, typically close to three hundred fifty degrees Fahrenheit.

- (e) The use of an adaptation to any of the analytical methods specified above shall be approved by the director and USEPA on a case-by-case basis. The owner or operator shall submit sufficient documentation for the director and USEPA to find that the analytical methods specified above will yield inaccurate results and that the proposed adaptation is appropriate.
- (2) For any offset lithographic printing press that is subject to the requirements of paragraph (D)(2), (D)(3), or (D)(4) of this rule, compliance with the VOC content of the as-applied fountain solution shall be determined by one of the methods in paragraphs (F)(2)(a) to (F)(2)(c) of this rule except when paragraph (F)(2)(d) is applicable:
- (a) USEPA method 24 shall be used to determine the VOC content of the as-applied fountain solution;
  - (b) If diluted prior to use, a calculation shall be performed for VOC content that combines USEPA method 24 analytical data for the concentrated materials used to prepare the as-applied fountain solution and the proportions in which they are mixed to make the as-applied fountain solution. The analysis of the concentrated material(s) may be performed by the supplier(s) of those material(s). The analytical data may be derived from a material safety data sheet (MSDS) or equivalent information from the supplier as long as it is based on USEPA method 24 results; or
  - (c) If not diluted prior to use, the owner or operator shall use formulation information provided by the supplier, such as a MSDS sheet or equivalent information from the supplier. In the event of a dispute between information provided by the supplier and data obtained by USEPA method 24, the data obtained by USEPA method 24 shall be employed.
  - (d) For any offset lithographic printing press that is subject to the requirements of paragraph (D)(2)(b) or (D)(3)(b) of this rule, when adding alcohol to a fountain solution batch previously tested in accordance with one of the compliance test methods contained in paragraphs (F)(2)(a) to (F)(2)(c) of this rule, in lieu of the methods in paragraphs (F)(2)(a) to (F)(2)(c) of this rule, the owner or operator shall determine the VOC (alcohol) content of the altered fountain solution using a hydrometer.
- (3) For any offset lithographic printing press that is subject to the fountain solution temperature requirements of paragraph (D)(2)(b)(ii) or (D)(3)(b)(ii) of this rule, a thermometer or other temperature detection device capable of reading to 0.5

degrees Fahrenheit shall be used to ensure that any refrigerated fountain solution reservoirs are maintained at or below sixty degrees Fahrenheit at all times.

- (4) For any offset lithographic or letterpress printing press that is subject to the requirements of paragraph (D)(6)(a) of this rule, the VOC content of cleaning solutions shall be determined by one of the following methods:
  - (a) USEPA method 24 shall be used to determine the VOC content of the cleaning solution;
  - (b) If diluted prior to use, a calculation shall be performed for VOC content that combines USEPA method 24 analytical data for the concentrated materials used to prepare the cleaning solution and the proportions in which they are mixed to make the as-applied cleaning solution. The analysis of the concentrated material(s) may be performed by the supplier(s) of those material(s). The analytical data may be derived from a material safety data sheet (MSDS) or equivalent information from the supplier as long as it is based on USEPA method 24 results; or
  - (c) If not diluted prior to use, the owner or operator shall use formulation information provided by the supplier, such as MSDS sheet or equivalent information from the supplier. In the event of a dispute between information provided by the supplier and data obtained by USEPA method 24, the data obtained by USEPA method 24 shall be employed.
- (5) For any offset lithographic or letterpress printing press that is subject to the requirements of paragraph (D)(6)(b) of this rule, the VOC composite partial vapor pressure of cleaning solutions shall be determined by one of the following methods:
  - (a) If diluted prior to use, calculate the VOC composite vapor pressure of the as-applied solvent by using the formula for "VOC composite vapor pressure" as follows:
    - (i) Determine the identity and quantity of each compound in a blended organic solvent by using ASTM D2306, or by using ASTM E260 for organics and ASTM D3792 for water content, if applicable, or the manufacturer's product formulation data.
    - (ii) Determine the vapor pressure of each pure VOC component by using ASTM D2879 or publications such as "Perry's Chemical Engineer's Handbook, CRC Handbook of Chemistry and Physics, or Lange's Handbook of Chemistry."
    - (iii) Calculate the VOC composite partial pressure of the solvent by using the formula for "VOC composite partial pressure." For the purpose of this calculation, the blended solvent shall be assumed to be an ideal solution where "Raoult's Law" applies. The partial vapor pressures of

each compound at twenty degrees Celsius (sixty-eight degrees Fahrenheit) shall be used in the formula. The VOC composite partial pressure shall be calculated as follows:

$$PP_c = \sum_{i=1}^n \frac{(W_i)(VP_i) / MW_i}{\frac{W_w}{MW_w} + \frac{W_e}{MW_e} + \sum_{i=1}^n \frac{W_i}{MW_i}}$$

Where:

W<sub>i</sub> = Weight of the "i"th VOC compound, in grams.

W<sub>w</sub> = Weight of water, in grams.

W<sub>e</sub> = Weight of exempt compound, in grams.

MW<sub>i</sub> = Molecular weight of the "i"th VOC compound, in grams per gram-mole.

MW<sub>w</sub> = Molecular weight of water, in grams per gram-mole.

MW<sub>e</sub> = Molecular weight of the "e"th exempt compound, in grams per gram-mole.

PP<sub>c</sub> = VOC composite partial vapor pressure at twenty degrees Celsius (sixty-eight degrees Fahrenheit), in mmHg.

VP<sub>i</sub> = Vapor pressure of the "i"th VOC compound at twenty degrees Celsius (sixty-eight degrees Fahrenheit), in mmHg.

- (b) If not diluted prior to use, the owner or operator shall use formulation information provided by the supplier, such as a material safety data sheet (MSDS) or equivalent information from the supplier as long as it is based on results determined in accordance with the procedure under paragraph (F)(5)(a) of this rule.

(G) Monitoring and record keeping requirements.

- (1) The owner or operator of an offset lithographic or letterpress printing press that is subject to the control requirements specified in paragraph (D)(1) of this rule, shall install and operate continuous temperature monitoring and recording equipment that measures and records temperature data at least once every fifteen minutes, and shall collect and record the following information and maintain the information at the facility for a period of five years:

- (a) A log or record of any time when the control device and/or, monitoring equipment, are not in operation when any associated press is in operation.
  - (b) For thermal oxidizers all three-hour periods of operation during which the average combustion temperature was more than fifty degrees Fahrenheit below the average combustion temperature during the most recent emission test that demonstrated that the press was in compliance.
  - (c) For catalytic oxidizers all three-hour periods of operation during which the average temperature of the dryer exhaust gases immediately before the catalyst bed was more than fifty degrees Fahrenheit below the average temperature of the dryer exhaust gases during the most recent emission test that demonstrated that the press was in compliance.
  - (d) For catalytic oxidizers, the catalyst bed material shall be inspected annually for general catalyst condition and any signs of potential catalyst depletion. The owner or operator shall also collect a representative sample of the catalyst from the oxidizer, per manufacturer's recommendations, and have it tested to evaluate the catalyst's capability to continue to function at or above the required control efficiency. An evaluation of the catalyst bed material shall be conducted whenever the results of the inspection indicate signs of potential catalyst depletion or poor catalyst condition based on manufacturer's recommendations, but not less than once per year.
- (2) The owner or operator of a heatset web or sheet-fed offset lithographic printing press subject to the requirements of paragraph (D)(2)(b) or (D)(3)(b) of this rule shall measure:
- (a) The VOC (alcohol) content, in accordance with paragraph (F)(2)(d) of this rule, of any altered fountain solution, at the time of alteration, in per cent by weight, of the fountain solution employed in the press and shall maintain records of the results of the measurements at the facility for a period of five years. The alcohol content of the fountain solution shall be measured using a hydrometer. The hydrometer shall have a visual, analog, or digital readout with an accuracy of 0.5 per cent; and a standard solution shall be used to calibrate the hydrometer for the type of alcohol used in the fountain solution.
  - (b) On a daily basis, the temperature, in degrees Fahrenheit, of the fountain solution, if the owner or operator refrigerates the fountain solution in accordance with paragraph (D)(2)(b)(ii) or (D)(3)(b)(ii) of this rule, and shall maintain records of the results of the measurements at the facility for a period of five years.
- (3) The owner or operator of a subject offset lithographic printing press shall maintain records, for a period of five years, of one of the following for fountain solution preparation:

- (a) For an owner or operator maintaining a recipe log for each batch of fountain solution prepared for use in the press:
  - (i) A recipe log that identifies all recipes used to prepare the as-applied fountain solution. Each recipe shall be maintained in the recipe log for a period of five years from the date the recipe was last prepared for a press. Each recipe shall clearly identify the following:
    - (a) VOC content of each concentrated alcohol substitute, added to make the batch of fountain solution, based upon the manufacturer's laboratory analysis using USEPA method 24.
    - (b) The proportions in which the fountain solution is mixed, including the addition of alcohol and/or water. The proportion may be identified as a volume when preparing a discrete batch or may be identified as the settings when an automatic mixing unit is employed.
    - (c) The calculated VOC content of the final, mixed recipe.
  - (ii) Identification of the recipe used to prepare each batch of fountain solution for use in the press.
  - (iii) The date and time when the batch was prepared.
  - (iv) An affirmation the batch was prepared in accordance with the recipe.
- (b) For an owner or operator not maintaining a recipe log in accordance with paragraph (G)(3)(a) of this rule, for each batch of fountain solution prepared for use in the press
  - (i) The volume and VOC content of each concentrated alcohol substitute, added to make the batch of fountain solution, based upon the manufacturer's laboratory analysis using USEPA method 24.
  - (ii) The volume of alcohol added to make the batch of fountain solution.
  - (iii) The volume of water added to make the batch of fountain solution.
  - (iv) The calculated VOC content of the final, mixed batch.
  - (v) The date and time the batch was prepared.

For purposes of paragraphs (G)(3)(a) and (G)(3)(b) of this rule, a fountain solution that is continuously blended with an automatic mixing unit is considered to be the same batch until such time that the recipe or mix ratio is changed.

- (4) The owner or operator of a subject offset lithographic or letterpress printing press shall maintain records, for a period of five years, of one of the following for all cleaning solutions employed in all the offset lithographic and letterpress printing operations:
- (a) For an owner or operator maintaining a recipe log for each batch of cleaning solution prepared:
    - (i) A recipe log that identifies all recipes used to prepare the as-applied cleaning solution. Each recipe shall be maintained in the recipe log for a period of five years from the date the recipe was last prepared. Each recipe shall clearly identify the following:
      - (a) The VOC content of each cleaning solution, based upon the manufacturer's laboratory analysis using USEPA method 24; or
      - (b) The VOC composite partial vapor pressure of each cleaning solution, based upon the method under paragraph (F)(5) of this rule.
    - (ii) Identification of the recipe used to prepare each batch of cleaning solution.
    - (iii) The date and time when the batch was prepared.
    - (iv) An affirmation the batch was prepared in accordance with the recipe.
  - (b) For an owner or operator not maintaining a recipe log in accordance with paragraph (G)(5)(a) of this rule, for each batch of cleaning solution prepared, records of the VOC content or VOC composite partial vapor pressure and the date and time the batch was prepared.
- (5) The owner or operator of a subject offset lithographic or letterpress printing press shall maintain monthly records of the following information:
- (a) The total amount, in gallons, of all the cleaning solutions employed; and
  - (b) The total amount, in gallons, of all the cleaning solutions employed that exceeds the allowable VOC content or VOC composite vapor pressure.

(H) Reporting requirements for the monitoring and record keeping information.

The owner or operator of an offset lithographic or letterpress printing facility that is subject to this rule shall notify the director of any of the following exceedances of applicable requirements. Each notification shall be submitted to the director within forty-five days after the instance occurs, and it shall include a copy of the record showing the instance.

- (1) If determining alcohol content via hydrometer measurement, each hydrometer measurement that shows an exceedance of the applicable alcohol content limitation specified in paragraph (D)(2)(a), (D)(2)(b), (D)(3)(a), or (D)(3)(b) of this rule.
- (2) If complying via refrigerated fountain solution, each temperature reading that shows an exceedance of the temperature limitation specified in paragraph (D)(2)(b) or (D)(3)(b) of this rule.
- (3) Each calculated VOC content that exceeds the VOC content limitation specified in paragraph (D)(2)(b), (D)(3)(b), or (D)(4) of this rule.
- (4) Each instance when an exceedance of the VOC content or VOC composite partial vapor pressure specified in paragraph (D)(6) of this rule for cleaning solutions occurs.
- (5) All three-hour blocks of time during which the average combustion temperature within the thermal oxidizer was below the temperature limitation specified in paragraph (G)(1)(b) of this rule.
- (6) All three-hour blocks of time when the emissions unit was in operation during which the average temperature of the exhaust gases immediately before the catalyst bed was below the temperature limitations specified paragraph (G)(1)(c) of this rule.

(I) Retention factors and capture efficiencies.

For purposes of determining VOC emissions from offset lithographic printing operations, the following retention factors and capture efficiencies shall be used:

- (1) A portion of the VOC contained in inks and cleaning solution is retained in the printed web or in the shop towels used for cleaning. The following retention factors shall be used:
  - (a) A twenty per cent VOC retention factor shall be used for heatset inks printed on absorptive substrates, meaning eighty per cent of the VOC in the ink is emitted during the printing process and is available for capture and control by an add-on pollution control device.
  - (b) A ninety-five per cent VOC retention factor shall be used for sheet-fed and non-heatset web inks printed on absorptive substrates, meaning five per cent of the VOC in the ink is emitted during the printing process.
  - (c) A fifty per cent VOC retention factor shall be used for cleaning solution VOC in shop towels for cleaning solutions with a VOC composite vapor pressure of no more than ten mmHg at twenty degrees Celsius (sixty-eight degrees Fahrenheit) if the contaminated shop towels are kept in closed

containers, meaning fifty per cent of the VOC used on the shop towels is emitted during the cleaning process.

(2) A portion of the VOC contained in inks, fountain solutions, and automatic blanket washes on heatset web presses is captured in the press dryer for control by add-on pollution control devices. The following capture efficiencies are to be used:

(a) A one hundred per cent VOC carry over efficiency shall be used for inks. All the VOC in the ink that is not retained is assumed to be volatilized in the press dryer. Capture efficiency testing for heatset dryers is not required if it is demonstrated that pressure in the dryer is negative relative to the surrounding press room and the airflow is into the dryer.

(b) A seventy per cent VOC carry over efficiency shall be used for fountain solutions containing alcohol substitutes.

(c) A forty per cent VOC carry over efficiency shall to be used for automatic blanket wash solutions with a VOC composite vapor pressure of no more than ten mmHg at twenty degrees Celsius (sixty-eight degrees Fahrenheit).

(J) Requirements on applicability notification, compliance certification, and permit application.

(1) The owner or operator of an offset lithographic or letterpress printing facility that is subject to this rule and that has an offset lithographic or letterpress printing press with an initial startup date before April 2, 2009 of this rule shall notify the Ohio environmental protection agency district office or local air agency in writing that the offset lithographic or letterpress printing press is subject to this rule. The notification, which shall be submitted not later than sixty days after the effective date of this rule (or within sixty days after the offset lithographic or letterpress printing press becomes subject to this rule), shall provide the following information:

(a) Name and address of the owner or operator;

(b) Address (i.e., physical location) of the offset lithographic printing or letterpress printing facility;

(c) Equipment description and Ohio EPA application number (if assigned) of the offset lithographic or letterpress printing press;

(d) Identification of the VOC emission requirement, the means of compliance, and the compliance date for the offset lithographic or letterpress printing press;

(e) Regarding an air pollution permit for the offset lithographic or letterpress printing press, whichever of the following is applicable;

- (i) Submission of an application for an operating permit, an operating permit modification, or an operating permit renewal in accordance with rule 3745-31-02 of the Administrative Code; or
  - (ii) Submission of a statement of intent to submit an application for a Title V permit or modification of a Title V permit in accordance with paragraph (B) of rule 3745-77-02 or rule 3745-77-06 of the Administrative Code, respectively.
- (2) The owner or operator of an offset lithographic or letterpress printing facility that is subject to this rule and that has an offset lithographic or letterpress printing press with an initial startup date on or after April 2, 2009 of this rule shall notify the Ohio environmental protection agency district office or local air agency in writing that the offset lithographic or letterpress printing press is subject to this rule. The notification, which shall be submitted not later than either the date of initial startup of the offset lithographic or letterpress printing press, or sixty days after April 2, 2009 (whichever is later), shall provide the information listed under paragraph (J)(1) of this rule. The application for an installation permit under rule 3745-31-02 of the Administrative Code may be used to fulfill the notification requirements of this paragraph.
- (3) Compliance certification.
  - (a) The owner or operator of an offset lithographic or letterpress printing facility that is subject to this rule shall notify the Ohio environmental protection agency district office or local air agency in writing within thirty days following the completion of any of the following requirements:
    - (i) For an offset lithographic or letterpress printing press subject to the VOC emission requirements in paragraphs (D)(2) to (D)(8) of this rule, the first documented achievement of compliance with each of the requirements;
    - (ii) For an offset lithographic or letterpress printing press subject to the VOC emission control requirement in paragraph (D)(1) of this rule:
      - (a) The completion of installation and initial use of a VOC emission control system for the offset lithographic or letterpress printing press;
      - (b) The completion of installation and initial use of any monitoring devices required under paragraph (G) of this rule for the offset lithographic printing press; and
      - (c) The completion of any compliance testing conducted in accordance with paragraph (F) of this rule to demonstrate compliance with the applicable control requirement.

(b) The compliance certification under paragraph (I)(3)(a) of this rule shall provide the following, where applicable:

- (i) A description of the requirements;
- (ii) A description of the VOC emission control system;
- (iii) A description of the monitoring devices;
- (iv) A description of the records that document continuing compliance;
- (v) The results of any compliance tests, including documentation of test data;
- (vi) The results of any records that document continuing compliance, including calculations; and
- (vii) A statement by the owner or operator of the offset lithographic or letterpress printing facility as to whether the offset lithographic or letterpress printing press has complied with the requirement(s).

(K) Requirements for an owner or operator of an offset lithographic or letterpress printing facility that determines they are not subject to one or more of the control requirements in paragraph (D) of this rule.

(1) When establishing that the facility's total actual VOC emissions, before the application of control systems and devices, from all lithographic and/or letterpress printing operations (including emissions from cleaning solutions used on lithographic and/or letterpress printing presses and fountain solutions) are less than three tons of VOCs per rolling twelve-month period and, therefore, the facility is not subject to the add-on control, cleaning solvent and fountain solution requirements in paragraphs (D)(1) to (D)(8) of this rule, the owner or operator shall maintain one of the following records:

(a) Monthly records of material usage demonstrating the following thresholds have not been exceeded:

--

Type of Letterpress or Offset Lithographic Printing Operation	12-Month Rolling Threshold
Sheet-fed only	768 gallons of cleaning solvent and fountain solution additives
Non-heatset Web only	768 gallons of cleaning solvent and fountain solution additives
Combination of Sheet-fed and Non-heatset Web	768 gallons of cleaning solvent and fountain solution additives.

Heatset Web only	5400 pounds of ink, cleaning solvent and fountain solution additives
------------------	--

A facility that employs a combination of printing technologies that includes a heatset web offset lithographic printing press(es) may not use this option for demonstrating actual emissions are less than three tons of VOCs per rolling twelve-month period.

- (b) The following monthly records and calculations demonstrating actual emissions did not equal or exceed three tons of VOCs per rolling twelve-month period:
- (i) The total gallons of each cleaning solvent used;
  - (ii) The VOC content of each cleaning solvent;
  - (iii) The total gallons of each fountain solution used;
  - (iv) The VOC content of each fountain solution;
  - (v) The total pounds of each ink used; and
  - (vi) The VOC content of each ink.

VOC calculations shall be based on the following formula using applicable retention factors identified in paragraph (I)(1) of this rule:

$$\text{VOC emissions} = \text{amount of ink (pounds)} \times \text{VOC content (weight fraction)} \times (1 - \text{retention factor, as a fraction}) + \text{amount of fountain solution (gallons)} \times \text{VOC content (pounds per gallon)} + \text{amount of cleaning solvent (gallons)} \times \text{VOC content (pounds per gallon)} \times (1 - \text{retention factor, as a fraction}).$$

- (2) When establishing that the heatset web offset lithographic or letterpress printing press potential VOC ink oil emissions, before control, from the press dryer of any heatset web offset lithographic printing press or heatset web letterpress printing press are less than twenty-five tons per year and, therefore, the facility is not subject to the add-on control requirements in paragraph (D)(1) of this rule, the owner or operator shall maintain the following records on a monthly basis for each such press:
- (a) The total pounds of each ink used;
  - (b) The VOC content of each ink; and
  - (c) The hours of operation of each press.
- (3) If an owner or operator of an offset lithographic or letterpress printing facility determines they are subject to one or more of the control requirements in

paragraph (D) of this rule based on the records required under paragraph (J) of this rule, the owner or operator shall comply with said requirement(s) of this rule.

**Control of volatile organic compound emissions from industrial solvent cleaning operations.**

[Comment: For dates and availability of non-regulatory government publications, publications of recognized organizations and associations, federal rules, and federal statutory provisions referenced in this rule, see paragraph (HH) of rule 3745-21-01 of the Administrative Code titled "Referenced materials".]

**(A) Applicability.**

- (1) The requirements of paragraphs (B) to (I) of this rule shall apply to any facility that meets all of the following criteria:
  - (a) The facility is located in Ashtabula, Cuyahoga, Geauga, Lake, Lorain, Medina, Portage, or Summit county.
  - (b) The facility employs solvent materials in solvent cleaning operations during the production, repair, maintenance, or servicing of parts, products, tools, machinery, equipment, or general work areas, and stores and/or disposes of these solvent materials.
  - (c) The total actual VOC emissions from all of the solvent cleaning operations are equal to or greater than 15.0 pounds of VOCs per day before the application of capture systems and control devices.
- (2) The provisions of this rule shall not apply to cleaning operations in the following source categories listed for regulation under Section 183(e) of the Clean Air Act:
  - (a) Aerospace coatings;
  - (b) Flexible package printing materials;
  - (c) Lithographic printing materials;
  - (d) Letterpress printing materials;
  - (e) Flat wood paneling coatings;
  - (f) Large appliance coatings;
  - (g) Metal furniture coatings;
  - (h) Paper film and foil coatings;
  - (i) Wood furniture coatings;
  - (j) Shipbuilding and repair coatings;

- (k) Plastic parts coatings;
- (l) Miscellaneous metals parts coatings;
- (m) Fiberglass boat manufacturing materials;
- (n) Miscellaneous industrial adhesives; or
- (o) Auto and light-duty truck assembly coatings.

(B) Definitions.

The definitions applicable to this rule are contained in paragraph (EE) of rule 3745-21-01 of the Administrative Code.

(C) VOC emission control requirements.

(1) VOC-content limitations.

The owner or operator of a facility that is subject to this rule shall not use a solvent to perform solvent cleaning operations unless the solvent complies with the applicable VOC-content limitation specified in the following table:

-Table of standards-

Solvent Cleaning Operation	VOC-Content Limitation [in pounds per gallon, as employed]
(A) Product cleaning during manufacturing process or surface preparation for coating, adhesive, or ink application:	
(1) General	0.42
(2) Electrical apparatus components and electronic components	0.83
(3) Medical devices and pharmaceuticals	6.7
(B) Repair and maintenance cleaning:	
(1) General	0.42
(2) Electrical apparatus components and electronic components	0.83
(3) Medical devices and pharmaceuticals	
(a) Tools, equipment and machinery	6.7
(b) General work surfaces	5.0
(C) Cleaning of coating or adhesive application equipment	0.42
(D) Cleaning of ink application equipment:	
(1) General	0.42

(2) Flexographic printing	0.42
(3) Gravure printing:	
(a) Publication	0.83
(b) Packaging	0.42
(4) Screen printing	4.2
(5) Ultraviolet ink and electron beam ink application equipment, except screen printing	4.2
(6) Specialty flexographic printing	0.83
(E) Cleaning of polyester resin application equipment not subject to 40 CFR Part 63 Subpart WWWW	0.42

(2) Cleaning devices and methods.

The owner or operator of a facility that is subject to this rule shall employ only the following cleaning devices and methods:

- (a) Wipe cleaning.
- (b) Closed containers or hand held spray bottles from which solvents are applied without a propellant-induced force.
- (c) Cleaning equipment which has a solvent container that can be, and is closed during cleaning operations, except when depositing and removing objects to be cleaned, and is closed during non-operation with the exception of maintenance and repair to the cleaning equipment itself.
- (d) Remote reservoir cleaner, if the operator of the cleaner complies with all of the following:
  - (i) Prevents solvent vapors from escaping from the solvent container by using such devices as a cover or a valve when the remote reservoir is not being used, cleaned, or repaired.
  - (ii) Directs solvent flow in a manner that will prevent liquid solvent from splashing outside of the remote reservoir cleaner.
  - (iii) Does not clean porous or absorbent materials, such as cloth, leather, wood, or rope.
  - (iv) Uses only solvent containers free of all liquid leaks. Auxiliary equipment, such as pumps, pipelines, or flanges, shall not have any liquid leaks, visible tears, or cracks. Any liquid leak, visible tear, or crack detected shall be repaired within one calendar day, or the leaking section of the remote reservoir cold cleaner shall be drained of all solvent and shut down until it is replaced or repaired.

- (e) Non-atomized solvent flow method where the cleaning solvent is collected in a container or a collection system which is closed except for solvent collection openings and, if necessary, openings to avoid excessive pressure build-up inside the container.
  - (f) Solvent flushing method where the cleaning solvent is discharged into a container which is closed except for solvent collection openings and, if necessary, openings to avoid excessive pressure build-up inside the container. The discharged solvent from the equipment must be collected into containers without atomizing into the open air. The solvent may be flushed through the system by air or hydraulic pressure, or by pumping.
- (3) The owner or operator of a facility that is subject to this rule is prohibited from atomizing any solvent unless the emissions are vented to VOC emission control equipment that meet the requirements of paragraph (C)(5) of this rule.
- (4) Storage and disposal.

All VOC-containing solvents used in solvent cleaning operations shall be stored in non-absorbent, non-leaking containers which shall be kept closed at all times except when filling or emptying. It is recommended that cloth and paper moistened with VOC-containing solvents be stored in closed, non-absorbent, non-leaking containers.

(5) Control equipment.

In lieu of complying with the requirements of paragraphs (C)(1) and (C)(2) of this rule for a solvent cleaning operation, the owner or operator of a facility that is subject to this rule may comply with this rule by installing and operating VOC emission control equipment for the solvent cleaning operation. The VOC emission control equipment shall comply with all of the following requirements:

- (a) A capture efficiency of at least ninety per cent, by weight, for the VOC emissions.
  - (b) Either a destruction efficiency of at least ninety-five per cent, by weight, for the VOC emissions or an outlet concentration of less than fifty parts per million, by volume, dry basis, for the VOC emissions.
- (6) Alternate compliance option.

In lieu of complying with the requirements in paragraph (C)(1) of this rule, the owner or operator of a facility may use solvents or solvent solutions for industrial cleaning operations which have a VOC composite partial vapor pressure of less than or equal to eight mm of Hg at twenty degrees Celsius.

(D) Exemptions.

- (1) The following solvent cleaning operations are exempt from all the requirements of this rule:
  - (a) Any solvent cleaning operation that is subject to paragraph (O) of rule 3745-21-09 of the Administrative Code.
  - (b) Janitorial cleaning, including graffiti removal.
  - (c) Stripping of cured coatings, cured ink, or cured adhesives.
  - (d) Cleaning operations in printing pre-press or graphic arts pre-press areas, including the cleaning of film processors, color scanners, plate processors, film cleaning, and plate cleaning.
- (2) The following solvent cleaning operations are exempt from the VOC-content limitations specified in paragraph (C)(1) of this rule:
  - (a) Cleaning of solar cells, laser hardware, scientific instruments, and high-precision optics.
  - (b) Cleaning conducted as part of the following: performance laboratory tests on coatings, adhesives, or inks; research and development programs; and laboratory tests in quality assurance laboratories.
  - (c) Cleaning of paper-based gaskets and clutch assemblies where rubber is bonded to metal by means of an adhesive.
  - (d) Cleaning of cotton swabs to remove cottonseed oil before cleaning of high-precision optics.
  - (e) Medical device and pharmaceutical facilities using up to 1.5 gallons per day of solvents.
  - (f) Cleaning of adhesive application equipment used for thin metal laminating.
  - (g) Cleaning of electronic or electrical cables.
  - (h) Touch-up cleaning performed on printed circuit boards where surface mounted devices have already been attached.
  - (i) Cleaning of coating and adhesive application processes utilized to manufacture transdermal drug delivery product using less than three gallons per day of ethyl acetate.
  - (j) Cleaning of application equipment used to apply coatings on satellites and radiation effect coatings.

- (k) Cleaning of application equipment used to apply solvent-borne fluoropolymer coatings.
  - (l) Cleaning of ultraviolet or electron beam adhesive application.
  - (m) Cleaning of sterilization indicating ink application equipment if the facility employs less than 1.5 gallons per day of solvents for such cleaning.
  - (n) Cleaning of metering rollers, dampening rollers and printing plates.
  - (o) Cleaning of polyester resin application equipment for sources subject to 40 CFR Part 63, Subpart WWWW.
- (3) The following solvent cleaning operations are exempt from the requirements of paragraph (C)(3) of this rule:
- (a) Cleaning of the nozzle tips of automated spray equipment systems, except for robotic systems.
  - (b) Cleaning with spray bottles or containers described in paragraph(C)(2)(b) of this rule.
  - (c) Printing operations where the roller or blanket wash is applied automatically.
- (4) Cleaning with aerosol products shall be exempt from the requirements of paragraphs (C)(1) and (C)(3) of this rule if the facility employs 1.25 gallons (one hundred sixty fluid ounces) or less of the aerosol products per day.
- (E) Compliance dates.
- (1) The owner or operator of a facility that is subject to this rule shall comply with the requirements of this rule no later than the following dates:
- (a) For any solvent cleaning operation which commenced operation before the effective date of this rule, the compliance date for the operation is the initial startup date of the operation or twelve months from the effective date of this rule, whichever is later.
  - (b) For any solvent cleaning operation which commenced operation on or after the effective date of this rule, the compliance date for the operation is the initial startup date of the operation.
- (2) If an owner or operator of a solvent cleaning operation that is subject to this rule employs VOC emission control equipment to comply with this rule, pursuant to paragraph (C)(5) of this rule, the owner or operator shall demonstrate compliance with paragraph (C)(5) of this rule by testing the VOC emission control equipment in accordance with paragraph (F)(2) of this rule within ninety days after the compliance date for the solvent cleaning operation.

- (3) Additional testing of the VOC emission control equipment for a solvent cleaning operation in accordance with paragraph (F)(2) of this rule may be required by the director to ensure continued compliance.

(F) Compliance test methods.

- (1) For any solvent cleaning operation that is subject to the requirements of paragraph (C)(1) of this rule, USEPA method 24 shall be used to determine the VOC content of the solvent material employed in the solvent cleaning operation.
- (2) For any solvent cleaning operation that is subject to the requirements of paragraph (C)(5) of this rule, compliance shall be determined by performing emission tests in accordance with the following:
  - (a) The general provisions specified under paragraphs (A)(2) to (A)(5) of rule 3745-21-10 of the Administrative Code shall apply to the compliance testing.
  - (b) The test methods and procedures of paragraph (C) of rule 3745-21-10 of the Administrative Code shall be followed.
- (3) Determination of vapor pressure.

The composite partial pressure of solvents shall be determined by:

- (a) Determining the identity and quantity of each compound in a blended organic solvent by using ASTM D2306, or by using ASTM E260 for organics and ASTM D3792 for water content, if applicable, or the manufacturer's product formulation data; and
- (b) Determining the vapor pressure of each pure VOC component by using ASTM D2879 or from publications such as "Perry's Chemical Engineer's Handbook, CRC Handbook of Chemistry and Physics, or Lange's Handbook of Chemistry;" and
- (c) Calculating the composite partial pressure of the solvent by using the formula for composite partial pressure. For the purpose of this calculation, the blended solvent shall be assumed to be an ideal solution where "Raoult's Law" applies. The partial pressures of each compound at twenty degrees Celsius (sixty-eight degrees Fahrenheit) shall be used in the formula.

The VOC composite partial pressure is calculated as follows:

$$PP_c = \frac{\sum_{i=1}^n \frac{(W_i)(VP_i)}{MW_i}}{\frac{W_w}{MW_w} + \frac{W_e}{MW_e} + \sum_{i=1}^n \frac{W_i}{MW_i}}$$

Where:

W<sub>i</sub> = Weight of the "i"th VOC compound, in grams.

W<sub>w</sub> = Weight of water, in grams.

W<sub>e</sub> = Weight of exempt compound, in grams.

MW<sub>i</sub> = Molecular weight of the "i"th VOC compound, in grams per gram-mole.

MW<sub>w</sub> = Molecular weight of water, in grams per gram-mole.

MW<sub>e</sub> = Molecular weight of the "e"th exempt compound, in grams per gram-mole.

PP<sub>c</sub> = VOC composite partial pressure at twenty degrees Celsius (sixty-eight degrees Fahrenheit), in mm Hg.

VP<sub>i</sub> = Vapor pressure of the "i"th VOC compound at twenty degrees Celsius (sixty-eight degrees Fahrenheit), in mm Hg.

(G) Monitoring and record keeping requirements.

- (1) The owner or operator of a solvent cleaning operation that is subject to one or more of the VOC-content limitations specified in paragraph (C)(1) of this rule shall collect and record the following information each month for each cleaning material subject to a VOC-content limitation and shall maintain the information at the facility for a period of five years:
  - (a) The name and identification of each cleaning material and the associated solvent cleaning activity.
  - (b) The VOC content, based upon USEPA method 24, of each cleaning material, in pounds per gallon of material, as employed or the VOC composite partial vapor pressures of the solvents or solvent solutions used in the industrial cleaning operations.
- (2) If an owner or operator of a solvent cleaning operation is subject to paragraph (C)(5) of this rule and employs a thermal incinerator or catalytic incinerator to

achieve and maintain compliance, the owner or operator shall comply with the following requirements:

- (a) Continuous temperature monitoring and continuous temperature recording equipment shall be installed and operated to accurately measure the operating temperature(s) for the control device.
- (b) The following information shall be collected and recorded each day of operation of the solvent cleaning operation and the control device, and the information shall be maintained at the facility for a period of five years:
  - (i) A log or record of the operating time for the control device, monitoring equipment, and the associated solvent cleaning operation.
  - (ii) For thermal incinerators, all three-hour periods of operation during which the average combustion temperature was more than fifty degrees Fahrenheit below the average combustion temperature during the most recent emission test that demonstrated that the solvent cleaning operation was in compliance.
  - (iii) For catalytic incinerators, all three-hour periods of operation during which the average temperature of the dryer exhaust gases immediately before the catalyst bed was more than fifty degrees Fahrenheit below the average temperature of the dryer exhaust gases during the most recent emission test that demonstrated that the solvent cleaning operation was in compliance, and all three-hour periods during which the average temperature difference across the catalyst bed was less than eighty per cent of the average temperature difference during the most recent emission test that demonstrated that the solvent cleaning operation was in compliance.
- (3) If an owner or operator of a solvent cleaning operation is subject to paragraph (C)(5) of this rule and employs a carbon adsorption system to achieve and maintain compliance, the owner or operator shall comply with the following requirements:
  - (a) One of the following types of monitoring and recording equipment shall be installed and operated for the carbon adsorption system:
    - (i) A continuous emission monitoring and recording system that is capable of accurately measuring and recording the concentration of organic compounds in the exhaust gases from the carbon adsorption system.
    - (ii) Monitoring and recording equipment that are capable of accurately measuring and recording the total mass steam flow rate for each regeneration cycle of each carbon bed.

- (iii) Monitoring and recording equipment that are capable of accurately measuring and recording the temperature of each carbon bed after regeneration (and after completion of any cooling cycle(s)).
- (b) The following information shall be collected and recorded each day of operation of the solvent cleaning operation and the carbon adsorption system, and the information shall be maintained at the facility for a period of five years:
  - (i) A log or record of the operating time for the carbon adsorption system, monitoring equipment, and the associated solvent cleaning operation.
  - (ii) For a carbon adsorption system that employs a continuous emission monitoring and recording system to measure and record the concentration of organic compounds in the exhaust gases, all three-hour periods of operation during which the average concentration level or reading in the exhaust gases is more than twenty per cent greater than the exhaust gas organic compound concentration level or reading measured by the most recent performance test that demonstrated that the solvent cleaning operation was in compliance.
  - (iii) For a carbon adsorption system that employs monitoring and recording equipment to measure and record the total mass steam flow rate for each regeneration cycle of each carbon bed, all carbon bed regeneration cycles during which the total mass steam flow rate was more than ten per cent below the total mass steam flow rate during the most recent performance test that demonstrated that the solvent cleaning operation was in compliance.
  - (iv) For a carbon adsorption system that employs monitoring and recording equipment to measure and record the temperature of each carbon bed after regeneration (and after completion of any cooling cycle(s)), all carbon bed regeneration cycles during which the temperature of the carbon bed after regeneration (and after completion of any cooling cycle(s)) was more than ten per cent greater than the carbon bed temperature during the most recent performance test that demonstrated that the solvent cleaning operation was in compliance.
- (4) Any owner or operator of a solvent cleaning operation that is exempt from the VOC-content limitation specified in paragraph (C)(1) of this rule, pursuant to paragraph (D)(2)(e) or (D)(2)(m) of this rule, shall collect and record the following information each day for each such solvent cleaning operation and shall maintain the information at the facility for a period of five years:
  - (a) The name and identification number of each solvent employed in the solvent cleaning operation.

- (b) The volume, in gallons, of each solvent employed in the solvent cleaning operation.
  - (c) The total volume, in gallons, of all of the solvents employed in the solvent cleaning operation.
- (5) Any owner or operator of a solvent cleaning operation that is exempt from the requirements of paragraphs (C)(1) and (C)(3) of this rule, pursuant to paragraph (D)(4) of this rule, shall collect and record the following information each day for each such solvent cleaning operation and shall maintain the information at the facility for a period of five years:
- (a) The name and identification number of each aerosol product employed in the solvent cleaning operation.
  - (b) The volume, in gallons, of each aerosol product employed in the solvent cleaning operation.
  - (c) The total volume, in gallons, of all of the aerosol products employed in the solvent cleaning operation.
- (6) Any owner or operator of a solvent cleaning operation that is exempt from the VOC-content limitation specified in paragraph (C)(1) of this rule, pursuant to paragraph (D)(2)(i) of this rule, shall record each day the total volume of ethyl acetate employed in such solvent cleaning operation and shall maintain the information at the facility for a period of five years.
- (H) Reporting requirements for the monitoring and record keeping information.
- (1) Any owner or operator of a solvent cleaning operation that is subject to one or more of the VOC-content limitations specified in paragraph (C)(1) of this rule shall notify the director of any record maintained in accordance with paragraph (G)(1) of this rule showing the use of noncomplying solvents. A copy of such record shall be sent to the director within thirty days following the end of the month in which the use of noncomplying solvents occurs.
  - (2) Any owner or operator of a solvent cleaning operation that employs control equipment and is subject to paragraph (C)(5) of this rule shall submit to the director quarterly summaries of the records required by paragraphs (G)(2)(b) and (G)(3)(b) of this rule. These quarterly reports shall be submitted no later than April thirtieth, July thirty-first, October thirty-first, and January thirty-first, and shall cover the records for the previous calendar quarters.
  - (3) Any owner or operator of a solvent cleaning operation that is exempt from the VOC-content limitation specified in paragraph (C)(1) of this rule, pursuant to paragraph (D)(2)(e) or (D)(2)(o) of this rule, shall notify the director of any record maintained in accordance with paragraph (G)(4) of this rule showing that the solvent cleaning operation employs more than the applicable maximum daily

solvent usage limit. A copy of such record shall be sent to the director within thirty days following the end of the month in which the exceedance occurs.

- (4) Any owner or operator of a solvent cleaning operation that is exempt from the requirements of paragraphs (C)(1) and (C)(3) of this rule, pursuant to paragraph (D)(4) of this rule, shall notify the director of any record maintained in accordance with paragraph (G)(5) of this rule showing that the solvent cleaning operation employs more than the maximum daily usage limit for aerosol products. A copy of such record shall be sent to the director within thirty days following the end of the month in which the exceedance occurs.
  - (5) Any owner or operator of a solvent cleaning operation that is exempt from the VOC-content limitation specified in paragraph (C)(1) of this rule, pursuant to paragraph (D)(2)(i) of this rule, shall notify the director of any record maintained in accordance with paragraph (G)(6) of this rule showing that the solvent cleaning operation employs more than the maximum daily usage limit for ethyl acetate. A copy of such record shall be sent to the director within thirty days following the end of the month in which the exceedance occurs.
- (I) Requirements on applicability notification, compliance certification, and permit application.
- (1) The owner or operator of a facility that is subject to this rule and that has a solvent cleaning operation with an initial startup date before the effective date of this rule shall notify the Ohio environmental protection agency district office or local air agency in writing that the solvent cleaning operation is subject to this rule. The notification, which shall be submitted not later than sixty days after the effective date of this rule (or within sixty days after the solvent cleaning operation becomes subject to this rule), shall provide the following information:
    - (a) Name and address of the owner or operator.
    - (b) Address (i.e., physical location) of the affected facility.
    - (c) Description of the solvent cleaning operation and Ohio environmental protection agency emissions unit number, if assigned.
    - (d) Identification of the VOC emission requirement, the means of compliance and the compliance date for the solvent cleaning operation.
    - (e) Regarding an air pollution permit for the solvent cleaning operation, whichever of the following is applicable;
      - (i) Submission of an application for an operating permit, a permit modification, or an operating permit renewal in accordance with rule 3745-31-02 of the Administrative Code; or

- (ii) Submission of a statement of intent to submit an application for a Title V permit or modification of a Title V permit in accordance with paragraph (B) of rule 3745-77-02 or rule 3745-77-06 of the Administrative Code, respectively.
- (2) The owner or operator of a facility that is subject to this rule and that has a solvent cleaning operation with an initial startup date on or after the effective date of this rule shall notify the Ohio environmental protection agency district office or local air agency in writing that the solvent cleaning operation is subject to this rule. The notification, which shall be submitted not later than either the date of initial startup of the solvent cleaning operation or sixty days after the effective date of this rule, whichever is later, and shall provide the information listed under paragraph (I)(1) of this rule. The application for an installation permit under rule 3745-31-02 of the Administrative Code may be used to fulfill the notification requirements of this paragraph.
- (3) Compliance certification.
  - (a) The owner or operator of a facility that is subject to this rule shall notify the Ohio environmental protection agency district office or local air agency in writing within thirty days following the completion of any of the following requirements:
    - (i) For a solvent cleaning operation subject to the VOC emission requirements in paragraphs (C)(1) to (C)(4) of this rule, the first documented achievement of compliance with the requirements; or
    - (ii) For a solvent cleaning operation subject to the VOC emission control requirement in paragraph (C)(5) of this rule:
      - (a) The completion of installation and initial use of a VOC emission control system for the solvent cleaning operation;
      - (b) The completion of installation and initial use of any monitoring devices required under paragraph (G) of this rule for the solvent cleaning operation; and
      - (c) The completion of any compliance testing conducted in accordance with paragraph (E) of this rule to demonstrate compliance with the applicable control requirement.
  - (b) The compliance certification under paragraph (I)(3)(a) of this rule shall provide the following, where applicable:
    - (i) A description of the requirements.
    - (ii) A description of the VOC emission control system.

- (iii) A description of the monitoring devices.
- (iv) A description of the records that document continuing compliance.
- (v) The results of any compliance tests, including documentation of test data.
- (vi) The results of any records that document continuing compliance, including calculations.
- (vii) A statement by the owner or operator of the affected facility as to whether the solvent cleaning operation has complied with the requirement(s).

3745-21-24 **Flat wood paneling coatings.**

(A) Applicability.

(1) The requirements of this rule shall apply to any facility that meets both of the following criteria:

- (a) The facility is located in Ashtabula, Cuyahoga, Geauga, Lake, Lorain, Medina, Portage, or Summit county.
- (b) The facility has total actual VOC emissions from all flat wood paneling coating lines that are equal to or greater than 15.0 pounds of VOC emissions per day, before the application of capture and control devices.

(B) Definitions.

The definitions applicable to this rule are contained in paragraph (FF) of rule 3745-21-01 of the Administrative Code.

(C) VOC emission control requirements.

(1) VOC content limitations.

The owner or operator of a facility that is subject to this rule shall not apply any flat wood paneling coating that exceeds the VOC content limitations specified in the table of this rule:

--

Categories	VOC Limitations (lbs per gallon, excluding water and exempt solvents)	VOC Limitations (lbs per gallon of solids)
Printed interior panels made of hardwood, plywood, or thin particleboard.	2.1	2.9
Natural finish hardwood plywood panels.	2.1	2.9
Class 2 finishes on hardboard panels.	2.1	2.9
Tileboard.	2.1	2.9
Exterior siding.	2.1	2.9

(2) As an alternative to the VOC emission limitations specified in the table of this rule a facility may choose to vent all VOC emissions to a control device with a minimum overall control efficiency of ninety per cent, by weight.

(D) Application equipment requirements.

A person or facility shall not apply coatings to wood products subject to the provisions of this rule unless the coating is applied with properly operating equipment, in accordance with proper operating procedures, and by the use of one of the following methods:

- (1) Electrostatic application;
- (2) High volume, low pressure (HVLP) spray;
- (3) Hand roller;
- (4) Flow coat;
- (5) Roll coater;
- (6) Dip coat;
- (7) Paint brush; or
- (8) Detailing or touch-up guns.

(E) Work practice standards.

Any person or facility using VOC-containing materials in any flat wood paneling coating line shall ensure that VOC emissions are minimized by incorporating the following procedures:

- (1) Store all VOC coatings, thinners, and cleaning materials in closed containers;
- (2) Minimize spills of VOC containing coatings and thinners, and cleanup any spills immediately;
- (3) Convey any coating, thinners, and cleaning materials in closed containers or pipes; and
- (4) Keep mixing vessels that contain VOC coatings or other materials closed except when specifically in use.
- (5) Minimize emissions of VOC during cleaning of storage, mixing and conveying equipment.

3745-21-25      **Control of VOC emissions from reinforced plastic composites production operations.**

[Comment: For dates and availability of non-regulatory government publications, publications of recognized organizations and associations, federal rules, and federal statutory provisions referenced in this rule, see paragraph (HH) of rule 3745-21-01 of the Administrative Code titled "Referenced materials"]

(A) Applicability.

- (1) Except as otherwise provided in paragraph (A)(2) of this rule, this rule shall apply to any facility that has reinforced plastic composites production operations.
- (2) Excluded from the requirements of this rule are the following:
  - (a) Any facility that only repairs reinforced plastic composites. Repair includes the non-routine manufacture of individual components or parts intended to repair a larger item as defined in paragraph (GG)(65) of rule 3745-21-01 of the Administrative Code.
  - (b) Any facility that is a research and development facility as defined under section 3704.01 of the Revised Code.
  - (c) The production of any reinforced plastic composite that is used in the manufacturing of fiberglass boats within the facility.
  - (d) Any facility in which the reinforced plastic composites operations not otherwise excluded under paragraphs (A)(2)(a), (A)(2)(b), and (A)(2)(c) of this rule use less than 1.2 tons per year of thermoset resins and gel coats that contain styrene combined. The owner or operator of such facility shall maintain records of the amount (in pounds) of thermoset resins and gel coats used each month that contain styrene. These records shall be retained by the owner or operator for a period of not less than five years and shall be made available to the director or any authorized representative of the director for review during normal business hours.
  - (e) Any facility that has VOC emissions of less than 10.0 tons per year from all reinforced plastic composites production operations combined. The owner or operator of such facility shall maintain records of the amount of VOC emissions each month from all reinforced plastic composites production operations. However, this exclusion is not available for any facility that has, or once had, the VOC emissions of equal to or greater than 10.0 tons per year for all reinforced plastic composites production operations combined on or after twelve months from the effective date of this rule.

- (3) Upon achieving compliance with this rule, the reinforced plastic composites production operations at the facility are not required to meet rule 3745-21-07 of the Administrative Code.

(B) Definitions.

The definitions applicable to this rule are contained in paragraph (GG) of rule 3745-21-01 of the Administrative Code.

(C) Affected operations.

- (1) Except as otherwise provided in paragraphs (C)(2) and (C)(3) of this rule, the affected operations consist of all parts of the reinforced plastic composites production facility engaged in the following operations:
  - (a) Open molding;
  - (b) Compression/injection molding;
  - (c) Centrifugal casting;
  - (d) Continuous lamination;
  - (e) Continuous casting;
  - (f) Polymer casting;
  - (g) Pultrusion;
  - (h) Sheet molding compound (SMC) manufacturing;
  - (i) Bulk molding compound (BMC) manufacturing;
  - (j) Mixing;
  - (k) Cleaning of equipment used in reinforced plastic composites manufacture;
  - (l) VOC-containing materials storage; and
  - (m) Repair operations on reinforced plastic composites parts that are manufactured at the facility.
- (2) The following operations and materials are specifically excluded from any requirements in this rule:
  - (a) Application of mold sealing and release agents;
  - (b) Mold stripping and cleaning;

- (c) Repair of reinforced plastic composites parts that the facility did not manufacture, including non-routine manufacturing of parts;
- (d) Personal activities that are not part of the manufacturing operations (such as hobby shops on military bases);
- (e) Prepreg materials;
- (f) Non-gel coat surface coatings;
- (g) Application of putties, polyputties, and adhesives;
- (h) Repair or production materials that do not contain resin or gel coat;
- (i) Research and development operations as defined under section 3704.01 of the Revised Code;
- (j) Polymer casting; and
- (k) Any closed molding operation other than compression/injection molding (for example, resin transfer molding).

[Note: The exclusion of certain operations from any requirements of this rule applies only to operations specifically listed in this paragraph. The requirements for any co-located operations still apply. For example, although polymer casting and resin transfer molding operations are specifically excluded from the requirements of this rule, any gel coating, mixing, VOC-containing materials storage, or cleaning operation associated with a polymer casting operation or a resin transfer molding operation is still subject to the requirements of this rule.]

- (3) Production resins that must meet military specifications are allowed to meet the monomer content limit contained in that specification. In order for this exemption to be used, the owner or operator shall supply to the appropriate Ohio environmental protection agency district office or local air agency the specifications certified as accurate by the military procurement officer, and those specifications must state a requirement for a specific resin, or a specific resin monomer content. Production resins for which this exemption is used shall be applied with nonatomizing resin application equipment unless the owner or operator can demonstrate this is infeasible. The owner or operator shall keep a record of the resins for which the owner or operator is using this exemption.

(D) VOC control requirements.

- (1) The owner or operator of the reinforced plastic composites production facility shall meet the work practice standards in table 1 of this rule for affected operations.

- (2) If the reinforced plastic composites production facility has VOC emissions less than the threshold of one hundred tons of VOC per year from the combination of all open molding, centrifugal casting, continuous lamination/casting, pultrusion, SMC manufacturing, mixing, and BMC manufacturing, the owner or operator shall meet the VOC emissions limits in table 2 of this rule. A facility's VOC emissions threshold shall be calculated in accordance with paragraph (F) of this rule.
- (3) Except as provided in paragraph (D)(4) of this rule, if the reinforced plastic composites production facility has VOC emissions equal to or greater than the threshold of one hundred tons of VOC per year from the combination of all open molding, centrifugal casting, continuous lamination/casting, pultrusion, SMC manufacturing, mixing, and BMC manufacturing, the owner or operator shall reduce the total VOC emissions from these operations by at least ninety-five per cent by weight. As an alternative to meeting ninety-five per cent by weight, the owner or operator may meet the VOC emissions limits in table 3 of this rule. A facility's VOC emissions threshold shall be calculated in accordance with paragraph (F) of this rule.
- (4) If the reinforced plastic composites production facility manufactures large reinforced plastic composites parts using open molding or pultrusion operations, the specific open molding and pultrusion operations used to produce large parts are not required to reduce VOC emissions by ninety-five weight per cent, but shall meet the emission limits in table 2 of this rule. A large open molding part is defined as a part that, when the final finished part is enclosed in the smallest rectangular six-sided box into which the part can fit, the total interior volume of the box exceeds two hundred fifty cubic feet, or any interior sides of the box exceed fifty square feet. A large pultruded part is a part that exceeds an outside perimeter of twenty-four inches or has more than three hundred fifty reinforcements.
- (5) Once a reinforced plastic composites production facility equals or exceeds the one hundred tons of VOC per year threshold of paragraph (D)(3) of this rule on or after the effective date of this rule, it is always subject to the requirements of paragraph (D)(3) of this rule, except as otherwise provided in paragraph (D)(6) of this rule.
- (6) In the event a reinforced plastic composites production facility equals or exceeds the one hundred tons of VOC per year threshold of paragraph (D)(3) of this rule on or after the effective date of this rule, but reduces its emissions to less than the one hundred tons of VOC per year threshold by no later than the compliance date of this rule, the facility is not subject to the requirements of paragraphs (D)(3) of this rule. If such reinforced plastic composites production facility subsequently equals or exceeds the one hundred tons of VOC per year threshold of paragraph (D)(3) of this rule, then it becomes subject to the requirements of paragraph (D)(3) of this rule.

- (7) If the reinforced plastic composites production facility has repair operations subject to this rule, these repair operations shall meet the requirements in table 1 and table 2 of this rule and are not required to meet the ninety-five per cent VOC emissions reduction requirement in paragraph (D)(3) of this rule.
- (8) Except where exempted under paragraph (D)(9) of this rule, any owner or operator of a SMC manufacturing machine shall install and operate a VOC emission control system that reduces the VOC emissions from the SMC manufacturing machine by at least ninety-five per cent by weight (i.e., an overall control efficiency of at least ninety-five per cent by weight).
- (9) Exempted from the requirement of paragraph (D)(8) of this rule is any uncontrolled SMC manufacturing machine with VOC emissions of less than 25.0 tons per rolling twelve-month period.
- (10) If an add-on control device is used to comply with this rule, such add-on control device shall meet all the requirements contained in 40 CFR Part 63, Subpart SS. The owner or operator shall also establish each control device operating limit in 40 CFR Part 63, Subpart SS, that applies.
- (11) Alternative requirements.

The provisions of paragraphs (D)(1) to (D)(10) of this rule shall not apply to any emissions unit that meets the following requirements:

- (a) The director has determined that best available technology for the emissions unit, as required by rule 3745-31-05 of the Administrative Code, is a control requirement or emission limitation that is either less stringent than or inconsistent with the requirements of paragraph (D) of this rule. Best available technology shall be defined in accordance with division (F) of section 3704.01 of the Revised Code and, for purposes of this paragraph, shall provide, where an emission limitation is applicable, the lowest emission limitation that the emissions unit is capable of meeting by the application of control technology that is reasonably available considering technological and economic feasibility. Also, for an emissions unit located within an ozone nonattainment area, the best available technology determination must comply with section 193 (general savings clause) of the Clean Air Act Amendments of 1990.
- (b) The U.S. environmental protection agency has informed the Ohio EPA, in writing, prior to the issuance of a final permit to install for the emissions unit, that the agency has no objection to the issuance of the final permit and the control requirement or emission limitation specified therein.
- (c) A final permit to install has been issued for the emissions unit pursuant to Chapter 3745-31 of the Administrative Code. The permit to install shall contain terms and conditions that specify the control requirement or emission limitation that is the basis for the director's best available

technology determination for the emissions unit, as described in paragraph (D)(11)(a) of this rule, and the permit to install shall be issued by the Ohio EPA in a manner that makes the control requirement or emission limitation federally enforceable.

- (d) USEPA has approved the alternative limitation as a revision to the Ohio state implementation plan.
- (E) Procedures for determination of VOC emissions factors for reinforced plastic composites production operations and determination of monomer content of resins and gel coats.
- (1) Emissions factors are used in this rule to determine compliance with certain VOC emissions limits in table 2 and table 3 of this rule and to calculate VOC emissions. A person may use the equations in table 1 to Subpart WWWW of 40 CFR 63 to calculate such emissions factors or may use any VOC emissions factor approved by USEPA, such as emission factors or emission factor equations from AP-42. These equations and emissions factors are intended to provide a method for one to demonstrate compliance without the need to conduct a VOC emissions test. In lieu of these equations and emissions factors, the owner or operator can elect to use site-specific VOC emissions factors to demonstrate compliance and to calculate VOC emissions provided the site-specific VOC emissions factors are incorporated in the facility's air emissions permit and are based on actual facility VOC emissions test data using the test procedures in 40 CFR 63.5850 or paragraph (C) of rule 3745-21-10 of the Administrative Code. Stack test data for the facility shall supersede emission factors and other emission estimating techniques.
  - (2) In order to determine the monomer content of resins and gel coats, the owner or operator may rely on information provided by the material manufacturer, such as manufacturer's formulation data and material safety data sheets (MSDS), using the procedures specified in paragraphs (E)(2)(a) to (E)(2)(c) of this rule, as applicable.
    - (a) Include in the total monomer content each monomer compound that is present at 0.1 per cent by mass or more for OSHA-defined carcinogens, as specified in 29 CFR 1910.1200(d)(4) and at 1.0 per cent by mass or more for other monomer compounds.
    - (b) If the monomer content is provided by the material supplier or manufacturer as a range, the owner or operator shall use the upper limit of the range for determining compliance. If a separate measurement of the total monomer content, such as an analysis of the material by USEPA method 311 of appendix A to 40 CFR Part 63, exceeds the upper limit of the range of the total monomer content provided by the material supplier or manufacturer, then the owner or operator shall use the measured monomer content to determine compliance.

- (c) If the monomer content is provided as a single value, the owner or operator may use that value to determine compliance. If a separate measurement of the total monomer content is made and is less than two percentage points higher than the value for total monomer content provided by the material supplier or manufacturer, then the owner or operator still may use the provided value to demonstrate compliance. If the measured total monomer content exceeds the provided value by two percentage points or more, then the owner or operator shall use the measured total monomer content to determine compliance.

(F) Calculation of facility's VOC emissions threshold.

- (1) To calculate the facility's VOC emissions threshold in tons per year for purposes of determining which requirements apply under paragraph (D) of this rule, the owner or operator shall use the procedures in either paragraph (F)(2) of this rule for new facilities prior to startup, or paragraph (F)(3) of this rule for existing facilities and new facilities after startup. A facility's VOC emissions threshold pertains to the following operations: open molding, centrifugal casting, continuous lamination/casting, pultrusion, SMC manufacturing, mixing, and BMC manufacturing. The owner or operator is not required to calculate or report emissions under this paragraph if the facility does not have any of those operations. However, emissions calculation and emission reporting procedures in other paragraphs of this rule still apply. For the facility's VOC emissions threshold, calculate VOC emissions prior to any add-on control device, and do not include VOC emissions from any resin or gel coat used in operations subject to the boat manufacturing NESHAP, 40 CFR Part 63, Subpart VVVV, or from the manufacture of large parts as defined in paragraph (D)(4) of this rule. A "new facility" means a facility that has one or more operations specified in paragraph (F)(1) of this rule in which all such operations have a startup on or after the effective date of this rule. An "existing facility" means a facility that has one or more operations specified in paragraph (F)(1) of this rule in which and at least one such operation has a startup prior to the effective date of this rule.
- (2) For new facilities prior to startup, the owner or operator shall calculate a weighted average VOC emissions factor for the operations specified in paragraph (F)(1) of this rule on a pounds of VOC per ton of resin, monomer, or gel coat basis. Base the weighted average on the projected operation for the twelve months subsequent to facility startup. Multiply the weighted average VOC emissions factor by projected resin, monomer, or gel coat use over the same period. The owner or operator may calculate a VOC emissions factor based on the factors in table 1 to Subpart WWW of 40 CFR 63, or may use any VOC emissions factor approved by USEPA, such as factors from AP-42, or VOC emissions test data from similar facilities. The organic HAP emissions factors in table 1 to Subpart WWW of 40 CFR 63 are equivalent to the VOC emissions factors for this rule.

- (3) For existing facilities and new facilities after startup, the owner or operator may use the procedures in either paragraph (F)(3)(a) or (F)(3)(b) of this rule for the operations specified in paragraph (F)(1) of this rule. If the emission factors for an existing facility have changed over the period of time prior to its initial compliance date due to incorporation of pollution-prevention control techniques, the existing facility may base the average emission factor on its operations as they exist on the compliance date. If an existing or new facility has accepted an enforceable permit limit that would result in less than one hundred tons per year (per rolling twelve-month period) of VOC measured prior to any add-on controls, and can demonstrate that it will operate at that level subsequent to the compliance date, it can be deemed to be below the one hundred tons per year threshold.

- (a) Use a calculated emission factor.

Calculate a weighted average VOC emissions factor on a pounds per ton of resin, monomer, or gel coat basis. Base the weighted average on the prior twelve months of operation. Multiply the weighted average VOC emissions factor by resin, monomer, or gel coat use over the same period. The owner or operator may calculate this VOC emissions factor based on the equations in table 1 to subpart WWW of 40 CFR 63, or the owner or operator may use any VOC emissions factor approved by USEPA, such as emission factors or emission factor equations from AP-42, or site-specific VOC emissions factors if they are supported by VOC emissions test data. The organic HAP emissions factors in table 1 to Subpart WWW of 40 CFR 63 are equivalent to the VOC emissions factors for this rule.

- (b) Conduct performance testing.

Conduct performance testing using the test procedures in 40 CFR 63.5850 or paragraph (C) of rule 3745-21-10 of the Administrative Code to determine a site-specific VOC emissions factor in units of pounds of VOC per ton of resin, monomer, or gel coat used. Conduct the test under conditions expected to result in the highest possible VOC emissions. Multiply this factor by annual resin, monomer, or gel coat use to determine annual VOC emissions. This calculation shall be repeated and reported annually.

- (c) Pultrusion operations.

For pultrusion operations employing enclosures or resin injection (direct or preform) pursuant to paragraph (I)(5)(b) of this rule, actual emissions may be calculated as four tenths and one tenth, respectively, of open line emissions, where open line emissions are calculated as specified in air permits covering these operations.

- (4) Existing facilities shall initially perform this calculation based on their twelve months of operation prior to the effective date of this rule, and include this

information with their applicability notification report. Existing facilities shall repeat the calculation based on their resin, monomer, and gel coat use in the twelve months prior to their compliance date, and submit this information with their initial compliance report.

- (5) After the initial compliance date, existing and new facilities shall calculate VOC emissions over the twelve-month period ending June thirtieth or December thirty-first, whichever date is the first date following the compliance date specified in paragraph (R) of this rule. Subsequent calculations should cover the periods in the semiannual compliance reports.
  - (6) The owner or operator of a facility may use alternative methods to calculate emissions that are mathematically equivalent to those specified in paragraphs (F)(2) and (F)(3) of this rule or that are consistent with emission factors acceptable under paragraphs (F)(2) and (F)(3) of this rule.
- (G) Options for meeting the VOC emissions limits for open molding and centrifugal casting operations.

The owner or operator shall use one of the following methods in paragraphs (G)(1) to (G)(4) of this rule to meet the VOC emissions limits for open molding or centrifugal casting operations specified in table 2 or table 3 of this rule. The owner or operator may use any control method that reduces VOC emissions, including reducing resin and gel coat monomer content, changing to nonatomized mechanical application, using covered curing techniques, and routing part or all of the VOC emissions to an add-on control. The owner or operator may use different compliance options for the different operations listed in table 2 or table 3 of this rule. The necessary calculations shall be completed within thirty days after the end of each month. The owner or operator may switch between the compliance options in paragraphs (G)(1) to (G)(4) of this rule. When the owner or operator changes to an option based on a twelve-month rolling average, the owner or operator shall base the average on the previous twelve months of data calculated using the compliance option the owner or operator is changing to, unless the owner or operator was previously using an option that did not require the owner or operator to maintain records of resin and gel coat use. In this case, the owner or operator shall immediately begin collecting resin and gel coat use data and demonstrate compliance twelve months after changing options.

- (1) Demonstrate that an individual resin or gel coat, as applied, meets the applicable emission limit in table 2 or table 3 of this rule.
  - (a) Calculate the actual VOC emissions factor for each different process stream within each operation type. A process stream is defined as each individual combination of resin or gel coat, application technique, and control technique. Process streams within operations types are considered different from each other if any of the following four characteristics vary: the neat resin plus or neat gel coat plus monomer content, the gel coat type, the application technique, or the control technique. The owner or operator shall

calculate VOC emissions factors for each different process stream by using the appropriate equations in table 1 to Subpart WWWW of 40 CFR 63 for open molding and for centrifugal casting, or site-specific VOC emissions factors discussed in paragraph (E) of this rule. The emission factor calculation should include any and all emission reduction techniques used including any add-on controls. If vapor suppressants are used to reduce VOC emissions, the owner or operator shall determine the vapor suppressant effectiveness (VSE) by conducting testing according to the procedures specified in appendix A to Subpart WWWW of 40 CFR part 63. If an add-on control device is used to reduce VOC emissions, the owner or operator shall determine the add-on control factor by conducting capture and control efficiency testing using the procedures specified in 40 CFR 63.5850. The VOC emissions factor calculated from the equations in table 1 to Subpart WWWW of 40 CFR 63, or a site-specific emissions factor, is multiplied by the add-on control factor to calculate the VOC emissions factor after control. The add-on control factor used in the VOC emissions factor equations is calculated from the following equation:

$$\text{Add-on Control Factor} = 1 - \frac{\% \text{ Control Efficiency}}{100}$$

where:

Per cent control efficiency = value calculated from VOC emissions test measurements made according to the requirements of 40 CFR 63.5850.

- (b) If the calculated emission factor is less than or equal to the appropriate emission limit, the owner or operator has demonstrated that this process stream complies with the emission limit in table 2 of this rule. It is not necessary that all process streams, considered individually, demonstrate compliance to use this option for some process streams. However, for any individual resin or gel coat being used, if any of the process streams that include that resin or gel coat are to be used in any averaging calculations described in paragraphs (G)(2) to (G)(4) of this rule, then all process streams using that individual resin or gel coat shall be included in the averaging calculations.
- (2) Demonstrate that, on average, the individual VOC emissions limits for each unique combination of operation type and resin application method or gel coat type shown in table 2 of this rule that applies to the facility are met.
- (a) Group the process streams described in paragraph (G)(1) of this rule by operation type and resin application method or gel coat type listed in table 2 of this rule and then calculate a weighted average emission factor based on the amounts of each individual resin or gel coat used for the last twelve months. To do this, sum the product of each individual VOC emissions factor calculated in paragraph (G)(1)(a) of this rule and the amount of neat resin plus and neat gel coat plus usage that corresponds to the individual factors and divide the numerator by the total amount of neat resin plus and

neat gel coat plus used in that operation type as shown in the following equation:

$$\text{Average VOC emissions factor} = \frac{\sum_{i=1}^n (\text{Actual Process Stream } EF_i * \text{Material}_i)}{\sum_{i=1}^n \text{Material}_i}$$

where:

Actual Process Stream  $EF_i$  = actual VOC emissions factor for process stream  $i$ , pounds of VOC per ton of neat resin plus or neat gel coat plus.

$\text{Material}_i$  = the amount of neat resin plus or neat gel coat plus used during the last twelve calendar months for process stream  $i$ , tons.

$n$  = number of process streams where the owner or operator calculated a VOC emissions factor.

- (b) The owner or operator may, but is not required to, include process streams where the owner or operator has demonstrated compliance as described in paragraph (G)(1) of this rule, subject to the limitations described in paragraph (G)(1)(b) of this rule, and the owner or operator is not required to and should not include process streams for which the owner or operator will demonstrate compliance using the procedures in paragraph (G)(4) of this rule.
  - (c) Compare each VOC emissions factor calculated in paragraph (G)(2)(a) of this rule with its corresponding VOC emissions limit in table 2 or table 3 of this rule. If all emissions factors are equal to or less than their corresponding emission limits, then the operation is in compliance.
- (3) Demonstrate compliance with a weighted average VOC emissions limit.

Demonstrate each month that each weighted average of the VOC emissions limits in table 2 or table 3 of this rule that apply are being met. When using this option, the owner or operator shall demonstrate compliance with the weighted average VOC emissions limit for all open molding operations, and then separately demonstrate compliance with the weighted average VOC emissions limit for all centrifugal casting operations. Open molding operations and centrifugal casting operations may not be averaged with each other.

- (a) Each month calculate the weighted average VOC emissions limit for all open molding operations and the weighted average VOC emissions limit for all centrifugal casting operations for the facility for the last twelve-month period to determine the VOC emissions limit the owner or operator shall meet. To do this, multiply the individual VOC emissions limits in table 2 or table 3 of this rule for each open molding (centrifugal casting) operation

type by the amount of neat resin plus or neat gel coat plus used in the last twelve months for each open molding (centrifugal casting) operation type, sum these results, and then divide this sum by the total amount of neat resin plus and neat gel coat plus used in open molding (centrifugal casting) over the last twelve months as shown in the following equation:

$$\text{Weighted Average VOC Emissions Limit} = \frac{\sum_{i=1}^n (\text{EL}_i * \text{Material}_i)}{\sum_{i=1}^n \text{Material}_i}$$

where:

$\text{EL}_i$  = VOC emissions limit for operation type i, pounds per ton from table 2 or table 3 of this rule.

$\text{Material}_i$  = amount of neat resin plus or neat gel coat plus used during the last twelve-month period for operation type i, tons.

n = number of operations.

- (b) Each month calculate the weighted average VOC emissions factor for open molding and centrifugal casting. To do this, multiply the actual open molding (centrifugal casting) operation VOC emissions factors calculated in paragraph (G)(2)(a) of this rule and the amount of neat resin plus and neat gel coat plus used in each open molding (centrifugal casting) operation type, sum the results, and divide this sum by the total amount of neat resin plus and neat gel coat plus used in open molding (centrifugal casting) operations as shown in the following equation:

$$\text{Actual Weighted Average VOC Emissions Factor} = \frac{\sum_{i=1}^n (\text{Actual Operation EF}_i * \text{Material}_i)}{\sum_{i=1}^n \text{Material}_i}$$

where:

Actual Operation  $\text{EF}_i$  = Actual VOC emissions factor for operation type i, pounds of VOC per ton of neat resin plus or neat gel coat plus.

$\text{Material}_i$  = amount of neat resin plus or neat gel coat plus used during the last twelve calendar months for operation type i, tons.

n = number of operations.

- (c) Compare the values calculated in paragraphs (G)(3)(a) and (G)(3)(b) of this rule. If each twelve-month rolling average VOC emissions factor is less

than or equal to the corresponding twelve-month rolling average VOC emissions limit, then the operation is in compliance.

- (4) Meet the VOC emissions limit for one application method and use the same resins for all application methods of that resin type.

This option is limited to resins of the same type. The resin types for which this option may be used are noncorrosion-resistant, corrosion-resistant and/or high strength, and tooling.

- (a) For any combination of manual resin application, mechanical resin application, filament application, or centrifugal casting, the owner or operator may elect to meet the VOC emissions limit for any one of these application methods and use the same resin in all of the resin application methods listed in this paragraph. Table 4 of this rule presents the possible combinations based on the owner or operator selecting the application process that results in the highest allowable monomer content resin. If the resin's monomer content is below the applicable value shown in the table 4 of this rule, the resin is in compliance.
- (b) The owner or operator may also use a weighted average monomer content for each application method described in paragraph (G)(4)(a) of this rule. Calculate the weighted average monomer content monthly. Use the equation in paragraph (G)(2)(a) of this rule except substitute monomer content for VOC emissions factor. The operation is in compliance if the weighted average monomer content based on the last twelve months of resin use is less than or equal to the applicable monomer contents in the table 4 of this rule.
- (c) The owner or operator may simultaneously use the averaging provisions in paragraph (G)(2) or (G)(3) of this rule to demonstrate compliance for any operations and/or resins the owner or operator does not include in the compliance demonstrations in paragraphs (G)(4)(a) and (G)(4)(b) of this rule. However, any resins for which the owner or operator claims compliance under the option in paragraphs (G)(4)(a) and (G)(4)(b) of this rule shall not be included in any of the averaging calculations described in paragraph (G)(2) or (G)(3) of this rule.
- (d) The owner or operator does not have to keep records of resin use for any of the individual resins where the owner or operator demonstrates compliance under the option in paragraph (G)(4)(a) of this rule unless the owner or operator elects to include that resin in the averaging calculations described in paragraph (G)(4)(b) of this rule.
- (H) Options for meeting the VOC emissions limits for continuous lamination/casting operations.

For continuous casting/lamination operations, the owner or operator shall use one or more of the options listed in paragraphs (H)(1) to (H)(4) of this rule to meet the VOC emissions limits specified in table 2 or table 3 of this rule and shall use the calculation procedures provided in paragraphs (J) to (M) of this rule.

(1) Compliant line option.

Demonstrate that each continuous lamination line and each continuous casting line complies with the applicable VOC emissions limit.

(2) Averaging option.

Demonstrate that all continuous lamination and continuous casting lines combined, comply with the applicable VOC emissions limit.

(3) Add-on control device option.

If the operation must meet the 58.5 weight per cent VOC emissions reduction limit in table 2 of this rule, the owner or operator has the option of demonstrating that the operation achieves ninety-five per cent reduction of all wet-out area VOC emissions.

(4) Combination option.

Use any combination of options in paragraphs (H)(1), (H)(2), and (H)(3) of this rule.

(I) Options for meeting the standards for pultrusion operations subject to the sixty per cent by weight VOC emissions reductions requirement.

For pultrusion operations, the owner or operator shall use one or more of the options in paragraphs (I)(1) to (I)(5) of this rule to meet the sixty weight per cent VOC emissions limit in table 2 of this rule.

(1) Achieve an overall reduction in VOC emissions of sixty per cent by weight capturing the VOC emissions and venting them to a control device or any combination of control devices. Conduct capture and destruction efficiency testing as specified in 40 CFR 63.5850 to determine the per cent VOC emissions reduction.

(2) Design, install, and operate wet area enclosures and resin drip collection systems on pultrusion machines that meet the criteria in paragraphs (I)(2)(a) to (I)(2)(j) of this rule.

(a) The enclosure shall cover and enclose the open resin bath and the forming area in which reinforcements are pre-wet or wet-out and moving toward the die(s). The surfaces of the enclosure shall be closed except for openings to allow material to enter and exit the enclosure.

- (b) For open bath pultrusion machines with a radio frequency pre-heat unit, the enclosure shall extend from the beginning of the resin bath to within 12.5 inches or less of the entrance of the radio frequency pre-heat unit. If the stock that is within 12.5 inches or less of the entrance to the radio frequency pre-heat unit has any drip, it shall be enclosed. The stock exiting the radio frequency pre-heat unit is not required to be in an enclosure if the stock has no drip between the exit of the radio frequency pre-heat unit to within 0.5 inches of the entrance of the die.
- (c) For open bath pultrusion machines without a radio frequency pre-heat unit, the enclosure shall extend from the beginning of the resin bath to within 0.5 inches or less of the die entrance.
- (d) For pultrusion lines with pre-wet area(s) prior to direct die injection, no more than 12.5 inches of open wet stock is permitted between the entrance of the first pre-wet area and the entrance to the die. If the pre-wet stock has any drip, it shall be enclosed.
- (e) The total open area of the enclosure shall not exceed two times the cross sectional area of the puller window(s) and shall comply with the requirements in paragraphs (I)(2)(e)(i) to (I)(2)(e)(iii) of this rule.
  - (i) All areas that are open need to be included in the total open area calculation with the exception of access panels, doors, and/or hatches that are part of the enclosure.
  - (ii) The area that is displaced by entering reinforcement or exiting product is considered open.
  - (iii) Areas that are covered by brush covers are considered closed.
- (f) Open areas for level control devices, monitoring devices, agitation shafts, and fill hoses shall have no more than 1.0 inch clearance.
- (g) The access panels, doors, and/or hatches that are part of the enclosure shall close tightly. Damaged access panels, doors, and/or hatches that do not close tightly shall be replaced.
- (h) The enclosure may not be removed from the pultrusion line, and access panels, doors, and/or hatches that are part of the enclosure shall remain closed whenever resin is in the bath, except for the time period discussed in paragraph (I)(2)(i) of this rule.
- (i) The maximum length of time the enclosure may be removed from the pultrusion line or the access panels, doors, and/or hatches and may be open, is thirty minutes per eight-hour shift, forty-five minutes per twelve-hour shift, or ninety minutes per day if the machine is operated for twenty-four

hours in a day. The time restrictions do not apply if the open doors or panels do not cause the limit of two times the puller window area to be exceeded. Facilities may average the times that access panels, doors, and/or hatches are open across all operating lines. In that case the average shall not exceed the times shown in this paragraph. All lines included in the average shall have operated the entire time period being averaged.

- (j) No fans, blowers, and/or air lines may be allowed within the enclosure. The enclosure shall not be ventilated.
- (3) Use direct die injection pultrusion machines with resin drip collection systems that meet all the criteria specified in paragraphs (I)(3)(a) to (I)(3)(c) of this rule.
  - (a) All the resin that is applied to the reinforcement is delivered directly to the die.
  - (b) No exposed resin is present, except at the face of the die.
  - (c) Resin drip is captured in a closed system and recycled back to the process.
- (4) Use a preform injection system that meets the definition in paragraph (GG)(60) of rule 3745-21-01 of the Administrative Code.
- (5) Use any combination of options in paragraphs (I)(1) to (I)(4) of this rule in which different pultrusion lines comply with different options described in paragraphs (I)(1) to (I)(4) of this rule; and
  - (a) Each individual pultrusion machine meets the sixty per cent reduction requirement; or
  - (b) The weighted average reduction based on resin throughput of all pultrusion machines combined is sixty per cent. For purposes of the average per cent reduction calculation, wet area enclosures reduce VOC emissions by sixty per cent, and direct die injection and preform injection reduce VOC emissions by ninety per cent. For averaging purposes, zero reduction credit is earned during production on lines that have not installed and operated enclosures or injection systems as described in paragraphs (I)(2) to (I)(4) of this rule
- (J) Calculation of annual uncontrolled and controlled VOC emissions from wet-out area(s) and oven(s) for continuous lamination/casting operations.

To calculate the annual uncontrolled and controlled VOC emissions from the wet-out areas and from the ovens of continuous lamination/casting operations, the owner or operator shall develop uncontrolled and controlled wet-out area and uncontrolled and controlled oven VOC emissions estimation equations or factors to apply to each formula applied on each line, determine how much of each formula for each end product is applied each year on each line, and assign uncontrolled and controlled

wet-out area and uncontrolled and controlled oven VOC emissions estimation equations or factors to each formula. The owner or operator shall determine the overall capture efficiency using the procedures in 40 CFR 63.5850.

- (1) To develop uncontrolled and controlled VOC emissions estimation equations and factors, the owner or operator shall, at a minimum, do the following, as specified in paragraphs (J)(1)(a) to (J)(1)(f) of this rule:
  - (a) Identify each end product and the thickness of each end product produced on the line. Separate end products into the following end product groupings, as applicable: corrosion-resistant gel coated end products, noncorrosion-resistant gel coated end products, corrosion-resistant non-gel coated end products, and noncorrosion-resistant non-gel coated end products. This step creates end product/thickness combinations.
  - (b) Identify each formula used on the line to produce each end product/thickness combination. Identify the amount of each such formula applied per year. Rank each formula used to produce each end product/thickness combination according to usage within each end product/thickness combination.
  - (c) For each end product/thickness combination being produced, select the formula with the highest usage rate for testing.
  - (d) If not already selected, also select the worst-case formula (likely to be associated with the formula with the highest monomer content, type of monomer, application of gel coat, thin product, low line speed, higher resin table temperature) amongst all formulae. (The owner or operator may use the results of the worst-case formula test for all formulae if desired to limit the amount of testing required.)
  - (e) For each formula selected for testing, conduct at least one test (consisting of three runs). During the test, track information on monomer content and type of monomer, end product thickness, line speed, and resin temperature on the wet-out area table.
  - (f) Using the test results, develop uncontrolled and controlled VOC emissions estimation equations (or factors) or series of equations (or factors) that best fit the results for estimating uncontrolled and controlled VOC emissions, taking into account the monomer content and type of monomer, end product thickness, line speed, and resin temperature on the wet-out area table.
- (2) In lieu of using the method specified in paragraph (J)(1) of this rule for developing uncontrolled and controlled VOC emissions estimation equations and factors, the owner or operator may use either method specified in paragraphs (J)(2)(a) and (J)(2)(b) of this rule, as applicable.
  - (a) For either uncontrolled or controlled VOC emissions estimates, the owner or operator may use previously established, facility-specific VOC emissions

equations or factors, provided they allow estimation of both wet-out area and oven VOC emissions, where necessary, and have been approved by the appropriate Ohio environmental protection agency district office or local air agency. If a previously established equation or factor is specific to the wet-out area only, or to the oven only, then the owner or operator shall develop the corresponding uncontrolled or controlled equation or factor for the other VOC emissions source.

- (b) For uncontrolled (controlled) VOC emissions estimates, the owner or operator may use controlled (uncontrolled) VOC emissions estimates and control device destruction efficiency to calculate your uncontrolled (controlled) VOC emissions provided the control device destruction efficiency was calculated at the same time the owner or operator collected the data to develop your facility's controlled (uncontrolled) VOC emissions estimation equations and factors.
- (3) The owner or operator shall assign to each formula an uncontrolled VOC emissions estimation equation or factor based on the end product/thickness combination for which that formula is used.
- (4) Calculation of annual uncontrolled and annual controlled VOC emissions from wet-out areas and ovens.
  - (a) To calculate the annual uncontrolled VOC emissions from wet-out areas that do not have any capture and control and from wet-out areas that are captured by an enclosure, but are vented to the atmosphere and not to a control device, multiply each formula's annual usage by its appropriate VOC emissions estimation equation or factor and sum the individual results.
  - (b) To calculate the annual uncontrolled VOC emissions that escape from the enclosure on the wet-out area, multiply each formula's annual usage by its appropriate uncontrolled VOC emissions estimation equation or factor, sum the individual results, and multiply the summation by one minus the per cent capture (expressed as a fraction).
  - (c) To calculate the annual uncontrolled oven VOC emissions, multiply each formula's annual usage by its appropriate uncontrolled VOC emissions estimation equation or factor and sum the individual results.
  - (d) To calculate the annual controlled VOC emissions, multiply each formula's annual usage by its appropriate VOC emissions estimation equation or factor and sum the individual results to obtain total annual controlled VOC emissions.
- (5) Where a facility is calculating both uncontrolled and controlled VOC emissions estimation equations and factors, the owner or operator shall test the same formulae. In addition, the owner or operator shall develop both sets of equations and factors from the same tests.

(K) Determination of the capture efficiency of the enclosure on the wet-out area and the capture efficiency of oven(s) for continuous lamination/casting operations.

(1) The capture efficiency of a wet-out area enclosure is assumed to be one hundred per cent if it meets the design and operation requirements for a permanent total enclosure (PTE) specified in USEPA method 204 of Appendix M to 40 CFR Part 51. If a PTE does not exist, then a temporary total enclosure shall be constructed and verified using USEPA method 204, and capture efficiency testing shall be determined using USEPA methods 204B to E of Appendix M to 40 CFR Part 51.

(2) The capture efficiency of an oven is to be considered one hundred per cent, provided the oven is operated under negative pressure.

(L) Procedures to determine how much neat resin plus is applied to the line and how much neat gel coat plus is applied to the line for continuous lamination/casting operations.

Use the following procedures to determine how much neat resin plus and neat gel coat plus is applied to the line each year:

(1) Track formula usage by end product/thickness combinations.

(2) Use in-house records to show usage. This may be either from automated systems or manual records.

(3) Record daily the usage of each formula/end product combination on each line. This is to be recorded at the end of each run ( i.e., when a changeover in formula or product is made) and at the end of each shift.

(4) Sum the amounts from the daily records to calculate annual usage of each formula/end product combination by line.

(M) Calculation of per cent reduction to demonstrate compliance for continuous lamination/casting operations.

The owner or operator shall calculate per cent reduction for continuous lamination/casting operations using any of the methods specified in paragraphs (M)(1) to (M)(4) of this rule.

(1) Compliant line option.

If all of the wet-out areas have a PTE that meets the requirements of USEPA method 204 of Appendix M of 40 CFR Part 51, and all of the wet-out area VOC emissions and oven VOC emissions are vented to an add-on control device, use the equation in paragraph (M)(1)(a) of this rule to demonstrate compliance. In

all other situations, use the equation in paragraph (M)(1)(b) of this rule to demonstrate compliance.

$$\text{PR} = \frac{(\text{Inlet}) - (\text{Outlet})}{(\text{Inlet})} \times 100 \quad (\text{a})$$

where:

PR = per cent reduction.

Inlet = VOC emissions entering the control device, pounds of VOC per year.

Outlet = VOC emissions exiting the control device to the atmosphere, pounds of VOC per year.

$$\text{PR} = \frac{(\text{WAE}_{\text{ci}} + \text{O}_{\text{ci}}) - (\text{WAE}_{\text{co}} + \text{O}_{\text{co}})}{(\text{WAE}_{\text{ci}} + \text{WAE}_{\text{u}} + \text{O}_{\text{ci}} + \text{O}_{\text{u}})} \times 100 \quad (\text{b})$$

where:

PR = per cent reduction.

$\text{O}_{\text{ci}}$  = oven VOC emissions, pounds of VOC per year, vented to a control device.

$\text{O}_{\text{co}}$  = oven VOC emissions, pounds of VOC per year, from the control device outlet.

$\text{O}_{\text{u}}$  = oven VOC emissions, pounds of VOC per year, not vented to a control device.

$\text{WAE}_{\text{ci}}$  = wet-out area VOC emissions, pounds of VOC per year, vented to a control device.

$\text{WAE}_{\text{co}}$  = wet-out area VOC emissions, pounds of VOC per year, from the control device outlet.

$\text{WAE}_{\text{u}}$  = wet-out area VOC emissions, pounds of VOC per year, not vented to a control device.

(2) Averaging option.

Use the following equation to calculate per cent reduction.

$$PR = \frac{\left( \sum_{i=1}^m WAEi_{ci} + \sum_{j=1}^n Oj_{ci} \right) - \left( \sum_{i=1}^m WAEi_{co} + \sum_{j=1}^n Oj_{co} \right)}{\left( \sum_{i=1}^m WAEi_{ci} + \sum_{j=1}^n Oj_{ci} + \sum_{i=1}^m WAEi_u + \sum_{j=1}^n Oj_u \right)}$$

where:

PR = per cent reduction.

$Oj_{ci}$  = VOC emissions from oven j, pounds of VOC per year, sent to a control device.

$Oj_{co}$  = VOC emissions from oven j, pounds of VOC per year, at the outlet of the control device.

$Oj_u$  = VOC emissions from oven j, pounds of VOC per year, not sent to a control device.

$WAEi_{ci}$  = wet-out area VOC emissions from wet-out area i, pounds of VOC per year, sent to a control device.

$WAEi_{co}$  = wet-out area VOC emissions from wet-out area i, pounds of VOC per year, at the outlet of a control device.

$WAEi_u$  = wet-out area VOC emissions from wet-out area i, pounds of VOC per year, not sent to a control device.

m = number of wet-out areas.

n = number of ovens.

(3) Add-on control device option.

Use the equation in paragraph (M)(1)(a) of this rule to calculate per cent reduction.

(4) Combination option.

Use the equations in paragraphs (M)(1)(a), (M)(1)(b), and (M)(2) of this rule, as applicable, to calculate per cent reduction.

(N) Calculation of a VOC emissions factor to demonstrate compliance for continuous lamination/casting operations.

(1) Compliant line option.

Use the following equation to calculate a VOC emissions factor in pounds of VOC per ton of neat resin plus and neat gel coat plus.

$$E = \frac{WAE_u + WAE_c + O_u + O_c}{(R + G)}$$

where:

E = VOC emissions factor in pounds of VOC per ton of neat resin plus and neat gel coat plus.

WAE<sub>u</sub> = uncontrolled wet-out area VOC emissions, pounds of VOC per year.

WAE<sub>c</sub> = controlled wet-out area VOC emissions, pounds of VOC per year.

O<sub>u</sub> = uncontrolled oven VOC emissions, pounds of VOC per year.

O<sub>c</sub> = controlled oven VOC emissions, pounds of VOC per year.

R = total usage of neat resin plus, tons per year.

G = total usage of neat gel coat plus, tons per year.

(2) Averaging option.

Use the following equation to demonstrate compliance.

$$E = \frac{\sum_{i=1}^m WAE_{ui} + \sum_{i=1}^o WAE_{ci} + \sum_{j=1}^n O_{uj} + \sum_{j=1}^p O_{cj}}{(R + G)}$$

where:

E = VOC emissions factor in pounds of VOC per ton of resin and gel coat.

WAE<sub>ui</sub> = uncontrolled VOC emissions from wet-out area i, pounds of VOC per year.

WAE<sub>ci</sub> = controlled VOC emissions from wet-out area i, pounds of VOC per year.

O<sub>uj</sub> = uncontrolled VOC emissions from oven j, pounds of VOC per year.

O<sub>cj</sub> = controlled VOC emissions from oven j, pounds of VOC per year.

i = number of wet-out areas.

j = number of ovens.

m = number of wet-out areas uncontrolled.

n = number of ovens uncontrolled.

o = number of wet-out areas controlled.

p = number of ovens controlled.

R = total usage of neat resin plus, tons per year.

G = total usage of neat gel coat plus, tons per year.

(3) Combination option.

Use the equation in paragraphs (N)(1) and (N)(2) of this rule, as applicable, to demonstrate compliance.

(O) Demonstration of continuous compliance and the associated monitoring and data collection requirements.

(1) Demonstration of continuous compliance.

(a) The owner or operator shall demonstrate continuous compliance with each VOC control requirement in paragraph (D) of this rule that applies to the affected operations according to the methods specified in paragraphs (O)(1)(a)(i) to (O)(1)(a)(iv) of this rule.

(i) Compliance with VOC emissions limits for affected operations using add-on control devices is demonstrated by following the procedures in 40 CFR Part 63, Subpart SS, which include the use of continuous parameter monitors. Affected operations using add-on control devices may also use continuous emissions monitors to demonstrate continuous compliance as an alternative to continuous parameter monitors.

(ii) Compliance with VOC emissions limits is demonstrated by maintaining a VOC emissions factor value less than or equal to the appropriate VOC emissions limit listed in table 2 or table 3 of this rule, on a twelve-month rolling average, and/or by including in each compliance report a statement that individual resins and gel coats, as applied, meet the appropriate VOC emissions limits, as discussed in paragraph (O)(2)(c) of this rule.

(iii) Compliance with monomer content limits in table 4 of this rule is demonstrated by maintaining an average monomer content value less than or equal to the appropriate monomer contents listed in table 4 of this rule, on a twelve-month rolling average, and/or by including in

each compliance report a statement that resins and gel coats individually meet the appropriate monomer content limits in table 4 of this rule, as discussed in paragraph (G)(4)(d) of this rule.

- (iv) Compliance with the work practice standards in table 1 of this rule is demonstrated by performing the work practice required for the affected operation.
  - (b) The owner or operator shall report each deviation from each VOC control requirement in paragraph (D) of this rule that applies. The deviations shall be reported according to the requirements in paragraph (Q) of this rule.
  - (c) Except as provided in paragraph (O)(1)(d) of this rule, during periods of startup, shutdown or malfunction, the owner or operator shall meet the VOC emissions limits and work practice standards that apply.
  - (d) When an add-on control device is used to meet a VOC control requirement in paragraph (D) of this rule, the owner or operator is not required to meet that VOC control requirement during periods of startup, shutdown, or malfunction, but the owner or operator shall operate the affected operation to minimize emissions to the greatest extent which is consistent with safety and good air pollution control practice.
  - (e) Deviations that occur during a period of malfunction for those affected operations and standards specified in paragraph (O)(1)(d) of this rule are not violations if the owner or operator demonstrates to the director's satisfaction that the owner or operator was operating in accordance with paragraph (O)(1)(d) of this rule. The director will determine whether deviations that occur during a period of startup, shutdown, and malfunction are violations.
- (2) Monitoring and data collection requirements to demonstrate continuous compliance.
- (a) If using an add-on control device, the owner or operator shall during production collect and keep a record of data as indicated in 40 CFR Part 63, subpart SS and shall monitor and collect data as specified in paragraphs (O)(2)(a)(i) to (O)(2)(a)(iv) of this rule.
    - (i) Except for monitoring malfunctions, associated repairs, and required quality assurance or control activities (including, as applicable, calibration checks and required zero and span adjustments), the owner or operator shall conduct all monitoring in continuous operation (or collect data at all required intervals) at all times that the controlled operation is operating.
    - (ii) The owner or operator may not use data recorded during monitoring malfunctions, associated repairs, and required quality assurance or control activities for purposes of this rule, including data averages and

calculations, or fulfilling a minimum data availability requirement, if applicable. The owner or operator shall use all the data collected during all other periods in assessing the operation of the control device and associated control system.

- (iii) At all times, the owner or operator shall maintain necessary parts for routine repairs of the monitoring equipment.
  - (iv) A monitoring malfunction is any sudden, infrequent, not reasonably preventable failure of the monitoring equipment to provide valid data. Monitoring failures that are caused in part by poor maintenance or careless operation are not malfunctions.
- (b) For meeting any VOC emissions limits based on a VOC emissions limit specified in table 2 or table 3 of this rule, the owner or operator shall collect and keep records of resin and gel coat use, monomer content, and operation where the resin is used. If the owner or operator is averaging monomer contents to meet any monomer content limits specified in table 4 of this rule, the owner or operator shall collect and keep records of resin and gel coat use, monomer content, and operation where the resin is used. Resin use records may be based on purchase records if the owner or operator can reasonably estimate how the resin is applied. The monomer content records may be based on MSDS or on resin specifications supplied by the resin supplier.
- (c) Resin and gel coat use records are not required for the individual resins and gel coats that are demonstrated, as applied, to meet their applicable emission limit as defined in paragraph (G)(1) of this rule. However, the owner or operator shall retain the records of resin and gel coat monomer content, and the owner or operator shall include the list of these resins and gel coats and identify their application methods in the semiannual compliance reports. If after the owner or operator has initially demonstrated that a specific combination of an individual resin or gel coat, application method, and controls meets an applicable emission limit, and the resin or gel coat changes or the monomer content increases, or the owner or operator changes the application method or controls, then the owner or operator again shall demonstrate that the individual resin or gel coat meets its emission limit as specified in paragraph (G)(1) of this rule. If any of the previously mentioned changes results in a situation where an individual resin or gel coat exceeds its applicable emission limit in table 2 or table 3 of this rule, the owner or operator shall begin collecting resin and gel coat use records and calculate compliance using one of the averaging options on a twelve-month rolling average.
- (d) For each pultrusion machine, the owner or operator shall record all times that doors or covers of wet area enclosures are open and there is resin present in the resin bath.

(P) Recordkeeping requirements.

- (1) The owner or operator shall keep the following records:
  - (a) A copy of each applicability notification and compliance status report submitted to comply with this rule, including all documentation supporting any applicability or compliance status.
  - (b) For any add-on control device, all records required in 40 CFR Part 63, subpart SS, to show continuous compliance with this rule.
  - (c) For operations listed in tables 2, 3, and 4 of this rule all data, assumptions, and calculations used to determine monomer contents and VOC emissions factors.
  - (d) For any continuous laminating/casting operation:
    - (i) All data, assumptions, and calculations used to determine monomer contents, VOC emissions factors, per cent reduction of VOC emissions, and/or pounds of VOC per ton as applicable;
    - (ii) A brief description of the rationale for the assignment of a VOC emissions equation or VOC emissions factor to each resin or gel coat formula;
    - (iii) When using facility-specific VOC emissions estimation equations or factors, all data, assumptions, and calculations used to derive the VOC emissions estimation equations and factors and identification and rationale for the worst-case resin or gel coat formula; and
    - (iv) For all VOC emissions estimation equations and VOC emissions factors, documentation that USEPA has approved them. This requirement does not apply to VOC emissions estimation equations and VOC emissions factors found in table 1 to Subpart WWWW of 40 CFR 63 or AP-42.
  - (e) A certified statement that operations are in compliance with the work practice standards specified in table 1 of this rule, as applicable.
- (2) The owner or operator of a SMC manufacturing machine shall keep the following records:
  - (a) Monthly production records of the following operational data for each SMC manufacturing machine:
    - (i) The amount of SMC produced for each type of SMC product.
    - (ii) The monomer content of each SMC product.

- (iii) In the event an emission factor for this operation is accepted pursuant to paragraph (E)(1) of this rule and such emission factor is based upon parameters other than the parameters specified in paragraphs (P)(2)(i) and (P)(2)(ii) of this rule, the monthly operational data for these other parameters shall be recorded in lieu of the parameters specified under paragraphs (P)(2)(i) and (P)(2)(ii) of this rule.
  - (b) Monthly VOC emissions records for each SMC manufacturing machine that show the VOC emissions factor used for each SMC product, including a citation of the source of the emission factor, and the results of the VOC emission calculations.
- (3) For any uncontrolled SMC manufacturing machine exempted under paragraph (D)(9) of this rule, the owner or operator shall record the VOC emissions from that SMC manufacturing machine for the recent month and rolling twelve-month period within fifteen days after the end of each month. The owner or operator shall notify the appropriate Ohio environmental protection agency district office or local air agency of any record showing the SMC manufacturing machine exceeded the applicable VOC emissions limit. A copy of such record shall be sent to the appropriate Ohio environmental protection agency district office or local air agency within forty-five days after the exceedance occurs.
  - (4) All records specified under paragraphs (P)(1) to (P)(3) of this rule shall be retained by the owner or operator for a period of not less than five years following the date of each occurrence, measurement, maintenance, corrective action, report, or record and shall be made available to the director or any authorized representative of the director for review during normal business hours.

(Q) Reporting requirements.

- (1) The owner or operator of a facility that has reinforced plastic composites production operations subject to this rule shall submit semiannual compliance status reports containing the information specified in paragraphs (Q)(3)(a) to (Q)(3)(h) of this rule. The semiannual compliance status reports shall be submitted no later than thirty calendar days after the end of each six-month period to the appropriate Ohio environmental protection agency district office or local air agency. The first compliance report shall cover the period beginning on the compliance date that is specified in paragraph (R) of this rule and ending on June thirtieth or December thirty-first, whichever date is the first date following the end of the first calendar half after the compliance date that is specified in paragraph (R) of this rule. Each subsequent compliance report shall cover the semiannual reporting period from January first through June thirtieth or the semiannual reporting period from July first through December thirty-first.
- (2) For each facility that is subject to permitting requirements pursuant to Chapter 3745-77 of the Administrative Code (pertaining to Title V permits), the owner

or operator may submit the first and subsequent semiannual compliance reports according to the dates established within the facility's Title V permit, instead of according to the dates specified in paragraph (Q)(1) of this rule.

- (3) The compliance report shall contain the information specified in paragraphs (Q)(3)(a) to (Q)(3)(h) of this rule.
  - (a) Company name and address.
  - (b) Statement by a responsible official with that official's name, title, and signature, certifying the truth, accuracy, and completeness of the content of the report.
  - (c) Date of the report and beginning and ending dates of the reporting period.
  - (d) If there are no deviations from any VOC emissions limitations and operating limits that apply and there are no deviations from the work practice standards in table 1 of this rule, a statement that there were no deviations from VOC emissions limitations, operating limits, or work practice standards during the reporting period.
  - (e) If there were no periods during which a continuous monitoring system (CMS), including a continuous emissions monitoring system and a continuous parameter monitoring system, were out of control, a statement that there were no periods during which the CMS was out of control during the reporting period.
  - (f) For each deviation from a VOC emissions limitation or operating limit and for each deviation from a work practice standard that occurs at an affected operation where a CMS is not used to comply with the VOC emissions limitation, operating limit, or work practice standard in this rule, the compliance report shall contain the information in paragraphs (Q)(3)(f)(i) and (Q)(3)(f)(ii) of this rule.
    - (i) The total operating time of each affected operation during the reporting period.
    - (ii) Information on the number, duration, and cause of deviations (including unknown cause, if applicable), as applicable, and the corrective action taken.
  - (g) For each deviation from an VOC emissions limitation or operating limit that occurs at an affected operation where a CMS is used to comply with the VOC emissions limitation or operating limit in this rule, the compliance report shall include the information in paragraphs (Q)(3)(g)(i) to (Q)(3)(g)(xii) of this rule.
    - (i) The date and time that each malfunction started and stopped.

- (ii) The date and time that each CMS was inoperative, except for zero (low-level) and high-level checks.
  - (iii) The date, time, and duration that each CMS was out of control, as defined in paragraph (c)(7) of 40 CFR 63.8, including the information in paragraph (c)(8) of 40 CFR 63.8.
  - (iv) The date and time that each deviation started and stopped, and whether each deviation occurred during a period of startup, shutdown, or malfunction, or during another period.
  - (v) A summary of the total duration of the deviation during the reporting period and the total duration as a per cent of the total source operating time during that reporting period.
  - (vi) A breakdown of the total duration of the deviations during the reporting period into those that are due to startup, shutdown, control equipment problems, process problems, other known causes, and other unknown causes.
  - (vii) A summary of the total duration of CMS downtime during the reporting period and the total duration of CMS downtime as a per cent of the total source operating time during that reporting period.
  - (viii) An identification of each VOC that was monitored at the affected source.
  - (ix) A brief description of the affected operations.
  - (x) A brief description of the CMS.
  - (xi) The date of the latest CMS certification or audit.
  - (xii) A description of any changes in CMS, processes, or controls since the last reporting period.
- (h) Where multiple compliance options are available, the owner or operator shall state in this compliance report if the owner or operator has changed compliance options since the last compliance report.
- (4) The owner or operator shall report if the facility exceeded the one hundred tons of VOC per year emissions threshold if that exceedance would make the facility subject to paragraph (D)(3) of this rule.
- (5) Each facility that has obtained a Title V permit pursuant to Chapter 3745-77 of the Administrative Code shall report all deviations as described in this rule in the semiannual monitoring report required by the Title V permit. If the facility

submits a semiannual compliance report pursuant to this rule along with, or as part of, the semiannual monitoring report required by the facility's Title V permit, and the semiannual compliance report includes all required information concerning deviations from any VOC emissions limitation, operating limit, or work practice standard in this rule, submission of the semiannual compliance report shall be deemed to satisfy any obligation to report the same deviations in the semiannual monitoring report. However, submission of a compliance report shall not otherwise affect any obligation the affected source may have to report deviations from permit requirements to the appropriate Ohio environmental protection agency district office or local air agency.

(R) Compliance dates.

- (1) Except where otherwise specified within this rule, any owner or operator of an affected operation that is subject to this rule shall comply with the requirements of this rule by no later than the following dates:
  - (a) For any affected operation for which installation commenced before the effective date of this rule, the compliance date of the affected operation is the initial startup of the affected operation or the twelve months from the effective date of this rule, whichever is later.
  - (b) For any affected operation for which installation commenced on or after the effective date of this rule, the compliance date of the affected operation is the date of initial startup of the affected operation.
- (2) If the reinforced plastic composites production facility has VOC emissions less than the threshold of one hundred tons of VOC per year from the combination of all open molding, centrifugal casting, continuous lamination/casting, pultrusion, SMC manufacturing, mixing, and BMC manufacturing, and the facility subsequently increases its VOC emissions to meet or exceed the threshold of one hundred tons of VOC per year from the combination of such operations, the compliance date of any affected operation pertaining to a new VOC emission requirement is two years from the date that the semiannual compliance report indicates the facility meets or exceeds the threshold of one hundred tons of VOC per year.
- (3) In the event an uncontrolled SMC manufacturing machine is exempted under paragraph (D)(9) of this rule and is later equipped with a VOC emission control system, the compliance date of the SMC manufacturing machine pertaining to paragraph (D)(8) of this rule is the date of first startup of the installed VOC emission control system for the SMC manufacturing machine. Until the date of first startup of the installed VOC emission control system for the SMC manufacturing machine, the SMC manufacturing machine shall continue to comply with the requirement of paragraph (D)(9) of this rule.
- (4) If an affected operation is vented to an add-on control to meet a VOC emissions requirement specified within the rule, the owner or operator shall demonstrate

compliance by testing the operation and the add-on control device in accordance with the requirements of this rule within ninety days after the compliance date of the affected operation.

- (5) Additional testing of an affected operation vented to an add-on control may be required by the director to ensure continued compliance.
- (S) Requirements on applicability notification, permit application, and testing notification.
- (1) The owner or operator of an affected operation, as described in paragraph (C) of this rule, that is subject to this rule and that has an initial startup date before the effective date of this rule shall notify the appropriate Ohio environmental protection agency district office or local air agency in writing that such operation is subject to this rule. The notification, which shall be submitted not later than sixty days after the effective date of this rule, shall provide the following information:
    - (a) Name and address of the owner or operator;
    - (b) Address (i.e., physical location) of the facility;
    - (c) Equipment description and Ohio EPA application number (if assigned) of the affected operation;
    - (d) Identification of the applicable requirements, the means of compliance, and the compliance date for the affected operation under this rule; and
    - (e) Regarding a permit for the affected operation, whichever of the following is applicable:
      - (i) Submission of an application for an operating permit, a permit modification, or an operating permit renewal in accordance with rule 3745-31-02 of the Administrative Code; or
      - (ii) Submission of a statement of intent to submit an application for a Title V permit or modification of a Title V permit in accordance with rule 3745-77-02 or 3745-77-06 of the Administrative Code, respectively.
  - (2) The owner or operator of an affected operation, as described in paragraph (C) of this rule, that is subject to this rule and that has an initial startup date on or after the effective date of this rule shall notify the appropriate Ohio environmental protection agency district office or local air agency in writing that the affected operation is subject to this rule. The notification, which shall be submitted not later than either the date of initial startup of the affected operation or sixty days after the effective date of this rule, whichever is later, shall provide the information listed under paragraph (F)(1) of this rule. The application for a

permit to install under rule 3745-31-02 of the Administrative Code may be used to fulfill the notification requirements of this paragraph.

- (3) For the compliance testing of an affected operation that is vented to an add-on control device to meet a VOC emissions requirement specified within this rule, the owner or operator shall submit an intent to test that is in accordance with the procedures of paragraph (A) of rule 3745-21-10 of the Administrative Code and that includes the test procedures specified within this rule.

-Table 1: Work practice standards. As required in paragraph (D)(1) of this rule, the owner or operator shall meet the work practice standards specified by type of operation in the following table:-

Type of operation	Work practice standards
1. Compression/injection molding	Uncover, unwrap or expose only one charge per mold cycle per compression/injection molding machine. For machines with multiple molds, one charge means sufficient material to fill all molds for one cycle. For machines with robotic loaders, no more than one charge may be exposed prior to the loader. For machines fed by hoppers, sufficient material may be uncovered to fill the hopper. Hoppers shall be closed when not adding materials. Materials may be uncovered to feed to slitting machines. Materials shall be recovered after slitting.
2. Cleaning operation (cleaning of equipment used in reinforced plastic composites manufacture)	Do not use cleaning solvents (cleaners) that have a VOC content greater than 0.42 pound VOC per gallon, except cleaners used in closed systems and used to clean cured resin from application equipment. Application equipment includes any equipment that directly contacts resin.
3. VOC-containing materials storage operation	Keep containers that store VOC-containing materials closed or covered except during the addition or removal of materials. Bulk VOC-containing materials storage tanks may be vented as necessary for safety.
4. SMC manufacturing operation	a. Close or cover the resin delivery system to the doctor box on each SMC manufacturing machine. The doctor box itself may be open.
	b. Use a nylon containing film to enclose SMC.
5. All mixing or BMC manufacturing	a. Use mixer covers with no visible gaps

operations <sup>1</sup>	present in the mixer covers, except that gaps of up to 1.0 inch are permissible around mixer shafts and any required instrumentation.
	b. Close any mixer vents when actual mixing is occurring, except that venting is allowed during addition of materials, or as necessary prior to adding materials or opening the cover for safety. Vents routed to a ninety-five per cent efficient control device are exempt from this requirement.
	c. Keep the mixer covers closed while actual mixing is occurring except when adding materials or changing covers to the mixing vessels.
6. Pultrusion operation manufacturing parts that meet the following criteria: one thousand or more reinforcements or the glass equivalent of one thousand ends of one hundred thirteen yield roving or more; and have a cross-sectional area of sixty square inches or more that is not subject to the ninety-five per cent VOC emissions reduction requirement	a. Do not allow vents from the building ventilation system, or local or portable fans to blow directly on or across the wet-out area(s).
	b. Do not permit point suction of ambient air in the wet-out area(s) unless that air is directed to a control device.
	c. Use devices such as deflectors, baffles, and curtains when practical to reduce air flow velocity across the wet-out area(s).
	d. Direct any compressed air exhausts away from resin and wet-out area(s).
	e. Convey resin collected from drip-off pans or other devices to reservoirs, tanks, or sumps via covered troughs, pipes, or other covered conveyance that shields the resin from the ambient air.
	f. Cover all reservoirs, tanks, sumps, or VOC-containing materials storage vessels except when they are being charged or filled.
	g. Cover or shield from ambient air resin delivery systems to the wet-out area(s) from reservoirs, tanks, or sumps where practical.

<sup>1</sup>Containers of five gallons or less may be open when active mixing is taking place, or during periods when they are in process (i.e., they are actively being used to apply resin). For polymer casting mixing operations, containers with a surface area of five hundred square inches or less may be open while active mixing is taking place.

-Table 2: VOC Emissions limits for specific open molding, centrifugal casting, pultrusion and continuous lamination/casting operations at facilities with VOC emissions less than the threshold of one hundred tons of VOC per year. As required in paragraph (D)(2) of this rule, the owner or operator shall meet the VOC emissions limits specified by type of operation and resin application method or gel coat type in the following table:-

Type of operation	Resin application method or gel coat type	VOC emissions limit <sup>1</sup>
1. Open molding: corrosion-resistant and/or high strength (CR/HS)	a. Mechanical resin application	113 lb/ton
	b. Filament application	171 lb/ton
	c. Manual resin application	123 lb/ton
2. Open molding: non-CR/HS	a. Mechanical resin application	88 lb/ton
	b. Filament application	188 lb/ton
	c. Manual resin application	87 lb/ton
3. Open molding: tooling	a. Mechanical resin application	254 lb/ton
	b. Manual resin application	157 lb/ton
4. Open molding: low-flame spread/low-smoke products	a. Mechanical resin application	497 lb/ton
	b. Filament application	270 lb/ton
	c. Manual resin application	238 lb/ton
5. Open molding: shrinkage controlled resins <sup>2</sup>	a. Mechanical resin application	354 lb/ton
	b. Filament application	215 lb/ton
	c. Manual resin application	180 lb/ton
6. Open molding: gel coat <sup>3</sup>	a. Tooling gel coat	440 lb/ton
	b. White/off white pigmented gel coat	267 lb/ton
	c. All other pigmented gel coat	377 lb/ton
	d. CR/HS or high performance gel coat	605 lb/ton
	e. Fire retardant gel coat	854 lb/ton
	f. Clear production gel coat	522 lb/ton
7. Centrifugal casting: CR/HS	a. Resin application with the mold closed, and the mold is	25 lb/ton <sup>4</sup>

	vented during spinning and cure	
	b. Resin application with the mold closed, and the mold is not vented during spinning and cure	Not applicable (this is considered to be a closed molding operation)
	c. Resin application with the mold open, and the mold is vented during spinning and cure	25 lb/ton <sup>4</sup>
	d. Resin application with the mold open, and the mold is not vented during spinning and cure	Use the appropriate open molding emission limit <sup>5</sup>
8. Centrifugal casting: non-CR/HS	a. Resin application with the mold closed, and the mold is vented during spinning and cure	20 lb/ton <sup>4</sup>
	b. Resin application with the mold closed, and mold is not vented during the spinning and cure	Not applicable (this is considered to be a closed molding operation)
	c. Resin application with the mold open, and the mold is vented during spinning and cure	20 lb/ton <sup>4</sup>
	d. Resin application with the mold open, and the mold is not vented during spinning and cure	Use the appropriate open molding emission limit <sup>5</sup>
9. Pultrusion <sup>6</sup>	Not applicable	Reduce total VOC emissions by at least sixty per cent by weight
10. Continuous lamination/casting	Not applicable	Reduce total VOC emissions by at least 58.5 per cent by weight or not exceed a VOC emissions limit of 15.7 pounds of VOC per ton of neat resin plus and neat gel coat

	plus
--	------

<sup>1</sup>VOC emissions limits for open molding and centrifugal casting are expressed as pounds of VOC per ton of resin or gel coat (pounds per ton). The operation shall be at or below these values based on a twelve-month rolling average.

<sup>2</sup>This emission limit applies regardless of whether the shrinkage controlled resin is used as a production resin or a tooling resin.

<sup>3</sup>If applying gel coat with manual application, for compliance purposes treat the gel coat as if it were applied using atomized spray guns to determine both emission limits and emission factors. If using multiple application methods and any portion of a specific gel coat is applied using nonatomized spray, the owner or operator may use the nonatomized spray gel coat equation to calculate an emission factor for the manually applied portion of that gel coat. Otherwise, use the atomized spray gel coat application equation to calculate emission factors.

<sup>4</sup>For compliance purposes, calculate the VOC emission factor using only the appropriate centrifugal casting equation in item 2 of table 1 to 40 CFR 63 Subpart WWWW, or a site-specific emission factor for after the mold is closed as discussed in paragraph (E)(1) of this rule.

<sup>5</sup>Calculate your emission factor using the appropriate open molding covered cure emission factor in item 1 of table 1 to 40 CFR Part 63, Subpart WWWW, or a site-specific emission factor as discussed in paragraph (E)(1) of this rule.

<sup>6</sup>Pultrusion machines that produce parts that meet the following criteria: one thousand or more reinforcements or the glass equivalent of one thousand ends of one hundred thirteen yield roving or more; and have a cross sectional area of sixty square inches or more are not subject to this requirement. Their requirement is the work practice of air flow management which is described in table 1 of this rule.

-Table 3: Alternative VOC emissions limits for open molding, centrifugal casting, and continuous lamination/casting operations at facilities with VOC emissions equal to or greater than the threshold of one hundred tons of VOC per year. As provided in paragraph (D)(3) of this rule, as an alternative to the ninety-five per cent VOC emissions reductions requirement, the owner or operator may meet the appropriate VOC emissions limits specified by type of operation and resin application method, gel coat type, or vent system type in the following table:-

Type of operation	Resin application method	VOC emissions limit <sup>1</sup>
1. Open molding: corrosion-resistant and/or high strength (CR/HS)	a. Mechanical resin application	6 lb/ton
	b. Filament application	9 lb/ton
	c. Manual resin application	7 lb/ton

2. Open molding: non-CR/HS	a. Mechanical resin application	13 lb/ton
	b. Filament application	10 lb/ton
	c. Manual resin application	5 lb/ton
3. Open molding: tooling	a. Mechanical resin application	13 lb/ton
	b. Manual resin application	8 lb/ton
4. Open molding: low flame spread/low smoke products	a. Mechanical resin application	25 lb/ton
	b. Filament application	14 lb/ton
	c. Manual resin application	12 lb/ton
5. Open molding: shrinkage controlled resins	a. Mechanical resin application	18 lb/ton
	b. Filament application	11 lb/ton
	c. Manual resin application	9 lb/ton
6. Open molding: gel coat: Open molding: gel coat <sup>2</sup>	a. Tooling gel coat	22 lb/ton
	b. White/off white pigmented gel coat	22 lb/ton
	c. All other pigmented gel coat	19 lb/ton
	d. CR/HS or high performance gel coat	31 lb/ton
	e. Fire retardant gel coat	43 lb/ton
	f. Clear production gel coat	27 lb/ton
7. Centrifugal casting: CR/HS <sup>3,4</sup>	a. Uses a vent system that moves heated air through the mold	27 lb/ton
	b. Uses a vent system that moves ambient air through the mold	2 lb/ton
8. Centrifugal casting: non-CR/HS <sup>3,4</sup>	a. Uses a vent system that moves heated air through the mold	21 lb/ton
	b. Uses a vent system that moves ambient air through the mold	1 lb/ton
9. Continuous lamination/casting	Not applicable	1.47 lb/ton

<sup>1</sup>For open molding and centrifugal casting operations, the VOC emissions limits are expressed as pounds of VOC per ton of resin or gel coat used (pound per ton). For a continuous lamination/casting operation, the VOC emissions limit is expressed as pounds of VOC per ton of neat resin plus and neat gel coat plus used. The operations shall be at or below these values based on a twelve-month rolling average.

<sup>2</sup>These limits are for spray application of gel coat. Manual gel coat application shall be included as part of spray gel coat application for compliance purposes using the same VOC emissions factor equation and VOC emissions limit. If only gel coat is applied with manual application, treat the manually applied gel coat as if it were applied with atomized spray for compliance determinations.

<sup>3</sup>Centrifugal casting operations where the mold is not vented during spinning and cure are considered to be closed molding and are not subject to any emissions limit. Centrifugal casting operations where the mold is not vented during spinning and cure, and the resin is applied to the open centrifugal casting mold using mechanical or manual open molding resin application techniques are considered to be open molding operations and the appropriate open molding emission limits apply.

<sup>4</sup>Centrifugal casting operations where the mold is vented during spinning and the resin is applied to the open centrifugal casting mold using mechanical or manual open molding resin application techniques, are to use the appropriate centrifugal casting emission limit to determine compliance. Calculate the emission factor using the appropriate centrifugal casting emission factor in table 1 to Subpart WWW of 40 CFR 63, or a site-specific emissions factor as discussed in paragraph (E)(1) of this rule.

-Table 4: Options allowing use of the same resin across different operations that use the same resin type. As provided in paragraph (G)(4) of this rule, when electing to use the same resin(s) for multiple resin application methods, the owner or operator may use any resin(s) with a monomer content less than or equal to the values shown in the following table, or any combination of resins whose weighted average monomer content based on a twelve-month rolling average is less than or equal to the values shown in the following table:-

Type of operation	Resin application method	Monomer content limit (per cent by weight of resin)
1. CR/HS resins, centrifugal casting <sup>1,2</sup>	a. CR/HS mechanical <sup>3</sup>	48.0
	b. CR/HS filament application	48.0
	c. CR/HS manual	48.0
2. CR/HS resins, nonatomized mechanical	a. CR/HS filament application	46.4
	b. CR/HS manual	46.4

3. CR/HS resins, filament application	CR/HS manual	42.0
4. Non-CR/HS resins, filament application	a. Non-CR/HS mechanical <sup>3</sup>	45.0
	b. Non-CR/HS manual	45.0
	c. Non-CR/HS centrifugal casting <sup>1,2</sup>	45.0
5. Non-CR/HS resins, nonatomized mechanical	a. Non-CR/HS manual	38.5
	b. Non-CR/HS centrifugal casting <sup>1,2</sup>	38.5
6. Non-CR/HS resins, centrifugal casting <sup>1,2</sup>	Non-CR/HS manual	37.5
7. Tooling resins, nonatomized mechanical	Tooling manual	91.4
8. Tooling resins, manual	Tooling atomized mechanical	45.9

<sup>1</sup>If the centrifugal casting operation blows heated air through the molds, then ninety-five per cent capture and control shall be used if the owner or operator wishes to use this compliance option.

<sup>2</sup>If the centrifugal casting molds are not vented, the owner or operator may treat the centrifugal casting operations as if they were vented if the owner or operator wishes to use this compliance option.

<sup>3</sup>Nonatomized mechanical application shall be used.

## **Chapter 3745-24: NOx and VOC Emission Statements**

*Contact:* Mike Ahern 614-644-3631  
Mike.Ahern@EPA.State.Oh.US

3745-24-01      **Definitions.**

(A) Except as otherwise provided in this rule, the definitions in rule 3745-15-01 of the Administrative Code shall apply to this chapter.

(B) As used in Chapter 3745-24 of the Administrative Code:

- (1) "Actual emissions" means the rate at which an air contaminant is actually emitted into the ambient air.
- (2) "Oxides of nitrogen (NO<sub>x</sub>)" means all oxides of nitrogen which are determined to be ozone precursors, including but not limited to, nitrogen oxide and nitrogen dioxide, but excluding nitrous oxide.
- (3) "R&D sources" means research and development sources, as defined in division (O) of section 3704.01 of the Revised Code.
- (4) "Submit" or "submitted" means to present, or to have presented, to the Ohio environmental protection agency a document that is required under this chapter, and to have that document received by the Ohio environmental protection agency (or postmarked) by midnight on the due date specified in this chapter. Date of the receipt of the document is demonstrated by the postmark date, if sent by United States postal service; the electronic signature date, if submitted through the Ohio environmental protection agency's electronic reporting system; the transmittal date, if submitted through facsimile; or the date of the signature of the Ohio environmental protection agency employee receiving the document, if hand delivered in person to the Ohio environmental protection agency. The hard copy form with original signature must be provided to the Ohio environmental protection agency after a facsimile is submitted.
- (5) "Volatile organic compounds (VOC)" has the same definition as that contained in paragraph (B)(6) of rule 3745-21-01 of the Administrative Code.

3745-24-02      **Applicability.**

- (A) Except as provided in paragraph (B) of this rule, the requirements of this chapter shall apply to any facility that emits twenty-five tons or more of NO<sub>x</sub> and/or twenty-five tons or more of VOC during the calendar year and is located in a county designated as nonattainment for the National Ambient Air Quality Standards for ozone. (In determining whether or not a facility emits twenty-five tons or more of NO<sub>x</sub> or twenty-five tons or more of VOC, any source that is exempt under paragraph (C) of rule 3745-24-04 of the Administrative Code shall not be included in the emission estimate.)
  
- (B) Any facility that is located in a county described in paragraph (A) of this rule shall be exempt from the requirements of this Chapter beginning January 1 of the year following the U.S. Environmental Protection Agency redesignation of the county to attainment with the National Ambient Air Quality Standard for Ozone.
  
- (C) Any facility meeting the criteria in paragraph (A) of this rule that is permanently shut down shall file a final emission statement in accordance with rule 3745-24-03 and 3745-24-04 of the Administrative Code.

**Deadlines for submission of the emission statements.**

- (A) The emission statements for calendar year 1992 shall be submitted no later than July 1, 1994. The emission statements for calendar years 1993 through 2004 shall be submitted by November fifteenth of the calendar year following the year covered by the emission statements. Beginning with reporting year 2005 and each reporting year thereafter, except as provided by paragraph (B) of this rule, emission statements must be submitted by April fifteenth of the calendar year following the year covered by the emission statements.
- (B) Emission statements due during calendar year 2008 and required under paragraph (A) of this rule shall be submitted by June 6, 2008.

3745-24-04      **Emission statement requirements.**

- (A) Any owner or operator of any affected facility that meets the applicability requirements specified in rule 3745-24-02 of the Administrative Code shall submit emission statements in accordance with the deadlines specified in rule 3745-24-03 of the Administrative Code. If NO<sub>x</sub> or VOC is emitted from a facility at or above the reporting threshold, both pollutants must be included in the emissions statement even if one of the pollutants is emitted at a level below the reporting threshold.
- (B) The emission statements shall be submitted to the Ohio EPA in a form and manner prescribed by the director and shall include at a minimum the following information:
  - (1) The certifying individual shall certify that the information contained in the statement is accurate to the best of their knowledge and that all estimates and judgements relating to such information have been made in good faith.
  - (2) Estimated actual emissions of NO<sub>x</sub> and VOC, in tons per year.
  - (3) Any supporting information required by the director to confirm compliance with paragraph (B) above.
- (C) Exemptions:
  - (1) Emission statements shall not apply to any source that would be exempt pursuant to division (A) of section 3704.011 of the Revised Code based solely on NO<sub>x</sub> and VOC emissions regardless of whether the source meets the exceptions provided in divisions (A)(1) to (A)(5) of section 3704.011 of the Revised Code, or generates emissions of carbon monoxide, lead, particulates and/or sulfur dioxide in excess of ten pounds per day.
  - (2) R&D sources at a facility where the combined potential to emit for all of the R&D sources is less than five tons per year for NO<sub>x</sub> and less than five tons per year for VOC or where the owner or operator maintains records which demonstrate that the combined actual emissions for all of the R&D sources does not exceed five tons per year for NO<sub>x</sub> and five tons per year for VOC, are not required to complete the emission statement.

[Comment: For dates of non-regulatory government publications, publications of recognized organizations and associations, federal rules, and federal statutory provisions referenced in this rule, see paragraph (B) of this rule titled "Referenced materials."]

(A) The following definitions apply to this chapter:

- (1) "PM10" means particulate matter with an aerodynamic diameter less than or equal to a nominal ten micrometers as measured by a reference method based on 40 CFR Part 50, Appendix J and designated in accordance with 40 CFR Part 53 or an equivalent method designated in 40 CFR Part 53.
- (2) "PM2.5" means particulate matter with an aerodynamic diameter less than or equal to a nominal 2.5 micrometers as measured either by a reference method that is based on 40 CFR Part 50, Appendix L and designated in accordance with 40 CFR Part 53 or by an equivalent method designated in accordance with 40 CFR Part 53.
- (3) "Primary ambient air quality standard" means the levels of air quality which are necessary, with an adequate margin of safety, to protect the public health.
- (4) "Secondary ambient air quality standards" means the levels of air quality which are necessary to protect the public welfare from any known or anticipated adverse effects of a pollutant.

(B) Referenced materials. This chapter includes references to certain matter or materials. The text of the referenced materials is not included in the rules contained in this chapter. Information on the availability of the referenced materials as well as the date of, and/or the particular edition or version of the material is included in this rule. For materials subject to change, only the specific versions specified in this rule are referenced. Material is referenced as it exists on the effective date of this rule. Except for subsequent annual publication of existing (unmodified) Code of Federal Regulation compilations, any amendment or revision to a referenced document is not applicable unless and until this rule has been amended to specify the new dates.

(1) Availability. The referenced materials are available as follows:

- (a) Code of Federal Regulations. Information and copies may be obtained by writing to: "Superintendent of Documents, Attention: New Orders, PO Box 371954, Pittsburgh, PA 15250-7954." The full text of the CFR is also available in electronic format at [www.access.gpo.gov/nara/cfr/](http://www.access.gpo.gov/nara/cfr/). The CFR compilations are also available for inspection and copying at most public libraries and "The State Library of Ohio."

(2) Referenced materials:

3745-25-02      **Ambient air quality standards.**

[Comment: For dates of non-regulatory government publications, publications of recognized organizations and associations, federal rules, and federal statutory provisions referenced in this rule, see paragraph (B) of rule 3745-25-01 of the Administrative Code titled "Referenced materials."]

Primary ambient air quality standards define levels of air quality which are necessary, with an adequate margin of safety, to protect the public health. Secondary ambient air quality standards define levels of air quality which are necessary to protect the public welfare from any known or anticipated adverse effects of a pollutant.

(A) Particulate matter:

- (1) For the purpose of determining attainment of the primary and secondary ambient air quality standards for particulate matter applicable throughout the state of Ohio, particulates shall be measured in the ambient air as both particles with an aerodynamic diameter less than or equal to a nominal ten micrometers (PM10) and particles with an aerodynamic diameter less than or equal to a nominal 2.5 micrometers (PM2.5).
- (2) The level of the primary and secondary twenty-four-hour ambient air quality standards for PM10 is one hundred fifty micrograms per cubic meter, twenty-four-hour average concentration. The standards are attained when the expected number of days per calendar year with a twenty-four-hour average concentration above one hundred fifty micrograms per cubic meter, as determined in accordance with 40 CFR Part 50, Appendix K , is equal to or less than one.
- (3) The level of the primary and secondary twenty-four-hour standards for PM2.5 is thirty-five micrograms per cubic meter, twenty-four-hour average concentration. The standards are attained when the ninety-eighth percentile twenty-four-hour average concentration, as determined in accordance with 40 CFR Part 50, Appendix N, is less than or equal to thirty-five micrograms per cubic meter.
- (4) The level of the primary and secondary annual standards for PM2.5 is fifteen micrograms per cubic meter, annual average concentration. The standards are attained when the three-year average concentration as determined in accordance with 40 CFR Part 50, Appendix N, is less than or equal to fifteen micrograms per cubic meter.

(B) Sulfur dioxide:

- (1) The primary ambient air quality standards for sulfur dioxide applicable throughout the state of Ohio shall be as follows:

- (a) The maximum annual arithmetic mean concentration shall not exceed eighty micrograms per cubic meter (0.03 parts per million by volume).
  - (b) The maximum twenty-four-hour concentration not to be exceeded more than once per year shall be three hundred sixty-five micrograms per cubic meter (0.14 parts per million by volume).
- (2) The secondary ambient air quality standard for sulfur dioxide applicable throughout the state of Ohio shall be a maximum three-hour concentration not to be exceeded more than once per year of thirteen hundred micrograms per cubic meter (0.50 parts per million by volume).
  - (3) For purposes of ascertaining, defining and measuring ambient air quality, concentrations of sulfur dioxide shall be determined either through twenty-four-hour intermittent sampling utilizing the "Reference Method" in accordance with in 40 CFR Part 50, Appendix A or through the use of a continuous sampling and recording device which has been designated an "Equivalent Method" in accordance with 40 CFR Part 53.

(C) Carbon monoxide:

Ambient air quality standards for carbon monoxide, applicable throughout the state of Ohio, shall be as follows:

- (1) The maximum eight hour arithmetic mean concentration not to be exceeded more than once per year shall be nine parts per million by volume.
- (2) The maximum one hour arithmetic mean concentration not to be exceeded more than once per year shall be thirty-five parts per million by volume.

(D) Ozone:

The ambient air quality standard for ozone applicable throughout the state of Ohio, shall be the three year average of the annual fourth-highest daily maximum eight-hour arithmetic mean concentration, not to exceed 0.08 parts per million by volume. The three year average of the fourth high concentrations shall be determined in accordance with the procedures in 40 CFR Part 50, Appendix I.

(E) Nitrogen dioxide:

The ambient air quality standard for nitrogen dioxide applicable throughout the state of Ohio shall be as follows: The maximum annual arithmetic mean concentration shall not exceed 0.053 parts per million (one hundred (100) micrograms per cubic meter).

(F) Lead:

- (1) The ambient air quality standards for lead, applicable throughout the state of Ohio, shall be a maximum arithmetic mean of 1.5 micrograms per cubic meter during any calendar quarter.
- (2) For purposes of paragraph (F)(1) of this rule, the four calendar quarters are as follows: first quarter - January, February, March; second quarter - April, May, June; third quarter - July, August, September; and fourth quarter - October, November, December.

4/14/03, 01/23/06, 03/27/06, 05/15/06, 02/01/08,

08/25/08

The purpose of rules 3745-25-02 to 3745-25-05 of the Administrative Code is to prevent the excessive buildup of air contaminants during air pollution episodes, thereby preventing the occurrence of an emergency due to the effects of these air contaminants on the health of persons.

- (A) Conditions justifying the proclamation of an air pollution "Alert", air pollution "Warning", or air pollution "Emergency" shall be deemed to exist whenever the director determines that the accumulation of air contaminants in any place is attaining or has attained levels which could, if such levels are sustained or exceeded, lead to a substantial threat to the health of persons. In making this determination, the director will be guided by the episode stage criteria in paragraphs (B) to (F) of this rule.
- (B) "Air pollution forecast": An internal watch by the Ohio environmental protection agency shall be actuated by a national weather service advisory that an "Atmospheric Stagnation Advisory" is in effect or the equivalent local forecast of stagnant atmospheric condition. The air pollution forecast for photochemical oxidants shall take into consideration, but not be limited to, ambient temperatures, surface winds, and ultra-violet solar radiation levels.
- (C) "Alert": The "Alert" level is that concentration of air contaminants at which first stage control actions are to begin. An "Alert" will be declared when any one of the levels specified in paragraphs (C)(1) to (C)(5) of this rule is reached at any monitoring site and meteorological conditions are such that the air contaminant concentrations can be expected to remain at the specified level or reoccur during the next twenty-four hours unless control actions are taken:
  - (1) Sulfur dioxide: eight hundred micrograms per cubic meter (0.3 parts per million by volume), twenty-four-hour average; or
  - (2) PM10: three hundred fifty micrograms per cubic meter, twenty-four-hour average; or
  - (3) Carbon monoxide: seventeen milligrams per cubic meter (fifteen parts per million by volume), eight-hour average; or
  - (4) Photochemical oxidants measured as ozone: four hundred micrograms per cubic meter (0.2 parts per million by volume), one-hour average; or
  - (5) Nitrogen dioxide:
    - (a) One thousand thirty micrograms per cubic meter (0.6 parts per million by volume), one-hour average; or

- (b) Two hundred eighty-two micrograms per cubic meter (0.15 parts per million by volume), twenty-four-hour average.
- (D) "Warning": The "Warning" level indicates that air quality is continuing to degrade and that additional control measures are necessary. A "Warning" will be declared when any one of the levels specified in paragraphs (D)(1) to (D)(5) of this rule is reached at any monitoring site and meteorological conditions are such that the air contaminant concentrations can be expected to remain at the specified levels or reoccur during the next twenty-four hours unless control actions are taken:
  - (1) Sulfur dioxide: one thousand six hundred micrograms per cubic meter (0.6 parts per million by volume), twenty-four-hour average; or
  - (2) PM10: four hundred twenty micrograms per cubic meter, twenty-four-hour average; or
  - (3) Carbon monoxide: thirty-four milligrams per cubic meter (thirty parts per million by volume), eight-hour average; or
  - (4) Photochemical oxidants measured as ozone: eight hundred micrograms per cubic meter (0.4 parts per million by volume), one-hour average; or
  - (5) Nitrogen dioxide:
    - (a) Two thousand two hundred sixty micrograms per cubic meter (1.2 parts per million by volume), one-hour average; or
    - (b) Five hundred sixty-five micrograms per cubic meter (0.3 parts per million by volume), twenty-four-hour average.
- (E) "Emergency": The "Emergency" level indicated that air quality is continuing to degrade to a level that should never be reached and that most stringent control actions are necessary. An "Emergency" will be declared when any one of the levels specified in paragraph (E)(1) to (E)(5) of this rule is reached at any monitoring site:
  - (1) Sulfur dioxide: two thousand one hundred micrograms per cubic meter (0.8 parts per million by volume), twenty-four-hour average; or
  - (2) PM10: five hundred micrograms per cubic meter, twenty-four-hour average; or
  - (3) Carbon monoxide: forty-six milligrams per cubic meter (forty parts per million by volume); eight-hour average, or
  - (4) Photochemical oxidants measured as ozone: One thousand micrograms per cubic meter (0.5 parts per million by volume), one-hour average; or

(5) Nitrogen dioxide:

- (a) Three thousand micrograms per cubic meter (1.5 parts per million by volume), one-hour average; or
  - (b) Seven hundred fifty micrograms per cubic meter (0.4 parts per million by volume), twenty-four-hour average.
- (F) "Termination": Once declared, any episode stage reached by application of these criteria will remain in effect until the criteria for that episode stage are no longer met. At such time, the next lower episode stage will be assumed or the episode may be terminated completely if no episode stage criteria are met.

**Air pollution emergency emission control action programs.**

- (A) Any person responsible for the operation of a source of air contaminants which emits 0.25 tons per day or more of air contaminants for which air quality standards have been adopted shall prepare emission control action programs, consistent with good industrial practices and safe operating procedures, for reducing the emission of air contaminants into the ambient air during periods of an air pollution "Alert", air pollution "Warning", and air pollution "Emergency". Emission control action programs shall be designed to reduce or eliminate emissions of air contaminants into the ambient air in accordance with the objectives set forth in tables 1 to 5 of the appendix to this rule.
- (B) Emission control action programs required by paragraph (A) of this rule shall be in writing and show the source of air contamination, the approximate amount of reduction of air contaminants, the approximate time required to effect the program, a brief description of the manner in which the reduction will be achieved during each stage of an air pollution episode, and such other information as the director shall deem pertinent.
- (C) Emission control action programs shall be filed with the director at the following times:
- (1) Existing sources as of December 15, 1978 - shall file not later than June 15, 1979;
  - (2) New sources that are, or will be, part of a facility, as defined in Chapter 3745-77 of the Administrative Code, and that are required to obtain a Title V permit under Chapter 3745-77 of the Administrative Code - shall file with an application for a Title V permit, in accordance with rule 3745-77-04 of the Administrative Code;
  - (3) New sources not part of a facility, as defined in Chapter 3745-77 of the Administrative Code, and that are not required to obtain a Title V permit under Chapter 3745-77 of the Administrative Code - shall file with an application for a permit-to-install and operate, in accordance with rule 3745-31-02 of the Administrative Code.
- (D) During a condition of an air pollution "Alert", air pollution "Warning", and air pollution "Emergency" emission control action programs required by paragraph (A) of this rule shall be made available on the premises to any person authorized to enforce the provisions of the emergency procedure.
- (E) Emission control action programs as required by paragraph (A) of this rule shall be submitted to the director upon request within thirty days of the receipt of such request; such emission control action programs shall be subject to review and

approval by the director. If, in the opinion of the director, such emission control action programs do not effectively carry out the objectives as set forth in table 1 to 5 of the appendix to this rule, the director may disapprove said emission control action programs, state the reason for disapproval and order the preparation of amended emission control action programs within the time period specified in the order.

3745-25-05      **Air pollution emergency orders.**

(A) The following orders may be issued by the director upon his/her declaration that an air pollution episode exists for any air contaminants for which air quality standards have been adopted:

(1) Air "Alert":

(a) Any one or combination of air contaminants: Any person responsible for the operation of a source of air contamination as set forth in paragraph (A) of rule 3745-25-04 of the Administrative Code shall take all air pollution "Alert" actions as required for such source of air contamination; and shall particularly put into effect, the emission control action programs for an air pollution "Alert".

(b) Suspended PM10.

(i) There shall be no open burning by any persons of tree waste, vegetation, refuse, or debris in any form.

(ii) The use of incinerators for the disposal of any form of solid waste will be limited to the hours between twelve p.m. and four p.m.

(iii) Persons operating fuel-burning equipment which requires boiler lancing or soot blowing shall perform such operations only between twelve p.m. and four p.m.

(c) Nitrogen oxides, carbon monoxide, hydrocarbons and photo-chemical oxidants measured as ozone:

(i) There shall be no open burning by any persons of tree waste, vegetation, refuse, or debris in any form.

(ii) The use of incinerators for the disposal of any form of solid waste will be limited to the hours between twelve p.m. and four p.m.

(iii) Persons operating motor vehicles shall be strongly encouraged to eliminate the unnecessary use of automobiles, motorcycles, light-duty trucks and vans, and recreational vehicles.

(2) Air pollution "Warning":

(a) Any one or combination of air contaminants: Any person responsible for the operation of a source of air contamination as set forth in paragraph (A) of rule 3745-25-04 of the Administrative Code shall take all air pollution "Warning" actions as required for such source of air contamination; and

shall particularly put into effect, the emission control action programs for an air pollution "Warning".

(b) Suspended PM10:

- (i) There shall be no open burning by any persons of tree waste, vegetation, refuse, or debris in any form.
- (ii) The use of incinerators for the disposal of any form of solid waste or liquid waste shall be prohibited.
- (iii) Persons operating fuel-burning equipment which requires boiler lancing or soot blowing shall perform such operations only between the hours of twelve p.m. and four p.m.

(c) Nitrogen oxides, carbon monoxide, hydrocarbons and photo-chemical oxidants measured as ozone:

- (i) There shall be no open burning by any persons of tree waste, vegetation, refuse, or debris in any form.
- (ii) The use of incinerators for the disposal of any form of solid waste or liquid waste shall be prohibited.
- (iii) Persons operating motor vehicles shall be strongly encouraged to eliminate the unnecessary use of automobiles, motorcycles, light-duty trucks and vans, and recreational vehicles. Citizens who travel to and from work between the hours of six a.m. and six p.m. are urged to car-pool or utilize public transportation.
- (iv) For carbon monoxide "Warnings", persons operating motor vehicles shall be encouraged to avoid the air pollution "Warning" area.

(3) Air pollution "Emergency":

(a) Any one or a combination of contaminants:

- (i) Any person responsible for the operation of a source of air contamination as described in paragraph (A) of rule 3745-25-04 of the Administrative Code shall take all air pollution "Emergency" actions as listed as required for such source of air contamination; and shall particularly put into effect the emission control action programs for an air pollution "Emergency".
- (ii) All manufacturing establishments except those included in paragraph (A)(3)(a)(i) of this rule shall institute such action as will result in maximum reduction of air contaminants from their operations by ceasing, curtailing, or postponing operations which emit air

contaminants to the extent possible without causing injury to persons or damage to equipment.

- (iii) All places of employment described below shall immediately cease operations:
- (a) Mining and quarrying of non-metallic minerals.
  - (b) All contract construction work except that which must proceed to avoid physical harm.
  - (c) Wholesale trade establishments, including places of business primarily engaged in selling merchandise to retailers, to industrial, commercial, institutional or professional users, or to other wholesalers, or acting as agents in buying merchandise for or selling merchandise to such persons or companies.
  - (d) All offices of local, county, and state government including authorities, joint meetings, and other public bodies; except to the extent that such offices must continue to operate in order to enforce the requirements of this order pursuant to statute.
  - (e) All retail trade establishments except pharmacies and stores primarily engaged in the sale of food.
  - (f) Banks; credit agencies other than banks; securities and commodities brokers, dealers, exchanges and services; offices of insurance carriers, agents and brokers; real estate offices.
  - (g) Wholesale and retail laundries; laundry services and cleaning and dyeing establishments; photographic studios; beauty shops, barber shops, shoe repair shops.
  - (h) Advertising offices; consumer credit reporting, adjustment and collection agencies; duplicating, addressing, blueprinting; photocopying, mailing, mailing list and stenographic services; equipment rental services; commercial testing laboratories.
  - (i) Automobile repair, automobile services, garages.
  - (j) Establishments rendering amusement and recreation services including motion picture theatres.
  - (k) Elementary and secondary schools, colleges, universities, professional schools, junior colleges, vocational schools, and public and private libraries.

- (iv) There shall be no open burning by any person of tree waste, vegetation, refuse, or debris in any form.
  - (v) The use of incinerators for the disposal of any form of solid or liquid waste shall be prohibited.
  - (vi) The use of motor vehicles; including, but not limited to automobiles, motorcycles, light-duty trucks and vans, and recreational vehicles; shall be prohibited except in emergencies with the approval of local or state police.
- (B) When the director determines that an air pollution episode condition exists at one or more monitoring sites solely because of emissions from a limited number of sources, the director may order such source or sources to put into effect the emission control action programs which are applicable for each episode stage.

Barbara.Walker@EPA.State.Oh.US

3745-26-01      **Definitions.**

- (A) "Applicant" means any person filing for a license to operate an official inspection station for the anti-tampering or basic inspection program.
- (B) "Approved technician trainer" means an individual who has attended a train-the-trainer course, is certified as an automotive service excellence (ASE) master technician, has at least ten years of experience in the automotive industry and is approved by the director or his designee to instruct technician training.
- (C) "Certified inspector" means an individual who has attended a required training course, successfully passed a written examination approved by Ohio EPA and certified by the director to inspect motor vehicles subject to the requirements of this chapter.
- (D) "Certified waiver repair technician" means an individual who has attended and completed required training, successfully passed a required examination(s) and has been certified by the director in compliance with rule 3745-26-16 of the Administrative Code to conduct emission related repairs subject to the requirements of this chapter.
- (E) "Compliance" or "comply" means a vehicle has passed all aspects and parameters of the anti-tampering, basic, enhanced or opt-in enhanced vehicle inspection and maintenance program, whichever is required under these rules. A compliance certificate will be issued to the owner or lessee whose vehicle has successfully passed the inspection.
- (F) "Contractor" means the entity selected through competitive bidding procedures or through a request for proposal to provide services to the Ohio environmental protection agency for operation of the basic, enhanced, or opt-in enhanced inspection and maintenance program.
- (G) "Contractor run" means the centralized inspection stations operated by the contractor for the basic, enhanced, or opt-in enhanced inspection and maintenance program.
- (H) "Designated program area" includes any county currently or formerly classified as moderate, serious, severe or extreme nonattainment for carbon monoxide or ozone in accordance with the Clean Air Act Amendments of 1990 and that is subject to a basic, an enhanced or an opt-in enhanced vehicle inspection and maintenance program.
- (I) "Director" means the director of the environmental protection agency or his authorized representative.

- (J) "Engine exchange" means any motor vehicle having an engine block installed that differs from the original manufacturer's specification certified as meeting United States environmental protection agency certification requirements.
- (K) "Enhanced" means the vehicle inspection program described in rules 3745-26-10, 3745-26-12, 3745-26-13 and 3745-26-14 of the Administrative Code.
- (L) "Exemption certificate" means the official certificate, issued by the director, to a vehicle owner or lessee whose vehicle may not require inspection as prescribed in rule 3745-26-02 of the Administrative Code and/or in section 3704.14 of the Revised Code. An exemption certificate shall serve the same purpose as the certificate to be presented to the registrar of motor vehicles as required by section 4503.10 of the Revised Code.
- (M) "Extension certificate" means an official certificate issued by the director to a motor vehicle owner or lessee for emergency and other purposes deemed by the director to warrant an extension of the time that any motor vehicle, required to be tested, is exempt from testing. An extension certificate shall serve the same purpose as the certificate to be presented to the registrar of motor vehicles as required by section 4503.10 of the Revised Code.
- (N) "Facility," as used in this chapter, means any building, structure, installation, operation or combination thereof used or operated to conduct vehicle inspections or licensed to perform waiver repairs pursuant to section 3704.14 of the Revised Code.
- (O) "Foreign imported gray market vehicle" means any vehicle of a type required to be registered that is brought into this state from another country other than in the ordinary course of business by or through a manufacturer or dealer as defined in division (W) of section 4501.01 of the Revised Code.
- (P) "Government vehicle" means any vehicle as defined in section 4503.16 of the Revised Code.
- (Q) "Gross vehicle weight rating" means weight of vehicle plus the load the vehicle is capable of carrying as stated on the manufacturer's door plate.
- (R) "Inspection certificate" means the portion of the vehicle inspection report that is issued to each vehicle owner or lessee at the time of an inspection. An inspection certificate indicating compliance is to be presented to the registrar as required by division (B) of section 4503.10 of the Revised Code.
- (S) "Inspection Procedures Manual" or "manual" means the book containing the most recent official document issued by the director detailing the guidelines and repair requirements to be used in the anti-tampering or tailpipe emissions inspection. Each inspection station shall keep an updated manual on the premises at all times.
- (T) "Official inspection station," "inspection station" or "reinspection station" means any automotive station or facility, leased or owned, and operated by any person licensed

by the director to conduct anti-tampering inspections or tailpipe emission inspections of motor vehicles and to otherwise issue an inspection certificate.

- (U) "Lessee" means any person not having title to a motor vehicle, but granted legal authority by the title holder to possess the vehicle.
- (V) "License" means the lawful authority granted by the director to any qualified person to operate an inspection station for the purpose of conducting motor vehicle inspections as required herein.
- (W) "Licensed waiver repair facility" means the site or location of a building used by a person, firm, corporation, or governmental entity licensed by the director in compliance with rule 3745-26-15 of the Administrative Code to conduct emission related repairs for a waiver to gasoline fueled vehicles (diesel fueled vehicles do not need to have emission repairs for reinspection performed at a licensed waiver repair facility in order to obtain a waiver).
- (X) "Licensee" means any person meeting the established requirements and to whom the director issues a license to conduct motor vehicle inspections.
- (Y) "Motor vehicle" or "vehicle" has the meaning as defined in division (B) of section 4501.01 of the Revised Code.
- (Z) "Multi-fueled vehicle" means any vehicle originally manufactured, designed, or converted from its original manufacturer's specification to utilize more than one fuel type, one of which is gasoline.
- (AA) "Nonattainment area" means an area that has not achieved the national ambient air quality standards and that is required to undergo certain air pollution control strategies pursuant to the 1990 Clean Air Act Amendments.
- (BB) "Opt-in enhanced" means an enhanced vehicle inspection and maintenance program selected by a moderate ozone or carbon monoxide nonattainment area through the process outlined in section 3704.142 of the Revised Code and described in rules 3745-26-10, 3745-26-12, 3745-26-13 and 3745-26-14 of the Administrative Code.
- (CC) "Owner" means any person other than a manufacturer or dealer having title to a motor vehicle.
- (DD) "Person" means the state, any political subdivision, public or private corporation, partnership, firm, association, individual, organization or other entity.
- (EE) "Queuing area" means the space allocated in each lane at each centralized inspection station where vehicles wait for testing.
- (FF) "Test center" means any inspection station operated by a contractor where emission inspections and reinspections are performed.

- (GG) "Ultimate purchaser" with respect to any new motor vehicle means the first person, other than a dealer in its capacity as a dealer, who is a good faith purchaser of such new motor vehicle for purposes other than resale.
- (HH) "Vehicle identification number" or "VIN" means the manufacturer' original serial number affixed to or imprinted upon the chassis or other part of the motor vehicle.
- (II) "Vehicle inspection report" or "VIR" means the official inspection form narrative presented to each vehicle owner or lessee at the time of an inspection. It indicates levels of hydrocarbons, carbon monoxide and nitrous oxides detected during the inspection and indicates whether the vehicle has passed the inspection. The vehicle inspection report contains a detachable inspection certificate that is to be presented to the registrar of motor vehicles as required by division (B) of section 4503.10 of the Revised Code.
- (JJ) "Waiver" means a relinquishment of the requirement to meet compliance with the appropriate model year emission standards.
- (KK) "Waiver certificate" means the official certificate issued to a vehicle owner or lessee whose vehicle has not met compliance with the emissions standards but has met all requirements for a waiver as prescribed in rule 3745-26-12 of the Administrative Code. A waiver certificate shall serve the same purpose as the compliance certificate to be presented to the registrar of motor vehicles as required by section 4503.10 of the Revised Code.
- (LL) "Waiver limit" means the minimum dollar amount, as specified in section 3704.14 of the Revised Code, required to be spent for motor vehicle emission related repair and diagnostic fees, after the low emissions tune-up has been performed, by each owner or lessee whose vehicle fails the basic, enhanced or opt-in enhanced test, in order for said owner or lessee to be eligible for a waiver as prescribed in paragraphs (E)(1) and (E)(2) of rule 3745-26-12 of the Administrative Code. The repair work performed on the vehicle may be completed at a licensed waiver repair facility or by a vehicle owner or lessee, and shall be related to the vehicle's emission control equipment in order to be eligible for a waiver. For any vehicle registered in a county that is subject to a basic or opt-in enhanced inspection program, "waiver limit" means at least two hundred dollars for a vehicle of a 1981 or more recent model year and one hundred dollars for a 1980 or earlier model year, except that for any county classified as serious, severe, or extreme nonattainment that is subject to an enhanced vehicle inspection and maintenance program, "waiver limit" means more than four hundred fifty dollars for any vehicle.
- (MM) "Repair spending cap" means the maximum dollar amount required to be spent for motor vehicle emission related repair and diagnostic fees by each owner or lessee whose vehicle fails the basic, enhanced or opt-in enhanced test and which qualifies the vehicle owner or lessee for a waiver as prescribed in paragraphs (E)(1) and (E)(3) of rule 3745-26-12 of the Administrative Code. The repair work performed on the vehicle may be completed at a licensed waiver repair facility, or by a vehicle owner or lessee, and shall be related to the vehicle's emission control equipment. For any

vehicle registered in a county that is subject to a basic or opt-in enhanced inspection program, "repair spending cap" means at least three hundred dollars.

(NN) "Low income" means household income, during the past twelve month period, of not more than one hundred fifty per cent of the latest available poverty threshold level established by the U.S. department of health and human services, for the forty-eight contiguous states.

Rules 3745-26-02 to 3745-26-09 were rescinded on December 29, 1995

**Requirements for contractors in the basic, enhanced or opt-in enhanced automobile inspection and maintenance program.**

- (A) Initial motor vehicle inspections conducted under the basic, opt-in enhanced or enhanced tailpipe emissions inspection program required under section 3704.14 of the Revised Code shall be conducted by one or more private contractors.
- (B) The contract shall be awarded by the director of administrative services and the contractor shall comply with all aspects of the bid contract as awarded.
- (C) The contractor shall construct, maintain and operate computerized, high volume tailpipe emission inspection stations in a designated program area for the purpose of inspecting vehicles as required under section 3704.14 of the Revised Code. These contractor run tailpipe emission inspection stations shall meet, but not be limited to the following requirements:
  - (1) Eighty per cent of the population that is subject to division (F) of section 3704.14 of the Revised Code shall be no more than five miles from an emission inspection station and that one hundred per cent of that population be no more than ten miles from an emissions inspection station. In rural areas, one hundred per cent of that population shall be no more than fifteen miles from an inspection station;
  - (2) Stations shall be in operation for no fewer than forty-five hours per week, which shall include, without limitation, operating hours in the evening and on Saturdays;
  - (3) The amount of time a vehicle must wait within the confines of the queuing area shall not exceed a daily average of fifteen minutes;
  - (4) Each queuing area shall be at least one hundred fifty continuous feet per inspection lane; and
  - (5) There shall be no fewer than three permanent sheltered test lanes per urban facility and no fewer than two test lanes for each rural test facility.
- (D) The contractor or any of its employees is prohibited from having principal interest in a company that is in the business of vehicle repair or service, in vehicle parts sales, or in motor vehicle sales or leasing.
- (E) The contractor shall not refer vehicle owners to any particular vehicle repair service provider.
- (F) For each designated program area required under division (B) of section 3704.14 of the Revised Code, the contractor shall provide emission inspection data analyses and

furnish to the director summary reports on a weekly, monthly, quarterly, and yearly basis as requested by the director.

- (G) The director may conduct periodic announced and unannounced audits of centralized facilities to ensure that the contractor continues to meet the requirements of these rules and the provisions of section 3704.14 of the Revised Code and 40 CFR Part 51.
- (H) Each contractor shall be responsible for the upkeep, distribution and replacement of all vehicle inspection reports and other documents necessary or convenient to the program.
- (I) Each contractor operated inspection station shall display a sign visible to motorists that contains the following statement: "This automobile inspection is the result of requirements under the clean air act amendments enacted by the United States Congress. Any questions or comments you may have about this program may be directed to your United States senator in care of the United States Senate, The Capitol, Washington D.C. 20510, or to your United States representative in care of the United States House of Representatives, The Capitol, Washington D.C. 20515."
- (J) Each contractor shall be responsible for complying with equipment requirements and procedures established in 40 CFR Part 51.

Rule authorized by: RC Section 3704.14  
Prior effective date: May 15, 1990

Rule 3745-26-11 was rescinded December 29, 1995

**Requirements for motor vehicle owners in the enhanced or opt-in enhanced automobile inspection and maintenance program.****(A) Motor vehicles subject to inspection**

- (1) Beginning January 1, 1996, the director shall implement and supervise an opt-in enhanced vehicle inspection and maintenance program in any moderate ozone nonattainment county or an enhanced program in any county classified serious, severe or extreme nonattainment for carbon monoxide or ozone.
- (2) Unless otherwise exempt pursuant to division (F)(3) of section 3704.14 of the Revised Code, each twenty-five year-old or more recent motor vehicle whose owner or lessee resides in a county that is part of a designated program area, and each twenty-five year-old or more recent motor vehicle that is part of a fleet operated in a county that is part of a designated program area, is subject to biennial inspection for the opt-in enhanced or enhanced programs.

Unless otherwise exempt pursuant to division (F)(3) of section 3704.14 of the Revised Code, each motor vehicle that is owned or leased by the state, local government, or any political subdivision whose office is located within a county that is part of a designated program area, is subject to inspection in odd numbered years and shall report the inspection results to the director by December thirty-first of that year.

Pursuant to 40 CFR part 51.356, unless otherwise exempt pursuant to division (F)(3) of section 3704.14 of the Revised Code, each motor vehicle that is owned or leased by the federal government or its employees and is operated on a federal installation within a county that is part of a designated program area is subject to inspection. Vehicles owned or leased by the federal government will be required to have an inspection in odd numbered years and shall report the inspection results to the director by December thirty-first of that year.

- (a) The county of residence of a motor vehicle owner is determined by the resident's or owner's address provided on the registration issued by the registrar of motor vehicles.
- (b) A lessee's county of residence is determined by the resident's address listed on the lease agreement.
- (c) Federal installations located in a designated program area shall provide documentation of proof of compliance with test requirements to the director of Ohio EPA. Documentation shall include a list of subject vehicles and be updated annually.

- (3) Vehicle owners shall comply with the following test frequency in a designated program area:
  - (a) A vehicle owner or lessee whose vehicle is an odd number model year is required to present a valid inspection certificate upon vehicle registration in odd numbered calendar years.
  - (b) A vehicle owner or lessee whose vehicle is an even number model year is required to present a valid inspection certificate upon vehicle registration in even numbered calendar years.
- (4) A vehicle owner or lessee may have his or her vehicle inspected in any Ohio designated program area as long as the emissions inspection is comparable to the required inspection in his or her county of residence.
- (5) At the time of vehicle registration or registration renewal, the motor vehicle owner or lessee shall present to the registrar of motor vehicles an inspection compliance certificate, an exemption certificate, or a waiver certificate with an application for vehicle registration as determined under section 4503.10 of the Revised Code.
- (6) Except for new motor vehicles, as defined in division (C) of section 4517.01 of the Revised Code, vehicles that have been transferred to a new owner or lessee or those issued a thirty-day temporary tag as defined in section 4503.182 of the Revised Code shall have an emissions inspection performed unless a valid compliance certificate from the previous owner is transferred to the new owner or a duplicate certificate as prescribed in paragraph (D)(10) of rule 3745-26-12 of the Administrative Code is obtained. Waiver and exemption certificates are not transferrable.
- (7) Foreign imported grey-market vehicles that have been issued documents of exemption from emission requirements by the United States environmental protection agency are not exempt from testing in Ohio.
- (8) Vehicles subject to inspection that have been rebuilt or that have had engine exchanges must meet inspection requirements for the model year of the motor vehicle chassis.
- (9) For a kit car or self-assembled car whose engine year can be confirmed by the director or his designee, the vehicle will be tested based on the standards for the confirmed engine year. If the engine year cannot be confirmed, the motor vehicle will be tested on the standard for the year the vehicle was titled.
- (10) A vehicle inspection report issued to a motor vehicle owner or lessee is valid for three hundred sixty-five days from the date of the inspection. A valid

compliance certificate may be transferred to a subsequent owner or lessee of that vehicle.

- (11) All vehicle inspection reports shall contain the following statement "This automobile inspection is a result of requirements of the clean air act amendments enacted by the United States congress. Any questions or comments you may have about this program may be directed to your United States senator in care of the "United States Senate, The Capitol, Washington, D.C. 20510, or to your United States representative in care of the United States House of Representatives, The Capitol, Washington D.C. 20515."

(B) Temporary exemptions and extensions

- (1) Pursuant to division (F)(4) of section 3704.14 of the Revised Code, new vehicles whose titles have never been transferred by a manufacturer, distributor, or dealer to an ultimate purchaser are exempt from the inspection requirements for two years in the opt-in enhanced and enhanced programs. New vehicle exemptions commence on the day the first certificate of the title is issued on behalf of the ultimate purchaser. An exemption certificate is not required for owners of new vehicles.
- (2) Consistent with the intent of these rules, the director may grant temporary exemptions for or extensions of the time during which any motor vehicle required to be tested pursuant to section 3704.14 of the Revised Code and the rules adopted thereunder is exempt from testing, if circumstances indicate such an exemption or extension is warranted.
- (3) Any application for a temporary exemption or extension shall be submitted on a form prescribed by the director. Copies of this form may be obtained free of charge from the Ohio environmental protection agency, from the bureau of motor vehicles or from any test center.
- (4) Any owner or lessee receiving a temporary exemption or extension shall comply with any terms and conditions specified by the director on the extension certificate. If the recipient of an extension certificate fails to comply with the terms and conditions, that owner or lessee shall not be eligible for future exemptions or extensions.
- (5) A temporary exemption for a motor vehicle may be issued if one of the following criteria is met by the owner or lessee:
  - (a) For motor vehicles owned or operated by military personnel stationed outside Ohio

If a motor vehicle is registered in an Ohio designated program area, but is owned or operated by a member of the armed forces who is stationed

outside Ohio, the application for temporary exemption shall include a copy of that person's current military orders, a copy of the vehicle registration and a completed exemption application.

- (b) For motor vehicles owned or operated by students attending schools outside the state of Ohio that are not within another state's designated program area

If a motor vehicle registered in an Ohio designated program area is owned or operated by a person attending school outside the state of Ohio but which is not in another state's designated program area, the application for temporary exemption shall include a statement from the registrar of the school attesting to the student's registration and the effective dates of that registration, a copy of the vehicle registration and a completed exemption application.

- (c) For motor vehicles operated outside Ohio in another state's designated program area but not operated by a person eligible for a military or student exemption.

If a motor vehicle registered in an Ohio designated program area is owned or operated by a person in another state's designated program area, the application for temporary exemption shall include a valid compliance certificate from the motor vehicle inspection program in that area, a copy of the vehicle registration and a completed exemption application.

- (6) An extension may be granted for a motor vehicle that is undergoing repair at the time of its registration or registration renewal. The documentation for any extension based upon repair shall include a copy of the repair order or parts order, or both, from the facility performing the repairs, a copy of the vehicle registration and a copy of the completed application.
- (7) A temporary hardship extension for any motor vehicle may be granted to a motor vehicle owner or lessee. The hardship extension shall be effective for six months from the date the director issues the extension. The director shall issue an extension certificate to any vehicle owner or lessee if all of the following criteria are met:
  - (a) The motor vehicle fails any part of the emission test, except that the hardship extension is not available if a vehicle fails only the gas cap test;
  - (b) The motor vehicle owner or lessee completes and submits an application for a temporary hardship extension;
  - (c) The applicant certifies that his or her income qualifies as "low income," as defined in these rules; and

- (d) The motor vehicle owner or lessee provides a written estimate of seventy-five dollars or more for vehicle emission repairs, parts or services, including diagnostic fees, related to the failure. If a motor vehicle owner or lessee intends to perform the necessary services or repairs, the written estimate shall include only the cost of emission related parts. The written estimate shall not include any costs associated with any motor vehicle emission related recall that has been or is to be paid by a manufacturer or dealer.

A temporary hardship extension is not transferrable to a subsequent owner or lessee.

### (C) Permanent exemptions

Effective January 1, 1996 the following motor vehicles are permanently exempt from the emissions inspection required in the designated program area.

- (1) Vehicles that are older than twenty-five years, as determined by vehicle model year;
- (2) Passenger, noncommercial and commercial vehicles with gross vehicle weight ratings of more than ten thousand pounds, except for urban buses which shall be tested;
- (3) Historical vehicles registered under section 4503.181 of the Revised Code. Owners of historical vehicles are not required to obtain exemption certificates;
- (4) Collector's vehicles registered under section 4501.01 of the Revised Code. Owners of collector's vehicles are not required to obtain exemption certificates;
- (5) Parade and exhibition vehicles registered under section 4503.18 of the Revised Code. Owners of parade and exhibition vehicles are not required to obtain exemption certificates;
- (6) Motorcycles as defined in section 4511.01 of the Revised Code. Owners of motorcycles are not required to obtain exemption certificates;
- (7) Vehicles, the district of registration of which is located in a designated program area, that are leased to a lessee whose county taxing district code, as designated on the vehicle registration, is outside a designated program area. The lessees of such vehicles are not required to obtain exemption certificates as long as the lessee's county taxing district remains outside a designated program area;
- (8) Vehicles for which salvage certificates of title have been issued under division (C) of section 4505.11 of the Revised Code. Owners or lessees of salvaged vehicles are not required to obtain exemption certificates;

- (9) Recreational vehicles and motor homes as defined in section 4501.01 of the Revised Code. Owners or lessees of recreational vehicles and motor homes are not required to obtain exemption certificates;
- (10) Electrically-powered vehicles shall receive a one-time verification inspection prior to receiving an exemption certificate;
- (11) Vehicles operating on an alternative fuel such as primarily one hundred per cent propane, butane, alcohol or natural gas. Experimental vehicles and vehicles operating on other alternative fuels may be exempted at the director's discretion. Such vehicles shall have a one-time verification inspection performed on the vehicle prior to receiving an exemption certificate.

(D) Inspection procedures and repair requirements

- (1) All initial inspections and reinspections shall be performed at a contractor-run test center. A vehicle owner or lessee shall present the vehicle registration, an application for registration renewal, a vehicle registration expiration notice, or the vehicle title, or copy thereof, at the time of inspection so as to verify the vehicle identification number.
- (2) Vehicles shall receive a visual check. Vehicles found to be in an unsafe condition or missing a catalytic converter, if required, will not receive an emissions test but will be issued a rejection report indicating items that need to be repaired. No fee shall be charged if the vehicle is rejected. Any vehicle may be rejected for one or more of the following conditions:
  - (a) Fuel, engine oil, coolant or transmission oil leaks in or around engine, fuel tank or lines causing a visible pooling of fluid onto floor.
  - (b) Under-inflated tires, emergency spare tires or tires in an unsafe condition.
  - (c) Loud internal engine noise, obvious exhaust leaks, or a missing tailpipe or a missing gas cap.
- (3) A vehicle known to be on an emission related recall or that has an unresolved emission related recall repair will not be inspected until the recall repair is completed and documented with proof of the work performed. After such proof has been presented, an emission test may be performed on the vehicle. Recall repair costs, whether borne by the manufacturer or dealer shall not be counted toward a waiver.
- (4) Any vehicle subject to the requirements of this rule shall have a tampering inspection to ensure that it contains the emissions control equipment and that the equipment properly operates.

Each tampering inspection will be performed on the basis of the vehicle's original emission control system configuration at the time of manufacture, or on a U.S. EPA certified emission control configuration for an engine of the same or newer model year and weight class of that of the vehicle. After market replacement parts and add-on and modified parts meeting the performance criteria specified in 40 Code of Federal Regulations, volume 85, subpart V, or meeting the requirements of the U.S. EPA memorandum 1A policy document, or which have not otherwise been found in violation of the anti-tampering provisions of the Clean Air Act as amended are considered to be in compliance with this chapter.

Vehicles that fail the tampering inspection will be charged the inspection fee and issued a vehicle inspection report indicating failure items. The owner or lessee shall have the vehicle repaired to pass the initial tampering test.

- (5) If a vehicle passes the tampering inspection, it will receive an emissions inspection to ensure the concentration of hydrocarbons, nitrous oxides and carbon monoxide meet applicable standards for the model year. For diesel-powered vehicles, the emissions inspection will test for exhaust opacity. Maximum allowable emission standards shall be determined by the director.
- (6) If the vehicle passes the required emissions inspection, the contractor shall provide the owner or lessee with a vehicle inspection report that includes a compliance certificate.

If a vehicle fails its required emissions inspection, the contractor shall provide the owner or lessee with a vehicle inspection report and certificate indicating which items failed the inspection. This report shall list possible components that may need to be replaced and/or the systems to be repaired.

- (7) Upon receipt of the vehicle inspection report indicating failure, the owner or lessee shall:
  - (a) Have emissions related repairs performed on the vehicle;
  - (b) Have the necessary repairs performed so that the vehicle can pass a subsequent reinspection. Only new original or new aftermarket catalytic converters or recertified used catalytic converters meeting the emission reduction requirements and criteria set by the United States environmental protection agency are acceptable for catalytic converter replacement required under this chapter;
  - (c) Have the vehicle reinspected after the required repairs have been performed;

- (d) Present a dated repair or sales receipt for the repair or replacement of any item causing the failure of the vehicle, and present the vehicle inspection report indicating noncompliance, before the vehicle can be reinspected; and
  - (e) Have the back side of the vehicle inspection report completed and signed by the person performing the repairs.
- (8) Any vehicle owner or lessee may perform repairs necessary to prepare the vehicle for reinspection, however, only actual costs of emissions related parts, not labor costs, incurred by an owner or lessee in performing self repairs upon vehicles shall be applied towards a waiver.
- (9) If a motor vehicle failing the opt-in enhanced or enhanced test is covered by a valid and unexpired emission performance warranty as provided under section 207 (B) of the Clean Air Act Amendments of 1990, 104 Stat. 2399, 42 USCA section 7401, as amended, the vehicle owner or lessee shall have any repairs necessary for the vehicle to pass inspection performed on the vehicle under that warranty. Such a vehicle is not eligible for a waiver under this rule. Costs incurred under warranty repairs shall not be applied towards a waiver.
- (10) If a vehicle owner or lessee loses an inspection certificate and a valid vehicle inspection identification number does not appear on the bureau of motor vehicles' registration data file, the vehicle owner or lessee must have the vehicle reinspected and pay the required inspection fee to be determined by the director or obtain a duplicate certificate from a designated test facility and pay the designated fee.
- (11) Emissions inspections shall incorporate the on-board diagnostic computer link feature mandated by the Clean Air Act Amendments of 1990 when the feature is available.

(E) Waivers

- (1) To qualify for a waiver certificate, a motor vehicle owner or lessee must provide all of the following:
- (a) Proof that the motor vehicle has received a low emission tune-up as required by section 3704.14 of the Revised Code.
  - (b) The most recent vehicle inspection report (VIR). Actual repairs and repair information on the VIR must have been completed by the vehicle owner, lessee or a repair technician. Emission related repairs performed prior to the vehicle's initial inspection can be included in calculating whether the vehicle owner or lessee has met the "waiver limit" or the "repair spending cap," as provided in paragraphs (E)(2) and (E)(3) of this rule, only if the repairs were performed within sixty days of that initial inspection.

- (c) Repair receipts including itemized costs from a repair facility, or costs of parts if repairs are performed by an owner or lessee, to bring the vehicle into compliance with the required emission inspection.

For a vehicle registered in a county classified as serious, severe, or extreme nonattainment, the motor vehicle owner or lessee must satisfy the requirements of paragraph (E)(2) of this rule. For a vehicle registered in a county not classified as serious, severe, or extreme nonattainment, but that is subject to a basic or enhanced inspection or program, the motor vehicle owner or lessee must satisfy the requirements of paragraphs (E)(2) and (E)(3) of this rule.

- (2) The vehicle owner or lessee must demonstrate that he or she has spent an amount equal to or greater than the "waiver limit" specified in section 3704.14 of the Revised Code on emission-related repairs and diagnostic fees. This amount shall not include the cost of repairing or replacing tampered emissions control equipment, nor shall it include the cost of a low emission tune-up, and it shall include only the cost of parts if the repairs are performed by the vehicle owner or lessee. If the vehicle owner or lessee demonstrates that the "waiver limit" has been spent, the vehicle shall be inspected and the documentation reviewed to establish both of the following:
  - (a) The motor vehicle shows no sign of tampering with the emission control equipment; and
  - (b) Reinspection results subsequent to emission-related repairs and adjustments indicate not less than a thirty percent reduction in the measured concentrations of each pollutant that exceeded the applicable standard for that pollutant during the initial inspection. Also, the reinspection results for each pollutant that passed during the initial inspection shall not exceed the standard for that pollutant after emission-related repairs and adjustments.
- (3) The vehicle owner or lessee must demonstrate that he or she has spent an amount equal to or greater than the "repair spending cap" on emission-related repairs and diagnostic fees. This amount shall not include the cost of repairing or replacing tampered emissions control equipment, and shall include only the cost of parts if the repairs are performed by the vehicle owner or lessee.
- (4) A waiver certificate shall be valid for three hundred sixty-five days from its date of issuance or until the next required vehicle emission test. A waiver is not transferrable to a subsequent owner or lessee.

(F) Test fees

- (1) Pursuant to section 3704.14 of the Revised Code, the director shall establish non-taxable fees for biennial inspections and reinspections. The inspection and reinspection fees shall not differ in amount and shall not exceed twenty-five dollars for the opt-in enhanced or enhanced program.
- (2) Vehicle owners or lessees shall pay the required inspection fee upon initially failing the tampering check, upon initially passing the complete enhanced or opt-in enhanced test, or upon any reinspection performed after the first reinspection. The first reinspection is performed at no charge to the owner or lessee.
- (3) The director may increase the inspection and reinspection fees if he determines it necessary to cover costs of the program.
- (4) Fees collected by the director as required under this chapter shall be credited to the "inspection and maintenance special rotary account" established in section 3704.14 of the Revised Code.

(G) Appeal procedures

A motor vehicle owner or lessee may appeal the results of an emissions inspection if he or she believes the inspection was not administered according to rules or procedures of this chapter. The owner or lessee may appeal the inspection results to the director within fourteen days of failing an emissions inspection. An official appeal shall be in writing and on a form prescribed by the director.

- (1) Upon notice of request for an appeal, the director or his representative shall contact the owner or lessee and will reinspect the vehicle at a place and time of the director's convenience.
- (2) The director's determination of the vehicle's compliance or noncompliance with inspection standards shall be final upon reinspection by the director.
  - (a) If, upon reinspection, the vehicle does not pass, a noncompliance certificate shall be issued and an additional fee will be charged to the vehicle owner or lessee.
  - (b) If, upon reinspection, the vehicle passes, a compliance inspection certificate shall be issued to the vehicle owner or lessee at no charge.

3745-26-13      **Requirements for certified inspectors in the enhanced or opt-in enhanced automobile inspection and maintenance program.**

(A) Application procedures

Each person applying for inspector certification must be at least eighteen years old. Applicants shall submit a complete application and agree in writing to inspect vehicles in accordance with the rules of this chapter and the Administrative Code.

(B) Inspector training and certification

- (1) The contractor in each designated nonattainment area shall be responsible for training each inspector applicant employed by the contractor according to the requirements in 40 CFR Part 51.367.
- (2) Applicants shall successfully complete the required training and score at least eighty percent on the written examination and hands-on demonstration administered by Ohio EPA.
- (3) The director shall issue a certificate to each person who satisfies all the requirements of this rule. The certificate shall be available at the test facility where the certified inspector performs inspections.
- (4) Each inspector shall be certified for a two-year period. Inspectors requiring recertification may be recertified after attending and successfully completing a recertification course and test.

(C) Inspector conduct

- (1) Certified inspectors shall not conduct inspections while under the influence of alcohol and/or a disabling medication or drug.
- (2) Certified inspectors shall not participate in the solicitation of a bribe in order to pass a vehicle or any other fraudulent activity.
- (3) The director may require a certified inspector to attend additional training at any time or require re-administration of the written exam or hands-on demonstration to determine if a certified inspector has sufficient knowledge of the rules and procedures in this chapter and the Administrative Code.
- (4) The director may immediately suspend or revoke an inspector's certification for failing to comply with this rule.

**Enforcement of program rules and regulations for the enhanced or opt-in enhanced automobile inspection and maintenance program.**

- (A) As required by 40 CFR Part 51.359 and 51.363, and as authorized in division (B)(9) of section 3704.14 of the Revised Code, the director shall administer a program of quality assurance and shall require each contractor to implement its own quality control program.
- (B) The director may deny, or immediately suspend or revoke an inspector's certification issued under section 3704.14 of the Revised Code for any violations of these sections and section 3704.14, or for:
  - (1) Commission of fraud or willful misrepresentation in application for or in obtaining a license.
  - (2) Conviction of a felony while certified as an inspector.
  - (3) Improper testing of motor vehicles.
  - (4) Improper use or misrepresentations of vehicle inspection reports.
  - (5) Misrepresentation of vehicle inspection.
- (C) Any inspector whose certification is revoked under Chapter 119. or section 3704.17 of Revised Code shall not be eligible to reapply for certification for a three-year period from the date the inspector certification was revoked.

**Waiver repair facility licensing procedures, requirements, and obligations.**

- (A) For the purposes of compliance with the waiver related repairs in paragraph (E) of rule 3745-26-12 of the Administrative Code, the director may issue a waiver repair facility license or renewal thereof, to an applicant who meets the following requirements:
- (1) Submission of a completed application on a form prescribed by the director;
  - (2) Demonstration, during any on-site inspection by a designee of the director, of compliance with the requirements of this chapter.
- (B) For applicants who meet or continue to meet the criteria for licensing as a waiver repair facility, the director shall issue an initial or a renewal license to the facility for a period not to exceed three years. Any renewal application not received within ten days after the last day of the renewal date shall be considered evidence that the facility does not intend to renew their application for a license. For any voluntary relinquishment or abandonment of license, or cessation of operation of the facility, it is the responsibility of the licensee to notify the director, at least seven days in advance, of the exact date the station will cease conducting waiver repairs. The director or his representative shall reclaim all state-owned or state-provided property.
- (C) The license shall be valid only for:
- (1) The owner in whose name the license is issued,
  - (2) The transaction of business for the purpose of this chapter, and
  - (3) The location designated thereon. The applicant shall provide proof that the required emissions equipment as detailed in paragraph (B) of rule 3745-26-15 of the Administrative Code, has been or will be purchased or leased and ready for operation within one week of purchase or lease.
- (D) The director may include terms and conditions as part of any license issued, to ensure compliance with this chapter.
- (E) Each waiver repair facility shall have a minimum of one certified waiver repair technician, as certified in accordance with rule 3745-26-16 of the Administrative Code. The licensee shall notify the director within seven calendar days, in writing, when an employee, who is a certified waiver repair technician, resigns, is dismissed, or otherwise leaves employment at the facility. If a certified waiver repair technician resigns, is dismissed, or otherwise leaves employment at the facility resulting in no certified technicians currently at the facility, the facility may not conduct waiver repairs.

- (F) The director may revoke any waiver repair facility license for a facility failing to maintain and meet the terms and conditions established in this rule.
- (G) Waiver repair facilities shall not conduct waiver repairs unless the following items are on its premises and are in full operating condition:
- (1) Current reference materials;
  - (2) DVOM or digital multi-meter;
  - (3) Vacuum gauge;
  - (4) Fuel pressure test kit;
  - (5) Carbon cleaner system;
  - (6) 3, 4, or 5 gas analyzer;
  - (7) Scan tool;
  - (8) Basic ignition scope.
- (H) The following items are required beginning January 1, 1998 when U.S. EPA's phase-in specifications are upgraded:
- (1) Lab scope;
  - (2) Purge flow tester;
  - (3) Scan tool with OBD II capabilities.
- (I) If the director deems it necessary and upon reasonable written notice, additions or deletions of waiver repair facility equipment may be required.
- (J) The owner or operator of each licensed waiver repair facility shall display the official sign issued to it, by the director. The official waiver repair facility sign shall be displayed in full view of the public and shall not be altered in any way.
- The sign shall remain the property of the Ohio EPA and, upon discontinuance as a waiver repair facility, shall be surrendered by the licensee to an authorized representative of the Ohio EPA when so ordered by the director.
- (K) The licensee shall allow only waiver repair technicians to complete and sign the back of the VIR of any vehicle presented to the facility for waiver repairs.

- (L) The waiver repair technician whose signature and certification number appears on the back of the VIR shall be accountable for all aspects of waiver repairs he or she performed or approved.
- (M) Each licensed waiver repair facility shall accurately maintain all records, forms, and reports the director deems necessary for the administration and quality assurance of the process for issuing waivers. Each waiver repair facility shall maintain such records, forms, and reports on the premises of the facility for a period as the director deems necessary. All such records, forms, and reports shall be readily available to the director or his authorized representative for review at any time.
- (N) Licensed waiver repair facilities shall be subject to announced and unannounced periodic audits by the director or his authorized representative, as prescribed in Chapter 3704.14 of the Revised Code, to determine compliance with program rules and waiver repair procedures.
- (O) Each waiver repair facility shall contact the director at least thirty days prior to a change of ownership, business name, or location. In the event of any changes, the subsequent owner or the current owner of a subsequent facility location must submit a new licensing application to the director.
  - (1) The authority to conduct waiver repairs ceases immediately upon change in facility ownership or location from that stated in the application currently on file with the director.
  - (2) Upon notice of a change of a facility owner or location, the director shall issue a license under the subsequent facility name, owner, or location, provided the facility meets or continues to meet the minimum criteria as a waiver repair facility.

**Requirements for certified waiver repair technicians and approved technician trainers.**

- (A) The director shall certify any applicant as a waiver repair technician to conduct waiver repairs as required in paragraph (E) of rule 3745-26-12 of the Administrative Code provided the applicant:
- (1) Submits a completed application on a form prescribed by the director;
  - (2) Completes and satisfactorily passes a training curriculum sponsored or approved by the Ohio environmental protection agency for the purpose of learning the methods and procedures to be used in properly repairing vehicles failing an emissions inspection. The applicant is required to satisfactorily pass the Ohio EPA training course written examination. The training curriculum shall consist of three sequential units as follows:
    - (a) "Fundamental Inspection Repair System Training" (FIRST) which is subdivided into three modules
      - (i) Advanced electricity
      - (ii) Engine and fuel system analysis
      - (iii) Computer and driveability
    - (b) "Emission Diagnostician Graduate Education" (EDGE)
    - (c) Beginning January 1, 1998, "Advanced Emission Diagnostician Graduate Education" (Advanced EDGE);
  - (3) The requirement to complete and satisfactorily pass "Fundamental Inspection Repair System Training" (FIRST) may be waived by the director, if the applicant possesses current automotive service excellence (ASE) certification in advanced engine performance (L1) or satisfactorily passes a placement test for each of the three modules of FIRST given under the auspices of Ohio EPA as required in paragraph (A)(2) of this rule. If an applicant fails any of the three module(s) on the placement test, the applicant shall be required to complete and satisfactorily pass any corresponding module(s) of FIRST training. The placement test may be taken only once.
  - (4) Possesses current "Automotive Service Excellence" certification in Engine Performance (A8) and Electrical Systems (A6), ensuring that the technician has demonstrated competence in the area of basic emissions control systems. Beginning January 1, 1998, "Automotive Service Excellence" certification in Automobile Advanced Engine Performance (L1) will be required of each applicant. The director reserves the right to require or waive performance standards as he deems necessary.

- (B) Certification as a waiver repair technician shall be valid for two years. Each certified technician may conduct or otherwise perform waiver repairs only at a licensed waiver repair facility.
- (C) The director shall provide each applicant a waiver repair technician's certificate upon successful completion of certification requirements. The candidate may perform waiver related repairs as required in in paragraph rule 3745-26-12 of Administrative Code prior to the reception of a certificate only if all other requirements for certification have been met and satisfactorily completed or passed.
- (D) Certified waiver repair technicians who change their place of employment from one licensed waiver repair facility to another may continue to conduct waiver repairs so long as their certification is valid.  
  
Certified technicians shall notify the director prior to a change in place of employment.
- (E) The director may require a certified waiver repair technician to attend a program update training course at any time in order to maintain certification. The director will notify the technician in writing of any additional training requirements.
- (F) Recertification as a waiver repair technician shall consist of submitting an application to the director before the current certification expires. Additional training may also be required.
- (G) Approval of technician trainers
  - (1) The director or his designee may approve waiver repair technician trainers.
  - (2) The director may include terms and conditions necessary to become an Ohio EPA approved trainer for the purpose of training and certifying waiver repair technician.
  - (3) Upon approval by the director or his designee, Ohio EPA approved trainers shall also be certified as a certified waiver repair technician.

## **Chapter 3745-31: Permits to Install New Sources**

*Contact:* Mike Hopkins 614-644-2270  
Mike.Hopkins@EPA.State.Oh.US

3745-31-01      **Definitions.**

[Comment: For dates of non-regulatory government publications, publications of recognized organizations and associations, federal rules, and federal statutory provisions referenced in this rule, see the "Incorporation by Reference" section at the end of this rule.]

- (A) Except as otherwise provided in this rule, the definitions in rules 3745-15-01 and 3745-21-01 of the Administrative Code shall apply to this chapter.
- (B) "Acid rain program" means the program contained within Title IV of the Clean Air Act.
- (C) "Actual emissions" means the actual rate of emissions of a regulated NSR pollutant from an emissions unit, as determined under this paragraph, except that this definition shall not apply for calculating whether a significant emissions increase, as defined in this rule, has occurred, or for establishing a PAL under rule 3745-31-33 of the Administrative Code.
  - (1) Actual emissions as of a particular date shall equal the average rate, in tons per year, at which the emissions unit actually emitted the pollutant during a consecutive twenty-four-month period which precedes the particular date and which is representative of normal emissions unit operation. The director shall allow the use of a different time period upon a determination that it is more representative of normal emissions unit operation. Actual emissions shall be calculated using the emissions unit's actual operating hours, production rates and types of materials processed, stored or combusted during the selected time period.
  - (2) The director may presume that emissions unit-specific allowable emissions for the emissions unit are equivalent to the actual emissions of the emissions unit.
  - (3) For any emissions unit that has not begun normal operations on the particular date, actual emissions shall equal the potential to emit of the emissions unit on that date.
- (D) "Actuals PAL" for a major stationary source means a PAL based on the baseline actual emissions of all emissions units at the source that emit or have the potential to emit the PAL pollutant.
- (E) "Adhesive" means any substance that is used to bond one surface to another surface.
- (F) "Administrative modification" means a change to a permit to install or a PTIO that does not meet the definition of a modification under this rule.

- (G) "Affected sources" shall have the meaning given to it in the regulations promulgated under Title IV of the Clean Air Act.
- (H) "Air contaminant" means particulate matter, dust, fumes, gas, mist, radionuclides, smoke, vapor or odorous substances, or any combination thereof.
- (I) "Air contaminant source," for the purpose of this chapter, means each separate operation, or activity that results or may result in the emission of any of the following air contaminants:
- (1) An air contaminant or precursor of an air contaminant for which a national ambient air quality standard has been adopted under the Clean Air Act.
  - (2) An air contaminant for which the source is regulated under the Clean Air Act.
  - (3) A toxic air contaminant as listed in rule 3745-114-01 of the Administrative Code.
- (J) "Air contaminant source project" means the installation or modification of one or more air contaminant sources (and any structures associated with such installations or modifications), all of which results from a discrete production goal or objective.
- (K) "Allowable emissions" means the emission rate of an air contaminant source calculated using the maximum rated capacity of the air contaminant source (unless the air contaminant source is subject to limits that are federally enforceable or legally and practically enforceable by the state that restrict the operating rate or hours of operation, or both), and the most stringent of the following:
- (1) The applicable standards as set forth in 40 CFR Parts 60, 61 and 63; or
  - (2) The applicable Ohio state implementation plan emission limitation, including those with a future compliance date; or
  - (3) The emission rate by a permit condition that is federally enforceable or legally and practically enforceable by the state, including those with a future compliance date.
- (L) "Applicable laws" means any applicable provisions of Chapters 3704. and 3745. of the Revised Code; rules, regulations, and orders of the Ohio environmental protection agency, the Clean Air Act; and rules and regulations of the administrator of the United States environmental protection agency.
- (M) "Auto body refinishing facility" means a facility engaged primarily in collision repair and refinishing of automobiles and light duty trucks. Automobile paint-only and customizing facilities, which are engaged in repainting used motor vehicles and light duty trucks, but do not perform collision repair work, are also included in this definition. Mobile auto body painting operations, which employ temporary spray

booths meeting the design criteria specified by paragraph (A)(4)(g) of rule 3745-31-03 of the Administrative Code, are also included in this definition.

(N) "Available information" means, for purposes of identifying control technology options for a major MACT source, information contained in the following information sources as of the date of the MACT determination by the director:

- (1) A relevant proposed regulation, including all supporting documentation;
- (2) Background information documents for a draft or proposed regulation;
- (3) Data and information available from the "Control Technology Center" developed pursuant to Section 113 of the Clean Air Act;
- (4) Data and information contained in the "Aerometric Informational Retrieval System" including information in the MACT database;
- (5) Any additional information that can be expeditiously provided by the administrator; and
- (6) Any additional information provided by the applicant or others, and any additional information considered available by the director.

(O) "Baseline actual emissions" means the rate of emissions, in tons per year, of a regulated NSR pollutant, as determined under this rule.

(1) For any existing electric utility steam generating unit, baseline actual emissions means the average rate, in tons per year, at which the unit actually emitted the pollutant during any consecutive twenty-four-month period selected by the owner or operator within the five-year period immediately preceding when the owner or operator begins actual construction of the NSR project. The director shall allow the use of a different time period upon a determination that it is more representative of normal source operation.

- (a) The average rate shall include fugitive emissions to the extent quantifiable, and emissions associated with startups, shutdowns, and malfunctions.
- (b) The average rate shall be adjusted downward to exclude any non-compliant emissions that occurred while the source was operating above any emission limitation that was legally enforceable during the consecutive twenty-four-month period.
- (c) For a regulated NSR pollutant, when a NSR project involves multiple emissions units, only one consecutive twenty-four-month period must be used to determine the baseline actual emissions for the emissions units

being changed. A different consecutive twenty-four-month period can be used for each regulated NSR pollutant.

- (d) The average rate shall not be based on any consecutive twenty-four-month period for which there is inadequate information for determining annual emissions, in tons per year, and for adjusting this amount if required by paragraph (O)(1)(b) of this rule.
- (2) For an existing emissions unit (other than an electric utility steam generating unit), baseline actual emissions means the average rate, in tons per year, at which the emissions unit actually emitted the pollutant during any consecutive twenty-four-month period selected by the owner or operator within the ten-year period immediately preceding either the date the owner or operator begins actual construction of the NSR project, or the date a complete permit application is received by the director for a permit required either under this rule or under a plan approved by the administrator, whichever is earlier, except that the ten-year period shall not include any period earlier than November 15, 1990.
- (a) The average rate shall include fugitive emissions to the extent quantifiable, and emissions associated with startups, shutdowns, and malfunctions.
  - (b) The average rate shall be adjusted downward to exclude any non-compliant emissions that occurred while the source was operating above an emission limitation that was legally enforceable during the consecutive twenty-four-month period.
  - (c) The average rate shall be adjusted downward to exclude any emissions that would have exceeded an emission limitation with which the major stationary source must currently comply, had such major stationary source been required to comply with such limitations during the consecutive twenty-four-month period. However, if an emission limitation is part of a MACT standard that the administrator proposed or promulgated under 40 CFR Part 63, the baseline actual emissions need only be adjusted if the state has taken credit for such emission reductions in an attainment demonstration or maintenance plan consistent with the requirements in rule 3745-31-22 of the Administrative Code.
  - (d) For a regulated NSR pollutant, when a NSR project involves multiple emissions units, only one consecutive twenty-four-month period must be used to determine the baseline actual emissions for the emissions units being changed. A different consecutive twenty-four-month period can be used for each regulated NSR pollutant.
  - (e) The average rate shall not be based on any consecutive twenty-four-month period for which there is inadequate information for determining annual

emissions, in tons per year, and for adjusting this amount if required by paragraphs (O)(2)(b) and (O)(2)(c) of this rule.

- (3) For a new emissions unit, the baseline actual emissions for purposes of determining the emissions increase that will result from the initial construction and operation of such unit shall equal zero if the operation of the new emissions unit has not yet begun, or shall equal the unit's potential to emit if operation of the new emissions unit has begun.
  - (4) For a PAL for a major stationary source, the baseline actual emissions shall be calculated for existing electric utility steam generating units in accordance with the procedures contained in paragraph (O)(1) of this rule, for other existing emissions units in accordance with the procedures contained in paragraph (O)(2) of this rule, and for a new emissions unit in accordance with the procedures contained in paragraph (O)(3) of this rule.
- (P) "Baseline area" means any intrastate area (and every part thereof) designated as attainment or unclassifiable under Section 107(d) of the Clean Air Act in which the major stationary source or major modification establishing the minor source baseline date would construct or would have an air quality impact equal to or greater than one microgram per cubic meter (annual average) of the air pollutant for which the minor source baseline date is established.

Any baseline area established originally for the TSP increments shall remain in effect and shall apply for purposes of determining the amount of available PM10 increments, except that such baseline area shall not remain in effect if the permit authority rescinds the corresponding minor source baseline date in accordance with paragraph (OOO)(4) of this rule.

Area redesignations under Section 107(d) of the Clean Air Act cannot intersect or be smaller than the area of impact of any major stationary source or major modification that:

- (1) Establishes a minor source baseline date; or
  - (2) Is subject to 40 CFR 52.21 or under regulations approved pursuant to 40 CFR 51.166, and would be constructed in the same state as the state proposing the redesignation.
- (Q) "Baseline concentration" means that ambient concentration level that exists in the baseline area at the time of the applicable minor source baseline date. A baseline concentration is determined for each pollutant for which a minor source baseline date is established and shall include:

- (1) The actual emissions, as defined in this rule, representative of sources in existence on the applicable minor source baseline date, except as provided in paragraph (Q)(3) of this rule;
  - (2) The allowable emissions of major stationary sources that commenced construction before the major source baseline date, but were not in operation by the applicable minor source baseline date.
  - (3) The following will not be included in the baseline concentration and will affect the applicable maximum allowable increase(s):
    - (a) Actual emissions, as defined in this rule, from any major stationary source on which construction commenced after the major source baseline date; and
    - (b) Actual emissions increases and decreases, as defined in this rule, at any stationary source occurring after the minor source baseline date.
- (R) "Begin actual construction" means, in general, initiation of physical on-site construction activities on an air contaminant source project that are of a permanent nature. Activities that are considered to be included and excluded from this definition are further identified in rule 3745-31-33 of the Administrative Code.
- (S) "Best available control technology" or "BACT" means an emission limitation (including a visible emission standard) based on the maximum degree of reduction for each regulated NSR pollutant which would be emitted from any proposed major stationary source or major modification which the director, on a case-by-case basis, taking into account energy, environmental and economic impacts and other costs, determines is achievable for such major stationary source or major modification through application of production processes or available methods, systems and techniques, including fuel cleaning or treatment or innovative fuel combustion techniques for control of such pollutant. In no event shall application of BACT result in emissions of any pollutant that would exceed the emissions allowed by any applicable standard under 40 CFR Parts 60, 61, and 63. If the director determines that technological or economic limitations on the application of measurement methodology to a particular emissions unit would make the imposition of an emission standard infeasible, a design, equipment, work practice, operational standard, or combination thereof, may be approved by the director instead to satisfy the requirement for the application of BACT. Such standard shall, to the degree possible, set forth the emission reduction achievable by implementation of such design, equipment, work practice or operation and shall provide for compliance by means which achieve equivalent results.
- (T) "Best available technology" or "BAT" means any combination of work practices, raw material specifications, throughput limitations, source design characteristics, an evaluation of the annualized cost per ton of air pollutant removed, and air pollution control devices that have been previously demonstrated to the director of

environmental protection to operate satisfactorily in this state or other states with similar air quality on substantially similar air pollution sources.

- (U) "Clean Air Act" means the federal Clean Air Act as amended November 15, 1990; 42 USC 7401 to 7671q.
- (V) "Clean coal technology" means any technology, including technologies applied at the precombustion, combustion, or postcombustion stage, at a new or existing facility that will achieve significant reductions in air emissions of sulfur dioxide or oxides of nitrogen associated with the utilization of coal in the generation of electricity, or process steam, and that is not in widespread use as of November 15, 1990.
- (W) "Clean coal technology demonstration project" means a project using funds appropriated under the heading "Department of Energy-Clean Coal Technology," up to a total amount of two billion five hundred million dollars for commercial demonstration of clean coal technology, or similar projects funded through appropriations for the United States environmental protection agency. The federal contribution for a qualifying clean coal technology demonstration project shall be at least twenty per cent of the total cost of the clean coal technology demonstration project.
- (X) "Cleaning solution" means liquid solvents or solutions used to remove ink and debris from the operating surfaces of the printing press and its parts.
- (Y) Reserved.
- (Z) "Commence" as applied to construction of a major stationary source or major modification means that the owner or operator has all necessary preconstruction approvals or permits and either has:
  - (1) Begun, or caused to begin, a continuous program of actual on-site construction or the major stationary source or major modification, to be completed within a reasonable time; or
  - (2) Entered into binding agreements or contractual obligations (which cannot be canceled or modified without substantial loss to the owner or operator) to undertake a program of actual construction of the major stationary source or major modification to be completed within a reasonable time.
- (AA) "Commercial bakery" means an establishment that is primarily engaged in manufacturing fresh or frozen bread, bread-type rolls and dry bakery products (e.g. biscuits, crackers, and cookies). This definition does not include establishments that produce bakery products primarily for direct sale on the premises to household consumers.

(BB) "Complete", in reference to an application for a permit, means that the application contains all the information necessary for processing the application. Designating an application complete for purposes of permit processing does not preclude the director from requesting or accepting any additional information.

(CC) "Construct a major MACT source" means:

- (1) Fabricate, erect, or install at any greenfield site a stationary source or group of stationary sources which is located within a contiguous area and under common control and which emits or has the potential to emit ten tons per year or more of any HAP or twenty-five tons per year or more of any combination of HAPs, or
- (2) Fabricate, erect, or install, at any developed site a new process or production unit which in and of itself emits or has the potential to emit ten tons per year or more of any HAP or twenty-five tons per year or more of any combination of HAPs, unless the process or production unit satisfies the following criteria:
  - (a) All HAPs emitted by the process or production unit that would otherwise be controlled under the requirements of rule 3745-31-28 of the Administrative Code will be controlled by emission control equipment which was previously installed at the same site as the process or production unit;
  - (b) One of the following determinations has been made:
    - (i) The director has determined within a period of five years prior to the fabrication, erection, or installation of the process or production unit that the existing control equipment represented the BACT, LAER, BAT, or MACT based on air toxics rules for the category of pollutants which includes those HAPs to be emitted by the process or production unit; or
    - (ii) The director determines that the control of HAP emissions provided by the existing equipment will be equivalent to that level of control currently achieved by other well-controlled similar sources (i.e., will be equivalent to the level of control that would be provided by a current BACT, LAER, BAT, or air toxic MACT determination);
  - (c) The director determines that the per cent control efficiency for emissions of HAPs from all sources to be controlled by the existing control equipment will be equivalent to the per cent control efficiency provided by the control equipment prior to the inclusion of the new process or production unit;
  - (d) The director has provided notice and an opportunity for public comment concerning its determination that criteria in paragraphs (CC)(2)(a), (CC)(2)(b), and (CC)(2)(c) of this rule apply and concerning the continued

adequacy of any prior LAER, BACT, BAT, or air toxic MACT determination;

- (e) If any commenter has asserted that a prior LAER, BACT, BAT, or air toxic MACT determination is no longer adequate, the director has determined that the level of control required by that prior determination remains adequate; and
  - (f) Any emission limitations, work practice requirements, or other terms and conditions upon which the above determinations by the permitting authority are predicated, will be construed as applicable requirements under Section 504(a) of the Clean Air Act and either have been incorporated into any existing Title V permit for the affected facility or will be incorporated into such permit upon issuance.
- (DD) "Construction" means any physical change or change in the method of operation (including fabrication, erection, installation, demolition or modification of an emissions unit) that would result in a change in emissions.
- (EE) "Continuous emissions monitoring system" or "CEMS" means all of the equipment that may be required to meet the data acquisition and availability requirements of this chapter, to sample, condition (if applicable), analyze, and provide a record of emissions on a continuous basis.
- (FF) "Continuous emissions rate monitoring system" or "CERMS" means the total equipment required for the determination and recording of the pollutant mass emission rate (in terms of mass per unit of time).
- (GG) "Continuous parameter monitoring system" or "CPMS" means all of the equipment necessary to meet the data acquisition and availability requirements of this chapter, to monitor process and control device operational parameters (for example, control device secondary voltages and electric currents) and other information (for example, gas flow rate, oxygen or carbon dioxide concentrations), and to record average operational parameter value(s) on a continuous basis.
- (HH) "Control technology" means measures, processes, methods, systems, or techniques, to limit the emission of HAPs including, but not limited to, measures that:
- (1) Reduce the quantity of, or eliminate emissions of, such pollutants through process changes, substitution of materials or other modifications;
  - (2) Enclose systems or processes to eliminate emissions;
  - (3) Collect, capture, or treat such pollutants when released from a process, stack, storage or fugitive emissions point;

- (4) Are design, equipment, work practice, or operational standards (including requirements for operator training or certification) as provided in 42 USC 7412(h); or
- (5) Are a combination of paragraphs (HH)(1) to (HH)(4) of this rule.
- (II) "Criteria pollutant" means particulate matter, nitrogen oxides, VOCs, sulfur dioxide, carbon monoxide, lead or any other air pollutant for which a national ambient air quality standard has been promulgated under Section 109 of the Clean Air Act.
- (JJ) "Digital printing (direct-to-media printing) line" means a printing line where the transfer of electronic files occurs directly from the computer to an electronically driven output device that prints the image directly on the selected media (substrate). Electronic images and four-color process images can be printed virtually any size.
- (KK) "Distillate oil" means a petroleum product designated as number one fuel oil, number two fuel oil (with less than or equal to 0.5 per cent by weight sulfur), diesel fuel or kerosene by the "American Petroleum Institute".
- (LL) "Electric utility steam generating unit" means any steam electric generating unit that is constructed for the purpose of supplying more than one-third of its potential electric output capacity and more than twenty-five megawatt electrical output to any utility power distribution system for sale. Any steam supplied to a steam distribution system for the purpose of providing steam to a steam-electric generator that would produce electrical energy for sale is also considered in determining the electrical energy output capacity of the affected facility.
- (MM) "Emissions unit" means any part of a stationary source that emits or would have the potential to emit any regulated NSR pollutant and includes an electric utility steam generating unit. Air contaminant sources that do not emit or would not have the potential to emit any regulated NSR pollutant but which emit a pollutant regulated under state law are not considered emissions units. There are two types of emissions units:
- (1) A "new emissions unit" means any emissions unit which is (or will be) newly constructed and which has existed for less than two years from the date such emissions unit first operated.
  - (2) An "existing emissions unit" means any emissions unit that does not meet the requirements in paragraph (MM)(1) of this rule. A replacement unit, as defined in this rule, is an existing emissions unit.
- (NN) "Express permit-to-install" or "express PTIO" means a registration status permit-to-install or registration status PTIO that is registered for express processing and issuance pursuant to paragraph (G) of rule 3745-31-05 of the Administrative Code and pursuant to the division (A) of section 3704.037 of the Revised Code.

- (OO) "Facility" means all of the air contaminant sources that belong to the same industrial grouping, are located on one or more contiguous or adjacent properties, and are under the control of the same person (or persons under common control) except the activities of any vessel and those emissions resulting directly from an internal combustion engine for transportation purposes or from a non-road engine or non-road vehicle as defined in Section 216 of the Clean Air Act. Air contaminant sources shall be considered as part of the same industrial grouping if they belong to the same major group (i.e., they have the same two-digit code) as described in the "Standard Industrial Classification Manual."
- (PP) "Federal land manager" means, with respect to any lands in the United States, the secretary of the department with authority over such lands.
- (QQ) "Federally enforceable" means all limitations and conditions that are enforceable by the administrator (of the United States environmental protection agency), including those requirements developed pursuant to 40 CFR Parts 60, 61 and 63, requirements within the Ohio state implementation plan that implements the requirements of the Clean Air Act, any permit requirements designated as federally enforceable established pursuant to 40 CFR 52.21 or under regulations approved pursuant to 40 CFR Part 51, Subpart I, including operating permit requirements designated as federally enforceable issued under an United States environmental protection agency-approved program that is incorporated into the Ohio state implementation plan and expressly requires adherence to any permit issued under such program.
- (RR) "Fountain solution additives" means volatile and non-volatile chemicals, alcohols, and other additives, which are blended with water to form the fountain solution used in the lithographic printing process.
- (SS) "Fugitive emissions" means those emissions that cannot reasonably pass through a stack, chimney, vent or other functionally equivalent opening.
- (TT) "General permit" means a general permit-to-install or a general PTIO.
- (UU) "General permit-to-install" or "general PTIO" means a permit-to-install or PTIO issued under rule 3745-31-29 of the Administrative Code.
- (VV) "Greenfield site" means a contiguous area under common control that is an undeveloped site.
- (WW) "Hazardous air pollutant" or "HAP" means any air pollutant listed in, or pursuant to, Section 112(b) of the Clean Air Act.
- (XX) "High terrain" means any area having an elevation of nine hundred feet or more above the base of the stack of a stationary source.

(YY) "Indian governing body" means the governing body of any tribe, band, or group of Indians subject to the jurisdiction of the United States and recognized by the United States as possessing power of self-government.

(ZZ) "Indian reservation" means any federally recognized reservation established by treaty, agreement, executive order, or act of congress.

(AAA) "Innovative control technology" means any system of air pollution control that has not been adequately demonstrated in practice, but would have a substantial likelihood of achieving greater continuous emission reduction than any control system in current practice or of achieving at least comparable reductions at lower cost in terms of energy, economics or non air quality environmental impacts.

(BBB) "Install" or "installation" means to begin actual construction, erect, locate or affix any air contaminant source.

(CCC) "Job" means the total area or areas to be refinished or repainted on an automobile or light duty truck by an auto body refinishing facility.

(DDD) "Letterpress printing line" means a printing process where the image area is raised relative to the non-image area and the paste ink is transferred to the paper directly from the image surface without the use of an anilox roller.

(EEE) "List of source categories" means the source category list required by Section 112(c) of the Clean Air Act.

(FFF) "Low terrain" means any area other than high terrain.

(GGG) "Lowest achievable emission rate" or "LAER", for any emissions unit, means the more stringent rate of emissions based on the following:

- (1) The most stringent emission limitation that is contained in the implementation plan of any state for such class or category of emissions unit, unless the owner or operator of the proposed emissions unit demonstrates that such limitations are not achievable; or
- (2) The most stringent emission limitation that is achieved in practice by such class or category of emissions unit. This limitation, when applied to a major modification, means LAER for the new or modified emissions units within the stationary source. In no event shall the application of this term permit a proposed new or modified emissions unit to emit any air pollutant in excess of the amount allowable under applicable new source standards of performance.

(HHH) "MACT determination" means any combination of emission limitations, work practices, raw material specifications, throughput limitations, source design

characteristics, and air pollution control devices that achieve the level of HAP control required by paragraph (E) of rule 3745-31-28 of the Administrative Code.

(III) "Major MACT source" means any process or production unit that in and of itself has the potential to emit ten tons per year or more of any single HAP or twenty-five tons per year or more of any combination of HAPs.

(JJJ) "Major modification" means:

Any physical change in or change in the method of operation of a major stationary source that would result in:

- (1) A significant emissions increase of a regulated NSR pollutant; and
- (2) A significant net emissions increase of that pollutant from the major stationary source.

[Comment: Except as otherwise provided in rules 3745-31-31 and 3745-31-32 of the Administrative Code, and consistent with the definition of major modification, a NSR project is a major modification for a regulated NSR pollutant if it causes two types of emissions increases; a significant emissions increase and a significant net emissions increase. The NSR project is not a major modification if it does not cause a significant emissions increase. If the NSR project causes a significant emissions increase, then the NSR project is a major modification only if it also results in a significant net emissions increase.]

- (3) Any significant emissions increase from any emissions units or net emissions increase at a major stationary source that is considered significant for VOCs shall be considered significant for ozone.
- (4) The procedure for calculating (before beginning actual construction) whether a significant emissions increase (i.e., the first step of the process) will occur depends upon the type of emissions units being modified, according to paragraphs (JJJ)(4)(a) to (JJJ)(4)(c) of this rule. The procedure for calculating (before beginning actual construction) whether a significant net emissions increase will occur at the major stationary source (i.e., the second step of the process) is contained in paragraph (TTT) of this rule. Regardless of any such preconstruction projections, a major modification results if the NSR project causes a significant emissions increase and a significant net emissions increase.
  - (a) Actual-to-projected-actual applicability test for NSR projects that only involve existing emissions units.

A significant emissions increase of a regulated NSR pollutant is projected to occur if the sum of the difference between the projected actual emissions

and the baseline actual emissions, for each existing emissions unit, equals or exceeds the significant amount for that pollutant.

- (b) Actual-to-potential test for NSR projects that only involve construction of a new emissions unit(s).

A significant emissions increase of a regulated NSR pollutant is projected to occur if the sum of the difference between the potential to emit from each new emissions unit following completion of the NSR project and the baseline actual emissions of these emissions units before the NSR project equals or exceeds the significant amount for that pollutant.

- (c) Hybrid test for NSR projects that involve multiple types of emissions units.

A significant emissions increase of a regulated NSR pollutant is projected to occur if the sum of the emissions increases for each emissions unit, using the method specified in paragraphs (JJJ)(4)(a) to (JJJ)(4)(b) of this rule as applicable with respect to each emissions unit, for each type of emissions unit equals or exceeds the significant amount for that pollutant.

- (5) A physical change or change in the method of operation shall not include:

- (a) Routine maintenance, routine repair, and routine replacement;
- (b) Use of an alternative fuel or raw material by reason of an order under Section 2(A) and (B) of the Energy Supply and Environmental Coordination Act of 1974 (or any superseding legislation) or by reason of a natural gas curtailment plan pursuant to the Federal Power Act;
- (c) Use of an alternative fuel by reason of an order or rule under Section 125 of the Clean Air Act;
- (d) Use of an alternative fuel at a steam generating unit to the extent that the fuel is generated from municipal solid waste;
- (e) Use of an alternative fuel or raw material by a stationary source that:
- (i) For nonattainment NSR purposes, the stationary source was capable of accommodating before December 21, 1976, unless such change would be prohibited under any federally enforceable permit condition that was established after December 21, 1976, pursuant to 40 CFR 52.21 or under regulations approved pursuant to 40 CFR Part 51, Subpart I or 40 CFR 51.166; or
- (ii) For PSD purposes, the stationary source was capable of accommodating before January 6, 1975, unless such change would be prohibited under

any federally enforceable permit condition that was established after January 6, 1975, pursuant to 40 CFR 52.21 or under regulations approved pursuant to 40 CFR Part 51, Subpart I or 40 CFR 51.166; or

- (iii) The stationary source is approved to use under any effective and applicable nonattainment NSR permit or PSD permit;
- (f) An increase in the hours of operation or in the production rate, unless such change is prohibited under any federally enforceable permit condition that was established after:
- (i) For nonattainment NSR purposes, December 21, 1976 pursuant to 40 CFR 52.21 or under regulations approved pursuant to 40 CFR Part 51, Subpart I or 40 CFR 51.166; or
  - (ii) For PSD purposes, January 6, 1975 pursuant to 40 CFR 52.21 or under regulations approved pursuant to 40 CFR Part 51, Subpart I or 40 CFR 51.166.
- (g) Any change in ownership at a stationary source;
- (h) The installation, operation, cessation, or removal of a temporary clean coal technology demonstration project, provided that the temporary clean coal technology demonstration project complies with:
- (i) The Ohio state implementation plan, and
  - (ii) Other requirements necessary to attain and maintain the national ambient air quality standard during the temporary clean coal technology demonstration project and after it is terminated.
- (i) For PSD purposes only, the installation or operation of a permanent clean coal technology demonstration project that constitutes repowering, provided that the project does not result in an increase in the potential to emit of any regulated pollutant emitted by the unit. This exemption shall apply on a pollutant-by-pollutant basis.
- (j) For PSD purposes only, the reactivation of a very clean coal-fired electric utility steam generating unit.
- (6) This definition shall not apply with respect to a particular regulated NSR pollutant when the major stationary source is complying with the requirements under rule 3745-31-32 of the Administrative Code for a PAL for that pollutant. Instead, the definition under paragraph (HHHH) of this rule shall apply.

(KKK) "Major source baseline date" means:

- (1) In the case of a particulate matter and sulfur dioxide, January 6, 1975, and
- (2) In the case of nitrogen dioxide, February 8, 1988.
- (3) The baseline date is established for each pollutant for which increments or other equivalent measures have been established if:
  - (a) The area in which the proposed source or modification would construct is designated as attainment or unclassifiable under Section 107(d)(1)(D) or (E) of the Clean Air Act for the pollutant on the date of its complete application under 40 CFR 52.21 or the requirements of rules 3745-31-11 to 3745-31-20 of the Administrative Code; and
  - (b) In the case of a major stationary source, the pollutant would be emitted in significant amounts, or in the case of a major modification, there would be a significant net emissions increase of the pollutant.

(LLL) "Major stationary source" means any stationary source or any group of stationary sources that are described in paragraphs (LLL)(1) or (LLL)(2) of this rule except as restricted under paragraphs (LLL)(3) to (LLL)(5) of this rule.

- (1) For stationary sources located in a nonattainment area for a given regulated air pollutant:

Any stationary source of air pollutants that emits, or has the potential to emit one hundred tons per year or more of the given regulated NSR pollutant, or
- (2) For stationary sources located in an attainment area for a given regulated air pollutant:
  - (a) Any of the following stationary sources of air pollutants that emits, or has the potential to emit, one hundred tons per year or more of any regulated NSR pollutant:
    - (i) Fossil fuel-fired steam electric plants of more than two hundred fifty million British thermal units per hour heat input;
    - (ii) Coal cleaning plants (with thermal dryers);
    - (iii) Kraft pulp mills;
    - (iv) Portland cement plants;
    - (v) Primary zinc smelters;

- (vi) Iron and steel mill plants;
- (vii) Primary aluminum ore reduction plants;
- (viii) Primary copper smelters;
- (ix) Municipal incinerators capable of charging more than two hundred fifty tons of refuse per day;
- (x) Hydrofluoric, sulfuric or nitric acid plants;
- (xi) Petroleum refineries;
- (xii) Lime plants;
- (xiii) Phosphate rock processing plants;
- (xiv) Coke oven batteries;
- (xv) Sulfur recovery plants;
- (xvi) Carbon black plants (furnace process);
- (xvii) Primary lead smelters;
- (xviii) Fuel conversion plants;
- (xix) Sintering plants;
- (xx) Secondary metal production plants;
- (xxi) Chemical process plants except for ethanol production facilities that produce ethanol by natural fermentation included in NAICS codes 325193 or 312140;
- (xxii) Fossil fuel boilers (or combinations thereof) totaling more than two hundred fifty million British thermal units per hour heat input;
- (xxiii) Petroleum storage and transfer units with a total storage capacity exceeding three hundred thousand barrels;
- (xxiv) Taconite ore processing plants;
- (xxv) Glass fiber processing plants; and
- (xxvi) Charcoal production plants, or

- (b) Notwithstanding the stationary source size specified in paragraph (LLL)(2)(a) of this rule, any stationary source that emits, or has the potential to emit, two hundred fifty tons per year or more of any regulated NSR pollutant.
- (3) A major stationary source that is major for VOCs shall be considered major for ozone.
- (4) The fugitive emissions of a stationary source to the extent quantifiable shall not be included in determining for any of the purposes of this rule whether it is a major stationary source, unless the stationary source belongs to one of the following categories of stationary sources:
  - (a) Coal cleaning plants (with thermal dryers);
  - (b) Kraft pulp mills;
  - (c) Portland cement plants;
  - (d) Primary zinc smelters;
  - (e) Iron and steel mills;
  - (f) Primary aluminum ore reduction plants;
  - (g) Primary copper smelters;
  - (h) Municipal incinerators capable of charging more than two hundred fifty tons of refuse per day;
  - (i) Hydrofluoric, sulfuric, or nitric acid plants;
  - (j) Petroleum refineries;
  - (k) Lime plants;
  - (l) Phosphate rock processing plants;
  - (m) Coke oven batteries;
  - (n) Sulfur recovery plants;
  - (o) Carbon black plants (furnace process);
  - (p) Primary lead smelters;

- (q) Fuel conversion plants;
  - (r) Sintering plants;
  - (s) Secondary metal production plants;
  - (t) Chemical process plants except for ethanol production facilities that produce ethanol by natural fermentation included in NAICS codes 325193 or 312140;
  - (u) Fossil-fuel boilers (or combination thereof) totaling more than two hundred fifty million British thermal units per hour heat input;
  - (v) Petroleum storage and transfer units with a total storage capacity exceeding three hundred thousand barrels;
  - (w) Taconite ore processing plants;
  - (x) Glass fiber processing plants;
  - (y) Charcoal production plants;
  - (z) Fossil fuel-fired steam electric plants of more than two hundred fifty million British thermal units per hour heat input;
  - (aa) Any other stationary source category which, as of August 7, 1980, is being regulated under Section 111 or 112 of the Clean Air Act.
- (5) Any physical change that would occur at a stationary source not qualifying under paragraph (LLL) of this rule as a major stationary source would be considered a major stationary source, if the change would constitute a major stationary source by itself.
- (MMM) "Maximum achievable control technology emission limitation for new sources" or "MACT emission limitation for new sources" means the emission limitation which is not less stringent than the emission limitation achieved in practice by the best controlled similar source, and which reflects the maximum degree of reduction in emissions that the director, taking into consideration the cost of achieving such emission reduction, and any non-air quality health and environmental impacts and energy requirements, determines is achievable by the constructed or reconstructed major MACT source.
- (NNN) "Maximum uncontrolled emissions" (only used for express permit-to-install or express PTIO processing ) means the amount of emissions from the air contaminant source in tons per year calculated at the maximum operating capacity of the air

contaminant source based upon operating eight thousand seven hundred sixty hours per year in the absence of control equipment.

(OOO) "Minor source baseline date" means the earliest date after the trigger date on which a major stationary source or a major modification subject to 40 CFR 52.21 or the requirements of rules 3745-31-11 to 3745-31-20 of the Administrative Code submits a complete application under the relevant regulations. The trigger date is:

- (1) In the case of a particulate matter and sulfur dioxide, August 7, 1977; and
- (2) In the case of nitrogen dioxide, February 8, 1988.
- (3) The baseline date is established for each pollutant for which increments or other equivalent measures have been established if:
  - (a) The area in which the proposed source or modification would construct is designated as attainment or unclassifiable under Section 107(d)(1)(D) or (E) of the Clean Air Act for the pollutant on the date of its complete application under 40 CFR 52.21 or the requirements of rules 3745-31-11 to 3745-31-20 of the Administrative Code; and
  - (b) In the case of a major stationary source, the pollutant would be emitted in significant amounts, or in the case of a major modification, there would be a significant net emissions increase of the pollutant.
- (4) Any minor source baseline date established originally for the TSP increments shall remain in effect and shall apply for purposes of determining the amount of available PM10 increments, except that the director may rescind any such minor source baseline date where it can be shown, to the satisfaction of the director, that the emissions increase from the major stationary source, or the net emissions increase from the major modification, responsible for triggering that date did not result in a significant amount of PM10 emissions.

(PPP) "Model general permit" means a document that the director has developed that includes a definition of a category of air contaminant source, a description of the qualifications that must be met for that category of source and model terms and conditions that will be used as a general permit for any qualified air contaminant source.

(QQQ) "Modify" or "modification" means:

- (1) Any physical change in, or change in the method of operation of:
  - (a) Any air contaminant source that:
    - (i) Results in an increase in the allowable emissions; or

- (ii) Results in an increase in emissions of greater than the de minimis levels in rule 3745-15-05 of the Administrative Code of any type of air contaminant not previously emitted; or
  - (iii) Results in the relocation of the air contaminant source to a new facility, including, but not limited to, the movement of any existing air contaminant source from another state, county, or other geographic location; or
  - (iv) Is otherwise defined as a major modification, or is defined as a modification under applicable regulations promulgated by the administrator of the United States environmental protection agency regarding new source performance standards or national emission standards for hazardous pollutants, or is either a new source or a reconstruction under applicable rules promulgated by the administrator under Section 112 of the Clean Air Act.
  - (v) 'Modify' or 'modification' shall not include routine maintenance, routine repair, and routine replacement; use of an alternate fuel or raw material that the source is capable of accommodating and is not expressly prohibited from using under any permit condition or applicable requirement of the Clean Air Act; an increase in the hours of operation or in the production rate that is not expressly prohibited under any permit condition or applicable requirement of the Ohio environmental protection agency or the Clean Air Act.
  - (vi) 'Modify' or 'modification' shall not include pollution control or pollution prevention projects that the director has determined, in writing, are environmentally beneficial. Environmentally beneficial projects do not include those that cause or contribute to a violation of a national ambient air quality standard, cause or contribute to a violation of an increment per paragraph (B) of rule 3745-31-11 of the Administrative Code, adversely impact a visibility limitation, or are expressly prohibited under any Ohio environmental protection agency or Clean Air Act permit condition or applicable requirement.
  - (vii) 'Modify' or 'modification' shall not include allowable emission increases due to an alternative emission limit that satisfies the criteria set forth in division (E) of section 3704.03 of the Revised Code and is consistent with division (K) of section 3704.036 of the Revised Code.
- (b) Any significant air contaminant source project that, for the specific air contaminant or air contaminants for which the air contaminant source project is classified as a significant air contaminant source project, results in an increase in the ambient air quality impact of the air contaminant

source project greater than the following levels as determined by atmospheric dispersion modeling or by another method acceptable to the director:

- (i) Carbon monoxide - five hundred seventy-five  $\mu\text{g}/\text{m}^3$ , eight-hour average;
- (ii) Nitrogen dioxide - fourteen  $\mu\text{g}/\text{m}^3$ , twenty-four hour average;
- (iii) Total suspended particulate - ten  $\mu\text{g}/\text{m}^3$ , twenty-four hour average;
- (iv) Sulfur dioxide - fifteen  $\mu\text{g}/\text{m}^3$ , twenty-four hour average;
- (v) Lead - 0.1  $\mu\text{g}/\text{m}^3$ , twenty-four hour average; or

(RRR) "Municipal solid waste landfill" or "MSW landfill" means, as defined under paragraph (B)(14) of rule 3745-76-01 of the Administrative Code, an entire disposal facility in a contiguous geographical space where municipal solid waste is placed and regulated in accordance with Chapters 3745-27 and 3745-37 of the Administrative Code and excludes scrap tire monofills. A MSW landfill may also receive other types of Resource Conservation and Recovery Act (RCRA) Subtitle D wastes (rule 3745-50-10 of the Administrative Code) such as commercial solid waste, nonhazardous sludge, and industrial solid waste. Portions of a MSW landfill may be separated by access roads. A MSW landfill may be publicly or privately owned. A MSW landfill may be a new MSW landfill or existing MSW landfill.

(SSS) "Necessary pre-construction approvals or permits" means those permits or approvals required under federal air pollution control laws and regulations and those air pollution control laws and regulations that are part of the federally approved Ohio state implementation plan.

(TTT) "Net emissions increase" means, with respect to any regulated NSR pollutant emitted by a major stationary source, the amount by which the sum of the following, except as limited by paragraph (TTT)(3) of this rule, exceeds zero:

- (1) Any increase in emissions from a particular physical change or change in the method of operation at a stationary source as calculated under this rule; and
- (2) Any other increases and decreases in actual emissions at the stationary source that are contemporaneous with the particular change and are otherwise creditable. Baseline actual emissions for calculating increases and decreases under paragraph (TTT) of this rule shall be determined as provided in paragraph (O) of this rule, except that paragraphs (O)(1)(c) and (O)(2)(d) of this rule shall not apply.
- (3) The following subparagraphs limit paragraphs (TTT)(1) and (TTT)(2) of this rule:

- (a) An increase or decrease in actual emissions is contemporaneous with the increase from the particular change only if it occurs between the date five years before construction on the particular change commences and the date that the increase from the particular change occurs;
- (b) An increase or decrease in actual emissions is creditable only if the director has not relied on it in issuing a permit for the stationary source under regulations approved pursuant to this rule, which permit is in effect when the increase in actual emissions from the particular change occurs;
- (c) For PSD purposes only, an increase or decrease in actual emissions of sulfur dioxide, nitrogen oxide, or particulate matter that occurs before the applicable minor source baseline date is creditable only if it is required to be considered in calculating the amount of maximum allowable increases remaining available. Only PM10 emissions shall be used to evaluate the net emissions increase for PM10;
- (d) An increase in actual emissions is creditable only to the extent that the new level of actual emissions exceeds the old level;
- (e) A decrease in actual emissions is creditable only to the extent that:
  - (i) The old level of actual emissions or the old level of allowable emissions, whichever is lower, exceeds the new level of actual emissions;
  - (ii) It is enforceable as a practical matter at and after the time that actual construction on the particular change begins;
  - (iii) It has approximately the same qualitative significance for public health and welfare as that attributed to the increase from the particular change;
  - (iv) For nonattainment NSR purposes only, the director has not relied on it in issuing any permit under regulations pursuant to 40 CFR Part 51, Subpart I or the director has not relied on it in demonstrating attainment or reasonable further progress;
- (f) An increase that results from a physical change at a stationary source occurs when the emissions unit on which construction occurred becomes operational and begins to emit a particular air pollutant. Any replacement unit that requires shakedown becomes operational only after a reasonable shakedown period, not to exceed one hundred eighty days; and
- (g) Paragraph (C)(1) of this rule shall not apply for determining creditable increases and decreases or after a change.

- (UUU) "New source" means any air contaminant source for which an owner or operator undertakes a continuing program of installation or modification or enters into a binding contractual obligation to undertake and complete, within a reasonable time, a continuing program of installation or modification, after January 1, 1974, and that at the time of installation or modification, would have otherwise been subject to the provisions of this chapter. The replacement of an entire air contaminant source is considered a new source.
- (VVV) "New source review project" or "NSR project" means a physical change in, or change in the method of operation of, an existing major stationary source.
- (WWW) "Nonattainment" or "nonattainment area," for a given pollutant, for purposes of determining applicability of Chapter 3745-31 of the Administrative Code, means that the area has been designated as nonattainment in 40 CFR 81.336.
- (XXX) "Nonattainment new source review permit" or "nonattainment NSR permit" means any permit that is issued under a major source preconstruction permit program that has been approved by the administrator and incorporated into a plan to implement the requirements of 40 CFR 51.165, or a program that implements 40 CFR Part 51, Appendix S, Sections I through VI.
- (YYY) "Non-heatset" means an offset lithographic printing process where the printing inks dry by oxidation and absorption without the use of heat. For the purposes of this chapter, ultraviolet-cured (UV) and electron beam-cured inks employed in an offset lithographic printing process are considered non-heatset.
- (ZZZ) "Non-methane organic compound" or "NMOC" has the same meaning as found in paragraph (B)(16) of rule 3745-76-01 of the Administrative Code.
- (AAAA) "Non-road engine" means, as defined under 40 CFR 89.2:
- (1) Except as discussed in paragraph (AAAA)(2) of this rule, a non-road engine is any internal combustion engine:
    - (a) In or on a piece of equipment that is self-propelled or serves a dual purpose by both propelling itself and performing another function (such as garden tractors, off-highway mobile cranes and bulldozers); or
    - (b) In or on a piece of equipment that is intended to be propelled while performing its function (such as lawnmowers and string trimmers); or
    - (c) That, by itself or in or on a piece of equipment, is portable or transportable, meaning designed to be and capable of being carried or moved from one location to another. Indicia of transportability include, but are not limited to, wheels, skids, carrying handles, dolly, trailer, or platform.

(2) An engine is not a non-road engine if:

- (a) The engine is used to propel a motor vehicle or a vehicle used solely for competition, or is subject to standards promulgated under Section 202 of the Clean Air Act; or
- (b) The engine is regulated by a federal new source performance standard promulgated under Section 111 of the Clean Air Act; or
- (c) The engine otherwise included in paragraph (AAAA)(1)(c) of this rule remains or will remain at a location for more than twelve consecutive months or a shorter period of time for an engine located at a seasonal source. A location is any single site at a building, structure, facility, or installation. Any engine (or engines) that replaces an engine at a location and that is intended to perform the same or similar function as the engine replaced will be included in calculating the consecutive time period. An engine located at a seasonal source is an engine that remains at a seasonal source during the full annual operating period of the seasonal source. A seasonal source is a stationary source that remains in a single location on a permanent basis (i.e., at least two years) and that operates at that single location approximately three months (or more) each year. This paragraph does not apply to an engine after the engine is removed from the location; or
- (d) Engines used in aircraft as defined in 40 CFR 87.1(a); or
- (e) Engines used in underground mining or engines used in underground mining equipment and regulated by the "Mining Safety and Health Administration" (MSHA) in 30 CFR Parts 7, 36, 56, 57, 70, and 75; or
- (f) Engines subject to the standards of 40 CFR Part 92 (engines exempted from the requirements of 40 CFR Part 92 under 40 CFR 92.907 are subject to the requirements of 40 CFR Part 89); or
- (g) Engines used in marine vessels as defined in 1 USC 3, if those engines have a rated power at or above thirty-seven kilowatts; or
- (h) Engines with a per cylinder displacement of less than fifty cubic centimeters.

(BBBB) "Ohio state implementation plan" means the plan submitted by the state of Ohio to, and approved by, the United States environmental protection agency in response to Section 110 of the Clean Air Act.

(CCCC) "Organic compounds" or "OC" means any chemical compound containing carbon, excluding carbon monoxide, carbon dioxide, carbonic acid, metallic

carbides, metallic carbonates, ammonium carbonate, non landfill gas methane and ethane.

(DDDD) "PAL allowable emissions" means allowable emissions as defined in this rule, except as this definition is modified under this paragraph.

- (1) The allowable emissions for any emissions unit shall be calculated considering any emission limitations that are enforceable as a practical matter on the emissions unit's potential to emit.
- (2) An emissions unit's potential to emit shall be determined using the definition in paragraph (VVVV) of this rule, except that the words or enforceable as a practical matter should be added after federally enforceable.

(EEEE) "PAL effective date" generally means the date of issuance of the PAL permit. However, the PAL effective date for an increased PAL is the date any emissions unit, which is part of the PAL major modification, becomes operational and begins to emit the PAL pollutant.

(FFFF) "PAL effective period" means the period beginning with the PAL effective date and ending ten years later.

(GGGG) "PAL major emissions unit" means:

- (1) Any emissions unit that emits or has the potential to emit one hundred tons per year or more of the PAL pollutant in an attainment area; or
- (2) Any emissions unit that emits or has the potential to emit the PAL pollutant in an amount that is equal to or greater than the major source threshold for the PAL pollutant as defined by the Clean Air Act for nonattainment areas. For example, in accordance with the definition of major stationary source in Section 182(c) of the Clean Air Act, an emissions unit would be a PAL major emissions unit for VOC if the emissions unit is located in a serious ozone nonattainment area and it emits or has the potential to emit fifty or more tons of VOC per year.

(HHHH) "PAL major modification" means, notwithstanding this rule (the definitions for major modification and net emissions increase), any physical change in or change in the method of operation of the PAL source that causes it to emit the PAL pollutant at a level equal to or greater than the PAL.

(IIII) "PAL permit" means the permit-to-install issued by the director that establishes, incorporates or modifies a PAL for a major stationary source.

(JJJJ) "PAL pollutant" means the pollutant for which a PAL is established at a major stationary source.

- (KKKK) "PAL significant emissions unit" means an emissions unit that emits or has the potential to emit a PAL pollutant in an amount that is equal to or greater than the significant level as defined in this rule or in the Clean Air Act whichever is lower for that PAL pollutant, but less than the amount that would qualify the unit as a PAL major emissions unit as defined in this rule.
- (LLLL) "PAL small emissions unit" means an emissions unit that emits or has the potential to emit the PAL pollutant in an amount less than the significant level for that PAL pollutant, as defined in this rule or in the Clean Air Act, whichever is lower.
- (MMMM) "Particulate matter" shall have the same meaning as found in rule 3745-17-01 of the Administrative Code.
- (NNNN) "Particulate matter emissions" shall have the same meaning as found in rule 3745-17-01 of the Administrative Code.
- (OOOO) "Person" means the federal government or any agency thereof, the state or any agency thereof, any political subdivision, or any agency thereof, or any public or private corporation, individual, partnership, or other entity.
- (PPPP) "Plantwide applicability limitation" or "PAL" means an emission limitation expressed in tons per year, for a pollutant at a major stationary source, that is enforceable as a practical matter and established source-wide in accordance with paragraphs (A)(1) to (A)(13) of rule 3745-31-32 of the Administrative Code.
- (QQQQ) "PM10" means particulate matter with an aerodynamic diameter less than or equal to a nominal ten micrometers as measured by a reference method based on 40 CFR Part 50, Appendix J and designated in accordance with 40 CFR Part 53 or an equivalent method designated in 40 CFR Part 53.
- (RRRR) "PM10 emissions" means finely divided solid or liquid material, with an aerodynamic diameter less than or equal to a nominal ten micrometers that is or has been emitted to the ambient air as measured by an applicable reference method, or an equivalent or alternative method, specified in 40 CFR Part 51, Appendix M.
- (SSSS) Reserved.
- (TTTT) "Pollution prevention" means any activity that through process changes, product reformulation or redesign, or substitution of less polluting raw materials, eliminates or reduces the release of air pollutants (including fugitive emissions) and other pollutants to the environment prior to recycling, treatment, or disposal; it does not mean recycling (other than certain in-process recycling practices), energy recovery, treatment, or disposal.

(UUUU) "Portable source" means an air contaminant source that, in the director's judgment, is specifically designed to be transferred to a new site as needs warrant.

(VVVV) "Potential to emit" means the maximum capacity of an emissions unit or stationary source to emit an air pollutant under its physical and operational design. Any physical or operational limitation on the capacity of the emissions unit or stationary source to emit an air pollutant, which includes any federally regulated air pollutant as defined in paragraph (DD) of rule 3745-77-01 of the Administrative Code, including air pollution control equipment and restrictions on hours of operation or on the type or amount of material combusted, stored or processed, shall be treated as part of its design if the limitation or the effect it would have on emissions is federally enforceable or legally and practicably enforceable by the state. Secondary emissions do not count in determining the potential to emit of a stationary source.

(WWWW) "Predictive emissions monitoring system" or "PEMS" means all of the equipment necessary to monitor process and control device operational parameters (for example, control device secondary voltages and electric currents) and other information (for example, gas flow rate, oxygen or carbon dioxide concentrations), and calculate and record the mass emission rate (for example, pounds per hour) on a continuous basis.

(XXXX) "Prevention of significant deterioration increment" or "PSD increment" means an allowable increment specified in paragraph (B) of rule 3745-31-11 of the Administrative Code.

(YYYY) "Prevention of significant deterioration permit" or "PSD permit" means any permit that is issued under a major source preconstruction permit program that has been approved by the administrator and incorporated into the plan to implement the requirements of 40 CFR 51.166, or under the program in 40 CFR 52.21.

(ZZZZ) "Process or production unit" means any collection of structures and/or equipment that processes, assembles, applies, or otherwise uses material inputs to produce or store an intermediate or final product. A single facility may contain more than one process or production unit.

[Comment: The definition of a process or production unit can be determined by the intermediate product of a process. For example, at a plant which manufactures fiberglass reinforced plastic boats, the owners wish to add more spray guns to an existing fabrication line to supplement existing spray guns in laminating a particular model of boat hulls. The new spray guns will have a potential to emit greater than ten tons per year of a single HAP. In this example, the fiberglass hull of a boat is an intermediate product in the manufacture of a final product (a boat). The collection of equipment needed to manufacture the intermediate product includes the new spray guns, the existing spray guns, the laminating operation, and other supporting equipment. Because the new spray guns in and of themselves do not produce the

intermediate product, they are not in and of themselves a process or production unit, and therefore are not subject to review under rule 3745-31-28 of the Administrative Code. Other examples of the applicability of this definition are found at 61 Fed. Reg. 68391-68392 (December 27, 1996).]

(AAAAA) "Projected actual emissions" means, the maximum annual rate, in tons per year, at which an existing emissions unit is projected to emit a regulated NSR pollutant in any one of the five years (twelve-month period) following the date the emissions unit resumes regular operation after the NSR project, or in any one of the ten years following that date, if the NSR project involves increasing the emissions unit's design capacity or its potential to emit of that regulated NSR pollutant and full utilization of the emissions unit would result in a significant emissions increase or a significant net emissions increase at the major stationary source.

(1) In determining the projected actual emissions under this rule before beginning actual construction, the owner or operator of the major stationary source:

(a) Shall consider all relevant information, including but not limited to, historical operational data, the company's own representations, the company's expected business activity and the company's highest projections of business activity, the company's filings with the state or federal regulatory authorities, and compliance plans under the approved plan; and

(b) Shall include fugitive emissions to the extent quantifiable, and emissions associated with startups, shutdowns, and malfunctions; and

(c) Shall exclude, in calculating any increase in emissions that results from the particular NSR project, that portion of the emissions unit's emissions following the NSR project that an existing emissions unit could have accommodated during the consecutive twenty-four-month period used to establish the baseline actual emissions under paragraph (O) of this rule and that are also unrelated to the particular NSR project, including any increased utilization due to product demand growth; or,

(d) In lieu of using the method set out in paragraphs (AAAAA)(1)(a) to (AAAAA)(1)(c) of this rule, may elect to use the emissions unit's potential to emit, in tons per year, as defined under paragraph (VVVV) of this rule.

(BBBBB) "PTIO" or "permit-to-install and operate" means a permit-to-install and a permit-to-operate applicable to air contaminant sources not located at facilities subject to Chapter 3745-77 of the Administrative Code.

(CCCCC) "Reactivation of a very clean coal-fired electric utility steam generating unit" means any physical change or change in the method of operation associated with the commencement of commercial operations by a coal-fired utility unit after a period of discontinued operation where the unit:

- (1) Has not been in operation for the two-year period prior to the enactment of the Clean Air Act Amendments of 1990, and the emissions from such unit continue to be carried in the permitting authority's emission inventory at the time of enactment;
  - (2) Was equipped prior to shutdown with a continuous system of emission control that achieves a removal efficiency for sulfur dioxide of no less than eighty-five per cent and a removal efficiency for particulates of no less than ninety-eight per cent;
  - (3) Is equipped with low-NO<sub>x</sub> burners prior to the time of commencement of operations following reactivation; and
  - (4) Is otherwise in compliance with the requirements of the Clean Air Act.
- (DDDDD) "Reconstruct a major MACT source" means the replacement of components at an existing process or production unit that in and of itself emits or has the potential to emit ten tons per year or more of any HAP or twenty-five tons per year or more of any combination of HAPs, whenever:
- (1) The fixed capital cost of the new components exceeds fifty per cent of the fixed capital cost that would be required to construct a comparable process or production unit; and
  - (2) It is technically and economically feasible for the reconstructed major source to meet the applicable MACT emission limitation for new sources established under rule 3745-31-28 of the Administrative Code.
- (EEEEEE) "Reduced sulfur compounds" or "RSC" means, as defined under 40 CFR Part 60, Subpart J, the sum of the sulfur compounds hydrogen sulfide, carbonyl sulfide and carbon disulfide.
- (FFFFF) "Regulated NSR pollutant" means the following:
- (1) For stationary sources located in a nonattainment area for a given regulated air pollutant:
    - (a) Nitrogen oxides or any VOCs;
    - (b) Any pollutant for which a national ambient air quality standard has been promulgated; or
    - (c) Any pollutant that is a constituent or precursor of a general pollutant listed under paragraphs (FFFFF)(1)(a) or (FFFFF)(1)(b) of this rule, provided that

a constituent or precursor pollutant may only be regulated under NSR as part of regulation of the general pollutant.

- (2) For stationary sources located in an attainment area for a given regulated air pollutant:
  - (a) Any pollutant for which a national ambient air quality standard has been promulgated and any constituents or precursors for such pollutants identified by the administrator (e.g., VOCs are precursors for ozone);
  - (b) Any pollutant that is subject to any standard promulgated under Section 111 of the Clean Air Act;
  - (c) Any Class I or II substance subject to a standard promulgated under or established by Title VI of the Clean Air Act; or
  - (d) Any pollutant that otherwise is subject to regulation under the Clean Air Act; except that any or all HAPs either listed in Section 112 of the Clean Air Act or added to the list pursuant to Section 112(b)(2) of the Clean Air Act, which have not been delisted pursuant to Section 112(b)(3) of the Clean Air Act, are not regulated NSR pollutants unless the listed HAP is also regulated as a constituent or precursor of a general pollutant listed under Section 108 of the Clean Air Act.

(GGGGG) "Replacement unit" means an emissions unit for which all the criteria listed under this paragraph are met. No creditable emission reductions shall be generated from shutting down the existing emissions unit that is replaced.

- (1) The emissions unit is a reconstructed unit within the meaning of 40 CFR 60.15(b)(1), or the emissions unit completely takes the place of an existing emissions unit.
- (2) The emissions unit is identical to or functionally equivalent to the replaced emissions unit.
- (3) The replacement does not alter the basic design parameters of the process unit.
- (4) The replaced emissions unit is permanently removed from the major stationary source, otherwise permanently disabled, or permanently barred from operation by a permit that is enforceable as a practical matter. If the replaced emissions unit is brought back into operation, it shall constitute a new emissions unit.

(HHHHH) "Repowering" means:

- (1) Replacement of an existing coal-fired boiler with one of the following clean coal technologies: atmospheric or pressurized fluidized bed combustion, integrated

gasification combined cycle, magnetohydrodynamics, direct and indirect coal-fired turbines, integrated gasification fuel cells, or as determined by the administrator, in consultation with the secretary of energy, a derivative of one or more of these technologies, and any other technology capable of controlling multiple combustion emissions simultaneously with improved boiler or generation efficiency and with significantly greater waste reduction relative to the performance of technology in widespread commercial use as of November 15, 1990.

- (2) Repowering shall also include any oil and/or gas-fired unit which has been awarded clean coal technology demonstration funding as of January 1, 1991, by the department of energy.
- (3) The director shall give expedited consideration to permit applications for any source that satisfies the requirements of this rule and is granted an extension under Section 409 of the Clean Air Act.

(IIII) "Research and development activity" means an activity conducted at a research or laboratory facility whose primary purpose is to conduct research and development into new processes and products, where such a source is operated under the close supervision of technically trained personnel and is not engaged in the manufacture of products for sale or exchange for commercial profit, except in a de minimis manner.

(JJJJ) "Screen printing line" means a printing process where the printing ink passes through a web or a fabric to which a refined form of stencil has been applied. The stencil openings determine the form and dimensions of the imprint.

(KKKKK) "Secondary emissions" means emissions that occur as a result of the construction or operation of a major stationary source or major modification, but do not come from the major stationary source or major modification itself. For the purpose of this rule, secondary emissions must be specific, well defined, quantifiable, and impact the same general areas as the stationary source or major modification that causes the secondary emissions. Secondary emissions include emissions from any off-site support operation that would not be constructed or increase their emissions except as a result of the construction or operation of the major stationary source or major modification. Secondary emissions do not include any emissions that come directly from a mobile source, such as emissions from the tailpipe of a motor vehicle, from a train or from a vessel.

(LLLLL) "Significant air contaminant source" or "significant air contaminant source project" means any air contaminant source, or air contaminant source project, that emits:

- (1) Greater than one hundred tons per year of any of the following air contaminants:

- (a) Particulate matter; or

- (b) Sulfur dioxide; or
- (c) Nitrogen oxides; or
- (d) OCs; or
- (2) Greater than one thousand tons per year of carbon monoxide; or
- (3) Greater than two tons per year of lead.

(MMMMM)

- (1) "Significant" means, in reference to a net emissions increase or the potential of a stationary source to emit any of the following air pollutants, a rate of emissions that would equal or exceed any of the following rates:

--

<u>Air Pollutant</u>	<u>Emission Rate (Ton/Yr)</u>
<u>Carbon monoxide</u>	<u>100</u>
<u>Nitrogen oxides</u>	<u>40</u>
<u>Sulfur dioxide</u>	<u>40</u>
<u>Particulate matter</u>	<u>25</u>
<u>Particulate matter less than ten microns</u>	<u>15</u>
<u>Ozone (VOCs)</u>	<u>40</u>
<u>Lead</u>	<u>0.6</u>
<u>Fluorides (excluding hydrogen fluoride)</u>	<u>3</u>
<u>Sulfuric acid mist</u>	<u>7</u>
<u>Hydrogen sulfide</u>	<u>10</u>
<u>TRS</u>	<u>10</u>
<u>RSCs</u>	<u>10</u>
<u>NMOCs from municipal waste landfills</u>	<u>50</u>

- (a) Municipal waste combustor organic (measured as total tetra- through octa-chlorinated dibenzo-p-dioxins and dibenzofurans): 3.2 grams per year (0.007055 pounds per year).
- (b) Municipal waste combustor metals (measured as particulate matter): fourteen megagrams per year (fifteen tons per year).
- (c) Municipal waste combustor acid gases (measured as sulfur dioxide and hydrogen chloride): thirty-six megagrams per year (forty tons per year).
- (2) "Significant", in reference to a net emissions increase or the potential of a stationary source to emit a regulated NSR pollutant that the air pollutant and

emission rate table in paragraph (MMMMM)(1) of this rule does not list, any emission rate.

- (3) Notwithstanding paragraph (MMMMM)(1) of this rule, "significant" means any emission rate or any net emissions increase associated with a major stationary source or major modification that would be constructed within ten kilometers of a Class I area, and have an impact on such area equal to or greater than one microgram per cubic meter (twenty-four hour average).

(NNNNN) "Significant emissions increase" means, for a regulated NSR pollutant, an increase in emissions that is significant, as defined in this rule, for that pollutant.

(OOOOO) "Similar source" means a stationary source or process that has comparable emissions and is structurally similar in design and capacity to a constructed or reconstructed major MACT source such that the source could be controlled using the same control technology.

(PPPPP) "Soil-liquid extraction remediation activities" means soil remediation activities that use a process for physically separating (extracting) groundwater from soils contaminated with low levels of organic species or other pollutants that are moderately soluble in an aqueous phase using a trench dug around or along side the contaminated soil perpendicular to the groundwater's down gradient flow direction. The contaminated groundwater is collected in the trench and transferred out of the trench for further treatment to separate the soluble contaminants from the water and to destroy the contaminants in an air pollution control system.

(QQQQQ) "Soil-vapor extraction remediation activities" means soil remediation activities that use a process for physically separating (extracting) contaminants that are VOCs and semivolatile organic compounds from unsaturated soils by placing a porous tube (or tubes) under vacuum in the contaminated soil, and when a vacuum is drawn on the tube, vapor and some groundwater are drawn into the tube. The vapors collected through the vacuum system are then sent to an air pollution control system to destroy the organic contaminants.

(RRRRR) "Stationary source" means all of the emissions units that belong to the same industrial grouping, are located on one or more contiguous or adjacent properties, and are under the control of the same person (or persons under common control) except the activities of any vessel and those emissions resulting directly from an internal combustion engine for transportation purposes or from a non-road engine or non-road vehicle as defined in Section 216 of the Clean Air Act. Emissions units shall be considered as part of the same industrial grouping if they belong to the same major group (i.e., that have the same two-digit code) as described in the "Standard Industrial Classification Manual."

(SSSSS) "Temporary clean coal technology demonstration project" means a clean coal technology demonstration project that is operated for a period of five years or less,

and which complies with the state implementation plan for the state in which the clean coal technology demonstration project is located and other requirements necessary to attain and maintain the national ambient air quality standards during the clean coal technology demonstration project and after it is terminated.

(TTTTT) "Temporary source" means any new source of air contaminants or modification of an air contaminant source, that is subject to a written declaration by the operator to the director that the air contaminant source will cease operation, be relocated, or obtain a new permanent permit-to-install within two years of the draft of declaration.

(UUUUU) "Title I modification" means any modification under Section 111 or 112 of the Clean Air Act and any major modification under Parts C or D of Title I of the Clean Air Act.

(VVVVV) "Total reduced sulfur" or "TRS" means, as defined under paragraph (L) of rule 3745-73-01 of the Administrative Code, the sum of the sulfur compounds hydrogen sulfide, methyl mercaptan, dimethyl sulfide and dimethyl disulfide, that are measured by methods specified in rule 3745-73-04 of the Administrative Code.

(WWWWW) " $\mu\text{g}/\text{m}^3$ " or " $\mu\text{g}/\text{cm}$ " means microgram per cubic meter.

(XXXXX) "Volatile organic compounds" or "VOC" shall have the same meaning as defined in rule 3745-21-01 of the Administrative Code.

(YYYYY) "Water-based ink/coating/adhesive" means an ink, coating or adhesive with a VOC content less than or equal to ten per cent by weight as applied.

(ZZZZZ) "Water-borne" means a material in which the water content of the volatile fraction is at least ninety-five per cent by weight.

(AAAAA) Incorporation by reference. This chapter includes references to certain matter or materials. The text of the incorporated materials is not included in the regulations contained in this chapter. The materials are hereby made a part of the regulations in this chapter. For materials subject to change, only the specific version specified in the regulation are incorporated. Material is incorporated as it exists on the effective date of this rule. Except for subsequent annual publication of existing (unmodified) Code of Federal Regulation compilations, any amendment or revision to a referenced document is not incorporated unless and until this rule has been amended to specify the new dates.

(1) Availability. The materials incorporated by reference are available as follows:

- (a) Aerometric information retrieval system (AIRS). Information can be obtained by writing to: "Air Facility System (OECA), Office of Enforcement and Compliance Assurance, 1200 Pennsylvania Ave. NW, mail code 2222A, Washington, D.C. 20460-0001," by calling 1-800-367-

1044, or by visiting their web site at [http://www.epa.gov/enviro/html/airs/airs\\_query.html](http://www.epa.gov/enviro/html/airs/airs_query.html).

- (b) California air resources board (CARB) certification. Information and copies of executive orders, approval letters, equipment advisories, and equivalent test procedures may be obtained by writing to: "California Air Resources Board, Monitoring and Laboratory Division, P.O. Box 2815, Sacramento, CA, 95812-2815" or by calling (916) 327-0900. The full text of all CARB certification documents are also available in electronic format at <http://www.arb.ca.gov/vapor/vapor.htm>.
- (c) Chemical abstract service (CAS). Information can be obtained by writing to: "Chemical Abstract Service, 2540 Olentangy River Road, Columbus, Ohio, 43202," or by visiting their web site at [www.cas.org](http://www.cas.org).
- (d) Chemical rubber company (CRC) handbook of chemistry and physics. Information and copies may be obtained by writing to "CRC Press LLC, 2000 NW Corporate Blvd., Boca Raton, Florida, 33431", by calling 1-800-272-7737, or at [www.crcpress.com](http://www.crcpress.com). A copy of this book is also available for inspection and copying at most public libraries and "The State Library of Ohio."
- (e) Clean Air Act. Information and copies may be obtained by writing to: "Superintendent of Documents, Attn: New Orders, PO Box 371954, Pittsburgh, PA 15250-7954." The full text of the Act as amended in 1990 is also available in electronic format at [www.epa.gov/oar/caa/](http://www.epa.gov/oar/caa/). A copy of the Act is also available for inspection and copying at most public libraries and "The State Library of Ohio."
- (f) Code of Federal Regulations (CFR). Information and copies may be obtained by writing to: "Superintendent of Documents, Attn: New Orders, PO Box 371954, Pittsburgh, PA 15250-7954." The full text of the CFR is also available in electronic format at <http://www.gpoaccess.gov/cfr/index.html>. The CFR compilations are also available for inspection and copying at most public libraries and "The State Library of Ohio."
- (g) Compilation of air pollutant emission factors, AP-42. Information and copies may be obtained by writing to: "Superintendent of Documents, Attn: New Orders, PO Box 371954, Pittsburgh, PA 15250-7954." The full text of the compilation of air pollutant emission factors, AP-42, is also available in electronic format at <http://www.epa.gov/ttn/chief/ap42/index.html>. The compilation of air pollutant emission factors, AP-42, are also available for inspection and copying at most public libraries and "The State Library of Ohio."
- (h) Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). Information and copies may be obtained by writing to:

"Superintendent of Documents, Attn: New Orders, PO Box 371954, Pittsburgh, PA 15250-7954." The full text of the Act is also available in electronic format at <http://www4.law.cornell.edu/uscode/42/ch103.html>. A copy of the Act is also available for inspection and copying at most public libraries and "The State Library of Ohio."

- (i) Control technology center. Information can be obtained by writing to: "Research Triangle Institute, Research Triangle Park, NC, 27709," by calling 1-919-541-2734, or by visiting their web site at <http://www.epa.gov/etv/centers/center5.html>.
- (j) Federal Power Act. Information and copies may be obtained by writing to: "Superintendent of Documents, Attn: New Orders, PO Box 371954, Pittsburgh, PA 15250-7954." The full text of the Act is also available in electronic format at <http://www.hemplinglaw.com/cases/fpa.htm>. A copy of the Act is also available for inspection and copying at most public libraries and "The State Library of Ohio."
- (k) Federal Register. Information and copies may be obtained by writing to: "Superintendent of Documents, Attn: New Orders, PO Box 371954, Pittsburgh, PA 15250-7954." Online access to the Federal Register is available at <http://www.gpoaccess.gov/nara/index.html>. A copy of the Federal Register is also available for inspection and copying at most public libraries and "The State Library of Ohio."
- (l) Great lakes binational toxics strategy. Information can be obtained by writing to: "U.S. Environmental Protection Agency, Great Lakes National Program Office, 77 W. Jackson Boulevard (G-17J), Chicago, Illinois, 60604-3511," by calling 1-312-353-2117, or by visiting their web site at <http://www.epa.gov/grtlakes/bns/>.
- (m) Integrated risk management system (IRIS). Information can be obtained by writing to: "IRIS Hotline, c/o EPA Docket Center, Mail Code 28221T, EPA-West Building, 1301 Constitution Avenue NW, Washington, DC 20005," by calling 1-202-566-1676, or by visiting their web site at <http://www.epa.gov/iris/index.html>.
- (n) North American industry classification system (NAICS). Information and copies may be obtained by contacting the National Technical Information Service at 1-800-553-6847. The codes are also available in electronic format at [www.census.gov/epcd/www/naics.html](http://www.census.gov/epcd/www/naics.html).
- (o) Recommended policy on control of volatile organic compounds. Information and copies of the federal register notice may be obtained by writing to: "Superintendent of Documents, Attention: New Orders, PO Box 371954, Pittsburgh, PA 15250-7954." The federal register notice is also

available for inspection and copying at most public libraries and "The State Library of Ohio."

- (p) Resource Conservation and Recovery Act (RCRA). Information and copies may be obtained by writing to: "Superintendent of Documents, Attn: New Orders, PO Box 371954, Pittsburgh, PA 15250-7954." The full text of the Act is also available in electronic format at <http://www.epa.gov/epaoswer/osw/laws-reg.htm>. A copy of the Act is also available for inspection and copying at most public libraries and "The State Library of Ohio."
- (q) Standard industrial classification manual (SICM). Information and copies may be ordered by writing to: "U.S. Department of Commerce, Technology Administration, National Technical Information Service, Springfield, Virginia, 22161" or by calling 1-800-553-6847. A copy of the Act is also available for inspection and copying at most public libraries and "The State Library of Ohio."
- (r) United States Code (USC). Information and copies may be obtained by writing to: "Superintendent of Documents, Attn: New Orders, PO Box 371954, Pittsburgh, PA 15250-7954." The full text of the United States Code is also available in electronic format at <http://www4.law.cornell.edu/uscode/>. The U.S.C compilations are also available for inspection and copying at most public libraries and "The State Library of Ohio."

(2) Incorporated materials:

- (a) 1 USC 3; "General Provisions, "Vessel" as including all means of water transportation;" published January 19, 2004 in Supplement III of the 2000 Edition of the United States Code.
- (b) 30 CFR Part 7; "Testing by Applicant or Third Party;" as published in the July 1, 2007 Code of Federal Regulations.
- (c) 30 CFR Part 36; "Approval Requirements for Permissible Mobile Diesel-Powered Transportation Equipment;" as published in the July 1, 2007 Code of Federal Regulations.
- (d) 30 CFR Part 56; "Safety and Health Standards--Surface Metal and Nonmetal Mines;" as published in the July 1, 2007 Code of Federal Regulations.
- (e) 30 CFR Part 57; "Safety and Health Standards--Underground Metal and Nonmetal Mines;" as published in the July 1, 2007 Code of Federal Regulations.

- (f) 30 CFR Part 70; "Mandatory Health Standards--Underground Coal Mines;" as published in the July 1, 2007 Code of Federal Regulations.
- (g) 30 CFR Part 75; "Mandatory Safety Standards--Underground Coal Mines;" as published in the July 1, 2007 Code of Federal Regulations.
- (h) 40 CFR 51.165; "Permit requirements;" 51 FR 40669, Nov. 7, 1986, as amended at 52 FR 24713, July 1, 1987; 52 FR 29386, Aug 7, 1987; 54 FR 27285, 27299 June 28, 1989; 57 FR 3946, Feb. 3, 1992; 57 FR 32334, July 21, 1992; 67 FR 80244, Dec. 31, 2002; 68 FR 63027, Nov. 7, 2003; 69 FR 40275, July 1, 2004.
- (i) 40 CFR 51.166; "Requirements for Preparation, Adoption, and Submittal of Implementation Plans, Prevention of significant deterioration of air quality;" as published in the July 1, 2007 Code of Federal Regulations.
- (j) 40 CFR 52.21; "Approval and Promulgation of Implementation Plans, Prevention of significant deterioration of air quality;" as published in the July 1, 2007 Code of Federal Regulations.
- (k) 40 CFR 60.15(b)(1); "Standards of Performance for New Stationary Sources - Reconstruction;" 40 FR 58420, Dec. 16, 1975.
- (l) 40 CFR 60.111b; "Standards of Performance for Volatile Organic Liquid Storage Vessels (Including Petroleum Liquid Storage Vessels) for Which Construction, Reconstruction, or Modification Commenced After July 23, 1984 - Definitions;" 52 FR 11429, Apr. 8, 1987, as amended at 54 FR 32973, Aug. 11, 1989; 65 FR 61756, Oct. 17, 2000; 68 FR 59333, Oct. 15, 2003.
- (m) 40 CFR 60.671; "Standards of Performance for Nonmetallic Mineral Processing Plants - Definitions;" 51 FR 31337, Aug. 1, 1985, as amended at 62 FR 31359, June 9, 1997.
- (n) 40 CFR 81.336; "Designation of Area for Air Quality Planning Purposes-Ohio;" as published in the July 1, 2007 Code of Federal Regulations.
- (o) 40 CFR 87.1(a); "Control of Air Pollution From Aircraft and Aircraft Engines, Definitions;" 47 FR 58470, Dec. 30, 1982, as amended at 49 FR 31875, Aug. 9, 1984; 62 FR 25365, May 8, 1997.
- (p) 40 CFR 89.2; "Control of Emissions From New and In-Use Nonroad Compression-Ignition Engines, Definitions;" 59 FR 31335, June 17, 1994, as amended at 61 FR 52102, Oct. 4, 1996; 63 FR 18998, Apr. 16, 1998; 63 FR 56996, Oct. 23, 1998; 65 FR 73331, Dec. 29, 1999; 67 FR 68339, Nov. 8, 2002; 69 FR 39212, June 29, 2004.

- (q) 40 CFR 92.907; "Control of Air Pollution From Locomotives and Locomotive Engines, Non-locomotive-specific engine exemption;" 63 FR 18998, Apr. 16, 1998; as amended at 70 FR 40457, July 13, 2005.
- (r) 40 CFR Part 50, Appendix J; "Reference Method for the Determination of Particulate Matter as PM10 in the Atmosphere;" 36 FR 22384, Nov. 25, 1971; 52 FR 24664, July 1, 1987; 52 FR 29467, Aug. 7, 1987.
- (s) 40 CFR Part 51; "Requirements for preparation, adoption, and submittal of implementation plans;" as published in the July 1, 2007 Code of Federal Regulations.
- (t) 40 CFR Part 51, Appendix M; "Recommended Test Methods for State Implementation Plans;" 36 FR 22398, Nov. 25, 1971; 55 FR 14249, Apr. 17, 1990; 55 FR 24687, June 18, 1990, as amended at 55 FR 37606, Sept. 12, 1990; 56 FR 6278, Feb. 15, 1991; 56 FR 65435, Dec. 17, 1991; 60 FR 28054, May 30, 1995; 62 FR 32502, June 16, 1997.
- (u) 40 CFR Part 51, Appendix S, Sections I through VI; "Emission Offset Interpretive Ruling;" 36 FR 22398, Nov. 25, 1971; 44 FR 3282, Jan. 16, 1979, as amended at 45 FR 31311, May 13, 1980; 45 FR 52741, Aug. 7, 1980; 45 FR 59879, Sept. 11, 1980; 46 FR 50771, Oct. 14, 1981; 47 FR 27561, June 25, 1982; 49 FR 43210, Oct. 26, 1984; 51 FR 40661, 40675, Nov. 7, 1986; 52 FR 24714, July 1, 1987; 52 FR 29386, Aug 7, 1987; 54 FR 27285, 27299, June 28, 1989; 57 FR 3946, Feb. 3, 1992.
- (v) 40 CFR Part 51, Appendix W; "Guideline on Air Quality Models;" 68 FR 18448, Apr. 15, 2003.
- (w) 40 CFR Part 51, Subpart I; "Requirements for Preparation, Adoption, and Submittal of Implementation Plans, Subpart I -- Review of New Sources and Modifications;" as published in the July 1, 2007 Code of Federal Regulations.
- (x) 40 CFR Part 52; "Approval and promulgation of implementation plans;" as published in the July 1, 2007 Code of Federal Regulations.
- (y) 40 CFR Part 53; "Ambient Air Monitoring Reference and Equivalent Methods;" as published in the July 1, 2007 Code of Federal Regulations.
- (z) 40 CFR Part 58, Appendix B; "Quality Assurance Requirements for Prevention of Significant Deterioration (PSD) Air Monitoring;" 44 FR 27571, May 10, 1979; 44 FR 65070, Nov. 9, 1979; 44 FR 72592, Dec.14, 1979, as amended at 46 FR 44168, Sept. 3, 1981; 48 FR 2530, Jan.20, 1983;

51 FR 9596, Mar. 19, 1986; 52 FR 24741, July 1, 1987; 59 FR 41628, 41629, Aug. 12, 1994; 60 FR 52321, Oct. 6, 1995.

- (aa) 40 CFR Part 60; "Standards of Performance for New Stationary Sources;" as published in the July 1, 2007 Code of Federal Regulations.
- (bb) 40 CFR Part 60, Appendix A; "Test Methods - Standards of Performance for New Stationary Sources;" as published in the July 1, 2007 Code of Federal Regulations.
- (cc) 40 CFR Part 60, Appendix B; "Performance Specifications;" 48 FR 13327, Mar. 30, 1983 and 48 FR 23611, May 25, 1983, as amended at 48 FR 32986, July 20, 1983; 51 FR 31701, Aug. 5, 1985; 52 FR 17556, May 11, 1987; 52 FR 30675, Aug. 18, 1987; 52 FR 34650, Sept. 14, 1987; 53 FR 7515, Mar. 9, 1988; 53 FR 41335, Oct. 21, 1988; 55 FR 18876, May 7, 1990; 55 FR 40178, Oct. 2, 1990; 55 FR 47474, Nov. 14, 1990; 56 FR 5526, Feb. 11, 1991; 59 FR 64593, Dec. 15, 1994; 64 FR 53032, Sept. 30, 1999; 65 FR 62130, 62144, Oct. 17, 2000; 65 FR 48920, Aug. 10, 2000; 69 FR 1802, Jan. 12, 2004; 70 FR 28673, May 18, 2005.
- (dd) 40 CFR Part 60, Subpart I; "Standards of Performance for Hot Mix Asphalt Facilities;" 39 FR 9314, Mar. 8, 1974, as amended at 40 FR 46259, Oct. 6, 1975; 42 FR 37936, July 25, 1977; 51 FR 12325, Apr. 10, 1986; 54 FR 6667, Feb. 14, 1989.
- (ee) 40 CFR Part 60, Subpart J; "Standards of Performance for Petroleum Refineries;" 39 FR 9315, Mar. 8, 1974, as amended at 40 FR 46259, Oct. 6, 1975; 42 FR 32427, June 24, 1977; 42 FR 39389, Aug. 4, 1977; 43 FR 10868, Feb. 15, 1978; 43 FR 10868-10869, Mar. 15, 1978; 44 FR 13481, Mar. 12, 1979; 44 FR 61543, Oct. 25, 1979; 45 FR 79453, Dec. 1, 1980; 48 FR 23611, May 25, 1983; 50 FR 31701, Aug. 5, 1985; 51 FR 42842, Nov. 26, 1986; 52 FR 20392, June 1, 1987; 53 FR 41333, Oct. 21, 1988; 54 FR 34026-340310, Aug. 17, 1989; 55 FR 40175-40176, 40178, Oct. 2, 1990; 56 FR 4176, Feb. 4, 1991; 64 FR 7465-7466, Feb. 12, 1999; 65 FR 61753-61755, Oct. 17, 2000.
- (ff) 40 CFR, Part 60, Subpart Dc; "Standards of Performance for Small Industrial-Commercial-Institutional Steam Generating Units;" 55 FR 37683, Sept. 12, 1990, as amended at 61 FR 20736, May 8, 1996; 64 FR 7465, Feb. 12, 1999; 65 FR 61752, Oct. 17, 2000; 65 FR 61753, Oct. 17, 2000.
- (gg) 40 CFR Part 60, Subpart AAA; "Standards of Performance for New Residential Wood Heaters;" 53 FR 5873-5874, Feb. 26, 1988, as amended at 53 FR 12009, Apr. 12, 1988; 53 FR 14889, Apr. 26, 1988; 57 FR 5328, Feb. 13, 1992; 60 FR 33925, June 29, 1995; 53 FR 5873, Feb. 26, 1988; 63

FR 64874, Nov. 24, 1998; 64 FR 7466, Feb. 12, 1999; 65 FR 61763-61764, Oct. 17, 2000.

- (hh) 40 CFR Part 60, Subpart OOO; "Standards of Performance for Nonmetallic Mineral Processing Plants;" 51 FR 31337, Aug. 1, 1985, as amended at 54 FR 6680, Feb. 14, 1989; 62 FR 31359-31360, June 9, 1997; 65 FR 61778, Oct. 17, 2000.
- (ii) 40 CFR Part 61; "National Emission Standards for Hazardous Air Pollutants;" as published in the July 1, 2007 Code of Federal Regulations.
- (jj) 40 CFR Part 61, Subpart M; "National Emission Standard for Asbestos;" 49 FR 13661, Apr. 5, 1984 as amended by 49 FR 25453, June 21, 1984; 51 FR 8199, Mar. 10, 1986; 53 FR 36972, Sept. 23, 1988; 55 FR 48414, 48416, 48419, 48424, 48429-48433, Nov. 20, 1990; 56 FR 1669, Jan. 16, 1991; 55 FR 48424, Nov. 20, 1991; 60 FR 31920, June 19, 1995; 64 FR 7467, Feb. 12, 1999; 68 FR 54793, Sept. 18, 2003; 69 FR 43324, July 20, 2004.
- (kk) 40 CFR Part 63; "National Emission Standards for Hazardous Air Pollutants for Source Categories;" as published in the July 1, 2007 Code of Federal Regulations.
- (ll) 40 CFR Part 89; "Control of Emissions From New and In-Use Nonroad Compression-Ignition Engines;" as published in the July 1, 2007 Code of Federal Regulations.
- (mm) 40 CFR Part 92; "Control of Air Pollution From Locomotives and Locomotive Engines;" as published in the July 1, 2007 Code of Federal Regulations.
- (nn) 42 USC 7401 to 7671q; "The Public Health and Welfare-Air Pollution Prevention and Control;" published January 19, 2004 in Supplement III of the 2000 Edition of the United States Code; as amended January 23, 2004, Pub. L. 108-199, sec, 425(a) and sec. 428(b), 118 Stat. 417-418.
- (oo) 42 USC 7410; "State implementation plans for national primary and secondary ambient air quality standards;" published January 19, 2004 in Supplement III of the 2000 Edition of the United States Code.
- (pp) 42 USC 7412(h); "Hazardous air pollutants, Work practice standards and other requirements;" published January 19, 2004 in Supplement III of the 2000 Edition of the United States Code.
- (qq) "Chemical Rubber Company (CRC) Handbook of Chemistry and Physics," 85th Edition, 2004-2005.

- (rr) Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA) Section 121(e); contained in 42 USC 9621; "Cleanup standards;" published January 19, 2004 in Supplement III of the 2000 Edition of the United States Code.
- (ss) Federal Power Act; contained in 16 USC 791 to 828c; "Federal Regulation and Development of Power;" published January 19, 2004 in Supplement III of the 2000 Edition of the United States Code.

3745-31-02      **Applicability, requirements, and obligations.**

[Comment: For dates of non-regulatory government publications, publications of recognized organizations and associations, federal rules, and federal statutory provisions referenced in this rule, see the "Incorporation by Reference" section at the end of rule 3745-31-01 of the Administrative Code.]

This chapter provides requirements for installation, modification and operation of new and existing air contaminant sources at facilities that are not subject to Chapter 3745-77 of the Administrative Code. This chapter also provides requirements for installation and modification of air contaminant sources at facilities that are, or will be, subject to Chapter 3745-77 of the Administrative Code. The operating requirements for air contaminant sources, defined as Title V sources, can be found in Chapter 3745-77 of the Administrative Code.

[Comment: Prior to the effective date of this rule, requirements for permits-to-operate for sources not subject to Chapter 3745-77 of the Administrative Code were contained in Chapter 3745-35 of the Administrative Code. Upon the effective date of this rule, Chapter 3745-35 was rescinded and all operating requirements for sources at facilities not subject to Chapter 3745-77 of the Administrative Code were incorporated into this chapter. Rules 3745-31-01 to 3745-31-07 of the Administrative Code provide regulatory requirements for installation and modification for all sources. Rules 3745-31-01 to 3745-31-07 of the Administrative Code also provide regulatory requirements for operation of sources at facilities not subject to Chapter 3745-77 of the Administrative Code. Rule 3745-31-08 of the Administrative Code provides the on-going regulatory requirements for sources at facilities not subject to Chapter 3745-77 of the Administrative Code that previously received registration status for permit-to-operate purposes under the now rescinded Chapter 3745-35 of the Administrative Code. Updated requirements for registration status, now defined as express permit-to-install or express PTIOs, are incorporated into rule 3745-31-05 of the Administrative Code. Rule 3745-31-09 of the Administrative Code provides for operation or other use of an air contaminant source that emits any air pollutant under a variance. This provision was previously established in the now rescinded rule 3745-35-03 of the Administrative Code. Rule 3745-31-29 of the Administrative Code provides for general permits-to-install and general PTIOs. Rule 3745-31-33 of the Administrative Code identifies activities that are included and excluded from meaning of begin actual construction, as defined in rule 3745-31-01 of the Administrative Code. The remaining rules in this chapter, rules 3745-31-10 to 3745-31-28 and rules 3745-31-30 to 3745-31-32 of the Administrative Code, provide additional regulatory requirements for installation and modification of air contaminant sources that are located at a major stationary source or are considered major modifications, as defined in rule 3745-31-01 of the Administrative Code. Installation or modification of air contaminant sources that are located at a major stationary source or are considered major modifications, are, or will become, subject to Chapter 3745-77 of the Administrative Code. The operating regulatory requirements for these types of sources are contained in Chapter 3745-77 of the Administrative Code.]

(A) Permit-to-install or PTIO

(1) Except as provided in rule 3745-31-03 of the Administrative Code, no person shall cause, permit, or allow the:

- (a) Installation or modification of any new source that is, or will be, part of a facility, as defined in Chapter 3745-77 of the Administrative Code, and that is required to obtain a Title V permit under Chapter 3745-77 of the Administrative Code, without first obtaining a permit-to-install from the director; or
- (b) Installation or modification, and subsequent operation of any new source that is not part of a facility, as defined in Chapter 3745-77 of the Administrative Code, and that is not required to obtain a Title V permit under Chapter 3745-77 of the Administrative Code, without first obtaining a PTIO from the director; or

[Comment: paragraph (A)(1)(b) of this rule is not intended to prohibit any new source, as defined in rule 3745-31-01 of the Administrative Code, currently operating under an effective permit-to-install or permit-to-operate from continuing operation in accordance with those permits. Nor is it intended to prohibit any new source currently operating under an expired permit-to-operate, where a timely and complete application for renewal is pending in accordance with division (C) of section 119.06 of the Revised Code, from continuing operation in accordance with the expired permit-to-operate until such time as a new PTIO is issued or denied.]

- (c) Operation of any air contaminant source, except as provided in rule 3745-31-08 of the Administrative Code, not defined as a new source under rule 3745-31-01 of the Administrative Code, that is not part of a facility, as defined in Chapter 3745-77 of the Administrative Code, and that is not required to obtain a Title V permit under Chapter 3745-77 of the Administrative Code, without first obtaining authority to operate through issuance of a PTIO from the director, which may include:
  - (i) Requirements for equipping the air contaminant source with instrumentation and sensing devices to monitor and record emission data and other information about the operation of the air contaminant source; and
  - (ii) Requirements for performance tests that demonstrate that the source is in compliance with applicable emission limitations and other applicable laws, at the applicant's expense, in accordance with methods prescribed by the Ohio environmental protection agency. The Ohio environmental

protection agency, or its representatives, may observe, participate in, or conduct any performance test required.

- (2) An owner or operator who currently holds a permit-to-install and/or permit-to-operate for an air contaminant source which permit was issued prior to the effective date of this rule, may be issued a PTIO for the same air contaminant source. The director may require the owner or operator of the air contaminant source submit an updated application for the PTIO. Upon final issuance of the PTIO, any permit-to-install and/or permit-to-operate for the air contaminant source will be superseded by the issuance of the PTIO. The superseded permits will terminate and cease to be enforceable.

(B) Changes in applicability: Title V versus non-Title V

This paragraph is applicable to an owner or operator where a change in the air contaminant source, stationary source, or applicable law results in a change in the requirements applicable to the source under this chapter and/or Chapter 3745-77 of the Administrative Code. A change may include, but is not limited to, a modification or major modification as defined in this chapter, a relaxation of a federally enforceable limitation on the potential to emit applicable under paragraph (D) of rule 3745-31-05 of the Administrative Code, or the imposition of a federally enforceable limitation, or limitation legally and practicably enforceable by the state, on the potential to emit that restricts a stationary source's potential to emit below major source thresholds applicable under paragraph (D) of rule 3745-31-05 of the Administrative Code.

- (1) The following is applicable to an owner or operator who holds a permit-to-install, permit-to-operate and/or PTIO where a change subjects the owner or operator to the requirements of Chapter 3745-77 of the Administrative Code.
  - (a) The owner or operator shall submit a Title V permit application and obtain a Title V permit from the director, as required under Chapter 3745-77 of the Administrative Code.
  - (b) If the change is defined as a new source, modification or major modification under this chapter, the owner or operator shall submit the required application and obtain a permit-to-install, as required under this chapter, from the director.
  - (c) Upon final issuance of the permit required under paragraph (B)(1)(a) of this rule, and, if applicable, under paragraph (B)(1)(b) of this rule, any permit-to-operate, and/or any terms and conditions specifically identified in the standard terms and conditions of a PTIO as no longer enforceable under conditions described in paragraph (B)(1) of this rule, will be superseded by the issuance of the Title V permit required under paragraph (B)(1)(a) of this rule, and, if applicable, the permit-to-install required under paragraph

(B)(1)(b) of this rule. All superseded permits-to-operate and specifically superseded terms and conditions of a PTIO, will terminate and cease to be enforceable. As applicable, terms and conditions of any PTIO not superseded will function as the permit-to-install.

(2) The following is applicable to an owner or operator who currently holds a Title V permit where a change eliminates the applicability of Chapter 3745-77 of the Administrative Code but the change does not exempt the owner or operator from requirements to obtain a PTIO.

(a) The owner or operator may submit the required application and obtain a PTIO or Federally Enforceable PTIO (FEPTIO) from the director, as required under this chapter.

Comment: An owner or operator with authority to operate under a Title V permit which subsequently makes a change at the facility that eliminates the applicability of Chapter 3745-77 of the Administrative Code is not obligated to obtain a PTIO or FEPTIO if the owner or operator elects to continue to be permitted under the Title V permit.]

(b) Final issuance of any permit under paragraph (B)(2)(a) of this rule does not release the owner or operator from the requirements contained in Chapter 3745-77 of the Administrative Code or the owner or operator's active Title V permit, except as expressly released in rule, by order of the director, or a in a federally enforceable permit.

(C) Permanent shutdown of an air contaminant source subject to the terms and conditions of a permit-to-install or PTIO

When expressly provided in the terms and conditions of a permit-to-install or PTIO, the owner or operator of an air contaminant source that is permanently shutdown may be relieved from certain requirements in the terms and conditions of the permit-to-install or PTIO, without obtaining a modification or administrative modification, upon meeting the requirements specified in the permit for permanently shutting down air contaminant sources. Those terms and conditions for which the owner or operator is relieved will cease to be enforceable upon meeting the requirements for permanently shutting down air contaminant sources contained in the terms and conditions of the permit.

(D) The director, in his or her discretion, may issue an order requiring any person planning to install or modify, or in the process of installing or modifying, any air contaminant source as defined in rule 3745-31-01 of the Administrative Code, that is otherwise exempted, to obtain a permit-to-install or PTIO, before proceeding with installation or modification, if in the director's judgment, operation of the air contaminant source after installation or modification might result in a violation of the criteria established in paragraph (A) of rule 3745-31-05 of the Administrative Code.

- (E) The director, in his or her discretion or where required to do so by federal laws or regulations, may issue a single permit-to-install or PTIO having application to all pollutants of any kind emanating from any air contaminant source, or issue a single permit-to-install or PTIO having applicability to more than one air contaminant source, controlled by a common owner or operator, located in the same county.
- (F) The approval to construct and/or operate under this chapter shall not relieve any owner or operator of a stationary source of the responsibility to comply fully with applicable provisions of this chapter and any other requirements under local, state or federal law.
- (G) If any provision of this chapter or the application of such provision to any person or circumstance, is held invalid, the remainder of this chapter, or the application of such provision to persons or circumstances other than those as to which it is held invalid, shall not be affected thereby.

3745-31-03      **Exemptions.**

[Comment: For dates of non-regulatory government publications, publications of recognized organizations and associations, federal rules, and federal statutory provisions referenced in this rule, see the "Incorporation by Reference" section at the end of rule 3745-31-01 of the Administrative Code.]

- (A) A permit-to-install or PTIO as required by rule 3745-31-02 of the Administrative Code must be obtained for the installation or modification, and operation of an air contaminant source unless exempted from the requirements as follows:

[Comment: The following exemptions relieve permittees from the obligation to apply for and obtain a permit-to-install or PTIO. They do not, however, exempt any air contaminant source from requirements of the Clean Air Act, including being considered for purposes of determining whether a facility constitutes a major source or is otherwise regulated under Chapter 3745-77 of the Administrative Code or any requirement to identify insignificant activities and emission levels in a Title V permit application. In addition, this rule does not relieve the owner or operator from the requirement of including the emissions associated with the exempt sources into any major NSR permitting action.]

(1) Permanent exemptions

The following exemptions do not apply to emissions units subject to 40 CFR Part 61, the national emission standards for hazardous air pollutants (NESHAPs), with the exception of 40 CFR Part 61, Subpart M, asbestos removal activities; or emissions units subject to 40 CFR Part 63, the NESHAPs for source categories, MACT standards, unless such standard either only requires submission of a notification, and written notification satisfying the MACT notification requirements has been or will be submitted to the Ohio environmental protection agency prior to the notification deadline imposed by the MACT, or such standard does not impose any requirements (i.e., notifications, emissions limits, record keeping, etc.) to the particular emissions unit; or emissions units subject to the new source performance standards (NSPS) with the exception of 40 CFR Part 60, Subpart AAA, residential wood heaters, 40 CFR Part 60, Subpart OOO, nonmetallic mineral processing plants, and 40 CFR Part 60, Subpart I, hotmix asphalt facilities.

- (a) Fossil fuel-fired boilers, preheaters, air heaters, water heaters, or heaters used for other heat exchange media less than ten million British thermal units per hour burning only natural gas, distillate oil (with less than or equal to 0.5 per cent by weight sulfur), or liquid petroleum gas.

- (b) Fossil fuel or wood fuel-fired boilers, preheaters, air heaters, or water heaters less than one million British thermal units per hour except units burning waste fuels or waste oil.
- (c) Fossil fuel-fired furnaces or dryers less than ten million British thermal units per hour and burning only natural gas, distillate oil (with less than or equal to 0.5 per cent by weight sulfur), or liquid petroleum gas and the only emissions are from the products of combustion from fuel and water vapor and where no melting or refining occurs nor where any burning of any material occurs.
- (d) Tumblers used for the cleaning or deburring of metal products without abrasive blasting.
- (e) Equipment used exclusively for the packaging of lubricants or greases, and water-borne adhesives, coatings or binders.
- (f) Equipment used exclusively for the mixing and blending of materials at ambient temperature to make water-borne adhesives, coatings or binders.
- (g) Bakery ovens that bake:
  - (i) Chemically leavened products; or
  - (ii) Yeast dough products and that are not located at a commercial bakery; or
  - (iii) Biscuits, crackers, cookies and other similar nonleavened projects; or
  - (iv) Yeast dough, bread, buns and rolls at a bakery having a total maximum yeast dough, bread, buns and rolls production rate of less than or equal to one thousand pounds per hour.
- (h) Mixers and blenders and deep fat fryers (except deep fat fryers used for large scale production of products) where the products are edible and intended for human consumption.
- (i) Laboratory equipment
  - (i) Laboratory equipment and laboratory fume hoods used exclusively for chemical or physical analyses and bench scale laboratory equipment.
  - (ii) Laboratory paint booths used to prepare samples for chemical or physical analysis where the actual emissions of each laboratory paint booth is less than 3.0 tons of VOC per year and where:

- (a) The owner or operator maintains records, available to the director upon request, detailing that the VOC emissions are less than 3.0 tons of VOC per year, and
  - (b) Any exhaust system that serves only coating spray equipment is supplied with a properly installed and operating particulate control system.
- (j) Photographic process equipment by which an image is reproduced upon material sensitized to radiant energy.
- (k) Equipment used for injection molding of resins where no more than one million pounds of resins (thermoplastic or thermosetting) per rolling twelve-month period are used in injection machines at the facility.
- (l) Storage tanks for:
  - (i) Inorganic liquids including water (at standard temperature and pressure) except as described in paragraph (A)(1)(l)(vii) of this rule; or
  - (ii) Pressurized storage for inorganic compounds or propane, butane, isobutane, and liquid petroleum gases; or
  - (iii) Liquids with a capacity of less than seven hundred gallons; or
  - (iv) Organic liquids with a capacity of less than seventy-five cubic meters (nineteen thousand eight hundred fifteen gallons) and equipped with submerged fill, except gasoline storage tanks located at bulk gasoline plants which are subject to the requirements of paragraph (P) of rule 3745-21-09 of the Administrative Code; or
  - (v) Organic liquids with a capacity greater than or equal to seventy-five cubic meters (nineteen thousand eight hundred fifteen gallons) but less than one hundred fifty-one cubic meters (thirty-nine thousand eight hundred ninety-four gallons) storing a liquid with a maximum true vapor pressure, as defined in 40 CFR 60.111b, of less than 15.0 kilopascals (2.176 pounds per square inch absolute) and equipped with submerged fill; or
  - (vi) Organic liquids with a capacity greater than or equal to one hundred fifty-one cubic meters (thirty-nine thousand eight hundred ninety-four gallons) storing a liquid with a maximum true vapor pressure, as defined in 40 CFR 60.111b, of less than 3.5 kilopascals (0.508 pounds per square inch absolute); or

- (vii) Acids (as defined in the "Chemical Rubber Company (CRC) Handbook of Chemistry and Physics") stored in tanks less than or equal to seven thousand five hundred gallons capacity.
- (m) Compression molding presses used for the curing of plastic products that qualify for the de minimis exemption under rule 3745-15-05 of the Administrative Code. This type of press uses a thermosetting resin and involves a chemical reaction, usually involving heat, that converts the material (e.g., polyesters, polyurethanes, epoxy resins, etc.) to a solid, insoluble state using a hardening or curing operation.
- (n) Presses used exclusively for extruding clay.
- (o) Storage tanks, storage silos, and other farm equipment located on a farm and utilized exclusively for the production of food or grain on the premises.
- (p) The relocation of any portable source in the state of Ohio that meets the following requirements under this paragraph:
  - (i) The company has demonstrated the following:
    - (a) The portable source was installed after January 1, 1974 and continues to comply with any applicable BAT and state or federal air pollution rule or law; and
    - (b) The portable source continues to comply with the currently effective permit-to-install or PTIO or express permit-to-install or express PTIO and/or any applicable permit-to-operate; and
    - (c) The applicant has provided proper notice of intent to relocate the portable source to the director within a minimum of thirty days prior to the scheduled relocation; and
    - (d) The director has issued a notice stating that in the director's judgment, the proposed site is acceptable under rule 3745-15-07 of the Administrative Code, and
    - (e) The director has issued a notice stating that in the director's judgment, relocating the portable source will not result in the installation of a major stationary source or the modification of a major stationary source.

[Comment: Relocation of any portable source that results in the installation of a major stationary source or the modification of a major stationary source must also meet all applicable requirements under this chapter, including the requirement to obtain a permit-to-

install prior to relocation. Relocation of any portable source that results in the creation of a major source, as defined in rule 3745-77-01 of the Administrative Code, must also meet all applicable requirements under the Title V program contained in Chapter 3745-77 of the Administrative Code, which may include the requirement to apply for a Title V permit.]

- (ii) The director has issued a site approval for the new location pursuant to rule 3745-31-05 of the Administrative Code.
- (q) A drycleaning facility constructed between January 1, 1974 and December 31, 1981 in which the annual amounts of fabric drycleaned with perchloroethylene is less than sixty thousand pounds and is not located in Butler, Clermont, Cuyahoga, Franklin, Greene, Hamilton, Lake, Lorain, Lucas, Mahoning, Medina, Montgomery, Portage, Stark, Summit, Trumbull, Warren and Wood counties.
- (r) Noncontinuous solvent recycling or reclaiming units with less than twenty gallons capacity.
- (s) Non-heatset or sheet-fed presses with an OC potential to emit of less than three tons per year.
- (t) An incinerator located at a dwelling designed and used to dispose of residential wastes and having a capacity for serving six or fewer households or units per dwelling.
- (u) Equipment used for spraying or applying insecticides, pesticides and herbicides except at facilities producing these substances or mixtures for sale or distribution.
- (v) Combustors used exclusively for the purpose of research and development of more efficient combustion of coal or more effective prevention of air pollutant emissions from coal combustion, less than ten million British thermal units per hour and an annual average capacity factor of not more than twenty per cent.
- (w) Solvent cold cleaners that meet the provisions of paragraph (O) of rule 3745-21-09 of the Administrative Code and have a liquid surface area less than or equal to ten square feet or a reservoir opening of less than six inches in diameter.
- (x) Ink-jet printers.
- (y) Grinding and machining operations, abrasive blasting, pneumatic conveying, and wood working operations controlled with a fabric filter, scrubber, or

mist collector designed to emit not more than 0.03 grains of particulate per dry standard cubic foot of exhaust gas with less than four thousand actual cubic feet per minute volume, venting inside a building, and emitting less than ten pounds per day of nonparticulate matter air contaminants.

- (z) Uncontrolled grinding, machining, and sanding operations, abrasive cleaning operations (dry or wet), pneumatic conveying and woodworking operations that have no visible emissions, vent to the inside of a building and emit less than ten pounds per day of nonparticulate matter air contaminants.
- (aa) Parts washers and rinse tanks using detergent cleaners.
- (bb) Aluminum die-casting machines.
- (cc) Air contaminant sources at nonproduction research and development operations with a potential to emit from any air contaminant source of less than one ton per year of any criteria pollutant per air contaminant source.
- (dd) Vegetable oil storage tanks and pumps and valves used in vegetable oil processing operations.
- (ee) Gasoline dispensing facilities, as defined in paragraph (H) of rule 3745-21-01 of the Administrative Code, or other motor fuel dispensing facilities that are equipped with Stage I vapor control and are not located in Ashtabula, Butler, Clark, Clermont, Cuyahoga, Delaware, Franklin, Geauga, Greene, Hamilton, Lake, Licking, Lorain, Lucas, Mahoning, Medina, Miami, Montgomery, Portage, Stark, Summit, Trumbull, Warren, or Wood counties.
- (ff) Gasoline dispensing facilities, as defined in paragraph (H) of rule 3745-21-01 of the Administrative Code, or other motor fuel dispensing facilities that have an individual maximum annual throughput of less than six thousand gallons of gasoline per year.
- (gg) Air separation plants.
- (hh) All maintenance welding.
- (ii) Arc welding where emissions of particulate matter are vented to a control device located and vented inside the building.
- (jj) Passive methane venting systems from non-hazardous waste landfills.
- (kk) Coating applicators with properly designed and operated particulate matter control devices and venting systems that employ less than five gallons of

only air-dried coating material in any one day provided that the applicators are:

- (i) Not located in a nonattainment area for ozone,
  - (ii) Not subject to limits specified in or not specifically exempted from rule 3745-21-09 of the Administrative Code,
  - (iii) Not subject to federal standards of performance for new stationary sources; and
  - (iv) Not located at a facility with actual emissions of twenty-five or more tons of volatile organic materials per year and are not subject to a standard under Section 112 of the Clean Air Act.
- (ll) Refrigerant reclaiming and recycling machines located at motor vehicle repair facilities.
- (mm) Natural gas compressor engines used for maintenance activities with a heat input rate of no greater than ten million British thermal units per hour fired by natural gas, gasoline or distillate oil (with less than or equal to 0.5 per cent by weight sulfur).
- (nn) Emergency electrical generators or emergency firefighting water pumps less than or equal to fifty horsepower that burn gasoline, natural gas, distillate oil (with less than or equal to 0.5 per cent by weight sulfur), or liquid petroleum gas.
- (oo) Two-stroke or four-stroke, air-cooled, gasoline-powered engines no more than twenty horsepower used for lawnmowers, small electric generators, compressors, pumps, minibikes, snowthrowers, garden tractors or other similar uses.
- (pp) Non-road engines, subject to the following provisos:
- (i) Consistent with this exemption and pursuant to division (T)(3) of section 3745.11 of the Revised Code, permit-to-install fees for the installation of exempt non-road engines, as required under section 3745.11 of the Revised Code, are hereby waived for any permit-to-install issued for an exempt non-road engine where the permittee has not yet paid the fee.
  - (ii) This exemption does not apply to non-road engines that emit visible particulate emissions with opacities greater than twenty per cent as a six-minute average as determined by USEPA Method 9 of 40 CFR Part 60, Appendix A.

- (qq) Internal combustion engine(s) used for locomotion installed in a marine vessel, an aircraft, a locomotive, a recreational vehicle, a motor vehicle (self-propelled vehicles designed for transporting persons or property on a street or highway), a vehicle used solely for competition, or an off-highway vehicle.
- (rr) A dynamometer operation for fully assembled motor vehicles. This exemption includes dynamometer operations used as part of final assembly of new motor vehicles, roll testing of new motor vehicles, testing of vehicles used solely for competition, testing of motor vehicles for compliance with emissions standards, motor vehicle maintenance, road testing and repair dynamometers and other similar fully assembled motor vehicle dynamometer operations.
- (ss) The one time use of a mobile treatment unit or vacuum truck in order to contain and/or prevent further migration of a hazardous material spill during an emergency response. This exemption shall be effective for thirty days from the date the mobile treatment unit or vacuum truck is first put into use unless the owner or operator meets one of the following requirements within the thirty day period:
  - (i) Applies for a permit-to-install or PTIO in accordance with rule 3745-31-02 of the Administrative Code. The exemption shall expire upon final issuance or final denial of the permit-to-install or PTIO.
  - (ii) Submits written notification, in accordance with paragraph (A)(4)(a)(ii) of this rule, of the applicability of a permit-by-rule in paragraph (A)(4)(e) or (A)(4)(f) of this rule. The exemption shall expire upon receipt of the written notification by the appropriate Ohio environmental protection agency district office or local air agency.

## (2) Federal based exemptions

The following exemption applies regardless of the applicability of the national emission standards for hazardous air pollutants and/or the new source performance standards.

- (a) Cleanup activities associated with the removal or remedial action conducted entirely on site, where such remedial action is selected and carried out in compliance with the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA) Section 121(e) and where such action meets all applicable air pollution emission limits and policies.

## (3) Discretionary exemptions

- (a) The director, at his/her discretion, may exempt the installation and operation of an air contaminant source or any other source associated with the clean-up of a spill or a leaking underground storage tank from the requirements to obtain a permit-to-install or PTIO.
- (b) The director, at his/her discretion, may exempt the installation and operation of an air contaminant source from the requirements to obtain a permit-to-install or PTIO to deal with an emergency situation involving immediate threats to human health, property or the environment.
- (c) The director, at his/her discretion, may exempt the installation and operation of an air contaminant source from the requirements to obtain a permit-to-install or PTIO for the emergency replacement of storage tanks associated with a leaking underground storage tank for a period not to exceed six months.
- (d) The director, at his/her discretion and in writing, may exempt the installation and operation or modification of an air contaminant source from the requirement to obtain a permit-to-install or PTIO for a period of up to six months for purposes of research and development of more effective prevention or control of air pollutant emissions or of more efficient combustion of coal.
- (e) A temporary source that, as so ordered by the director at his/her discretion, is to be operated for the purpose of testing air contaminant pollution emissions so that a suitable control technology can be ascertained and will not operate for more than two calendar years.
- (f) The director, at his/her discretion and in writing, may exempt the temporary modification and operation of an air contaminant source from the requirements to obtain a permit-to-install or PTIO for a period of up to sixty days for the purpose of evaluating new production feasibility and/or air quality impacts from the temporary modification. A request for this exemption shall be made in writing and shall provide a detailed description of the proposed temporary modification to the air contaminant source, the time period over which the modification will occur, any changes in air emissions from the air contaminant source as a result of the temporary modification, and the ambient impact of the emissions from the air contaminant source as a result of the temporary modification. The director may require that performance tests be conducted during the period of the temporary modification.
- (g) The director, at his/her discretion and in writing, may exempt any treatability studies or on-site response actions (cleanup operations) that meet all applicable air emission limits and policies from the requirement to obtain a

permit-to-install or PTIO. Anyone requesting this exemption must provide the director with sufficient information to make this decision.

(4) Permit-by-rule exemptions

The following air contaminant sources are exempt from the requirement to obtain a permit-to-install or PTIO. These exemptions are valid only as long as the owner or operator complies with all of the permit-by-rule general provisions, meets the qualifying criteria defined in the applicable permit-by-rule and complies with all of the requirements under the applicable permit-by-rule specific provisions. Upon request by the director, the owner or operator of a facility that has exceeded the permit-by-rule thresholds or that the director finds is causing or may cause a public nuisance in violation of rule 3745-15-07 of the Administrative Code shall submit an application for a permit-to-install or PTIO.

These exemptions do not, however, exempt any air contaminant source from requirements of the Clean Air Act, including being considered for purposes of determining whether a facility constitutes a major source or is otherwise regulated under Chapter 3745-77 of the Administrative Code or any requirement to list insignificant activities and emission levels in a Title V permit application. In addition, this rule does not relieve the owner or operator from the requirement of including the emissions associated with the exempt sources into any major NSR permitting action.

(a) General provisions

These general provisions apply to all owner or operators who are utilizing one or more of the permit-by-rule exemptions listed in paragraphs (A)(4)(b) to (A)(4)(l) of this rule.

(i) Recordkeeping requirements

The owner or operator shall collect and maintain the records described for each air contaminant source exempted under paragraph (A)(4) of this rule and these records shall be retained in the owner or operator's files for a period of not less than five years, unless otherwise specified in each exemption. These records shall be made available to the director or any authorized representative of the director for review during normal business hours.

(ii) Notification requirements for new installations

For the purposes of this paragraph, a new permit-by-rule air contaminant source is an air contaminant source installed after the promulgation date of any new applicable permit-by-rule or July 29, 2005, whichever comes later. The owner or operator of a new permit-

by-rule air contaminant source electing to use an applicable permit-by-rule exemption shall submit a written notification in a form and manner prescribed by the director prior to installation of the air contaminant source. This notification, or form, shall be submitted to the appropriate Ohio environmental protection agency district office or local air agency, and shall contain the following information, at a minimum:

- (a) The owner or operator's and the facility contact's name;
- (b) The facility mailing address and telephone number;
- (c) The location of the air contaminant source(s);
- (d) A description of the air contaminant source, including any pollution control(s); and
- (e) A statement by the owner or operator that indicates which permit-by-rule applies to the air contaminant source.

(iii) Notification requirements for existing permitted sources

The owner or operator of an air contaminant source which is operating under an existing permit-to-install, PTIO and/or permit-to-operate may continue to operate in compliance with that permit or may submit a written request to the Ohio environmental protection agency to revoke any such individual permit or permits and to allow the air contaminant source to operate under the permit-by-rule provisions. The director may revoke a permit-to-install, PTIO and/or permit-to-operate if the permittee requests revocation, agrees to meet all permit-by-rule qualifying and operating conditions, and the director determines that the revocation will not result in the violation of any applicable laws. When a permittee requests a revocation pursuant to this paragraph, the director, without prior hearing, shall make a final determination on the request and inform the permittee in writing. If the director agrees with the request to operate under the permit-by-rule, then the permit-by-rule becomes applicable to the permittee on the date the existing permit-to-install, PTIO and/or permit-to-operate are revoked.

(iv) Notification requirements for existing permit-by-rule sources

The owner or operator of an air contaminant source that is operating under one of the permit-by-rules that existed prior to July 29, 2005 (emergency electrical generators, injection and compression molding, crushing and screening plants, soil-vapor extraction and soil-liquid extraction) and desires to continue operating under the permit-by-rule shall submit a written notification which contains all of the elements

required in paragraph (A)(4)(a)(ii) of this rule. This notification shall be submitted to the appropriate Ohio environmental protection agency district office or local air agency and shall be submitted by July 29, 2006.

(v) Records retention requirements

Each record of any monitoring data, testing data, and support information required pursuant to a specific permit-by-rule shall be retained for a period of five years from the date the record was created. Support information shall include, but not be limited to, all calibration and maintenance records and all original strip-chart recordings for continuous monitoring instrumentation, and copies of all reports required by the specific permit-by-rule. Such records may be maintained in computerized form.

(vi) Reporting requirements

The owner or operator shall submit required reports in the following manner:

- (a) Reports of any monitoring and/or recordkeeping information required by a specific permit-by-rule shall be submitted to the appropriate Ohio environmental protection agency district office or local air agency.
- (b) Except as otherwise may be provided in a permit-by-rule specific reporting requirements paragraph of a specific permit-by-rule, a written report of any deviations (excursions) from emission limitations, operational restrictions, qualifying criteria, and control equipment operating parameter limitations that have been detected by the testing, monitoring, and recordkeeping requirements specified in the permit-by-rule shall be submitted to the appropriate Ohio environmental protection agency district office or local air agency within thirty days of the date the deviation occurred. The report shall describe the specific limitation and/or operational restriction exceeded, the probable cause of such deviation, and any corrective actions of preventive measures that have been or will be taken.

(vii) Scheduled maintenance/malfunction reporting

Any scheduled maintenance of air pollution control equipment shall be performed in accordance with paragraph (A) of rule 3745-15-06 of the Administrative Code. The malfunction of any emissions units or any associated air pollution control system(s) shall be reported to the

appropriate Ohio environmental protection agency district office or local air agency in accordance with paragraph (B) of rule 3745-15-06 of the Administrative Code. Except as provided in that rule, any scheduled maintenance or malfunction necessitating the shutdown or bypassing of any air pollution control system(s) shall be accompanied by the shutdown of the emissions unit(s) that is served by such control system(s).

- (b) Emergency electrical generators, emergency water pumps, or emergency air compressors powered by internal combustion engines greater than fifty horsepower (37.3 Kilowatts) where each engine operates at any one facility for no more than five hundred hours per rolling twelve-month period and where such engine burns gasoline, natural gas, distillate oil (with less than or equal to 0.5 per cent by weight sulfur), or liquid petroleum gas and that maintains the following records:
  - (i) Monthly records that contain the rolling twelve-month hours of operation; and
  - (ii) Records that show the type of fuel used and the sulfur content (in per cent by weight) of any distillate oil used.
- (c) Equipment used for injection and compression molding of resins where:
  - (i) The facility does not qualify for the exemption under paragraph (A)(1)(k) or (A)(1)(m) of this rule; and
  - (ii) The facility uses no more than one thousand pounds of VOC in external mold release agents and flatting spray per rolling twelve-month period; and
    - (a) The facility uses no thermoset resins and no more than six million pounds of thermoplastic resins (e.g., polyethylene, polypropylene, polycarbonate, and polyvinyl chloride, etc.) per rolling twelve-month period in injection machines at the facility (this type of molding operation involves materials that soften and melt upon heating or pressurization heating with no chemical change and no permanent change in physical properties. It does not involve curing, thermosetting or cross-linking.); or
    - (b) The facility uses no thermoplastic resins and no more than five hundred thousand pounds of thermoset resins (e.g., polyesters, polyurethanes, epoxy resins, etc.) per rolling twelve-month period in injection and compression molding machines at the facility (these types of molding operations use a thermoset resin and involve a chemical reaction, usually involving heat, that converts

the material (e.g., polyesters, polyurethanes, epoxy resins, etc.) to a solid, insoluble state using a hardening or curing operation.); or

- (iii) No more than three tons of VOCs per rolling twelve-month period are emitted from injection and compression molding machines at the facility, including VOCs emitted as calculated by using emission factors approved by the Ohio environmental protection agency; and
- (iv) The facility maintains monthly records that contain the rolling twelve-month usage of thermoplastic resins, thermosetting resins and VOCs in external mold release agents and flatting spray used in all injection and compression molding machines at the facility, and the Ohio environmental protection agency approved emission factors used to calculate the emissions.

(d) Nonmetallic mineral processing plants permit-by-rule

(i) Qualifications

A nonmetallic mineral processing plant, as defined under 40 CFR Part 60, Subpart OOO, that meets the following qualifications is eligible to use this permit-by-rule:

- (a) Fixed sand and gravel plants and crushed stone plants (including concrete and asphalt paving plants) with capacities, as defined in 40 CFR 60.671, of twenty-three megagrams per hour (twenty-five tons per hour) or less;
- (b) Portable stone and gravel plants and crushed stone plants (including concrete and asphalt paving plants) with capacities, as defined in 40 CFR 60.671, of one hundred thirty-six megagrams per hour (one hundred fifty tons per hour) or less;
- (c) Common clay plants and pumice plants with capacities, as defined in 40 CFR 60.671, of nine megagrams per hour (ten tons per hour) or less; and
- (d) Fixed and portable soil screening plants with capacities, as defined in 40 CFR 60.671, of one hundred thirty-six megagrams per hour (one hundred fifty tons per hour) or less.

(ii) Requirements

A nonmetallic mineral processing plant identified in paragraph (A)(4)(d)(i) of this rule shall either employ a baghouse, wet scrubber, water sprays or combination thereof that is designed and operated to

emit no more than ten per cent opacity from stack or fugitive emission points, or employ an enclosed design that is designed and operated to emit no more than fifteen per cent opacity from stack or fugitive emission points, and that maintain the following daily records:

- (a) Material throughput in tons per day; and
  - (b) Pressure drop readings across the control device as applicable; and
  - (c) Meter readings of quantities of water used for wet scrubbing and spray applications as applicable; and
  - (d) Operating hours of the crushing and grinding equipment.
- (e) Soil-vapor extraction remediation activities located at facilities that have total combined emission rates less than fifteen pounds of OCs per day are hereby exempted from the permit-to-install requirements for a period of eighteen months from the beginning of vapor extraction activities so long as the owner or operator provides the director with the following information prior to beginning actual construction:
- (i) A description and the location of the remediation site.
  - (ii) A description of the nature and type of contamination at the site.
  - (iii) A description of the vapor extraction processes to be used in the remediation activities.
  - (iv) An estimate of the air contaminant emissions in parts per million by volume, pounds per hour and tons per year.
  - (v) A description of the costs of the vapor control equipment to be used to control emissions from the remediation activities.
  - (vi) A description of the projected start date of the remediation project, a list of the project milestones and an estimate of how long the remediation activities will operate.
  - (vii) A notice of when the soil-vapor extraction remediation activities begin, when major project milestones are met and when the remediation activities are completed.
- (f) Soil-liquid extraction remediation activities located at facilities that have total combined emission rates less than fifteen pounds of OCs per day are hereby exempted from the permit-to-install requirements for a period of eighteen months from the beginning of the liquid extraction activities so long as the

owner or operator provides the director with the following information prior to beginning actual construction:

- (i) A description and the location of the remediation site.
  - (ii) A description of the nature and type of contamination at the site.
  - (iii) A description of the liquid extraction and liquid-vapor stripping processes to be used in the remediation activities.
  - (iv) An estimate of the air contaminant emissions in parts per million by volume, pounds per hour and tons per year.
  - (v) A description of the costs of the vapor control equipment to be used to control emissions from the remediation activities.
  - (vi) A description of the projected start date of the remediation project, a list of the project milestones and an estimate of how long the remediation activities will operate.
  - (vii) A notice of when the soil-liquid extraction remediation activities begin, when major project milestones are met and when the remediation activities are completed.
- (g) Auto body refinishing facility permit-by-rule

(i) Qualifications

An auto body refinishing facility that meets all of the following qualifications is eligible to use this permit-by-rule:

- (a) The facility has two or fewer paint spray booths used for painting.
- (b) The facility does not do more than fifty jobs per week.
- (c) The facility does not use more than three thousand gallons combined of all coatings, solvents, and other VOC containing materials in any calendar year.
- (d) The facility performs all painting operations in enclosed spray booth(s) which are designed to confine and direct the paint overspray, fumes, and vapors to a powered ventilation system and are equipped with either a dry filtration or water wash system(s) to capture paint overspray.

(e) The facility applies any paint or coatings by one of the following means; high volume low pressure (HVLV) spray equipment, or electrostatic application equipment.

(f) The exhaust stack(s) of each paint spray booth at the facility:

(i) Is equipped with a fan designed to achieve an exhaust flow capacity of at least ten thousand cubic feet per minute.

(ii) Discharges air contaminants in a vertical direction, without obstructions like rain caps, goose neck exhaust, or other obstructions.

(iii) Has a stack height which is at least sixteen feet, as measured from ground level to the point of discharge to the atmosphere.

(iv) Has a point of discharge no closer than sixty feet to the nearest facility property line.

(ii) Applicable emission limitations and/or control requirements

(a) The applicable rules, emission limitations and control requirements that apply to the facility subject to this permit-by-rule are defined in the following table:

--

Applicable Rule(s)	Applicable Emission Limitations/Control Requirements
Paragraph (A)(3) of rule 3745-31-05 of the Administrative Code	Facility emissions of VOC shall not exceed nine pounds per hour and 11.7 tons per year. Facility emissions of combined HAPs shall not exceed nine pounds per hour and 11.7 tons per year. Facility emissions of a single HAP shall not exceed 4.5 pounds per hour and 5.85 tons per year.
Paragraph (U)(1) of rule 3745-21-09 of the Administrative Code	This operation is exempt from the requirements of this rule pursuant to paragraph (U)(2)(c) of rule 3745-21-09 of the Administrative Code.
Rule 2745-21-18 of the Administrative Code	The provisions of this rule are only applicable to facilities located in Butler, Clark, Clermont, Greene, Hamilton, Miami, Montgomery and Warren counties.

(iii) Operational requirements

- (a) The owner or operator of the facility shall regularly maintain the spray painting application equipment, exhaust filtration systems, and spray booths in accordance with the recommended procedures and maintenance intervals of the respective manufacturers in order to minimize air contaminant emissions.
  - (b) Paint application equipment shall be cleaned using one or more of the following means:
    - (i) In a device that remains closed at all times when not in use.
    - (ii) In a system that discharges nonatomized cleaning solvent into a waste container that remains closed when not in use.
    - (iii) In a reservoir that allows for disassembly and cleaning of application equipment and that is kept closed when not in use.
    - (iv) In a system that atomizes cleaning solvent into a waste container that is fitted with a device designed to capture atomized solvent emissions.
  - (c) If a water wash system is employed to control paint overspray, the facility shall comply with all applicable laws pertaining to the handling, treatment, or discharge of waste water.
  - (d) For facilities located in Butler, Clark, Clermont, Greene, Hamilton, Miami, Montgomery and Warren counties, the operators of paint application equipment shall be trained in the use of a high volume low pressure (HVLP) sprayer or electrostatic spray equipment in accordance with the manufacturer's specifications, and the handling of a coating and any solvents used to clean the spray equipment.
  - (e) For facilities located in Butler, Clark, Clermont, Greene, Hamilton, Miami, Montgomery and Warren counties, the owners or operators shall store the following materials in non-absorbent, non-leaking containers and keep these containers closed at all times when not in use: fresh coatings, used coatings, solvents, VOC-containing additives and materials, VOC-containing waste materials, and cloth, paper, or absorbent applicators moistened with any of the items listed above.
- (iv) Monitoring and/or recordkeeping requirements
- (a) The owner or operator of the facility shall maintain annual records which list the following information for each VOC-containing

material (coatings, thinners, reducers, surfacers, clean-up solvents, etc.) used or purchased by the facility in each calendar year:

- (i) The name and identification number of each material.
  - (ii) The quantity of each material used or purchased, in gallons.
  - (iii) The VOC content of each material, in pounds per gallon.
  - (iv) The total volume, in gallons, of all VOC-containing materials used or purchased.
- (b) The owner or operator of the facility shall maintain a record of the number of jobs performed per week.
- (c) The owner or operator of the facility shall maintain documentation which demonstrates each exhaust stack complies with the design requirements listed in paragraph (A)(4)(g)(i)(f) of this rule.
- (d) For facilities located in Butler, Clark, Clermont, Greene, Hamilton, Miami, Montgomery and Warren counties, the owner or operator shall submit documentation sufficient to demonstrate that all employees applying coatings are properly trained in the use of a high volume low pressure (HVLP) sprayer and electrostatic spray equipment and in the handling of a coating and any solvents used to clean the spray equipment. The owner or operator shall maintain a copy of this documentation on-site and make the documentation available to the Ohio environmental protection agency, or its representative, upon request.
- (v) Testing requirements
- (a) Compliance with the annual material usage limitation shall be based upon the recordkeeping requirements specified in paragraph (A)(4)(g)(iv)(a) of this rule.
  - (b) Compliance with the hourly VOC/combined HAP emission limitation is based on multiplying the maximum of one job per hour by a maximum emission factor of nine pounds VOC/combined HAP per job. Compliance with the hourly single HAP emission limitation is based on multiplying the maximum of one job per hour by a maximum emission factor of 4.5 pounds single HAP per job.
  - (c) Compliance with the annual tons per year VOC/combined HAP emission limitation is based on multiplying the maximum number

of jobs per week, fifty, by an emission factor of nine pounds VOC/combined HAP per job by fifty-two weeks per year and dividing by two thousand pounds per ton. Compliance with the annual tons per year single HAP emission limitation is based on multiplying the maximum number of jobs per week, 50, by an emission factor of 4.5 pounds single HAP per job by fifty-two weeks per year and dividing by two thousand pounds per ton.

(h) Gasoline dispensing facility with Stage I controls permit-by-rule

(i) Qualifications

A gasoline dispensing facility, as defined in paragraph (H) of rule 3745-21-01 of the Administrative Code, which is not otherwise exempted under paragraph (A)(1)(ee) or (A)(1)(ff) of this rule, and meets all of the following conditions is eligible to use this permit-by-rule:

- (a) Is located in Delaware, Franklin, Licking, Lucas, Mahoning, Stark, Trumbull, and Wood counties.
- (b) Has all gasoline storage tanks equipped with submerged fill pipes, as defined in paragraph (H) of rule 3745-21-01 of the Administrative Code.
- (c) Employs a Stage I vapor balance or vapor control system in accordance with paragraph (R) of rule 3745-21-09 of the Administrative Code to control the vapors displaced from the stationary storage tanks during delivery vessel transfer operations, unless exempted from Stage I requirements by one of the provisions of paragraph (R)(4) of rule 3745-21-09 of the Administrative Code.
- (d) Has a gasoline throughput of less than three million eight hundred thousand gallons per year.

(ii) Applicable emission limitations and/or control requirements

- (a) The applicable rules, emission limitations and control requirements that apply to the facility subject to this permit-by-rule are defined in the following table:

--

Applicable Rule(s)	Applicable Emission Limitations/Control Requirements
Paragraph (A)(3) of rule 3745-31-05 of the	OC emissions from the facility shall not

Administrative Code	exceed twenty-five tons per year. The facility shall employ submerged fill pipes on all gasoline storage tanks. The requirements of this rule also include compliance with the requirements of paragraph (R) of rule 3745-21-09 of the Administrative Code.
Paragraph (R) of rule 3745-21-09 of the Administrative Code	The control efficiency of the vapor balance or vapor control system shall be at least ninety per cent by weight for VOCs.

## (iii) Operational restrictions

The facility shall comply with the following operational restrictions for the Stage I vapor control system:

- (a) The vapor balance system shall be kept in good working order and shall be used at all times during the transfer of gasoline.
- (b) There shall be no leaks in the delivery vessel pressure/vacuum relief valves and hatch covers.
- (c) There shall be no leaks in the vapor lines or liquid lines during the transfer of gasoline.
- (d) The transfer of gasoline from a delivery vessel to a stationary storage tank shall be conducted by use of submerged fill into the storage tank. The submerged fill pipe(s) are to be installed so they are within six inches of the bottom of the storage tank.
- (e) All fill caps shall be in place and clamped during normal storage conditions.
- (f) The owner or operator of the facility shall repair within fifteen days any leak from the vapor balance system or vapor control system which is employed to meet the requirements of paragraph (R)(1) of rule 3745-21-09 of the Administrative Code when such leak is equal to or greater than one hundred per cent of the lower explosive limit as propane, as determined under paragraph (K) of rule 3745-21-10 of the Administrative Code.

## (iv) Monitoring and/or recordkeeping requirements

- (a) The owner or operator of the facility shall maintain records of the results of any leak checks, including, at a minimum, the following information:

- (i) Date of inspection.
    - (ii) Findings (may indicate no leaks discovered or location, nature, and severity of each leak).
    - (iii) Leak determination method.
    - (iv) Corrective action (date each leak repaired and reasons for any repair interval in excess of fifteen calendar days).
    - (v) Inspector's name and signature.
  - (b) The owner or operator of the facility shall maintain records of the annual gasoline and diesel/kerosene/used oil (if applicable) throughput for the facility.
- (v) Permit-by-rule specific reporting requirements
- (a) Any leak from the vapor balance system or vapor control system that is not repaired within fifteen days after identification shall be reported to the appropriate Ohio environmental protection agency district office or local air agency within thirty days after the repair is completed.
  - (b) Any owner or operator of a facility which is claiming an exemption from the Stage I vapor control requirements pursuant to paragraph (R)(4) of rule 3745-21-09 of the Administrative Code is exempt from paragraphs (A)(4)(h)(ii) to (A)(4)(h)(iv) of this rule but shall comply with the following requirements:
    - (i) The owner or operator shall maintain records of the quantity of gasoline delivered to the facility during each month, and shall retain these records for a period of three years.
    - (ii) The owner or operator shall notify the applicable Ohio environmental protection agency district office or local air agency if the gasoline throughput for any rolling twelve-month period is equal to or greater than one hundred twenty thousand gallons within forty-five days after the exceedance occurs.
- (vi) Testing requirements
- (a) Compliance with the annual OC emission limitation is based on multiplying the maximum annual gasoline throughput specified in

this permit-by-rule (three million eight hundred thousand gallons) by an emission factor of thirteen pounds of OCs per one thousand gallons of gasoline and dividing by two thousand pounds per ton. The OC emissions from all diesel, kerosene, and used oil tank filling and dispensing operations, if present at the facility, are assumed to be negligible.

(i) Gasoline dispensing facility with Stage I and Stage II controls permit-by-rule

(i) Qualifications

A gasoline dispensing facility, as defined by paragraph (H) of rule 3745-21-01 of the Administrative Code, which is not otherwise exempted under paragraph (A)(1)(ee) or (A)(1)(ff) of this rule, and meets all of the following conditions is eligible to use this permit-by-rule:

- (a) Is located in Ashtabula, Butler, Clark, Clermont, Cuyahoga, Geauga, Greene, Hamilton, Lake, Lorain, Medina, Miami, Montgomery, Portage, Summit, and Warren counties.
- (b) Employs storage tanks equipped with submerged fill pipes, as defined by paragraph (H) of rule 3745-21-01 of the Administrative Code.
- (c) Employs a Stage I vapor balance or vapor control system in accordance with paragraph (R) of rule 3745-21-09 of the Administrative Code, unless exempted from Stage I requirements pursuant to paragraph (R)(4) of rule 3745-21-09 of the Administrative Code.
- (d) Employs a CARB certified Stage II vapor control system, as defined by paragraph (H) of rule 3745-21-01 of the Administrative Code, and in accordance with paragraph (DDD) of rule 3745-21-09 of the Administrative Code, unless exempted from Stage II requirements by one of the provisions of paragraph (DDD)(4) of rule 3745-21-09 of the Administrative Code.

[Comment: The meaning of CARB certified and CARB certification used throughout this permit-by-rule shall be consistent with the definition specified by paragraph (H) of rule 3745-21-01 of the Administrative Code.]

- (e) Has a gasoline throughput of less than sixteen million gallons per year.

## (ii) Applicable emission limitations and/or control requirements

- (a) The applicable rules, emission limitations and control requirements that apply to the facility subject to this permit-by-rule are defined in the following table:

--

Applicable Rule(s)	Applicable Emission Limitations/Control Requirements
Paragraph (A)(3) of rule 3745-31-05 of the Administrative Code	OC emissions from the facility shall not exceed twenty-five tons per year. The facility shall employ submerged fill pipes on all storage tanks. The requirements of this rule also include compliance with the requirements of paragraphs (R) and (DDD) of rule 3745-21-09 of the Administrative Code.
Paragraph (R) of rule 3745-21-09 of the Administrative Code	The control efficiency of the Stage I vapor balance or vapor control system shall be at least ninety per cent by weight for VOCs.
Paragraph (DDD) of rule 3745-21-09 of the Administrative Code	The control efficiency of the Stage II vapor control system shall be at least ninety-five per cent by weight for VOCs.

## (iii) Operational restrictions

- (a) The owner or operator shall comply with the following operational restrictions for the Stage I vapor control system:
- (i) The vapor balance system shall be kept in good working order and shall be used at all times during the transfer of gasoline.
  - (ii) There shall be no leaks in the delivery vessel pressure/vacuum relief valves and hatch covers.
  - (iii) There shall be no leaks in the vapor lines or liquid lines during the transfer of gasoline.
  - (iv) The transfer of gasoline from a delivery vessel to a stationary storage tank shall be conducted by use of submerged fill into the storage tank. The submerged fill pipe(s) are to be installed so they are within six inches of the bottom of the storage tank.
  - (v) All fill caps shall be in place and clamped during normal storage conditions.

- (vi) The owner or operator of the facility shall repair within fifteen days any leak from the vapor balance system or vapor control system which is employed to meet the requirements of paragraph (R)(1) of rule 3745-21-09 of the Administrative Code when such leak is equal to or greater than one hundred per cent of the lower explosive limit as propane, as determined under paragraph (K) of rule 3745-21-10 of the Administrative Code.
  - (b) The owner or operator shall install, operate and maintain the Stage II vapor control system in accordance with the manufacturer's specifications, the applicable CARB certification, and all requirements of paragraph (DDD)(1) of rule 3745-21-09 of the Administrative Code.
- (iv) Monitoring and/or recordkeeping requirements
  - (a) The owner or operator shall maintain records of the results of any leak checks, including, at a minimum, the following information:
    - (i) Date of inspection.
    - (ii) Findings (may indicate no leaks discovered or location, nature, and severity of each leak).
    - (iii) Leak determination method.
    - (iv) Corrective action (date each leak repaired and reasons for any repair interval in excess of fifteen calendar days).
    - (v) Inspector's name and signature.
  - (b) The owner or operator shall maintain records as specified by paragraph (DDD)(3) of rule 3745-21-09 of the Administrative Code and any records required by the applicable CARB certification. The owner or operator does not need to maintain copies of the most recent permit-to-operate and permit-to-operate application, as required by paragraph (DDD)(3)(a) of rule 3745-21-09 of the Administrative Code if electing to operate under this permit-by-rule.
  - (c) The owner or operator of the facility shall maintain records of the annual gasoline and diesel/kerosene/used oil (if applicable) throughput for the facility.
- (v) Permit-by-rule specific reporting requirements

- (a) Any owner or operator who is claiming an exemption for a facility from the Stage I or Stage II vapor control requirements pursuant to paragraph (R)(4) or (DDD)(4) of rule 3745-21-09 of the Administrative Code shall notify the appropriate Ohio environmental protection agency district office or local air agency using the written notification procedures described in paragraph (A)(4)(a) of this rule to describe the nature of the exemption.
- (b) Any leak from the vapor balance system or vapor control system that is not repaired within fifteen days after identification shall be reported to the appropriate Ohio environmental protection agency district office or local air agency within thirty days after the repair is completed.
- (c) A comprehensive written report on the results of any tests performed in accordance with the testing requirements of paragraph (A)(4)(h)(vi) of this rule shall be submitted to the appropriate Ohio environmental protection agency district office or local air agency within thirty days following the completion of the tests.

(vi) Testing requirements

- (a) Within sixty days after the installation or modification of a Stage II vapor control system, the owner or operator shall perform the tests specified by paragraph (DDD)(2) of rule 3745-21-09 of the Administrative Code.

At intervals not to exceed five years, the owner or operator of the facility shall repeat and demonstrate compliance with the static leak test requirements contained in appendix A to rule 3745-21-10 of the Administrative Code (unless a greater frequency is specified in the applicable CARB certification), and the dynamic pressure performance test requirements contained in appendix B to rule 3745-21-10 of the Administrative Code (unless the dynamic pressure performance test is not applicable to the specific Stage II vapor control system, as specified in the applicable CARB certification).

Not later than thirty days prior to any required tests, the owner or operator of the facility shall submit a test notification to the appropriate Ohio environmental protection agency district office or local air agency. The test notification shall describe the proposed test methods and procedures, the time and the date of the tests, and the person who will be conducting the tests. Failure to submit such

notification prior to the tests may result in the Ohio environmental protection agency's refusal to accept the results of the tests. Personnel from the appropriate Ohio environmental protection agency district office or local air agency shall be permitted to witness the tests, examine the testing equipment, and acquire data and information during the tests. After completion of any tests, the facility shall complete and retain on site a copy of the post test inspection form contained in appendix C to rule 3745-21-10 of the Administrative Code.

- (b) The owner or operator of the gasoline dispensing facility shall perform and comply with any vapor control system tests (i.e., static leak tests, air-to-liquid ratio, etc.) specified in the applicable CARB certification for the vapor control system installed. The tests shall be performed at the frequency specified in the CARB certification. If the applicable CARB certification for the vapor recovery system does not include such testing requirements, the owner or operator shall, at a minimum, comply with the static leak and dynamic pressure test requirements at intervals specified in paragraph (DDD)(2) of rule 3745-21-09 of the Administrative Code.
- (c) Compliance with the annual OC emission limitation is based on multiplying the maximum annual gasoline throughput specified in this permit-by-rule (sixteen million gallons) by an emission factor of 3.1 pounds of OCs per thousand gallons of gasoline and dividing by two thousand pounds per ton. The OC emissions from all diesel, kerosene, and used oil tank filling and dispensing operations, if present at the facility, are assumed to be negligible.

(vii) Miscellaneous requirements

- (a) All Stage II vapor control systems employed at facilities operating under this permit-by-rule, including all associated underground and above ground plumbing, shall be installed, tested, operated and maintained in accordance with the applicable CARB certification. Copies of CARB certification documents, including executive orders, approval letters, equipment advisories, and equivalent test procedures are available from the appropriate Ohio environmental protection agency district office or local air agency upon request.

(j) Boiler and heater permit-by-rule

(i) Qualifications

Boilers, preheaters, air heaters, water heaters, or heaters used for other heat exchange media that meet all of the following qualifications are eligible to use this permit-by-rule:

[Comment: Air contaminant sources which meet the definition of process heater as specified in 40 CFR Part 60, Subpart Dc are not eligible to use this permit-by-rule.]

- (a) The maximum rated heat input capacity of the air contaminant source is greater than ten million British thermal units per hour and less than or equal to one hundred million British thermal units per hour.
- (b) The air contaminant source is capable of burning only natural gas.
- (c) The emissions from the air contaminant source consist entirely of the products of fuel combustion.
- (d) Air contaminant sources with a maximum rated heat input capacity of greater than fifty million British thermal units per hour shall be equipped with low-NO<sub>x</sub> burners or other combustion control techniques designed to meet an emission limitation of not greater than 0.050 pound of nitrogen oxides per million British thermal units of heat input.

(ii) Applicable emission limitations and/or control requirements

- (a) The applicable rules, emission limitations, and control requirements that apply to each air contaminant source subject to this permit-by-rule are defined in the following table:

--

Applicable Rule(s)	Applicable Emission Limitations/Control Requirements
Paragraph (A) of rule 3745-17-07 of the Administrative Code	The visible particulate matter emission limitations specified by this rule are less stringent than the visible particulate matter emission limitation established pursuant to paragraph (A)(3) of rule 3745-31-05 of the Administrative Code.
Paragraph (B) of rule 3745-17-10 of the Administrative Code	Particulate matter emissions shall not exceed 0.020 pound per million British thermal units of actual heat input.
Paragraph (B) of rule 3745-23-06 of the Administrative Code	Units meeting the permit-by-rule qualification criteria satisfy the latest available control techniques and operating

	practices pursuant to the rule.
Paragraph (A) of rule 3745-18-06 of the Administrative Code	Air contaminant sources are exempt from this rule when natural gas is the only fuel burned.
Paragraph (A)(3) of rule 3745-31-05 of the Administrative Code	Particulate matter emissions shall not exceed 8.76 tons per year. Nitrogen oxides emissions shall not exceed 5.0 pounds per hour and 21.90 tons per year. Carbon monoxide emissions shall not exceed 8.24 pounds per hour and 36.07 tons per year. OC emissions shall not exceed 1.08 pounds per hour and 4.72 tons per year. Sulfur dioxide emissions shall not exceed 0.06 pound per hour and 0.26 ton per year. Visible particulate matter emissions shall not exceed five per cent opacity, as a six-minute average. The requirements of this rule also include compliance with the requirements of rule 3745-18-06, rule 3745-23-06, and paragraph (B) of rule 3745-17-10 of the Administrative Code.
40 CFR Part 60, Subpart Dc	This regulation does not specify emission limitations for air contaminant sources that only fire natural gas.

(iii) Monitoring and/or recordkeeping requirements

- (a) The owner or operator shall maintain, at the location of the air contaminant source, documentation showing the maximum rated heat input capacity of the air contaminant source(s) and evidence that the air contaminant source(s) can only fire natural gas.
- (b) The owner or operator shall maintain monthly records of the total amount of natural gas fired for the air contaminant source(s).

(iv) Permit-by-rule specific reporting requirements

- (a) For air contaminant sources installed after July 29, 2005, the owner or operator electing to use this permit-by-rule shall report the following, in accordance with 40 CFR Part 60, Subpart Dc, to the appropriate Ohio environmental protection agency district office or local air agency at the appropriate times:
  - (i) Construction date (no later than thirty days after such date).
  - (ii) Actual start-up date (within fifteen days after such date).

(iii) Date of performance testing (if required, at least thirty days prior to testing).

(iv) The maximum rated heat input capacity of the air contaminant source(s) and the type of fuel(s) fired (no later than thirty days after installation date).

(v) Testing requirements

(a) Compliance with the hourly emission limitations is based on multiplying the maximum hourly gas firing capacity of the air contaminant source (in million cubic feet per hour) by the emission factor specified by the United States environmental protection agency in Section 1.4 of the "Compilation of Air Pollutant Emission Factors (AP-42)", (in pounds per million cubic feet fired) for each pollutant. Compliance with the pounds per million British thermal units particulate emission limitation is based on dividing the filterable particulate emission factor specified by the United States environmental protection agency in Section 1.4 of the "Compilation of Air Pollutant Emission Factors (AP-42)" by one thousand twenty. If required by the Ohio environmental protection agency, the owner or operator shall demonstrate compliance with the pounds per million British thermal units and hourly emission limitations of this permit-by-rule in accordance with the appropriate test methods specified in 40 CFR Part 60, Appendix A.

(b) Compliance with the annual emission limitations shall be assumed as long as compliance with the pound per million British thermal units and hourly emission limitations are maintained. These annual emission limitations represent the emissions calculated at the maximum capacity of the equipment and eight thousand seven hundred sixty hours per year of operation.

(c) If required by the Ohio environmental protection agency, compliance with the visible particulate emission limitations shall be demonstrated in accordance with USEPA Method 9 of 40 CFR Part 60, Appendix A.

(k) Small printing facility permit-by-rule

(i) Qualifications

A printing facility that meets the following qualifications is eligible to use this permit-by-rule:

- (a) The facility has one or more printing lines which utilize only the screen, digital, flexographic, letterpress, non-heatset lithographic, or heatset lithographic printing processes, and which do not utilize add-on emission control equipment.
- (b) The facility emits no more than ten tons of VOCs, five tons of a single HAP and ten tons of combined HAPs in any calendar year as demonstrated by either calculating actual facility-wide emissions, using methods approved by the Ohio environmental protection agency, or by electing to comply with the material usage limitations specified in paragraph (A)(4)(k)(i)(c) of this rule.
- (c) In lieu of calculating emissions to demonstrate compliance with the annual facility emission limitations specified in paragraph (A)(4)(k)(i)(b) of this rule, the owner or operator may elect to qualify the facility for this permit-by-rule by meeting the following material usage limitations for all materials employed at the facility in any calendar year:
  - (i) Uses no more than one thousand three hundred thirty-three gallons of materials containing the same single HAP and no more than two thousand six hundred sixty-seven gallons of materials containing any HAPs.
  - (ii) Operates only heatset offset lithographic printing lines and uses no more than twenty thousand pounds of ink, cleaning solvent, and fountain solution additives combined; or
  - (iii) Operates only non-heatset offset lithographic printing lines and uses no more than two thousand eight hundred fifty gallons of cleaning solvent, and fountain solution additives combined; or
  - (iv) Operates only digital printing lines and uses no more than two thousand four hundred twenty-five gallons of solvent from inks and clean-up solutions and other solvent-containing materials combined; or
  - (v) Operates only screen or letterpress printing lines and uses no more than two thousand eight hundred fifty gallons of solvent from inks and clean-up solutions and other solvent-containing materials combined; or
  - (vi) Operates only water-based or ultraviolet (UV)-cured material flexographic printing lines and uses no more than eighty

thousand pounds of water-based inks, coatings, and adhesives, combined; or

(vii) Operates only solvent based material flexographic printing lines and uses no more than twenty thousand pounds of solvent from inks, dilution solvents, coatings, cleaning solutions and adhesives, combined; or

(viii) Operates any combination of screen, digital, flexographic, letterpress, non-heatset lithographic, or heatset lithographic printing lines and the facility uses no more than the most stringent of the material usage limitations contained in paragraphs (A)(4)(k)(iii) to (A)(4)(k)(viii) of this rule for the type of air contaminant source(s) at the facility.

(ii) Applicable emission limitations and/or control requirements

(a) The applicable rules, emission limitations and control requirements that apply to the facility subject to this permit-by-rule are defined in the following table:

--

Applicable Rule(s)	Applicable Emission Limitations/Control Requirements
Paragraph (A)(3) of rule 3745-31-05 of the Administrative Code	Facility emissions shall not exceed ten tons of VOC, five tons of a single HAP and ten tons of combined HAPs for any calendar year.
Paragraph (Y)(2)(b) of rule 3745-21-09 of the Administrative Code (flexographic presses only)	Exempt from the requirements of paragraph (Y)(1) of rule 3745-21-09 of the Administrative Code since the qualifying criteria ensure that the combined maximum usage of coatings and inks in all presses at the facility is less than one hundred forty-eight tons per year.

(iii) Monitoring and/or recordkeeping requirements

(a) The owner or operator of the printing facility shall maintain annual records at the facility that list the following information for each graphic arts material (ink, fountain solution additives, clean-up solvents, etc.) employed in the facility during each calendar year:

(i) The name and identification number of each material employed.

(ii) The quantity of each material employed, in gallons or pounds.

cured flexographic printing, compliance with the annual VOC emission limitation is based on the annual material usage limitation, in pounds, multiplied by an assumed maximum VOC content of twenty-five per cent, and divided by two thousand pounds per ton. For solvent-based flexographic printing and heatset lithographic printing, compliance with the annual VOC emission limitation is based on the annual material usage limitation, in pounds, multiplied by an assumed maximum VOC content of one hundred per cent, and divided by two thousand pounds per ton. For all printing types, compliance with the annual HAP emission limitations is based on the annual material usage limitations specified in paragraph (A)(4)(k)(i)(c)(i) of this rule, in gallons, multiplied by a maximum HAP content of 7.5 pounds per gallon, and divided by two thousand pounds per ton.

- (c) An owner or operator of the facility electing to demonstrate compliance with the annual VOC, HAP, and combined HAP emission limitations by calculating the actual facility emissions may use the actual material VOC contents and usage rates from records required by paragraph (A)(4)(k)(iii) of this rule. The calculations shall be performed annually using methods approved by the Ohio environmental protection agency.

(l) Mid-size printing facility permit-by-rule

(i) Qualifications

A printing facility that meets the following qualifications is eligible to use this permit-by-rule:

- (a) The facility has one or more printing lines which utilize only the screen, digital, flexographic, letterpress, non-heatset lithographic, or heatset lithographic printing processes, and which do not utilize add-on emission control equipment.
- (b) The facility emits no more than twenty-five tons of VOCs, five tons of a single HAP and 12.5 tons of combined HAPs in any rolling, twelve-month period as demonstrated by either calculating actual facility-wide emissions, using methods approved by the Ohio environmental protection agency, or by electing to comply with the material usage limitations specified in paragraph (A)(4)(l)(i)(c) of this rule.
- (c) In lieu of calculating emissions to demonstrate compliance with the facility emission limitations specified in paragraph (A)(4)(l)(i)(b) of this rule, the facility may elect to qualify for this permit-by-rule

by meeting the following material usage limitations for all materials employed at the facility in any rolling, twelve-month period:

- (i) Uses no more than one thousand three hundred thirty-three gallons of materials containing the same single HAP and no more than three thousand three hundred thirty-three gallons of materials containing any HAPs.
  - (ii) Operates only heatset offset lithographic printing lines and uses no more than fifty thousand pounds of ink, cleaning solvent, and fountain solution additives combined; or
  - (iii) Operates only non-heatset offset lithographic printing lines and uses no more than seven thousand one hundred gallons of cleaning solvent and fountain solution additives combined; or
  - (iv) Operates only digital printing lines and uses no more than six thousand gallons of solvent from inks and clean-up solutions and other solvent containing materials combined; or
  - (v) Operates only screen or letterpress printing lines and uses no more than seven thousand one hundred gallons of solvent from inks and clean-up solutions and other solvent containing materials combined; or
  - (vi) Operates only water-based or ultraviolet (UV)-cured material flexographic printing lines and uses no more than two hundred thousand pounds of water-based inks, coatings, and adhesives, combined; or
  - (vii) Operates only solvent based material flexographic printing lines and uses no more than fifty thousand pounds of solvent from inks, dilution solvents, coatings, clean-up solutions and adhesives, combined; or
  - (viii) Operates any combination of screen, digital, flexographic, letterpress, non-heatset lithographic, or heatset lithographic printing processes and the facility uses no more than the most stringent of the material usage limits contained in paragraphs (A)(4)(l)(iii) to (A)(4)(l)(viii) of this rule for the type of air contaminant source(s) at the facility.
- (d) The facility employs cleanup solutions which meet all of the following standards:

- (i) Cleanup solutions either shall not exceed thirty per cent VOC, by weight, as applied, or shall have a VOC composite partial pressure of ten millimeters of mercury (mmHg) or less at twenty degrees Celsius (sixty-eight degrees Fahrenheit).
- (ii) Cleanup solutions shall be kept in covered containers during transport and storage.
- (iii) Shop towels contaminated with cleanup solution shall be kept, when not in use, in covered containers.
- (iv) The use of cleanup solutions not meeting the condition in paragraph (A)(4)(1)(i)(d)(i) of this rule shall not exceed a combined total of one hundred ten gallons in any rolling, twelve-month period.

(ii) Applicable emission limitations and/or control requirements

- (a) The applicable rules, emission limitations, and control requirements that apply to the facility subject to this permit-by-rule are defined in the following table:

--

Applicable Rule(s)	Applicable Emission Limitations/Control Requirements
Paragraph (A)(3) of rule 3745-31-05 of the Administrative Code	Facility emissions shall not exceed twenty-five tons of VOC, five tons of a single HAP and 12.5 tons of combined HAPs for any rolling, twelve-month period.
Paragraph (Y)(2)(b) of rule 3745-21-09 of the Administrative Code (flexographic presses only)	Exempt from the requirements of paragraph (Y)(1) of rule 3745-21-09 of the Administrative Code since the qualifying criteria ensure that the combined maximum usage of coatings and inks in all presses at the facility is less than one hundred forty-eight tons per year.

(iii) Monitoring and/or recordkeeping requirements

- (a) The owner or operator of the printing facility shall maintain monthly records at the facility that list the following information for each graphic arts material (ink, fountain solution additives, cleanup solvents, etc.) employed in the facility:
  - (i) The name and identification number of each material employed.

- (ii) The quantity of each material employed, in gallons or pounds.
  - (iii) The OC content of each material, in pounds per gallon, or per cent by weight.
  - (iv) The individual HAP content for each HAP-containing material, in pounds of individual HAP per gallon of material.
  - (v) The total combined HAP content of each material, in pounds of combined HAP per gallon of material.
  - (vi) The rolling, twelve-month summation of usage in gallons of each graphic arts material employed if the facility elects to demonstrate compliance with the material usage limitations specified in paragraph (A)(4)(l)(i)(c) of this rule; or
  - (vii) The rolling, twelve-month summation of total facility emissions of VOC, individual HAP, and combined HAP from all graphic arts materials employed if the facility elects to calculate actual emissions to demonstrate compliance with the emission limitations specified in paragraph (A)(4)(l)(i)(b) of this rule.
- (iv) Testing requirements
- (a) Compliance with the rolling, twelve-month material usage thresholds and/or emission limitations shall be based upon the recordkeeping requirements specified in paragraph (A)(4)(l)(iii)(a) of this rule.
  - (b) For screen, letterpress, and non-heatset lithographic printing, compliance with the annual VOC emission limitation is based on the annual material usage limitations, in gallons, multiplied by a maximum VOC content of 7.0 pounds per gallon, and divided by two thousand pounds per ton. For digital printing, compliance with the annual VOC emission limitation is based on the annual material usage limitations, in gallons, multiplied by a maximum VOC content of 7.5 pounds per gallon, and divided by two thousand pounds per ton. For water-based or UV-cured flexographic printing, compliance with the annual VOC emission limitation is based on the annual material usage limitation, in pounds, multiplied by an assumed maximum VOC content of twenty-five per cent, and divided by two thousand pounds per ton. For solvent-based flexographic printing and heatset lithographic printing, compliance with the annual VOC emission limitation is based on the annual material usage limitation, in pounds,

multiplied by an assumed maximum VOC content of one hundred per cent, and divided by two thousand pounds per ton. For all printing types, compliance with the annual HAP emission limitations is based on the annual material usage limitations specified in paragraph (A)(4)(1)(i)(c)(i) of this rule, in gallons, multiplied by a maximum HAP content of 7.5 pounds per gallon, and divided by two thousand pounds per ton.

- (c) An owner or operator of the facility electing to demonstrate compliance with the annual VOC, HAP, and combined HAP emission limitations by calculating the actual facility emissions may use the actual material VOC contents and usage rates from records required by paragraph (A)(4)(1)(iii) of this rule. The calculations shall be performed using methods approved by the Ohio environmental protection agency.

(5) De minimis exemption

Air contaminant sources which meet the requirements of rule 3745-15-05 of the Administrative Code and section 3704.011 of the Revised Code are exempt from the requirements of this chapter.

3745-31-04      **Applications.**

- (A) Applications for permits-to-install and PTIOs required by rule 3745-31-02 of the Administrative Code shall contain such information as the director deems necessary to determine whether the criteria of rule 3745-31-05 of the Administrative Code are met and shall be made on forms prepared by the Ohio environmental protection agency.
- (B) Applications for permits-to-install and PTIOs shall be signed:
  - (1) In the case of a corporation, by a principal executive officer of at least the level of vice president, or his/her duly authorized representative, if such representative is responsible for the overall operation of the facility;
  - (2) In the case of a partnership, by a general partner;
  - (3) In the case of sole proprietorship, by the proprietor; and
  - (4) In the case of a municipal, state, federal or other governmental facility, by the principal executive officer, the ranking elected official, or other duly authorized employee.
- (C) The signatures shall constitute personal affirmation that all statements or assertions of fact made in the application are true and complete, comply fully with applicable state requirements, and shall subject the signatory to liability under applicable state laws forbidding false or misleading statements.
- (D) PTIO applications for grain and feed processing operations and fertilizer mixing operations
  - (1) A single PTIO application may be submitted for the following sources:
    - (a) Shellers, hammer mills and aspirated bagging operations and other air contaminant sources subject to rule 3745-17-11 of the Administrative Code and which are located at a stationary source which constitutes a grain and feed processing operation.
    - (b) Air contaminant sources which are subject to rule 3745-17-11 of the Administrative Code and which are located at a stationary source which constitutes a fertilizer mixing operation.
  - (2) A PTIO application for air contaminant sources of fugitive dust at grain and feed processing operations or a fertilizer mixing operation and which are subject to rule 3745-17-08 of the Administrative Code shall be submitted in accordance with applicable law.

3745-31-05      **Criteria for decision by the director.**

[Comment: For dates of non-regulatory government publications, publications of recognized organizations and associations, federal rules, and federal statutory provisions referenced in this rule, see the "Incorporation by Reference" section at the end of rule 3745-31-01 of the Administrative Code.]

(A) Permit-to-install or PTIO

The director shall issue a permit-to-install or PTIO, on the basis of the information appearing in the application, or information gathered by or furnished to the Ohio environmental protection agency, or both, if he/she determines that the installation, modification or operation of the air contaminant source will:

- (1) Not prevent or interfere with the attainment or maintenance of applicable ambient air quality standards; and
- (2) Not result in a violation of any applicable laws, including but not limited to:
  - (a) Emission standards adopted by the Ohio environmental protection agency;
  - (b) Federal standards of performance for new stationary sources adopted by the administrator of the United States environmental protection agency pursuant to Section 111 of the Clean Air Act and the regulations promulgated thereunder;
  - (c) Requirements pertaining to installation of major stationary sources or major modifications in attainment and nonattainment areas as contained in rule 3745-31-10 to rule 3745-31-27 of the Administrative Code.
  - (d) National emission standards for hazardous air pollutants adopted by the administrator of the United States environmental protection agency pursuant to Section 112 of the Clean Air Act and the regulations promulgated thereunder (including 40 CFR Part 61 and 40 CFR Part 63);
- (3) Employ BAT, when applicable, in accordance with the following:
  - (a) BAT shall be evaluated, determined and required in either the initial permit-to-install or PTIO issued for an air contaminant source or when a modification of the air contaminant source results in the issuance of a permit-to-install or PTIO, except:
    - (i) BAT is not required if the air contaminant source was installed on or before January 1, 1974;

- (ii) BAT is not required if the air contaminant source was installed or modified on or after August 3, 2006 and has the potential to emit, taking into account air pollution controls installed on the source, less than ten tons per year of emissions of an air contaminant or precursor of an air contaminant for which a national ambient air quality standard has been adopted under the Clean Air Act;
  - (iii) If the only requirement to obtain a permit-to-install or PTIO is due to the following, any existing BAT determination, when applicable, remains in effect and BAT shall not be reevaluated and redetermined:
    - (a) A modification as a result of the requirements of paragraph (QQQ)(1)(b) of rule 3745-31-01 of the Administrative Code; or
    - (b) The requirements of paragraph (F) of this rule; or
    - (c) An administrative modification.
  - (b) For air contaminant sources subject to an existing BAT determination, BAT shall be reevaluated and redetermined when a modification of the air contaminant source(s) occurs.
  - (c) Except as provided in paragraph (A)(3)(b) of this rule, BAT shall not be reevaluated and redetermined when a PTIO is renewed, notwithstanding a modification as defined in rule 3745-31-01 of the Administrative Code. However, any existing BAT determination remains in effect.
  - (d) BAT may be reevaluated and redetermined at any time, in accordance with the definition of BAT contained in rule 3745-31-01 of the Administrative Code, based on data available at the time the air contaminant source was initially installed or most recently modified, whichever occurs later.
  - (e) Any reevaluated and redetermined BAT shall be in effect upon completion of the physical change or change in the method of operation or, when a physical change for change in the method of operation is not applicable, upon issuance of the permit-to-install or PTIO. Prior to completion of the physical change or change in the method of operation or issuance of the permit-to-install or PTIO, any existing BAT determination remains in effect.
- (B) During operation, the air contaminant source shall be in compliance with applicable rules and laws or if either required by rule or when the director determines it is necessary, the owner or operator shall be required to submit an approvable compliance plan, as required by division (G) of section 3704.03 of the Revised Code, for incorporation into the permit terms and conditions. A compliance plan shall be approvable where it shows to the satisfaction of the director that:

- (1) Operation of the air contaminant source under the compliance plan will result in compliance with all applicable requirements and laws as expeditiously as practicable but no later than any date required by applicable law;
- (2) All reasonable interim control measures are identified; and
- (3) Where applicable, is consistent with and at least as stringent as any compliance schedule contained in any judicial consent decree or administrative order to which the air contaminant source is subject.

(C) Conditional PTIOs

If a new source that has been constructed, installed, located or modified in accordance with the provisions of a permit-to-install or PTIO, and otherwise in accordance with applicable law, is not subject to Chapter 3745-77 of the Administrative Code, is unable to comply with the terms and conditions of the permit and/or applicable law as of the date the source began operation, the director may grant a conditional PTIO to operate such source provided the owner or operator provides sufficient information to demonstrate:

- (1) The period is used to remedy any defect which prevents such compliance and the applicant demonstrates that compliance with emission standards prescribed by applicable law will be achieved as expeditiously as practicable; and
- (2) Any reasonably available alternative operating procedures and interim control measures have been used or will be used to reduce excess emissions; and
- (3) The continued operation of the source pursuant to the conditional PTIO will not endanger or threaten to endanger human health.

Conditional PTIOs shall contain such terms and conditions as the Ohio environmental protection agency determines necessary and appropriate.

(D) Special terms and conditions including federally enforceable limitations on potential to emit

The director may impose such special terms and conditions as are appropriate or necessary to ensure compliance with the applicable laws and to ensure adequate protection of environmental quality.

- (1) Special terms and conditions necessary to ensure compliance with requirements mandated by the Clean Air Act, which include regulations promulgated by the administrator there under, include synthetic minor emissions unit terms and conditions issued in a permit-to-install or PTIO and/or Federally Enforceable PTIO (FEPTIO). Such terms and conditions shall be federally enforceable and

may restrict a stationary source's potential to emit below major source thresholds, below thresholds for other Clean Air Act requirements, or place other restrictions on an air contaminant source or stationary source in order to avoid a Clean Air Act requirement(s). Federally enforceable terms and conditions, including limitations on the potential to emit of a source, will be designated as such through one of the following:

- (a) Terms and conditions of a final permit-to-install issued under this chapter; or
- (b) Terms and conditions of a final FEPTIO issued under this chapter; or

[Comment: In 59 FR 53586, October 25, 1994, (as revised in 60 FR 55200, October 30, 1995), the United States environmental protection agency approved rule language providing for the creation of a program for issuing federally enforceable state operating permits. See former rule 3745-35-07 of the Administrative Code. That approved rule language has been incorporated in paragraphs (D)(1) to (D)(4) of this rule. Consequently, such designated terms and conditions imposed in an FEPTIO under the approved program elements contained in the language of paragraphs (D)(1) to (D)(4) of this rule will be considered federally enforceable as of the effective date of this rule, unless and until the United States environmental protection agency later disapproves the language.]

- (c) Rules or orders of the director that are submitted to and approved by the administrator as revisions to the Ohio state implementation plan under Section 110 and 112(l) of the Clean Air Act.
- (2) In order to be federally enforceable, a limitation on the potential to emit of an air contaminant source or stationary source must:
- (a) Specify an annual limit on emissions from the source;
  - (b) Specify a short-term limit on emissions for each pollutant to be restricted, and specify a short-term limit on production or operation, provided that for purposes of limiting potential to emit, acceptable short-term limitations on production or operation shall include but not be limited to:
    - (i) A thirty-day summation limitation or three-hundred and sixty-five day rolling summation limitation computed each calendar day;
    - (ii) A monthly limitation; or
    - (iii) A rolling twelve-month summation limitation; and

- (c) Specify adequate and enforceable methods for establishing compliance with the annual and short-term limits, using methods from 40 CFR Part 60, Appendix A or 40 CFR Part 51, Appendix M where appropriate; and
  - (d) Be no less stringent than any federally applicable requirement to which the source is subject; and
  - (e) Be contained in a permit first issued as a draft or proposed action with an opportunity for public comment under rule 3745-47-05 of the Administrative Code with concurrent notice and opportunity for comment given to the administrator of the United States environmental protection agency region five. During the public comment period, if the administrator objects that the terms and conditions of the permit are not federally enforceable, the director shall not issue the permit until such objection has been resolved.
- (3) Only those terms and conditions issued in a permit under this chapter and in accordance with paragraph (D)(2) of this rule that are necessary to avoid a Clean Air Act requirement(s), including a limitation on the potential to emit of an air contaminant source or stationary source, and expressly designated as federally enforceable, shall be federally enforceable.
- (4) Upon the request of the owner or operator, any of the mechanisms provided in paragraph (D)(1) of this rule shall allow for trading of emissions increases and decreases among air contaminant sources located at the same stationary source that is consistent with the Clean Air Act for the purpose of complying with a federally enforceable cap on the potential to emit of the source. Such limitations shall ensure that the trades are quantifiable and enforceable and require seven-day advance notification to the appropriate Ohio environmental protection agency district office or delegated local air agency.
- (5) Relaxation of federally enforceable limitations

At such time that a particular stationary source or modification becomes a major stationary source or major modification solely by virtue of a relaxation in any federally enforceable term and condition or limitation established after August 7, 1980, on the capacity of the stationary source or modification otherwise to emit an air pollutant, such as a restriction on hours of operation, the requirements of rules 3745-31-10 to 3745-31-27 and 3745-31-30 to 3745-31-32 of the Administrative Code shall apply to the stationary source or modification as though construction had not yet commenced on the stationary source or modification.

(E) State-only enforceable limitations

The director may impose terms and conditions necessary to ensure compliance with any provisions of the statutes or regulations of the state of Ohio that are not mandated by the Clean Air Act or regulations adopted by the administrator thereunder, but such terms and conditions shall be enforceable as state law only, and shall be designated as such in the permit-to-install, PTIO or FEPTIO.

(F) Voluntary limits on allowable emissions

The owner or operator of any air contaminant source may apply for a permit-to-install or PTIO to voluntarily limit the allowable emissions from the air contaminant source or limit the type of air contaminants authorized to be emitted from the air contaminant source. The director shall act upon such application in accordance with the requirements of this rule, provided that paragraphs (A)(3) and (I) of this rule shall not apply unless the application is for the installation of a new source as defined by rule 3745-31-01 of the Administrative Code or is for a modification of an air contaminant source as defined by rule 3745-31-01 of the Administrative Code.

(G) Express permit-to-install or express PTIO processing

- (1) An applicant whose air contaminant source meets the following criteria may request in writing that the air contaminant source's application receives express permit-to-install or express PTIO processing as defined in rule 3745-31-01 of the Administrative Code. In order to be considered for express processing, the air contaminant source owner or operator must:
  - (a) Apply for a permit-to-install or a PTIO for a source undergoing installation or modification as defined in rule 3745-31-01 of the Administrative Code.
  - (b) Submit a complete permit-to-install or PTIO application,
  - (c) Demonstrate compliance with all applicable law,
  - (d) Have maximum uncontrolled emissions as defined in rule 3745-31-01 of the Administrative Code of less than five tons per pollutant per each year for particulate matter, sulfur dioxide, nitrogen oxides, and OCs,
  - (e) Not be subject to the United States environmental protection agency new source performance standards, and
  - (f) Not be subject to the national emission standards for hazardous air pollutants or a United States environmental protection agency promulgated standard for HAPs.
- (2) The issuance of an express permit-to-install or express PTIO does not relieve the applicant from compliance with any applicable air pollution control requirement and is at the discretion of the director.

(H) Site approval for portable sources

- (1) In determining whether the director issues a site approval for a portable source, the applicant must demonstrate that the following criteria have been met:
  - (a) The portable source continues to comply with the currently effective Ohio environmental protection agency permit-to-install, PTIO or registration status.
  - (b) The portable source was issued a permit-to-install or PTIO and where BAT requirements were defined in that permit-to-install or PTIO, the portable source continues to comply with any applicable BAT requirements.
  - (c) The portable source owner has identified the proposed site to Ohio environmental protection agency.
  - (d) Ohio environmental protection agency has determined that the portable source, at the proposed site, will have an acceptable environmental impact.
  - (e) A public notice, consistent with Chapter 3745-47 of the Administrative Code, is published in the county where the proposed site is located.
  - (f) The owner of the proposed site has provided the portable source owner with approval or equivalent declaration that it is acceptable to the site owner to move the portable source to this proposed site.
  - (g) The portable source owner has provided Ohio environmental protection agency with fifteen days advance written notice of the relocation.

[Comment: Relocation of any portable source that results in the installation of a major stationary source or the modification of a major stationary source must also meet all applicable requirements under this chapter, including the requirement to obtain a permit-to-install or PTIO prior to relocation. Relocation of any portable source that results in the creation of a major source, as defined in rule 3745-77-01 of the Administrative Code, must also meet all applicable requirements under the Title V program contained in Chapter 3745-77 of the Administrative Code, which may include the requirement to apply for a Title V permit.]

- (2) Site approvals expire and are renewed according to paragraph (C)(2) of rule 3745-31-07 of the Administrative Code.
- (I) In deciding whether to grant or deny a permit-to-install or PTIO, the director may take into consideration the social and economic impact of the air contaminants, water

pollutants, or other adverse environmental impact that may be a consequence of issuance of the permit-to-install or PTIO.

- (J) The director shall coordinate the review and issuance of an air pollution permit-to-install or PTIO with any other relevant Ohio environmental protection agency permit-to-install program. This coordination of an individual permit-to-install or PTIO shall involve the identification of materials to relevant programs and the coordination of the granting or denying of program separate or program combined permit-to-installs or PTIOs. A coordinated review and issuance of an air pollution permit-to-install or PTIO for an air contaminant source is typically needed for the following types of air contaminant sources and would be coordinated with the following divisions:

Air Contaminant Source Type	DHWM	DSW	DDAGW	DSIWM
Composting Facility	X	X	X	X
Degreasing/Cold Cleaning	X	X		
Dry Cleaning	X	X		
Gasoline Dispensing Facility	X	X		
Infectious Waste Incinerator	X	X		
Liquid Material Storage Tanks	X	X	X	
Loading Rack	X	X		
Painting Operations	X	X		
Printing Operations	X	X		
Sanitary Landfill		X	X	X
Solid Waste Incinerator		X		X
Solid Waste Transfer Facility		X	X	X
Sources with Baghouses	X			
Sources with Electrostatic Precipitators	X			
Sources with Scrubbers	X	X		
Hazardous Waste Management Unit	X	X	X	
Hazardous Waste Recycling Facility	X	X	X	

DHWM - division of hazardous waste management; DSW - division of surface water; DDAGW - division of drinking and ground waters; DSIWM - solid and infectious waste management

The director may consult with other Ohio environmental protection agency programs or other persons as he/she deems appropriate.

**Completeness determinations, processing requirements, public participation, public notice, and issuance.****(A) Completeness review time restriction**

Within sixty days after the director or his/her agent or authorized representative receives an application for the issuance of a permit to install or PTIO pursuant to rules adopted under division (F) of section 3704.03 of the Revised Code, or an application to modify such a permit, the director shall determine whether the application is substantially complete or materially deficient and shall notify the applicant, in writing, of the determination. If the director fails to make such a completeness determination and provide written notice of the determination to the applicant within sixty days after the application was submitted, the applicant may submit a written request to the director for the making of such a completeness determination.

**(B) Request for completeness determination**

Within thirty days after receiving a written request for the making of a completeness determination on an application under paragraph (A) of this rule, the director shall determine whether the application is substantially complete or materially deficient and, in writing, notify the applicant of his/her determination. If the director fails to make a completeness determination and provide written notice of his/her determination to the applicant within thirty days after receiving the applicant's written request for the making of the determination, the application shall be deemed to have been complete in all material respects at the time that it was submitted to the director or his/her agent or authorized representative.

**(C) Materially deficient applications**

If, within the time prescribed in paragraph (A) and, if applicable, paragraph (B) of this rule, the director or his/her agent or authorized representative determines that an application is materially deficient, the director shall return the application to the applicant. The running of the time prescribed under paragraph (A) of this rule and, if applicable, paragraph (B) of this rule ceases at the time that the determination is made. If the applicant subsequently resubmits the application to the director, the time prescribed in paragraph (A) of this rule and, if applicable, paragraph (B) of this rule shall resume running at the time that the application is resubmitted. The resubmission of the application constitutes a request for the making of a completeness determination on the application. The director shall do one of the following within the time remaining pursuant to paragraph (A) and, if applicable, paragraph (B) of this rule at the time that the application is resubmitted:

- (1) Make a completeness determination on the application and, in writing, notify the applicant of his/her determination;

(2) Issue or deny or propose to issue or propose to deny the permit or modification.

(D) Completeness date notification

The director shall include in each written notice of the completeness of an application provided under paragraph (A), (B), or (C)(1) of this rule the date on which the application was determined to be complete.

(E) Permit decision time limits and issuance or denial

A permit-to-install or PTIO shall be issued, modified or denied and may be challenged in accordance with the provisions of the rules of procedure of the Ohio environmental protection agency, Chapter 3745-47 of the Administrative Code.

(1) For the purposes of this paragraph, "initial construction PTIO" means a PTIO for an air contaminant source that is not currently regulated under a permit-to-install or PTIO.

(2) Permit-to-install, initial construction PTIO, or modification

(a) The director shall issue or deny or propose to issue or deny a permit-to-install or initial construction PTIO pursuant to rules adopted under division (F) of section 3704.03 of the Revised Code, or modification, as defined in rule 3745-31-01 of the Administrative Code, of such a permit within one hundred eighty days after the date the application for the permit or modification was determined to be complete as that date is set forth in the written notice of the determination of the completeness of the application provided under paragraph (A), (B), or (C)(1) of this rule or within one hundred eighty days after the application is deemed to be complete under paragraph (B) of this rule, as appropriate. If the director fails to issue or deny or propose to issue or deny the permit or modification within the appropriate one-hundred-eighty-day period, the applicant may bring a mandamus action to obtain a judgment that orders the director to take a final action on the application.

(3) PTIO for air contaminant sources currently regulated under a permit-to-install

(a) The director may issue or deny or propose to issue or deny a PTIO, where the applicant holds a previously issued permit-to-install for the same air contaminant source, pursuant to rules adopted under division (F) of section 3704.03 of the Revised Code as expeditiously as practicable, except:

(i) When the air contaminant source is considered a modification as defined in rule 3745-31-01 of the Administrative Code, then paragraph (E)(2) of this rule shall be applicable.

(4) Express permit-to-install or express PTIO

- (a) Within sixty days of the receipt of a complete request, the director shall notify the applicant whether the air contaminant source will be accepted for express processing of a permit-to-install or PTIO pursuant to paragraph (G) of rule 3745-31-05 of the Administrative Code. Installation or construction of the air contaminant source may commence after sixty days if the applicant has not been notified or upon the issuance of the express permit-to-install or express PTIO.
- (b) Within one hundred eighty days after a completed application is filed, the director shall issue or deny or propose to issue or deny an express permit-to-install or express PTIO.

(5) Administratively modified permit-to-install or PTIO

- (a) The director may issue or deny or propose to issue or deny a permit-to-install or PTIO that meets the definition of an administrative modification in rule 3745-31-01 of the Administrative Code, pursuant to rules adopted under division (F) of section 3704.03 of the Revised Code, as expeditiously as practicable.

(6) Renewal PTIO

- (a) The director shall issue or deny or propose to issue or deny a renewal PTIO pursuant to rules adopted under division (F) of section 3704.03 of the Revised Code within one hundred eighty days after the date the application for the renewal PTIO was determined to be complete as that date is set forth in the written notice of the determination of the completeness of the application provided under paragraph (A), (B), or (C)(1) of this rule or within one hundred eighty days after the application is deemed to be complete under paragraph (B) of this rule, as appropriate. If the director fails to issue or deny or propose to issue or deny the renewal PTIO within the appropriate one hundred eighty day period, the applicant may bring a mandamus action to obtain a judgment that orders the director to take a final action on the application.
- (b) In accordance with division (C) of section 119.06 of the Revised Code, when an applicant submits a timely and complete renewal application pursuant to applicable law and the terms and conditions of the PTIO, the permittee's failure to have a renewed PTIO is not a violation of this chapter. Upon expiration of the PTIO, the permittee shall continue to operate under the terms and conditions of an expired PTIO until issuance of a renewal PTIO by the director.

(F) Extension of the permit review time period for the public

The director, upon his/her own motion or upon the written request of the applicant and in writing, may extend the time provided under paragraph (E) of this rule for issuing or denying or proposing to issue or deny the permit or modification for an additional sixty days if a public meeting or public hearing was held on the application for the permit or modification.

(G) Extensions of the permit review time period for the applicant

Upon the written request of the applicant, the director, in writing, may extend the time provided under paragraph (E) of this rule for issuing or denying or proposing to issue or deny the permit or modification for the additional time specified in the applicant's request for the extension.

(H) Public participation/notification requirements

The director shall:

- (1) Notify the public, by advertisement in a newspaper of general circulation in each county in which the proposed air contaminant source would be constructed and operated, of the application, the draft action (if issued), the ambient air impact that is expected from the nonattainment NSR permit or the PSD permit, if any, and of the opportunity to request a public hearing, comment at that public hearing and/or submit written comments on any draft action. This notice shall follow the requirements under Chapter 3745-47 of the Administrative Code.
- (2) Send a copy of the notice of public comment to the applicant, the administrator of the United States environmental protection agency, and to officials and agencies having jurisdiction over the location where the proposed air contaminant source would be built as follows:
  - (a) Any other state or local air pollution control agencies;
  - (b) The chief executives of the city and county where the air contaminant source would be located;
  - (c) Any comprehensive regional land use planning agency; and
  - (d) Any federal land manager, Indian governing body, or state whose lands may be affected (in the director's judgment) by emissions from the air contaminant source or modification.
- (3) For all draft action permits-to-install or PTIOs, upon request, provide opportunity for a public hearing for interested persons to appear and submit written or oral

comments on the air quality impact of the air contaminant source, alternatives to it, the control technology required, and other appropriate considerations.

- (4) Consider all written comments submitted within the period specified in the notice of public comment and all comments received at any public hearing(s) in making a final decision on the approvability of the application. The director shall make all comments available for public inspection.
- (5) Notify the applicant in writing of the final determination and make such notification available for public inspection.

11/3/06, 12/1/06

**Termination, revocation, expiration, renewal, revision and transfer.****(A) Termination**

- (1) Authorization to install or modify an air contaminant source(s) contained in an issued permit-to-install or PTIO shall terminate within eighteen months of the effective date of the issuance of the permit-to-install or PTIO that authorized the installation or modification, if the owner or operator has not undertaken a continuing program of installation or modification or has not entered into a binding contractual obligation to undertake and complete within a reasonable time a continuing program of installation or modification of the air contaminant source(s).
- (2) The director may administratively modify a permit-to-install or PTIO to extend these dates of termination by up to twelve months if the applicant submits, within a reasonable time before the termination date, a request for an administrative modification, containing information that, in the judgment of the director, adequately justifies an extension of time. No appeal taken from denial of extension of a termination date shall prevent termination of a permit during the period between denial of extension and final disposition of the appeal unless prohibited by any court or administrative body having jurisdiction over the matter.
- (3) A permit-to-install, permit-to-operate or PTIO may be terminated in accordance with paragraph (A)(2) or (B)(1)(c) of rule 3745-31-02 of the Administrative Code.

**(B) Revocation**

- (1) The director may revoke a permit-to-install or PTIO, if the director concludes at any time that any applicable laws have been or are likely to be violated.
- (2) The director may also revoke, or partially revoke, a permit-to-install, PTIO or variance if the permittee requests revocation for cause and the director determines that granting the requested revocation will not result in the violation of any applicable laws. When a permittee requests a revocation, the director, without prior hearing, shall make a final determination on the application.
- (3) Revocation, pursuant to paragraph (B)(1) of this rule, of a permit-to-install, PTIO or variance shall be final thirty days after service of notice to the permit holder.
- (4) The Ohio environmental protection agency shall afford a prompt hearing to any permit holder whose permit-to-install or PTIO is revoked, except as described

in paragraph (B)(2) of this rule, in the manner prescribed in Chapter 3745-47 of the Administrative Code.

- (5) A variance issued pursuant to rule 3745-31-09 of the Administrative Code may be revoked if:
  - (a) The director determines that any of the terms, conditions, standards, or requirements of rule 3745-31-09 of the Administrative Code have been or will be violated or that circumstances have changed so that the applicant is no longer eligible for a variance under that rule, or
  - (b) The signatory fails to file an interim report as required pursuant to paragraph (G)(4) of rule 3745-31-09 of the Administrative Code, or if such report fails to satisfy the director that the source is making satisfactory progress, or
  - (c) False or misleading statements are made in an interim report required pursuant to paragraph (G)(4) of rule 3745-31-09 of the Administrative Code.

(C) Expiration and renewal

- (1) A PTIO may be issued for a period of time consistent with the requirements of division (G) of section 3704.03 of the Revised Code, and is subject to renewal pursuant to rule 3745-31-05 of the Administrative Code.
  - (a) A conditional PTIO issued pursuant to paragraph (B) of rule 3745-31-05 of the Administrative Code shall be effective for such reasonable periods as the director may determine on a case-by-case basis consistent with the requirements of division (G) of section 3704.03 of the Revised Code. A conditional PTIO may not be renewed; however, the effective date may be extended for such reasonable periods as the director may determine on a case-by-case basis provided the total time period of effectiveness is consistent with the requirements of division (G) of section 3704.03 of the Revised Code.
  - (b) A FEPTIO issued pursuant to paragraph (D) of rule 3745-31-05 of the Administrative Code shall be effective for a period of time consistent with the requirements of division (G) of section 3704.03 of the Revised Code but no longer than five years, and is subject to renewal.
- (2) A permit-to-install does not expire and is not renewable.
- (3) Any site approval for a portable source issued pursuant to paragraph (H) of rule 3745-31-05 of the Administrative Code may be issued for a period of time consistent with the requirements of division (G) of section 3704.03 of the

Revised Code, and is subject to renewal pursuant to paragraph (H) of rule 3745-31-05 of the Administrative Code.

- (4) Any variance issued pursuant to rule 3745-31-09 of the Administrative Code may be issued for a period of time consistent with the requirements of division (H) of section 3704.03 of the Revised Code, and is subject to renewal. A variance may be renewed only when the Ohio environmental protection agency is satisfied that the source for which the variance was granted is making satisfactory progress toward achievement of the program specified in any compliance schedule incorporated into the variance and/or is complying with any other terms and conditions of the variance. Renewal shall be considered pursuant to rule 3745-31-09 of the Administrative Code.

(D) Revision

- (1) Any PTIO or variance issued by the director shall be subject to revision by the director in response to changes in applicable law or other factors affecting the compliance of the air contaminant source with the standards or conditions of any currently effective permit.
- (2) The director may revise any site approval for a portable source issued pursuant to paragraph (H) of rule 3745-31-05 of the Administrative Code to add or delete certain portable sources or add or delete certain terms and conditions as appropriate.
- (3) The director may require the owner or operator to submit a permit application pursuant to rule 3745-31-05 of the Administrative Code to fulfill the requirements of paragraph (D) of this rule.

(E) Transfer

- (1) The transferee of any permit-to-install, PTIO or variance shall assume personally the responsibilities of the original permit holder-transferor. The Ohio environmental protection agency must be notified in writing, in a manner prescribed by the director, of any transfer of a permit once the transfer has been completed.

**Registration status permit-to-operate.**

(A) For purposes of paragraph (B) of this rule:

- (1) "Maximum potential yearly emissions" means the total weight of lead, organic compounds, particulates or sulfur dioxide which is, or in the absence of control equipment would be, emitted from an air contaminant source in any one calendar year.
- (2) "Registration status" means that the source may be operated without having obtained a permit-to-operate or variance, and exists upon notification as provided by the director.

(B) Prior to the effective date of this rule, the director may have placed an air contaminant source on registration status after submittal of an application for a permit-to-operate, rather than issuing a permit-to-operate, if the owner or operator of such source demonstrated to the satisfaction of the director that the source was in compliance with applicable law and if the following conditions were met:

- (1) The source was not subject to any mass emissions limitation or control requirement specified within or pursuant to any applicable law; or
- (2) The source was subject to a mass emissions limitation or control requirement specified solely within Chapter(s) 3745-17, 3745-18 and/or 3745-21 of the Administrative Code; the maximum potential yearly emissions of lead and organic compounds from the source was each less than five tons; and the maximum potential yearly emissions of particulates and sulfur dioxide from the source were each less than twenty-five tons.

(C) An air contaminant source placed on registration status as of the effective date of this rule may remain on registration status until removed in accordance with paragraph (D) or (E) of this rule.

(D) The director may at any time require the owner or operator of an air contaminant source which obtained registration status prior to the effective date of this rule, to submit an updated application for a PTIO or variance and/or to demonstrate its continued compliance with the requirements of paragraph (B) of this rule. If the owner or operator complies with this request of the director within a reasonable period of time as specified by the director, the updated application shall be processed in accordance with applicable law, including continuation of the existing registration status if appropriate. If the owner or operator fails to comply with this request of the director within a reasonable period of time as specified by the director, the permit-to-operate application previously submitted by such owner or operator for such source shall be removed from registration status and processed in accordance with applicable law. Any subsequent permit denial or notice of application deficiency

shall serve as notice to the owner or operator of the source that the permit-to-operate application for such source has in fact been removed from registration status.

- (E) The director may revoke a registration status obtained prior to the effective date of this rule if the permittee requests revocation for cause and the director determines that granting the requested revocation will not result in the violation of any applicable laws. When a permittee requests a revocation pursuant to the paragraph, the director, without prior hearing, shall make a final determination on the request.

Revocation of registration status shall be final immediately after service of notice to the registration status holder.

3745-31-09      **Variations on operation.**

[Comment: For dates of non-regulatory government publications, publications of recognized organizations and associations, federal rules, and federal statutory provisions referenced in this rule, see the "Incorporation by Reference" paragraph at the end of rule 3745-31-01 of the Administrative Code.]

(A) A variance may be applied for and obtained from the director that allows operation or other use of an air contaminant source that emits an air pollutant in violation of an applicable law pursuant to the provisions of this rule, except:

- (1) No variance shall be granted from Chapter 3745-19 of the Administrative Code governing open burning, and
- (2) No variance shall be granted to a new source, as defined in rule 3745-31-01 of the Administrative Code, from any emissions limitation which was applicable to the source as a new source, and
- (3) No variance from any rule of the director adopted under Chapter 3704. of the Revised Code may be granted except pursuant to this rule.

(B) Applications for variances shall meet the requirements of rules 3745-31-02 and 3745-31-04 of the Administrative Code

- (1) Any variance application that fails to provide information needed to provide a factual basis for ascertaining compliance with each of the relevant requirements of this rule may be considered defective and be treated as if it had not been filed. Such application shall be returned to the applicant as expeditiously as practicable with an indication of the deficiencies therein. Further processing of the application, including issuance of a proposed or final action or the initiation of any other official response by the Ohio environmental protection agency with respect to the application, will not occur until deficiencies have been remedied.
- (2) An application which seeks a variance pursuant to this rule which allows an applicant to emit an air pollutant at a specified level in excess of emissions standards prescribed by applicable law without requiring eventual compliance with such standards shall specify the level of emission sought. Any such application which fails to so specify may be treated as a deficient application as set forth in paragraph (B)(1) of this rule.

(C) Standards for granting variances

- (1) A variance for an air contaminant source may allow an applicant:

- (a) To emit from such source a specified level of emissions of the particular air contaminant which exceeds the level permitted by applicable law, without achieving eventual compliance with the level permitted by applicable law; or
  - (b) To achieve compliance with applicable law pertaining to the particular air contaminant, pursuant to a compliance schedule included as a term and condition of the variance, on a date later than the date provided by applicable law upon which compliance by such source must be achieved; or
  - (c) To emit an air contaminant in accordance with both paragraphs (C)(1)(a) and (C)(1)(b) of this rule.
- (2) A variance may be issued only if the applicant either demonstrates the requirements of paragraphs (C)(2)(a) to (C)(2)(c) of this rule, paragraph (C)(2)(e) of this rule, and paragraph (C)(2)(f) of this rule, or, demonstrates the requirements of paragraphs (C)(2)(d) to (C)(2)(f) of this rule:
- (a) Either:
    - (i) The ambient air quality standards for the particular air contaminant to which the requested variance pertains are currently being met throughout the region affected by the emissions from the air contaminant source; or
    - (ii) The emission of air contaminants in accordance with the variance will not prevent or interfere with the attainment of ambient air quality standards by contributing, either singly or in conjunction with other sources, to a failure to attain ambient air quality standards by the date or dates prescribed by applicable law throughout the region affected by the emissions from the air contaminant source;
  - (b) The emission of air contaminants in accordance with the variance will not prevent or interfere with the maintenance of ambient air quality standards by contributing, either singly or in conjunction with other sources, to a failure to maintain ambient air quality standards throughout the region affected by the emissions from the air contaminant source for the particular air contaminant to which the requested variance pertains after such ambient air quality standards are attained;
  - (c) The variance is necessary because compliance with the emission standard from which the variance is sought is, and, to the extent applicant has not complied with such emission standards, has been since the adoption of such emission standard, technically infeasible, economically unreasonable, or impossible because of conditions beyond the control of the applicant;

(d) Bubble concept:

- (i) An alternative emission control strategy (bubble concept) is provided which will allow emissions of air contaminant from the source for which the variance is requested to exceed the level permitted by applicable law and will also require emissions of the same air contaminant from another source or sources to be less than the level(s) permitted by applicable law. The alternative emission control strategy shall:
  - (a) Result in a reduction in actual emissions of the air contaminant from such other source or sources which is equivalent to or greater than the reduction which would occur if the source for which the variance is requested were to comply with applicable law;
  - (b) Result in an actual net ambient air quality improvement which is as good as, or better than, that which would occur if the source for which the variance is requested were to comply with applicable law and if all such other sources were to either comply with applicable law or maintain their actual level of emissions if such level is less than permitted by applicable law;
  - (c) Include applications for variances or PTIOs (or modifications of existing variances or PTIOs) for such other sources at the same facility that specify a level of allowable emissions of an air contaminant which is below the level established by applicable law and which satisfies the requirements of paragraphs (C)(2)(d)(i)(a) and (C)(2)(d)(i)(b) of this rule:
- (ii) Air contaminants from different sources shall be considered to be the same for purposes of paragraph (C)(2)(d)(i) of this rule only if they are comparable in terms of type of contaminant.
- (iii) Emissions of particulates of the following types shall not be considered, for purposes of paragraph (C)(2)(d)(i) of this rule to be the same as emissions of particulates of any other types:
  - (a) Asbestos;
  - (b) Beryllium;
  - (c) Coke oven emissions;
  - (d) Lead; and
  - (e) Mercury.

(iv) Emissions of organic compounds of the following types shall not be considered, for purpose of paragraph (C)(2)(d)(i) of this rule, to be the same as emissions of organic compounds of any other types:

(a) Benzene; and

(b) Vinyl chloride.

(e) Such compliance with applicable law or other terms and conditions as is required by the variance will be achieved as expeditiously as practicable;

(f) If any rule from which a variance is sought has been approved by the administrator of the United States environmental protection agency as part of the Ohio state implementation plan, the applicant must demonstrate those matters required by federal law or regulations, including, but not limited to 42 USC 7410 and 40 CFR Parts 51 and 52 for approval of a revision to the plan, except approval by the administrator or his/her representative as a revision to the Ohio state implementation plan.

(D) The director retains the discretion to deny the application upon consideration of evidence regarding matters specified in division (H) of section 3704.03 of the Revised Code which is submitted by the applicant, developed by the agency, or obtained from another source, even though the demonstrations required by paragraph (C) of this rule have been made.

(E) Action on applications for variance

(1) Prior to taking any action on any application for a variance, the Ohio environmental protection agency may hold a public meeting on the proposed variance in the manner specified in Chapter 3745-47 of the Administrative Code.

(2) The director shall act on an application for a variance within six months of the filing of a complete application by issuing a proposed or final action.

(3) Variances under this rule shall be issued, denied, modified, or revoked and may be challenged in accordance with the provisions of Chapter 3745-47 of the Administrative Code.

(a) In issuing, denying, modifying, or revoking any variance, the director shall state his/her reasons in writing. The decision and reasons shall be made publicly available at the cost of reproduction and handling.

(F) Variances from rules contained in the Ohio state implementation plan

- (1) A variance from a rule which has been approved by the administrator of the United States environmental protection agency as part of the Ohio state implementation plan shall not be issued unless:
  - (a) Such variance has been submitted to the administrator as a revision to the Ohio state implementation plan pursuant to applicable law, including, but not limited to, 42 USC 7410 and 40 CFR Parts 51 and 52; and
  - (b) All requirements of applicable law, including, but not limited to, 40 CFR Parts 51 and 52 have been met, except approval by the administrator or his/her representative as a revision to the Ohio state implementation plan; and
  - (c) The variance contains a condition that the variance will not be effective until approved by the administrator or his/her representative as a revision of the Ohio state implementation plan.
  - (d) If a variance has been approved by the administrator pursuant to paragraph (F)(1) of this rule, a renewal of such variance shall not be subject to the requirements of paragraph (F)(1) of this rule unless a significant difference exists between the material aspects of such variance and the renewed form of such variance. For the purposes of paragraph (F)(1) of this rule, a significant difference shall include any change in the final compliance date of any compliance schedule.
- (2) Upon issuance of a variance authorizing emissions as described in paragraph (C)(1)(a) or (C)(1)(c) of this rule, and upon approval thereof by the administrator as provided by paragraph (F)(1)(c) of this rule, if applicable, the director shall propose to amend the rule from which the variance is issued to provide for emissions authorized by the variance. The amended rule shall be proposed only if, in the director's judgment, such amended rule will conform to all requirements of applicable law, including, if applicable, requirements regarding implementation plans. Following rulemaking procedures mandated by law on the proposal, the director shall take such action on the proposal as is lawful and reasonable.

(G) Terms and conditions of variations

- (1) A single variance issued pursuant to this rule for an air contaminant source may provide the applicant relief from more than one emission limitation.
- (2) Except as otherwise appropriate under paragraph (C) of this rule, an approved compliance schedule shall be incorporated into any variance granted.
- (3) Each variance issued pursuant to this rule and each variance or PTIO issued to another source pursuant to paragraph (C)(2)(d) of this rule shall include as terms

and conditions a specified emission limit for each air contaminant for which a variance is granted and test methods for demonstrating compliance with such emissions limits.

- (4) In addition to the other registration and reporting requirements of all air contaminant sources, the holder of a variance which contains a compliance schedule shall file reports every two months or as otherwise required by the Ohio environmental protection agency. Such reports shall be signed by the applicant for the variance. These reports shall demonstrate to the satisfaction of the director that the source for which the variance was issued is making consistent progress and has met all interim deadlines specified in the compliance schedule or specified by the Ohio environmental protection agency.
- (H) The possession of a variance shall not relieve the holder of responsibility to comply with all other applicable law and rules of the Ohio environmental protection agency.
- (I) Variances may be revoked pursuant to paragraph (B)(5) of rule 3745-31-07 of the Administrative Code.

3745-31-10      **NSR projects at existing emissions units at a major stationary source.**

(A) The following provisions apply to NSR projects at existing emissions units at a major stationary source (other than NSR projects at a stationary source with a PAL) in circumstances where there is a reasonable possibility that a NSR project that is not part of a major modification may result in a significant emissions increase and the owner or operator elects to use the method specified in paragraph (AAAAA) of rule 3745-31-01 of the Administrative Code for calculating projected actual emissions.

(1) Before beginning actual construction of the NSR project, the owner or operator shall document and maintain a record of the following information:

(a) A description of the NSR project;

(b) Identification of the emissions unit(s) whose emissions of a regulated NSR pollutant could be affected by the NSR project; and

(c) A description of the applicability test used to determine that the NSR project is not a major modification for any regulated NSR pollutant, including the baseline actual emissions, the projected actual emissions, the amount of "could have accommodated" emissions excluded under paragraph (AAAAA)(1)(c) of rule 3745-31-01 of the Administrative Code and an explanation for why such amount was excluded, and any netting calculations, if applicable.

(2) Before beginning actual construction, regardless of whether the owner or operator determines there is a reasonable possibility that a NSR project that is not part of a major modification may result in a significant emissions increase, the owner or operator shall provide a copy of the information set out in paragraph (A)(1) of this rule to the director for:

(a) New or modified emissions units where the sum of the federally enforceable potential to emit of the new or modified emissions units associated with the NSR project prior to the issuance of the NSR project's permit-to-install is greater than any one of the significant levels found in the significant definition of rule 3745-31-01 of the Administrative Code.

(b) Any emissions unit that is an existing electric utility steam generating unit.

(c) Unless required elsewhere in this rule, nothing in this paragraph shall be construed to require the owner or operator of such emissions unit to obtain any determination from the director before beginning actual construction.

- (3) The owner or operator shall monitor the emissions of any regulated NSR pollutant that could increase as a result of the NSR project and that is emitted by any emissions units identified in paragraph (A)(1)(b) of this rule; and calculate and maintain a record of the annual emissions, in tons per year on a calendar year basis, for a period of five years following resumption of regular operations after the change, or for a period of ten years following resumption of regular operations after the change if the NSR project increases the design capacity or potential to emit of that regulated NSR pollutant at such emissions unit.
  - (4) If the emissions unit is an existing electric utility steam generating unit, the owner or operator shall submit a report to the director within sixty days after the end of each year during which records must be generated under paragraph (A)(3) of this rule setting out the emissions unit's annual emissions during the year that preceded submission of the report.
  - (5) If the emissions unit is an existing emissions unit other than an electric utility steam generating unit, the owner or operator shall submit a report to the director if the annual emissions, in tons per year, from the NSR project identified in paragraph (A)(1) of this rule, exceed the baseline actual emissions (as documented and maintained pursuant to paragraph (A)(1)(c) of this rule, by a significant amount for that regulated NSR pollutant, and if such emissions differ from the preconstruction projection as documented and maintained pursuant to paragraph (A)(1)(c) of this rule. Such report shall be submitted to the director within sixty days after the end of such year. The report shall contain the following:
    - (a) The name, address and telephone number of the major stationary source;
    - (b) The annual emissions as calculated pursuant to paragraph (A)(3) of this rule; and
    - (c) Any other information that the owner or operator wishes to include in the report (e.g., an explanation as to why the emissions differ from the preconstruction projection).
- (B) The owner or operator of the source shall make the information required to be documented and maintained pursuant to this rule available for review upon request.

3745-31-11 **Attainment provisions - ambient air increments, ceilings and classifications.**

[Comment: For dates of non-regulatory government publications, publications of recognized organizations and associations, federal rules, and federal statutory provisions referenced in this rule, see the "Incorporation by Reference" section at the end of rule 3745-31-01 of the Administrative Code.]

(A) Applicability

This rule applies to any major stationary source or major modification that is to be constructed in an area designated in 40 CFR 81.336 as attainment for an air pollutant for which the major stationary source or major modification is major.

(B) Allowable increments

The director shall require, through the issuance of a permit-to-install pursuant to rules adopted under division (F) of section 3704.03 of the Revised Code, the emission limitations and such other measures as may be necessary to assure that, in areas designated attainment below as Class I, Class II or Class III, increases in ambient air pollutant concentration over the baseline concentration shall be limited to the following:

--

Maximum Allowable Increase ( $\mu\text{g}/\text{cm}$ )				
Air Pollutant	Averaging Period	Class I	Class II	Class III
Particulate matter				
PM10	annual arithmetic mean	4	17	34
PM10	twenty-four-hour maximum	8	30	60
Sulfur dioxide				
	annual arithmetic mean	2	20	40
	twenty-four-hour maximum	5	91	182
	three-hour maximum	25	512	700
Nitrogen dioxide				
	annual arithmetic mean	2.5	25	50

For any period other than an annual period, the applicable maximum allowable increase may be exceeded during one such period per year at any one location.

(C) Ambient air ceilings

The director, through the issuance of a permit-to-install pursuant to rules adopted under division (F) of section 3704.03 of the Revised Code, shall provide that no ambient concentration of an air pollutant shall exceed:

- (1) The concentration permitted under the national secondary ambient air quality standard, or
- (2) The concentration permitted under the national primary ambient air quality standard, whichever concentration is lowest for the air pollutant for a period of exposure.

(D) Restrictions on area classifications

- (1) All of the following areas, if in existence of August 7, 1977, shall remain Class I areas:
  - (a) International parks;
  - (b) National wilderness areas that exceed five thousand acres in size;
  - (c) National memorial parks that exceed five thousand acres in size; and
  - (d) National parks that exceed six thousand acres in size.
- (2) Areas that were assigned as Class I under regulations promulgated before August 7, 1977 shall remain Class I but may be reassigned as provided in this rule.
- (3) All areas of the state are designated Class II but may be redesignated as provided in this rule.
- (4) The following areas may be redesignated only as Class I or II:
  - (a) An area that, as of August 7, 1977, exceeded ten thousand acres in size and was a national monument, a national primitive area, a national preserve, a national recreational area, a national wild and scenic river, a national wildlife refuge, a national lakeshore or seashore; and
  - (b) A national park or national wilderness area established after August 7, 1977 that exceeds ten thousand acres in size.
- (5) The extent of areas designated as Class I under paragraph (D)(1) of this rule or Class I or II under paragraph (D)(4) of this rule shall conform to any changes in the boundaries of an area that have occurred since August 7, 1977 or that may occur.

(E) Exclusions from increment consumption

- (1) The following ambient concentrations shall be excluded in determining increment compliance with a maximum allowable increase:

- (a) Concentrations attributable to the increase in emissions from emissions units that have converted from the use of petroleum products, natural gas, or both by reason of an order in effect under Section 2(A) and (B) of the Energy Supply and Environmental Coordination Act of 1974 (or any superseding legislation) over the emissions from such emissions units before the effective date of such an order;
- (b) Concentrations attributable to the increase in emissions from emissions units that have converted from using natural gas by reason of natural gas curtailment plan in effect pursuant to the Federal Power Act over the emissions from such emissions units before the effective date of such plan;
- (c) Concentrations of particulate matter attributable to the increase in emissions from construction or other temporary emission-related activities of new or modified emissions units;
- (d) The increase in concentrations attributable to new emissions units outside the United States over the concentrations attributable to existing emissions units that are included in the baseline concentration; and
- (e) Concentrations attributable to the temporary increase in emissions of sulfur dioxide, particulate matter or nitrogen oxides from emissions units that are affected by Ohio state implementation plan revisions approved by the Administrator of the United States environmental protection agency as meeting the criteria specified as follows:
  - (i) Such time is not to exceed two years in duration unless a longer time is approved by the Administrator of the United States environmental protection agency;
  - (ii) The time period for excluding certain contributions, in accordance with paragraph (E)(1)(e)(i) of this rule, is not renewable;
  - (iii) No emissions increase from an emissions unit can:
    - (a) Impact a Class I area or an area when an applicable increment is known to be violated; or
    - (b) Cause or contribute to the violation of a national ambient air quality standard;
    - (c) Limitations under paragraph (E)(1)(e)(iii)(a) and (E)(1)(e)(iii)(b) of this rule must be in effect at the end of the time period specified in accordance with paragraph (E)(1)(e)(i) of this rule that would ensure that the emission levels from emissions units affected by the

Ohio state implementation plan revision would not exceed those levels occurring from such emissions units before the plan revision was approved.

- (2) No exclusion of such concentrations shall apply more than five years after the effective date of the order to which paragraph (D)(1)(a) of this rule refers, or the plan to which paragraph (E)(1)(b) of this rule refers, whichever is applicable. If both such order and plan are applicable, no such exclusions shall apply more than five years after the later of such effective dates.
- (3) No exclusion under paragraph (E) of this rule shall occur later than nine months after August 7, 1980 unless an Ohio state implementation plan revision meeting the requirements of 40 CFR 51.166 has been submitted to the administrator of the United States environmental protection agency.

(F) Class redesignation

- (1) All attainment areas of the state (except as otherwise provided under paragraph (D) of this rule) shall be designated Class II.
- (2) Upon due consideration, the director may submit to the administrator of the United States environmental protection agency a proposal to redesignate to attainment any area of the state to Class I or Class II provided that:
  - (a) At least one public hearing has been held in accordance with procedures established in Chapter 3745-47 of the Administrative Code;
  - (b) Other states, Indian governing bodies and federal land managers whose lands may be affected by the proposed redesignation were notified at least thirty days prior to the public hearing;
  - (c) A discussion of the reasons for the proposed redesignation, including a satisfactory description and analysis of the health, environmental, economic, social and energy effects of the proposed redesignation, were prepared and made available for public inspection at least thirty days prior to the hearing, and the notice announcing the hearing contained appropriate notification of the availability of such discussion;
  - (d) Prior to the issuance of notice respecting the redesignation of an attainment area that includes any federal lands, the state has provided written notice to the appropriate federal land manager and afforded adequate opportunity (not in excess of sixty days) to confer with the state respecting the redesignation and to submit written comments and recommendations. In redesignating any attainment area with respect to which any federal land manager had submitted written comments and recommendations, the state shall have published a list of any inconsistency between such redesignation

and such comments and recommendations (together with the reasons for making such redesignation against the recommendation of the federal land manager); and

- (e) The state has proposed the redesignation after consultation with the elected leadership of local and other substate general purpose governments in the attainment area covered by the proposed redesignation.
- (3) Any area other than an area for which paragraph (D) of this rule restricts redesignation may be redesignated as Class III if:
- (a) The redesignation would meet the requirements of paragraph (F)(2) of this rule;
  - (b) The redesignation has been specifically approved by the governor, after consultation with the appropriate committees of the general assembly, if it is in session, or with the leadership of the general assembly, if it is not in session, and if general purpose units of the local government representing a majority of the residents of the area to be redesignated enact legislation or pass resolutions concurring in the redesignation;
  - (c) The redesignation would not cause, or contribute to, a concentration of any air pollutant that would exceed any maximum allowable increase permitted under the classification of any other area or any national ambient air quality standard; and
  - (d) Any permit application for any major stationary source or major modification, subject to review under paragraph (F)(1) of this rule, which could receive a permit under this section only if the area in question were redesignated as Class III, and any material submitted as part of that application, were available insofar as was practicable for public inspection prior to any public hearing on redesignation of the area as Class III.

3745-31-12      **Attainment provisions - data submission requirements.**

[Comment: For dates of non-regulatory government publications, publications of recognized organizations and associations, federal rules, and federal statutory provisions referenced in this rule, see the "Incorporation by Reference" section at the end of rule 3745-31-01 of the Administrative Code.]

(A) Applicability

This rule applies to any major stationary source or major modification that is to be constructed in an area designated in 40 CFR 81.336 as attainment for an air pollutant for which the major stationary source or major modification is major.

(B) Data submission authority

The owner or operator of a proposed major stationary source or major modification shall submit all information necessary to perform any analysis or make any determination required under this rule.

(C) Minimum data submission requirements

The information required under paragraph (A) of this rule shall include:

- (1) A description of the nature, location, design capacity and typical operating schedule of the major stationary source or major modification, including specifications and drawings showing the emissions units design and plant layout;
- (2) A detailed schedule for construction of the major stationary source or major modification;
- (3) For each emissions unit a detailed description as to what system of continuous emissions reduction is planned by the major stationary source or major modification, emission estimates, including maximum emissions rates and any other information as necessary to determine that BACT as applicable would be applied;
- (4) The air quality impact of the major stationary source or major modification, including meteorological and topographical data necessary to estimate such impact; and
- (5) The air quality impacts and the nature and extent of any or all general commercial, residential, industrial and other growth that has occurred since the baseline date was set in the area the major stationary source or major modification would affect.

3745-31-13      **Attainment provisions - review of major stationary sources and major modifications, stationary source applicability and exemptions.**

[Comment: For dates of non-regulatory government publications, publications of recognized organizations and associations, federal rules, and federal statutory provisions referenced in this rule, see "Incorporation by Reference" at the end of rule 3745-31-01 of the Administrative Code.]

(A) Start construction limitations

In accordance with this chapter, no major stationary source or major modification located in an attainment area shall begin actual construction unless, at a minimum, the requirements in rules 3745-31-01 to 3745-31-20 of the Administrative Code have been met and the stationary source has obtained a valid Ohio environmental protection agency permit-to-install.

(B) Air pollutants covered

The requirements contained in rules 3745-31-10 to 3745-31-20 of the Administrative Code shall apply to any major stationary source and any major modification as defined by this chapter with respect to each regulated NSR pollutant, except as otherwise allowed in rule 3745-31-13 of the Administrative Code.

(C) Attainment/nonattainment applicability

The requirements contained in rules 3745-31-10 to 3745-31-20 of the Administrative Code apply only to any major stationary source or major modification that would be constructed in an area that is designated as attainment or unclassifiable under 40 CFR 81.336.

(D) Discretionary exemption

Upon request, the director, at his discretion, may exempt the following stationary sources from the requirements contained in rules 3745-31-10 to 3745-31-20 of the Administrative Code as applied to a particular major stationary source or major modification if:

- (1) The major stationary source would be or is a non-profit health or non-profit educational institution or a major modification that would occur at such an institution; or
- (2) The stationary source or modification is a portable stationary source that has previously received a permit under requirements equivalent to those contained in rules 3745-31-10 to 3745-31-20 of the Administrative Code if:

- (a) The owner or operator of the stationary source proposes to relocate and emissions of the stationary source at the new location would be temporary; and
- (b) The emissions from the stationary source would not exceed its allowable emissions; and
- (c) The emissions from the stationary source would not impact a Class I area or any area where an applicable increment is known to be violated; and
- (d) Reasonable written notice is given to the director prior to the relocation identifying the proposed new location and the probable duration of operation at the new location. Such notice shall be given to the director not less than thirty days in advance of the proposed relocation unless a different time duration is previously approved by the director.

(E) Stationary sources located in or impacting nonattainment areas

The requirements contained in rules 3745-31-10 to 3745-31-20 of the Administrative Code do not apply to a major stationary source or major modification with respect to a particular air pollutant if the owner or operator demonstrates that, as to that air pollutant, the stationary source or major modification is located in an area designated as nonattainment under Section 107 of the Clean Air Act. This exemption does not apply to stationary sources or major modifications that are located in an attainment area that impact a nonattainment areas pursuant to paragraph (D) of rule 3745-31-23 of the Administrative Code.

(F) Temporary increases

The requirements equivalent to those contained in rules 3745-31-10 to 3745-31-20 of the Administrative Code do not apply to a proposed major stationary source or major modification with respect to a particular air pollutant if the allowable emissions of that air pollutant from a new stationary source, or the net emissions increase of that air pollutant from a modification, would be temporary and would impact no Class I area and no area where an applicable increment is known to be violated.

(G) Class II area limitations

The requirements contained in rules 3745-31-08 to 3745-31-10 of the Administrative Code as they relate to any maximum allowable increase for a Class II area do not apply to a modification of a major stationary source that was in existence on March 1, 1978 if the net increase in allowable emissions of each regulated NSR pollutant from the modification after the application of BACT would be less than fifty tons per year.

(H) Exemptions to preapplication ambient monitoring

The director may exempt a proposed major stationary source or major modification from the requirements of rule 3745-31-14 of the Administrative Code with respect to ambient monitoring for a particular air pollutant if:

- (1) The emissions increase of the air pollutant from a new stationary source or the new emissions increase of the air pollutant from a modification would cause, in any area, air quality impacts less than the following amounts:
  - (a) Carbon monoxide - five hundred seventy-five  $\mu\text{g}/\text{cm}$ , eight-hour average;
  - (b) Nitrogen dioxide - fourteen  $\mu\text{g}/\text{cm}$ , annual average;
  - (c) Particulate matter less than ten microns - ten  $\mu\text{g}/\text{cm}$ , twenty-four-hour average;
  - (d) Sulfur dioxide - thirteen  $\mu\text{g}/\text{cm}$ , twenty-four-hour average;
  - (e) Ozone - no de minimis air quality level is provided for ozone. However, any net increase of one hundred tons per year or more of VOCs subject to the attainment provisions of this chapter would be required to perform an impact analysis including the gathering of ambient air quality data;
  - (f) Lead - 0.1  $\mu\text{g}/\text{cm}$ , three-month average
  - (g) Fluorides - 0.25  $\mu\text{g}/\text{cm}$ , twenty-four-hour average;
  - (h) Total reduced sulfur - ten  $\mu\text{g}/\text{cm}$ , one-hour average;
  - (i) Hydrogen sulfide - 0.2  $\mu\text{g}/\text{cm}$ , one-hour average;
  - (j) Reduced sulfur compounds - ten  $\mu\text{g}/\text{cm}$ , one-hour average; or
- (2) The ambient concentrations of the air pollutant in the area that the stationary source or modification would affect are less than the concentrations listed in paragraph (H)(1) of this rule; or
- (3) The air pollutant is not listed in paragraph (H)(1) of this rule; or
- (4) The director determines that representative monitoring data is available.

Effective: 12/01/2006

3745-31-14      **Attainment provisions - preapplication analysis.**

[Comment: For dates of non-regulatory government publications, publications of recognized organizations and associations, federal rules, and federal statutory provisions referenced in this rule, see the "Incorporation by Reference" section at the end of rule 3745-31-01 of the Administrative Code.]

(A) Applicability

This rule applies to any major stationary source or major modification that is to be constructed in an area designated in 40 CFR 81.336 as attainment for an air pollutant for which the major stationary source or major modification is major.

(B) Criteria air pollutants that require pre-application analysis

Any application for a major stationary source or major modification shall contain an analysis of ambient air quality in the area that the major stationary source or major modification would affect for each of the following air pollutants:

- (1) For a stationary source, each criteria air pollutant that the stationary source would have the potential to emit in a significant amount;
- (2) For the major modification, each criteria air pollutant for which the major modification would result in a significant net emissions increase.

(C) Non-criteria air pollutant pre-application analysis

With respect to any air pollutant for which no national ambient air quality standard exists excluding pollutants listed under Section 112 of the Clean Air Act, the pre-application analysis shall contain such air quality monitoring data as the director determines is necessary to assess ambient air quality for that air pollutant in any area that the emissions of that air pollutant would affect.

(D) Ambient monitoring requirements

With respect to any air pollutant (other than VOCs), if the director determines that such monitoring is necessary, the pre-application analysis shall contain air quality monitoring data (unless exempt under paragraph (H) of rule 3745-31-13 of the Administrative Code) gathered for purposes of determining whether emissions of that air pollutant would cause or contribute to a violation of the national ambient air quality standard or any maximum allowable increment.

(E) Ambient monitoring time period

In general, the continuous air monitoring data that is required under the pre-application analysis shall have been gathered over a period of one year and shall represent the year preceding receipt of the application except that, if the director determines that a complete and adequate analysis can be accomplished with monitoring data gathered over a period shorter than one year (but not to be less than four months), the data that is required shall have been gathered over at least that shorter period.

(F) Post approval ambient monitoring for ozone

Any owner or operator of a proposed major stationary source or major modification of VOCs who satisfies all conditions of paragraph (A) of rule 3745-31-22 of the Administrative Code may provide post-approval monitoring data for ozone in lieu of providing pre-construction data as required under paragraph (B)(1) of this rule.

(G) Post-construction monitoring

Any owner or operator of a major stationary source or major modification shall, after construction of the stationary source or modification, conduct such ambient monitoring as the director determines is necessary to determine the effect emissions from the stationary source or modification may have, or are having, on air quality.

(H) Operation of monitoring stations

Any owner or operator of a major stationary source or major modification shall meet the requirements of 40 CFR Part 58, Appendix B during the operation of monitoring stations for purposes of satisfying paragraph (C) of this rule.

(A) Applicability

This rule applies to any major stationary source or major modification that is to be constructed in an area designated in 40 CFR 81.336 as attainment for an air pollutant for which the major stationary source or major modification is major.

- (B) A major stationary source or major modification shall meet each applicable emission limitation under the Ohio state implementation plan and each applicable emission standard and standard of performance under 40 CFR Parts 60, 61 and 63.
- (C) The owner or operator of a new major stationary source shall apply BACT to the major stationary source for each regulated NSR pollutant that the major stationary source would have the potential to emit in significant amounts.
- (D) A major modification shall apply BACT for each regulated NSR pollutant that would be a significant net emissions increase at the stationary source. This requirement applies to each proposed emissions unit at which a net emissions increase in the air pollutant would occur as a result of a physical change or change in the method of operation in the emissions unit.
- (E) For phased construction NSR projects, the determination of BACT shall be reviewed and modified as appropriate no more than eighteen months prior to commencement of construction of each independent phase of the NSR project. At such time, the owner or operator of the stationary source may be required to demonstrate the adequacy of any previous determination of BACT for the stationary source.

3745-31-19      **Attainment provisions - notice to the United States environmental protection agency.**

[Comment: For dates of non-regulatory government publications, publications of recognized organizations and associations, federal rules, and federal statutory provisions referenced in this rule, see "Incorporation by Reference" at the end of rule 3745-31-01 of the Administrative Code.]

(A) Applicability

This rule applies to any major stationary source or major modification that is to be constructed in an area designated in 40 CFR 81.336 as attainment for an air pollutant for which the major stationary source or major modification is major.

(B) Notice to the United States environmental protection agency

The director shall, upon request, transmit to the regional administrator of the United States environmental protection agency a copy of each permit application relating to a major stationary source or major modification subject to this rule and provide notice to the administrator of every action related to the consideration of such permit.

(C) Denial-impact on air quality-related values

The director shall consider comments from a federal land manager concerning the impact of a proposed major stationary source or major modification on such lands, including a demonstration that the emissions from the proposed major stationary source or major modification would have an adverse impact on the air quality (including visibility) of any federal mandatory Class I lands, notwithstanding that the change in air quality resulting from emissions from such major stationary source or major modification would not cause or contribute to concentrations that would exceed the maximum allowable increases for a Class I area. If the director concurs with such demonstration, the permit shall not be issued.

(D) Class I variances

The owner or operator of a proposed major stationary source or major modification shall demonstrate to the federal land manager that the emissions from such major stationary source or major modification would have no adverse impact on the air quality of such lands (including visibility), notwithstanding that the change in air quality resulting from emissions from such major stationary source or major modification would cause or contribute to concentrations that would exceed the maximum allowable increases for a Class I area. If the federal land manager concurs with such demonstration and so certifies to the state, the director may, provided that applicable requirements are otherwise met, issue the permit with emission limitations necessary to assure that emissions of sulfur dioxide and particulate matter would not

exceed the maximum allowable increases over baseline concentration for such air pollutant as detailed in the following table:

--

Air pollutant	Maximum allowable increase (micrograms per cubic meter)
Particulate matter	
PM10, annual arithmetic mean	17
PM10, twenty-four-hour maximum	20
Sulfur dioxide	
annual arithmetic mean	20
twenty-four-hour maximum	91
three-hour maximum	325
Nitrogen dioxide	
arithmetic mean	25

(E) Sulfur dioxide variance by governor with federal land manager's concurrence

- (1) The owner or operator of a proposed major stationary source or major modification that cannot be approved under procedures developed pursuant to paragraph (D) of this rule may demonstrate to the governor that the major stationary source or major modification cannot be approved by reason of any maximum allowable increase for sulfur dioxide for periods of twenty-four hours or less applicable to any Class I area and, in the case of federal mandatory Class I areas, that a variance under this clause would not adversely affect the air quality of the area (including visibility).
- (2) The governor, after consideration of the federal land manager's recommendation (if any) and subject to his concurrence may grant, after notice and an opportunity for a public hearing, a variance from such maximum allowable increase; and
- (3) If such variance is granted, the director may issue a permit to such major stationary source or major modification in accordance with provisions developed pursuant to paragraph (G) of this rule provided that the applicable requirements of this chapter are otherwise met.

(F) Variance by the governor with the president's concurrence

- (1) The recommendations of the governor and the federal land manager shall be transferred to the president of the United States in any case where the governor recommends a variance in which the federal land manager does not concur;
- (2) The president may approve the governor's recommendation if he finds that such variance is in the national interest; and

- (3) If such variance is approved, the director may issue a permit to such major stationary source or major modification in accordance with provisions developed pursuant to the requirements of paragraph (G) of this rule provided that the applicable requirements of this chapter are otherwise met.

(G) Emissions limitations for presidential or gubernatorial variance

In the case of a permit issued under procedures developed pursuant to paragraph (E) or (F) of this rule, the stationary source or modification shall comply with emission limitations as may be necessary to assure that emissions of sulfur dioxide from the stationary source or modification would not (during any day on which the otherwise applicable maximum allowable increases are exceeded) cause or contribute to concentrations that would exceed the maximum allowable increases over the baseline concentration (as defined in the following table) and to assure that such emissions would not cause or contribute to concentrations that exceed the otherwise applicable maximum allowable increases for periods of exposure of twenty-four hours or less for more than eighteen days, not necessarily consecutive, during any annual period:

--

Period of Exposure	Maximum Allowable Sulfur Dioxide Increase (Micrograms per Cubic Meter)	
	Low Terrain	High Terrain
twenty-four-hour maximum	36	62
three-hour maximum	130	221

3745-31-20      **Attainment provisions - innovative control technology.**

[Comment: For dates of non-regulatory government publications, publications of recognized organizations and associations, federal rules, and federal statutory provisions referenced in this rule, see "Incorporation by Reference" at the end of rule 3745-31-01 of the Administrative Code.]

(A) Authority to request approval

An owner or operator of a proposed major stationary source or major modification that is to be constructed in an area designated in 40 CFR 81.336 as attainment for an air pollutant for which the major stationary source or major modification is major may request the director of the Ohio environmental protection agency to approve a system of innovative control technology.

(B) Limitations on approval

The director of the Ohio environmental protection agency, with the written consent of the governor(s) of other state(s) whose air quality may be affected by emissions from the major stationary source or major modification, may determine that the major stationary source or major modification may employ a system of innovative control technology if:

- (1) The proposed control system would not cause or contribute to an unreasonable risk to public health, welfare or safety in its operation or function;
- (2) The owner or operator agrees to achieve a level of continuous emission reduction equivalent to BACT by a date specified by the director. Such date shall not be later than four years from the time of start-up or seven years from permit issuance;
- (3) The major stationary source or major modification would meet the requirements equivalent to those in rule 3745-31-05 of the Administrative Code and paragraph (A) of rule 3745-31-07 of the Administrative Code based on the emission rate that the major stationary source employing the system of innovative control technology would be required to meet on the date specified by the director.
- (4) The major stationary source or major modification would not, before the date specified by the director;
  - (a) Cause or contribute to any violation of any applicable national ambient air quality standard; or
  - (b) Impact any Class I area; or

(c) Impact any area where an applicable increment is known to be violated;

(5) All other applicable requirements including those for public participation under rule 3745-31-06 of the Administrative Code have been met.

(C) Withdrawal of approval

The director shall withdraw any approval to employ a system of innovative control technology made under this rule if:

- (1) The proposed system fails by the specified date to achieve the required emission rate; or
- (2) The director determines that continued operation will cause or contribute to an unreasonable risk to public health, welfare or safety.

(D) Extension of demonstration period

If a proposed major stationary source or major modification fails to meet the required level of continuous emission reduction within the specified time period, or if the approval is withdrawn in accordance with paragraph (C) of this rule, the director may allow the major stationary source or major modification up to an additional three years to meet the requirement for the application of BACT through use of a demonstrated system of control.

3745-31-21      **Nonattainment provisions - review of major stationary sources and major modifications - stationary source applicability and exemptions.**

[Comment: For dates of non-regulatory government publications, publications of recognized organizations and associations, federal rules, and federal statutory provisions referenced in this rule, see "Incorporation by Reference" at the end of rule 3745-31-01 of the Administrative Code.]

(A) Start construction limitation

No owner or operator of a major stationary source or major modification located in a nonattainment area shall begin actual construction of such major stationary source or major modification unless, as a minimum, the requirements in rules 3745-31-21 to 3745-31-27 of the Administrative Code have been met and the owner or operator of the stationary source has obtained a valid Ohio environmental protection agency permit-to-install.

(B) Air pollutants covered

The requirements contained in rules 3745-31-21 to 3745-31-27 of the Administrative Code shall apply to any major stationary source and any major modification with respect to each regulated NSR pollutant that the stationary source would emit, except as this rule would otherwise allow.

(C) Attainment/nonattainment applicability

Except as provided in rule 3745-31-21 of the Administrative Code, the requirements contained in rules 3745-31-21 to 3745-31-27 of the Administrative Code apply only to any major stationary source or major modification that would be constructed in an area designated under 40 CFR 81.336 as nonattainment for an air pollutant for which the stationary source or modification is major.

(D) PM10 precursors

In accordance with the requirements of Section 189 of the Clean Air Act, major stationary sources of PM10 precursors shall be subject to the control requirements that are applicable under plans in effect under Section 189 of the Clean Air Act for major stationary sources of PM10, except where the director determines that such major stationary sources do not contribute significantly to PM10 levels that exceed the standard in the area.

(E) Clean coal technology

Consistent with the Clean Air Act, Ohio environmental protection agency will apply the following requirements for clean coal technology demonstrations:

(1) Applicability

This paragraph applies to physical or operation changes to existing facilities for the sole purpose of installation, operation, cessation, or removal of a temporary or permanent clean coal technology demonstration project.

(2) Temporary clean coal technology demonstration projects

Installation, operation, cessation, or removal of a temporary clean coal technology demonstration project shall not subject such demonstration project to the requirements of Section 111 or Part D of Title I of the Clean Air Act.

(3) Permanent clean coal technology demonstration projects

For permanent clean coal technology demonstration projects that constitute repowering, as defined in Section 402(12) of Title IV, (acid deposition control) of the Clean Air Act, any qualifying clean coal technology demonstration project shall not be subject to standards of performance under Section 111 of the Clean Air Act or to the review and permitting requirements of Part C of Title I of the Clean Air Act for any air pollutant the potential emissions of which will not increase as a result of the clean coal technology demonstration project.

(4) Exemption for reactivation of very clean coal technology units

Physical changes or changes in the method of operation associated with the commencement of commercial operations by a coal-fired utility unit after a period of discontinued operation shall not subject the emissions unit to the requirements of Section 111 or Part C of Title I of the Clean Air Act where the emissions unit:

- (a) Has not been in operation for the two-year period prior to the enactment of the Clean Air Act Amendments of 1990, and the emissions from such emissions unit continue to be carried in the director's emission inventory at the time of enactment;
- (b) Was equipped prior to shut-down with a continuous system of emission control that achieves a removal efficiency for sulfur dioxide of no less than eighty-five per cent and a removal efficiency for particulate matter of no less than ninety-eight per cent;
- (c) Is equipped with low-NO<sub>x</sub> burners prior to the time of commencement; and
- (d) Is otherwise in compliance with the requirements of the Clean Air Act.

(F) Secondary emissions

If a major stationary source is subject to this rule on the basis of the direct emissions from the major stationary source, the applicable conditions of this rule must also be met for secondary emissions. However, secondary emissions may be exempt from LAER requirements and compliance certification requirements under paragraphs (A)(1) and (A)(2) of rule 3745-31-22 of the Administrative Code. Consideration of the indirect impacts of motor vehicles and aircraft traffic regulated under Title II of the Clean Air Act (motor vehicles and aircraft) is not required under this rule.

CERTIFIED ELECTRONICALLY  
Certification

11/20/2006  
Date

Promulgated Under: 119.03  
Statutory Authority: 3704.03(F)  
Rule Amplifies: 3704.03(F) , 3704.03(A)  
Prior Effective Dates: 4/12/96, 4/27/98, 10/28/04

[Comment: For dates of non-regulatory government publications, publications of recognized organizations and associations, federal rules, and federal statutory provisions referenced in this rule, see "Incorporation by Reference" at the end of rule 3745-31-01 of the Administrative Code.]

(A) Conditions for permit-to-install approval

If the director finds that a major stationary source or major modification for which a permit-to-install application has been submitted would be constructed in an area designated in 40 CFR 81.336 as nonattainment for an air pollutant for which the major stationary source or major modification is major, approval may be granted only if the following conditions are met:

(1) Lowest achievable emission rate (LAER)

The major stationary source or major modification is required to meet an emission limitation that specifies the LAER for such stationary source.

If the director determines that technological or economic limitations on the application of measurement methodology to a particular class of stationary sources would make the imposition of an enforceable numerical emission standard infeasible, the director may instead prescribe a design, operational, or equipment standard. Any permits issued without an enforceable numerical emission standard must contain enforceable conditions which assure that the design characteristics or equipment will be properly maintained (or that the operational conditions will be properly performed) so as to continuously achieve the assumed degree of control.

The LAER is required only for those major nonattainment air pollutants for which the increased allowable emissions exceed the significant emission rates, although the director may choose to require LAER for air pollutants that do not exceed these values.

The new emission limitations for the new stationary source as well as any existing stationary sources affected must be federally enforceable.

(2) Compliance certification

The applicant must certify that all existing major stationary sources owned or operated by the applicant (or any entity controlling, controlled by, or under common control with the applicant) in Ohio as the proposed major stationary source or major modification are in compliance with all applicable emission limitations and standards under the Clean Air Act (or are in compliance with an

expeditious schedule which is federally enforceable or contained in a court decree).

(3) Emission offsets

- (a) Emission reductions (offsets) from existing air contaminant sources in the area of the proposed major stationary source (whether or not under the same ownership) are required such that there will be reasonable progress, as determined by the director, toward attainment of the applicable national ambient air quality standard.
- (b) Only intra air pollutant emission offsets will be acceptable (e.g., hydrocarbon increases may not be offset against sulfur dioxide reductions).
- (c) Emission offsets must meet the baseline limitations of rule 3745-31-24 of the Administrative Code, the location limitations of rule 3745-31-25 of the Administrative Code, and the offset ratio limitations of rule 3745-31-26 of the Administrative Code.
- (d) Emission offsets are required only for those air pollutants for which the increased allowable emissions exceed the significant emission rates.
- (e) Decreases in actual emissions resulting from the installation of add-on control technology or application of pollution prevention measures that were relied upon in designating an emissions unit as a clean unit or a project as a PCP cannot be used as offsets.
- (f) Decreases in actual emissions occurring at a clean unit cannot be used as offsets, except as provided in paragraphs (A)(8) and (A)(10) of rule 3745-31-30 of the Administrative Code. Similarly, decreases in actual emissions occurring at a PCP cannot be used as offsets, except as provided in paragraph (B)(6)(d) of rule 3745-31-31 of the Administrative Code.
- (g) The total tonnage of increased emissions, in tons per year, resulting from a major modification that must be offset in accordance with Section 173 of the Clean Air Act shall be determined by summing the difference between the allowable emissions after the major modification and the actual emissions before the modification for each emissions unit.

(4) Net air quality benefit

The emission offsets must provide a positive net air quality benefit in the affected area pursuant to rule 3745-31-25 of the Administrative Code. Atmospheric dispersion modeling is not necessary for VOCs and nitrogen oxides in ozone nonattainment areas. Instead, complying with the requirements

of paragraphs (A)(1) to (A)(3) of this rule and rule 3745-31-25 of the Administrative Code will be considered adequate to meet this condition.

(B) Exemptions from certain conditions

(1) Fuel switch exemption

The director may exempt the following major stationary sources or major modifications from the limitation required under paragraph (D)(1) of rule 3745-31-23 of the Administrative Code or the emission offsets required under paragraphs (A)(3) and (A)(4) of this rule:

Major stationary sources that must switch fuels due to lack of adequate fuel supplies or where a major stationary source is required to be modified as a result of new United States environmental protection agency regulations and no exemption from such regulation is available to the major stationary source.

Such exemptions may be granted only if:

- (a) The applicant demonstrates that it made its best efforts to obtain sufficient emission offsets and that such efforts were unsuccessful;
- (b) The applicant has secured all available emission offsets; and
- (c) The applicant will continue to seek the necessary emission offsets and apply them when they become available.

(2) Temporary stationary sources/portable facilities/construction emissions

The director may exempt the following major stationary sources or major modifications from the emission offsets required under paragraphs (A)(3) and (A)(4) of this rule:

- (a) Portable facilities that will be relocated outside of the nonattainment area after a short period of time; and
- (b) Emissions generated from the construction phase of a new major stationary source.

Prior Effective Dates: 4/12/96, 10/28/04

3745-31-23

**Nonattainment provisions - stationary sources locating in designated clean or unclassifiable areas which would cause or contribute to a violation of a national ambient air quality standard.**

[Comment: For dates of non-regulatory government publications, publications of recognized organizations and associations, federal rules, and federal statutory provisions referenced in this rule, see "Incorporation by Reference" at the end of rule 3745-31-01 of the Administrative Code.]

(A) Applicability

This rule applies only to major stationary sources or major modification that will be located in an area designated in 40 CFR 81.336 as attainment or unclassifiable if the emissions from the major stationary source or major modification would exceed the following significance levels at any locality that does not meet the national ambient air quality standard:

--

Air Pollutant	Annual	Averaging Time (Hours)			
		24	8	3	1
Sulfur dioxide <sup>2</sup>	1.0µg/m <sup>3</sup>	5.0µg/m <sup>3</sup>	-----	25µg/m <sup>3</sup>	-----
TSP	1.0µg/m <sup>3</sup>	5.0µg/m <sup>3</sup>	-----	-----	-----
PM10	1.0µg/m <sup>3</sup>	5.0µg/m <sup>3</sup>	-----	-----	-----
Nitrogen dioxide	1.0µg/m <sup>3</sup>	-----	-----	-----	-----
Carbon monoxide	-----	-----	500µg/m <sup>3</sup>	-----	2mg/m <sup>3</sup>

(B) Requirements and exemptions

Major stationary sources or major modifications to which this section applies must meet the LAER requirements under paragraph (A)(1) of rule 3745-31-22 of the Administrative Code, the compliance certification requirement under paragraph (A)(2) of rule 3745-31-22 of the Administrative Code, and the net air quality benefit requirement under paragraph (A)(4) of rule 3745-31-22 of the Administrative Code. However, such major stationary sources or major modifications are exempt from the offset requirements under paragraph (A)(3) of rule 3745-31-22 of the Administrative Code.

(C) Review of specified major stationary sources for air quality impact

- (1) For sulfur dioxide, particulate matter, PM10 and carbon monoxide, the determination of whether a major stationary source or major modification will cause or contribute to a violation of a national ambient air quality standard is be

made on a case-by-case basis using the major stationary source's allowable emissions in an atmospheric dispersion model.

- (2) For major stationary sources of nitrogen oxides, the initial determination of whether a major stationary source would cause or contribute to a violation of the national ambient air quality standard for nitrogen dioxide will be made using an atmospheric model assuming all the nitric oxide emitted is oxidized to nitrogen dioxide by the time the plume reaches ground level. The initial concentration estimates may be adjusted if adequate data are available to account for the expected oxidation rate.
- (3) For ozone, major stationary sources of VOCs, locating outside a designated ozone nonattainment area, will be presumed to have no significant impact on the designated nonattainment area. If ambient monitoring indicates that the area of major stationary source location is in fact nonattainment, then the major stationary source may be permitted under the provisions of the Ohio state implementation plan adopted pursuant to Section 110(A)(2)(d) of the Clean Air Act until the area is designated nonattainment and the Ohio state implementation plan revision is approved. If no Ohio state implementation plan pursuant to Section 110(A)(2)(d) of the Clean Air Act has been adopted and approved, then this rule shall apply.
- (4) The determination as to whether a major stationary source would cause or contribute to a violation of a national ambient air quality standard should be made as of the new stationary source's start-up date. Therefore, if a designated nonattainment area is projected to be an attainment area as part of an approved Ohio state implementation plan control strategy by the new stationary source start-up date, offsets will not be required if the new stationary source would not cause a new violation.

(D) Major stationary sources located in clean air areas

If the director finds that the emissions from a proposed major stationary source would cause a new violation of a national ambient air quality standards, but would not contribute to an existing violation, approval may be granted only if both of the following conditions are met:

- (1)
  - (a) The major stationary source is required to meet a more stringent emission limitation and/or the control of existing stationary sources below allowable levels is required so that the major stationary source will not cause a violation of any national ambient air quality standard.
  - (b) If the director determines that technological or economic limitations on the application of measurement methodology to a particular class of major

stationary sources would make the imposition of an enforceable numerical emission standard infeasible, the director may instead prescribe a design, operational, or equipment standard. Any permits issued without an enforceable numerical emission standard must contain enforceable conditions which assure that the design characteristics or equipment will be properly maintained (or that the operational conditions will be properly performed) so as to continuously achieve the assumed degree of control. Such conditions shall be enforceable as emission limitations by private parties under Section 304 of the Clean Air Act. Thereafter, the term emission limitation shall also include such design, operational, or equipment standards.

- (2) The new emission limitations for the major stationary source as well as any existing stationary sources affected must be federally enforceable.

Effective: 12/01/2006

R.C. 119.032 review dates: 09/14/2006 and 12/01/2011

CERTIFIED ELECTRONICALLY  
Certification

11/20/2006  
Date

Promulgated Under: 119.03  
Statutory Authority: 3704.03(F)  
Rule Amplifies: 3704.03(F), 3704.03(A)  
Prior Effective Dates: 4/12/96

**Nonattainment provisions - baseline for determining credit for emission and air quality offsets.**

[Comment: For dates of non-regulatory government publications, publications of recognized organizations and associations, federal rules, and federal statutory provisions referenced in this rule, see "Incorporation by Reference" at the end of rule 3745-31-01 of the Administrative Code.]

**(A) Applicability**

This rule applies to any major stationary source or major modification that is to be constructed in an area designated in 40 CFR 81.336 as nonattainment for an air pollutant for which the major stationary source or major modification is major.

(B) The baseline for determining credit for emission reductions is the emission limit under the Ohio state implementation plan in effect at the time the application to construct is filed, except that the offset baseline shall be the actual emissions of the source from which offset credit is obtained where:

(1) The demonstration of reasonable further progress and attainment of ambient air quality standards is based upon the actual emissions of sources located within a designated nonattainment area for which the preconstruction review program was adopted; or

(2) The Ohio state implementation plan does not contain an emission limitation for that source or source category.

(C) Where the emission limits under the Ohio state implementation plan allows greater emissions than the potential to emit of the source, emission offset credit will be allowed only for control below this potential.

**(D) Old growth cushion**

Only those emissions that have been set aside for new source growth in the most recent Ohio state implementation plan can be used by a major stationary source or major modification to offset emissions. Emissions reserved for new source growth in past Ohio state implementation plans cannot be used by a major stationary source or major modification to offset emissions.

**(E) Combustion of fuels**

Generally, the emissions for determining emission offset credit involving an existing fuel combustion stationary source will be the allowable emissions under the Ohio state implementation plan for the type of fuel being burned at the time the major stationary source application is filed (i.e., if the existing owner or operator of the

stationary source has switched to a different type of fuel at some earlier date, any resulting emission reduction [either actual or allowable] shall not be used for emission offset credit). If the owner or operator of the existing stationary source commits to switch to a cleaner fuel at some future date, emission offset credit based on the allowable emissions for the fuel involved is not acceptable unless the permit is conditioned to require the use of specific alternative control measures that would achieve the same degree of emission reductions should the stationary source be switched back to a dirtier fuel at some later date. The applicant must provide information to the director that documents that adequate long-term supplies of the new fuel are available.

(F) Rocket engines or motors

The director shall allow the owner or operator of a major stationary source to offset by alternative or innovative means emission increases from rocket engine and motor firing, and cleaning related to such firing, at an existing or modified major stationary source that tests rocket engines or motors under the following conditions:

- (1) Any major modification proposed is solely for the purpose of expanding the testing of rocket engines or motors at an existing stationary source that is permitted to test such engines on November 15, 1990.
- (2) The applicant demonstrates to the satisfaction of the director that it has used all reasonable means to obtain and utilize offsets, as determined on an annual basis, for the emission increases beyond allowable levels, that all available offsets are being used, and that sufficient offsets are not available to the major stationary source.
- (3) The applicant has obtained a written finding from the United States department of defense, United States department of transportation, national aeronautics and space administration or other appropriate federal agency, that the testing of rocket motors or engines at the major stationary source is required for a program essential to the national security.
- (4) The major stationary source will be in compliance with an alternative measure, imposed by the director, designed to offset any emission increases beyond permitted levels not directly offset by the stationary source.

(G) Operating hours and stationary source shutdown

- (1) The owner or operator of a stationary source may be credited with emission reductions achieved by shutting down an existing stationary source or permanently curtailing production or operating hours below baseline levels if such reductions are permanent, quantifiable, and federally enforceable. In addition, the shutdown or curtailment is creditable only if it occurred on or after the date specified for this purpose in the Ohio state implementation plan, and if

such date is on or after the date of the most recent emission inventory used in the Ohio state implementation plan's demonstration of attainment. Where the Ohio state implementation plan does not specify a cutoff date for shutdown credits, the date of the most recent emission inventory or attainment demonstration, as the case may be, shall apply. However, in no event may credit be given for shutdowns which occurred prior to August 7, 1977. For purposes of this paragraph, the director may choose to consider a prior shutdown or curtailment to have occurred after the date of its most recent emission inventory, if the inventory explicitly includes as current existing emissions the emissions from such previously shutdown or curtailed stationary sources.

- (2) Emission reductions may be credited in the absence of an approved attainment demonstration only if the shutdown or curtailment occurred on or after the date the major stationary source application is filed, or, if the applicant can establish that the proposed major stationary source is a replacement for the shutdown or curtailed stationary source and the cutoff date provisions of paragraph (G)(1) of rule 3745-31-24 of the Administrative Code are observed.

(H) Credit for volatile organic compound (VOC) substitution

No emission offset credit may be allowed for replacing one VOC with another of lesser reactivity, except for those compounds listed in Table 1 of the United States environmental protection agency's "Recommended Policy on Control of Volatile Organic Compounds".

(I) Banking of emission offset credit

For owners or operators of major stationary sources obtaining permits by applying offsets after January 16, 1979, the director may allow offsets that exceed the requirements of reasonable progress toward attainment to be banked (i.e., saved to provide offsets for a major stationary source seeking a permit in the future) for use under this rule. Likewise, the director may allow the owner of an existing stationary source that reduces its own emissions to bank any resulting reductions beyond those required by the Ohio state implementation plan for use under this ruling, even if none of the offsets are applied immediately to a new major stationary source permit. The director may allow these banked offsets to be used under the preconstruction review program; as long as these banked emissions are consistent with the Ohio state implementation plan control strategy. The director may not approve the construction of a major stationary source using banked offsets if the new major stationary source would interfere with the Ohio state implementation plan control strategy or if such use would violate any other condition set forth for use of offsets.

(J) Offset credit for meeting new source performance standards or national emission standards for hazardous air pollutants

Where a stationary source is subject to an emission limitation established in a new source performance standard or a national emission standard for hazardous air pollutants, (i.e., requirements under Sections 111 and 112, respectively, of the Clean Air Act), and a different Ohio State implementation plan limitation, the more stringent limitation shall be used as a baseline for determining credit for emission offsets. The difference in emissions between the Ohio state implementation plan and the new source performance standards or national emission standards for hazardous air pollutant standards, for such stationary source may not be used as offset credit.

(K) All emission reductions claimed as offset credit shall be federally enforceable.

Effective: 12/01/2006

R.C. 119.032 review dates: 09/14/2006 and 12/01/2011

CERTIFIED ELECTRONICALLY  
Certification

Prior Effective Dates: 4/12/96, 10/28/04

[Comment: For dates of non-regulatory government publications, publications of recognized organizations and associations, federal rules, and federal statutory provisions referenced in this rule, see "Incorporation by Reference" at the end of rule 3745-31-01 of the Administrative Code.]

(A) Applicability

This rule applies to any major stationary source or major modification that is to be constructed in an area designated in 40 CFR 81.336 as nonattainment for an air pollutant for which the major stationary source or major modification is major.

(B) Volatile organic compounds (VOC), and nitrogen oxides

In the case of emission offsets involving VOCs, and nitrogen oxides, the offsets may be obtained from:

- (1) Within the same demonstration area as the new major stationary source or major modification, or
- (2) Outside the same demonstration area if the applicant demonstrates to the director's satisfaction that the net combined impact of the emissions from the offsetting sources and emissions from the new major stationary source or major modification will have a positive net air quality benefit on the nonattainment ozone air quality in the area.

(C) Sulfur dioxide, particulate matter, PM10, lead and carbon monoxide

Since the air quality impact of sulfur dioxide, particulate matter, PM10, lead and carbon monoxide is site dependent, simple area wide mass emission offsets may not be appropriate. For these air pollutants, the director may require atmospheric dispersion modeling to ensure that the emission offsets provide a positive net air quality benefit. This modeling shall be conducted in accordance with the director's guidance.

**Nonattainment provisions - offset ratio requirements.**

[Comment: For dates of non-regulatory government publications, publications of recognized organizations and associations, federal rules, and federal statutory provisions referenced in this rule, see "Incorporation by Reference" at the end of rule 3745-31-01 of the Administrative Code.]

(A) VOC offset requirements for ozone nonattainment areas are as follows:

- (1) In areas that are not classified as marginal, moderate, serious, severe or extreme areas, the offset ratio shall be greater than 1.0 to 1.0
- (2) Marginal areas, the minimum required offset ratio is 1.1 to 1.0.
- (3) Moderate areas, the minimum required offset ratio is 1.15 to 1.0.
- (4) Serious areas, the minimum required offset ratio is 1.2 to 1.0.
- (5) Severe areas, the minimum required offset ratio is 1.3 to 1.0.
- (6) Extreme areas, the minimum required offset ratio is 1.5 to 1.0.
- (7) Offsets may be obtained from areas that have a higher nonattainment classification (provided the higher offset ratio is utilized) than the nonattainment area in which the major stationary source is to be located.

(B) Nitrogen oxides

The emission of nitrogen oxides from stationary sources shall be treated as a nonattainment air pollutant in each county that is designated nonattainment for ozone. The offset requirements listed for ozone in paragraph (A) of this rule shall apply to nitrogen oxide emissions as well. These requirements do not apply in areas that have been granted a nitrogen oxide waiver under Section 182(f) of the Clean Air Act.

(C) Other criteria air pollutants

For sulfur dioxide, carbon monoxide, particulate matter, and lead the offset ratio shall be greater than 1.0 to 1.0.

Effective: 12/01/2006

R.C. 119.032 review dates: 09/14/2006 and 12/01/2011

3745-31-27      **Nonattainment provisions - administrative procedures for emission offsets.**

[Comment: For dates of non-regulatory government publications, publications of recognized organizations and associations, federal rules, and federal statutory provisions referenced in this rule, see "Incorporation by Reference" at the end of rule 3745-31-01 of the Administrative Code.]

(A) Procedures for emission offsets

Emission offsets may be proposed by either the owner or operator of the proposed major stationary source or by the local community or the state. The emission reduction committed to must be enforceable by authorized state and/or local agencies and under the Clean Air Act, and must be accomplished by the new major stationary source's start-up date. If emission reductions are to be obtained in a state that neighbors the state in which the new major stationary source is to be located, the emission reductions committed to must be enforceable by the neighboring state and/or local agencies and under the Clean Air Act. Where the new major stationary source is a replacement for a major stationary source that is being shut down in order to provide the necessary offsets, the director may allow up to one hundred eighty days for shakedown of the new major stationary source before the existing major stationary source is required to cease operation.

(1) Major stationary source initiated emission offsets

The owner or operator of a major stationary source may propose emission offsets that involve:

(a) Reductions from stationary sources controlled by the major stationary source owner or operator (internal emission offsets); or

(b) Reductions from neighboring stationary sources (external emission offsets). The owner or operator of the major stationary source does not have to investigate all possible emission offsets. As long as the emission offsets obtained represent reasonable progress toward attainment (in the director's judgement), they will be acceptable to the director. The director shall review and approve the emission offsets to assure that the emission offsets will be as effective as proposed by the owner or operator of the major stationary source. An internal emission offset will be considered enforceable if it is made an Ohio state implementation plan requirement by inclusion as a condition of the new major stationary source permit and the permit is forwarded to the United States environmental protection agency. An external emission offset will not be enforceable unless the affected stationary source(s) providing the emission reductions is subject to a new

Ohio state implementation plan requirement to ensure that its emissions will be reduced by a specified amount in a specified time.

- (2) State or community initiated offsets. A state or community may generate emission offsets to provide to a major stationary source wishing to locate in its area. These emission offsets may come from reducing emissions from existing emissions units, mobile sources and/or area sources. State or community initiated offsets either must be submitted as a Ohio state implementation plan revision or must be contained in a federally enforceable permit.

**Review of major stationary sources of hazardous air pollutants requiring MACT determinations.**

[Comment: For dates of non-regulatory government publications, publications of recognized organizations and associations, federal rules, and federal statutory provisions referenced in this rule, see "Incorporation by Reference" at the end of rule 3745-31-01 of the Administrative Code.]

**(A) Applicability**

Except as provided in paragraph (C) of this rule, the requirements of this section apply to the construction or reconstruction of a major MACT source.

**(B) Requirements**

On or after June 29, 1998, no person may cause, permit, or allow the beginning of actual construction or reconstruction of any process or production unit that is a major MACT source without first applying for and obtaining a MACT determination from the director unless specifically exempted under paragraph (C) of this rule.

**(C) Exemptions**

The following major MACT sources are exempt from the requirements of this rule:

- (1) Any major MACT source that has been specifically regulated or exempted from regulation under a federal standard issued pursuant to Section 112(d) or Section 112(h) of the Clean Air Act and incorporated in a subpart of 40 CFR Part 63, or under a determination issued pursuant to Section 112(j) of the Clean Air Act;
- (2) Any major MACT source that has received a final permit-to-install before June 29, 1998;
- (3) Any major MACT source that is an electric utility steam generating unit, unless and until such time as these units are added to the source category list pursuant to Section 112(c)(5) of the Clean Air Act;
- (4) Any major MACT source that is within a source category which has been deleted from the source category list pursuant to Section 112(c)(9) of the Clean Air Act;  
or
- (5) Any major MACT source that is a research and development activity.

**(D) Data submission**

The permit application for a major MACT source to which this rule applies shall specify a control technology selected by the applicant that, if properly maintained and operated, will satisfy the requirements of paragraph (E) of this rule.

- (1) In each case where a constructed or reconstructed major MACT source would require additional control technology or change in control technology, the application for a MACT determination shall contain the following information:
  - (a) The name and address (physical location) of the major MACT source to be constructed or reconstructed.
  - (b) A brief description of the major MACT source to be constructed or reconstructed and identification of any listed source category or source categories from Section 112(c) of the Clean Air Act in which it is included.
  - (c) The expected commencement date for the construction or reconstruction of the major MACT source.
  - (d) The expected completion date for the construction or reconstruction of the major MACT source.
  - (e) The anticipated date of start-up for the constructed or reconstructed major MACT source.
  - (f) The HAPs to be emitted by the constructed or reconstructed major MACT source, and the estimated emission rate for each such HAP, to the extent that this information is required by the director.
  - (g) Any federally enforceable emission limitations applicable to the constructed or reconstructed major MACT source.
  - (h) The maximum and expected utilization of capacity of the constructed or reconstructed major MACT source, and the associated uncontrolled emission rates for that source to the extent this information is needed by the director to determine MACT.
  - (i) The controlled emissions for the constructed or reconstructed major MACT source (in tons per year) at expected and maximum utilization of capacity to the extent this information is needed by the director to determine MACT.
  - (j) A recommended emission limitation for the constructed or reconstructed major MACT source consistent with the principles set forth in paragraph (E) of this rule.
  - (k) Any other relevant information required pursuant to 40 CFR Part 63, Subpart A.

- (l) The control technology selected to meet the recommended MACT emission limitation, including technical information on the design, operation, size, and estimated control efficiency of the control technology.
  - (m) Supporting documentation including identification of alternative control technologies considered by the applicant to meet the emission limitation, and analysis of cost and non-air quality health and environmental impacts or energy requirements for the selected control technology.
- (2) In each case where an applicant contends that a constructed or reconstructed major MACT source will be in compliance, upon start-up, with case-by-case MACT without a change in control technology, the application shall contain the following information:
- (a) The information described in paragraphs (D)(1)(a) to (D)(1)(j) of this rule; and
  - (b) Documentation of the control technology in place.

(E) Principles of MACT determination

The following general principles shall govern preparation by the applicant of each permit application requiring a MACT determination, and all subsequent review of and actions taken concerning such an application:

- (1) The MACT emission limitation or MACT requirements recommended by the applicant and approved by the director shall not be less stringent than the emission control which is achieved in practice by the best controlled similar source, as determined by the director.
- (2) Based upon available information as defined in this rule, the MACT emission limitation and control technology recommended by the applicant and approved by the director shall achieve the maximum degree of reduction of HAP emissions which can be achieved by utilizing those control technologies identified in the available information, considering the costs of achieving such emission reduction and any non-air quality health and environmental impacts and energy requirements associated with the emission reduction.
- (3) The applicant may recommend, and the director may approve, a specific design, equipment, work practice, operational standard, or combination thereof, if the director determines that it is not feasible to prescribe or enforce an emission limitation.
- (4) If a federal emission standard has been proposed pursuant to Sections 112(d) or 112(h) of the Clean Air Act, or if the United States environmental protection

agency has adopted a presumptive MACT determination for the source category which includes the constructed or reconstructed source, then the MACT requirements applied to the source shall have considered those emission limitations and requirements of the proposed MACT standard or presumptive MACT determination.

- (5) Any permit-to-install containing a MACT determination shall include all monitoring, testing, recordkeeping, and reporting requirements necessary to ensure initial and ongoing compliance of the major MACT source with the MACT determination.

(F) Prohibition

No person may begin actual construction or reconstruction of a major MACT source until the director has made a MACT determination for that source and included the requirements of that determination in a final and effective permit-to-install.

- (G) The effective date of the MACT determination shall be the date of issuance of the permit-to-install.
- (H) On and after the date of start-up, a major MACT source which required a case-by-case MACT determination shall be in compliance with all the applicable requirements of the MACT determination as specified in the final permit-to-install.

3745-31-29      **General permit-to-install and general PTIO.**

[Comment: For dates of non-regulatory government publications, publications of recognized organizations and associations, federal rules, and federal statutory provisions referenced in this rule, see "Incorporation by Reference" at the end of rule 3745-31-01 of the Administrative Code.]

(A) Development of model general permits

The director may develop a model general permit for any category of air contaminant sources, or specific portions of any category of air contaminant sources, subject to the following conditions:

- (1) A model general permit shall apply to:
  - (a) Processes producing the same or similar products;
  - (b) Processes emitting the same or similar air contaminants;
  - (c) Methods for capturing and controlling the air contaminants that are the same or limited to a small number of specific alternatives; and
  - (d) Processes that are subject to the same emission limitations, monitoring requirements, federal standards, or state rules.
- (2) A model general permit shall identify criteria by which an air contaminant source(s) may qualify for the associated general permit and shall include terms and conditions under which the owner or operator agrees to install and/or operate the permitted air contaminant source(s). At a minimum, these terms and conditions shall include:
  - (a) Applicable emission limitations and/or control requirements;
  - (b) Any necessary operational restrictions;
  - (c) Any necessary monitoring, reporting and recordkeeping requirements; and
  - (d) Testing requirements.
- (3) The director shall provide an opportunity for public comment on the form and content of a model general permit as follows:
  - (a) The director shall announce availability for comment on draft model general permits under development containing the requirements in paragraph (A)(2)

of this rule, providing a minimum of thirty days comment period. The director shall publish notice in Ohio's major newspapers, the Ohio environmental protection agency publication, "Weekly Review," on the Ohio environmental protection agency website, and provide electronic notification to interested parties.

- (b) The director shall announce the final form of model general permits that were under development by publishing notice in Ohio's major newspapers, the "Weekly Review," on the Ohio environmental protection agency website, and provide electronic notification to interested parties.
  - (c) Final model general permits are not actions of the director and are, therefore, not subject to appeal.
- (4) Model general permits shall be reviewed at least once every five years from the date of announcement of the final form.
- (a) The review of the model general permit shall follow the same procedures for public comment as the draft and final form of the model general permits under development pursuant to paragraph (A)(3) of this rule.
  - (b) Any person may make a written request for the Ohio environmental protection agency review of the model general permit document prior to the Ohio environmental protection agency initiated review. Upon receipt of the request, the Ohio environmental protection agency will initiate the review procedure described in this rule.
- (5) Only the director may modify model general permits. Modifications to model general permits shall follow the same procedures pursuant to paragraph (A)(3) of this rule, except administrative modifications may occur without following the rules of procedure contained within this chapter. Existing final general permits are not affected by changes to the model general permit.

(B) General permit-to-install and general PTIO applicability

A general permit-to-install or general PTIO may be applied for and obtained if:

- (1) All of the qualifications and requirements described in this chapter are met, except as noted in paragraph (C)(2) of this rule;
- (2) The air contaminant source meets all of the qualifications listed in the requested model general permit;
- (3) The requested air contaminant source(s) are not affected sources under the acid rain program unless otherwise provided in regulations promulgated under Title IV of the Clean Air Act; and

- (4) The requested air contaminant source is not part of a new major stationary source or major modification subject to the attainment or nonattainment provisions contained in rules 3745-31-10 to 3745-31-27 of the Administrative Code.

(C) General permit application

- (1) Owners or operators of air contaminant sources requesting a general permit-to-install or general PTIO shall do so using the forms prepared by the Ohio environmental protection agency. The application must include all information necessary to determine qualification for, and to assure compliance with, the general permit-to-install or general PTIO.
- (2) The application submitted shall comply with the requirements listed under rule 3745-31-04 of the Administrative Code except that the director may provide, in the model general permit-to-install or model general PTIO, for applications that deviate from the requirements of rule 3745-31-04 of the Administrative Code, provided that such application includes all information necessary to determine qualification for, and assure compliance with, the general permit-to-install or general PTIO.

(D) General permit processing

The director may issue a general permit-to-install or general PTIO for any model general permit developed in accordance with paragraph (A) of this rule for a new air contaminant source(s) or modification(s) of an existing air contaminant source(s) as follows:

- (1) The director, at his/her discretion, shall issue either a draft action or a final action within forty-five days of receipt of a complete application. The director does not need to meet the forty-five day deadline for applications from air contaminant source(s) that do not require authorization to construct because the air contaminant source(s) currently holds a permit covering the source(s) that would be covered under the general permit-to-install or general PTIO.
- (2) The director shall comply with the procedures for notification under Chapter 3745-47 of the Administrative Code prior to issuing a general permit-to-install or general PTIO as follows:
  - (a) The director shall provide notification of requests by owners or operators of an air contaminant source(s) to be covered under the terms of the general permit-to-install or general PTIO. The director shall publish notice in a newspaper of general circulation in each county in which the air contaminant source(s) would be constructed, and provide electronic notification to interested parties.

- (b) The director shall maintain, and make available to the public upon request, a list of all air contaminant source(s) that have obtained a general permit-to-install or general PTIO.
- (3) The director may require any applicant applying for a general permit-to-install or general PTIO to apply for and obtain an individual permit if it is determined that unique site specific circumstances warrant additional limitations or permit conditions to control or mitigate environmental impacts that were not considered and addressed in the development and issuance of the general permit-to-install or general PTIO.
- (4) Authorization to construct under the general permit-to-install or general PTIO shall be granted by the director in the form of a final permit action.
- (5) If the model general permit that was the basis of any final general permit-to-install or general PTIO has been changed per the procedures in paragraph (A)(3) of this rule, then the director can issue revised general permits-to-install or general PTIOs with prior notice to the affected owner or operator following the issuance procedures defined in paragraph (D)(2) of this rule.

(E) Start construction limitation

The owner or operator of a new or modified air contaminant source(s) that qualifies for a general permit-to-install or general PTIO may not begin actual construction of the new or modified air contaminant source(s) until the air contaminant source(s)'s owner or operator has been granted the authorization required by the director under paragraph (D)(4) of this rule.

(F) Modification and/or replacement of equipment

- (1) If the owner or operator of the air contaminant source covered by a general permit-to-install or general PTIO wishes to replace the air contaminant source, then the owner or operator must apply for and obtain either a general permit-to-install, general PTIO, individual permit-to-install, or an individual PTIO prior to beginning actual construction.
- (2) If the owner or operator of the air contaminant source covered by a general permit-to-install or general PTIO wishes to modify the air contaminant source (per rule 3745-31-01 of the Administrative Code), then the owner or operator must apply for and obtain either a general permit-to-install, general PTIO, individual permit-to-install, or individual PTIO prior to beginning actual construction.
- (3) If the owner or operator of the air contaminant source covered by a general permit-to-install or general PTIO wishes to administratively modify the air

contaminant source, then the owner or operator must submit a request to the director, with supporting documentation, for that request.

(G) A general PTIO shall be effective for a period of time consistent with the requirements of division (F) of section 3704.03 of the Revised Code.

(H) General permit termination

(1) Any owner or operator who was issued a general permit-to-install or general PTIO may request to be excluded from the coverage of the general permit-to-install or general PTIO by applying for an individual permit, alternative general permit-to-install, or alternative general PTIO. The owner or operator shall submit an application with reasons supporting the request. If the director issues an individual permit, alternative general permit-to-install, or alternative general PTIO the applicability of the general permit-to-install or general PTIO to the individual permittee is automatically terminated on the effective date of the individual permit, alternative general permit-to-install, or alternative general PTIO.

(2) The director may revoke a general permit-to-install or general PTIO per rule 3745-31-07 of the Administrative Code.

(I) Enforcement action for failure to qualify or comply

An air contaminant source(s)'s owner or operator who requests and is granted authority to install under a general permit-to-install or general PTIO shall be subject to enforcement action for installation without a permit if the air contaminant source(s) is later determined not to qualify for the conditions and terms of the general permit-to-install or general PTIO.

3745-31-32      **Plantwide applicability limit (PAL).**

[Comment: For dates of non-regulatory government publications, publications of recognized organizations and associations, federal rules, and federal statutory provisions referenced in this rule, see "Incorporation by Reference" at the end of rule 3745-31-01 of the Administrative Code.]

(A) Actuals PAL requirements

All PALs issued under this rule shall meet all applicable provisions in this rule.

(1) Applicability

- (a) The director may approve the use of an actuals PAL for any existing major stationary source (except as provided in paragraph (A)(1)(b) of this rule) if the PAL meets the requirements in this rule. The term PAL shall mean actuals PAL throughout this rule.
- (b) The director shall not allow an actuals PAL for VOC or nitrogen oxides for any major stationary source located in an extreme ozone nonattainment area.
- (c) Any physical change in or change in the method of operation of a major stationary source that maintains its total source-wide emissions below the PAL level, meets the requirements in this rule, and complies with the PAL permit:
  - (i) Is not a major modification for the PAL pollutant;
  - (ii) Does not have to be approved through the nonattainment or PSD program; and
  - (iii) Is not subject to the provisions in paragraph (D)(5) of rule 3745-31-05 of the Administrative Code (restrictions on relaxing enforceable emission limitations that the major stationary source used to avoid applicability of the nonattainment or PSD program).
- (d) Except as provided under paragraph (A)(1)(c)(iii) of this rule, a major stationary source shall continue to comply with all applicable federal or state requirements, emission limitations, and work practice requirements that were established prior to the effective date of the PAL.

(2) Permit application requirements

As part of a permit application requesting a PAL, the owner or operator of a major stationary source shall submit the following information to the director for approval:

- (a) A list of all emissions units at the source designated as PAL small emissions unit, PAL significant emissions unit or PAL major emissions unit based on their potential to emit. In addition, the owner or operator of the source shall indicate which, if any, federal or state applicable requirements, emission limitations or work practices apply to each unit.
- (b) Calculations of the baseline actual emissions (with supporting documentation). Baseline actual emissions are to include emissions associated not only with operation of the unit, but also emissions associated with startup, shutdown and malfunction.
- (c) The calculation procedures that the major stationary source owner or operator proposes to use to convert the monitoring system data to monthly emissions and annual emissions based on a twelve-month rolling total for each month as required by paragraph (A)(12)(a) of this rule.

(3) General requirements for establishing PALs

- (a) The requirements under this paragraph, at a minimum, must be met for each PAL at a major stationary source.
  - (i) The PAL shall impose an annual emission limitation in tons per year, which is enforceable as a practical matter, for the entire major stationary source. For each month during the PAL effective period after the first twelve months of establishing a PAL, the major stationary source owner or operator shall show that the sum of the monthly emissions from each emissions unit under the PAL for the previous twelve consecutive months is less than the PAL (a twelve-month average, rolled monthly). For each month during the first eleven months from the PAL effective date, the major stationary source owner or operator shall show that the sum of the preceding monthly emissions from the PAL effective date for each emissions unit under the PAL is less than the PAL.
  - (ii) The PAL shall be established in a PAL permit that meets the requirements in paragraph (A)(4) of this rule.
  - (iii) The PAL permit shall contain all the requirements of paragraph (A)(6) of this rule.

(iv) The PAL shall include fugitive emissions, to the extent quantifiable, from all emissions units that emit or have the potential to emit the PAL pollutant at the major stationary source.

(v) Each PAL shall regulate emissions of only one pollutant.

(vi) Each PAL shall have a PAL effective period of ten years.

(vii) The owner or operator of the major stationary source with a PAL shall comply with the monitoring, recordkeeping, and reporting requirements provided in paragraphs (A)(11) to (A)(13) of this rule for each emissions unit under the PAL through the PAL effective period.

(b) At no time (during or after the PAL effective period) are emission reductions of a PAL pollutant, which occur during the PAL effective period, creditable as decreases for purposes of offsets under rule 3745-31-22 of the Administrative Code unless the level of the PAL is reduced by the amount of such emission reductions and such reductions would be creditable in the absence of the PAL.

(4) PAL permit issuance requirements

(a) The director shall issue all typographical/calculation error reopenings (as described in paragraph (A)(7)(b)(i)(a) of this rule) to PAL permits as either draft actions before any final actions, or final actions, as described in Chapter 3745-47 of the Administrative Code.

(b) The director shall issue all PAL permits not otherwise described in paragraph (A)(4)(a) of this rule as draft actions before any final actions, as described in Chapter 3745-47 of the Administrative Code.

(5) Setting the ten-year actuals PAL level

(a) Except as provide in paragraph (A)(5)(b) of this rule, the actuals PAL level for a major stationary source shall be established as the sum of the baseline actual emissions of the PAL pollutant for each emissions unit at the source; plus an amount equal to the applicable significant level for the PAL pollutant under rule 3745-31-01 of the Administrative Code or under the Clean Air Act, whichever is lower. When establishing the actuals PAL level, for a PAL pollutant, only one consecutive twenty-four-month period must be used to determine the baseline actual emissions for all existing emissions units. However, a different consecutive twenty-four-month period may be used for each different PAL pollutant. Emissions associated with emissions units that were permanently shutdown after this twenty-four-month period must be subtracted from the PAL level. Emissions from emissions units on which actual construction began after the twenty-four-

month period must be added to the PAL level in an amount equal to the potential to emit of the units. The director shall specify a reduced PAL level(s) (in tons per year) in the PAL permit to become effective on the future compliance date(s) of any applicable federal or state regulatory requirement(s) that the director is aware of prior to issuance of the PAL permit. For instance, if the source owner or operator will be required to reduce emissions from industrial boilers in half from baseline emissions of sixty parts per million nitrogen oxides to a new rule limit of thirty parts per million, then the PAL permit shall contain a future effective PAL level that is equal to the current PAL level reduced by half of the original baseline emissions of such emissions unit(s).

- (b) For newly constructed emissions units (which do not include modifications to existing emissions units) on which actual construction began after the twenty-four-month period, in lieu of adding the baseline actual emissions as specified in paragraph (A)(5)(a) of this rule, the emissions must be added to the PAL level in an amount equal to the potential to emit of the emissions units.

(6) Contents of the PAL permit

The PAL permit shall contain, at a minimum, the information under paragraph (A)(6) of this rule.

- (a) The PAL pollutant and the applicable source-wide emission limitation in tons per year.
- (b) The PAL permit effective date and the expiration date of the PAL (PAL effective period).
- (c) Specification in the PAL permit that if a major stationary source owner or operator applies to renew a PAL in accordance with paragraph (A)(9) of this rule before the end of the PAL effective period, then the PAL shall not expire at the end of the PAL effective period. It shall remain in effect until a revised PAL permit is issued by the director.
- (d) A requirement that emission calculations for compliance purposes include emissions from startups, shutdowns and malfunctions.
- (e) A requirement that, once the PAL expires, the major stationary source is subject to the requirements of paragraph (A)(8) of this rule.
- (f) The calculation procedures that the major stationary source owner or operator shall use to convert the monitoring system data to monthly emissions and annual emissions based on a twelve-month rolling total for each month as required by paragraph (A)(12)(a) of this rule.

- (g) A requirement that the major stationary source owner or operator monitor all emissions units in accordance with the provisions under paragraph (A)(11) of this rule.
  - (h) A requirement to retain the records required under paragraph (A)(12) of this rule on site. Such records may be retained in an electronic format.
  - (i) A requirement to submit the reports required under paragraph (A)(13) of this rule by the required deadlines.
  - (j) Any other requirements that the director deems necessary to implement and enforce the PAL.
- (7) PAL effective period and reopening of the PAL permit
- (a) PAL effective period

A PAL shall have an effective period of ten years.
  - (b) Reopening of the PAL permit
    - (i) During the PAL effective period, the director shall reopen the PAL permit to:
      - (a) Correct typographical/calculation errors made in setting the PAL or reflect a more accurate determination of emissions used to establish the PAL.
      - (b) Reduce the PAL if the owner or operator of the major stationary source creates creditable emission reductions for use as offsets under rule 3745-31-22 of the Administrative Code.
      - (c) Revise the PAL to reflect an increase in the PAL as provided under paragraph (A)(10) of this rule.
    - (ii) The director may reopen the PAL permit for the following:
      - (a) Reduce the PAL to reflect newly applicable federal requirements (for example, new source performance standards) with compliance dates after the PAL effective date.
      - (b) Reduce the PAL consistent with any other requirement, that is enforceable as a practical matter, and that the director may impose on the major stationary source.

(c) Reduce the PAL if the director determines that a reduction is necessary to avoid causing or contributing to a national ambient air quality standard or PSD increment violation, or to an adverse impact on an air quality related value (AQRV) that has been identified for a federal Class I area by a federal land manager and for which information is available to the general public.

(iii) Except for the permit reopening in paragraph (A)(7)(b)(i)(a) of this rule for the correction of typographical/calculation errors that do not increase the PAL level, all other reopenings shall be carried out in accordance with the public participation requirements of paragraph (A)(4) of this rule.

(8) Expiration of a PAL

Any PAL that is not renewed in accordance with the procedures in paragraph (A)(9) of this rule shall expire at the end of the PAL effective period, and the requirements under paragraph (A)(8) of this rule shall apply.

(a) Each emissions unit (or each group of emissions units) that existed under the PAL shall comply with an allowable emission limitation under a revised permit established according to the procedures under this paragraph.

(i) Within the time frame specified for PAL renewals in paragraph (A)(9)(b) of this rule, the major stationary source shall submit a proposed allowable emission limitation for each emissions unit (or each group of emissions units, if such a distribution is more appropriate as decided by the director) by distributing the PAL allowable emissions for the major stationary source among each of the emissions units that existed under the PAL. If the PAL had not yet been adjusted for an applicable requirement that became effective during the PAL effective period, as required under paragraph (A)(9)(e) of this rule, such distribution shall be made as if the PAL had been adjusted.

(ii) The director shall decide whether and how the PAL allowable emissions will be distributed and issue a revised permit incorporating allowable limits for each emissions unit, or each group of emissions units, as the director determines is appropriate.

(b) Each emissions unit(s) shall comply with the allowable emission limitation on a twelve-month rolling basis. The director may approve the use of monitoring systems (source testing, emission factors, etc.) other than CEMS, CERMS, PEMS or CPMS to demonstrate compliance with the allowable emission limitation.

- (c) Until the director issues the revised permit incorporating allowable limits for each emissions unit, or each group of emissions units, as required under paragraph (A)(8)(a)(i) of this rule, the source shall continue to comply with a source-wide, multi-unit emissions cap equivalent to the level of the PAL emission limitation.
- (d) Any physical change or change in the method of operation at the major stationary source will be subject to the nonattainment or a major NSR requirements if such change meets the definition of PAL major modification.
- (e) The major stationary source owner or operator shall continue to comply with any state or federal applicable requirements (BACT, reasonably available control technology (RACT), new source performance standard (NSPS), LAER etc.) that may have applied either during the PAL effective period or prior to the PAL effective period except for those emission limitations that had been established pursuant to paragraph (D)(5) of rule 3745-31-05 of the Administrative Code, but were eliminated by the PAL in accordance with the provisions in paragraph (A)(1)(c)(iii) of this rule.

(9) Renewal of a PAL

- (a) The director shall follow the procedures specified in paragraph (A)(4) of this rule in approving any request to renew a PAL for a major stationary source, and shall provide both the proposed PAL level and a written rationale for the proposed PAL level to the public for review and comment. During such public review, any person may propose a PAL level for the source for consideration by the director.

(b) Application deadline

A major stationary source owner or operator shall submit a timely application to the director to request renewal of a PAL. A timely application is one that is submitted at least six months prior to, but not earlier than eighteen months from, the date of PAL permit expiration. This deadline for application submittal is to ensure that the PAL permit will not expire before the PAL permit is renewed. If the owner or operator of a major stationary source submits a complete application to renew the PAL within this time period, then the PAL shall continue to be effective until the revised PAL permit with the renewed PAL is issued.

(c) Application requirements

The application to renew a PAL permit shall contain the information required under paragraph (A)(9) of this rule.

- (i) The information required under paragraph (A)(2) of this rule.
- (ii) A proposed PAL level.
- (iii) The sum of the potential to emit of all emissions units under the PAL (with supporting documentation).
- (iv) Any other information the owner or operator wishes the director to consider in determining the appropriate level for renewing the PAL.

(d) PAL adjustment

In determining whether and how to adjust the PAL, the director shall consider the options outlined in paragraphs (A)(9)(d)(i) and (A)(9)(d)(ii) of this rule. However, in no case may any such adjustment fail to comply with paragraph (A)(9)(d)(iii) of this rule.

- (i) If the emissions level calculated in accordance with paragraph (A)(5) of this rule is equal to or greater than eighty per cent of the PAL level, the director may renew the PAL at the same level without considering the factors set forth in paragraph (A)(9)(d)(ii) of this rule; or
- (ii) The director may set the PAL at a level that he/she determines to be more representative of the source's baseline actual emissions, or that he/she determines to be appropriate considering air quality needs, advances in control technology, anticipated economic growth in the area, desire to reward or encourage the source's voluntary emission reductions, or other factors as specifically identified by the director in a written rationale.
- (iii) Notwithstanding paragraphs (A)(9)(d)(i) and (A)(9)(d)(ii) of this rule,
  - (a) If the potential to emit of the major stationary source is less than the PAL, the director shall adjust the PAL to a level no greater than the potential to emit of the source; and
  - (b) The director shall not approve a renewed PAL level higher than the current PAL, unless the major stationary source has complied with the provisions of paragraph (A)(10) of this rule.
- (e) If the compliance date for a state or federal requirement that applies to the PAL source occurs during the PAL effective period, and if the director has not already adjusted for such requirement, the PAL shall be adjusted at the time of PAL permit renewal or Title V permit renewal, whichever occurs first.

(10) Increasing a PAL during the PAL effective period

- (a) The director may increase a PAL emission limitation only if the major stationary source complies with the provisions under this paragraph.
  - (i) The owner or operator of the major stationary source shall submit a complete application to request an increase in the PAL limit for a PAL major modification. Such application shall identify the emissions unit(s) contributing to the increase in emissions so as to cause the major stationary source's emissions to equal or exceed its PAL.
  - (ii) As part of this application, the major stationary source owner or operator shall demonstrate that the sum of the baseline actual emissions of the PAL small emissions units, plus the sum of the baseline actual emissions of the PAL significant and PAL major emissions units assuming application of BACT equivalent controls, plus the sum of the PAL allowable emissions of the new or modified emissions unit(s) exceeds the PAL. The level of control that would result from BACT equivalent controls on each PAL significant or PAL major emissions unit shall be determined by conducting a new BACT analysis at the time the application is submitted, unless the emissions unit is currently required to comply with a BACT or LAER requirement that was established within the preceding ten years. In such a case, the assumed control level for that emissions unit shall be equal to the level of BACT or LAER with which that emissions unit must currently comply.
  - (iii) The owner or operator obtains a nonattainment NSR permit or PSD permit for all emissions unit(s) identified in paragraph (A)(10)(a)(i) of this rule, regardless of the magnitude of the emissions increase resulting from them (that is, no significant levels apply). These emissions unit(s) shall comply with any emissions requirements resulting from the major NSR program process (for example, LAER/BACT), even though they have also become subject to the PAL or continue to be subject to the PAL.
  - (iv) The PAL permit shall require that the increased PAL level shall be effective on the day any emissions unit that is part of the PAL major modification becomes operational and begins to emit the PAL pollutant.
- (b) The director shall calculate the new PAL as the sum of the PAL allowable emissions for each modified or new emissions unit, plus the sum of the baseline actual emissions of the PAL significant and PAL major emissions units (assuming application of BACT equivalent controls as determined in accordance with paragraph (A)(10)(a)(ii) of this rule, plus the sum of the baseline actual emissions of the PAL small emissions units.

- (c) The PAL permit shall be revised to reflect the increased PAL level pursuant to the public notice requirements of paragraph (A)(4) of this rule.

(11) Monitoring requirements for PALs

(a) General requirements

- (i) Each PAL permit must contain enforceable requirements for the monitoring system that accurately determines plantwide emissions of the PAL pollutant in terms of mass per unit of time. Any monitoring system authorized for use in the PAL permit must be based on sound science and meet generally acceptable scientific procedures for data quality and manipulation. Additionally, the information generated by such system must meet minimum legal requirements for admissibility in a judicial proceeding to enforce the PAL permit.
- (ii) The PAL monitoring system must employ one or more of the four general monitoring approaches meeting the minimum requirements set forth under paragraph (A)(11)(b) of this rule and must be approved by the director.
- (iii) Notwithstanding paragraph (A)(11)(a)(ii) of this rule, you may also employ an alternative monitoring approach that meets paragraph (A)(11)(a)(i) of this rule if approved by the director.
- (iv) Failure to use a monitoring system that meets the requirements of this rule renders the PAL invalid.

(b) Minimum performance requirements for approved monitoring approaches

The following are acceptable general monitoring approaches when conducted in accordance with the minimum requirements under paragraph (A)(11)(c) of this rule:

- (i) Mass balance calculations for activities using coatings or solvents;
- (ii) CEMS;
- (iii) CPMS or PEMS; and
- (iv) Emission factors.

(c) Mass balance calculations

An owner or operator using mass balance calculations to monitor PAL pollutant emissions from activities using coating or solvents shall meet the following requirements:

- (i) Provide a demonstrated means of validating the published content of the PAL pollutant that is contained in or created by all materials used in or at the emissions unit;
- (ii) Assume that the emissions unit emits all of the PAL pollutant that is contained in or created by any raw material or fuel used in or at the emissions unit, if it cannot otherwise be accounted for in the process; and
- (iii) Where the vendor of a material or fuel, which is used in or at the emissions unit, publishes a range of pollutant content from such material, the owner or operator must use the highest value of the range to calculate the PAL pollutant emissions unless the director determines there is site-specific data or a site-specific monitoring program to support another content within the range.

(d) CEMS

An owner or operator using CEMS to monitor PAL pollutant emissions shall meet the following requirements:

- (i) CEMS must comply with applicable performance specifications found in 40 CFR Part 60, Appendix B; and
- (ii) CEMS must sample, analyze and record data at least every fifteen minutes while the emissions unit is operating.

(e) CPMS or PEMS

An owner or operator using CPMS or PEMS to monitor PAL pollutant emissions shall meet the following requirements:

- (i) The CPMS or the PEMS must be based on current site-specific data demonstrating a correlation between the monitored parameter(s) and the PAL pollutant emissions across the range of operation of the emissions unit; and
- (ii) Each CPMS or PEMS must sample, analyze, and record data at least every fifteen minutes, or at another less frequent interval approved by the director, while the emissions unit is operating.

(f) Emission factors

An owner or operator using emission factors to monitor PAL pollutant emissions shall meet the following requirements:

- (i) All emission factors shall be adjusted, if appropriate, to account for the degree of uncertainty or limitations in the factors' development;
  - (ii) The emissions unit shall operate within the designated range of use for the emission factor, if applicable; and
  - (iii) If technically practicable, the owner or operator of a PAL significant emissions unit that relies on an emission factor to calculate PAL pollutant emissions shall conduct validation testing to determine a site-specific emission factor within six months of PAL permit issuance, unless the director determines that testing is not required.
- (g) A source owner or operator must record and report maximum potential emissions without considering enforceable emission limitations or operational restrictions for an emissions unit during any period of time that there is no monitoring data, unless another method for determining emissions during such periods is specified in the PAL permit.
- (h) Notwithstanding the requirements in paragraphs (A)(11)(c) to (A)(11)(g) of this rule, where an owner or operator of an emissions unit cannot demonstrate a correlation between the monitored parameter(s) and the PAL pollutant emissions rate at all operating points of the emissions unit, the director shall, at the time of PAL permit issuance:
- (i) Establish default value(s) for determining compliance with the PAL based on the highest potential emissions reasonably estimated at such operating point(s); or
  - (ii) Determine that operation of the emissions unit during operating conditions when there is no correlation between monitored parameter(s) and the PAL pollutant emissions is a violation of the PAL.
- (i) Re-validation

All data used to establish the PAL pollutant must be re-validated through performance testing or other scientifically valid means approved by the director. Such testing must occur at least once every five years after issuance of the PAL.

#### (12) Recordkeeping requirements

- (a) The PAL permit shall require an owner or operator to retain a copy of all records necessary to determine compliance with any requirement of paragraph (A) of this rule and of the PAL, including a determination of each emissions unit's twelve-month rolling total emissions, for five years from the date of such record.
- (b) The PAL permit shall require an owner or operator to retain a copy of the following records for the duration of the PAL effective period plus five years:
  - (i) A copy of the PAL permit application and any applications for revisions to the PAL; and
  - (ii) Each annual certification of compliance pursuant to Title V and the data relied on in certifying the compliance.

(13) Reporting and notification requirements

The owner or operator shall submit semi-annual monitoring reports and prompt deviation reports to the director in accordance with the applicable Title V operating permit program. The reports shall meet the requirements under paragraph (A)(13) of this rule.

(a) Semi-annual report

The semi-annual report shall be submitted to the director within thirty days of the end of each reporting period. This report shall contain the information required under paragraph (A)(13)(a) of this rule.

- (i) The identification of owner and operator, the facility ID, and the permit-to-install numbers for any applicable permit-to-install.
- (ii) Total annual emissions (tons per year) based on a twelve-month rolling total for each month in the reporting period recorded pursuant to paragraph (A)(12)(a) of this rule.
- (iii) All data relied upon, including, but not limited to, any quality assurance or quality control data, in calculating the monthly and annual PAL pollutant emissions.
- (iv) A list of any emissions units modified or added to the major stationary source during the preceding six-month period.
- (v) The number, duration, and cause of any deviations or monitoring malfunctions (other than the time associated with zero and span calibration checks), and any corrective action taken.

- (vi) A notification of a shutdown of any monitoring system, whether the shutdown was permanent or temporary, the reason for the shutdown, the anticipated date that the monitoring system will be fully operational or replaced with another monitoring system, and whether the emissions unit monitored by the monitoring system continued to operate, and the calculation of the emissions of the pollutant or the number determined by method included in the PAL permit, as provided by paragraph (A)(11)(g) of this rule.
- (vii) A signed statement by the responsible official (as defined by the Title V operating permit program contained in Chapter 3745-77 of the Administrative Code) certifying the truth, accuracy, and completeness of the information provided in the report.

(b) Deviation report

The major stationary source owner or operator shall promptly submit reports of any deviations or exceedance of the PAL requirements, including periods where no monitoring is available. A report submitted pursuant to paragraph (A)(3)(c)(iii) of rule 3745-77-07 of the Administrative Code shall satisfy this reporting requirement. The deviation reports shall be submitted within the time limits prescribed by the rule 3745-77-07 of the Administrative Code. The reports shall contain the following information:

- (i) The identification of owner and operator, the facility ID, and the permit-to-install numbers for any applicable permit-to-install;
- (ii) The PAL requirement that experienced the deviation or that was exceeded;
- (iii) Emissions resulting from the deviation or the exceedance; and
- (iv) A signed statement by the responsible official (as defined by the Title V operating permit program contained in Chapter 3745-77 of the Administrative Code) certifying the truth, accuracy, and completeness of the information provided in the report.

(c) Re-validation results

The owner or operator shall submit to the director the results of any re-validation test or method within three months after completion of such test or method.

Effective: 06/30/2008

R.C. 119.032 review dates: 12/01/2011

CERTIFIED ELECTRONICALLY  
Certification

06/02/2008  
Date

Promulgated Under: 119.03  
Statutory Authority: 3704.03(F)  
Rule Amplifies: 3704.03(F) , 3704.03(A)  
Prior Effective Dates: 10/28/04. 12/1/06

3745-31-33      **Site preparation activities prior to obtaining a final permit-to-install or PTIO.**

- (A) Under paragraph (A)(1) of rule 3745-31-02 of the Administrative Code, new air contaminant sources or modified air contaminant sources shall not be installed or modified until a final permit-to-install or PTIO is obtained from the director. This rule describes activities that can be undertaken prior to obtaining a final permit-to-install or PTIO and, are therefore, excluded from the definition of begin actual construction.

[Comment: Some activities described in this rule may not begin until any applicable national pollutant discharge elimination system (NPDES) permit, isolated wetland permit or 401 water quality certification is obtained. Notwithstanding any other provision of this rule, compliance with this chapter does not relieve any person from the requirements of Chapter 3734. or 3714. of the Revised Code and rules adopted thereunder.]

(B) Risk to the owner or operator

- (1) This rule does not in any way guarantee that a final permit-to-install or PTIO will be issued.
- (2) The implementation of any of the activities described in this rule are at the entire risk of the owner or operator.
- (3) If a final permit-to-install or PTIO is issued, any necessary design changes, and the costs associated with those design changes (including costs due to delayed construction) in order to comply with the terms of the final permit-to-install or PTIO are entirely at the owner or operator's risk. Any costs associated with these design changes may not be used as part of any BAT, BACT, LAER or MACT determination cost-effectiveness evaluations.

(C) General restrictions

All construction activities must comply with any applicable fugitive dust requirements contained in rule 3745-17-08 of the Administrative Code.

(D) Installation of buildings or structures not containing air contaminant sources

The construction of warehouses, store rooms, office buildings, or other buildings or structures that are not planned to contain any air contaminant source(s) as part of an air contaminant source project may be constructed prior to obtaining a final permit-to-install or PTIO if the buildings or structures would be built (for business financial reasons) even though no final permit-to-install or PTIO could be obtained.

(E) Acceptable site preparation activities for any air contaminant source project

The following activities do not constitute beginning actual construction and may be undertaken prior to obtaining a final permit-to-install or PTIO for a particular air contaminant source project.

- (1) Clearing the site of existing vegetation, old buildings, or old equipment.
- (2) Grading and clearing of land, stripping and stockpiling topsoil, earthwork cut and fill for foundations in preparation for construction.
- (3) Installing temporary site access roadways and parking areas.
- (4) Installing temporary construction equipment storage areas.
- (5) Storing of construction equipment including temporary buildings and trailers for equipment storage and for construction offices.
- (6) Exploratory excavation and borings to assess the suitability of a site for the intended building or installation activities.
- (7) Excavating building footers, pilings, foundations, pads, and platforms, etc. (note, no pouring of concrete is allowed).
- (8) Installing concrete forms and reinforcing bar for any concrete footers, pilings, foundations, pads and platforms, etc. (note, no pouring of concrete is allowed).
- (9) Installing temporary utilities for site construction including electricity, water, gas, communication and sanitary.
- (10) Removing old equipment from existing buildings.
- (11) Installation of any temporary construction dust control systems (sprinklers, etc.).
- (12) Installation of any signage or traffic control signs.
- (13) Installation of any utility poles by a utility company.
- (14) Installation of temporary erosion and sedimentation control systems including hay bales, silt fences, rip-raps and sandbags.
- (15) Installation of new landscaping including trees, bushes and seeding of disturbed earthwork.
- (16) Installation of landscaping fencing.
- (17) Installation of temporary fences and signs around the construction site.
- (18) Stockpiling of stone, soil and other materials for future construction.

- (F) Additional acceptable site preparation activities for any source that is not a major new or modified source (i.e., minor modifications and minor new sources)

The following additional site preparation activities may be undertaken prior to obtaining a final permit-to-install or PTIO provided the air contaminant source project is not a major modification, a major stationary source, or part of a permit-to-install or PTIO designed to avoid a major modification or classification of a major stationary source through permit-to-install or PTIO restrictions (known as a synthetic minor or netting permits avoiding major new source review). These activities may only be undertaken if the owner or operator has filed a complete application for a permit-to-install or PTIO,

the director or his/her designee has determined the application is administratively complete, and the owner or operator has provided notification, in a form and manner prescribed by the director, of the activities described in this rule that the owner or operator plans to undertake prior to receiving a final permit-to-install or PTIO.

- (1) Installing electrical service for any air contaminant source(s) or air pollution control equipment up to the service panel for the new equipment. Connections to any air contaminant source(s) or air pollution control equipment cannot be made until a final permit-to-install or PTIO is issued and effective.
- (2) Installing piping and sewers up to the point of connection to any air contaminant source(s) or air pollution control equipment. Connections to any air contaminant source(s) or air pollution control equipment cannot be made until a final permit-to-install or PTIO is issued and effective.
- (3) Installing inlet air and exhaust duct work with the exception of final connections to the air contaminant source(s) or air pollution control equipment.
- (4) Installing site drainage systems including ditches, culverts, earthwork for underground storm drains, headwalls and catch basins. This is authorized only if any necessary storm water permits have been obtained.
- (5) Installing concrete footers, foundations, pads and platforms for the building or for equipment.
- (6) Installing any permanent roadways and parking areas not required under this chapter to obtain a permit-to-install or PTIO.
- (7) Storing parts and equipment of the air contaminant source(s) or air pollution control equipment.
- (8) Construction of new or expanded buildings, or the renovation or upgrading of existing buildings, in preparation for the installation of new or modified air contaminant source(s) or air pollution control equipment.

- (9) Equipment that constitutes a component of an air contaminant source (including air pollution control equipment) may be delivered to the site prior to obtaining a final permit-to-install or a PTIO if the following criteria are met:
- (a) If the equipment is to be installed in an existing building, then it may be placed in its final location and secured. No utilities, piping, or duct work may be connected to the equipment. The equipment shall not be operated.
  - (b) If the equipment is to be installed in a building that has not yet been built, then it can either be secured on the foundation of its final site or may be located anywhere on the property. No utilities, piping, or duct work may be connected to the equipment. The equipment shall not be operated.
- (G) The director, at his/her discretion and in writing, may determine that an activity not listed in paragraphs (E) and (F) of this rule is an activity that can be undertaken prior to obtaining a final permit-to-install or PTIO for an air contaminant source project. Any activity approved by the director must meet the requirements described in division (F)(5) of section 3704.03 of the Revised Code and must meet all applicable law. A request for approval of these activities shall be made in writing and shall provide: a detailed description of the desired activities; an analysis of why the activities are allowed under all state and federal air pollution rules, regulations and/or laws; and a description of the adverse consequences that would occur to the permittee if the activities were not allowed prior to obtaining a final permit-to-install or PTIO.

## **Chapter 3745-35: Reserved**

OAC Chapter 3745-35, formerly “Air Permits to Operate and Variances”, was rescinded on June 30, 2008 and replaced by the new Permit-to-Install and Operate Program in OAC Chapter 3745-31. Historic versions of the rules can be viewed on Ohio EPA DAPC’s website at:

[http://www.epa.state.oh.us/dapc/regs/3745-35/3745\\_35.html](http://www.epa.state.oh.us/dapc/regs/3745-35/3745_35.html)

## **Chapter 3745-71: Lead Emissions**

*Contact:* Sarah VanderWielen 614-644-3632  
sara.vanderwielen@EPA.State.Oh.US

3745-71-01      **Definitions.**

- (A) The definitions in rule 3745-71-01 of the Administrative Code shall apply to this chapter.
- (B) "Lead" means solid or gaseous lead and its compounds as measurable by the methods specified in either rule 3745-71-03 of the Administrative Code or rule 3745-71-05 of the Administrative Code.
- (C) "Calendar quarters" means: first quarter - January, February, March; second quarter - April, May, June; third quarter - July, August, September; and fourth quarter - October, November, December.
- (D) Incorporation by reference. This chapter includes references to certain matter or materials. The text of the incorporated materials is not included in the regulations contained in this chapter. The materials are hereby made a part of the regulations in this chapter. For materials subject to change, only the specific version specified in the regulations are incorporated. Material is incorporated as it exists on the effective date of this rule. Except for subsequent annual publication of existing (unmodified) Code of Federal Regulation compilations, any amendment or revision to a referenced document is not incorporated unless and until this rule has been amended to specify the new dates.
  - (1) Availability. The materials incorporated by reference are available as follows:
    - (a) Code of Federal Regulations (CFR). Information and copies may be obtained by writing to: "Superintendent of Documents, Attn: New Orders, PO Box 371954, Pittsburgh, PA 15250-7954." The full text of the CFR is also available in electronic format at [www.access.gpo.gov/](http://www.access.gpo.gov/). The CFR compilations are also available for inspection and copying at most public libraries and "The State Library of Ohio."
  - (2) Incorporated materials:
    - (a) Appendix C, contained in 40 CFR Part 58; "Ambient Air Quality Monitoring Methodology;" as published in the July 1, 2005 Code of Federal Regulations.
    - (b) Appendix G, contained in 40 CFR Part 50; "Reference Method for the Determination of Lead in Suspended Particulate Matter Collected From Ambient Air;" as published in the July 1, 2005 Code of Federal Regulations.
    - (c) Method 9; contained in 40 CFR Part 60, Appendix A; "Visual determination of the opacity of emissions from stationary sources;" as published in the July 1, 2005 Code of Federal Regulations.

- (d) Method 12; contained in 40 CFR Part 60: "Determination of inorganic lead emissions from stationary sources;" as published in the July 1, 2005 Code of Federal Regulations.
- (e) Method 29: contained in 40 CFR Part 60: "Determination of metal emissions from stationary sources;" as published in the July 1, 2005 Code of Federal Regulations.

**Emissions test methods and procedures and reporting requirements for new and existing sources.**

[Comment: For dates of non-regulatory government publications, publications of recognized organizations and associations, federal rules, and federal statutory provisions referenced in this rule, see the last paragraph of rule 3745-71-01 of the Administrative Code titled "Incorporation by Reference."]

- (A) Compliance with any applicable lead emission limitation shall be determined according to either Method 12 or Method 29 in Appendix A of 40 CFR Part 60 "Stationary Sources."
- (B) For purposes of rule 3745-71-06 of the Administrative Code, tons of lead product refers to total tons of intermediate or final lead product produced by any process that may cause any emission of lead. For a cyclical or batch operation, the lead product per hour shall be obtained by dividing the total weight produced by the number of hours in one complete operation.
- (C) The owner or operator of any facility subject to the provisions of rule 3745-71-06 of the Administrative Code shall submit evidence to the director demonstrating compliance with the requirements of paragraphs (A)(1) to (A)(3) and (A)(7) of rule 3745-71-06 of the Administrative Code within six months of the effective date of these rules and prior to each renewal of the permit to operate for any source subject to the provisions of paragraphs (A)(1) to (A)(3) and (A)(7) of rule 3745-71-06 of the Administrative Code.
- (D) The owner or operator of any facility subject to the provisions of rule 3745-71-06 of the Administrative Code shall submit production records sufficient to demonstrate compliance with the requirements of paragraph (A)(8) of rule 3745-71-06 of the Administrative Code to the director on a monthly basis.
- (E) The owner or operator of any facility subject to the provisions of rule 3745-71-06 of the Administrative Code shall demonstrate compliance with the requirements of paragraph (A)(6) of rule 3745-71-06 of the Administrative Code using the negative pressure system testing methodology specified in "Appendix A" of this chapter on a monthly basis and shall maintain records of the data produced for all parameters identified in "Appendix A" of this chapter.
- (F) The owner or operator of any facility subject to the provisions of rule 3745-71-06 of the Administrative Code shall maintain records sufficient to document compliance with the requirements of paragraph (A)(5) of rule 3745-71-06 of the Administrative Code.

- (G) The owner or operator of any facility subject to the provisions of rule 3745-71-06 of the Administrative Code shall install, operate and maintain an ambient lead monitoring network as specified by the director.

3745-71-06      **Source specific emission limits.**

[Comment: For dates of non-regulatory government publications, publications of recognized organizations and associations, federal rules, and federal statutory provisions referenced in this rule, see the last paragraph of rule 3745-71-01 of the Administrative Code titled "Incorporation by Reference."]

- (A) The "Master Metals, Incorporated" (OEPA premise number 1318000222) or any subsequent owner or operator of the "Master Metals, Incorporated, 2850 West Third Street, Cleveland, Ohio," facility shall not cause or permit the emission of lead from the following sources to exceed the amounts indicated:
- (1) Rotary furnaces numbers 2 and 3 (OEPA source numbers P009 and P010); a total combined maximum of 0.35 pounds of lead per ton of lead product, or a maximum of 1.14 pounds of lead per hour.
  - (2) Pot furnaces (OEPA source number P006); a total combined maximum of 0.0216 pounds of lead per ton of lead product, or a maximum of 0.06 pounds of lead per hour.
  - (3) Casting shop (OEPA source number P006); a maximum of 0.0108 pounds of lead per ton of lead product, or a maximum of 0.03 pounds of lead per hour.
  - (4) Materials handling: no visible emissions. All materials, except lead acid batteries, must be received, handled and charged in leak proof containers.
  - (5) Roadways and parking lots: shall install, operate and maintain the dust suppression program specified in "Appendix B" of this chapter.
  - (6) Smelting furnaces, kettle refining pots and casting shop (OEPA source numbers P006, P009 and P010); must be within a building enclosure maintaining negative interior pressure and be vented through a secondary control system.
  - (7) Emissions from the secondary control system required in paragraph (A)(6) of this rule shall not exceed 0.0004249 pounds of lead per ton of lead product or a maximum of 0.001 pounds of lead per hour.
  - (8) Total lead product shall be limited to 3657 tons per calendar quarter combined from the rotary furnaces (OEPA source numbers P009 and P010) and 3108 tons per calendar quarter combined from the pot furnaces (OEPA source number P006).
  - (9) Visible emissions of particulate matter from P006, P009, P010 and the secondary control system required in Paragraphs (A)(6) and (A)(7) of this rule shall not

exceed five per cent opacity as determined by Method 9 in Appendix A of 40 CFR 60 "Standards of Performance for New Stationary Sources".

## **3745-71-06 Appendix A**

### **Negative Pressure System Testing**

The owner or operator of a source subject to the requirements of OAC 3745-71-06(A)(6) shall perform smoke testing of outside openings to the building enclosure containing materials storage, materials handling, rotary furnaces and refining operations on a monthly basis.

1) The owner or operator shall determine the effectiveness of the negative pressure system by testing various outside and inside openings leading to the emission areas within the building enclosure. Testing locations shall include, but are not limited to, the following areas:

- a) Flashings around ventilation ducts extending through the roof of the building,
- b) Cracks in walls,
- c) Openings around closed overhead doors,
- d) Air flow direction when outside man-doors are opened in the building enclosure, and
- e) Air flow at man-doors connecting adjacent building structures to the controlled emissions area.

2) The owner or operator shall conduct the smoke testing with MSA ventilation smoke tubes.

3) The owner or operator shall record and maintain records of the monthly testing described above on a map of the building enclosure identifying the location of the emission sources. The map shall include a description of the inside and outside openings tested, arrows depicting air flow at each testing point, date and time of the test, weather conditions at the time of the test and process equipment operating and other emission activity occurring at the time of the test.

4) The owner or operator shall immediately determine the cause of any positive pressure test results, repair the cause and repeat the smoke test described in paragraphs 1 and 2 above as soon as is reasonably possible, after giving consideration to facility and personal safety, and record and maintain the results.

## 3745-71-06 Appendix B

The owner or operator of any facility subject to the provisions of subparagraph (A)(5) of rule 3745-71-06 of the Administrative Code shall maintain the following fugitive dust program.

### 1) Building openings:

- a) The owner or operator shall keep all barriers on outside openings of the material processing and material handling building enclosure closed at all times except during ingress and egress through the building opening.
- b) The owner or operator shall keep all barriers that separate areas of the building enclosure that are under negative pressure from those that are not under negative pressure closed at all times except during ingress and egress through the opening.
- c) The owner or operator shall inspect all barriers on inside and outside openings for damage that results in lead emissions inside the building escaping to outside the building monthly. Any time that damage to the inside and outside openings which results in lead emissions to outside the building is detected, the owner or operator shall repair the damage within two weeks of the detection.

### 2) Sweeping:

- a) The owner or operator shall sweep all paved outdoor areas with a vacuum equipped road sweeper daily. The owner or operator is exempt from sweeping uncovered outdoor areas if there was a 0.1 inch rainfall during the previous 24 hours, or if these areas are covered with snow. The owner or operator shall collect rainfall data with an on-site rain gauge and record dates and rationale when sweeping was not performed.
- b) The owner or operator shall immediately clean up spills of lead containing materials, flue dust, or slag with a vacuum equipped road sweeper, by hand vacuuming or wet sweeping.

### 3) Equipment handling and cleaning:

- a) The owner or operator shall immediately deposit used bags and cartridge filters in leak-proof containers when replacing bag house or cartridge filters for the

control equipment. The owner or operator shall recycle the used bags and cartridge filters in one of the rotary furnaces.

- b) The owner or operator shall clean all mobile equipment used that handles lead bearing scrap or slag daily. Mobile equipment includes, but is not limited to the road sweepers and front end loaders. Cleaning shall be conducted by hand vacuuming, scrubbing or hosing down with water. The owner or operator shall store vacuumed lead bearing material within the building enclosure and recycle the captured material in the furnaces.
- c) The owner or operator shall inspect the building evacuation system for holes and negative static pressure with an electronic portable magnahelic gauge monthly. The owner or operator shall clean and/or repair the ventilation system if there are visible holes and/or negative static pressure. The owner or operator shall monthly test the electronic magnahelic gauges for accuracy, and repair or replace defective gauges.
- d) The owner or operator shall recycle the baghouse and cartridge filter dust in the furnaces. The owner or operator shall store collected filter dust within the building enclosure.
- e) The owner or operator shall store the slag material within the building enclosure. The owner or operator shall apply water to the slag material prior to loading onto trucks that haul the material outside the building enclosure. Water application is not required when the air temperature outside is below 32° F. The owner or operator shall cover all trucks hauling slag or slag residue outside the building enclosure.

4) Wind erosion prevention:

- a) The owner or operator shall maintain continuous vegetative cover (grasses) over all areas that are not paved or otherwise continuously covered.
- b) The owner or operator shall retain all paved areas.
- c) If the owner or operator removes lead bearing soil to comply with Resource Conservation and Recovery Act (RCRA) corrective action requirements, the owner or operator shall remove and handle the soil in accordance with a corrective action plan approved by the Ohio EPA.

## **Chapter 3745-72: Low Reid Vapor Pressure Fuel Requirements**

*Contact:* Alan Harness 614-644-4838  
Alan.Harness@EPA.State.Oh.US

3745-72-01      **Applicability.**

Comment: For dates of non-regulatory government publications, publications of recognized organizations and associations, federal rules, and federal statutory provisions referenced in this rule, see the last paragraph of rule 3745-72-02 of the Administrative Code titled "Incorporation by reference."

- (A) Beginning twelve months after final approval by USEPA under Section 211(c)(4)(C) of the Clean Air Act of Ohio's state implementation plan that requires the use of low Reid vapor pressure gasoline, this Chapter applies to all gasoline sold or dispensed for use in the Dayton area and Cincinnati area between June first and September fifteenth. If at the end of twelve months, three months of the low RVP control period have already elapsed, this chapter shall not apply until the low RVP control period of the next calendar year.
- (B) This chapter also applies to all gasoline sold or dispensed for use in the Cleveland area, the Dayton area and/or the Cincinnati area eight months after a violation of the ambient air quality standard for ozone, as determined by 40 CFR Part 50, appendix H is measured in the area and the control programs required under the reasonable further progress plan (created pursuant to section 182(b)(1) of the Clean Air Act) are implemented in the area. If, at the end of the eight-month period, three months of the low RVP control period have already elapsed, this chapter shall not apply until the low RVP control period of the next calendar year. If any extensions are granted under section 181(a)(5) of the Clean Air Act, this chapter will not apply until eight months after such extensions have expired.
- (C) This chapter also applies to all gasoline sold or dispensed for use in Stark, Jefferson, Columbiana and/or Preble counties eight months after a violation of the ambient air quality standard for ozone, as determined by 40 CFR Part 50, Appendix H is measured in the area and only if the request for redesignation for the area (created pursuant to section 107(d)(1)(E) of the Clean Air Act) has been approved by the U.S. environmental protection agency. If, at the end of the eight-month period, three months of the low RVP control period have already elapsed, this chapter shall not apply until the low RVP control period of the next calendar year.
- (D) For the purposes of this chapter, the Cleveland area includes Cuyahoga, Ashtabula, Lake, Lorain, Geauga, Summit, Medina and Portage counties; the Dayton area includes Montgomery, Miami, Greene and Clark counties; and the Cincinnati area includes Hamilton, Butler, Warren and Clermont counties.
- (E) Temporary waivers during supply emergencies.
  - (1) The director may temporarily waive a control or prohibition respecting the use of a fuel or fuel additive required or regulated by the director pursuant to rules

3745-72-03 and 3745-72-04 of the Administrative Code if the director determines that:

- (a) Extreme and unusual fuel or fuel additive supply circumstances exist in the state or portion of the state that prevent the distribution of an adequate supply of the fuel or fuel additive to consumers;
  - (b) Such extreme and unusual fuel and fuel additive supply circumstances are the result of a natural disaster, an act of God, a pipeline or refinery equipment failure, or another event that could not reasonably have been foreseen or prevented; and
  - (c) It is in the public interest to grant the waiver (for example, when a waiver is necessary to meet projected temporary shortfalls in the supply of the fuel or fuel additive in a state or portion of the state that cannot otherwise be compensated for).
- (2) If the director makes the determinations required under paragraph (E)(1) of this rule such a temporary extreme and unusual fuel and fuel additive supply circumstances waiver shall be permitted only if:
- (a) The waiver applies to the smallest geographic area necessary to address the extreme and unusual fuel and fuel additive supply circumstances;
  - (b) The waiver is effective for a period of twenty calendar days or, if the director determines that a shorter waiver period is adequate, for the shortest practicable time period necessary to permit the correction of the extreme and unusual fuel and fuel additive supply circumstances and to mitigate impact on air quality;
  - (c) The waiver may be issued for a longer time period during the initial compliance period but only for the shortest practical time period necessary to permit the correction of the extreme and unusual fuel and fuel additive supply circumstances and to mitigate impact on air quality;
  - (d) The waiver permits a transitional period, the exact duration of which shall be determined by the director, after the termination of the temporary waiver to permit wholesalers and retailers to blend down their wholesale and retail inventory;
  - (e) The waiver applies to all persons in the motor fuel distribution system; and
  - (f) The director has given public notice to all parties in the motor fuel distribution system, and local and state regulators, in the state or region to be covered by the waiver.

(3) Nothing in this paragraph shall:

- (a) Limit or otherwise affect the application of any other waiver authority of the director pursuant to this section or pursuant to a regulation promulgated pursuant to this rule; or
- (b) Subject any person to an enforcement action, penalties, or liability solely arising from actions taken pursuant to the issuance of a waiver under this paragraph.

3745-72-02      **Definitions.**

Comment: For dates of non-regulatory government publications, publications of recognized organizations and associations, federal rules, and federal statutory provisions referenced in this rule, see the last paragraph in rule 3745-72-02 of the Administrative Code titled "Incorporation by reference."

(A) Except as otherwise provided in paragraph (B) of this rule, the definitions in rule 3745-15-01 of the Administrative Code shall apply to this chapter.

(B) For the purpose of this chapter:

- (1) "Carrier" means any person who transports, stores, or causes the transportation or storage of gasoline at any point in the gasoline distribution network, without taking title to or otherwise having ownership of the gasoline and without altering the quality or quantity of the gasoline.
- (2) "Clean Air Act Amendments" means the Clean Air Act Amendments of 1990, 42 USC 7401 to 7671.
- (3) "Conventional gasoline" means any gasoline that is not a low Reid vapor pressure gasoline.
- (4) "Distributor" means any person who transports or stores or causes the transportation or storage of gasoline at any point between any gasoline refinery or importer's facility and any retail outlet or wholesale purchaser-consumer's facility.
- (5) "Ethanol blender" means a person who owns, leases, operates, controls or supervises an ethanol blending facility.
- (6) "Gasoline" means any fuel sold for use in motor vehicles and motor vehicle engines, and commonly or commercially known or sold as gasoline, except such fuel used at any mobile source "research and development source", as defined in paragraph (O) of section 3704.01 of the Revised Code.
- (7) "Gasoline distribution network" means any person involved with the distribution of gasoline starting with the refiner and ending with the retailer or wholesale purchaser-consumer.
- (8) "Importer" means a person who imports gasoline or gasoline blending stocks or components from a foreign country into the United States or into the Commonwealth of Puerto Rico, the Virgin islands, Guam, American Samoa, and the northern Mariana islands.

- (9) "Low Reid vapor pressure control area" means a geographic area in which only gasoline with a Reid vapor pressure of 7.8 pounds per square inch or less may be sold or dispensed within its boundaries. The geographic areas are specified in rule 3745-72-01 of the Administrative Code.
- (10) "Low Reid vapor pressure control area terminal" means a terminal which is capable of receiving gasoline in bulk from carriers which include but are not limited to, pipelines, marine vessels or barges, and/or at which gasoline is altered either in quantity or quality. Gasoline which is intended for use in any low Reid vapor pressure control area is sold or dispensed into trucks at these low Reid vapor pressure control area terminals.
- (11) "Low Reid vapor pressure control period" means the time period beginning June first and ending September fifteenth of each calendar year.
- (12) "Low Reid vapor pressure gasoline" means any gasoline which has a Reid vapor pressure of 7.8 P.S.I. or less.
- (13) "Motor Fuel System" shall be defined by the Director through rulemaking.
- (14) "Motor vehicle" has the same meaning as in section 4501.01 of the Revised Code.
- (15) "P.S.I." means pounds per square inch absolute.
- (16) "Refiner" means any person who owns, leases, operates, controls or supervises a refinery which produces gasoline for use in a low Reid vapor pressure control area.
- (17) "Refinery" means a plant at which gasoline is produced.
- (18) "Reid vapor pressure" means the absolute vapor pressure of volatile crude oil and volatile nonviscous petroleum liquids, except liquified petroleum gases, as determined by ASTM D323-99a.
- (19) "Reseller" means any person who purchases gasoline and resells or transfers it to a retailer or a wholesale purchaser-consumer when the resale and/or transfer does not include changing, blending or in any way altering the specifications of the gasoline with respect to Reid vapor pressure, ethanol content or any other parameter.
- (20) "Retail outlet" means any establishment at which gasoline is sold or offered for sale to the ultimate consumer for use in motor vehicles.
- (21) "Retailer" means any person who owns, leases, operates, controls or supervises a retail outlet.

- (22) "R.V.P." means Reid vapor pressure.
- (23) "Wholesale purchaser-consumer" means any person who is an ultimate consumer of gasoline and who purchases or obtains gasoline from a distributor for use in motor vehicles.
- (C) Incorporation by reference. This chapter includes references to certain matter or materials. The text of the incorporated materials is not included in the regulations contained in this chapter. The materials are hereby made a part of the regulations in this chapter. For materials subject to change, only the specific version specified in the regulation are incorporated. Material is incorporated as it exists on the effective date of this rule. Except for subsequent annual publication of existing (unmodified) Code of Federal Regulation compilations, any amendment or revision to a referenced document is not incorporated unless and until this rule has been amended to specify the new dates.
- (1) Availability. The materials incorporated by reference are available as follows:
- (a) American Society for Testing Materials (ASTM). Information and copies of documents may be obtained by writing to: "ASTM International, 100 Bar Harbor Drive, P.O. Box C700, West Conshohocken, Pennsylvania 19426-2959." These documents are also available for purchase at [www.astm.org](http://www.astm.org). ASTM documents are also available for inspection and copying at most public libraries and "The State Library of Ohio."
  - (b) Clean Air Act as defined in this rule. Information and copies may be obtained by writing to: "Superintendent of Documents, Attn: New Orders, PO Box 371954, Pittsburgh, PA 15250-7954." The full text of the Act as amended in 1990 is also available in electronic format at [www.epa.gov/oar/caa/](http://www.epa.gov/oar/caa/). A copy of the Act is also available for inspection and copying at most public libraries and "The State Library of Ohio."
  - (c) Code of Federal Regulations (CFR). Information and copies may be obtained by writing to: "Superintendent of Documents, Attn: New Orders, PO Box 371954, Pittsburgh, PA 15250-7954." The full text of the CFR is also available in electronic format at [www.access.gpo.gov/nara/cfr/](http://www.access.gpo.gov/nara/cfr/). The CFR compilations are also available for inspection and copying at most public libraries and The State Library of Ohio."
  - (d) United States Code. Information and copies may be obtained by writing to: "Superintendent of Documents, Attn: New Orders, PO Box 371954, Pittsburgh, PA 15250-7954." The full test of the United States Code is also available in electronic format at <http://www4.law.cornell.edu/uscode/>. The U.S.C. compilations are also available for inspection and copying at most public libraries and "The State Library of Ohio."

3745-72-03

**Gasoline volatility standards and general provisions.**

- (A) During the low R.V.P. control period, no refiner, importer, distributor, reseller, carrier, retailer or wholesale purchaser-consumer shall sell, offer for sale, dispense, supply, offer for supply, or transport (for use in a low R.V.P. control area) gasoline that has a R.V.P. exceeding 7.8 P.S.I.
- (B) Compliance with the 7.8 P.S.I. standard shall be determined by use of one of the sampling and testing methodologies specified in rule 3745-72-08 of the Administrative Code.
- (C) Liability for violations of the 7.8 P.S.I. standard shall be determined according to rule 3745-72-05 of the Administrative Code.

Effective: 01/16/2006

R.C. 119.032 review dates: 10/28/2005 and 01/16/2011

3745-72-04      **Transfer documentation and recordkeeping.**

Comment: For dates of non-regulatory government publications, publications of recognized organizations and associations, federal rules, and federal statutory provisions referenced in this rule, see the last paragraph of rule 3745-72-02 of the Administrative Code titled "Incorporation by reference."

- (A) Each time that the physical custody or title of low R.V.P. gasoline changes hands (excluding when gasoline is sold or dispensed for use in motor vehicles at a retail outlet or wholesale purchaser-consumer facility), the transferor shall provide to the transferee, on or in addition to normal bills of lading, invoices, and the like, a document containing information regarding that shipment. This document shall accompany every shipment of gasoline after it has been dispensed or sold. The document shall contain, at a minimum, the following information:
- (1) The date of transfer.
  - (2) The volume of the gasoline being transferred.
  - (3) If the gasoline is ethanol blended, the percentage by volume of ethanol in the gasoline.
  - (4) The location of the gasoline at the time of the transfer.
  - (5) A statement certifying that the gasoline has an R.V.P. of 7.8 P.S.I. or less, except as provided in rule 3745-72-07 of the Administrative Code.
- (B) No person in the gasoline distribution network may sell, dispense or transfer low R.V.P. gasoline intended for use in a low R.V.P. control area without transfer documents that accurately contain the information listed in paragraph (A) of this rule.
- (C) A terminal operator who sells or dispenses gasoline intended for use in a low R.V.P. control area during the low R.V.P. control period may not accept gasoline into the terminal or dispense gasoline unless all of the following requirements are met:
- (1) Transfer documentation that accompanies the low R.V.P. gasoline contains the information listed in paragraph (A) of this rule.
  - (2) The terminal owner or operator conducts a quality assurance program including, but not limited to, periodic product sampling and testing in accordance with 40 CFR 80.8 and rule 3745-72-08 of the Administrative Code.
  - (3) Low R.V.P. gasoline is segregated from conventional gasoline.

- (4) Clearly marked documents accompany the conventional gasoline labeling it as "conventional gasoline, not for sale to the ultimate consumer in a low R.V.P. control area."
- (D) During the low R.V.P. control period, no refiner, importer, ethanol blender, carrier, distributor, reseller, or person may sell, offer for sale, dispense, supply or offer for supply gasoline for use in a low R.V.P. control area that is represented as low R.V.P. gasoline if the gasoline does not meet the definition of low R.V.P. gasoline and is not accompanied by the statement required in paragraph (A)(5) of this rule.
  - (E) Low R.V.P. control area terminal operators shall maintain records on low R.V.P. gasoline containing all of the following information:
    - (1) The volume of each shipment or truckload of gasoline leaving the terminal.
    - (2) If the fuel is blended with ethanol, the type and percentage by volume of ethanol used in each shipment or truckload of gasoline leaving the terminal.
    - (3) The volume, name and address of the owner of every shipment of gasoline leaving the terminal and a statement indicating that the gasoline has an R.V.P. of 7.8 P.S.I. or less.
    - (4) The destination of each tank truck sale or batch of gasoline.
    - (5) The date of the sale or transfer of every shipment of gasoline leaving the terminal.
    - (6) The results of any tests for R.V.P. of the gasoline sold or transferred and who performed the tests.
  - (F) Each retailer and each wholesale purchaser-consumer within a low R.V.P. control area shall maintain all of the following records:
    - (1) The name and address of the person from whom each shipment of gasoline was purchased, and the date on which each shipment was received.
    - (2) A statement indicating that the gasoline has an R.V.P. of 7.8 P.S.I. or less.
  - (G) Each person in the gasoline distribution network shall maintain records containing compliance information as required in this rule. These records shall be retained by the regulated parties for at least two years from the date of creation or receipt of the records and shall be kept on site for a minimum of ninety days. For the remainder of the retention period, the records may be kept at a centralized location within the state of Ohio.

3745-72-05      **Liability.**

(A) Except as provided in rule 3745-72-07 of the Administrative Code, a violation of paragraph (A) of rule 3745-72-03 of the Administrative Code by a carrier, whose gasoline is in a transport vehicle, storage vessel, or elsewhere at the facility, shall be deemed a violation for all of the following parties:

- (1) The refiner at whose refinery the gasoline was produced or the importer at whose import facility the gasoline was imported, except as provided in paragraph (A)(1) of rule 3745-72-06 of the Administrative Code.
- (2) The distributor, except as provided in paragraph (A)(2) of rule 3745-72-06 of the Administrative Code.
- (3) The ethanol blender at whose ethanol blending plant the gasoline was produced, except as provided in paragraph (A)(3) of rule 3745-72-06 of the Administrative Code.
- (4) The carrier(s) who previously transported the gasoline to a facility in the gasoline distribution network, except as provided in paragraph (A)(4) of rule 3745-72-06 of the Administrative Code.

(B) Except as provided in rule 3745-72-07 of the Administrative Code, a violation of paragraph (A) of rule 3745-72-03 of the Administrative Code by a distributor who is or is not operating under the corporate, trade, or brand name of a gasoline refiner or any of its marketing subsidiaries shall be deemed a violation for all of the following parties:

- (1) The refiner at whose refinery the gasoline was produced or the importer at whose import facility the gasoline was imported, except as provided in paragraph (A)(1) of rule 3745-72-06 of the Administrative Code.
- (2) The distributor, except as provided, in paragraph (A)(2) of rule 3745-72-06 of the Administrative Code.
- (3) The carrier(s) who previously transported the gasoline to a facility in the gasoline distribution network, except as provided in paragraph (A)(4) of rule 3745-72-06 of the Administrative Code.

(C) Except as provided in rule 3745-72-07 of the Administrative Code, a violation of paragraph (A) of rule 3745-72-03 of the Administrative Code by an ethanol blender who is or is not operating under the corporate, trade, or brand name of a gasoline refiner or any of its marketing subsidiaries shall be deemed a violation for all of the following parties:

- (1) The refiner at whose refinery the gasoline was produced or the importer at whose import facility the gasoline was imported, except as provided in paragraph (A)(1) rule 3745-72-06 of the Administrative Code.
  - (2) The distributor, except as provided in paragraph (A)(2) rule 3745-72-06 of the Administrative Code.
  - (3) The ethanol blender, except as provided in paragraph (A)(3) of rule 3745-72-06 of the Administrative Code.
  - (4) The carrier(s) who previously transported the gasoline to a facility in the gasoline distribution network, except as provided in paragraph (A)(4) rule 3745-72-06 of the Administrative Code.
- (D) Except as provided in rule 3745-72-07 of the Administrative Code, a violation of paragraph (A) of rule 3745-72-03 of the Administrative Code by a retailer or wholesale purchaser-consumer who sells gasoline under the corporate, trade, or brand name of a gasoline refiner or any of its marketing subsidiaries shall be deemed a violation for all of the following parties:
- (1) The refiner at whose refinery the gasoline was produced or the importer at whose import facility the gasoline was imported, except as provided in paragraph (A)(1) of rule 3745-72-06 of the Administrative Code.
  - (2) The distributor, except as provided in paragraph (A)(2) of rule 3745-72-06 of the Administrative Code.
  - (3) The ethanol blender at whose ethanol blending plant the gasoline was blended, except as provided in paragraph (A)(3) of rule 3745-72-06 of the Administrative Code.
  - (4) The retailer or wholesale purchaser-consumer, except as provided in paragraph (A)(5) of rule 3745-72-06 of the Administrative Code.
  - (5) The carrier who previously transported the gasoline to a facility in the gasoline distribution network, except as provided in paragraph (A)(4) of rule 3745-72-06 of the Administrative Code.
- (E) Except as provided in rule 3745-72-07 of the Administrative Code, a violation of paragraph (A) of rule 3745-72-03 of the Administrative Code by a retailer or wholesale purchaser-consumer who is not operating under corporate, trade, or brand name of a gasoline refiner or any of its marketing subsidiaries shall be deemed a violation for the following associated parties:

- (1) The refiner at whose refinery the gasoline was produced or the importer at whose import facility the gasoline was imported, except as provided in paragraph (A)(1) of rule 3745-72-06 of the Administrative Code.
- (2) The distributor, except as provided in paragraph (A)(2) of rule 3745-72-06 of the Administrative Code.
- (3) The ethanol blender at whose ethanol blending plant the gasoline was produced, except as provided in paragraph (A)(3) rule 3745-72-06 of the Administrative Code.
- (4) The retailer or wholesale purchaser-consumer, except as provided in paragraph (A)(5) of rule 3745-72-06 of the Administrative Code.
- (5) The carrier(s) who previously transported the gasoline to a facility in the gasoline distribution network, except as provided in paragraph (A)(4) of rule 3745-72-06 of the Administrative Code.

Promulgated Under: 119.03  
Statutory Authority: ORC 3704.03(E)  
Rule Amplifies: ORC 3704.03(A) and ORC 3704.03(E)  
Prior Effective Dates: 11/08/1994

(A) In the event that a shipment of gasoline does not meet the requirements of paragraph (A) of rule 3745-72-03 of the Administrative Code, except as provided for in rule 3745-72-07 of the Administrative Code, a gasoline refiner, importer, distributor, reseller, ethanol blender or carrier shall not be deemed in violation if he can demonstrate:

(1) For refiners and importers:

- (a) That the violation was not caused by him, his employee, or his agent; and
- (b) Test results, performed in accordance with the sampling and testing methodologies in rule 3745-72-08 of the Administrative Code, demonstrate that the gasoline was in compliance with the rules of this chapter when it was delivered to the next party in the distribution system.

(2) For distributors:

- (a) That the violation was not caused by him, his employee, or his agent;
- (b) Bills of lading, invoices, delivery tickets, loading tickets, or other documents from the refiner at whose refinery the gasoline was produced, the importer at whose facility the gasoline was imported, or the carrier, reseller, or distributor from whom the gasoline was received, represent to the distributor that the gasoline was in compliance with the rules of this chapter when delivered to the distributor; and
- (c) The distributor provides evidence of an oversight program conducted by the distributor such as periodic sampling and testing of gasoline for monitoring the R.V.P. of gasoline that the distributor sells, supplies, offers for sale or supply, or transports to the next party in the distribution system.

(3) For ethanol blenders:

- (a) That the violation was not caused by him, his employee, or his agent;
- (b) Bills of lading, invoices, delivery tickets, loading tickets, or other documents from the refiner at whose refinery the gasoline was produced, the importer at whose facility the gasoline was imported, or the carrier, reseller, or distributor from whom the gasoline was received, represent to the ethanol blender that the gasoline to which ethanol was added was in compliance with the rules of this chapter when delivered to the ethanol blender;

- (c) The ethanol blender provides evidence of an oversight program conducted by the ethanol blender such as periodic sampling and testing of gasoline for monitoring the R.V.P. of gasoline that the ethanol blender sells, supplies, offers for sale or supply, or transports; and
  - (d) The ethanol blender provides evidence that the gasoline determined to be in violation contained no more than ten per cent ethanol, by volume, when it was delivered to the next party in the distribution system.
- (4) For carriers:
- (a) That the violation was not caused by him, his employee, or his agent;
  - (b) Bills of lading, invoices, delivery tickets, loading tickets, or other documents from the refiner at whose refinery the gasoline was produced, the importer at whose facility the gasoline was imported, or the carrier, reseller, or distributor from whom the gasoline was received, represent to the carrier that the gasoline was in compliance with the rules of this chapter when delivered to the carrier; or
  - (c) The carrier provides evidence of an oversight program conducted by the carrier such as periodic sampling and testing of incoming gasoline for monitoring the R.V.P. of gasoline stored or transported by that carrier to the next party in the distribution system.
- (5) For retailers or wholesale purchaser-consumers:
- (a) That the violation was not caused by him, his employee, or his agent; and
  - (b) Bills of lading, invoices, delivery tickets, loading tickets, or other documents from the refiner at whose refinery the gasoline was produced, the importer at whose facility the gasoline was imported, or the carrier, reseller, or distributor from whom the gasoline was received, represent to the retailer or wholesale purchaser-consumer that the gasoline was in compliance with the rules of this chapter when delivered to the retailer or wholesale purchaser-consumer.

**Special provisions for alcohol blends.**

Comment: For dates of non-regulatory government publications, publications of recognized organizations and associations, federal rules, and federal statutory provisions referenced in this rule, see the last paragraph of rule 3745-72-02 of the Administrative Code titled "Incorporation by reference."

- (A) Gasoline containing ethanol may exceed the R.V.P. limit specified in paragraph (A) of rule 3745-72-03 of the Administrative Code by no more than one P.S.I. if the gasoline meets all of the following requirements:
- (1) The gasoline must contain denatured, anhydrous ethanol.
  - (2) The concentration of the anhydrous ethanol, excluding the required denaturing agent, must be at least nine per cent and no more than ten per cent, by volume, of the gasoline.
  - (3) The ethanol content of the gasoline shall be determined by use of one of the testing methodologies specified in 40 CFR 80.8. The maximum ethanol content of gasoline shall not exceed any applicable waiver conditions under section 211(f)(4) of the Clean Air Act.
- (B) Each invoice, loading ticket, bill of lading, delivery ticket, and other document that accompanies a shipment of gasoline containing ethanol shall contain a statement that the gasoline being shipped contains ethanol and shall list the volume percentage of ethanol in that gasoline.

Comment: For dates of non-regulatory government publications, publications of recognized organizations and associations, federal rules, and federal statutory provisions referenced in this rule, see the last paragraph of rule 3745-72-02 of the Administrative Code titled "Incorporation by reference."

- (A) Any sampling or testing of gasoline required by this chapter shall be accomplished as follows:
- (1) Sampling of gasoline for the purpose of determining compliance with paragraph (A) of rule 3745-72-03 of the Administrative Code, except as provided in rule 3745-72-07 of the Administrative Code, shall be conducted in accordance with 40 CFR 80.46.
  - (2) Testing of gasoline for the purpose of determining compliance with paragraph (A) of rule 3745-72-03 of the Administrative Code, except as provided in rule 3745-72-07 of the Administrative Code, shall be conducted in accordance with 40 CFR 80.8. The R.V.P. value determined by such testing for the purpose of verifying compliance with this chapter shall not exceed 0.3 P.S.I. above the allowable value of 7.8 P.S.I. for the low R.V.P. gasoline or 8.8 P.S.I. for the gasoline which meets the requirements of rule 3745-72-07 of the Administrative Code.
  - (3) Alternative sampling or test methods may be used if approved in advance in writing by the Ohio environmental protection agency and the United States environmental protection agency.

## **Chapter 3745-73: Total Reduced Sulfur**

*Contact:* Dana Thompson 614-644-3701  
Dana.Thompson@EPA.State.Oh.US

3745-73-01      **Definitions.**

- (A) The definitions in this rule shall apply to this chapter.
- (B) "Black liquor" means the spent cooking liquor, composed of a mixture of dissolved lignins and inorganic compounds, which remains after the digestion of wood chips in the Kraft pulping process.
- (C) "Black liquor solids" means the dry solids which enter the recovery furnace in the black liquor.
- (D) "Condensate stripper system" means a system in which total reduced sulfur gasses, partially dissolved in the digester and multiple effect evaporator off-gas condensate, are stripped by means of a countercurrent flow of air or steam in multi-stage columns.
- (E) "Digester system" means any continuous or batch process in which white liquor is used to cook the wood pulp, and includes any associated flash tanks, blow tanks, chip steamers and condensers.
- (F) "Kraft pulp mill" means a wood pulping mill which uses an alkaline sulfide solution containing sodium hydroxide and sodium sulfide (white liquor) in the wood digesting process.
- (G) "Lime kiln" means a unit used to calcine calcium carbonate, commonly known as "lime mud," into calcium oxide, commonly known as "quicklime."
- (H) "Multiple-effect evaporator system" means the multiple-effect evaporator including any associated condensers and hotwells used to concentrate the black liquor.
- (I) "Recovery furnace" means a straight Kraft recovery furnace including any direct contact evaporators, designed to recover chemicals necessary for the pulp cooking process through the combustion of black liquor containing less than seven per cent liquor such as neutral sulfite semichemical from a soda-based semichemical pulping process on a quarterly basis.
- (J) "Smelt dissolving tank" means a vessel used for dissolving smelt from a recovery furnace.
- (K) "Soda-based semichemical pulping operation" means any operation in which pulp is produced from wood by cooking or digesting wood chips in a soda-based semichemical such as neutral sulfite semichemical.
- (L) "Total reduced sulfur" means the sum of the sulfur compounds hydrogen sulfide, methyl mercaptain, dimethyl sulfide and dimethyl disulfide, that are released during

the Kraft pulping operation and measured by methods specified in rule 3745-73-04 of the Administrative Code.

(M) Incorporation by reference. This chapter includes references to certain matter or materials. The text of the incorporated materials is not included in the regulations contained in this chapter. The materials are hereby made a part of the regulations in this chapter. For materials subject to change, only the specific version specified in the regulations is incorporated. Material is incorporated as it exists on the effective date of this rule. Except for subsequent annual publication of existing (unmodified) Code of Federal Regulation compilations, any amendment or revision to a referenced document is not incorporated unless and until this rule has been amended to specify the new dates.

(1) Availability. The materials incorporated by reference are available as follows:

(a) Code of Federal Regulations (CFR). Information and copies may be obtained by writing to: "Superintendent of Documents, Attn: New Orders, P. O. Box 371954, Pittsburgh, PA 15250-7954." The full text of the CFR is also available in electronic format at [www.access.gpo.gov/](http://www.access.gpo.gov/). The CFR compilations are also available for inspection and copying at most public libraries and "The State Library of Ohio."

(2) Incorporated materials:

(a) 40 CFR Part 60, Appendix A; "Test Methods 1 thru 29;" as published in the July 1, 2005 Code of Federal Regulations.

3745-73-02      **Certification and compliance time schedules.**

- (A) All compliance times and other deadlines set forth in paragraph (C) of this rule shall be measured from the effective date of this rule.
- (B) Not more than three months after the effective date of these rules, any owner or operator of any air contaminant source subject to rule 3745-73-03 of the Administrative Code shall either:
  - (1) Certify in writing to the director that the source is in compliance with all requirements of rule 3745-73-03 of the Administrative Code. The certification shall include: description of the equipment, the Ohio environmental protection agency permit application number (if assigned), all necessary data and calculations necessary to confirm the compliance status, and an application for a permit to operate the source in accordance with rule 3745-35-02 of the Administrative Code if the sources does not possess an effective permit; or
  - (2) Submit an application for a permit to operate or an application for modification of a permit to operate in accordance with rule 3745-35-02 of the Administrative Code. The application shall include a compliance program and time schedule which will bring the source into compliance with all the requirements of rules 3745-73-02 and 3745-73-03 of the Administrative Code as expeditiously as practicable but in no event later than the dates specified in paragraph (C) of this rule, and shall identify all reasonable interim control measures.
- (C) Any owner or operator of an air contaminant source in violation of the limitations specified in rule 3745-73-03 of the Administrative Code shall comply with its requirements as expeditiously as practicable, but in no event later than the dates specified below:
  - (1) Owners or operators of any recovery furnace in violation of paragraph (A)(1) of the rule 3745-73-03 of the Administrative Code shall comply with the following time schedule:
    - (a) Submit a final control plan within twelve months;
    - (b) Award all contracts for emission control systems or for process modifications, or issue orders for the purchase of component parts to accomplish emission control or process modification within eighteen months;
    - (c) Initiate on-site construction or installation of emission control equipment or process modifications within twenty months;

- (d) Complete on-site construction or installation of emission control equipment or process modifications within thirty-six months;
  - (e) Achieve final compliance within forty months.
- (2) Owners or operators of any digester system in violation of paragraph (A)(2) of rule 3745-73-03 of the Administrative Code shall comply with the following time schedule:
- (a) Submit a final control plan within six months;
  - (b) Award all contracts for emission control systems or for process modifications, or issue orders for the purchase of component parts to accomplish emission control or process modification within seven months;
  - (c) Initiate on-site construction or installation of emission control equipment or process modification within eight months;
  - (d) Complete on-site construction or installation of emission control equipment or process modifications within eighteen months;
  - (e) Achieve final compliance within twenty months.
- (3) Owners or operators of any multiple-effect evaporator system in violation of paragraph (A)(3) of rule 3745-73-03 of the Administrative Code shall comply with the following time schedule:
- (a) Submit a final control plan within six months;
  - (b) Award all contracts for emission control systems or for process modifications, or issue orders for the purchase of component parts to accomplish emission control or process modification within seven months;
  - (c) Initiate on-site construction or installation of emission control equipment or process modification within eight months;
  - (d) Complete on-site construction or installation of emission control equipment or process modifications within eighteen months;
  - (e) Achieve final compliance within twenty months.
- (4) Owners or operators of any lime kiln in violation of paragraph (A)(4) of rule 3745-73-03 of the Administrative Code shall comply with the following time schedule:
- (a) Submit a final control plan within six months;

- (b) Award all contracts for emission control systems or for process modifications, or issue orders for the purchase of component parts to accomplish emission control or process modification within seven months;
  - (c) Initiate on-site construction or installation of emission control equipment or process modification within eight months;
  - (d) Complete on-site construction or installation of emission control equipment or process modifications within twenty months;
  - (e) Achieve final compliance within twenty-four months.
- (5) Owners or operators of any condensate stripper system in violation of paragraph (A)(5) of rule 3745-73-03 of the Administrative Code shall comply with the following time schedule:
- (a) Submit a final control plan within six months;
  - (b) Award all contracts for emission control systems or for process modifications, or issue orders for the purchase of component parts to accomplish emission control or process modification within seven months;
  - (c) Initiate on-site construction or installation of emission control equipment or process modification within eight months;
  - (d) Complete on-site construction or installation of emission control equipment or process modifications within eighteen months;
  - (e) Achieve final compliance within twenty months.
- (6) Owners or operators of any smelt dissolving tank in violation of paragraph (A)(6) of rule 3745-73-03 of the Administrative Code shall comply with the following time schedule:
- (a) Submit a final control plan within six months;
  - (b) Award all contracts for emission control systems or for process modifications, or issue orders for the purchase of component parts to accomplish emission control or process modification within seven months;
  - (c) Initiate on-site construction or installation of emission control equipment or process modification within eight months;
  - (d) Complete on-site construction or installation of emission control equipment or process modifications within eighteen months;

- (e) Achieve final compliance within twenty months.
- (7) The director may extend the final compliance obligation for any facilities within an existing Kraft pulp mill, for a period not to exceed four years after the effective date of the "Ohio State Implementation Plan" for the control of total reduced sulfur emissions, upon a showing that because of the limited remaining useful life of such facilities, they will be replaced or modified in a manner which makes them subject to federal new source performance standards.
- (8) The director may modify the requirements of rule 3745-73-03 of the Administrative Code as they apply to a facility, upon a showing that compliance with a requirement within the prescribed time is technically infeasible, economically unreasonable, or impossible because of conditions beyond the control of the applicant. Any such determination by the director shall be based upon consideration of the remaining useful life of the facility and such other factors as the director deems appropriate.

**General emission limits.**

- (A) No owner or operator or any Kraft pulp mill shall cause or permit the emission of total reduced sulfur from the following sources to exceed the following specified limits or federal new source performance standards, whichever is less stringent, as measured on a twelve-hour average basis:
- (1) Recovery furnaces: five parts per million on a dry basis, and as a twelve-hour average, corrected to eight per cent oxygen by volume.
  - (2) Digester systems: five parts per million on a dry basis and as a twelve-hour average, corrected to ten per cent oxygen by volume.
  - (3) Multiple-effect evaporator systems: five parts per million on a dry basis and as a twelve-hour average, corrected to ten per cent oxygen by volume.
  - (4) Lime kilns:
    - (a) Twenty parts per million on a dry basis and as a twelve-hour average, corrected to ten per cent oxygen by volume for lime kilns operated with cold-end temperatures in excess of five hundred degrees Fahrenheit or having a length-to-diameter ratio of less than 20:1.
    - (b) Forty parts per million on a dry basis and as a twelve-hour average, corrected to ten per cent oxygen by volume, for lime kilns operated with cold-end temperatures of less than five hundred degrees Fahrenheit or having a length-to-diameter ratio of less than 20:1.
  - (5) Condensate stripper systems: five parts per million on a dry basis and as a twelve-hour average, corrected to ten per cent oxygen by volume.
  - (6) Smelt dissolving tanks: 0.0084 grams per kilogram of black liquor solids (dry weight).
- (B) No owner or operator of any Kraft pulp mill shall cause or permit the emission of total reduced sulfur from any source not regulated by paragraph (A) of this rule, but which is used as a point of incineration of reduced sulfur emissions from a source regulated by paragraph (A) of this rule, to exceed a maximum of five parts per million on a dry basis and as a twelve-hour average, corrected to eight per cent oxygen.
- (C) Emissions from recovery furnaces which exceed the emission limits contained in this rule, from sources on which construction or modification commenced on or before September 24, 1976, shall not be considered excess emissions if: (1) not more than one per cent of all twelve-hour averages of total reduced sulfur per quarter exceed

the standard specified in paragraph (A)(1) of this rule; (2) proper operation and maintenance have been performed; and (3) there have been no start-ups, shutdowns, or malfunctions.

- (D) Emissions from lime kilns which exceed the emission limits contained in this rule, from sources on which construction or modification commenced on or before September 24, 1976, shall not be considered excess emissions if: (1) not more than two per cent of all twelve-hour averages of total reduced sulfur per quarter exceed the standard specified in paragraph (A)(4) of this rule; (2) proper operation and maintenance have been performed; and (3) there have been no shutdowns or malfunctions.

[Comment: For dates of non-regulatory government publications, publications of recognized organizations and associations, federal rules, and federal statutory provisions referenced in this rule, see the last paragraph of rule 3745-73-01 of the Administrative Code titled "Incorporation by Reference."]

- (A) Compliance with any applicable emission limit for total reduced sulfur as specified in this rule shall be determined according to either:
- (1) One of the reference methods described in Appendix A of 40 CFR, Part 60; or
  - (2) Any method determined by the director to be equivalent to paragraph (A) of this rule.
- (B) In lieu of the procedure specified in paragraph (A) of this rule, the owner or operator of a source that is subject to this chapter may elect to monitor compliance through use of a continuous monitor. The continuous monitor shall operate at least seventy per cent of the time during any calendar quarter. In the event the monitor malfunctions and is unusable for more than twenty-five per cent of the time during a calendar quarter, the director shall be notified in writing specifying the cause of the monitor malfunction, actions being taken to correct the malfunction and the estimated time before the monitor will be functional.

[Comment: For dates of non-regulatory government publications, publications of recognized organizations and associations, federal rules, and federal statutory provisions referenced in this rule, see the last paragraph of this rule titled "Reference to materials."]

(A) Except as otherwise provided in paragraph (B) of this rule, the definitions in rule 3745-15-01 of the Administrative Code shall apply to this chapter.

(B) For the purpose of Chapter 3745-75 of the Administrative Code:

- (1) "Batch incinerator" means an incinerator which is loaded and undergoes a cycle of combustion, ash burndown, cooling-off and ash removal, prior to being loaded again.
- (2) "Biologicals" means preparations made from living organisms and their products, including but not limited to vaccines and cultures intended for use in diagnosing, immunizing, or treating humans or animals or in research pertaining thereto.
- (3) "Body fluids" means liquid emanating or derived from humans and limited to blood; dialysate; amniotic, cerebrospinal, synovial, pleural, peritoneal and pericardial fluids; and semen and vaginal secretions.
- (4) "Bypass stack" means a device used for discharging combustion gases to avoid severe damage to the air pollution control device or other equipment.
- (5) "Chemotherapeutic waste" means waste material resulting from the production or use of antineoplastic agents used for the purpose of stopping or reversing the growth of malignant cells.
- (6) "Co-fired combustor" means a unit combusting hospital waste and/or medical/infectious waste with other fuels or wastes (e.g., coal, municipal solid waste) and subject to an enforceable requirement limiting the unit to combusting a fuel feed stream, ten per cent of the weight of which is comprised, in aggregate, of hospital waste and medical/infectious waste as measured on a calendar quarter basis. For the purpose of this definition, pathological waste, chemotherapeutic waste, and low-level radioactive waste are considered "other" wastes when calculating the percentage of hospital waste and medical/infectious waste combusted.
- (7) "Continuous duty incinerator" means an incinerator of either a multiple chamber or controlled-air design into which waste can be charged at periodic intervals and from which ash can be removed at periodic intervals, without an ash burndown and cooling-off cycle.

- (8) "Continuous temperature recorder" means a device, which uses a temperature sensor (such as a thermocouple), that is part of an instrument which continuously monitors and records the temperature at a specific location in an air pollution source.
- (9) "Dioxin" means total tetra- through octachlorinated dibenzo-p-dioxins (PCDDs), as measured by USEPA method 23.
- (10) "Dry scrubber" means an add-on air pollution control system that injects dry alkaline sorbent (dry injection) or sprays an alkaline sorbent (spray dryer) to react with and neutralize acid gases in the HMIWI exhaust stream forming a dry powdery material.
- (11) "Fabric filter" or "baghouse" means an add-on pollution control system that removes particulate matter (PM) and nonvaporous metals emissions by passing flue gas through filter bags.
- (12) "Facilities manager" means the individual in charge of purchasing, maintaining, and operating the HMIWI or the owner's or operator's representative responsible for the management of the HMIWI. Alternative titles may include director of facilities or vice president of support services.
- (13) "Furan" means total tetra- through octachlorinated dibenzofurans (PCDFs), as measured by USEPA method 23.
- (14) "High-air phase" means the stage of the batch operating cycle when the primary chamber reaches and maintains maximum operating temperatures.
- (15) "Hospital" means any facility which has an organized medical staff, maintains at least six inpatient beds, and where the primary function of the institution is to provide diagnostic and therapeutic patient services and continuous nursing primarily to human inpatients who are not related and who stay on average in excess of twenty-four hours per admission. This definition does not include facilities maintained for the sole purpose of providing nursing or convalescent care to human patients who generally are not acutely ill but who require continued medical supervision.
- (16) "Hospital waste" means discards generated at a hospital, except unused items returned to the manufacturer. The definition of hospital waste does not include human corpses, remains, and anatomical parts that are intended for interment or cremation.
- (17) "Hospital waste incinerator" means any device used to provide the combustion of hospital waste.
- (18) "Hospital/medical/infectious waste incinerator" or "HMIWI" or "HMIWI unit" means any device that combusts any amount of hospital waste and/or medical/infectious waste.

- (19) "Infectious agent" means a type of microorganism, helminth or virus that causes, or significantly contributes to the cause of, increased morbidity or mortality of human beings.
- (20) "Intermittent feed incinerator" means an incinerator of either a multiple chamber or controlled-air design into which waste can be charged at periodic intervals and from which ash is removed after a burndown and cooling-off cycle.
- (21) "Large HMIWI" means a continuous duty or intermittent feed HMIWI whose maximum charge rate is more than five hundred pounds per hour, or a batch HMIWI whose maximum charge rate is more than four thousand pounds per day.
- (22) "Low-level radioactive waste" means waste material which contains radioactive nuclides emitting primarily beta or gamma radiation, or both, in concentrations or quantities that exceed applicable federal or state standards for unrestricted release. Low-level radioactive waste is not high-level radioactive waste, spent nuclear fuel, or byproduct material as defined by the Atomic Energy Act of 1954 (42 USC 2014(e)(2)).
- (23) "Malfunction" means any sudden, infrequent, and not reasonably preventable failure of air pollution control equipment, process equipment, or a process to operate in a normal or usual manner. Failures that are caused, in part, by poor maintenance or careless operation are not malfunctions. During periods of malfunction the operator shall operate within established parameters as much as possible, and monitoring of all applicable operating parameters shall continue until all waste has been combusted or until the malfunction ceases, whichever comes first.
- (24) "Maximum charge rate" means
- (a) For continuous-duty and intermittent-feed incinerators, one hundred ten per cent of the lowest three-hour average charge rate measured during the most recent performance test demonstrating compliance with all applicable emission limits.
  - (b) For batch incinerators, one hundred ten per cent of the lowest daily charge rate measured during the most recent performance test demonstrating compliance with all applicable emission limits.
- (25) "Maximum fabric filter inlet temperature" means one hundred ten per cent on the absolute scale of the lowest three-hour average temperature at the inlet to the fabric filter (taken, at a minimum, once every minute) measured during the most recent performance test demonstrating compliance with the dioxin/furan emission limit.

- (26) "Maximum flue gas temperature" means one hundred ten per cent on the absolute scale of the lowest three-hour average temperature at the outlet from the wet scrubber (taken, at a minimum, once every minute) measured during the most recent performance test demonstrating compliance with the mercury emission limit.
- (27) "Medical/infectious wastes" include all of the following substances or categories of substances:
- (a) Cultures and stocks of infectious agents and associated biologicals, including, without limitation, specimen cultures, cultures and stocks of infectious agents, wastes from production of biologicals, discarded live and attenuated vaccines, and culture dishes and devices used to transfer, inoculate, and mix cultures;
  - (b) Laboratory wastes that were, or are likely to have been, in contact with infectious agents that may present a substantial threat to public health if improperly managed;
  - (c) Human pathological waste, including tissues, organs, and body parts and body fluids that are removed during surgery or autopsy, or other medical procedures, and specimens of body fluids and their containers;
  - (d) Waste materials from the rooms of humans, or the enclosures of animals, that have been isolated because of diagnosed communicable disease that are likely to transmit infectious agents. Also included are waste materials from the rooms of patients who have been placed on blood and body fluid precautions under the universal precaution system established by the "Centers for Disease Control" in the public health service of the United States department of health and human services, if specific wastes generated under the universal precautions system have been identified as infectious wastes by rules referred to in paragraph (B)(27)(i) of this rule;
  - (e) Human blood and blood products, including:
    - (i) Liquid waste human blood;
    - (ii) Products of blood;
    - (iii) Items saturated and/or dripping with human blood; and
    - (iv) Items that were saturated and/or dripping with human blood that are now caked with dried human blood; including serum, plasma, and other blood components, and their containers, which were used or intended for use in either patient care, testing and laboratory analysis or the development of pharmaceuticals. Intravenous bags are also included in this category. The category does not include patient care waste such as bandages or disposable gowns that are lightly soiled with blood or

other body fluids, unless such wastes are soiled to the extent that the generator of the wastes determined that they should be managed as infectious wastes;

- (f) Contaminated carcasses, body parts, and bedding of animals that were intentionally exposed to infectious agents from zoonotic or human diseases during research, production of biologicals, or testing of pharmaceutical products, and carcasses and bedding of animals otherwise infected by zoonotic or infectious agents that may present a substantial threat to public health if improperly managed;
  - (g) Sharp wastes used in the treatment, diagnosis, or inoculation of human beings or animals or that have, or are likely to have, come in contact with infectious agents in medical, research or industrial laboratories, including, but not limited to, hypodermic needles and syringes, scalpel blades, and glass articles whether broken or unbroken;
  - (h) Unused sharps including unused, discarded hypodermic needles, suture needles, syringes and scalpel blades;
  - (i) Any other waste materials generated in the diagnosis, treatment or immunization of human beings or animals, in research pertaining thereto or in the production or testing of biological materials, that the public health council created in section 3701.33 of the Revised Code, by rules adopted in accordance with Chapter 119. of the Revised Code, identifies as infectious wastes after determining that the wastes present a substantial threat to human health when improperly managed because they are contaminated with, or are likely to be contaminated with, infectious agents; and
  - (j) Any other waste materials the generator designates as infectious waste.
- (28) "Medical/infectious waste incinerator" means any device used to provide the combustion of medical/infectious waste.
- (29) "Medium HMIWI" means a continuous duty or intermittent feed HMIWI whose maximum charge rate is more than two hundred pounds per hour and less than or equal to five hundred pounds per hour, or a batch HMIWI whose maximum charge rate is more than one thousand six hundred pounds per day and less than or equal to four thousand pounds per day.
- (30) "Minimum dioxin/furan sorbent flow rate" means ninety per cent of the highest three-hour average dioxin/furan sorbent flow rate (taken, at a minimum, once every hour) measured during the most recent performance test demonstrating compliance with the dioxin/furan emission limit.
- (31) "Minimum horsepower or amperage" means ninety per cent of the highest three-hour average horsepower or amperage to the wet scrubber (taken, at a minimum,

once every minute) measured during the most recent performance test demonstrating compliance with the applicable emission limits.

- (32) "Minimum hydrogen chloride sorbent flow rate" means ninety per cent of the highest three-hour average hydrogen chloride sorbent flow rate (taken, at a minimum, once every hour) measured during the most recent performance test demonstrating compliance with the hydrogen chloride emission limit.
- (33) "Minimum mercury sorbent flow rate" means ninety per cent of the highest three-hour average mercury sorbent flow rate (taken, at a minimum, once every hour) measured during the most recent performance test demonstrating compliance with the mercury emission limit.
- (34) "Minimum pressure drop across the wet scrubber" means ninety per cent of the highest three-hour average pressure drop across the wet scrubber particulate-matter control device (taken, at a minimum, once every minute) measured during the most recent performance test demonstrating compliance with the particulate-matter emission limit.
- (35) "Minimum scrubber liquor flow rate" means ninety per cent of the highest three-hour average liquor flow rate at the inlet to the wet scrubber (taken, at a minimum, once every minute) measured during the most recent performance test demonstrating compliance with all applicable emission limits.
- (36) "Minimum scrubber liquor pH" means ninety per cent of the highest three-hour average liquor pH at the inlet to the wet scrubber (taken, at a minimum, once every minute) measured during the most recent performance test demonstrating compliance with the hydrogen chloride emission limit.
- (37) "Minimum secondary chamber temperature" means ninety per cent on the absolute scale of the highest three-hour average secondary chamber temperature (taken, at a minimum, once every minute) measured during the most recent performance test demonstrating compliance with the particulate matter, carbon monoxide, and dioxin/furan limits.
- (38) "Modification" means any change to an HMIWI such that
- (a) The cumulative costs of the modifications, over the life of the unit, exceed fifty per cent of the original cost of the construction and installation of the unit (not including the cost of any land purchased in connection with such construction or installation) updated to current costs, or
  - (b) The change involves a physical change in or change in the method of operation of the unit which increases the amount of any air pollutant emitted by the unit for which standards have been established under Section 129 or Section 111 of the Clean Air Act.

- (39) "Off-site facility" means a medical/infectious waste incinerator that burns any medical/infectious waste from a generator that is located off-site from the location of the medical/infectious waste incinerator.
- (40) "Operating day" means a twenty-four hour period between twelve a.m. and the following midnight during which any amount of hospital waste or medical/infectious waste is combusted at any time in the HMIWI.
- (41) "Operator" means the person with immediate responsibility for keeping the incinerator and related equipment within the proper operating range of temperature and emission rate, and assuring that overcharging or loading of prohibited materials does not occur. The term does not include those personnel whose responsibilities consist merely of loading waste into the incinerator, so long as such loading operation is subject to the knowledge and control of a properly qualified operator.
- (42) "Pathological waste" means waste material consisting of only human or animal remains, anatomical parts, and/or tissue, the bags/containers used to collect and transport the waste material, and animal bedding if applicable.
- (43) "Primary chamber" means the chamber in an HMIWI that receives waste material, in which the waste is ignited, and from which ash is removed.
- (44) "Pyrolysis" means the endothermic gasification of hospital waste and/or medical/infectious waste using external energy.
- (45) "Retention time" means the average time for gases to pass through a chamber. The retention time of the secondary chamber of an incinerator shall be calculated using the volume of the secondary chamber divided by the actual volumetric flow rate emitted from the secondary chamber at maximum operating temperature and burning rate.
- (46) "Secondary chamber" means a component of the HMIWI that receives combustion gases from the primary chamber and in which the combustion process is completed.
- (47) "Shutdown" means the period of time after all waste has been combusted in the primary chamber. For continuous HMIWI, shutdown shall commence no less than two hours after the last charge to the incinerator. For intermittent HMIWI, shutdown shall commence no less than four hours after the last charge to the incinerator. For batch HMIWI, shutdown shall commence no less than five hours after the high-air phase of combustion has been completed.
- (48) "Small HMIWI" means a continuous duty or intermittent feed HMIWI whose maximum charge rate is less than or equal to two hundred pounds per hour, or a batch HMIWI whose maximum charge rate is less than or equal to one thousand six hundred pounds per day.

- (49) "USEPA" means United States environmental protection agency.
- (50) "Startup" means the period of time between the activation of the system and the first charge to the unit. For batch HMIWI, startup means the period of time between activation of the system and ignition of the waste.
- (51) "Wet scrubber" means an add-on air pollution control device that utilizes an alkaline scrubbing liquor to collect particulate matter (including nonvaporous metals and condensed organics) and/or to absorb and neutralize acid gases.
- (52) "Zoonotic agent" means a type of microorganism, helminth, or virus that causes disease in vertebrate animals and that is transmissible to human beings and causes or significantly contributes to the cause of increased morbidity or mortality of human beings.
- (C) This chapter applies to the owner or operator of any medical/infectious or hospital waste incinerator except the following:
- (1) Incinerators that burn infectious wastes generated by individuals for purposes of their own care or treatment that are disposed of with solid waste from the individual's residence.
  - (2) Crematories that only combust human remains and coffins.
  - (3) Veterinary clinics and animal shelters that only burn carcasses and bedding of animals not intentionally exposed to infectious agents during research, production of biological material, or testing of pharmaceutical products, unless the improper disposal of those materials would present a substantial threat to public health.
  - (4) Incinerators on which construction was commenced after June 20, 1996.
  - (5) Incinerators on which modification was commenced after March 16, 1998.
  - (6) Any combustor during periods in which only pathological waste, low-level radioactive waste, and/or chemotherapeutic waste are burned, provided the owner or operator
    - (a) Notifies the director and the USEPA of an exemption claim; and
    - (b) Keeps records on a calendar quarter basis of the periods of time when only pathological waste, low-level radioactive waste, and/or chemotherapeutic waste are burned.

[Note: a combustor exempted under this paragraph is subject to the requirements for pathological waste incinerators under Chapter 3745-105 of the Administrative Code.]

- (7) Any co-fired combustor, provided the owner or operator
    - (a) Notifies the director and the USEPA of an exemption claim;
    - (b) Provides an estimate of the relative weight of hospital waste, medical/infectious waste, and other fuels and/or wastes to be combusted; and
    - (c) Keeps records on a calendar quarter basis of the weight of hospital waste and medical/infectious waste combusted, and the weight of all other fuels and wastes combusted at the co-fired combustor.
  - (8) Any combustor required to have a permit under section 3005 of the Solid Waste Disposal Act.
  - (9) Any combustor which meets the applicability requirements under 40 CFR Part 60, subpart Cb; 40 CFR Part 60, subpart Ea; or 40 CFR Part 60, subpart Eb (standards or guidelines for certain municipal waste combustors).
  - (10) Cement kilns.
  - (11) Any pyrolysis unit as defined by this rule.
- (D) Reference to materials. This chapter includes references to certain matter or materials. The text of the referenced material is not included in the rules contained in this chapter. Information on the availability of the referenced materials as well as the date of, and/or the particular edition or version of the material is included in this rule. For materials subject to change, only the specific versions specified in this rule are referenced. Material is referenced as it exists on the effective date of this rule. Except for subsequent annual publication of existing (unmodified) Code of Federal Regulation compilations, any amendment or revision to a referenced document is not applicable unless and until this rule has been amended to specify the new dates.
- (1) Availability. The referenced materials are available as follows:
    - (a) "An Ounce of Prevention: Waste Reduction Strategies for Health Care Facilities." Information and copies may be obtained from the American Hospital Association, Chicago, Illinois, 1993, AHA catalogue number 057007, ISBN 0-87258-673-5. The publication is also available on their website at: [www.aha.org](http://www.aha.org). Copies of this publication are also available for inspection and copying at most public libraries and "The State Library of Ohio."

3745-75-02      **Emission limits.**

[Comment: For dates of non-regulatory government publications, publications of recognized organizations and associations, federal rules, and federal statutory provisions referenced in this rule, see the last paragraph of rule 3745-75-01 of the Administrative Code titled "Reference to materials."]

- (A) Particulate emissions from any small HMIWI shall not exceed one hundred fifteen milligrams per dry standard cubic meter adjusted to seven per cent oxygen in the exhaust stream.
- (B) Particulate emissions from any medium HMIWI shall not exceed sixty-nine milligrams per dry standard cubic meter adjusted to seven per cent oxygen in the exhaust stream.
- (C) Particulate emissions from any large HMIWI shall not exceed thirty-four milligrams per dry standard cubic meter adjusted to seven per cent oxygen in the exhaust stream.
- (D) Hydrogen chloride emissions from any HMIWI shall not exceed one hundred parts per million by volume on a dry basis adjusted to seven per cent oxygen in the exhaust stream unless the emission has been reduced by control equipment having a minimum control efficiency of ninety-three per cent by concentration for hydrogen chloride.
- (E) Carbon monoxide emissions from any HMIWI expressed by volume, on a dry basis, adjusted to seven per cent oxygen in the exhaust stream shall not exceed one hundred parts per million as an hourly average, and shall not exceed forty parts per million as a twelve-hour rolling average (not including startup and shutdown) as measured by continuous emission monitors, and shall not exceed forty parts per million as a three-hour rolling average (not including startup and shutdown) as measured by USEPA method 10 or 10B of 40 CFR Part 60, Appendix A.
- (F) Sulfur dioxide emissions from any HMIWI shall not exceed fifty-five parts per million by volume, on a dry basis, adjusted to seven per cent oxygen in the exhaust stream.
- (G) Nitrogen oxides emissions from any HMIWI shall not exceed two hundred fifty parts per million by volume, on a dry basis, adjusted to seven per cent oxygen in the exhaust stream.
- (H) Dioxin and furan emissions from any HMIWI expressed on a dry basis adjusted to seven per cent oxygen in the exhaust stream shall be limited to a maximum of either one hundred twenty-five nanograms per standard cubic meter expressed as total mass or 2.3 nanograms per standard cubic meter expressed as toxic equivalent.

- (I) Emissions of metals from any HMIWI shall not exceed the following limits, adjusted to seven per cent oxygen in the exhaust stream:
- (1) Arsenic and compounds: 0.21 milligrams per dry standard cubic meter
  - (2) Beryllium and compounds: 0.026 milligrams per dry standard cubic meter
  - (3) Cadmium and compounds: 0.16 milligrams per dry standard cubic meter
  - (4) Chromium and compounds: 0.075 milligrams per dry standard cubic meter
  - (5) Lead and compounds: 1.2 milligrams per dry standard cubic meter
  - (6) Mercury and compounds: 0.55 milligrams per dry standard cubic meter
  - (7) Nickel and compounds: 0.65 milligrams per dry standard cubic meter
- (J) The allowable concentrations specified by paragraphs (A) to (I) of this rule shall be computed as twelve-hour rolling averages (not including startup and shutdown) for units equipped with appropriate continuous emission monitors installed and maintained in accordance with the applicable procedures under 40 CFR Part 60, Appendix B and Appendix F, or as three-hour rolling averages (not including startup and shutdown) for units not so equipped, except where different averaging periods are specified by those paragraphs.
- (K) Visible particulate emissions from any HMIWI shall not exceed five per cent opacity except for six minutes in any continuous sixty minute period during which opacity shall not exceed ten per cent.
- (L) Use of a bypass stack (except during startup, shutdown, or malfunction) shall constitute a violation of the particulate matter, dioxin/furan, hydrogen chloride, lead, cadmium, and mercury emission limits.
- (M) For units not equipped with a carbon monoxide monitor, operation of the unit above the maximum charge rate and below the minimum secondary chamber temperature (each measured on a three-hour rolling average) simultaneously shall constitute a violation of the carbon monoxide emission limit.
- (N) For units equipped with a dry scrubber followed by a fabric filter, operation of the unit above the maximum fabric filter inlet temperature, above the maximum charge rate, and below the minimum dioxin/furan sorbent flow rate (each measured on a three-hour rolling average) simultaneously shall constitute a violation of the dioxin/furan emission limit.
- (O) For units equipped with a wet scrubber but not a dry scrubber, operation of the unit above the maximum charge rate, below the minimum secondary chamber

temperature, and below the minimum scrubber liquor flow rate (each measured on a three-hour rolling average) simultaneously shall constitute a violation of the dioxin/furan emission limit.

- (P) For units equipped with a dry scrubber followed by a fabric filter, operation of the unit above the maximum charge rate and below the minimum mercury sorbent flow rate (each measured on a three-hour rolling average) simultaneously shall constitute a violation of the mercury emission limit.
- (Q) For units equipped with a wet scrubber but not a dry scrubber, operation of the unit above the maximum charge rate and above the maximum flue gas temperature (each measured on a three-hour rolling average) simultaneously shall constitute a violation of the mercury emission limit.
- (R) For units equipped with a wet scrubber, operation of the unit above the maximum charge rate and below the minimum scrubber liquor pH (each measured on a three-hour rolling average) simultaneously shall constitute a violation of the hydrogen chloride emission limit.
- (S) For units equipped with a dry scrubber followed by a fabric filter but not a wet scrubber, operation of the unit above the maximum charge rate and below the minimum hydrogen chloride sorbent flow rate (each measured on a three-hour rolling average) simultaneously shall constitute a violation of the hydrogen chloride emission limit.
- (T) For units equipped with a wet scrubber, operation of the unit above the maximum charge rate and below the minimum pressure drop across the wet scrubber or below the minimum horsepower or amperage to the system (each measured on a three-hour rolling average) simultaneously shall constitute a violation of the particulate matter emission limit.
- (U) For units not equipped with a wet scrubber, or a dry scrubber followed by a fabric filter, continuous compliance with the allowable concentrations specified by paragraphs (A) to (E), (H), and (I)(6) of this rule shall be established by continuous monitoring of surrogate measures of combustion or control efficiency, except where those emissions are measured by continuous monitors installed and maintained in accordance with 40 CFR, Part 60. The owner or operator of the unit shall petition the administrator of the USEPA for approval of site-specific operating parameters to be established during the initial performance test and continuously monitored thereafter. The owner or operator shall not conduct the initial performance test until after the petition has been approved by the administrator.
- (V) The owner or operator of an affected facility may conduct a repeat performance test within thirty days of violation of applicable operating parameter(s) to demonstrate that the affected facility is not in violation of the applicable emission limit(s). Repeat performance tests conducted pursuant to this paragraph shall be conducted using the

identical operating parameters that indicated a violation under paragraphs (L) to (U) of this rule.

- (W) The owner or operator of an affected facility may conduct a repeat performance test at any time to establish new values for the operating parameters. The director or the USEPA may request a repeat performance test at any time.

Promulgated Under: 119.03  
Statutory Authority: 3704.03(E)  
Rule Amplifies: 3704.03(A), 3704.03(E)  
Prior Effective Dates: 7/9/91, 3/23/04

**Design parameters and operating restrictions.**

[Comment: For dates of non-regulatory government publications, publications of recognized organizations and associations, federal rules, and federal statutory provisions referenced in this rule, see the last paragraph of rule 3745-75-01 of the Administrative Code titled "Reference to materials."]

- (A) All incineration shall occur in a controlled air multi-chamber incinerator, or equivalent technology as approved by the director, which provides complete combustion of waste, excluding metallic items, to carbonized or mineralized ash. Any ash that does not meet the criteria shall be re-incinerated.
- (B) The secondary combustion chamber of any unit shall operate so that the instantaneous temperature of the gas exiting the chamber is a minimum of ninety per cent on the absolute scale of the highest three-hour average secondary chamber temperature (taken, at a minimum, once every minute) measured during the most recent performance test demonstrating compliance with the particulate matter, carbon monoxide, and dioxin/furan limits, or a minimum temperature of one thousand six hundred degrees Fahrenheit, whichever is greater.
- (C) The primary combustion chamber shall be maintained so that the exit gas has a minimum temperature of one thousand four hundred degrees Fahrenheit for continuous-duty units or one thousand two hundred degrees Fahrenheit for batch or intermittent feed units.
- (D) The secondary combustion chamber of any HMIWI shall allow for a one-second retention time at the minimum temperature specified in paragraph (B) of this rule except for any unit that has a longer retention time specified in an Ohio EPA permit to install or is constructed after January 1, 1991 which shall have a two-second retention time at the minimum temperature specified in paragraph (B) of this rule.
- (E) All medical/infectious waste incinerators with a capacity greater than four hundred pounds per hour shall be equipped with an automatic feeder which is designed and operated so that wastes cannot be charged if the gas exiting the secondary combustion chamber has not reached the minimum temperature specified in paragraph (B) of this rule.
- (F) Medical/infectious waste shall not be loaded into the primary combustion chamber of any medical/infectious waste incinerator until the gas exiting the primary chamber has reached the minimum temperature specified in paragraph (C) of this rule.
- (G) The stack or stacks from any HMIWI shall be designed to minimize the impact of the emissions on employees, residents, patients, visitors, or nearby residences. The design of any unit shall meet good engineering practices so as not to cause excessive

concentrations of any air contaminant at any air intake for heating and cooling of any building, or at operable windows, or doors.

- (H) Any mechanically-fed medical/infectious waste incinerator must be equipped with an air lock system to prevent opening the incinerator to the room environment. The volume of the loading systems shall be designed so as to prevent overcharging of the unit to assure complete combustion of waste.
- (I) Following the date on which the initial performance test is completed or is required to be completed under paragraph (B)(4) of rule 3745-75-06 of the Administrative Code, a HMIWI may not be operated above any of the applicable maximum operating parameters or below any of the applicable minimum operating parameters listed in paragraphs (H) and (I) of rule 3745-75-04 of the Administrative Code and measured as three-hour rolling averages (calculating each hour as the average of the previous three operating hours) at any time except during periods of startup, shutdown, and malfunction. Operating parameter limits do not apply during performance tests. Operation above the established maximum or below the established minimum operating parameter(s) shall constitute a violation of established operating parameters.
- (J) All medical/infectious waste incinerators with a capacity greater than four hundred pounds per hour shall be equipped with an air pollution control device designed to reduce hydrogen chloride emissions and provide for continuous compliance with the hydrogen chloride emission limits when the unit is in operation.
- (K) All incinerators, including all associated equipment and grounds, shall be designed, operated and maintained to prevent the emission of objectionable odors.
- (L) Medical/infectious waste that is also radioactive shall be managed in accordance with the applicable rules of the Ohio department of health and regulations of the United States nuclear regulatory commission.

[Note: section 3734.027 of the Revised Code prohibits the disposal of low level radioactive waste in an "infectious waste treatment facility" as that term is defined in the Revised Code.]

- (M) The owner or operator of any HMIWI shall not intentionally dispose of the following items by burning in the incinerator:
  - (1) Visible globules of mercury;
  - (2) Nickel-cadmium batteries;
  - (3) Switches, thermometers, batteries, and other devices containing mercury; and

- (4) Bags or other containers for infectious waste handling which contain cadmium, chromium, or lead as a pigmenting agent.
  
- (N) All HMIWI units are to be operated only by properly trained and qualified personnel. A minimum of twenty-four hours of HMIWI operation training shall be provided to each operator before he/she is allowed to operate an incinerator. This may include, for each operator, the successful completion of the training course in the operation and maintenance of hospital medical waste incinerators developed by the "Control Technology Center", USEPA, or courses or instructions provided by incinerator manufacturers, professional engineering organizations, colleges or universities, corporate training programs, or Ohio EPA. A copy of all the training records for each operator shall be immediately available to the Ohio EPA and USEPA personnel upon request.
  
- (O) Training shall be obtained by completing a HMIWI operator training course that includes, at a minimum, the following provisions:
  - (1) Twenty-four hours of training on the following subjects:
    - (a) Environmental concerns, including pathogen destruction and types of emissions;
    - (b) Basic combustion principles, including products of combustion;
    - (c) Operation of the type of incinerator to be used by the operator, including proper startup, waste charging, and shutdown procedures;
    - (d) Combustion controls and monitoring;
    - (e) Operation of air pollution control equipment and factors affecting performance;
    - (f) Methods to monitor pollutants (continuous emission monitoring systems and monitoring of HMIWI and air pollution control device operating parameters) and equipment calibration procedures;
    - (g) Inspection and maintenance of the HMIWI, air pollution control devices and continuous emission monitoring systems;
    - (h) Actions to correct malfunctions or conditions that may lead to malfunction;
    - (i) Bottom and fly ash characteristics and handling procedures;
    - (j) Applicable federal, state, and local regulations;
    - (k) Work safety procedures;

- (l) Pre-startup inspections; and
  - (m) Recordkeeping requirements.
- (2) An examination designed and administered by the instructor.
- (3) Reference material distributed to the attendees covering the course topics.
- (P) Qualification shall be obtained by:
- (1) Completion of a training course that satisfies the criteria under paragraph (O) of this rule;
  - (2) Either six months experience as a HMIWI operator, six months experience as a direct supervisor of a HMIWI operator, or completion of at least two burn cycles under the observation of two qualified HMIWI operators; and
  - (3) Review of the information contained within the operations manual required by paragraph (T) of this rule.
- (Q) Qualification is valid from the date on which the examination is passed or the completion of the required experience, whichever is later.
- (R) To maintain qualification, the trained and qualified HMIWI operator shall complete and pass the following training on an annual basis:
- (1) A review or refresher course of at least four hours covering, at a minimum, the following:
    - (a) Update of regulations;
    - (b) Incinerator operation, including startup and shutdown procedures;
    - (c) Inspection and maintenance;
    - (d) Responses to malfunctions or conditions that may lead to malfunction; and
    - (e) Discussion of operating problems encountered by attendees.
  - (2) Review of the information contained within the operations manual required by paragraph (T) of this rule.
- (S) A lapsed qualification shall be renewed by one of the following methods:

- (1) For a lapse of less than three years, the HMIWI operator shall complete and pass a standard annual refresher course and review of the operations manual described in paragraph (R) of this rule.
  - (2) For a lapse of three years or more, the HMIWI operator shall complete and pass a training course with the minimum criteria described in paragraph (O) of this rule, and shall review the information contained within the operations manual required by paragraph (T) of this rule.
- (T) The owner or operator of an affected facility shall maintain an operations manual available to operators and to the USEPA and the director, which will include the following:
- (1) A summary of applicable regulations of the Ohio EPA division of air pollution control and the Ohio EPA division of solid and infectious waste management;
  - (2) A description of the basic combustion principles applicable to the incinerator;
  - (3) Procedures for receiving, handling, and charging waste;
  - (4) Startup, shutdown, and malfunction procedures for the incinerator and associated control equipment;
  - (5) Procedures for maintaining proper combustion air supply levels;
  - (6) Procedures for operating the incinerator and associated control equipment within the standards prescribed by this rule;
  - (7) Procedures for responding to periodic malfunction or conditions that may lead to malfunction;
  - (8) Procedures for monitoring incinerator emissions;
  - (9) Reporting and recordkeeping procedures;
  - (10) Procedures for handling ash; and
  - (11) A list of the current allowable values of all site-specific operating parameters, with the dates of the most recent performance test(s) and the actual operating conditions that served as a basis for deriving the allowable values.
- (U) Every operator qualified to operate the incinerator shall review the information contained within the operations manual required by paragraph (T) of this rule prior to assumption of duties affecting the operation of the incinerator and at least annually thereafter.

- (V) All medical/infectious waste incinerators shall be equipped with mechanical feeding arrangements which prevent exposure of personnel to any hazard which may result from charging of feed into a preheated primary chamber.

3745-75-04      **Monitoring requirements.**

[Comment: For dates of non-regulatory government publications, publications of recognized organizations and associations, federal rules, and federal statutory provisions referenced in this rule, see the last paragraph of rule 3745-75-01 of the Administrative Code titled "Reference to materials."]

- (A) Each incinerator unit burning hospital or medical/infectious waste shall be equipped with a continuous temperature recorder for the primary and secondary combustion chambers. The instrument shall record a measurement at least once every minute.
- (B) Each medical/infectious waste incinerator with a capacity greater than one thousand pounds per hour shall be equipped with a continuous carbon monoxide monitor and alarm. The alarm shall indicate whenever concentrations exceed one hundred fifty parts per million.
- (C) All facilities that operate an infectious waste incinerator shall install, maintain and operate a radioactivity monitor and alarm. The radioactivity monitor shall be installed to monitor all medical/infectious waste prior to combustion.
- (D) Any unit that is equipped with a bypass stack shall be equipped with a device to continuously monitor and record the temperature in the bypass stack. The device shall be maintained and calibrated according to manufacturers' specifications and shall record the date, time, and duration of every use of the bypass stack.
- (E) A scale (accurate to within one pound) shall be installed, calibrated (to manufacturers' specifications), and operated to measure the weight of all of the material charged to the unit. A written log shall be kept that records the amount of material charged to any unit on a pounds per hour basis or a pounds per batch basis. Alternative arrangements may be approved by the director provided they can be shown to be of equivalent effectiveness as a method of regulating flow into the incinerator and generating a permanent record of pound per hour charging rates.
- (F) Each medical/infectious waste incinerator with a capacity greater than one thousand pounds per hour shall be equipped with a continuous opacity monitor unless exempted by the director because of the influence of condensed water vapor in the stack exit gas.
- (G) Any continuous opacity or carbon monoxide monitor required under this rule shall be installed and maintained in accordance with 40 CFR, Part 60.
- (H) The following operating parameters are to be measured and recorded at the stated minimum frequencies for HMIWI units equipped with a wet scrubber, or a dry scrubber followed by a fabric filter:

Operating Parameters to be Monitored	Minimum Frequency		HMIWI		
	Data Measurement	Data Recording	HMIWI with Dry Scrubber Followed by Fabric Filter	HMIWI with Wet Scrubber	HMIWI with Dry Scrubber Followed by Fabric Filter and Wet Scrubbers
Maximum Operating Parameters					
Maximum Charge Rate	Once per Charge	Once per Charge	X	X	X
Maximum Fabric Filter Inlet Temperature	Continuous	Once per Minute	X		X
Maximum Flue Gas Temperature	Continuous	Once per Minute		X	X
Minimum Operating Parameters					
Minimum secondary chamber temperature	Continuous	Once per minute	X	X	X
Minimum dioxin/furan sorbent flow rate	Hourly	Once per hour	X		X
Minimum NCL sorbent flow rate	Hourly	Once per hour	X		X
Minimum mercury (HG) sorbent flow rate	Hourly	Once per hour	X		X
Minimum pressure drop across the wet scrubber or minimum horsepower or amperage to wet scrubber	Continuous	Once per minute		X	X
Minimum scrubber liquor flow rate	Continuous	Once per minute		X	X
Minimum scrubber liquor pH	Continuous	Once per minute		X	X

- (I) For HMIWI units not equipped with a wet scrubber, or a dry scrubber followed by a fabric filter, equipment shall be installed, calibrated (to the manufacturers' specifications), maintained, and operated to monitor the site-specific operating parameters developed pursuant to paragraph (U) of rule 3745-75-02 of the Administrative Code.
- (J) The owner or operator of a HMIWI shall record the amount and type of mercury, hydrogen chloride, and dioxin/furan sorbent used during each hour of operation, as applicable.
- (K) The owner or operator of a HMIWI shall install, calibrate (to manufacturers' specifications), maintain, and operate devices (or establish methods) for monitoring the applicable maximum and minimum operating parameters listed in paragraph (H) of this rule such that these devices (or methods) measure and record values for these operating parameters at the frequencies indicated in paragraph (H) of this rule at all times except during periods of startup and shutdown.
- (L) The owner or operator of a HMIWI shall obtain monitoring data at all times during HMIWI operation except during periods of monitoring equipment malfunction, calibration, or repair. At a minimum, valid monitoring data shall be obtained and recorded for seventy-five per cent of the operating hours per day and for ninety per cent of the operating days per calendar quarter that the affected facility combusts hospital waste and/or medical/infectious waste.

3745-75-05      **Recordkeeping and inspections.**

[Comment: For dates of non-regulatory government publications, publications of recognized organizations and associations, federal rules, and federal statutory provisions referenced in this rule, see the last paragraph of rule 3745-75-01 of the Administrative Code titled "Reference to materials."]

- (A) The owner or operator of each HMIWI shall submit a report including the information listed in paragraphs (A)(1) to (A)(8) of this rule initially within six months after submittal of the report required by paragraph (B)(4) of rule 3745-75-06 of the Administrative Code and thereafter at intervals no greater than six months. The reports shall be signed by the facilities manager.
- (1) The values for the site-specific operating parameters established pursuant to paragraph (E) of rule 3745-75-06 of the Administrative Code;
  - (2) The highest maximum operating parameter and the lowest minimum operating parameter, as applicable, for each operating parameter recorded for the semiannum being reported, pursuant to paragraph (I) of rule 3745-75-03 of the Administrative Code.
  - (3) The highest maximum operating parameter and the lowest minimum operating parameter, as applicable for each operating parameter recorded pursuant to paragraph (I) of rule 3745-75-03 of the Administrative Code, for each of the three semiannums prior to the semiannum being reported, in order to provide the director with a summary of the performance of the facility over a period of two full years;
  - (4) Any information recorded under paragraph (B) of this rule for each of the two quarters encompassed by the semiannum;
  - (5) Any information recorded under paragraph (B) of this rule for each of the six quarters encompassed by the three prior semiannums;
  - (6) If a performance test was conducted during the reporting period, the results of that test;
  - (7) If no exceedances or malfunctions were reported under paragraph (B) of this rule for the semiannum being reported, a statement that no exceedances occurred during the reporting period;
  - (8) The date, time, and duration of any use of the bypass stack; the reason for malfunction, and corrective action taken;

- (9) Any activation of the radioactivity alarm; the reason for the alarm, and corrective action taken.
- (B) Pursuant to 40 CFR 60.7 and 40 CFR 60.13(h), the owner or operator of each incinerator shall submit reports on a quarterly basis to the appropriate Ohio EPA district office or local air agency containing the information listed in paragraphs (B)(1) to (B)(3) of this rule. These reports of exceedances, missing data, and malfunctions shall be submitted by February first, May first, August first, and November first of each year and shall cover the data obtained during the previous calendar quarters.
- (1) Identification of calendar days for which data on emission rates or operating parameters specified under rules 3745-75-02 and 3745-75-03 of the Administrative Code exceeded the applicable limits, with a description of the exceedances, reasons for such exceedances, and a description of corrective actions taken.
- (2) Identification of calendar days for which data on emission rates or operating parameters specified under rules 3745-75-02 and 3745-75-03 of the Administrative Code have not been obtained, with an identification of the emission rates or operating parameters not measured, reasons for not obtaining the data, and a description of corrective actions taken.
- (3) Identification of calendar days, times and durations of malfunctions, a description of the malfunction and the corrective action taken.
- (C) All logs, charts and other records required by paragraphs (D), (E), (L) and either (H) or (I) of rule 3745-75-04 of the Administrative Code, and reports required by paragraph (A) or (B) of this rule shall be maintained for a period of five years and be available for inspection by the Ohio EPA or its authorized representatives and by the USEPA at any reasonable time.
- (D) All records of concentrations of pollutants listed under paragraphs (A) to (I) of rule 3745-75-02 of the Administrative Code and measurements of opacity as determined by continuous emissions monitoring, as applicable, shall be maintained for a period of five years and be available for inspection by the Ohio environmental protection agency or its authorized representatives and by the USEPA at any reasonable time.
- (E) All records of operator training and qualification shall be retained for five years. This shall include the names of HMIWI operators and their dates of completion of the following requirements:
- (1) Training under paragraph (O) of rule 3745-75-03 of the Administrative Code;
- (2) Qualification under paragraph (S) of rule 3745-75-03 of the Administrative Code;
- and

- (3) Review of the information contained within the operations manual required by paragraph (T) of rule 3745-75-03 of the Administrative Code, initially and at least annually thereafter as prescribed by paragraph (U) of rule 3745-75-03 of the Administrative Code.
- (F) The owner or operator of an affected facility shall prepare a waste management plan. The waste management plan shall identify both the feasibility and the approach to separate certain components of solid waste from the health care waste stream in order to reduce the amount of toxic emissions from incinerated waste. A waste management plan may include, but is not limited to, elements such as paper, cardboard, plastics, glass, battery, or metal recycling; or purchasing recycled or recyclable products. A waste management plan may include different goals or approaches for different areas or departments of the facility and need not include new waste management goals for every waste stream. It should identify, where possible, reasonably available additional waste management measures, taking into account the effectiveness of waste management measures already in place, the costs of additional measures, the emission reductions expected to be achieved, the need to minimize employee exposure to pathogens, and any other environmental, energy, or safety impacts they may have. The publication "An Ounce of Prevention: Waste Reduction Strategies for Health Care Facilities," from the American Hospital Association, shall be considered in the development of the waste management plan.
- (G) In addition to the report required under paragraph (A)(9) of this rule, the owner or operator shall immediately report any instance of radioactivity alarm activation to the environmental radiation safety section of the bureau of radiation protection of the Ohio department of health.

3745-75-06      **Certification and compliance time schedules.**

[Comment: For dates of non-regulatory government publications, publications of recognized organizations and associations, federal rules, and federal statutory provisions referenced in this rule, see the last paragraph of rule 3745-75-01 of the Administrative Code titled "Reference to materials."]

(A) Certification and permit application requirements.

Any owner or operator of any HMIWI subject to rule 3745-75-02 of the Administrative Code, shall, as of the effective date of federal approval of this rule, operate pursuant to a permit issued under rule 3745-77-02 of the Administrative Code and by not later than April 15, 2002, either:

- (1) Certify in writing to the director that such source is in full compliance with all requirements of Chapter 3745-75 of the Administrative Code. Such certification shall include: equipment description, Ohio environmental protection agency permit application number (if assigned), and all necessary data (consistent with the appropriate permit application appendices) and calculations (including residence time) which confirm the compliance status. The certification shall also include a detailed plan of the facility that includes the dimensions of all nearby buildings and structures, including doors, windows used for ventilation, and air intakes for the heating and cooling system. This plan shall be reviewed and approved for submission by a registered professional engineer or registered architect. The certification shall also include documentation that an application for a permit to operate such source in accordance with rule 3745-77-02 of the Administrative Code was submitted; or
- (2) Provide documentation of control plan(s) submitted in conformity with paragraph (C)(9) of rule 3745-77-03 of the Administrative Code, and paragraph (B)(2)(a) of this rule if applicable. The plan shall include documentation that an application for a permit to operate such source in accordance with rule 3745-77-02 of the Administrative Code was submitted. The documentation shall also include a detailed plan of the facility that includes the dimensions of all nearby buildings and structures, including doors, windows used for ventilation, and air intakes for the heating and cooling system. This plan shall be reviewed and approved for submission by a registered professional engineer or registered architect. Such documentation shall include a compliance program which will bring the source into full compliance with all of the requirements of this chapter as expeditiously as practicable, but in no event, later than the dates specified in paragraph (B) of this rule, and shall identify all reasonable interim control measures.

(B) Compliance time schedules.

- (1) No owner or operator of a HMIWI, which is subject to the requirements of paragraph (A), (B), (C), (D), (E), (F), (G), (H), or (I) of rule 3745-75-02 of the

Administrative Code and paragraphs (B) and (D) of rule 3745-75-03 of the Administrative Code, shall fail to achieve compliance with said requirements as expeditiously as practicable, but no later than August 15, 2001, except as allowed under paragraph (B)(2) of this rule.

- (2) Any owner or operator of a HMIWI, which is subject to the requirements of paragraph (A), (B), (C), (D), (E), (F), (G), (H), or (I) of rule 3745-75-02 of the Administrative Code and paragraphs (B) and (D) of rule 3745-75-03 of the Administrative Code, may submit to the director evidence of federal approval of an extension of applicable compliance dates granted in accordance with 40 CFR 62.14470(b) or 40 CFR 62.14471(b). The evidence must be submitted before the later of thirty days after the adoption of this rule or July 31, 2001. The director shall approve the dates, conditional upon satisfactory fulfillment of the increments of progress already required to be completed. The director will approve or deny any extensions before the later of forty-five days after the adoption of this rule or August 15, 2001. Any units not granted federal extensions before that time shall comply by August 15, 2001. The dates for extensions shall in no case require final compliance later than September 15, 2002. If a unit is granted an extension, the owner or operator must comply with the operator training and qualification requirements of paragraph (N) of rule 3745-75-03 of the Administrative Code as expeditiously as practicable, but no later than August 15, 2001. In addition, the owner or operator must demonstrate that he/she is taking steps toward compliance with the emission limits in this chapter by completing increments of progress. If an extension has been granted under 40 CFR 62.14471(b) and the director approves the extension, the dates for extension and increments of progress shall be the dates listed in that approval. If an extension has been granted under 40 CFR 62.14470(b) and the director approves the extension, the increments of progress shall be the following:
  - (a) A final control plan must have been submitted to the USEPA by September 15, 2000. The final control plan must, at a minimum, include a description of the air pollution control device(s) or process changes that will be employed for each unit to comply with the emission limits and other requirements of 40 CFR Part 62, Subpart HHH.
  - (b) Contracts for onsite construction, onsite installation of emission control equipment, or incorporation of process changes must have been awarded by April 15, 2001. A signed copy of the contract(s) must have been submitted to the USEPA and the director by March 23, 2004.
  - (c) Onsite construction, onsite installation of emission control equipment, or process changes needed to meet the emission limits as outlined in the final control plan must begin by December 15, 2001.
  - (d) Onsite construction, installation of emission control equipment, or process changes must be completed by July 15, 2002.

- (e) Final compliance must be achieved by September 15, 2002. This includes incorporation of all process changes and/or completion of retrofit construction as described in the final control plan, connection of air pollution control equipment or process changes such that the HMIWI is brought on line, and ensuring that all necessary process changes and air pollution control equipment are operating properly.
- (3) Any owner or operator of an HMIWI which is subject to increments of progress approved under paragraph (B)(2) of this rule shall submit notification to the director within ten business days of completing or failing to complete any of the increments of progress. The notification must be signed by the facilities manager.
  - (4) The date of the initial performance test required under paragraph (E) of this rule shall not be later than one hundred eighty days after the date of final compliance approved under paragraph (B)(1) or (B)(2) of this rule. The following information shall be submitted within sixty days after the test is conducted and shall be signed by the facilities manager:
    - (a) The results of the initial performance test;
    - (b) The values for the site-specific operating parameters established pursuant to paragraph (E) of this rule as applicable; and
    - (c) The waste management plan required by paragraph (E) of rule 3745-75-05 of the Administrative Code.
  - (5) Any owner or operator required to install mechanical feeding equipment due to the provisions of paragraph (V) of rule 3745-75-03 of the Administrative Code shall achieve compliance with paragraphs (F) and (V) of rule 3745-75-03 of the Administrative Code as expeditiously as practicable, but not later than the deadlines established in the following schedule:
    - (a) Award contracts for process modifications; or, issue orders for the purchase of component parts to accomplish process modification by May 31, 2004;
    - (b) Initiate on-site construction or installation of process changes by August 31, 2004;
    - (c) Complete on-site construction or installation of process changes by November 15, 2004;
    - (d) Achieve final compliance by December 15, 2004.
  - (6) Any owner or operator that chooses not to retrofit mechanical feeding equipment to achieve compliance with paragraph (V) of rule 3745-75-03 of the Administrative Code shall permanently cease operation of the incinerator as expeditiously as practicable, but not later than December 15, 2004.

- (7) Any owner or operator of a HMIWI, which is subject to the requirements of paragraphs (A) to (G) of rule 3745-75-04 of the Administrative Code, shall achieve compliance with said requirements as expeditiously as practicable, but not later than August 15, 2001, except as allowed under paragraph (B)(2) of this rule.
- (8) Any owner or operator required to install and operate a radioactivity monitor and alarm due to the provisions of paragraph (C) of rule 3745-75-04 of the Administrative Code shall achieve compliance with paragraph (C) of rule 3745-75-04 of the Administrative Code as expeditiously as practicable, but not later than August 31, 2004.

[Note: an earlier compliance date for the radioactivity monitor and alarm may pertain under a previous version of this rule for medical/infectious waste incinerators located offsite, or at facilities where radioactive materials are used or are licensed for use by the United States nuclear regulatory commission.]

- (C) Any owner or operator of any HMIWI subject to paragraph (N), (T) or (U) of rule 3745-75-03 of the Administrative Code shall comply with the requirements specified as expeditiously as practicable, but no later than August 15, 2001.
- (D) Within thirty days after the installation of the continuous monitoring and recording equipment, the owner or operator shall conduct a performance specification test of such equipment pursuant to division (I) of section 3704.03 of the Revised Code and 40 CFR Part 60, Appendix B, performance specification test one. Personnel from the appropriate Ohio EPA district office or local air agency shall be permitted to witness the performance specification test, and two copies of the test results shall be submitted to the appropriate Ohio EPA district office or local air agency within forty-five days after the test is completed.
- (E) All owners or operators of HMIWI units shall conduct an initial performance test to establish the values of the operating parameters from paragraph (H) or (I) of rule 3745-75-04 of the Administrative Code, and to determine compliance with applicable emission limits using the procedures listed below. The use of the bypass stack during a performance test shall invalidate the performance test.
  - (1) All performance tests shall consist of a minimum of three test runs conducted under representative operating conditions.
  - (2) The minimum sample time shall be one hour per test run unless otherwise indicated.
  - (3) USEPA method 1 of 40 CFR Part 60, Appendix A, shall be used to select the sampling location and number of traverse points.
  - (4) USEPA method 3, 3A, or 3B of 40 CFR Part 60, Appendix A, shall be used for gas composition analysis, including measurement of oxygen concentration.

USEPA method 3, 3A, or 3B of 40 CFR Part 60, Appendix A, shall be used simultaneously with each reference method.

- (5) The pollutant concentrations shall be adjusted to seven per cent oxygen using the following equation:

$$C_{\text{adj}} = (C_{\text{meas}})(20.9 - 7) / (20.9 - \%O_2)$$

where

$C_{\text{meas}}$  =measured concentration on a dry basis;

$\%O_2$  =measured oxygen concentration in the exhaust stream on a dry basis; and

$C_{\text{adj}}$  =adjusted concentration.

- (6) USEPA method 5 or 29 of 40 CFR Part 60, Appendix A, shall be used to measure the particulate matter emissions.
- (7) USEPA method 9 of 40 CFR Part 60, Appendix A, shall be used to measure stack opacity.
- (8) USEPA method 10 or 10B of 40 CFR Part 60, Appendix A, shall be used to measure the carbon monoxide emissions.
- (9) USEPA method 23 of 40 CFR Part 60, Appendix A, shall be used to measure total dioxin/furan emissions. The minimum sample time shall be four hours per test run. If the affected facility chooses the toxic equivalency standard for dioxin/furan under paragraph (H) of rule 3745-75-02 of the Administrative Code, the following procedure shall be used to determine compliance:
- (a) Measure the concentration of each dioxin/furan tetra- through octa- congener emitted using USEPA method 23;
  - (b) For each dioxin/furan congener measured in accordance with paragraph (E)(9)(a) of this rule, multiply the congener concentration by its corresponding toxic equivalency factor specified in table two of 40 CFR Part 60, Subpart Ec; and
  - (c) Sum the products calculated in accordance with paragraph (E)(9)(b) of this rule to obtain the total concentration of dioxin/furan emitted in terms of toxic equivalency.
- (10) USEPA method 26 or 26A of 40 CFR Part 60, Appendix A, shall be used to measure hydrogen chloride emissions.
- (11) USEPA method 29 of 40 CFR Part 60, Appendix A, shall be used to measure arsenic, beryllium, chromium, nickel, lead, cadmium, and mercury emissions.

- (F) All owners or operators of HMIWI units shall conduct periodic performance tests to demonstrate compliance with the requirements in paragraphs (A) to (E), and (K) of rule 3745-75-02 of the Administrative Code, as described below.
- (1) The tests for opacity, particulate matter, carbon monoxide, and hydrogen chloride shall be conducted annually (no more than twelve months following the previous performance test) using the applicable procedures and test methods listed in paragraph (E) of this rule. If all three performance tests over a three-year period indicate compliance with the emission limit for particulate matter, carbon monoxide, or hydrogen chloride, the owner or operator may forego a performance test for that pollutant for the subsequent two years. At a minimum, a performance test for particulate matter, carbon monoxide, and hydrogen chloride shall be conducted every third year (no more than thirty-six months following the previous performance test). If a performance test conducted every third year indicates compliance with the emission limit for a pollutant (particulate matter, carbon monoxide, or hydrogen chloride), the owner or operator may forego a performance test for that pollutant for an additional two years. If any performance test indicates noncompliance with the respective emission limit, a performance test for that pollutant shall be conducted annually until all annual performance tests over a three-year period indicate compliance with the emission limit. The annual test for opacity shall be conducted in any case.
  - (2) The use of the bypass stack during a performance test shall invalidate the performance test.
  - (3) The director may require more frequent tests if, in the director's judgment, there may be a violation of any applicable emission standards or there has been a change in the operation that may cause an increase in emissions due to a change in waste streams, infectious waste generators, or other operating conditions.
  - (4) The director or his/her representative shall be allowed to witness the tests, examine testing equipment, and require the acquisition or submission of data and information necessary to assure that the source operation and testing procedures provide a valid characterization of the emissions from the source and/or performance of the control equipment. The Ohio EPA shall be notified at least thirty days in advance by the owner or operator. The notice shall specify the date, time, place, source operating parameters, proposed test procedures, and persons conducting the test. Test results shall be submitted to the appropriate Ohio EPA district office or local air agency no later than thirty days after the completion of the test.

Mike.Hopkins@EPA.State.Oh.US

3745-76-01      **Definitions.**

[Comment: For dates of non-regulatory government publications, publications of recognized organizations and associations, federal rules, and federal statutory provisions referenced in this rule, see the "Incorporation by Reference" section at the end of this rule.]

(A) Terms used but not defined in this chapter have the meaning given them in the Clean Air Act and in rule 3745-15-01 of the Administrative Code.

(B) The following definitions shall apply exclusively to this chapter.

- (1) "Active collection system" means a gas collection system that uses gas mover equipment.
- (2) "Active landfill" means a licensed and permitted landfill in which solid waste is being placed or a landfill that is planned to accept waste in the future.
- (3) "Btu" means British thermal unit
- (4) "Closed landfill" means a landfill in which solid waste is no longer being placed, and in which no additional solid wastes will be placed without first filing a notification of modification in accordance with 40 CFR 60.7(a)(4). Once a notification of modification has been filed, and additional solid waste is placed in the landfill, the landfill is no longer closed. .
- (5) "Closure" means that point in time when a landfill becomes a closed landfill.
- (6) "Commercial solid waste" means all types of solid waste generated by stores, offices, restaurants, ware-houses, and other non-manufacturing activities, excluding residential and industrial wastes.
- (7) "Controlled landfill" means any landfill at which collection and control systems are required under this chapter as a result of the nonmethane organic compounds emission rate. The landfill is considered controlled at the time a collection and control system design plan is submitted in compliance with paragraph (B)(2)(a) of rule 3745-76-07 of the Administrative Code.
- (8) "Design capacity" means the maximum amount of solid waste a landfill can accept, as indicated in terms of volume or mass in the most recent permit issued by the agency responsible for regulating the landfill, plus any in-place waste not accounted for in the most recent permit. If the owner or operator chooses to convert the design capacity from volume to mass or from mass to volume to demonstrate its design capacity is less than 2.5 million megagrams or 2.5 million cubic meters, the calculation must include a site specific density, which must be recalculated annually.

- (9) "Disposal facility" means any contiguous land and structures, other appurtenances, and improvements on the land used for the disposal of solid waste.
- (10) "Emission rate cutoff" means the threshold annual emission rate to which a landfill compares its estimated emission rate to determine if control under the regulation is required.
- (11) "Enclosed combustor" means an enclosed firebox which maintains a relatively constant limited peak temperature generally using a limited supply of combustion air. An enclosed flare is considered an enclosed combustor.
- (12) "Flare" means an open combustor without enclosure or shroud.
- (13) "Gas mover equipment" means the equipment (i.e., fan, blower, compressor) used to transport landfill gas through the header system.
- (14) "Household waste" means any solid waste (including garbage, trash, and sanitary waste in septic tanks) derived from households (including, but not limited to, single and multiple residences, hotels and motels, bunkhouses, ranger stations, crew quarters, campgrounds, picnic grounds, and day-use recreation areas).
- (15) "Industrial solid waste" means solid waste generated by manufacturing or industrial processes that is not a hazardous waste regulated under Subtitle C of the Resource Conservation and Recovery Act, 40 CFR Part 264 and 40 CFR Part 265. Such waste may include, but is not limited to, waste resulting from the following manufacturing processes: electric power generation; fertilizer/agricultural chemicals; food and related products/by-products; inorganic chemicals; iron and steel manufacturing; leather and leather products; non-ferrous metals manufacturing/foundries; organic chemicals; plastics and resins manufacturing; pulp and paper industry; rubber and miscellaneous plastic products; stone, glass, clay, and concrete products; textile manufacturing; transportation equipment; and water treatment. This definition does not include mining waste or oil and gas waste.
- (16) "Interior well" means any well or similar collection component located inside the perimeter of the landfill waste. A perimeter well located outside the landfilled waste is not an interior well.
- (17) "Landfill" means an area of land or an excavation in which wastes are placed for permanent disposal, and that is not a land application unit, surface impoundment, injection well, or waste pile as those terms are defined under 40 CFR 257.2 .

- (18) "Lateral expansion" means a horizontal expansion of the waste boundaries of an existing MSW landfill. A lateral expansion is not a modification unless it results in an increase in the design capacity of the landfill.
- (19) "Modification" means an increase in the permitted volume design capacity of the landfill by either horizontal or vertical expansion based on its permitted design capacity as of May 30, 1991. Modification does not occur until the owner or operator commences construction on the horizontal or vertical expansion.
- (20) "Municipal solid waste" is a type of solid waste generated from community, commercial and agricultural operations, including but not limited to the following:
- (a) Solid waste generated by community operations (including single and multiple-household residences, hotels, motels, bunkhouses, ranger stations, crew quarters, campgrounds, and day-use recreation areas);
  - (b) Solid waste generated by commercial operations (including stores, offices, restaurants, warehouses, and other non-manufacturing activities);
  - (c) Solid waste generated from agricultural operations (including single-family and commercial farms, greenhouses, and nurseries);
  - (d) Sludge from municipal, commercial, or industrial waste water treatment plants, water treatment plants, and air pollution control facilities that is co-disposed with other municipal solid waste in a sanitary landfill facility; and
  - (e) Fly ash and bottom ash generated from the incineration of municipal solid waste, provided the fly ash and bottom ash is not regulated as a hazardous waste.
- (21) "Municipal solid waste landfill" or "MSW landfill" means an entire disposal facility in a contiguous geographical space where household waste is placed in or on land. An MSW landfill may also receive other types of RCRA subtitle D wastes (40 CFR 257.2) such as commercial solid waste, nonhazardous sludge, conditionally exempt small quantity generator waste, and industrial solid waste. Portions of an MSW landfill may be separated by access roads. An MSW landfill may be publicly or privately owned. An MSW landfill may be a new MSW landfill, an existing MSW landfill, or a lateral expansion.
- (22) "Municipal solid waste landfill emissions" or "MSW landfill emissions" means gas generated by the decomposition of organic waste deposited in an MSW landfill or derived from the evolution of organic compounds in the waste.
- (23) "NMOC" means nonmethane organic compounds, as measured according to the provisions of rule 3745-76-09 of the Administrative Code.

- (24) "Nondegradable waste" means any waste that does not decompose through chemical breakdown or microbiological activity. Examples are, but are not limited to, concrete, municipal waste combustor ash, and metals.
- (25) "Passive collection system" means a gas collection system that solely uses positive pressure within the landfill to move the gas rather than using gas mover equipment.
- (26) "PSD" means prevention of significant deterioration, as defined in 40 CFR 52.21, prevention of significant deterioration of air quality.
- (27) "Sludge" means any solid, semisolid, or liquid waste generated from a municipal, commercial, or industrial waste-water treatment plant, water supply treatment plant, or air pollution control facility, exclusive of the treated effluent from a wastewater treatment plant.
- (28) "Solid waste" means any garbage, sludge from a wastewater treatment plant, water supply treatment plant, or air pollution control facility and other discarded material, including solid, liquid, semisolid, or contained gaseous material resulting from industrial, commercial, mining, and agricultural operations, and from community activities, but does not include solid or dissolved material in domestic sewage, or solid or dissolved materials in irrigation return flows or industrial discharges that are point sources subject to permits under the national pollutant discharge elimination system or the United States nuclear regulatory commission.
- (29) "Sufficient density" means any number, spacing, and combination of collection system components, including vertical wells, horizontal collectors, and surface collectors, necessary to maintain emission and migration control as determined by measures of performance set forth in this chapter.
- (30) "Sufficient extraction rate" means a rate sufficient to maintain a negative pressure at all wellheads in the collection system without causing air infiltration, including any wellheads connected to the system as a result of expansion or excess surface emissions, for the life of the blower.
- (31) Incorporation by reference. This chapter includes references to certain matter or materials. The text of the incorporated materials is not included in the regulations contained in this chapter. The materials are hereby made a part of the regulations in this chapter. For materials subject to change, only the specific version specified in the regulation are incorporated. Material is incorporated as it exists on the effective date of this rule. Except for subsequent annual publication of existing (unmodified) Code of Federal Regulation compilations, any amendment or revision to a referenced document is not incorporated unless and until this rule has been amended to specify the new dates.
- (a) Availability. The materials incorporated by reference are available as follows:

- (i) Clean Air Act. Information and copies may be obtained by writing to: "Superintendent of Documents, Attn: New Orders, P.O. Box 371954, Pittsburgh, PA 15250-7954." The full text of the Act as amended in 1990 is also available in electronic format at [www.epa.gov/oar/caa/](http://www.epa.gov/oar/caa/). A copy of the Act is also available for inspection and copying at most public libraries and "The State Library of Ohio."
  - (ii) Code of Federal Regulations (CFR). Information and copies may be obtained by writing to: "Superintendent of Documents, Attn: New Orders, PO Box 371954, Pittsburgh, PA 15250-7954." The full text of the CFR is also available in electronic format at <http://www.gpoaccess.gov/cfr/retrieve.html>. The CFR compilations are also available for inspection and copying at most public libraries and "The State Library of Ohio."
  - (iii) Compilation of Air Pollutant Emission Factors, AP-42. Information and copies may be obtained by writing to: "Superintendent of Documents, Attn: New Orders, PO Box 371954, Pittsburgh, PA 15250-7954." The full text of the compilation of air pollutant emission factors, AP-42, is also available in electronic format at <http://www.epa.gov/ttn/chief/ap42/>. The compilation of air pollutant emission factors, AP-42, are also available for inspection and copying at most public libraries and "The State Library of Ohio."
- (b) Incorporated materials:
- (i) ASTM D1946-90; "Standard Practice for Analysis of Reformed Gas by Gas Chromatography;" 2000.
  - (ii) ASTM D4809-00; "Standard Test Method for Heat of Combustion of Liquid Hydrocarbon Fuels by Bomb Calorimeter (Precision Method);" 2005.
  - (iii) Method 2; "Determination of stack gas velocity and volumetric flow rate (type 'S' pitot tube);" 40 CFR Part 60, Appendix A-1, as published in the July 1, 2005 Code of Federal Regulations.
  - (iv) Method 2A; "Direct measurement of gas volume through pipes and small ducts;" 40 CFR. Part 60, Appendix A-1, as published in the July 1, 2005 Code of Federal Regulations.
  - (v) Method 2C; "Determination of gas velocity and volumetric flow rate in small stacks or ducts (standard pitot tube);" 40 ... Part 60, Appendix A-1, as published in the July 1, 2005 Code of Federal Regulations.

- (vi) Method 2D; "Measurement of gas volume flow rates in small pipes and ducts;" 40 CFR. Part 60, Appendix A-1, as published in the July 1, 2005 Code of Federal Regulations.
- (vii) Method 2E; "Determination of landfill gas production flow rate;" 40 CF. Part 60, Appendix A-1, as published in the July 1, 2005 Code of Federal Regulations.
- (viii) Method 3A; "Determination of oxygen and carbon dioxide concentrations in emissions from stationary sources (instrumental analyzer procedure);" 40CFR. Part 60, Appendix A-2, as published in the July 1, 2005 Code of Federal Regulations.
- (ix) Method 3C; "Determination of carbon dioxide, methane, nitrogen, and oxygen from stationary sources;" 40CFR. Part 60, Appendix A-2, as published in the July 1, 2005 Code of Federal Regulations.
- (x) Method 18; "Measurement of gaseous organic compound emissions by gas chromatography;" 40CFR. Part 60, Appendix A-6, as published in the July 1, 2005 Code of Federal Regulations.
- (xi) Method 21; "Determination of volatile organic compound leaks;" 40CFR. Part 60, Appendix A-7, as published in the July 1, 2005 Code of Federal Regulations.
- (xii) Method 25; "Determination of total gaseous nonmethane organic emissions as carbon;" 40CFR. Part 60, Appendix A-7, as published in the July 1, 2005 Code of Federal Regulations.
- (xiii) Method 25A; "Determination of total gaseous organic concentration using a flame ionization analyzer;" 40CFR. Part 60, Appendix A-7, as published in the July 1, 2005 Code of Federal Regulations.
- (xiv) Method 25C; "Determination of nonmethane organic compounds (NMOC) in MSW landfill gases;" 40 .R. Part 60, Appendix A-7, as published in the July 1, 2005 Code of Federal Regulations.
- (xv) 40 CFR Part 60, Subpart Cc, "Emission Guidelines and Compliance Times for Municipal Solid Waste Landfills;" 61 FR 9919, March 12, 1996, as amended at 63 FR 32750, June 16, 1998.
- (xvi) 40 CFR Part 60, Subpart WWW, "Standards of Performance for Municipal Solid Waste Landfills;" 61 FR 9919, March 12, 1996, as amended at 63 FR 32753, June 16, 1998; 64 FR 9262, February 24, 1999; 65 FR 18909, April 10, 2000.

- (xvii) 40 CFR Part 264, "Standards for Owners and Operators of Hazardous Waste Treatment, Storage, and Disposal Facilities;" as published in the July 1, 2005 Code of Federal Regulations.
- (xviii) 40 CFR Part 265,\_"Interim Status Standards for Owners and Operators of Hazardous Waste Treatment, Storage, and Disposal Facilities;" as published in the July 1, 2005 Code of Federal Regulations.
- (xix) 40 CFR Part 258, "Criteria for Municipal Solid Waste Landfills;" 56 FR 51016, October 9, 1991, as amended at 58 FR 51546, October 1, 1993; 60 FR 52342, October 6, 1995; 61 FR 50413, September 25, 1996.
- (xx) 40 FR 258.40\_"Design Criteria for Municipal Solid Waste Landfills;" as published in the July 1, 2005 Code of Federal Regulations.

3745-76-02      **Designated facilities.**

[Comment: For dates of non-regulatory government publications, publications of recognized organizations and associations, federal rules, and federal statutory provisions referenced in this rule, see the last paragraph of rule 3745-76-01 of the Administrative Code titled "Incorporation by reference."]

- (A) The designated facility to which this rule applies is each existing MSW landfill for which construction, reconstruction or a modification resulting in increased disposal capacity was commenced before May 30, 1991.

[Comment: Any MSW landfill which, through construction, reconstruction, or modification, increases the disposal capacity of the landfill after May 30, 1991 is not subject to these rules, which regulate landfills subject to United States environmental protection agency's emission guidelines for landfills installed or expanded before this date under 40 CFR Part 60, Subpart Cc, but instead would be subject to the standards of performance for MSW landfills found in 40 CFR Part 60, Subpart WWW.]

- (B) Physical or operational changes made to an existing MSW landfill solely to comply with this rule are not considered a modification under Chapter 3745-31 of the Administrative Code.

**Control requirements for municipal solid waste landfills.**

- (A) MSW landfill emissions shall be controlled at each MSW landfill meeting the following three conditions:
- (1) The landfill has accepted waste at any time since November 8, 1987, or has additional design capacity available for future waste deposition;
  - (2) The landfill has a design capacity greater than or equal to 2.5 million megagrams or 2.5 million cubic meters. The landfill may calculate design capacity in either megagrams or cubic meters for comparison with the exemption values. Any density conversions shall be documented and submitted with the report; and
  - (3) The landfill has a nonmethane organic compound emission rate of fifty megagrams per year or more.
- (B) Each MSW landfill meeting the conditions in paragraph (A) of this rule shall install a collection and control system meeting the conditions provided in paragraph (B)(2)(b) of rule 3745-76-07 of the Administrative Code.
- (C) Collected MSW landfill emissions shall be controlled through the use of control devices meeting the requirements of paragraph (C)(1), (C)(2), or (C)(3) of this rule.
- (1) An open flare designed and operated in accordance with the parameters established in rule 3745-76-15 of the Administrative Code; or
  - (2) A control system designed and operated to reduce NMOC by ninety-eight weight per cent; or
  - (3) An enclosed combustor designed and operated to reduce the outlet NMOC concentration to twenty parts per million as hexane by volume, dry basis at three per cent oxygen, or less.

Effective: 10/10/2006

3745-76-04      **Test methods and procedures.**

Each landfill having a design capacity greater than or equal to 2.5 million megagrams or 2.5 million cubic meters shall calculate the NMOC emission rate as required in rule 3745-76-09 of the Administrative Code. If the NMOC emission rate is calculated to be fifty megagrams or more per year, the owner or operator shall comply with all of the applicable rules in the Administrative Code, including but not limited to the collection and control system requirements in rule 3745-76-07 of the Administrative Code; the operational standards for the control and collection system in rule 3745-76-08 of the Administrative Code; the compliance provisions in rule 3745-76-10 of the Administrative Code; the monitoring provisions in rule 3745-76-11 of the Administrative Code; the reporting requirements in rule 3745-76-12 of the Administrative Code; and the record keeping requirements of rule 3745-76-13 of the Administrative Code. An active collection system shall also meet the requirements of rule 3745-76-14 of the Administrative Code and a flare shall meet the requirements of rule 3745-76-15 of the Administrative Code.

Rule 3745-76-05: Rescinded as of October 10, 2006

**Compliance times.**

- (A) Except as provided for under paragraph (B) of this rule, planning, awarding of contracts, and installation of MSW landfill air emission collection and control equipment capable of meeting the emission guidelines established under rule 3745-76-03 of the Administrative Code shall be accomplished within thirty months after the date the initial NMOC emission rate report shows NMOC emissions to equal or exceed fifty megagrams per year.
- (B) For each existing MSW landfill meeting the conditions in paragraph (A)(1) of rule 3745-76-03 of the Administrative Code and paragraph (A)(2) of rule 3745-76-03 of the Administrative Code whose NMOC emission rate is less than fifty megagrams per year on the initial effective date of this chapter, installation of collection and control systems capable of meeting rule 3745-76-03 of the Administrative Code shall be accomplished within thirty months of the date when the condition in paragraph (A)(3) of rule 3745-76-03 of the Administrative Code is met (i.e., the date of the first annual nonmethane organic compounds emission rate report which equals or exceeds fifty megagrams per year).

Effective: 10/10/2006

Prior Effective Dates: 1/31/98, 11/16/99

[Comment: For dates of non-regulatory government publications, publications of recognized organizations and associations, federal rules, and federal statutory provisions referenced in this rule, see the last paragraph of rule 3745-76-01 of the Administrative Code titled "Incorporation by reference."]

- (A) Each owner or operator of an MSW landfill having a design capacity less than 2.5 million megagrams by mass or 2.5 million cubic meters by volume shall submit an initial design capacity report to the director as provided in paragraph (A) of rule 3745-76-12 of the Administrative Code. The landfill may calculate design capacity in either megagrams or cubic meters for comparison with the exemption values. Any density conversions shall be documented and submitted with the report. Submittal of the initial design capacity report shall fulfill the requirements of this chapter except as provided for in paragraphs (A)(1) and (A)(2) of this rule.
- (1) The owner or operator shall submit to the director an amended design capacity report, as provided for in paragraph (A)(3) of rule 3745-76-12 of the Administrative Code.
  - (2) When an increase in the maximum design capacity of a landfill exempted from the provisions of paragraph (B) of rule 3745-76-07 of the Administrative Code to rule 3745-76-14 of the Administrative Code on the basis of the design capacity exemption in paragraph (A) of this rule results in a revised maximum design capacity equal to or greater than 2.5 million megagrams and 2.5 million cubic meters, the owner or operator shall comply with the provision of paragraph (B) of this rule.
- (B) Each owner or operator of an MSW landfill having a design capacity equal to or greater than 2.5 million megagrams and 2.5 million cubic meters, shall either comply with paragraph (B)(2) of this rule or calculate an NMOC emission rate for the landfill using the procedures specified in rule 3745-76-09 of the Administrative Code. The NMOC emission rate shall be recalculated annually, except as provided in paragraph (B)(1)(b) of rule 3745-76-12 of the Administrative Code. The owner or operator of an MSW landfill subject to this chapter with a design capacity greater than or equal to 2.5 million megagrams and 2.5 million cubic meters is required to obtain a Title V permit.
- (1) If the calculated NMOC emission rate is less than fifty megagrams per year, the owner or operator shall:
    - (a) Submit an annual emission report to the director, except as provided for in paragraph (B)(1)(b) of rule 3745-76-12 of the Administrative Code; and

- (b) Recalculate the NMOC emission rate annually using the procedures specified in paragraph (A)(1) of rule 3745-76-09 of the Administrative Code until such time as the calculated NMOC emission rate is equal to or greater than fifty megagrams per year, or the landfill is closed.
  - (i) If the NMOC emission rate, upon recalculation required in paragraph (B)(1)(b) of this rule, is equal to or greater than fifty megagrams per year, the owner or operator shall install a collection and control system in compliance with paragraph (B)(2) of this rule.
  - (ii) If the landfill is permanently closed, a closure notification shall be submitted to the director as provided for in paragraph (D) of rule 3745-76-12 of the Administrative Code.
- (2) If the calculated NMOC emission rate is equal to or greater than fifty megagrams per year, the owner or operator shall:
  - (a) Submit a collection and control system design plan prepared by a professional engineer to the director within one year:
    - (i) The collection and control system as described in the plan shall meet the design requirements of paragraph (B)(2)(b) of this rule.
    - (ii) The collection and control system design plan shall include any alternatives to the operational standards, test methods, procedures, compliance measures, monitoring, recordkeeping or reporting provisions of rule 3745-76-08 of the Administrative Code to 3745-76-13 of the Administrative Code proposed by the owner or operator.
    - (iii) The collection and control system design plan shall either conform with specifications for active collection systems in rule 3745-76-14 of the Administrative Code or include a demonstration to the director's satisfaction of the sufficiency of the alternative provisions to rule 3745-76-14 of the Administrative Code.
    - (iv) The director shall review the information submitted under paragraphs (B)(2)(a)(i), (B)(2)(a)(ii) and (B)(2)(a)(iii) of this rule and either approve it, disapprove it, or request that additional information be submitted. Because of the many site-specific factors involved with landfill gas system design, alternative systems may be necessary. A wide variety of system designs are possible, such as vertical wells, combination horizontal and vertical collection systems, or horizontal trenches only, leachate collection components, and passive systems.
  - (b) Install a collection and control system that captures the gas generated within the landfill as required under paragraph (B)(2)(b)(i) or (B)(2)(b)(ii) and

paragraph (B)(2)(c) of this rule within thirty months after the first annual report in which the emission rate equals or exceeds fifty megagrams per year, unless tier two or tier three sampling demonstrates that the emission rate is less than fifty megagrams per year as specified in paragraph (C)(1) or (C)(2) of rule 3745-76-12 of the Administrative Code.

(i) An active collection system shall:

- (a) Be designed to handle the maximum expected gas flow rate from the entire area of the landfill that warrants control over the intended use period of the gas control or treatment system equipment;
- (b) Collect gas from each area in the landfill where:
  - (i) Municipal solid waste has been placed for five years or more; or
  - (ii) Acceptance of municipal solid waste has ceased for at least two years;
- (c) Collect gas at a sufficient extraction rate;
- (d) Be designed to minimize off-site migration of subsurface gas.

(ii) A passive collection system shall:

- (a) Comply with the provisions specified in paragraphs (B)(2)(b)(i)(a), (B)(2)(b)(i)(b), and (b)(2)(b)(i)(d) of this rule.
  - (b) Be installed with composite liners on the bottom and all sides in all areas in which gas is to be collected. The composite liners shall be designed and installed in accordance with 40 CFR 258.40 and the requirements contained in rules 3745-27-06 and 3745-27-07 of the Administrative Code.
- (c) Route all the collected gas to a control system that complies with the requirements in either paragraph (B)(2)(c)(i), (B)(2)(c)(ii) or (B)(2)(c)(iii) of this rule.
- (i) An open flare designed and operated in accordance with rule 3745-76-15 of the Administrative Code;
  - (ii) A control system designed and operated to reduce NMOC by ninety eight weight-percent, or, when an enclosed combustion device is used for control, to either reduce NMOC by ninety eight weight percent or reduce the outlet NMOC concentration to less than twenty parts per

million by volume, dry basis as hexane at three percent oxygen. The reduction efficiency or parts per million by volume shall be established by an initial performance test to be completed no later than one hundred eighty days after the initial startup of the approved control system, using the test methods specified in paragraph (D) of rule 3745-76-09 of the Administrative Code.

- (a) If a boiler or process heater is used as the control device, the landfill gas stream shall be introduced into the flame zone.
  - (b) The control device shall be operated within the parameter ranges established during the initial or most recent performance test. The operating parameters to be monitored are specified in rule 3745-76-11 of the Administrative Code;
  - (iii) Route the collected gas to a treatment system that processes the collected gas for subsequent sale or use. All emissions from any atmospheric vent from the gas treatment system shall be subject to the requirements of paragraph (B)(2)(c)(i) or (B)(2)(c)(ii) of this rule.
  - (d) Operate the collection and control device installed to comply with this chapter in accordance with the provisions of rules 3745-76-08, 3745-76-10, and 3745-76-11 of the Administrative Code.
  - (e) The collection and control system may be capped or removed provided that all the conditions of paragraphs (B)(2)(e)(i), (B)(2)(e)(ii), and (B)(2)(e)(iii) of this rule are met:
    - (i) The landfill shall be a closed landfill as defined in rule 3745-76-01 of the Administrative Code. A closure report shall be submitted to the director as provided in paragraph (D) of rule 3745-76-12 of the Administrative Code;
    - (ii) The collection and control system shall have been in operation a minimum of fifteen years from when the first well was installed and put into operation; and
    - (iii) Following the procedures specified in paragraph (B) of rule 3745-76-09 of the Administrative Code, the calculated NMOC gas produced by the landfill shall be less than fifty megagrams per year on three successive test dates. The test dates shall be no less than ninety days apart, and no more than one hundred eighty days apart.
- (C) For purposes of obtaining an operating permit under Title V of the Clean Air Act, the owner or operator of a MSW landfill subject to this chapter with a design capacity less than 2.5 million megagrams or 2.5 million cubic meters is not subject to the

requirement to obtain an operating permit for the landfill under Title V, unless the landfill is otherwise subject to Title V. For purposes of submitting a timely application of an operating permit under Title V, the owner or operator of a MSW landfill subject to this chapter with a design capacity greater than or equal to 2.5 million megagrams and 2.5 million cubic meters, and not otherwise subject to Title V, becomes subject to the requirements of Title V regardless of when the design capacity report is actually submitted, no later than:

- (1) June 10, 1996 for MSW landfills that commenced construction, modification, or reconstruction on or after May 30, 1991 but before March 12, 1996;
  - (2) Ninety days after the date of commenced construction, modification, or reconstruction for MSW landfills that commence construction, modification, or reconstruction on or after March 12, 1996.
- (D) When a MSW landfill subject to this chapter is closed, the owner or operator is no longer subject to the requirement to maintain an operating permit under Title V for the landfill if the landfill is not otherwise subject to the requirements of Title V and if either of the following conditions are met:
- (1) The landfill was never subject to the requirement for a control system under paragraph (B)(2) of this rule; or
  - (2) The owner or operator meets the conditions for control system removal specified in paragraph (B)(2)(e) of this rule.

**Operational standards for collection and control systems.**

[Comment: For dates of non-regulatory government publications, publications of recognized organizations and associations, federal rules, and federal statutory provisions referenced in this rule, see the last paragraph of rule 3745-76-01 of the Administrative Code titled "Incorporation by reference."]

Each owner or operator of an MSW landfill with a gas collection and control system used to comply with the provisions of paragraph (B)(2)(b) of rule 3745-76-07 of the Administrative Code shall:

- (A) Operate the collection system such that gas is collected from each area, cell, or group of cells in the MSW landfill in which solid waste has been in place for :
  - (1) Five years or more if active; or
  - (2) Two years or more if closed or at final grade.
- (B) Operate the collection system with negative pressure at each wellhead except under the following conditions:
  - (1) A fire or increased well temperature. The owner or operator shall record instances when positive pressure occurs in efforts to avoid a fire. These records shall be submitted with the annual reports as provided in paragraph (F)(1) of rule 3745-76-12 of the Administrative Code;
  - (2) Use of a geomembrane or synthetic cover. The owner or operator shall develop acceptable pressure limits in the design plan;
  - (3) A decommissioned well. A well may experience a static positive pressure after shut down to accommodate for declining flows. All design changes shall be approved by the director;
- (C) Operate each interior wellhead in the collection system with a landfill gas temperature less than fifty five degrees Celsius and with either a nitrogen level less than twenty percent or an oxygen level less than five per cent. The owner or operator may establish a higher operating temperature, nitrogen, or oxygen value at a particular well. A higher operating value demonstration shall show supporting data that the elevated parameter does not cause fires or significantly inhibit anaerobic decomposition by killing methanogens.
  - (1) The nitrogen level shall be determined using Method 3C of Appendix A of 40 CFR Part 60, unless an alternative test method is established as allowed by paragraph (B)(2)(a) of rule 3745-76-07 of the Administrative Code.

- (2) Unless an alternative test method is established as allowed by paragraph (B)(2)(a) of rule 3745-76-07 of the Administrative Code, the oxygen shall be determined by an oxygen meter using Method 3A of Appendix A of 40 CFR Part 60 except that:
- (a) The span shall be set so that the regulatory limit is between twenty and fifty per cent of the span;
  - (b) A data recorder is not required;
  - (c) Only two calibration gases are required, a zero and span, and ambient air may be used as the span;
  - (d) A calibration error check is not required;
  - (e) The allowable sample bias, zero drift, and calibration drift are plus or minus ten per cent.
- (D) Operate the collection system so that the methane concentration is less than five hundred parts per million above background at the surface of the landfill. To determine if this level is exceeded, the owner or operator shall conduct surface testing around the perimeter of the collection area and along a pattern that traverses the landfill at thirty meter intervals and where visual observations indicate elevated concentrations of landfill gas, such as distressed vegetation and cracks or seeps in the cover. The owner or operator may establish an alternative traversing pattern that ensures equivalent coverage. A surface monitoring design plan shall be developed that includes a topographical map with the monitoring route and the rationale for any site-specific deviations from the thirty meter intervals. Areas with steep slopes or other dangerous areas may be excluded from the surface testing.
- (E) Operate the system such that all collected gases are vented to a control system designed and operated in compliance with paragraph (B)(2)(c) of rule 3745-76-07 of the Administrative Code. In the event the collection or control system is inoperable, the gas mover system shall be shut down and all valves in the collection and control system contributing to venting of the gas to the atmosphere shall be closed within one hour; and
- (F) Operate the control or treatment system at all times when the collected gas is routed to the system.
- (G) If monitoring demonstrates that the operational requirements in paragraph (B), (C), or (D) of this rule are not met, corrective action shall be taken as specified in paragraphs (A)(3) to (A)(5) of rule 3745-76-10 of the Administrative Code or paragraph (C) of rule 3745-76-10 of the Administrative Code. If corrective actions are taken as specified in rule 3745-76-10 of the Administrative Code, the monitored exceedance is not a violation of the operational requirements in this rule.

[Comment: For dates of non-regulatory government publications, publications of recognized organizations and associations, federal rules, and federal statutory provisions referenced in this rule, see the last paragraph of rule 3745-76-01 of the Administrative Code titled "Incorporation by reference."]

(A)

(1) The landfill owner or operator shall calculate the NMOC emission rate using either the equation provided in paragraph (A)(1)(a) of this rule or the equation provided in paragraph (A)(1)(b) of this rule. Both equations may be used if the actual year-to-year solid waste acceptance rate is known, as specified in paragraph (A)(1)(a) of this rule, for part of the life of the landfill and the actual year-to-year solid waste acceptance rate is unknown, as specified in paragraph (A)(1)(b) of this rule, for part of the life of the landfill. The values to be used in both equations are 0.05 per year for  $k$ , one hundred seventy cubic meters per megagram for  $L_o$ , and four thousand parts per million by volume as hexane for the  $C_{NMOC}$ . For landfills located in geographical areas with a thirty year annual average precipitation of less than twenty five inches, as measured at the nearest representative official meteorologic site, the  $k$  value to be used is 0.02 per year.

(a) The following equation shall be used if the actual year-to-year solid waste acceptance rate is known.

$$M_{NMOC} = \sum_{i=1}^n 2kL_oM_i(e^{-kt_i})(C_{NMOC})(3.6 \times 10^{-9})$$

Where,  $M_{NMOC}$  = total NMOC emission rate from the landfill, megagrams per year

$k$  = methane generation rate constant, year<sup>-1</sup>

$L_o$  = methane generation potential, cubic meters per megagram solid waste

$M_i$  = mass of solid waste in the  $i^{\text{th}}$  section, megagrams

$t_i$  = age of the  $i^{\text{th}}$  section, years

$C_{NMOC}$  = concentration of NMOC, parts per million by volume as hexane

$3.6 \times 10^{-9}$  = conversion factor

The mass of nondegradable solid waste may be subtracted from the total mass of solid waste in a particular section of the landfill when calculating

the value for  $M_i$  if documentation of the nature and amount of such wastes is maintained.

- (b) The following equation shall be used if the actual year-to-year solid waste acceptance rate is unknown.

$$M_{\text{NMOC}} = 2L_oR (e^{-kc} - e^{-kt}) (C_{\text{NMOC}}) (3.6 \times 10^{-9})$$

Where,

$M_{\text{NMOC}}$  = mass emission rate of NMOC, megagrams per year

$L_o$  = methane generation potential, cubic meters per megagram solid waste

$R$  = average annual acceptance rate, megagrams per year

$k$  = methane generation rate constant, year<sup>-1</sup>

$t$  = age of landfill, years

$C_{\text{NMOC}}$  = concentration of NMOC, parts per million by volume as hexane

$c$  = time since closure, years. For active landfill  $c = 0$  and  $e^{-kc} = 1$

$3.6 \times 10^{-9}$  = conversion factor

The mass of nondegradable solid waste may be subtracted from the average annual acceptance rate when calculating a value for  $R$ , if documentation of the nature and amount of such wastes is maintained.

- (2) Tier 1. The owner or operator shall compare the calculated NMOC mass emission rate to the standard of fifty megagrams per year.
- (a) If the NMOC emission rate calculated in paragraph (A)(1) of this rule is less than fifty megagrams per year, then the landfill owner shall submit an emission rate report as provided in paragraph (B)(1) of rule 3745-76-12 of the Administrative Code, and shall recalculate the NMOC mass emission rate annually as required under paragraph (B)(1) of rule 3745-76-07 of the Administrative Code.
- (b) If the calculated NMOC emission rate is equal to or greater than fifty megagrams per year, then the landfill owner shall either comply with paragraph (B)(2) of rule 3745-76-07 of the Administrative Code, or determine a site-specific NMOC concentration and recalculate the NMOC emission rate using the procedures provided in paragraph (A)(3) of this rule.

- (3) Tier 2. The landfill owner or operator shall determine the NMOC concentration using the following sampling procedure. The landfill owner or operator shall install at least two sample probes per hectare of landfill surface that has retained waste for at least two years. If the landfill is larger than twenty five hectares in area, only fifty samples are required. The sample probes should be located to avoid known areas of nondegradable solid waste. The owner or operator shall collect and analyze one sample of landfill gas from each probe to determine the NMOC concentration using Method 25 or Method 25C of Appendix A of 40 CFR Part 60. Method 18 of Appendix A of 40 CFR Part 60 may be used to analyze the samples collected by the Method 25 or 25C sampling procedure. . If more than the required number of samples are taken, all samples shall be used in the analysis. The landfill owner or operator shall divide the NMOC concentration from Method 25 or Method 25C of Appendix A of 40 CFR part 60 by six to convert from  $C_{\text{NMOC}}$  as carbon to  $C_{\text{NMOC}}$  as hexane.
- (a) Taking composite samples from different probes into a single cylinder is allowed; however, equal sample volumes must be taken from each probe. For each composite, the sampling rate, collection times, beginning and ending cylinder vacuums, or alternative volume measurements must be recorded to verify that composite volumes are equal. Composite sample volumes should not be less than one liter, unless evidence can be provided to substantiate the accuracy of smaller volumes. The compositing shall be terminated before the cylinder approaches ambient pressure where measurement accuracy diminishes.
- (b) If using Method 18, the owner or operator must identify all compounds in the sample, and, at a minimum, test for those compounds published in the most recent "Compilation of Air Pollutant Emission Factors (AP-42)", minus carbon monoxide, hydrogen sulfide, and mercury. At a minimum, the instrument must be calibrated for each of the compounds on the list. The concentration of each Method 18 compound shall be converted to  $C_{\text{NMOC}}$  as hexane by multiplying it by the ratio of its carbon atoms divided by six.
- (c) If the landfill has an active or passive gas removal system in place, Method 25 or Method 25C samples may be collected from these systems instead of surface probes, provided the removal system can be shown to provide sampling as representative as the two sampling probe per hectare requirement. For active collection systems, samples may be collected from the common header pipe before the gas moving or condensate removal equipment. For these systems, a minimum of three samples must be collected from the header pipe.
- (d) The landfill owner or operator shall recalculate the NMOC mass emission rate using the equations provided in paragraph (A)(1)(a) or (A)(1)(b) of this rule and using the average NMOC concentration from the collected samples

instead of the default value in the equation provided in paragraph (A)(1) of this rule.

- (e) If the resulting mass emission rate calculated using the site-specific NMOC concentration is equal to or greater than fifty megagrams per year, then the landfill owner or operator shall either comply with paragraph (B)(2) of rule 3745-76-07 of the Administrative Code, or determine the site-specific methane generation rate constant and recalculate the NMOC emission rate using the site-specific methane generation rate using the procedure specified in paragraph (A)(4) of this rule.
  - (f) If the resulting NMOC mass emission rate is less than fifty megagrams per year, the owner or operator shall submit a periodic estimate of the emission rate report as provided in paragraph (B)(1) of rule 3745-76-12 of the Administrative Code and retest the site-specific NMOC concentration every five years using the methods specified in this rule.
- (4) Tier 3. The site-specific methane generation rate constant shall be determined using the procedures provided in Method 2E of Appendix A of 40 CFR Part 60. The landfill owner or operator shall estimate the NMOC mass emission rate using equations in paragraph (A)(1)(a) or (A)(1)(b) of this rule and using a site-specific methane generation rate constant  $k$ , and the site-specific NMOC concentration as determined in paragraph (A)(3) of this rule instead of the default values provided in paragraph (A)(1) of this rule. The landfill owner or operator shall compare the resulting NMOC mass emission rate to the standard of fifty megagrams per year.
- (a) If the NMOC mass emission rate as calculated using the site-specific methane generation rate and concentration of NMOC is equal to or greater than fifty megagrams per year, the owner or operator shall comply with paragraph (B)(2) of rule 3745-76-07 of the Administrative Code.
  - (b) If the NMOC mass emission rate is less than fifty megagrams per year, then the owner or operator shall submit a periodic emission rate report as provided in paragraph (B)(1) of rule 3745-76-12 of the Administrative Code and shall recalculate the NMOC mass emission rate annually, as provided in paragraph (B)(1) of rule 3745-76-12 of the Administrative Code using the equations in paragraph (A)(1) of this rule and using the site-specific methane generation rate constant and NMOC concentration obtained in paragraph (A)(3) of this rule. The calculation of the methane generation rate constant is performed only once, and the value obtained from this test shall be used in all subsequent annual NMOC emission rate calculations.
- (5) The owner or operator may use other methods to determine the NMOC concentration or a site-specific  $k$  as an alternative to the methods required in

paragraphs (A)(3) and (A)(4) of this rule if the method has been approved by the director.

- (B) After the installation of a collection and control system in compliance with rule 3745-76-10 of the Administrative Code, the owner or operator shall calculate the NMOC emission rate for purposes of determining when the system can be removed as provided in paragraph (B)(2)(e) of rule 3745-76-07 of the Administrative Code, using the following equation:

$$M_{\text{NMOC}} = 1.89 \times 10^{-3} Q_{\text{LFG}} C_{\text{NMOC}}$$

Where,

$M_{\text{NMOC}}$  = mass emission rate of NMOC, megagrams per year

$Q_{\text{LFG}}$  = flow rate of landfill gas, cubic meters per minute

$C_{\text{NMOC}}$  = NMOC concentration, parts per million by volume as hexane

- (1) The flow rate of landfill gas,  $Q_{\text{LFG}}$  shall be determined by measuring the total landfill gas flow rate at the common header pipe that leads to the control device using a gas flow measuring device calibrated according to the provisions of section 4 of Method 2E of Appendix A of 40 CFR Part 60.
  - (2) The average NMOC concentration,  $C_{\text{NMOC}}$ , shall be determined by collecting and analyzing landfill gas sampled from the common header pipe before the gas moving or condensate removal equipment using the procedures in Method 25C or Method 18 of Appendix A of 40 CFR Part 60. If using Method 18 of Appendix A of 40 CFR Part 60, the minimum list of compounds to be tested shall be those published in the most recent "Compilation of Air Pollutant Emission Factors (AP-42)". The sample location on the common header pipe shall be before any condensate removal or other gas refining units. The landfill owner or operator shall divide the NMOC concentration from Method 25C of Appendix A of 40 CFR Part 60 by six to convert from  $C_{\text{NMOC}}$  as carbon to  $C_{\text{NMOC}}$  as hexane.
  - (3) The owner or operator may use another method to determine landfill gas flow rate and NMOC concentration if the method has been approved by the director.
- (C) When calculating emissions for PSD purposes, the owner or operator of each MSW landfill subject to the provisions of this chapter shall estimate the NMOC emission rate for comparison to the major stationary source and significant levels in rule 3745-31-01 of the Administrative Code using AP-42 or other approved measurement procedures. If a collection system, which complies with the provisions in paragraph (B)(2) of rule 3745-76-07 of the Administrative Code is already installed, the owner

or operator shall estimate the NMOC emission rate using the procedures provided in paragraph (B) of this rule.

- (D) For the performance test required in paragraph (B)(2)(c)(ii) of rule 3745-76-07 of the Administrative Code, Method 25C or Method 18 of appendix A of 40 CFR Part 60 shall be used to determine compliance with ninety eight weight-per cent efficiency or the twenty parts per million volume outlet concentration level, unless another method to demonstrate compliance has been approved by the director as provided by paragraph (B)(2)(a)(ii) of rule 3745-76-07 of the Administrative Code. If using Method 18 of Appendix A of 40 CFR Part 60, the minimum list of compounds to be tested shall be those published in the most recent "Compilation of Air Pollutant Emission Factors (AP-42)". The following equation shall be used to calculate efficiency:

$$\text{Control efficiency} = (\text{NMOC}_{\text{IN}} - \text{NMOC}_{\text{OUT}}) / (\text{NMOC}_{\text{IN}})$$

Where,

$\text{NMOC}_{\text{IN}}$  = mass of NMOC entering control device

$\text{NMOC}_{\text{OUT}}$  = mass of NMOC exiting control device

Prior Effective Dates: 1/31/98, 11/16/99

3745-76-10      **Compliance provisions.**

[Comment: For dates of non-regulatory government publications, publications of recognized organizations and associations, federal rules, and federal statutory provisions referenced in this rule, see the last paragraph of rule 3745-76-01 of the Administrative Code titled "Incorporation by reference."]

(A) Except as provided in paragraph (B)(2)(a)(ii) of rule 3745-76-07 of the Administrative Code, the specified methods in paragraphs (A)(1) to (A)(6) of this rule shall be used to determine whether the gas collection system is in compliance with paragraph (B)(2)(b) of rule 3745-76-07 of the Administrative Code.

(1) For the purposes of calculating the maximum expected gas generation flow rate from the landfill to determine compliance with paragraph (B)(2)(b)(i)(a) of rule 3745-76-07 of the Administrative Code, one of the following equations shall be used. The  $k$  and  $L_0$  kinetic factors should be those published in the most recent "Compilation of Air Pollutant Emission Factors (AP-42)" or other site specific values demonstrated to be appropriate and approved by the director. If  $k$  has been determined as specified in paragraph (A)(4) of rule 3745-76-09 of the Administrative Code, the value of  $k$  determined from the test shall be used. A value of no more than fifteen years shall be used for the intended use period of the gas mover equipment. The active life of the landfill is the age of the landfill plus the estimated number of years until closure.

(a) For sites with unknown year-to-year solid waste acceptance rate:

$$Q_M = 2L_0R (e^{-kc} - e^{-kt})$$

Where,

$Q_M$  = maximum expected gas generation flow rate, cubic meters per year

$L_0$  = methane generation potential, cubic meters per megagram solid waste

$R$  = average annual acceptance rate, megagrams per year

$k$  = methane generation rate constant, year<sup>-1</sup>

$t$  = age of the landfill at equipment installation plus the time the owner or operator intends to use the gas mover equipment or active life of the landfill, whichever is less. If the equipment is installed after closure,  $t$  is the age of the landfill at installation, years

$c$  = time since closure, years (for an active landfill  $c = 0$  and  $e^{-kc} = 1$ )

(b) For sites with known year-to-year solid waste acceptance rate:

$$Q_M = \sum_{i=1}^n 2kL_o M_i (e^{-kt_i})$$

Where,

$Q_M$  = maximum expected gas generation flow rate, cubic meters per year

$k$  = methane generation rate constant, year<sup>-1</sup>

$L_o$  = methane generation potential, cubic meters per megagram solid waste

$M_i$  = mass of solid waste in the  $i^{\text{th}}$  section, megagrams

$t_i$  = age of the  $i^{\text{th}}$  section, years

- (c) If a collection and control system has been installed, actual flow data may be used to project the maximum expected gas generation flow rate instead of, or in conjunction with, the equations in paragraph (A)(1)(a) and paragraph (A)(1)(b) of this rule. If the landfill is still accepting waste, the actual measured flow data will not equal the maximum expected gas generation rate, so calculations using the equations in paragraph (A)(1)(a) or (A)(1)(b) of this rule or other methods shall be used to predict the maximum expected gas generation rate over the intended period of use of the gas control system equipment.
- (2) For the purposes of determining sufficient density of gas collectors for compliance with paragraph (B)(2)(b)(i)(b) of rule 3745-76-07 of the Administrative Code, the owner or operator shall design a system of vertical wells, horizontal collectors, or other collection devices, satisfactory to the director, capable of controlling and extracting gas from all portions of the landfill sufficient to meet all operational and performance standards.
- (3) For the purpose of demonstrating whether the gas collection system flow rate is sufficient to determine compliance with paragraph (B)(2)(b)(i)(c) of rule 3745-76-07 of the Administrative Code, the owner or operator shall measure gauge pressure in the gas collection header at each individual well, monthly. If a positive pressure exists, action shall be initiated to correct the exceedance within five calendar days, except for the three conditions allowed under paragraph (B) of rule 3745-76-08 of the Administrative Code. If negative pressure cannot be achieved without excess air infiltration within fifteen calendar days of the first measurement, the gas collection system shall be expanded to correct the exceedance within one hundred twenty days of the initial measurement of positive pressure. Any attempted corrective measure shall not cause exceedances

of other operational or performance standards. An alternative timeline for correcting the exceedance may be submitted to the Director for approval.

- (4) Owners or operators are not required to expand the system as required in paragraph (A)(3) of this rule during the first one hundred eighty days after gas collection system start-up.
  - (5) For the purpose of identifying whether excess air infiltration into the landfill is occurring, the owner or operator shall monitor each well monthly for temperature and nitrogen or oxygen as provided in paragraph (C) of rule 3745-76-08 of the Administrative Code. If a well exceeds one of these operating parameters, action shall be initiated to correct the exceedance within five calendar days. If correction of the exceedance cannot be achieved within fifteen calendar days of the first measurement, the gas collection system shall be expanded to correct the exceedance within one hundred twenty days of the initial exceedance. Any attempted corrective measure shall not cause exceedances of other operational or performance standards. An alternative timeline for correcting the exceedance may be submitted to the Director for approval.
  - (6) An owner or operator seeking to demonstrate compliance with paragraph (B)(2)(b)(i)(d) of rule 3745-76-07 of the Administrative Code through the use of a collection system not conforming to the specifications provided in rule 3745-76-14 of the Administrative Code shall provide information satisfactory to the director as specified in paragraph (B)(2)(a)(iii) of rule 3745-76-07 of the Administrative Code demonstrating that off-site migration is being controlled.
- (B) For purposes of compliance with paragraph (A) of rule 3745-76-08 of the Administrative Code, each owner or operator of a controlled landfill shall place each well or design component as specified in the approved design plan as provided in paragraph (B)(2)(a) of rule 3745-76-07 of the Administrative Code. Each well shall be installed no later than sixty days after the date on which the initial solid waste has been in place for a period of:
- (1) Five years or more if active; or
  - (2) Two years or more if closed or at final grade.
- Each well shall be installed as a measure to abate or minimize the migration of explosive gas when the director orders the owner or operator to perform such measures pursuant to paragraph (O) of rule 3745-76-12 of the Administrative Code.
- (C) The following procedures shall be used for compliance with the surface methane operational standard as provided in paragraph (D) of rule 3745-76-08 of the Administrative Code.

- (1) After installation of the collection system, the owner or operator shall monitor surface concentrations of methane along the entire perimeter of the collection area and along a pattern that traverses the landfill at thirty meter intervals (or a site-specific established spacing) for each collection area on a quarterly basis using an organic vapor analyzer, flame ionization detector, or other portable monitor meeting the specifications provided in paragraph (D) of this rule.
- (2) The background concentration shall be determined by moving the probe inlet upwind and downwind outside the boundary of the landfill at a distance of at least thirty meters from the perimeter wells.
- (3) Surface emission monitoring shall be performed in accordance with section 8.3.1 of Method 21 of Appendix A of 40 CFR Part 60, except that the probe inlet shall be placed within five to ten centimeters of the ground. Monitoring shall be performed during typical meteorological conditions.
- (4) Any reading of five hundred parts per million or more above background at any location shall be recorded as a monitored exceedance and the actions specified in paragraphs (C)(4)(a) to (C)(4)(e) of this rule shall be taken. As long as the specified actions are taken, the exceedance is not a violation of the operational requirements of paragraph (D) of rule 3745-76-08 of the Administrative Code.
  - (a) The location of each monitored exceedance shall be marked and the location recorded.
  - (b) Cover maintenance or adjustments to the vacuum of the adjacent wells to increase the gas collection in the vicinity of each exceedance shall be made and the location shall be re-monitored within ten calendar days of detecting the exceedance.
  - (c) If the re-monitoring of the location shows a second exceedance, additional corrective action shall be taken and the location shall be monitored again within ten days of the second exceedance. If the re-monitoring shows a third exceedance for the same location, the action specified in paragraph (C)(4)(e) of this rule shall be taken, and no further monitoring of that location is required until the action specified in paragraph (C)(4)(e) of this rule has been taken.
  - (d) Any location that initially showed an exceedance but has a methane concentration less than five hundred parts per million methane above background at the ten-day re-monitoring specified in paragraph (C)(4)(b) or (C)(4)(c) of this rule shall be re-monitored one month from the initial exceedance. If the one-month re-monitoring shows a concentration less than five hundred parts per million above background, no further monitoring of that location is required until the next quarterly monitoring period. If the

one-month re-monitoring shows an exceedance, the actions specified in paragraph (C)(4)(c) or (C)(4)(e) of this rule shall be taken.

- (e) For any location where monitored methane concentration equals or exceeds five hundred parts per million above background three times within a quarterly period, a new well or other collection device shall be installed within one hundred twenty calendar days of the initial exceedance. An alternative remedy to the exceedance, such as upgrading the blower, header pipes or control device, and a corresponding timeline for installation may be submitted to the director for approval.
- (5) The owner or operator shall implement a program to monitor for cover integrity and implement cover repairs as necessary on a monthly basis, and as specified in paragraph (E)(12) of rule 3745-27-19 of the Administrative Code and paragraph (A) of rule 3745-27-14 of the Administrative Code.
- (D) Each owner or operator seeking to comply with the provisions in paragraph (C) of this rule shall comply with the following instrumentation specifications and procedures for surface emission monitoring devices:
- (1) The portable analyzer shall meet the instrument specifications provided in section 6 of Method 21 of Appendix A of 40 CFR Part 60, except that "methane" shall replace all references to VOC.
  - (2) The calibration gas shall be methane, diluted to a nominal concentration of five hundred parts per million in air.
  - (3) To meet the performance evaluation requirements in section 6 of Method 21 of Appendix A of 40 CFR Part 60, the instrument evaluation procedures of section 8.1 of Method 21 of Appendix A of 40 CFR Part 60 shall be used.
  - (4) The calibration procedures provided in section 8.1.1.1 of Method 21 of Appendix A of 40 CFR Part 60 shall be followed immediately before commencing a surface monitoring survey.
- (E) The provisions of this rule apply at all times, except during periods of start-up, shutdown, or malfunction, provided that the duration of start-up, shutdown, or malfunction shall not exceed five days for collection systems and shall not exceed one hour for treatment or control devices.

3745-76-11      **Monitoring of operations.**

Except as provided in paragraph (B)(2)(a)(ii) of rule 3745-76-07 of the Administrative Code,

(A) Each owner or operator seeking to comply with paragraph (B)(2)(b)(i) of rule 3745-76-07 of the Administrative Code for an active gas collection system shall install a sampling port and a thermometer, other temperature measuring device, or an access port for temperature measurements at each wellhead and:

- (1) Measure the gauge pressure in the gas collection header on a monthly basis as provided in paragraph (A)(3) of rule 3745-76-10 of the Administrative Code; and
- (2) Monitor nitrogen or oxygen concentration in the landfill gas on a monthly basis as provided in paragraph (A)(5) of rule 3745-76-10 of the Administrative Code; and
- (3) Monitor temperature of the landfill gas on a monthly basis as provided in paragraph (A)(5) of rule 3745-76-10 of the Administrative Code.

(B) Each owner or operator seeking to comply with paragraph (B)(2)(c) of rule 3745-76-07 of the Administrative Code using an enclosed combustor shall calibrate, maintain, and operate according to the manufacturer's specifications, the following equipment.

- (1) A temperature monitoring device equipped with a continuous recorder and having a minimum accuracy of plus or minus one percent of the temperature being measured expressed in degrees Celsius or plus or minus 0.5 degrees Celsius, whichever is greater. A temperature monitoring device is not required for boilers or process heaters with design heat input capacity equal to or greater than forty four megawatts.
- (2) A device that records flow to or bypass of the control device. The owner or operator shall either:
  - (a) Install, calibrate, and maintain a gas flow rate measuring device that shall record the flow to the control device at least every fifteen minutes; or
  - (b) Secure the bypass line valve in the closed position with a car-seal or a lock-and-key type configuration. A visual inspection of the seal or closure mechanism shall be performed at least once every month to ensure that the valve is maintained in the closed position and that the gas flow is not diverted through the bypass line.

- (C) Each owner or operator seeking to comply with paragraph (B)(2)(c) of rule 3745-76-07 of the Administrative Code using an open flare shall install, calibrate, maintain, and operate according to the manufacturer's specifications the following equipment:
- (1) A heat sensing device, such as an ultraviolet beam sensor or thermocouple, at the pilot light or the flame itself to indicate the continuous presence of a flame.
  - (2) A device that records flow to or bypass of the flare. The owner or operator shall either:
    - (a) Install, calibrate, and maintain a gas flow rate measuring device that shall record the flow to the control device at least every fifteen minutes; or
    - (b) Secure the bypass line valve in the closed position with a car-seal or a lock-and-key type configuration. A visual inspection of the seal or closure mechanism shall be performed at least once every month to ensure that the valve is maintained in the closed position and that the gas flow is not diverted through the bypass line.
- (D) Each owner or operator seeking to demonstrate compliance with paragraph (B)(2)(c) of rule 3745-76-07 of the Administrative Code using a device other than an open flare or an enclosed combustor shall provide information satisfactory to the director as provided in paragraph (B)(2)(a)(ii) of rule 3745-76-07 of the Administrative Code describing the operation of the control device, the operating parameters that would indicate proper performance, and appropriate monitoring procedures. The director shall review the information and either approve it, or request that additional information be submitted. The director may specify additional appropriate monitoring procedures.
- (E) Each owner or operator seeking to install a collection system that does not meet the specifications in rule 3745-76-14 of the Administrative Code or seeking to monitor alternative parameters to those required by rule 3745-76-08 to rule 3745-76-11 of the Administrative Code shall provide information satisfactory to the director as provided in paragraph (B)(2)(a)(ii) of rule 3745-76-07 of the Administrative Code and paragraph (B)(2)(a)(iii) of rule 3745-76-07 of the Administrative Code describing the design and operation of the collection system, the operating parameters that would indicate proper performance, and appropriate monitoring procedures. The director may specify additional appropriate monitoring procedures.
- (F) Each owner or operator seeking to demonstrate compliance with paragraph (C) of rule 3745-76-10 of the Administrative Code, shall monitor surface concentrations of methane according to the instrument specifications and procedures provided in paragraph (D) of rule 3745-76-10 of the Administrative Code. Any closed landfill that has no monitored exceedances of the operational standard in three consecutive quarterly monitoring periods may skip to annual monitoring. Any methane reading

of five hundred parts per million or more above background detected during the annual monitoring returns the frequency for that landfill to quarterly monitoring.

3745-76-12      **Reporting requirements.**

[Comment: For dates of non-regulatory government publications, publications of recognized organizations and associations, federal rules, and federal statutory provisions referenced in this rule, see the last paragraph of rule 3745-76-01 of the Administrative Code titled "Incorporation by reference."]

Except as provided in paragraph (B)(2)(a)(ii) of rule 3745-76-07 of the Administrative Code,

(A) Each owner or operator subject to the requirements of this chapter shall submit or shall have submitted an initial design capacity report to the director.

(1) The initial design capacity report shall contain the date construction commenced and the date of initial waste placement, if applicable.

(2) The initial design capacity report shall contain the following information:

(a) A map or plot of the landfill, providing the size and location of the landfill, and identifying all areas where solid waste may be landfilled according to the permit issued by the director.

(b) The maximum design capacity of the landfill. Where the maximum design capacity is specified in the permit issued by the director, a copy of the permit specifying the maximum design capacity may be submitted as part of the report. If the maximum design capacity of the landfill is not specified in the permit, the maximum design capacity shall be calculated using good engineering practices. The calculations shall be provided, along with the relevant parameters as part of the report. The director may request other reasonable information as may be necessary to verify the maximum design capacity of the landfill.

(3) An amended design capacity report shall be submitted to the director providing notification of any increase in the design capacity of the landfill, within ninety days of an increase in the maximum design capacity of the landfill to or above 2.5 million megagrams and 2.5 million cubic meters. This increase in design capacity may result from an increase in permitted volume of the landfill or an increase in the density as documented in the annual recalculation required under paragraph (F) of rule 3745-76-13 of the Administrative Code. Any expansion of the landfill shall be deemed a modification, which shall cause the landfill to become subject to the new source performance standards in 40 CFR Part 60, Subpart WWW.

(B) Each owner or operator subject to the requirements of this chapter shall submit an NMOC emission rate report to the director initially and annually thereafter, except as

provided for in paragraph (B)(1)(b) or (B)(3) of this rule. The director may request such additional information as may be necessary to verify the reported NMOC emission rate.

- (1) The NMOC emission rate report shall contain an annual or five-year estimate of the NMOC emission rate calculated using the formula and procedures provided in paragraph (A) or (B) of rule 3745-76-09 of the Administrative Code, as applicable.
    - (a) The initial NMOC emission rate report may be combined with the initial design capacity report required in paragraph (A) of this rule. Subsequent NMOC emission rate reports shall be submitted annually thereafter, except as provided for in paragraphs (B)(1)(b) and (B)(3) of this rule.
    - (b) If the estimated NMOC emission rate as reported in the annual report to the director is less than fifty megagrams per year in each of the next five consecutive years, the owner or operator may elect to submit an estimate of the NMOC emission rate for the next five-year period in lieu of the annual report. This estimate shall include the current amount of solid waste-in-place and the estimated waste acceptance rate for each year of the five years for which an NMOC emission rate is estimated. All data and calculations upon which this estimate is based shall be provided to the director. This estimate shall be revised at least once every five years. If the actual waste acceptance rate exceeds the estimated waste acceptance rate in any year reported in the five-year estimate, a revised five-year estimate shall be submitted to the director. The revised estimate shall cover the five-year period beginning with the year in which the actual waste acceptance rate exceeded the estimated waste acceptance rate.
  - (2) The NMOC emission rate report shall include all the data, calculations, sample reports and measurements used to estimate the annual or five-year emissions.
  - (3) Each owner or operator subject to the requirements of this chapter is exempted from the requirements of paragraphs (B)(1) and (B)(2) of this rule, after the installation of a collection and control system in compliance with paragraph (B)(2) of rule 3745-76-07 of the Administrative Code, during such time as the collection and control system is in operation and in compliance with rule 3745-76-08 and rule 3745-76-10 of the Administrative Code.
- (C) Each owner or operator subject to the provisions of paragraph B)(2)(a) of rule 3745-76-07 of the Administrative Code shall submit a collection and control system design plan to the director within one year of the first report, required under paragraph (B) of this rule, in which the emission rate exceeds fifty megagrams per year, except as follows:

- (1) If the owner or operator elects to recalculate the NMOC emission rate after Tier 2 NMOC sampling and analysis as provided in paragraph (A)(3) of rule 3745-76-09 of the Administrative Code and the resulting rate is less than fifty megagrams per year, annual periodic reporting shall be resumed, using the Tier 2 determined site-specific NMOC concentration, until the calculated emission rate is equal to or greater than fifty megagrams per year or the landfill is closed. The revised NMOC emission rate report, with the recalculated emission rate based on NMOC sampling and analysis, shall be submitted within one hundred eighty days of the first calculated exceedance of fifty megagrams per year.
  - (2) If the owner or operator elects to recalculate the NMOC emission rate after determining a site-specific methane generation rate constant (k), as provided in Tier 3 in paragraph (A)(4) of rule 3745-76-09 of the Administrative Code, and the resulting NMOC emission rate is less than fifty megagrams per year, annual periodic reporting shall be resumed. The resulting site-specific methane generation rate constant (k) shall be used in the emission rate calculation until such time as the emissions rate calculation results in an exceedance. The revised NMOC emission rate report based on the provisions of paragraph (A)(4) of rule 3745-76-09 of the Administrative Code and the resulting site-specific methane generation rate constant (k) shall be submitted to the director within one year of the first calculated emission rate exceeding fifty megagrams per year.
- (D) Each owner or operator of a controlled landfill shall submit a closure report to the director within thirty days of waste acceptance cessation. The director may request additional information as may be necessary to verify that permanent closure has taken place in accordance with 40 CFR 258.60. If a closure report has been submitted to the director, no additional wastes may be placed into the landfill without filing a notification of modification. The landfill owner or operator shall also meet the notification requirements for landfill closure contained in paragraph (E) of rule 3745-27-11 of the Administrative Code.
- (E) Each owner or operator of a controlled landfill shall submit an equipment removal report to the director thirty days prior to removal or cessation of operation of the control equipment.
- (1) The equipment removal report shall contain all of the following items:
    - (a) A copy of the closure report submitted in accordance with paragraph (D) of this rule;
    - (b) A copy of the initial performance test report demonstrating that the fifteen year minimum control period has expired; and
    - (c) Dated copies of three successive NMOC emission rate reports demonstrating that the landfill is no longer producing fifty megagrams or greater of NMOC per year.

- (2) The director may request such additional information as may be necessary to verify that all of the conditions for removal in paragraph (B)(2)(e) of rule 3745-76-07 of the Administrative Code have been met.
- (F) Each owner or operator of a landfill seeking to comply with paragraph (B)(2) of rule 3745-76-07 of the Administrative Code using an active collection system designed in accordance with paragraph (B)(2)(b) of rule 3745-76-07 of the Administrative Code shall submit to the director annual reports of the recorded information in paragraphs (F)(1) to (F)(6) of this rule. The initial annual report shall be submitted within one hundred eighty days of installation and start-up of the collection and control system, and shall include the initial performance test report for enclosed combustion devices and flares. Reportable exceedances are defined under paragraph (C) of rule 3745-76-13 of the Administrative Code.
- (1) Value and length of time for exceedance of applicable parameters monitored under paragraphs (A), (B), (C), and (D) of rule 3745-76-11 of the Administrative Code.
  - (2) Description and duration of all periods when the gas stream is diverted from the control device through a bypass line or the indication of bypass flow as specified under rule 3745-76-11 of the Administrative Code.
  - (3) Description and duration of all periods when the control device was not operating for a period exceeding one hour and length of time the control device was not operating.
  - (4) All periods when the collection system was not operating in excess of five days.
  - (5) The location of each exceedance of the five hundred parts per million methane concentration as provided in paragraph (D) of rule 3745-76-08 of the Administrative Code and the concentration recorded at each location for which an exceedance was recorded in the previous month.
  - (6) The date of installation and the location of each well or collection system expansion added pursuant to paragraphs (A)(3), (B), and (C)(4) of rule 3745-76-10 of the Administrative Code.
- (G) Each owner or operator seeking to comply with paragraph (B)(2)(c) of rule 3745-76-07 of the Administrative Code shall include the following information with the initial performance test report as specified in paragraph (B)(2)(c)(ii) of rule 3745-76-07 of the Administrative Code:
- (1) A diagram of the collection system showing collection system positioning including all wells, horizontal collectors, surface collectors, or other gas

extraction devices, including the locations of any areas excluded from collection and the proposed sites for the future collection system expansion;

- (2) The data upon which the sufficient density of wells, horizontal collectors, surface collectors, or other gas extraction devices and the gas mover equipment sizing are based;
- (3) The documentation of the presence of asbestos or nondegradable material for each area from which collection wells have been excluded based on the presence of asbestos or nondegradable material;
- (4) The sum of the gas generation flow rates for all areas from which collection wells have been excluded based on nonproductivity and the calculations of gas generation flow rate for each excluded area;
- (5) The provisions for increasing gas mover equipment capacity with increased gas generation flow rate, if the present gas mover equipment is inadequate to move the maximum flow rate expected over the life of the landfill; and
- (6) The provisions for the control of off-site migration.

3745-76-13      **Recordkeeping requirements.**

- (A) Except as provided in paragraph (B)(2)(a)(ii) of rule 3745-76-07 of the Administrative Code, each owner or operator of an MSW landfill subject to the provisions of paragraph (B) of rule 3745-76-07 of the Administrative Code shall keep for at least five years up-to-date, readily accessible, on-site records of the design capacity report which triggered paragraph (B) of rule 3745-76-07 of the Administrative Code, the current amount of solid waste in-place, and the year-by-year waste acceptance rate. Off-site records may be maintained if they are retrievable within four hours. Either paper copy or electronic formats are acceptable.
  
- (B) Except as provided in paragraph (B)(2)(a)(ii) of rule 3745-76-07 of the Administrative Code, each owner or operator of a controlled landfill shall keep up-to-date, readily accessible records for the life of the control equipment of the data listed in paragraphs (B)(1) to (B)(4) of this rule as measured during the initial performance test or compliance determination. Records of subsequent tests or monitoring shall be maintained for a minimum of five years. Records of the control device vendor specifications shall be maintained until removal.
  - (1) Where an owner or operator subject to the provisions of this chapter seeks to demonstrate compliance with paragraph (B)(2)(b) of rule 3745-76-07 of the Administrative Code:
    - (a) The maximum expected gas generation flow rate as calculated in paragraph (A)(1) of rule 3745-76-10 of the Administrative Code. The owner or operator may use another method to determine the maximum gas generation flow rate, if the method has been approved by the director.
    - (b) The density of wells, horizontal collectors, surface collectors, or other gas extraction devices determined using the procedures specified in paragraph (A)(1) of rule 3745-76-14 of the Administrative Code.
  - (2) Where an owner or operator subject to the provisions of this chapter seeks to demonstrate compliance with paragraph (B)(2)(c) of rule 3745-76-07 of the Administrative Code through use of an enclosed combustion device other than a boiler or process heater with a design heat input capacity greater than forty four megawatts:
    - (a) The average combustion temperature measured at least every fifteen minutes and averaged over the same time period of the performance test.
    - (b) The percent reduction of NMOC determined as specified in paragraph (B)(2)(c)(ii) of rule 3745-76-07 of the Administrative Code achieved by the control device.

- (3) Where an owner or operator subject to the provisions of this chapter seeks to demonstrate compliance with paragraph (B)(2)(c)(ii)(a) of rule 3745-76-07 of the Administrative Code through use of a boiler or process heater of any size: a description of the location at which the collected gas vent stream is introduced into the boiler or process heater over the same time period of the performance testing.
  - (4) Where an owner or operator subject to the provisions of this chapter seeks to demonstrate compliance with paragraph (B)(2)(c)(i) of rule 3745-76-07 of the Administrative Code through use of an open flare, the flare type (i.e., steam-assisted, air-assisted, or nonassisted), all visible emission readings, heat content determination, flow rate or bypass flow rate measurements, and exit velocity determinations made during the performance test as specified in rule 3745-76-15 of the Administrative Code; continuous records of the flare pilot flame or flare flame monitoring and records of all periods of operations during which the pilot flame of the flare flame is absent.
- (C) Except as provided in paragraph (B)(2)(a)(ii) of rule 3745-76-07 of the Administrative Code, each owner or operator of a controlled landfill subject to the provisions of this chapter shall keep for five years up-to-date, readily accessible continuous records of the equipment operating parameters specified to be monitored in rule 3745-76-11 of the Administrative Code as well as up-to-date, readily accessible records for periods of operation during which the parameter boundaries established during the most recent performance test are exceeded.
- (1) The following constitute exceedances that shall be recorded and reported under paragraph (F) of rule 3745-76-12 of the Administrative Code:
    - (a) For enclosed combustors except for boilers and process heaters with design heat input capacity of forty four megawatts (one hundred fifty million British Thermal Units per hour) or greater, all three-hour periods of operation during which the average combustion temperature was more than twenty eight degrees centigrade below the average combustion temperature during the most recent performance test at which compliance with paragraph (B)(2)(c) of rule 3745-76-07 of the Administrative Code was determined.
    - (b) For boilers or process heaters, whenever there is a change in the location at which the vent stream is introduced into the flame zone as required under paragraph (B)(3) of this rule.
  - (2) Each owner or operator subject to the provisions of this chapter shall keep up-to-date, readily accessible continuous records of the indication of flow to the control device or the indication of bypass flow or records of monthly inspections of car-seals or lock-and-key configurations used to seal bypass lines, specified under rule 3745-76-11 of the Administrative Code.

- (3) Each owner or operator subject to the provisions of this chapter who uses a boiler or process heater with a design heat input capacity of forty four megawatts or greater to comply with paragraph (B)(2)(c) of rule 3745-76-07 of the Administrative Code shall keep an up-to-date, readily accessible record of all periods of operation of the boiler or process heater. (Examples of such records could include records of steam use, fuel use, or monitoring data collected pursuant to a permit or other state, local, or federal regulatory requirements.)
  - (4) Each owner or operator seeking to comply with the provisions of this chapter by use of an open flare shall keep up-to-date, readily accessible continuous records of the flame or flare pilot flame monitoring specified under paragraph (C) of rule 3745-76-11 of the Administrative Code, and up-to-date, readily accessible records of all periods of operation in which the flame or flare pilot flame is absent.
- (D) Except as provided in paragraph (B)(2)(a)(ii) of rule 3745-76-07 of the Administrative Code, each owner or operator subject to the provisions of this chapter shall keep for the life of the collection system an up-to-date, readily accessible plot map showing each existing and planned collector in the system and providing a unique identification location label for each collector.
- (1) Each owner or operator subject to the provisions of this chapter shall keep up-to-date, readily accessible records of the installation date and location of all newly installed collectors as specified under paragraph (B) of rule 3745-76-10 of the Administrative Code.
  - (2) Each owner or operator subject to the provisions of this chapter shall keep readily accessible documentation of the nature, date of deposition, amount, and location of asbestos-containing or nondegradable waste excluded from collection as provided in paragraph (A)(3)(a) of rule 3745-76-14 of the Administrative Code as well as any nonproductive areas excluded from collection as provided in paragraph (A)(3)(b) of rule 3745-76-14 of the Administrative Code.
- (E) Except as provided in paragraph (B)(2)(a)(ii) of rule 3745-76-07 of the Administrative Code, each owner or operator subject to the provisions of this chapter shall keep for at least five years up-to-date, readily accessible records of all collection and control system exceedances of the operational standards in rule 3745-76-08 of the Administrative Code, the reading in the subsequent month whether or not the second reading is an exceedance, and the location of each exceedance.
- (F) Landfill owners or operators who convert design capacity from volume to mass or mass to volume to demonstrate that landfill design capacity is less than 2.5 million megagrams or 2.5 million cubic meters, as provided in the definition of "design capacity", shall keep readily accessible, on site records of the annual recalculation of site-specific density, design capacity, and the supporting documentation. Off site

records may be maintained if they are retrievable within four hours. Either paper copy or electronic formats are acceptable.

**Specifications for active collection systems.**

- (A) Each owner or operator seeking to comply with paragraph (B)(2)(a) of rule 3745-76-07 of the Administrative Code shall site active collection wells, horizontal collectors, surface collectors, or other extraction devices at a sufficient density throughout all gas producing areas using the following procedures unless alternative procedures have been approved by the director as provided in paragraph (B)(2)(a)(iii) of rule 3745-76-07 of the Administrative Code and paragraph (B)(2)(a)(iv)) of rule 3745-76-07 of the Administrative Code:
- (1) The collection devices within the interior and along the perimeter areas shall be certified to achieve comprehensive control of surface gas emissions by a professional engineer. The following issues shall be addressed in the design: depths of refuse, refuse gas generation rates and flow characteristics, cover properties, gas system expandibility, leachate and condensate management, accessibility, compatibility with filling operations, integration with closure end use, air intrusion control, corrosion resistance, fill settlement, resistance to the refuse decomposition heat, and maintenance of the integrity of the final cover around each well.
  - (2) The sufficient density of gas collection devices determined in paragraph (A)(1) of this rule shall address landfill gas migration issues and augmentation of the collection system through the use of active or passive systems at the landfill perimeter or exterior.
  - (3) The placement of gas collection devices determined in paragraph (A)(1) of this rule shall control all gas producing areas, except as provided by paragraphs (A)(3)(a) and (A)(3)(b) of this rule.
    - (a) Any segregated area of asbestos or nondegradable material may be excluded from collection if documented as provided under paragraph (D) of rule 3745-76-13 of the Administrative Code. The documentation shall provide the nature, date of deposition, location and amount of asbestos or nondegradable material deposited in the area, and shall be provided to the director upon request.
    - (b) Any nonproductive area of the landfill may be excluded from control, provided that the total of all excluded areas can be shown to contribute less than one percent of the total amount of NMOC emissions from the landfill. The amount, location, and age of the material shall be documented and provided to the director upon request. A separate NMOC emissions estimate shall be made for each section proposed for exclusion, and the sum of all such sections shall be compared to the NMOC emissions estimate for the entire landfill. Emissions from each section shall be computed using the following equation:

$$Q_i = 2kL_o M_i (e^{-kt_i})(C_{NMOC})(3.6 \times 10^{-9})$$

Where,

$Q_i$  = NMOC emission rate from the  $i^{\text{th}}$  section, megagrams per year

$k$  = methane generation rate constant, year<sup>-1</sup>

$L_o$  = methane generation potential, cubic meters per megagram solid waste

$M_i$  = mass of the degradable solid waste in the  $i^{\text{th}}$  section, megagram

$t_i$  = age of the solid waste in the  $i^{\text{th}}$  section, years

$C_{NMOC}$  = concentration of nonmethane organic compounds, parts per million by volume

$3.6 \times 10^{-9}$  = conversion factor

- (c) The values for  $k$ , and  $C_{NMOC}$  determined in field testing shall be used, if field testing has been performed in determining the NMOC emission rate or the radii of influence (the distance from the well center to a point in the landfill where the pressure gradient applied by the blower or compressor approaches zero). If field testing has not been performed, the default values for  $k$ ,  $L_o$ , and  $C_{NMOC}$  provided in paragraph (A)(1) of rule 3745-76-09 of the Administrative Code or the alternative values from paragraph (A)(5) of rule 3745-76-09 of the Administrative Code shall be used. The mass of nondegradable solid waste contained within the given section may be subtracted from the total mass of the section when estimating emissions provided the nature, location, age, and amount of the nondegradable material is documented as provided in paragraph (A)(3)(a) of this rule.
- (B) Each owner or operator seeking to comply with paragraph (B)(2)(a)(i) of rule 3745-76-07 of the Administrative Code shall construct the gas collection devices using the following equipment or procedures:
- (1) The landfill gas extraction components shall be constructed of polyvinyl chloride (PVC), high density polyethylene (HDPE) pipe, fiberglass, stainless steel, or other nonporous corrosion resistant material of suitable dimensions to: convey projected amounts of gases; withstand installation, static, and settlement forces; and withstand planned overburden or traffic loads. The collection system shall extend as necessary to comply with emission and migration standards. Collection devices such as wells and horizontal collectors shall be perforated to allow gas entry without head loss sufficient to impair performance across the

intended extent of control. Perforations shall be situated with regard to the need to prevent excessive air infiltration.

- (2) Vertical wells shall be placed so as not to endanger underlying liners and shall address the occurrence of water within the landfill. Holes and trenches constructed for piped wells and horizontal collectors shall be of sufficient cross-section so as to allow for their proper construction and completion including, for example, centering of pipes and placement of gravel backfill. Collection devices shall be designed so as not to allow indirect short circuiting of air into the cover or refuse into the collection system or gas into the air. Any gravel used around pipe perforations should be of a dimension so as not to penetrate or block perforations.
  - (3) Collection devices may be connected to the collection header pipes below or above the landfill surface. The connector assembly shall include a positive closing throttle valve, any necessary seals and couplings, access couplings and at least one sampling port. The collection devices shall be constructed of PVC, HDPE, fiberglass, stainless steel, or other nonporous material of suitable thickness.
- (C) Each owner or operator seeking to comply with paragraph (B)(2)(a)(i) of rule 3745-76-07 of the Administrative Code shall convey the landfill gas to a control system in compliance with paragraph (B)(2)(c) of rule 3745-76-07 of the Administrative Code through the collection header pipe(s). The gas mover equipment shall be sized to handle the maximum gas generation flow rate expected over the intended use period of the gas moving equipment using the following procedures:
- (1) For existing collection systems, the flow data shall be used to project the maximum flow rate. If no flow data exists, the procedures in paragraph (C)(2) of this rule shall be used.
  - (2) For new collection systems, the maximum flow rate shall be in accordance with paragraph (A)(1) of rule 3745-76-10 of the Administrative Code.

**3745-76-15 Flare requirements.**

[Comment: For dates of non-regulatory government publications, publications of recognized organizations and associations, federal rules, and federal statutory provisions referenced in this rule, see the last paragraph of rule 3745-76-01 of the Administrative Code titled "Incorporation by reference."]

**(A) General requirements**

- (1) Flares shall be designed for and operated with no visible emissions as determined by the methods specified in paragraph (D)(1) of this rule, except for periods not to exceed a total of five minutes during any two consecutive hours.
- (2) Flares shall be operated with a flame present at all times, as determined by the methods specified in paragraph (D)(2) of this rule.
- (3) Flares used to comply with provisions of this chapter shall be operated at all times when emissions may be vented to them.
- (4) Flares used to comply with this rule shall be steam-assisted, air-assisted, or nonassisted.

**(B)** The owner or operator shall either comply with the requirements for the heat content specifications and the maximum tip velocity in paragraphs (B)(1) of this rule or the requirements for nonassisted flares having a hydrogen content of 8.0 per cent or greater in paragraph (B)(2) of this rule:

**(1) Heat content and maximum tip velocity specifications**

- (a) Flares shall be used only with the net heating value of the gas being combusted being 11.2 megajoules per standard cubic meter (three hundred Btu per standard cubic foot) or greater if the flare is steam-assisted or air-assisted; or with the net heating value of the gas being combusted being 7.45 megajoules per standard cubic meter (two hundred Btu per standard cubic foot) or greater if the flare is nonassisted. The net heating value of the gas being combusted shall be determined by the methods specified in paragraph (D)(3) of this rule.
- (b) Steam-assisted and nonassisted flares shall be designed for and operated with an exit velocity less than 18.3 meters per second (sixty feet per second), as determined by the methods specified in paragraph (D)(4) of this rule, except as provided in paragraphs (B)(1)(c) and (B)(1)(d) of this rule.
- (c) If the net heating value of the gas being combusted is greater than 37.3 megajoules per standard cubic foot (one thousand Btu per standard cubic foot), steam-assisted and nonassisted flares can be designed for and operated with an exit velocity equal to or greater than 18.3 meters per

second (sixty feet per second) but less than one hundred and twenty-two meters per second (four hundred feet per second), as determined by the methods specified in paragraph (D)(4) of this rule.

- (d) Steam-assisted and nonassisted flares may be designed for and operated with an exit velocity less than that calculated for the velocity ( $V_{\max}$ ) below and less than one hundred and twenty two meters per second (four hundred feet per second). This maximum permitted velocity shall be calculated as follows:

$$\text{Log}_{10} (V_{\max}) = (H_T + 28.8)/31.7$$

where:

$V_{\max}$  = maximum permitted velocity, meters per second;

28.8 = constant;

31.7 = constant; and

$H_T$  = the net heating value as determined in paragraph (D)(3) of this rule.

The actual exit velocity of the flare shall be determined by the methods specified in paragraph (D)(4) of this rule.

- (e) Air-assisted flares shall be designed and operated with an exit velocity less than the velocity,  $V_{\max}$ , calculated as follows:

$$V_{\max} = 8.706 + 0.7084 (H_T)$$

where:

$V_{\max}$  = maximum permitted velocity, meters per second;

8.706 = constant;

0.7084 = constant; and

$H_T$  = the net heating value as determined in paragraph (D)(3) of this rule.

The actual exit velocity of the flare shall be determined by the methods specified in paragraph (D)(4) of this rule.

- (2) Nonassisted flares with a hydrogen content of at least eight per cent (by volume)

- (a) Nonassisted flares shall be used that have a diameter of three inches or greater, and a hydrogen content of 8.0 per cent (by volume), or greater, and shall be designed for and operated with an exit velocity of less than 37.2

meters per second (one hundred and twenty two feet per second) and less than the velocity,  $V_{\max}$ , as determined by the following equation:

$$V_{\max} = (X_{\text{H}_2} - K_1) K_2$$

Where:

$V_{\max}$  = maximum permitted velocity, meters per second;

$K_1$  = constant, 6.0 volume-per cent hydrogen;

$K_2$  = constant, 3.9 meters per second per volume-per cent hydrogen; and

$X_{\text{H}_2}$  = the volume-per cent of hydrogen, on a wet basis, as calculated by using the ASTM D1946-90.

The actual exit velocity of the flare shall be determined by the methods specified in paragraph (D)(4) of this rule.

(C) Owners or operators of flares used to comply with the provisions of this chapter shall monitor these control devices to ensure that they are operated and maintained in conformance with their design. Monitoring and record keeping shall be maintained as required in paragraph (C)(4) of rule 3745-76-13 and paragraph (C) of rule 3745-76-11 of the Administrative Code.

(D) Compliance determination

- (1) Reference Method 22 shall be used to determine the compliance of flares with the visible emission provisions of this rule. An observation period of two hours shall be used in accordance with the requirements of Method 22.
- (2) The presence of a flare pilot flame shall be monitored using a thermocouple or other equivalent device to detect the presence of a flame.
- (3) The net heating value of the gas being combusted in a flare shall be calculated using the following equation:

$$H_T = k \sum_{i=1}^n C_i H_i$$

Where:

$k$  = constant,  $1.740 \times 10^{-7}$  (megajoule-gram mole per parts per million-standard cubic meter-kilocalorie), where the standard temperature for ( gram mole per standard cubic meter ) is twenty degrees Celsius;

$H_T$  = net heating value of the sample, megajoules per standard cubic meter; where the net enthalpy per mole of offgas is based on combustion at twenty five degrees Celsius and seven hundred sixty millimeters of mercury, but the standard temperature for determining the volume corresponding to one mole is twenty degrees Celsius;

$C_i$  = concentration of sample component  $i$  in ppm on a wet basis, as measured for organics by Method 18 of Appendix A of 40 CFR Part 60 and measured for hydrogen and carbon monoxide by ASTM D1946- 90;

$H_i$  = net heat of combustion of sample component  $i$ , kilocalorie per gram mole at twenty five degrees Celsius and seven hundred sixty millimeters of mercury. The heats of combustion may be determined using ASTM D4809-95 if published values are not available or cannot be calculated.

- (4) The actual exit velocity of a flare shall be determined by dividing the volumetric flowrate (in units of standard temperature and pressure), as determined by Reference Methods 2, 2A, 2C, or 2D as appropriate; by the unobstructed (free) cross sectional area of the flare tip.

## **Chapter 3745-77: Title V Permit Rules**

*Contact:* Mike Ahern 614-644-3631  
Mike.Ahern@EPA.State.Oh.US

**3745-77-01 Definitions.**

[Comment: For dates of non-regulatory government publications, publications of recognized organizations and associations, federal rules, and federal statutory provisions referenced in this rule, see the "Referenced materials" section at the end of this rule.]

The following definitions shall apply to this chapter:

- (A) "Act" means the federal Clean Air Act, as defined in section 3704.01 of the Revised Code.
- (B) "Administrator" means the administrator of the United States environmental protection agency or the chief executive officer of any successor federal agency responsible for implementation of the Act.
- (C) "Administrative permit amendment" means a permit revision that:
  - (1) Corrects typographical errors;
  - (2) Identifies a change in the name, address, or phone number of any person identified in the permit, or provides a similar minor administrative change at the source;
  - (3) Requires more frequent monitoring or reporting by the permittee;
  - (4) Allows for a change in ownership or operational control of a source where the director determines that no other change in the permit is necessary, provided that a written agreement containing a specific date for transfer of permit responsibility, coverage, and liability between the current and new permittee has been submitted to the director;
  - (5) Incorporates into the Title V permit the federally enforceable requirements in a permit-to-install issued pursuant to Chapter 3745-31 of the Administrative Code provided that such permit-to-install was issued consistent with procedural requirements applicable to the change if it were subject to review as a Title V permit modification, and compliance requirements substantially equivalent to those contained in rule 3745-77-07 of the Administrative Code; or
  - (6) Incorporates any other type of change that the administrator has determined to be similar to those revisions set forth in paragraphs (C)(1) to (C)(4) of this rule.
- (D) "Affected source" shall have the meaning given to it in the regulations promulgated under Title IV of the act.
- (E) "Affected states" are all states:

- (1) Contiguous to Ohio, whose air quality may be affected by emissions from the facility seeking the Title V permit issuance, modification, or permit renewal being proposed; or
  - (2) That are within fifty miles of the permitted source.
- (F) "Affected unit" shall have the meaning given to it in the regulations promulgated under Title IV of the act:
- (G) "Agency" means the Ohio environmental protection agency or its director as the context or other law or rules may require.
- (H) "Applicable requirement" means all of the following federal requirements as they apply to emissions units in a Title V source subject to this chapter, including requirements that have been promulgated or approved by the administrator through rulemaking at the time of issuance but have future-effective compliance dates:
- (1) Any standard or other requirement provided for in the applicable implementation plan approved or promulgated by the administrator through rulemaking under Title I of the act that implements the relevant requirements of the act, including any revisions to that plan promulgated in 40 CFR Part 52;
  - (2) Any federally enforceable term or condition of any preconstruction permit issued pursuant to regulations approved or promulgated through rulemaking under Title I, including Parts C or D, of the act;
  - (3) Any standard or other requirement under Section 111 of the act, including Section 111(d);
  - (4) Any standard or other requirement under Section 112 of the act, including any requirement concerning accident prevention under Section 112(r)(7) of the act, provided however that the contents of a risk management plan required under Section 112(r) of the act need not be included in the Title V permit application or permit.
  - (5) Any standard or other requirement of the acid rain program under Title IV of the act or the regulations promulgated thereunder;
  - (6) Any requirements established pursuant to Section 114(a)(3) or Section 504(b) of the act;
  - (7) Any standard or other requirement governing solid waste incineration under Section 129 of the act;

- (8) Any standard or other requirement for consumer and commercial products under Section 183(e) of the act;
  - (9) Any standard or other requirement for tank vessels under Section 183(f) of the act;
  - (10) Any standard or other requirement of the program to control air pollution from outer continental shelf sources under Section 328 of the act;
  - (11) Any standard or other requirement of the regulations promulgated by the administrator to protect stratospheric ozone under Title VI of the act, unless the administrator has determined that such requirements need not be contained in a Title V permit; and
  - (12) Any national ambient air quality standard or increment or visibility requirement under Part C of Title I of the act, but only as it would apply to temporary sources permitted pursuant to Section 504(e) of the act.
- (I) "Applicable implementation plan" means the portion (or portions) of the state implementation plan, or most recent revision thereof, that has been approved under Section 110 of the act, or promulgated under Section 110(c) of the act.
- (J) "Approval of the Title V permit program" means the date that the Ohio Title V permit program has been given approval by the administrator pursuant to Section 502 of the act.
- (K) "Designated representative" shall have the meaning given to it in paragraph (26) of Section 402 of the act and the regulations promulgated thereunder.
- (L) "Director" means the director of environmental protection.
- (M) "Draft permit" means the version of a permit for which the director offers public participation under rule 3745-77-08 of the Administrative Code or affected state review under rule 3745-77-09 of the Administrative Code.
- (N) "Emissions allowable under the Title V permit" means a federally enforceable permit term or condition determined at issuance to be required by an applicable requirement that establishes an emissions limit (including a work practice standard) or a federally enforceable emissions cap that the source has assumed to avoid an applicable requirement to which the source would otherwise be subject.
- (O) "Emissions unit" means any part or activity of a stationary source that emits or has the potential to emit any regulated air pollutant or any pollutant listed under Section 112(b) of the act. The term is not meant to alter or affect the definition of the term "unit" for purposes of Title IV of the act.

- (P) "Equivalent alternative emission limit" means an emission limit, including operating restrictions, that meets the criteria of division (E) of section 3704.03 and division (K) of section 3704.036 of the Revised Code.
- (Q) "Facility" means all of the emitting activities that are located on contiguous or adjacent properties that are under the control of the same person or persons or under common control and that are in the same major group as described in the "Standard Industrial Classification Manual".
- (R) "FEPTIO" means federally enforceable permit-to-install and operate.
- (S) "Final permit" means the version of a Title V permit issued by the director for which all review procedures required by rule 3745-77-08 of the Administrative Code have been completed, or a Title V permit issued by the administrator pursuant to 40 CFR 70.8(C)(4).
- (T) "Fugitive emissions" are those emissions that could not reasonably pass through a stack, chimney, vent, or other functionally equivalent opening.
- (U) "General permit" means a Title V permit that meets the requirements of paragraph (D) of rule 3745-77-07 of the Administrative Code.
- (V) "Insignificant activities and emissions levels" means any of the following:
- (1) All source categories excluded from the requirements to obtain installation permits or operating permits under section 3704.011 of the Revised Code or Chapter 3745-15, 3745-31, or 3745-35 of the Administrative Code;
  - (2) All source categories specifically exempted under 40 CFR Part 70; or
  - (3) Any emission unit with uncontrolled potential emissions of five tons or less per year of any regulated air pollutant other than a hazardous air pollutant and not more than twenty per cent of an applicable major source threshold under the Act.
  - (4) Any research and development source that is by itself not a major source.
- (W) "Hazardous air pollutant" means any pollutant listed under Section 112(b) of the act.
- (X) "Major source" means any stationary source or any group of stationary sources that are located on one or more contiguous or adjacent properties and under common control of the same person (or persons under common control) belonging to a single major industry grouping and that are described in paragraph (X)(1), (X)(2), or (X)(3) of this rule. For the purposes of defining major source, a stationary source or group of stationary sources shall be considered part of a single industrial grouping if all of the pollutant emitting activities at such source or group of sources on

contiguous or adjacent properties belong to the same major group (i.e., all have the same two-digit code) as described in the "Standard Industrial Classification Manual".

- (1) A major source under Section 112 of the act, which is defined as:
  - (a) For pollutants other than radionuclides, any stationary source or group of stationary sources located within a contiguous area and under common control that emits or has the potential to emit, in the aggregate, ten TPY or more of any hazardous air pollutant, twenty-five TPY or more of any combination of hazardous air pollutants, or such lesser quantity as the administrator may establish by rule. Notwithstanding the preceding sentence, emissions from any oil or gas exploration or production well (with its associated equipment) and emissions from any pipeline compressor or pump station shall not be aggregated with emissions from other similar units, whether or not such units are in a contiguous area or under common control to determine whether such units or stations are major sources; or
  - (b) For radionuclides, major source shall have the meaning specified by the administrator by rule.
- (2) A major stationary source of air pollutants, as defined in Section 302 of the act, that directly emits or has the potential to emit, one hundred TPY or more of any air pollutant (including any major source of fugitive emissions of any such pollutant as determined by rule by the administrator). The fugitive emissions of a stationary source shall not be considered in determining whether it is a major stationary source for the purposes of Section 302(j) of the act, unless the source belongs to one of the following categories of stationary sources:
  - (a) Coal cleaning plants (with thermal dryers);
  - (b) Kraft pulp mills;
  - (c) Portland cement plants;
  - (d) Primary zinc smelters;
  - (e) Iron and steel mills;
  - (f) Primary aluminum ore reduction plants;
  - (g) Primary copper smelters;
  - (h) Municipal incinerators capable of charging more than two hundred fifty tons of refuse per day;
  - (i) Hydrofluoric, sulfuric, or nitric acid plants;

- (j) Petroleum refineries;
  - (k) Lime plants;
  - (l) Phosphate rock processing plants;
  - (m) Coke oven batteries;
  - (n) Sulfur recovery plants;
  - (o) Carbon black plants (furnace process);
  - (p) Primary lead smelters;
  - (q) Fuel conversion plants;
  - (r) Sintering plants;
  - (s) Secondary metal production plants;
  - (t) Chemical process plants except for ethanol production facilities that produce ethanol by natural fermentation included in NAICS codes 325193 or 312140;
  - (u) Fossil-fuel boilers (or combination thereof) totaling more than two hundred fifty million british thermal units per hour heat input;
  - (v) Petroleum storage and transfer units with a total storage capacity exceeding three hundred thousand barrels;
  - (w) Taconite ore processing plants;
  - (x) Glass fiber processing plants;
  - (y) Charcoal production plants;
  - (z) Fossil-fuel-fired steam electric plants of more than two hundred fifty million british thermal units per hour heat input; or
  - (aa) Any other stationary source categories that, as of August 7, 1980, are regulated by a standard promulgated under section 111 or 112 of the act.
- (3) A major stationary source as defined in Part D of Title I of the act, including:

- (a) For ozone nonattainment areas, sources with the potential to emit one hundred TPY or more of volatile organic compounds or oxides of nitrogen in areas classified as marginal or moderate, fifty TPY or more in areas classified as serious, twenty-five TPY or more in areas classified as severe, and ten TPY or more in areas classified as extreme; except that the references in this paragraph to one hundred, fifty, twenty-five, and ten TPY of nitrogen oxides shall not apply with respect to any source for which the administrator has made a finding, under Section 182(f)(1) or (2) of the act, that requirements under Section 182(f) of the act do not apply;
  - (b) For ozone transport regions established pursuant to Section 184 of the act, sources with the potential to emit fifty TPY or more of volatile organic compounds;
  - (c) For carbon monoxide nonattainment areas:
    - (i) That are classified as serious, and
    - (ii) In which stationary sources contribute significantly to carbon monoxide levels as determined under rules issued by the administrator, sources with the potential to emit fifty TPY or more of carbon monoxide; and
  - (d) For PM10 nonattainment areas classified as serious, sources with the potential to emit seventy TPY or more of PM10.
- (Y) "Non-major source" or "minor source" means any stationary source that does not meet the definition of major source as defined in this rule.
- (Z) "Part 70" or "part 70 regulations" means regulations promulgated by the administrator and published at 40 CFR Part 70.
- (AA) "Permit modification" means a revision to a Title V permit that meets the requirements of rule 3745-77-08 of the Administrative Code.
- (BB) "Permit revision" means any permit modification or administrative permit amendment.
- (CC) "Potential to emit" means the maximum capacity of a stationary source to emit any air pollutant under its physical and operational design. Any physical or operational limitation on the capacity of a source to emit an air pollutant, including air pollution control equipment and restrictions on hours of operation or on the type or amount of material combusted, stored, or processed, shall be treated as part of its design if the limitation or the effect it would have on emissions is federally enforceable or legally and practicably enforceable by the state. Secondary emissions do not count in determining the potential to emit of a stationary source.

(DD) "Proposed permit" means the version of a Title V permit that the director intends to issue and forwards to the administrator for review in compliance with rule 3745-77-08 of the Administrative Code. The preparation and forwarding of a proposed permit shall not constitute a proposed action or a final action of the director.

(EE) "PTIO" means permit-to-install and operate.

(FF) "Regulated air pollutant" means the following:

- (1) Nitrogen oxides or any volatile organic compounds;
- (2) Any pollutant for which a national ambient air quality standard has been promulgated;
- (3) Any pollutant subject to any standard promulgated under Section 111 of the act;
- (4) Any class I or II substance subject to a standard promulgated under or established by Title VI of the act; or
- (5) Any pollutant subject to a standard promulgated under Section 112 of the act or other requirement established under section 112 including Sections 112(g), (j), and (r) of the act, including the following; (a) any pollutant subject to requirements under Section 112(j) of the act. If the administrator fails to promulgate a standard by the date established pursuant to section 112(e) of the act, any pollutant for which a subject source would be major shall be considered to be regulated as to that source on the date eighteen months after the applicable date established pursuant to Section 112(e) of the act; and (b) any pollutant for which the requirements of Section 112(g)(2) of the act have been met, but only with respect to the individual source subject to Section 112(g)(2) of the act.

(GG) "Renewal" means the process by which a permit may be reissued at the end of its term.

(HH) "Research and development sources" shall have the same meaning as in section 3704.01 of the Revised Code.

(II) "Responsible official" means one of the following:

- (1) For a corporation: a president, secretary, treasurer, or vice-president of the corporation in charge of a principal business function, or any other person who performs similar policy or decision-making functions for the corporation, or a duly authorized representative of such person if the representative is responsible for the overall operation of one or more manufacturing, production, or operating facilities applying for or subject to a permit and either;

- (a) The facilities employ more than two hundred fifty persons or have gross annual sales or expenditures exceeding twenty five million dollars (in second quarter 1980 dollars); or
    - (b) The delegation of authority to such representatives is approved in advance by the director;
  - (2) For a partnership or sole proprietorship: a general partner or the proprietor, respectively;
  - (3) For a municipality or state, federal, or other public agency: either a principal executive officer or ranking elected official. For purposes of these regulations, a principal executive officer of a federal agency includes the chief executive officer having responsibility for the overall operations of a principal geographic unit of the agency (e.g., a regional administrator of the United States environmental protection agency); or
  - (4) For affected sources:
    - (a) The designated representative insofar as actions, standards, requirements, or prohibitions under Title IV of the act or the regulations promulgated thereunder are concerned; and
    - (b) The designated representative for any other purposes under these regulations.
- (JJ) "Significant emissions unit" means any air contaminant emission activity or emissions unit regulated pursuant to this chapter, but does not include air contaminant emission units or activities;
- (1) Described in paragraphs (V)(1) to (V)(4) of this rule; or
  - (2) Identified as trivial air contaminant emission activities for preparing Title V permit applications in Ohio environmental protection agency's "Engineering Guide 62."
- (KK) "Stationary source" or "source" means any building, structure, facility, or installation that emits or may emit any regulated air pollutant or any pollutant listed under Section 112(b) of the act.
- (LL) "Statement of basis" or "SOB" means a statement that sets forth the legal and factual basis for the draft permit conditions (including references to the applicable statutory or regulatory provisions).
- (MM) "Synthetic minor source" means a stationary source that would be classified as a major source in the absence of restrictions on the potential to emit of the source.

These restrictions include those that are federally enforceable and those that are legally and practicably enforceable by the state.

(NN) "Title I modification" or "modification under any provision of Title I of the act" means any modification under Sections 111 or 112 of the act and any major modification under Part C or D of Title I of the act.

(OO) "Title V permit" or "permit" (unless the context suggests otherwise) means any permit or group of permits covering a Title V source that is issued, renewed, amended, or modified pursuant to this chapter.

(PP) "Title V source" means any source subject to the permitting requirements of this chapter, as provided in rule 3745-77-02 of the Administrative Code.

(QQ) "TPY" means tons per year.

(RR) "Uncontrolled potential emissions" means the calculated annual emissions rate without any air pollution controls assuming twenty-four hours per day and three hundred sixty-five days per year of operation. If the emission unit has an inherent physical limitation, then the number of hours per day and days per year can be restricted to the maximum possible under the inherent physical limitation.

(SS) Referenced materials. This chapter includes references to certain matter or materials. The text of the referenced materials is not included in the rules contained in this chapter. Information on the availability of the referenced materials as well as the date of, and/or the particular edition or version of the material is included in this rule. For materials subject to change, only the specific versions specified in this rule are referenced. Material is referenced as it exists on the effective date of this rule. Except for subsequent annual publication of existing (unmodified) Code of Federal Regulation compilations, any amendment or revision to a referenced document is not applicable unless and until this rule has been amended to specify the new dates.

(1) Availability. The referenced materials are available as follows:

(a) Clean Air Act. Information and copies may be obtained by writing to: "Superintendent of Documents, Attn: New Orders, PO Box 371954, Pittsburgh, PA 15250-7954." The full text of the act as amended in 1990 is also available in electronic format at [www.epa.gov/oar/caa/](http://www.epa.gov/oar/caa/). A copy of the act is also available for inspection and copying at "The State Library of Ohio."

(b) Code of Federal Regulations. Information and copies may be obtained by writing to: "Superintendent of Documents, Attn: New Orders, PO Box 371954, Pittsburgh, PA 15250-7954." The full text of the CFR is also available in electronic format at [www.access.gpo.gov/nara/cfr/](http://www.access.gpo.gov/nara/cfr/). The CFR

compilations are also available for inspection and copying at most public libraries and "The State Library of Ohio."

- (c) Engineering guides. Information and copies may be obtained by writing to: "Ohio EPA Division of Air Pollution Control, PO Box 1049, Columbus, Ohio 43216-1049." The full texts of the engineering guides are also available in electronic format at <http://www.epa.ohio.gov/dapc/engineer/eguides.aspx>. Ohio EPA engineering guides are also available for inspection and copying at the "State Library of Ohio."
  - (d) North American industry classification system (NAICS) codes. Information and copies may be obtained by contacting the national technical information service at 1-800-553-6847. The codes are also available in electronic format at [www.census.gov/epcd/www/naics.html](http://www.census.gov/epcd/www/naics.html).
  - (e) Ohio EPA weekly review. Information and copies may be obtained by writing to: "Ohio EPA Legal Department, PO Box 1049, Columbus, Ohio, 43216-1049." The full text of the Ohio EPA Weekly Review is also available in electronic format at <http://epa.ohio.gov/legal/pubnots.aspx>. The Ohio EPA Weekly Review compilations are also available for inspection and copying at most Ohio public libraries and "The State Library of Ohio."
  - (f) Standard industrial classification manual (SICM). Information and copies may be ordered by writing to: "U.S. Department of Commerce, Technology Administration, National Technical Information Service, Springfield, Virginia, 22161." or by calling 1-800-553-6847. A copy of the manual is also available for inspection and copying at most public libraries and "The State Library of Ohio."

**3745-77-02 Prohibition and applicability.**

[Comment: For dates of non-regulatory government publications, publications of recognized organizations and associations, federal rules, and federal statutory provisions referenced in this rule, see paragraph (SS) of rule 3745-77-01 of the Administrative Code titled "Referenced materials."]

**(A) Prohibitions.**

Except as provided in paragraph (H)(1)(a) of rule 3745-77-07, and paragraphs (C)(1)(f) and (C)(2)(e) of rule 3745-77-08 of the Administrative Code and in the following sentence, the owner or operator of a Title V source shall not operate such source after the date that a timely and complete Title V permit application is required to be submitted under this chapter, except in compliance with a permit issued under this chapter. If the owner or operator of a Title V source submits a timely and complete application for permit issuance or renewal, the failure to have a Title V permit is not a violation of this chapter until the director takes final action on the application. This protection shall cease to apply upon the effectiveness of the director's final determination that the application is not complete pursuant to paragraphs (A) and (B) of rule 3745-77-05 of the Administrative Code.

**(B) Title V sources.** The following sources are subject to the permitting requirements under this chapter unless they are exempted under paragraph (C) of this rule:

- (1) Any major source;
- (2) Any source, including an area source, subject to a standard or other requirement under Section 111 of the act;
- (3) Any source, including an area source, subject to a standard or other requirement under Section 112 of the act, except that a source is not required to obtain a permit solely because it is subject to regulations or requirements under Section 112(r) of the act;
- (4) Any affected source; and
- (5) Any source in a source category designated by the administrator pursuant to 40 CFR Part 70.3.

**(C) Exemptions.**

- (1) All sources listed in paragraph (B) of this rule that are not major sources, affected sources, or solid waste incineration units required to obtain a permit pursuant to Section 129(e) of the act, are exempt from the obligation to obtain a Title V permit unless required to do so under rules promulgated by the administrator.

- (2) In the case of nonmajor sources subject to a standard or other requirement promulgated under either Section 111 or 112 of the act after July 21, 1992, such nonmajor sources shall become subject to the Title V permitting requirements if so required by the standard or other requirement adopted by the administrator.
- (3) Sources in the following source categories are exempted from the obligation to obtain a Title V permit under these rules:
  - (a) All sources and source categories that would be required to obtain a permit solely because they are subject to 40 CFR Part 60, Subpart AAA - "Standards of Performance for New Residential Wood Heaters;" and
  - (b) All sources and source categories that would be required to obtain a permit solely because they are subject to 40 CFR Part 61, Subpart M - "National Emission Standard for Hazardous Air Pollutants for Asbestos;" 40 CFR 61.145 "Standard for Demolition and Renovation."
  - (c) All sources and source categories that would be required to obtain a permit solely because they are subject to 40 CFR Part 63, Subpart M - "Perchloroethylene Dry Cleaning."
  - (d) All sources and source categories that would be required to obtain a permit solely because they are subject to 40 CFR Part 63, Subpart N - "Hard and Decorative Chromium Electroplating and Chromium Anodizing."
  - (e) All sources and source categories that would be required to obtain a permit solely because they are subject to 40 CFR Part 63, Subpart O - "Commercial Ethylene Oxide Sterilization."
  - (f) All sources and source categories that would be required to obtain a permit solely because they are subject to 40 CFR Part 63, Subpart T - "Halogenated Solvent Cleaning."
  - (g) All sources and source categories that would be required to obtain a permit solely because they are subject to 40 CFR Part 63, Subpart RRR - "Secondary Aluminum Production."
- (4) Synthetic minor sources. Synthetic minor sources are exempted from the requirement for a Title V permit and all other requirements of this chapter.

(D) Opt-in sources.

The owner or operator of a source that is not a Title V source under paragraph (B) of this rule may choose to have the source permitted under the provisions of this chapter by submitting an application for a Title V permit. The permit application

shall be processed in the same manner as permit applications for non-exempt Title V sources.

(E) Emissions units and Title V sources.

(1) The federally enforceable portion of the permit shall include all applicable requirements for all relevant emissions units at the major source as specified in paragraph (A) of rule 3745-77-07 of the Administrative Code.

(2) For any non major source subject to this rule, the director shall include in the permit all requirements applicable to emissions units that cause the source to be subject to a Title V permit.

(F) Fugitive emissions. Fugitive emissions information from a Title V source shall be included in the permit application and the permit in the same manner as stack emissions, regardless of whether the source category in question is included in the list of sources contained in the definition of major source.

(G) Insignificant activities and emissions levels. Insignificant activities and emissions levels shall be exempted from the permit application requirements of this rule except for research and development emission units whose emission levels exceed the requirements specified in paragraph (X)(1) or (X)(3) of rule 3745-77-01 of the Administrative Code, provided that insignificant emission activities that are exempted because of size or production rate shall be identified in the permit application. Nothing in this paragraph shall affect the determination of whether a stationary source is a major source.

(H) Applicability determinations. Upon written request of a Title V permit applicant, the director shall make a determination of the applicability or inapplicability of any provision or class of requirements under the act to an emissions unit or stationary source and shall include that determination or a concise summary of it in the applicant's Title V permit.

**3745-77-03      Content of a permit application.**

[Comment: For dates of non-regulatory government publications, publications of recognized organizations and associations, federal rules, and federal statutory provisions referenced in this rule, see paragraph (SS) of rule 3745-77-01 of the Administrative Code titled "Referenced materials."]

- (A) Standard application form. The owner or operator of a source that is subject to the Title V permit program as provided in rule 3745-77-02 of the Administrative Code shall submit Title V permit applications in the manner and form prescribed by the director for that purpose. The applicant shall submit the information required by this rule for each emissions unit at the source to be permitted, except for insignificant activities and emissions levels as specified in paragraph (G) of rule 3745-77-02 of the Administrative Code. The applicant must identify any such insignificant activities and emissions levels that are exempted because of size or production rate. An applicant may not omit information for an emissions unit, including information for insignificant activities or emission levels, that is necessary to determine the applicability of any applicable requirement, to impose any applicable requirement, or to evaluate the fee amount required under section 3745.11 of the Revised Code.
- (B) Option for single or multiple permits. A Title V permit applicant may request a single permit for a stationary source with multiple Title V emissions units, or a separate permit for any one or more emissions units at the same facility required to have a Title V permit. The director shall honor all such requests based on proper definitions of emissions units.
- (C) Required information. The standard application form shall require, and the applicant shall provide, the following information:
  - (1) Identifying information, including company name and address (or plant name and address if different from the company name or address), owner's name and statutory agent, telephone number and names of plant site manager or other on-site contact, and application or premise number(s) from any previous permits under Chapter 3745-31 of the Administrative Code;
  - (2) A description of the source's processes and products (by standard industrial classification code or North American industry classification system) including any associated with each alternate operating scenario identified by the source;
  - (3) The following emission-related information:
    - (a) All emissions of each regulated air pollutant for which the source is major, and an estimate of all emissions of each other regulated air pollutant for which the source is regulated. The application shall describe all emissions of regulated air pollutants emitted from any emissions unit, except where

such units are exempted as de minimis in rule 3745-15-05 of the Administrative Code, or exempted in paragraphs (A)(1) to (A)(3) of rule 3745-31-03 of the Administrative Code. The applicant shall provide additional information related to such emissions of air pollutants sufficient to verify which requirements are applicable to the source, and other information that may be necessary to determine the amount of any permit fees owed under the fee schedule approved pursuant to Chapter 3745-78 of the Administrative Code. All emission estimates shall be performed in accordance with reasonable, appropriate and available engineering techniques;

- (b) Identification and description of all points of emissions described in paragraph (C)(3)(a) of this rule, in sufficient detail to establish both the basis for fees and the applicability of any applicable requirement;
  - (c) Emissions rates in TPY, and in such terms as are necessary to establish compliance consistent with the applicable standard reference test method, if any;
  - (d) Information regarding fuels, fuel use, raw materials, production rates, and operating schedules, to the extent such information is needed to determine or regulate emissions;
  - (e) Identification and description of air pollution control equipment and compliance monitoring devices or activities;
  - (f) Limitations on source operations affecting emissions or any work practice standards, where applicable, for all regulated air pollutants at the Title V source;
  - (g) Other information required by any applicable requirement (including information related to stack height limitations developed pursuant to Section 123 of the act);
  - (h) Calculations on which the information in paragraphs (C)(3)(a) to (C)(3)(g) of this rule is based; and
  - (i) Related information necessary to establish voluntary restrictions in the permit to avoid federally applicable requirements pursuant to paragraph (B) of rule 3745-77-07 of the Administrative Code.
- (4) The following air pollution control requirements:
- (a) Citation and description of all applicable requirements; and

- (b) Description of or reference to any applicable test method for determining compliance with each applicable requirement;
- (5) Other specific information as necessary to implement and enforce other applicable requirements of the act or of this chapter, including:
  - (a) Information on emissions and controls relevant to establishing a case-by-case emission limitation or standard under Section 112 of the act, or to determine the applicability of such requirements;
  - (b) A proposed compliance date for any standard under Section 112(d), 112(h), or 112(j) of the Clean Air Act that was promulgated after the applicant has received a final MACT determination according to rule 3745-31-28 of the Administrative Code, and that does not specify a compliance date for sources that have received a final case-by-case MACT determination. The proposed compliance date shall be approved by the director, and in no case shall the compliance date be more than eight years from the date of promulgation of the standard.
- (6) Any requests for alternative or multiple operating scenarios or anticipated changes in emissions during the term of the permit, together with the information under paragraphs (C)(3)(a) to (C)(3)(h) of this rule for each such scenario or change;
- (7) An explanation of any proposed exemptions from otherwise applicable requirements;
- (8) Any request for alternative emission limits, together with information necessary for the director to define alternative limits requested by the permit applicant under division (E) of section 3704.03 and division (K) of section 3704.036 of the Revised Code;
- (9) Compliance plan. Description of the compliance status of the Title V source with respect to all applicable requirements, which shall include the following:
  - (a) For all applicable requirements with which the source is in compliance, a statement that the source will continue to comply with such requirements;
  - (b) For all applicable requirements that will become effective during the permit term, a statement that the source will meet such requirements on a timely basis. A statement that the source will meet in a timely manner such requirements that become effective during the permit term shall satisfy this provision, unless a more detailed plan or schedule is required by the requirement;

- (c) For applicable requirements for which the source is not in compliance at the time of permit issuance, a narrative description of how the source will achieve compliance with such requirements and a schedule of compliance. The compliance schedule shall include a schedule of remedial measures, including an enforceable sequence of actions with milestones, leading to compliance with any applicable requirements for which the source will be in noncompliance at the time of permit issuance. This compliance schedule shall resemble and be at least as stringent as that contained in any judicial consent decree or administrative order to which the source is subject. Any such schedule of compliance shall be supplemental to, and shall not sanction noncompliance with the applicable requirements on which it is based;
  - (d) A schedule for submission of certified progress reports no less frequently than every six months for sources required to have a schedule of compliance to remedy a violation;
  - (e) The compliance plan content requirements specified in paragraphs (C)(9)(a) to (C)(9)(d) of this rule shall apply and be included in the acid rain portion of a compliance plan for an affected source, except as specifically superseded in regulations promulgated under Title IV of the act with regard to the schedule and method(s) the source will use to achieve compliance with the acid rain emissions limitations; and
  - (f) If the owner or operator of the source is required to develop and register a risk management plan pursuant to Section 112(r) of the act, the applicant shall specify the compliance status of the requirement to register such a plan;
- (10) Compliance certification:
- (a) A certification of compliance status with all applicable requirements by a responsible official consistent with paragraph (D) of this rule and Section 114 (a)(3) of the act;
  - (b) A statement of the methods used for determining compliance, including a description of monitoring, recordkeeping, and reporting requirements and test methods;
  - (c) A schedule for submission of compliance certifications during the Title V permit term, to be submitted annually or more frequently if specified by the applicable requirement;
  - (d) A statement indicating the source's compliance status with any applicable enhanced monitoring and compliance certification requirements of the act; and

(e) If the owner or operator of the source is required to develop and register a risk management plan pursuant to Section 112(r) of the act, the applicant shall certify compliance with the requirement to register such a plan; and

(11) The information specified in nationally standardized forms for the acid rain portions of applications and compliance plans, as required by regulations promulgated under Title IV of the act.

(D) Certification of truth, accuracy, and completeness.

Any application form, report, or compliance certification submitted pursuant to this chapter shall contain certification by a responsible official of truth, accuracy, and completeness. This certification and any other certification requirement under this chapter shall state that, based on information and belief formed after reasonable inquiry, the statements and information in the document are true, accurate, and complete.

(E) Confidential information.

The application shall clearly identify any information the applicant claims is confidential as business information under 40 CFR Part 2 or a trade secret as defined in section 1333.51 of the Revised Code, and shall include a brief statement of the basis for any such claim. Information claimed to be confidential shall not thereafter be released except as provided below:

(1) If the administrator requests information subject to a claim of confidentiality, the director shall promptly require in writing that the applicant submit the information and claim of confidentiality directly to the administrator. If the applicant fails to submit such information and claim of confidentiality to the administrator within thirty days after receipt of the director's request to do so, the director shall submit such information and claim of confidentiality directly to the administrator; or

(2) If a third party request information subject to a claim of confidentiality, such information shall be released only after the director finds the claim of confidentiality is not justified, notifies the applicant of the finding, and any appellate review is either not pursued or exhausted.

(F) Duty to supplement application.

Any applicant who fails to submit any relevant facts or who has submitted incorrect information in a permit application shall, upon becoming aware of such failure or incorrect submittal, promptly submit such supplementary facts or corrected information. In addition, an applicant shall provide additional information as

necessary to address any requirements that become applicable to the source after the date it filed a complete application but prior to release of a draft permit.

Effective: 02/14/2010

**3745-77-04 Transition and application filing dates.**

[Comment: For dates of non-regulatory government publications, publications of recognized organizations and associations, federal rules, and federal statutory provisions referenced in this rule, see paragraph (SS) of rule 3745-77-01 of the Administrative Code titled "Referenced materials."]

**(A) Compliance with existing permits.**

Prior to the issuance or denial of the initial Title V permit, the owner or operator of a source for which a timely and complete Title V permit application has been filed pursuant to this rule and rule 3745-77-05 of the Administrative Code shall continue to comply with all effective terms and conditions of permit-to-install, permits-to-install and operate and permits-to-operate that were issued to one or more emissions units at such source in accordance with present or former Chapter 3745-31 or former Chapter 3745-35 of the Administrative Code. The filing of a timely and complete Title V permit application shall have the same effect as filing an application for a renewal of a permit-to-install and operate for purposes of section 119.06 of the Revised Code.

**(B) Initial application filing and processing.**

Sources required to obtain a Title V permit shall submit an application no later than the date specified below based on the location of the source:

- (1) Sources that are located within the areas identified in appendix A to this rule shall file an application in accordance with rule 3745-77-03 of the Administrative Code by no later than sixty days after approval of the Title V permit program.
- (2) Sources that are located within the areas identified in appendix B to this rule shall file an application in accordance with rule 3745-77-03 of the Administrative Code by no earlier than sixty-one days after approval of the Title V permit program and no later than one hundred eighty days after approval of the Title V permit program.
- (3) Sources that are located within the areas identified in appendix C to this rule shall file an application in accordance with rule 3745-77-03 of the Administrative Code by no earlier than one hundred eighty-one days after approval of the Title V permit program and no later than three hundred sixty-five days after approval of the Title V permit program.
- (4) Sources subject to paragraph (B)(1) or (B)(2) of this rule may submit a request at least forty-five days prior to the Title V permit application submittal deadline and request up to a ninety day extension of time to submit a Title V permit

application. The director shall act on the request within thirty days or the request will automatically be approved.

- (5) Sources within the jurisdiction of the same local air pollution control agency or district office may, by mutual consent of the director and the owners or operators of the sources involved, trade the deadline dates for the submission of initial Title V permit applications under this paragraph.
- (C) Notwithstanding the provisions of paragraph (B) of this rule, no initial Title V permit application shall be due less than one year after the effective date of this rule.
- (D) A timely application for a source applying for a Title V permit for the first time, other than a source required to file under paragraph (B) of this rule, is one that is submitted within twelve months after the source becomes subject to the Title V permit program. Sources required to have a preconstruction permit under Part C or Part D of Title I of the act shall submit a complete Title V permit application within twelve months after commencing operation, provided that where an existing Title V permit would prohibit construction or operation of such new or modified source, a Title V permit revision must be obtained before operation of such new or modified source.
- (E) Title V permit renewal applications shall be filed no earlier than eighteen months and no later than six months prior to the expiration of the Title V permit.
- (F) Applications for initial phase II acid rain permits shall be submitted to the director by January 1, 1996, for sulfur dioxide, and by January 1, 1998, for nitrogen oxides.
- (G) An owner or operator of a Title V source required to meet the requirements of Section 112(g) of the act shall file a Title V permit application within twelve months after commencing operation of a modification subject to that section.
- (H) An application filed by the appropriate due date in this rule, and, where necessary, supplemented in accordance with rule 3745-77-05 of the Administrative Code, shall be deemed timely.

Lucas	portion of the county located in zip code jurisdictions: 43608, 43609, 43611, 43612, 43613, 43614, 43615, 43619, 43624, 43657, 43694
Miami	entire county
Montgomery	portion of the county located in zip code jurisdictions: 45309, 45342, 45354, 45373, 45377, 45401, 45402, 45403
Morrow	entire county
Paulding	entire county
Putnam	entire county
Richland	entire county
Scioto	entire county
Seneca	entire county
Stark	portion of the county located in zip code jurisdictions: 44688, 44701, 44702, 44704, 44705, 44707, 44711, 44720, 44730
Summit	portion of the county located in zip code jurisdictions: 44278, 44301, 44304, 44305, 44306, 44308, 44310, 44311, 44312, 44315
Union	entire county

Van wert	entire county
Vinton	entire county
Washington	entire county
Wayne	entire county

### 3745-77-04 Appendix C

#### Areas of the state where paragraph (B)(3) of rule 3745-77-04 of the Administrative Code is applicable.

County	Description of Areas
Adams	entire county
Allen	entire county
Ashland	entire county
Athens	entire county
Auglaize	entire county
Belmont	entire county
Brown	entire county
Crawford	entire county
Cuyahoga	portion of the county located in zip code jurisdictions: 44128, 44130, 44131, 44135, 44136, 44137, 44138, 44139, 44141, 44142, 44143, 44145, 44146 and the remainder of county for which the zip code jurisdictions were not listed
Delaware	entire county
Fairfield	entire county
Fayette	entire county
Franklin	portion of the county located in zip code jurisdictions: 43229, 43230 and the remainder of the county for which the zip code jurisdictions were not listed
Gallia	entire county
Hardin	entire county
Hamilton	portion of the county located in zip code jurisdictions: 45232, 45233, 45237, 45239, 45240, 45241, 45242, 45244, 45246 and the remainder of the county for which zip code jurisdictions were not listed
Harrison	entire county
Henry	entire county
Jackson	entire county
Lawrence	portion of the county located in zip code jurisdiction 45680 and the remainder of the county for which the zip code jurisdictions were not listed
Lucas	portion of the county located in zip code jurisdiction 43616 and the remainder of the county for which the zip code jurisdictions were not listed
Madison	entire county
Mahoning	entire county
Marion	entire county
Monroe	entire county Montgomery portion of the county located in zip code jurisdictions: 45404, 45407, 45408, 45414, 45420 and the remainder of the county for which the zip code jurisdictions were not listed
Pickaway	entire county
Pike	entire county
Portage	entire county
Ross	entire county

Shelby	portion of the county located in zip code jurisdiction 45365 and the remainder of the county for which the zip code jurisdictions were not listed
Stark	portion of the county located in zip code jurisdiction 44706 and the remainder of the county for which the zip code jurisdictions were not listed
Summit	portion of the county located in zip code jurisdictions: 44313, 44314, 44316, 44317, 44318, 44320, 44321, 44328
Trumbull	entire county
Wyandot	entire county

All other counties or portions of counties not previously listed.

3745-77-05      **Application completeness determination.**

- (A) A complete Title V permit application is one that contains all the information applicable to the facility required pursuant to rule 3745-77-03 or paragraph (D) of rule 3745-77-07 of the Administrative Code, except that applications for permit revisions need supply such information only if it is related to the proposed revision. A complete application shall include a certification by a responsible official of the truth, accuracy, and completeness of the information in the application, based on information and belief formed after reasonable inquiry by the responsible official.
- (B)
- (1) The director shall promptly provide notice to the applicant for a Title V permit of whether the application is complete. Unless the director determines within sixty days after receipt of the application that the application is not complete, and issues a written notice of such determination as provided in paragraph (B)(2) of this rule, the application shall be deemed to be complete. A completeness determination is not required for modifications processed through minor permit modification procedures contained in rule 3745-77-08 of the Administrative Code
  - (2) If, during the processing of an application before or after it has been determined or deemed to be complete, the director determines that additional information is necessary in order to evaluate or take final action on the application, the director may request that information in writing from the applicant. Any such request shall identify the information requested with reasonable specificity, provide a basis for the request, and shall provide a reasonable time period, not less than fifteen days, for the applicant's submission of the requested information.
  - (3) If an applicant fails to make a good faith and timely response to a request for additional information under this rule with regard to an application that the director believes to be incomplete, the director shall offer to meet with the applicant within seven days after issuance of a letter for failure to submit the requested information. If the meeting or meeting offer fails to obtain a complete application from the applicant, the director, without prior hearing, shall make a final determination that the application is not complete. Any such determination shall not become effective until twenty days after notice of the determination is sent to the applicant by certified mail. An incompleteness determination by the director may be appealed in accordance with section 3745.04 and division (D) of section 3704.036 of the Revised Code.
- (C) The submittal of a complete Title V permit application shall not affect the applicability of Chapter 3745-31 of the Administrative Code to any source that is required to have a permit-to-install under that chapter.

3745-77-06      **Application shield.**

- (A) If the owner or operator of a Title V source submits a timely and complete initial or renewal application in accordance with rules 3745-77-04 and 3745-77-05, paragraph (D) of rule 3745-77-07, and rule 3745-77-08 of the Administrative Code for initial permit issuance or permit renewal, the facility's failure to have a Title V permit for such source is not a violation of this chapter or Chapter 3704. of the Revised Code until the director takes final action on the permit application.
- (B) For purposes of this rule only, an application filed under paragraph (B) of rule 3745-77-04 of the Administrative Code shall not be considered untimely unless it is filed later than one year after approval of the Title V permit program.

**3745-77-07 Permit content.**

[Comment: For dates of non-regulatory government publications, publications of recognized organizations and associations, federal rules, and federal statutory provisions referenced in this rule, see paragraph (SS) of rule 3745-77-01 of the Administrative Code titled "Referenced materials."]

- (A) Standard permit requirements. Each Title V permit shall include the following elements:
- (1) Emission limitations and standards. The permit shall include emission limitations and standards, including those operational requirements and limitations that assure compliance with all applicable requirements at the time of issuance.
    - (a) The Title V permit shall specify authority for each term or condition, and identify any difference in form as compared to the applicable requirement upon which the term or condition is based.
    - (b) The Title V permit shall state that, where an applicable requirement of the act is more stringent than an applicable requirement of regulations promulgated under Title IV of the act, both provisions shall be incorporated into the permit and shall be federally enforceable.
    - (c) If the applicable implementation plan so provides, upon an applicant's request, pursuant to division (E) of section 3704.03 and division (K) of section 3704.036 of the Revised Code, that an alternative limit or means of compliance be specified in the Title V permit, and such alternative limit satisfies the criteria set forth in division (E) of section 3704.03 and division (K) of section 3704.036 of the Revised Code, such an alternative emission limit or means of compliance shall be included in the permit upon a showing satisfactory to the director that it is quantifiable, accountable, enforceable, and based on replicable procedures. The applicant shall include in the permit application proposed permit terms and conditions to satisfy the requirements of this paragraph.
  - (2) Permit duration. The director shall issue Title V permits for a fixed period, not to exceed five years, except as provided in paragraphs (A)(2)(a) to (A)(2)(c) of this rule:
    - (a) Permits issued to affected sources shall in all cases have a fixed term of five years.
    - (b) Permits issued to solid waste incineration units combusting municipal waste subject to standards under Section 129(e) of the act shall have a term not to exceed twelve years. Such permits shall be reviewed every five years.

- (c) A permit may be terminated, or terminated in part, prior to expiration in accordance with the requirements of paragraph (H) of rule 3745-77-08 of the Administrative Code.

(3) Monitoring and related recordkeeping and reporting requirements.

- (a) Each permit shall contain the following requirements with respect to monitoring:
  - (i) All emissions monitoring and analysis procedures or test methods required under the applicable requirements, including any procedures and methods promulgated pursuant to Sections 114(a)(3) or 504(b) of the act;
  - (ii) Where the applicable requirement does not require periodic testing or instrumental or noninstrumental monitoring (which may consist of recordkeeping designed to serve as monitoring), periodic monitoring sufficient to yield reliable data from the relevant time period that are representative of the source's compliance with the permit, as reported pursuant to paragraph (A)(3)(c) of this rule. Such monitoring requirements shall assure use of terms, test methods, units, averaging periods, and other statistical conventions consistent with the applicable requirement. Such monitoring requirements may apply to operating parameters, fuels, raw materials, or other reliable indicators of the rate of emissions, or combinations thereof. Recordkeeping provisions may be sufficient to meet the requirements of this paragraph; and
  - (iii) As necessary, requirements concerning the use, maintenance, and, where appropriate, installation of monitoring equipment or methods.
- (b) With respect to recordkeeping, the permit shall incorporate all applicable requirements that relate to recordkeeping and require, where applicable, the following:
  - (i) Records of required monitoring information that include the following:
    - (a) The date, place as defined in the permit, and time of sampling or measurements;
    - (b) The date(s) analyses were performed;
    - (c) The company or entity that performed the analyses;
    - (d) The analytical techniques or methods used;

- (e) The results of such analyses; and
  - (f) The operating conditions as existing at the time of sampling or measurement; and
- (ii) Retention of records of all required monitoring data and support information for a period of five years from the date the record was created. Support information includes all calibration and maintenance records and all original strip-chart recordings for continuous monitoring instrumentation, and copies of all reports required by the permit. The permit shall specify that records may be maintained in computerized form.
- (c) With respect to reporting, the permit shall incorporate all applicable requirements that relate to reporting. The permit shall also require the following:
- (i) That the permittee submit a report of any required monitoring every six months. To the extent possible, the schedule for submission of such reports shall be timed to coincide with other periodic reports required by the permit, including the permittee's annual compliance certification.
  - (ii) That each report submitted under paragraph (A)(3)(c)(i) of this rule shall clearly identify any deviations from the permit requirements that have occurred since the previous report has been submitted.
  - (iii) That each permit shall require prompt reporting of deviations from federally enforceable permit requirements, including deviations attributable to malfunctions as described in paragraph (B)(1) of rule 3745-15-06 of the Administrative Code, regardless of duration, the probable cause of such deviations, and any corrective actions or preventive measures taken. The requirement to include all deviations attributable to malfunctions in these quarterly deviation reports is in addition to the verbal and written reporting requirements specified in rule 3745-15-06 of the Administrative Code. An exceedance of the visible emission limitations specified in paragraph (A)(1) of rule 3745-17-07 of the Administrative Code that is caused by a malfunction does not need to be reported as a deviation if the owner or operator of the affected air contaminant source or air pollution control equipment complies with the requirements of paragraph (A)(3)(c) of rule 3745-17-07 of the Administrative Code. Malfunctions that are reported in accordance with rule 3745-15-06 of the Administrative Code shall be referenced in the deviation reports required by this paragraph. Deviations resulting from approved requests for scheduled maintenance of air pollution control equipment pursuant to paragraph (A) of rule

3745-15-06 of the Administrative Code also shall be reported in accordance with this paragraph.

- (iv) Unless otherwise specified in the specific permit terms and conditions for an emissions unit, prompt reporting for the purpose of this rule shall be quarterly for all deviations from emission limitations, operational restrictions, and control device operating parameter limitations (except as prescribed in rule 3745-15-06 of the Administrative Code for malfunctions); and semi-annually for all deviations from monitoring, recordkeeping, and reporting requirements pursuant to paragraph (A)(3)(c)(i) of this rule.
  - (v) That each report required under paragraph (A)(3)(c) of this rule shall be signed by a responsible official certifying that, based on information and belief formed after reasonable inquiry, the statements and information in the report are true, accurate, and complete.
- (4) Risk management plans. If the owner or operator of the source is required to develop and register a risk management plan pursuant to Section 112(r) of the act, the permit shall specify that the permittee will comply with the requirement to register such a plan.
- (5) Title IV provisions. The permit shall include provisions necessary to ensure compliance by an affected source with the requirements of 40 CFR Part 72. The permit shall prohibit emissions exceeding any allowances that the source lawfully holds under Title IV of the act or the regulations promulgated thereunder.
- (a) No permit revision shall be required for increases in emissions that are authorized by allowances acquired pursuant to the acid rain program, provided that such increases do not require a permit revision under any other applicable requirement.
  - (b) No limit shall be placed on the number of allowances held by the source. The source may not, however, use allowances as a defense to noncompliance with any other applicable requirement.
  - (c) Any such allowance shall be accounted for according to the procedures established in regulations promulgated under Title IV of the act.
- (6) Severability clause. The Title V permit shall include a severability clause to ensure the continued validity of the various permit requirements in the event of a challenge to any portions of the permit.
- (7) General requirements. The Title V permit shall include provisions stating the following:

- (a) The permittee must comply with all conditions of the permit. Any noncompliance with the federally enforceable terms and conditions of the permit constitutes a violation of the act and is grounds for enforcement action or for permit revocation, revocation and reissuance, or modification, or for denial of a permit renewal application.
  - (b) It shall not be a defense for a permittee in an enforcement action that it would have been necessary to halt or reduce the permitted activity in order to maintain compliance with the federally enforceable conditions of the permit.
  - (c) The permit may be modified, reopened, revoked, or revoked and reissued, for cause. The filing of a request by the permittee for a permit modification, revocation and reissuance, or revocation, or of a notification of planned changes or anticipated noncompliance does not stay any permit condition.
  - (d) The permit does not convey any property rights of any sort, or any exclusive privilege.
  - (e) The permittee shall furnish to the director, upon receipt of a written request and within a reasonable time, any information that the director may request to determine whether cause exists for modifying, reopening, or revoking the permit or to determine compliance with the permit. Upon request, the permittee shall also furnish to the director copies of records required to be kept by the permit. For information claimed to be confidential in the submittal to the director, if the administrator requests such information, the permittee may furnish such records directly to the administrator along with a claim of confidentiality.
- (8) Fees. The permit shall provide that the permittee will pay fees to the director in accordance with section 3745.11 of the Revised Code and Chapter 3745-78 of the Administrative Code.
- (9) Marketable permit programs. The permit shall provide that no permit revision shall be required under any approved economic incentive, marketable permits, emissions trading, and other similar programs or processes for changes that are provided for in the permit.
- (10) Reasonably anticipated operating scenarios. The permit shall include terms and conditions applicable to all operating scenarios described in the permit application unless prohibited by federally enforceable requirements, including all applicable requirements and requirements of this chapter. As approved by the director, the permit shall authorize the permittee to make changes among operating scenarios authorized in the permit without notice, but shall require the permittee, contemporaneous with making a change from one operating scenario

to another, to record in a log at the permitted facility the scenario under which it is operating. The permit shield provided in paragraph (F) of this rule shall apply to all operating scenarios authorized in the permit.

(11) Emissions trading. The permit shall include terms and conditions, if the permit applicant requests them, for the trading of emissions increases and decreases in the permitted facility, to the extent that the applicable requirements provide for trading such increases and decreases without a case-by-case approval of each emissions trade. Such terms and conditions:

(a) Shall include all terms required under paragraphs (A) and (C) of this rule to determine compliance;

(b) May extend the permit shield described in paragraph (F) of this rule to all terms and conditions that allow such increases and decreases in emissions; and

(c) Must meet all applicable requirements and requirements of this chapter.

(12) Reopening for cause. Each issued permit shall include provisions specifying the conditions under which the permit will be reopened prior to the expiration of the permit.

(13) Insignificant activities and emissions levels.

(a) Any insignificant activities and emissions levels that are subject to one or more applicable requirements, shall be listed in the federally enforceable portion of the permit along with the applicable requirements or the identification number of each permit to install that establishes one or more applicable requirements for the insignificant activities and emissions levels. This listing is presumed to satisfy the requirements of paragraph (A)(1) of this rule.

(b) Monitoring, recordkeeping or reporting requirements established for insignificant activities and emissions levels in a permit to install or under applicable rules are presumed adequate to satisfy the monitoring, recordkeeping or reporting requirements of paragraph (A)(3) of this rule for the insignificant activities and emissions levels, unless the director determines otherwise.

(B) Federally enforceable and state enforceable terms and conditions. Federally enforceable terms and conditions shall be identified as such in the permit. Voluntary restrictions established in the permit to avoid federal applicable requirements shall be identified as federally enforceable terms and conditions. Federally enforceable terms and conditions shall be clearly differentiated from terms and conditions that are not required under the act or any applicable requirements and that are imposed pursuant

to state law only. Terms and conditions that are not required under the act or any of its applicable requirements shall be identified as such in the permit and clearly differentiated from those that are.

- (1) All terms and conditions of a Title V permit that are required under the act or any of its applicable requirements, including relevant terms and conditions designed to limit the potential to emit of a source, are enforceable by the administrator and citizens under the act.
  - (2) All other terms and conditions of a Title V permit not described in paragraph (B)(1) of this rule shall not be federally enforceable and shall be enforceable under state law only.
- (C) Compliance requirements. The federally enforceable portion of each Title V permit shall contain the following elements with respect to compliance:
- (1) Consistent with paragraph (A)(3) of this rule, compliance certification, testing, monitoring, reporting, and recordkeeping requirements sufficient to assure compliance with the federally enforceable terms and conditions of the permit. Any document (including reports) required by a Title V permit shall contain a certification by a responsible official that, based on information and belief formed after reasonable inquiry, the statements in the document are true, accurate, and complete;
  - (2) Inspection and entry requirements that require that, upon presentation of credentials and other documents as may be required by law, the permittee shall allow the director or an authorized representative of the director to:
    - (a) Enter upon the permittee's premises where a source is located or emissions-related activity is conducted, or where records must be kept under the conditions of the permit;
    - (b) Have access to and copy, at reasonable times, any records that must be kept under the conditions of the permit, subject to the protection from disclosure to the public of confidential information consistent with paragraph (E) of rule 3745-77-03 of the Administrative Code;
    - (c) Inspect at reasonable times any facilities, equipment (including monitoring and air pollution control equipment), practices, or operations regulated or required under the permit; and
    - (d) As authorized by the act, sample or monitor at reasonable times substances or parameters for the purpose of assuring compliance with the permit and applicable requirements.

- (3) A requirement that sources meet in a timely manner applicable requirements that become effective during the permit term and shall contain an approved schedule of compliance for sources that are not in compliance with all applicable requirements at the time of permit issuance. Such a schedule of compliance shall include a schedule of remedial measures, including an enforceable sequence of actions with milestones, leading to compliance with any applicable requirements for which the source will be in noncompliance at the time of permit issuance. Such a schedule of compliance shall resemble and be at least as stringent as that contained in any judicial or administrative order or consent decree to which the source is subject. Any such schedule of compliance shall be supplemental to, and shall not sanction noncompliance with, the applicable requirements on which it is based;
- (4) Progress reports consistent with a schedule of compliance in the permit for meeting an applicable requirement. Progress reports must be submitted semiannually, or more frequently if specified in the applicable requirement, or by the director. Progress reports shall contain the following:
  - (a) Dates for achieving the activities, milestones, or compliance required in the schedule of compliance, and dates when such activities, milestones, or compliance were achieved;
  - (b) An explanation of why any dates in the schedule of compliance were not or will not be met, and any preventive or corrective measures adopted; and
- (5) Requirements for compliance certification with terms and conditions contained in the permit that are federally enforceable, including emission limitations, standards, or work practices. Each permit shall specify:
  - (a) The frequency (which shall be annual unless the applicable requirement specifies submission more frequently) or submissions of compliance certifications;
  - (b) In accordance with paragraph (A)(3) of this rule, a means for monitoring the compliance of the source with emissions limitations, standards, and work practices;
  - (c) A requirement that the compliance certification include the following:
    - (i) The identification of each term or condition of the permit that is the basis of the certification;
    - (ii) The permittee's compliance status over the period covered by the certification;
    - (iii) Whether compliance was continuous or intermittent;

- (iv) The method(s) used for determining the compliance status of the source, currently and over the reporting period as required by paragraph (A)(3) of this rule; and
  - (v) Such other facts as the director may require in the permit to determine the compliance status of the source;
- (d) A requirement that all compliance certifications be submitted to the administrator as well as to the director; and
  - (e) Such additional requirements as may be specified pursuant to Sections 114(a)(3) and 504(b) of the act.

(D) General Title V permits.

- (1) The director may issue a general Title V permit to any source class or category if the director concludes that the class or category is appropriate for permitting on a generic basis, including, but not limited to, a class or category that has numerous similar facilities or air contaminant sources, or similar federally applicable requirements. No general permit may be issued for affected sources under the acid rain program unless otherwise provided in regulations promulgated under Title IV of the act.
- (2) A general Title V permit may be issued for a source category based upon an application from the owner or operator of a source within the source category or upon the director's own initiative. The director shall, following receipt of an application for a general permit, or upon a determination that issuance of a general permit for a category of sources may be appropriate, follow the same procedures for allowance of a general permit as for any other permit issued under this part.
- (3) A general Title V permit may be issued for any of the following purposes:
  - (a) To establish terms and conditions to implement applicable requirements for a source category or for numerous similar sources; or
  - (b) To establish federally enforceable caps on emissions from sources in a specified category or from numerous similar sources.
- (4) A general Title V permit issued under paragraph (D) of this rule shall identify criteria by which sources may qualify for the general permit. After a general permit has been issued, the owner or operator of any source may submit a request to be covered under the permit. A general permit shall apply to the owner or operator of a facility or air contaminant source only upon application of the owner or operator to, and acceptance by, the director.

- (a) A request for coverage under a general permit shall identify the source and provide information sufficient to demonstrate that it falls within the source category covered by the general permit, together with any additional information that may be specified in the general Title V permit. Such request shall conform to the application requirements in the general permit, which may deviate from the application requirements set forth in rule 3745-77-03 of the Administrative Code, provided that such applications meet the requirements of Title V of the act, and include all information necessary to determine qualification for, and to assure compliance with, the general permit.
  - (b) The director shall act to approve or deny the request for coverage under a general permit within ninety days of receipt.
  - (c) After a general Title V permit has been issued in accordance with paragraph (D)(4) of this rule, the director may grant requests for authorization to operate under the general Title V permit without repeating the public participation procedures required under rule 3745-77-08 of the Administrative Code.
- (5) A copy of the general Title V permit, together with a list of sources approved for coverage under it, shall be kept on file by the director for public review.
- (6) A general Title V permit issued under this section shall provide that any source approved for coverage under a general Title V permit shall be entitled to the protection of the permit shield under paragraph (F) of this rule for all operations, emissions, and activities addressed by the general Title V permit. Notwithstanding these shield provisions, the owner or operator of any such source shall be subject to enforcement action for operation without a Title V permit if the source is later determined not to qualify for the conditions and terms of the general permit.
- (7) If some, but not all, of a source's operations, emissions, and activities are eligible for coverage under one or more general permits, the owner or operator of the source may apply for and receive coverage under the relevant general permit(s) for the operations, emissions, and activities that are so eligible. If the owner or operator of the source is required under this rule to obtain a permit addressing the remainder of the operations, emissions, and activities at the source, the owner or operator may apply for and receive a permit that addresses specifically only those items not covered by one or more general permits. In such a case, the source's permit shall identify all operations, emissions, and activities that are subject to general permits and incorporate those general Title V permits by reference.

(E) Temporary sources. The director may issue a single permit authorizing emissions from similar operations by the same source owner or operator at multiple temporary locations. The operation must be temporary and involve at least one change of location during the term of the permit. No affected source shall be permitted as a temporary source. Permits for temporary sources shall include the following:

- (1) Conditions that will assure compliance with all applicable requirements at all authorized locations;
- (2) Requirements that the owner or operator notify the director at least ten days in advance of each change in location; and
- (3) Conditions that assure compliance with all other applicable provisions of this rule.

(F) Permit shield.

- (1) Each permit issued under this rule shall include a permit shield provision, which shall state that compliance with the terms and conditions of the permit (including terms and conditions established for alternate operating scenarios, emissions trading, and emissions averaging, but excluding terms and conditions for which the permit shield is expressly prohibited under this rule) shall be deemed compliance with the applicable requirements identified and addressed in the permit as of the date of permit issuance.
- (2) Upon written request of the permit applicant, the director shall include in the permit, or in a separate written finding issued with the permit, a determination identifying specific requirements or class of requirements that do not apply to the source or to one or more emissions units within the source. The permit applicant shall specify in the request for such a determination the requirements as to which the determination is requested. If the determination is issued in a separate finding, that finding shall be summarized in the permit. The permit shall state that the permit shield applies to any requirements so identified. A request for a determination to amend the shield to requirements deemed inapplicable to a source or an emissions unit may be made either in conjunction with the original permit application or in conjunction with a subsequent application for a permit modification.
- (3) Nothing in paragraph (F) of this rule or in the permit shall alter or affect the following:
  - (a) The provisions of Section 303 of the act, including the authority of the administrator under that section;
  - (b) The liability of an owner or operator of a source for any violation of applicable requirements prior to or at the time of permit issuance;

- (c) Applicable requirements of the acid rain program, consistent with Section 408(a) of the act; or
- (d) The ability of the administrator to obtain information from a source pursuant to Section 114 of the act.

(G) Emergencies.

- (1) Definition. An "emergency" means any situation arising from sudden and reasonably unforeseeable events beyond the control of the source, including acts of god, which situation requires immediate corrective action to restore normal operation, and that causes the source to exceed a technology-based emission limitation under the permit, due to unavoidable increases in emissions attributable to the emergency. An emergency shall not include noncompliance caused by improperly designed equipment, lack of preventive maintenance, careless or improper operation, or operator error.
- (2) Effect of an emergency. An emergency constitutes an affirmative defense to an action brought for noncompliance with such technology-based emission limitations if the conditions of paragraph (G)(3) of this rule are met.
- (3) The affirmative defense of emergency shall be demonstrated through properly signed, contemporaneous operating logs, or other relevant evidence showing that:
  - (a) An emergency occurred and the permittee can identify the cause(s) of the emergency;
  - (b) The permitted facility was being properly operated at the time;
  - (c) During the period of the emergency the permittee took all reasonable steps to minimize levels of emissions that exceeded the emission standards or other requirements in the permit; and
  - (d) The permittee submitted notice of the emergency to the director within two working days of the time when emission limitations were exceeded due to the emergency. Such notice must contain a description of the emergency, any steps taken to mitigate emissions, and corrective actions taken. This notice fulfills the requirements of paragraph (A)(3)(c)(iii) of this rule.
- (4) In any enforcement proceeding, the permittee seeking to establish the occurrence of an emergency has the burden of proof with regard to the occurrence of the emergency.

- (5) The emergency defense provision in paragraph (G) of this rule is in addition to any emergency or upset provision contained in any applicable requirement.

(H) Operational flexibility: changes allowed without requiring permit revisions.

- (1) Changes allowed with seven day advance notice. An owner or operator of a stationary source with a Title V permit is authorized, and each permit issued under this rule shall expressly provide such authorization, to make a change, as provided in paragraphs (H)(1)(a) to (H)(1)(c) of this rule, within the permitted stationary source without obtaining a permit revision, if such change is not a modification under any provision of Title I of the act and does not result in an exceedance of the emissions allowable under the permit (whether expressed therein as a rate of emissions or in terms of total emissions), and the owner or operator of the source provides the administrator and the director with written notification as provided in paragraph (H)(2) of this rule.
- (a) Changes that contravene express permit term. Changes that contravene an express permit term, except for changes that would violate applicable requirements or contravene federally enforceable permit terms and conditions that are monitoring (including test methods), recordkeeping, reporting, or compliance certification requirements.
- (b) Emission trades under applicable implementation plan. Title V permitted sources may trade increases and decreases in emissions in the permitted stationary source, where the applicable implementation plan provides for such emissions trades without requiring a permit revision. This provision is available in those cases where the permit does not already provide for such emissions trading. Compliance with the permit requirements that the source will meet using the emissions trade shall be determined according to requirements of the applicable implementation plan authorizing emissions trades.
- (c) Emissions trades to comply with federally enforceable cap.
- (i) Upon the applicant's request in a Title V permit application, the director shall issue a permit that contains terms and conditions, including all terms required under this rule to determine compliance, allowing for the trading of emissions increases and decreases in the permitted facility solely for the purpose of complying with a federally enforceable emissions cap that is established in the permit independent of otherwise applicable requirements.
- (ii) The permit applicant shall include in its application proposed replicable procedures and permit terms that ensure that the emissions trades are quantifiable and enforceable. The director shall not be required to include in the emissions trading provisions any emissions units for

which emissions are not quantifiable or for which there are no replicable procedures to enforce the emissions trades.

(iii) The permit shall require compliance with all applicable requirements.

(2) Notification.

- (a) Written notification to the administrator and director required under paragraph (H)(1) of this rule shall be provided a minimum of seven days in advance of the proposed changes, unless the change is associated with, or in response to, emergency conditions.
- (b) If less than seven days notice is provided because of a need to respond more quickly to such emergency conditions, the permittee shall provide notice to the administrator and the director as soon as possible after learning of the need to make the change.
- (c) The permittee and the director shall thereafter attach each such notice to their copy of the relevant permit.
- (d) The written notification required in paragraph (H)(1)(a) of this rule shall include:
  - (i) For sources making changes under paragraph (H)(1)(a) of this rule:
    - (a) A brief description of the change within the permitted facility,
    - (b) The date on which the change will occur,
    - (c) Any change in emissions, and
    - (d) Any permit term or condition that is no longer applicable as a result of the change;
  - (ii) For sources implementing emission trades as provided in paragraph (H)(1)(b) of this rule:
    - (a) When the proposed change will occur,
    - (b) A brief description of each change,
    - (c) Any change in emissions,
    - (d) The pollutants emitted subject to the emission trade,

- (e) The provisions in the applicable implementation plan that provide for the emissions trade with which the source will comply and any other information as may be required by the provisions in the applicable implementation plan authorizing the trade, and
      - (f) The permit requirements with which the source will comply; or
    - (iii) For sources implementing emission trades as provided in paragraph (H)(1)(c) of this rule:
      - (a) When the change will occur,
      - (b) Description of the changes in emissions that will result, and
      - (c) How these increases and decreases in emission will comply with the terms and conditions of the permit.
  - (3) Permit shield. The permit shield provided under paragraph (F) of this rule shall not apply to changes made under this paragraph, except those provided for in paragraph (H)(1)(c) of this rule; however, the protection of the permit shield shall continue to apply to operations and emissions that are not affected by the change, provided that the permittee complies with the terms and conditions of the permit applicable to such operations and emissions. The permit shield may be reinstated for emissions and operations affected by the change:
    - (a) If subsequent changes cause the facility's operations and emissions to revert to those anticipated in the permit and the permittee resumes compliance with the terms and conditions of the permit; or
    - (b) If the permittee obtains a significant modification to the permit pursuant to this chapter to modify the change in the permit. Nothing in this paragraph shall be construed as requiring such a modification to be obtained.
- (I) Off-permit changes. The owner or operator of a Title V source may make any change in its operations or emissions at the source that is not specifically addressed or prohibited in the Title V permit, without obtaining an amendment or modification of the permit, provided that the following conditions are met:
  - (1) The change does not result in conditions that violate any applicable requirements or that violate any existing federally enforceable permit term or condition;
  - (2) The permittee provides contemporaneous written notice of the change to the director and the administrator, except that no such notice shall be required for changes involving insignificant emission levels or activities as defined in rule 3745-77-01 of the Administrative Code, that are not subject to one or more applicable requirements. Such written notice shall describe each such change,

the date of such change, any change in emissions or pollutants emitted, and any federally applicable requirement that would apply as a result of the change;

- (3) The change shall not qualify for the permit shield under paragraph (F) of this rule;
- (4) The permittee shall keep a record describing all changes made at the source that result in emissions of a regulated air pollutant subject to an applicable requirement, but not otherwise regulated under the permit, and the emissions resulting from those changes; and
- (5) The change is not subject to any applicable requirement under Title IV of the act or is not a modification under any provision of Title I of the Act.

Paragraph (I) of this rule applies only to modification or amendment of the permittee's Title V permit. The change made may require a permit-to-install under Chapter 3745-31 of the Administrative Code if the change constitutes a modification as defined in that chapter. Nothing in paragraph (I) of this rule shall affect any applicable obligation under Chapter 3745-31 of the Administrative Code.

(A) Action on application.

- (1) A Title V permit, permit modification, or permit renewal may be issued only if all of the following conditions have been met:
  - (a) The director has received a complete application for a Title V permit, permit modification, or permit renewal, as determined in accordance with rule 3745-77-05 of the Administrative Code;
  - (b) Except for modifications qualifying for minor permit modification procedures under paragraphs (C)(1) and (C)(2) of this rule, the director has complied with the requirements for public participation under paragraph (G) of this rule and the procedural requirements of division (F)(1) of section 3704.036 of the Revised Code;
  - (c) The director has complied with the requirements for notifying and responding to affected states under paragraph (B) of rule 3745-77-09 of the Administrative Code;
  - (d) The director determines that the conditions of the permit provide for compliance with all applicable requirements, and the requirements of this chapter; and
  - (e) The administrator has received a copy of the proposed permit and any notices required under rule 3745-77-09 of the Administrative Code, and has not objected to issuance of the permit under paragraph (C) of rule 3745-77-09 of the Administrative Code within the time specified therein.
- (2) Following review of a Title V application submitted in accordance with this chapter, the director shall issue a draft permit or denial, permit modification or denial, or permit renewal or denial for public comment, in accordance with paragraph (G) of this rule. The draft shall be accompanied by a statement that sets forth the legal and factual basis for the draft permit conditions (including references to the applicable statutory or regulatory provisions). The director shall send this statement of basis to the administrator, to the applicant, and to any other person who requests it.

- (3) Following the completion of the public comment period on the draft permit, the director shall send the applicant a preliminary proposed permit that incorporates all changes the director proposes to make to the draft permit and the director's responses to comments received on the draft permit. Within fourteen days after receipt of a preliminary proposed permit, the applicant may request an informal conference with the director. In the event of such request from the applicant, the director shall hold a conference with the applicant on the preliminary proposed permit prior to the submission of a proposed permit to the administrator pursuant to paragraph (A)(4) of this rule.
- (4) Following completion of the public comment period and review of the preliminary proposed permit as provided in paragraphs (A)(2) and (A)(3) of this rule, the director shall prepare and submit to the administrator a proposed Title V permit, permit modification, or permit renewal. Any denial of an application for a Title V permit, permit modification, or permit renewal shall be made in compliance with division (F)(1) of section 3704.036 of the Revised Code.
  - (a) The proposed Title V permit or proposed denial, modification, or renewal shall be submitted to the administrator no later than forty-five days preceding the deadline for final action under paragraph (A)(6) of this rule and shall contain all applicable requirements that have been promulgated and made applicable to the source as of the date of issuance of the draft permit.
  - (b) If new applicable requirements are promulgated or otherwise become newly applicable to the source following submission of the proposed permit to the administrator but before issuance of the final permit, the director shall extend or reopen the public comment period to solicit comment on additional permit provisions to implement the new applicable requirements.
- (5) The following actions shall occur after review by the administrator:
  - (a) Upon receipt of notice that the administrator will not object to a proposed Title V permit, permit modification, or permit renewal that has been submitted for the administrator's review pursuant to this rule, the director shall issue the Title V permit, permit modification, or permit renewal forthwith and in any event no later than the tenth day following receipt of the notice from the administrator.
  - (b) Upon the passage of forty-five days after submission of a Title V permit, permit modification, or permit renewal for the administrator's review, and if the administrator has not notified the director of an objection to the proposed permit, the director shall issue the permit, permit modification, or permit renewal forthwith and in no event later than the fifty-fifth day following submission for review by the administrator.

- (c) If the administrator objects to the proposed Title V permit, permit modification, or permit renewal, the director shall consult with the administrator and the applicant and shall submit a revised proposed Title V permit to the administrator within ninety days after the date of the administrator's objection, unless the director determines that one or more revisions sought by the administrator are inconsistent with applicable statutes or regulations. In that case, the director may so inform the administrator within ninety days following the date of the objection and decline to make those particular revisions. In no event shall the director issue a final Title V permit over the administrator's objection.
- (6) Except as provided in this paragraph or in paragraph (C)(1)(e) or (C)(2)(d) of this rule, the director shall take final action on each initial or renewal application or application for a modification within eighteen months after receiving a complete application. For each such application that the director does not propose to deny, the director shall submit a proposed Title V permit, modification, or renewal to the administrator no later than forty-five days before the deadline for final action established in this paragraph.
- (a) The director shall take final action on at least one third of all initial permit applications annually during the first two years and shall take action on the remainder of the initial applications in the third year following approval of the Title V permit program.
  - (b) The director shall take action on any permit, permit modification, or permit renewal application submitted in compliance with regulations promulgated under Titles IV or V of the act for the permitting of affected sources under the acid rain program within the time specified in those regulations.
  - (c) The director may suspend action on a pending Title V permit application if the applicant has made appropriate application to the director pursuant to Chapter 3745-31 or 3745-35 of the Administrative Code to establish federally enforceable limits that would exempt the source in question from the requirement to obtain a Title V permit under rule 3745-77-02 of the Administrative Code until after the director has taken final action on the application under Chapter 3745-31 or 3745-35 of the Administrative Code.
  - (d) The director shall take action on any complete permit application containing any early reduction demonstration under Section 112(i)(5) of the act within nine months of receipt of the complete application.
  - (e) Pursuant to division (F) of section 3704.036 of the Revised Code, the director's failure to take final action on a Title V permit renewal or modification application within the times prescribed by this chapter, may be appealed to the environmental review appeals commission under section 3745.04 of the Revised Code.

(B) Administrative permit amendments.

- (1) An administrative permit amendment may be made by the director consistent with the following:
  - (a) The director shall take no more than sixty days from receipt of a request for an administrative permit amendment to take final action on such request, and may incorporate such changes without providing notice to the public or affected states, provided that it designates any such permit revisions as administrative permit amendments made pursuant to this paragraph.
  - (b) The director shall submit a copy of the revised permit to the administrator.
  - (c) The source may implement the changes addressed in the request for an administrative amendment immediately upon submittal of the request.
- (2) Permit shield. Administrative permit amendments defined in paragraph (C)(5) of rule 3745-77-01 of the Administrative Code shall be covered by the permit shield in paragraph (F) of rule 3745-77-07 of the Administrative Code upon the director's final action granting a request for such administrative permit amendment.
- (3) Administrative permit amendments for purposes of the acid rain portion of the permit shall be governed by regulations promulgated under Title IV of the act.

(C) Permit modification.

A permit modification is any revision to a Title V permit that cannot be accomplished under the administrative permit amendment provisions under paragraph (B) of this rule. A permit modification for purposes of the acid rain portion of the permit shall be governed by regulations promulgated under Title IV of the act.

- (1) Minor permit modification procedures.
  - (a) Criteria. Minor permit modification procedures may be used only for those permit modifications that:
    - (i) Do not violate any applicable requirement;
    - (ii) Do not involve significant changes to existing monitoring, reporting, or recordkeeping requirements in the permit;

[Comment: Because of the size limitations on insignificant emissions units, the consequences of a change in monitoring at an insignificant

emissions unit would be quite small. Such a change is not significant and, therefore, is eligible for minor modification procedures. In addition, a relaxation in a recordkeeping and reporting requirement for a best available technology emission limitation or operational restriction for an insignificant emissions unit does not require the use of the significant modification process. Such a relaxation to the recordkeeping or reporting requirements would have small consequences, and such a change could be made using the permit modification procedures stated in this paragraph.]

- (iii) Do not require or change a case-by-case determination of an emission limitation or other standard, or a source-specific determination for temporary sources of ambient impacts, or a visibility or increment analysis;

[Comment: Case-by-case determinations of best available technology emission limitations, operational restrictions, or other standards for insignificant emissions units are created by the permit to install and then are incorporated into the Title V permit. The Title V permit does not create or change the best available technology emission limitation, operational restriction or other standard; the best available technology emission limitation, operational restriction or other standard may be created and changed only by the permit to install. Therefore, the Title V permit does not "require or change" such an emission limit, operational restriction or other standard. Accordingly, in such case the minor modification procedures may be used.]

- (iv) Do not seek to establish or change a permit term or condition for which there is no corresponding underlying applicable requirement and that the source assumed to avoid an applicable requirement to which the source would otherwise be subject. Such terms and conditions include:
    - (a) A federally enforceable emissions cap assumed to avoid classification as a modification under any provision of Title I of the act; or
    - (b) An alternative emissions limit approved pursuant to regulations promulgated under Section 112(i)(5) of the act;
  - (v) Are not modifications under any provision of Title I of the act; and
  - (vi) Are not required under paragraph (C)(3) of this rule to be processed as a significant modification.
- (b) Notwithstanding paragraphs (C)(1)(a) and (C)(2)(a) of this rule, minor permit modification procedures may be used for permit modifications

involving the use of economic incentives, marketable permits, emissions trading, and other similar approaches, to the extent that such minor permit modification procedures are explicitly provided for in the applicable implementation plan or in applicable requirements promulgated by the administrator.

- (c) **Application.** An application requesting the use of minor permit modification procedures shall meet the requirements of rule 3745-77-03 of the Administrative Code and shall include the following:
  - (i) A description of the change, the emissions resulting from the change, and any new applicable requirements that will apply if the change occurs;
  - (ii) The source's suggested draft permit;
  - (iii) Certification by a responsible official, consistent with paragraph (D) of rule 3745-77-03 of the Administrative Code that the proposed modification meets the criteria for use of minor permit modification procedures and a request that such procedures be used; and
  - (iv) Completed applications in a form and manner prescribed by the director to use to notify the administrator and affected states as required under rule 3745-77-09 of the Administrative Code.
- (d) **Administrator and affected state notification.** Within five working days of receipt of a complete permit modification application, the director shall meet the obligation of paragraphs (A)(1) and (B)(1) of rule 3745-77-09 of the Administrative Code to notify the administrator and affected states of the requested permit modification. The director promptly shall send any notice required under paragraph (B)(2) of rule 3745-77-09 of the Administrative Code to the administrator.
- (e) **Timetable for issuance.** Within ninety days of the director's receipt of an application under minor permit modification procedures, or fifteen days after the end of the administrator's forty-five day review period under paragraph (C) of rule 3745-77-09 of the Administrative Code, whichever is later, the director shall:
  - (i) Issue the permit modification as proposed;
  - (ii) Propose to deny the permit modification application that will be effective in thirty days unless an adjudication hearing is requested;
  - (iii) Determine that the requested modification does not meet the minor permit modification criteria and should be reviewed under the

significant modification procedures under paragraph (C)(3) of this rule;  
or

(iv) Revise the draft permit modification and transmit to the administrator the new proposed permit modification as required by paragraph (A) of rule 3745-77-09 of the Administrative Code.

(f) Ability to make changes. The applicant may make the change proposed in its minor permit modification application immediately after it files such application. After the applicant makes the change allowed by the preceding sentence, and until the director takes any of the actions specified in paragraph (C)(1)(e) of this rule, the owner or operator of the source must comply with both the applicable requirements governing the change and the proposed permit terms and conditions. During this time period, the owner or operator of the source need not comply with the existing permit terms and conditions the applicant seeks to modify. However, if the owner or operator of the source fails to comply with the proposed permit terms and conditions during this time period, the existing permit terms and conditions the applicant seeks to modify may be enforced against the source.

(g) Permit shield. The permit shield under paragraph (F) of rule 3745-77-07 of the Administrative Code shall not extend to minor permit modifications.

(2) Group processing of minor permit modifications.

Consistent with this paragraph, the director may modify the procedure outlined in paragraph (C)(1) of this rule to process groups of an applicant's applications for certain modifications eligible for minor permit modification processing including modifications for insignificant emissions units subject to one or more applicable requirements.

(a) Criteria. Group processing of modifications may be used only for those permit modifications that:

(i) Meet the criteria for minor permit modification procedures under paragraph (C)(1)(a) of this rule; and

(ii) Collectively are below ten per cent of the emissions allowed by the permit for the emissions unit for which the change is requested, below twenty per cent of the applicable definition of major source in rule 3745-77-01 of the Administrative Code, or below five TPY, whichever is least.

(b) Application. An applicant requesting the use of group processing procedures shall meet the requirements of rule 3745-77-03 of the Administrative Code and shall include the following in the application:

- (i) A description of the change, the emissions resulting from the change, and any new applicable requirements that will apply if the change occurs;
  - (ii) The source's suggested draft permit;
  - (iii) Certification by a responsible official, consistent with paragraph (D) of rule 3745-77-03 of the Administrative Code, that the proposed modification meets the criteria for use of group processing procedures and a request that such procedures be used;
  - (iv) A list of the applicant's other pending applications for group processing, and a determination of whether the requested modification, aggregated with these other applications, equals or exceeds the threshold set under paragraph (C)(2)(a)(ii) of this rule;
  - (v) Certification, consistent with paragraph (D) of rule 3745-77-03 of the Administrative Code that the applicant has notified the administrator of the proposed modification. Such notification need contain only a brief description of the requested modification; and
  - (vi) Completed applications, in the form and manner prescribed by the director to notify the administrator and affected states as required under rule 3745-77-09 of the Administrative Code.
- (c) Administrator and affected state notification. On a quarterly basis or within five business days of receipt of an application demonstrating that the aggregate of a source's pending applications equals or exceeds the threshold level set under paragraph (C)(2)(a)(ii) of this rule, whichever is earlier, the director promptly shall meet the obligation under paragraphs (A)(1) and (B)(1) of rule 3745-77-09 of the Administrative Code to notify the administrator and affected states of the requested permit modifications. The director shall send any notice required under paragraph (B)(2) of rule 3745-77-09 of the Administrative Code to the administrator.
- (d) Timetable for issuance. The provisions of paragraph (C)(1)(e) of this rule shall apply to modifications eligible for group processing, except that the director shall take one of the actions specified in paragraphs (C)(1)(e)(i) to (C)(1)(e)(iv) of this rule within one hundred eighty days of receipt of the application or fifteen days after the end of the administrator's forty-five day review period under paragraph (C) of rule 3745-77-09 of the Administrative Code, whichever is later.
- (e) Ability to make changes. The director may allow the owner or operator of the source to make the changes proposed for group processing in the minor

permit modification application immediately after the applicant files such the source makes the changes allowed by the preceding sentence, and until the director takes any of the actions specified in paragraphs (C)(1)(e)(i) to (C)(1)(e)(iv) of this rule, the owner or operator of the source must comply with both the applicable requirements governing the changes and the proposed permit terms and conditions. During this time period, the owner or operator of the source need not comply with the existing permit terms and conditions it seeks to modify. However, if the owner or operator of the source fails to comply with the proposed permit terms and conditions during this time period, the existing permit terms and conditions the applicant seeks to modify may be enforced against the owner or operator of the source.

- (f) Permit shield. The permit shield under paragraph (F) or rule 3745-77-07 of the Administrative Code shall not extend to group processing of minor permit modifications.

(3) Significant modification procedures.

- (a) Criteria. Significant modification procedures shall be used for applicants requesting permit modifications that do not qualify as minor permit modifications or as administrative amendments, including:
  - (i) Significant change in existing monitoring permit terms or conditions; or
  - (ii) A relaxation of reporting or recordkeeping permit terms or conditions, except for those relating to best available technology emission limitations, operational restrictions or other standards for insignificant emission units, which are subject to the minor modification procedures and comments set forth at paragraph (C)(1) of this rule.
- (b) No permit condition that is rendered inapplicable as a result of a modification shall be construed to prohibit the modification.
- (c) Significant permit modifications shall meet all requirements of this chapter, including those for applications, public participation, review by affected states, and review by the administrator, as they apply to permit issuance and permit renewal. The director shall complete review on a majority of significant permit modifications within nine months after receipt of a complete application.
- (d) A complete application for a significant permit modification shall be filed within twelve months after commencing operation of the modified source, provided that where an existing Title V permit would prohibit construction or operation of such modified source, a Title V permit revision must be obtained before operation of such modified source. This paragraph shall not

affect the applicability of Chapter 3745-31 of the Administrative Code to any source that is required to have a permit to install under that chapter.

(D) Reopening for cause.

(1) Causes for reopening prior to permit expiration. Each issued permit shall include provisions specifying the conditions under which the permit will be reopened prior to the expiration of the permit. A permit shall be reopened and revised under any of the following circumstances:

(a) Additional applicable requirements under the Act become applicable to a major Title V source with a remaining permit term of three or more years. Such a reopening shall be completed not later than eighteen months after promulgation of the applicable requirement. No such reopening is required if the effective date of the requirement is later than the date on which the permit is due to expire, unless the original permit or any of its terms and conditions has been extended pursuant to paragraph (E)(1) of this rule.

(b) Additional requirements (including excess emissions requirements) become applicable to an affected source under the acid rain program. Upon approval by the administrator, excess emissions offset plans shall be deemed to be incorporated into the permit.

(c) The director or the administrator determines that the permit contains a material mistake or that inaccurate statements were made in establishing the emissions standards or other terms or conditions of the permit.

(d) The administrator or the director determines that the permit must be revised or revoked to assure compliance with the applicable requirements.

(2) Reopening procedure.

Procedures to reopen and issue a permit shall follow the same procedures as apply to initial permit issuance under paragraph (A) of this rule and, except as provided in paragraph (B)(3) of this rule, shall affect only those parts of the permit for which cause to reopen exists. Such reopening shall be made as expeditiously as practicable.

(3) Advance notice to permittee.

Reopenings under paragraph (D)(1) of this rule shall not be initiated before a notice of such intent is provided to the owner or operator of the Title V source by the director at least thirty days in advance of the date that the permit is to be reopened, except that the director may provide a shorter time period in the case of an emergency.

(4) Action by the administrator.

Within ninety days, or longer if the administrator extends this period, after receipt of notification by the administrator that the administrator has found cause to exist to revoke, modify, or revoke and reissue a permit pursuant to paragraph (D)(1) of this rule, the director shall forward to the administrator a proposed determination of revocation, modification, or revocation and reissuance, as appropriate. Within ninety days receipt of the administrator's objection to a proposed determination, the director shall address and act upon the administrator's objection unless the director determines that one or more revisions sought by the administrator are inconsistent with applicable statutes or regulations.

(E) Renewal applications and processing.

- (1) If the director fails to take a final action on the application to renew a Title V permit prior to expiration of the Title V permit and the owner or operator of the source filed the application in accordance with paragraph (E) of rule 3745-77-04 of the Administrative Code and such application was deemed complete in accordance with paragraph (A) of rule 3745-77-05 of the Administrative Code. All provisions and authorizations of the expired permit shall remain in effect until the director's final action on the pending renewal application. If a Title V operating permit expires after a timely and complete renewal application has been filed in accordance with paragraph (E) of rule 3745-77-04 of the Administrative Code with the director, all authorizations and provisions under the permit shield of the expired permit shall remain in effect until the director's final action on the pending renewal application.
- (2) If a permit has been reopened for cause within two years of the expiration of the permit, the owner or operator of the source may elect to use the reopening procedure to renew the entire permit.

(F) Revocation.

- (1) The director may revoke a Title V permit if the director determines that any of the federally enforceable conditions, terms, or standards of paragraph (A)(7)(a) of rule 3745-77-07 of the Administrative Code or any other applicable requirement have been or will be violated. Where the director determines that such violations occurred only at individual emission units covered by the Title V permit, the director may revoke the Title V permit and reissue it for only those emission units that are not in violation.
- (2) The director shall afford a prompt hearing to any permit holder whose Title V permit is revoked in the manner prescribed in Chapter 3745-47 of the Administrative Code.

- (3) Revocation and reissuance of a Title V permit shall be final thirty days after service of notice to the permit holder.
- (4) A Title V permit that has been revoked shall be surrendered forthwith to the director.

(G) Public participation.

Except for modifications qualifying for minor permit modification procedures, all permit proceedings, including initial permit issuance, significant modifications, and renewals, shall follow the procedures in this paragraph for public comment and hearing:

- (1) Notice shall be given: by publication in a newspaper of general circulation in the area where the source is located and in the "Ohio EPA Weekly Review"; to persons on a mailing list developed by the director, including those who request in writing to be on the list; and by other means if necessary to assure adequate notice to the affected public;
- (2) The notice shall identify the affected facility; the name and address of the permittee; the name and address of the director; the activity or activities involved in the permit action; the emissions change involved in any permit modification; the name, address, and telephone number of a person from whom interested persons may obtain additional information, including copies of the permit draft, the application, all relevant supporting materials, including any permit application, compliance plan, permit, and monitoring and compliance certification report pursuant to Section 503(e) of the act, except for information entitled to confidential treatment pursuant to Section 114(c) of the act, and all other materials available to the director that are relevant to the permit decision; a brief description of the comment procedures required by this chapter; and the time and place of any hearing that may be held, including a statement of procedures to request a hearing (unless a hearing has already been scheduled);
- (3) The director shall provide such notice and opportunity for participation by affected states as is provided for by rule 3745-77-09 of the Administrative Code;
- (4) The director shall provide at least thirty days for public comment and shall give notice of any public hearing at least thirty days in advance of the hearing;
- (5) The director shall keep a record of the commenters and also of the issues raised during the public participation process and such records shall be available to the public.

(H) Termination.

- (1) Other than upon Title V permit expiration, a Title V permit, or terms and conditions within a Title V permit that apply to a specific emissions unit or activity level, terminate when:
  - (a) The responsible official of a permittee submits to the Ohio environmental protection agency and the Ohio environmental protection agency receives a document certifying permanent shutdown of the Title V facility or, as applicable, the specific emissions unit within the facility;
  - (b) A change is made at the Title V facility such that the facility is no longer a Title V source pursuant to paragraph (B) of rule 3745-77-02 of the Administrative Code, and the owner or operator submits to the director a complete application for a permit-to-install and operate (PTIO) that demonstrates the facility is no longer a Title V source under paragraph (B) of rule 3745-77-02 of the Administrative Code or is exempt pursuant to paragraph (C) of rule 3745-77-02 of the Administrative Code from the requirements to obtain a Title V permit, and the director has issued a PTIO pursuant to Chapter 3745-31 of the Administrative Code for all air contaminant sources at the facility for which a PTIO is required if the sources are not covered by a Title V permit; or
  - (c) The owner or operator submits to the director a complete application for a PTIO requesting federally-enforceable restrictions (i.e. application for a federally enforceable PTIO (FEPTIO)) that demonstrates upon issuance of an FEPTIO the facility will no longer be Title V source under paragraph (B) of rule 3745-77-02 of the Administrative Code because it will be exempt pursuant to paragraph (C)(4) of rule 3745-77-02 of the Administrative Code from the requirements to obtain a Title V permit, and the director has issued the FEPTIO and, as needed, a PTIO, for all air contaminant sources at the facility for which a FEPTIO and, if applicable, a PTIO is required if the sources are not covered by a Title V permit.
- (2) Provided a complete application for a PTIO or FEPTIO is filed under paragraph (H)(1)(b) or (H)(1)(c) of this rule six months prior to expiration of the Title V permit, if the director fails to take final action on the application, the owner or operator is permitted by this rule to continue to operate the facility in accordance with all terms and conditions and authorizations of the expired Title V permit until the director takes final action on the application.
- (3) An owner or operator shall submit to the Ohio environmental protection agency by no later than the date required by the terminated Title V permit or by the terms and conditions of the expired Title V permit applied to the source under paragraph (H)(2) of this rule, any quarterly deviation reports, semiannual deviation reports, annual compliance certifications, or similar report or certification, for the last period during which the Title V permit applied to the

source, or during which the terms and conditions of the expired Title V permit applied to the source under paragraph (H)(2) of this rule.

**3745-77-09 Permit review by the administrator and affected states.**

[Comment: For dates of non-regulatory government publications, publications of recognized organizations and associations, federal rules, and federal statutory provisions referenced in this rule, see paragraph (SS) of rule 3745-77-01 of the Administrative Code titled "Referenced materials."]

**(A) Transmission of information to the administrator.**

- (1) Unless the administrator waives this requirement as provided in 40 CFR 70.8(a)(2), the director shall provide to the administrator a copy of each Title V permit application (including any application for Title V permit modification), each proposed Title V permit, and each final Title V permit. The director may require the applicant to provide a copy of the permit application (including the compliance plan) directly to the administrator. Upon agreement with the administrator, the director may submit to the administrator a Title V permit application summary form and any relevant portion of the Title V permit application and compliance plan, in place of the complete permit application and compliance plan.
- (2) The director shall keep for five years such records and submit to the administrator such information as the administrator may reasonably require to ascertain whether the state program complies with the requirements of the Act and 40 CFR Part 70.

**(B) Review by affected states.**

- (1) The director shall give notice of each draft Title V permit to any affected state on or before the time that the director provides this notice to the public under paragraph (G) of rule 3745-77-08 of the Administrative Code except to the extent paragraphs (C)(1)(d) and (C)(2)(c) of rule 3745-77-08 of the Administrative Code require the timing of the notice to be different.
- (2) As part of the director's submittal of a proposed Title V permit to the administrator (or as soon as possible after the submittal for minor permit modification procedures under paragraphs (C)(1) or (C)(2) of rule 3745-77-08 of the Administrative Code, the director shall notify the administrator and any affected state in writing of any refusal by the director to accept all recommendations for the proposed Title V permit that the affected state submitted during the public or affected state review period. The notice shall include the director's reasons for not accepting any such recommendation. The director is not required to accept recommendations that are not based on federally applicable requirements or the requirements of this chapter.

**(C) Objection by the administrator.**

- (1) No Title V permit for which an application must be transmitted to the administrator under paragraph (A) of this rule shall be issued if the administrator objects to its issuance in writing within forty-five days of receipt of the proposed permit and all necessary supporting information.
- (2) The director shall, within ninety days after the date of receipt of an objection under paragraph (C)(1) of this rule, revise and submit a proposed Title V permit in response to the objection unless the director determines that no change in the proposed permit is necessary or appropriate to comply with applicable requirements or requirements of this chapter. In no event shall the director issue a Title V permit over the objection of the administrator.

3745-77-10      **State law applicability.**

[Comment: For dates of non-regulatory government publications, publications of recognized organizations and associations, federal rules, and federal statutory provisions referenced in this rule, see paragraph (SS) of rule 3745-77-01 of the Administrative Code titled "Referenced materials."]

(A) General authority for state only permit terms and conditions.

The director shall have authority to include in Title V permits any terms and conditions that are authorized by Ohio law, including terms and conditions that are consistent with the requirements of Chapters 3745-31 of the Administrative Code that would be applicable in the absence of the Title V permit program. Such terms and conditions shall be "state only" requirements. The director shall prescribe the manner and form for the inclusion of such information in Title V permit applications submitted pursuant to this chapter as is necessary to implement state only requirements applicable to one or more emissions units at a Title V source.

(B) Separation of state only and federally enforceable permit terms and conditions.

Terms and conditions of a Title V permit that are imposed pursuant to state law only shall be identified in the permit as not federally enforceable and shall be differentiated from federally enforceable permit terms and conditions that are required under the act or any applicable requirements. Notwithstanding the separation of state only and federally enforceable terms and conditions in a Title V permit, all federally enforceable terms and conditions in a Title V permit shall be enforceable by the director as well as by the administrator.

(C) Revision of state only permit terms and conditions.

The director may modify or eliminate any state only terms and conditions of a Title V permit in accordance with the same procedures applicable to the modification or elimination of terms and conditions in a permit-to-install or permit-to-install and operate (PTIO) pursuant to Chapter 3745-31 of the Administrative Code, provided that such modification or elimination does not result in a Title I modification and does not cause the source to become subject to an applicable requirement or violate any federally enforceable term or condition in the Title V permit. Nothing in this paragraph shall affect the applicability of the notification and recordkeeping requirements of paragraph (I) of rule 3745-77-07 of the Administrative Code.

(D) Violation of state only permit terms and conditions.

No person shall violate any state only term or condition of a Title V permit. Any violation of any state only term or condition of a Title V permit shall be a violation of division (J)(2) of section 3704.05 of the Revised Code. The director may suspend or revoke the state only authority to operate one or more emissions units subject to a Title V permit consistent with paragraph (B) of rule 3745-31-07 of the

Administrative Code. No person shall operate an emissions unit after the effective date of a final suspension or revocation of the applicable state only portion of a Title V permit.

## **Chapter 3745-78: Air Pollution Control Fees**

*Contact:* Mike Ahern 614-644-3631  
Mike.Ahern@EPA.State.Oh.US

3745-78-01      **Definitions.**

(A) Except as otherwise provided in this rule, the definitions in rule 3745-77-01 of the Administrative Code shall apply to this chapter.

(B) The following definitions shall apply exclusively to this chapter:

- (1) "Actual emissions" means the amount of regulated air pollutants emitted from a stationary source during a calendar year.
- (2) "Actual construction of the source" means the initiation of physical on-site construction activities in connection with improvements to the source that are permanent in nature, including, without limitation, the installation of building supports and foundations and the laying of underground pipework.
- (3) "Submit" or "submitted" means to present, or to have presented, to the Ohio environmental protection agency a document that is required under this chapter, and to have that document received by the Ohio environmental protection agency (or postmarked) by midnight on the due date specified in this chapter. Date of the receipt of the document is demonstrated by the postmark date, if sent by United States postal service; the electronic signature date, if submitted through the Ohio environmental protection agency's electronic reporting system; the transmittal date, if submitted through facsimile; or the date of the signature of the Ohio environmental protection agency employee receiving the document, if hand delivered in person to the Ohio environmental protection agency. The hard copy form with original signature must be provided to the Ohio environmental protection agency after a facsimile is submitted.
- (4) "Synthetic minor facility" means a facility for which one or more permits to install or permits to operate have been issued for the air contaminant sources at the facility that include terms and conditions that lower the facility's potential to emit air contaminants below the major source thresholds established in rules adopted under section 3704.036 of the Revised Code.

**3745-78-02 Fee emission reports.**

- (A) By June 15, 1994 and April fifteenth of each year thereafter, except as provided by paragraph (G) of this rule, owners or operators of sources subject to the Title V permit program pursuant to rule 3745-77-02 of the Administrative Code, including facilities with a potential to emit any one regulated air pollutant of a quantity greater than or equal to one hundred tons per year, or any one hazardous air pollutant (HAP) greater than or equal to ten tons per year, or any combination of hazardous air pollutants greater than twenty-five tons per year, must submit, in a form and manner prescribed by the director, a fee emission report that quantifies the actual emission data for particulate matter, sulfur dioxide, organic compounds, nitrogen oxides, and lead (but shall not also be considered particulate matter). For purposes of this requirement, the potential to emit emission data shall be calculated annually on the basis of the facts as they existed on December thirty-first of the previous year. The owner or operator of a facility shall pay fees on the facility's actual emissions as specified in division (C) of section 3745.11 of the Revised Code.
- (B) For any facility whose owner or operator does not file a fee emission report required in paragraph (A) of this rule, the director may require the owner or operator of that facility to submit annually potential to emit emission data to support the claim that it is not subject to the requirements of paragraph (A) of this rule based upon engineering calculations, emission factors, material balance calculations, or performance testing methods.
- (C) By April 15, 1996, and by April fifteenth every two years thereafter, except as provided by paragraph (G) of this rule, owners or operators of facilities whose sum of actual annual emissions of particulate matter, sulfur dioxide, organic compounds, nitrogen oxide, and lead (but shall not also be considered particulate matter) from the emission units at the facility for which the owner or operator is required to apply for a permit or variance under Chapter 3745-35 of the Administrative Code, are greater than or equal to fifty tons per year and are not required to apply for a permit under the provisions of rule 3745-77-02 of the Administrative Code, must submit in a format and manner prescribed by the director a fee emission report that includes the following:
- (1) For each regulated air pollutant, potential to emit emission data calculated annually on the basis of the facts as they existed on December thirty-first of the previous year.
  - (2) For particulate matter, sulfur dioxide, organic compounds, nitrogen oxide, and lead, actual emission data for each of the prior two calendar years. Owners or operators of facilities shall pay fees on actual emissions for each of the prior two calendar years as specified in division (D) of section 3745.11 of the Revised Code.
- (D) By April 15, 1996, and by April fifteenth every two years thereafter, except as provided by paragraph (G) of this rule, owners or operators of facilities whose sum

of actual annual emissions from the facility of particulate matter, sulfur dioxide, organic compounds, nitrogen oxide, and lead (but shall not also be considered particulate matter) are less than fifty tons per year, shall attest to the fact that the owner or operator of the facility is not required to apply for a permit under the provisions of rule 3745-77-02 of the Administrative Code, and that the sum of the pollutants stated in this paragraph are less than fifty tons per year. This statement shall be made on the fee emission report for the prior two years as specified in division (D) of section 3745.11 of the Revised Code. Owners or operators of facilities subject to this paragraph shall be responsible for payment of these fees.

- (E) For any owner or operator who claims to be subject to the provisions of paragraph (D) of rule 3745-78-02 of the Administrative Code, the director may require the owner or operator of that facility to submit annual actual emission or potential to emit data to support this claim based upon engineering calculations, emission factors, material balance calculations, or performance testing methods.
- (F) If authorized to collect a fee under division (D) of section 3745.11 of the Revised Code, owners or operators of a synthetic minor facility must submit, by April 15, 2000 and each year thereafter, except as provided by paragraph (G) of this rule, in a form and manner prescribed by the director, a fee emission report that quantifies the actual emission data for particulate matter, sulfur dioxide, organic compounds, nitrogen oxides, and lead (but shall not also be considered particulate matter). For purposes of this requirement, the fee emission report shall be calculated annually. The owner or operator of a facility identified in this paragraph shall pay fees on the facility's actual emissions as specified in division (D) of section 3745.11 of the Revised Code.
- (G) Fee emission reports due during calendar year 2008 and required under paragraph (A), (C) or (F) of this rule and the statement required under paragraph (D) of this rule, shall be submitted by June 6, 2008.

## **Chapter 3745-79: Small Business Technical Assistance**

*Contact:* Rick Carleski 614-728-1742  
Rick.Carleski@EPA.State.Oh.US

**3745-79-01 Definitions.**

Comment: For dates of non-regulatory government publications, publications of recognized organizations and associations, federal rules, and federal statutory provisions referenced in this rule, see the "Incorporation by Reference" paragraph at the end of this rule.

- (A) Except as otherwise provided in this rule, the definitions in rule 3745-15-01 of the Administrative Code shall apply to this chapter.
- (B) "Small business stationary source" means any building, structure, facility, or installation that emits any federally regulated air pollutant and is owned or operated by a person who employs one hundred or fewer individuals; is a small business concern as defined in the Small Business Act; is not a major stationary source as defined in Section 302 (j) of the Clean Air Act; does not emit fifty tons or more per year of any federally regulated air pollutant or any hazardous air pollutant, and emits less than seventy-five tons per year of all federally regulated air pollutants. For the purposes of this definition, the number of individuals employed will be based upon a full-time equivalent employee calculation. Total annual hours worked by all employees, including contract employees, divided by two thousand, will equal the number of individuals employed by the owner or operator of a source.
- (C) "Small business technical and environmental compliance assistance program" means the program established pursuant to section 3704.18 of the Revised Code.
- (D) Incorporation by reference. This chapter includes references to certain matter or materials. The text of the incorporated materials is not included in the regulations contained in this chapter. The materials are hereby made a part of the regulations in this chapter. For materials subject to change, only the specific version specified in the regulation are incorporated. Material is incorporated as it exists on the effective date of this rule. Except for subsequent annual publication of existing (unmodified) Code of Federal Regulation compilations, any amendment or revision to a referenced document is not incorporated unless and until this rule has been amended to specify the new dates.
  - (1) Availability. The materials incorporated by reference are available as follows:
    - (a) Clean Air Act. Information and copies may be obtained by writing to: "Superintendent of Documents, Attn: New Orders, PO Box 371954, Pittsburgh, PA 15250-7954." The full text of the Act as amended in 1990 is also available in electronic format at [www.epa.gov/oar/caa/](http://www.epa.gov/oar/caa/). A copy of the Act is also available for inspection and copying at most public libraries and "The State Library of Ohio."
    - (b) Code of Federal Regulations. Information and copies may be obtained by writing to: "Superintendent of Documents, Attention: New Orders, PO Box

371954, Pittsburgh, PA 15250-7954." The full text of the CFR is also available in electronic format at [www.access.gpo.gov/nara/cfr/](http://www.access.gpo.gov/nara/cfr/). The CFR compilations are also available for inspection and copying at most public libraries and "The State Library of Ohio."

- (c) Ohio EPA weekly review. Information and copies may be obtained by writing to: Ohio EPA Legal Department, 122 S. Front Street, Columbus, Ohio, 43125. The full text of the Ohio EPA Weekly Review is also available in electronic format at [www.epa.state.oh.us/legal/pubnote.html/](http://www.epa.state.oh.us/legal/pubnote.html/). The Ohio EPA Weekly Review compilations are also available for inspection and copying at most Ohio public libraries and "The State Library of Ohio."
- (d) Small Business Act. Information and copies may be obtained by writing to : "Superintendent of Documents, Attn: New Orders, PO Box 371954, Pittsburgh, PA 15250-7954." The full text of the Act is also available in electronic format at <http://www.sba.gov/library/lawroom.html>. A copy of the Act is also available for inspection and copying at most public libraries and "The State Library of Ohio."
- (e) United States Code. Information and copies may be obtained by writing to: "Superintendent of Documents, Attn: New Orders, PO Box 371954, Pittsburgh, PA 15250-7954." The full text of the United States Code is also available in electronic format at <http://www4.law.cornell.edu/uscode/>. The USC compilations are also available for inspection and copying at most public libraries and "The State Library of Ohio."

(2) Incorporated materials.

**3745-79-02 Registration.**

Any owner or operator whose building, structure, facility, or installation meets the definition of a small business stationary source may register with the Ohio environmental protection agency as a small business stationary source. Such registration will entitle the registrant to receive all notices issued pursuant to the small business technical and environmental compliance assistance program.

**3745-79-03 Notices relating to rights and obligations.**

Comment: For dates of non-regulatory government publications, publications of recognized organizations and associations, federal rules, and federal statutory provisions referenced in this rule, see the last paragraph of rule 3745-79-01 of the Administrative Code titled "Incorporation by reference."

**(A)**

(1) If public notice is not otherwise required under Chapter 3745-47 or 3745-49 of the Administrative Code, the director will give public notice of each proposed regulation or standard relevant to the small business technical and environmental compliance assistance program to be adopted or issued under the Clean Air Act and under Chapter 3704. of the Revised Code. Such notice shall be in the form and manner described in paragraph (B) of this rule.

(B) The public notices required pursuant to paragraph (A)(1) of this rule shall be published at least once in the english language at least thirty days prior to the date of adoption of such regulation or standard, in the Register of Ohio. The public notice shall also be published in the "Ohio EPA Weekly Review," and, in addition, shall be mailed to each individual registered under rule 3745-79-02 of the Administrative Code. The public notice shall consist of a synopsis of the proposed regulation or standard or, in the case of guidance issued, the topics covered, and, if a public hearing is required by law, the date, time, and place of public hearing on the proposed regulation or standard.

(C) The director shall take such additional steps as are reasonably calculated to inform owners and operators of small business stationary sources of proposed regulations and standards relevant to them. However, the giving of such additional notice by any means other than as specified in paragraph (B) of this rule shall not in any way invalidate any action that may be taken by the director with regard to any such regulation or standard.

(D) Copies of any proposed regulations and standards noticed pursuant to paragraph (B) of this rule shall be available from the date of the notice from the director for any person who wishes to obtain a copy. However, failure to furnish such copies to any person shall not invalidate any action that may be taken by the director with regard to the guidance on any such regulation or standard.

## **Chapter 3745-80: Statewide Motor Vehical Anti-Tempering Program**

*Contact:* Mike Riggleman 614-644-3590  
Mike.Riffleman@EPA.State.Oh.US

3745-80-01      **Definitions.**

"[Comment: For dates of non-regulatory government publications, publications of recognized organizations and associations, federal rules, and federal statutory provisions referenced in this rule, see paragraph (M) of this rule titled "Referenced materials."]

- (A) "Anti-tampering inspector" means any authorized representative of the director with the authority to investigate, inspect and otherwise determine compliance with sections 3704.16 to 3704.162 of the Revised Code.
- (B) "Anti-Tampering Procedures Manual" means the most recent, official document issued by the Ohio environmental protection agency to anti-tampering inspectors detailing the procedures to be followed when conducting inspections to determine compliance with sections 3704.16 to 3704.162 of the Revised Code.
- (C) "Clean Air Act Amendments" means the Clean Air Act, and regulations adopted under it.
- (D) "Director" means the director of the Ohio environmental protection agency or the director's authorized representative.
- (E) "Emission control system" means any system designated by the United States environmental protection agency as an emission control system under title II of the Clean Air Act Amendments and includes any device or element of design of the system.
- (F) "Emission system reference manual" means the most current reference manual with emission system application tables available from a source approved by the director or the director's designee.
- (G) "Lessee" means any person who uses a motor vehicle pursuant to a bailment, lease or other contractual arrangement under which a charge is made for its use at a periodic rate for a term of thirty continuous days or more.
- (H) "Motor vehicle facility" means premises owned, operated, rented, leased or otherwise used by any person engaged in the sale, lease, service or rental of motor vehicles or motor vehicle parts.
- (I) "Person" means the state, any political subdivision, public or private corporation, partnership, firm, association, individual, organization or other entity.
- (J) "Renter" means any person who uses a motor vehicle pursuant to a bailment, lease or other contractual arrangement under which a charge is made for its use at a periodic rate for a term of thirty continuous days or less.
- (K) "Tamper with" means to remove permanently or temporarily, except for repair, replacement or converting for use of a clean alternative fuel, to bypass, defeat, or

render inoperative, in whole or in part, any emission control system that is installed on or in a motor vehicle, for purposes of defeating, bypassing or otherwise circumventing the requirements of the Clean Air Act Amendments and/or Chapter 3704. of the Revised Code and the rules promulgated thereunder.

(L) "Ultimate purchaser" with respect to any new motor vehicle, means the first person, other than a dealer in its capacity as a dealer, who is a good faith purchaser of such new motor vehicle for purposes other than resale.

(M) Referenced materials. This chapter includes references to certain subject matter or materials. The text of the referenced materials is not included in the rules contained in this chapter. Information on the availability of the referenced materials as well as the date of, and/or the particular edition or version of the material is included in this rule. For materials subject to change, only the specific version specified in this rule are referenced. Material is referenced as it exists on the effective date of this rule. Except for subsequent annual publication of existing (unmodified) Code of Federal Regulation compilations, any amendment or revision to a referenced document is not applicable unless and until this rule has been amended to specify the new dates.

(1) Availability. The referenced materials are available as follows:

(a) Code of Federal Regulations. Information and copies may be obtained by writing to: "Superintendent of Documents, Attn: Electronic products, PO Box 37082, Washington DC, 15250-7954." The full text of the CFR is also available in electronic format at [www.access.gpo.gov/nara/cfr/](http://www.access.gpo.gov/nara/cfr/). The CFR compilations are also available for inspection and copying at most public libraries and "The State Library of Ohio."

(b) Mobile Source Enforcement Memorandum No. 1A: Information and copies are available by writing to: "U.S. Environmental Protection Agency, 1200 Pennsylvania Ave., NW, Washington, D.C. 20460-0001." The full text of the document is also available in electronic format at <http://www.epa.gov/compliance/resources/policies/civil/caa/mobile/tamper-memo1a.pdf>. The document is also available for inspection and copying at most public libraries and "The State Library of Ohio."

3745-80-02      **Tampering prohibitions.**

- (A) No person shall sell, offer for sale, possess for sale, advertise, manufacture, install or use any part or component intended, by such person, for use with or as part of any motor vehicle when a purpose is to bypass, defeat, or render inoperative, in whole or part, the emission control system.
- (B) No person shall introduce leaded fuel into a motor vehicle that is designed, manufactured or certified by the United States environmental protection agency to use only unleaded fuels.
- (C) No person shall tamper with any emission control system installed on or in a motor vehicle prior to its sale and delivery to the ultimate purchaser or lessee.
- (D) No person shall knowingly operate a motor vehicle that has been tampered with.
- (E) No person shall knowingly sell, lease, rent or offer to sell, lease, or rent or offer to transfer title or a right to possession of a motor vehicle that has been tampered with. In the case of a motor vehicle dealer licensed under Chapter 4517. of the Revised Code, a motor vehicle is considered to be offered for sale, lease or rental at a motor vehicle facility unless it is separated or otherwise segregated from other motor vehicles being offered for sale, lease or rental, or unless a placard meeting the following requirements is displayed on the vehicle's windshield.
  - (1) The statement "this vehicle is not being offered for lease or rental at this time" shall be printed on the placard using block letters of no less than forty point bold type.
  - (2) The dimensions of the placard shall be at least eight and one half inches by eleven inches.
- (F) No person shall knowingly tamper with any emission control system installed on or in a motor vehicle after sale, lease, or rental and delivery of the motor vehicle to the ultimate purchaser, lessee or renter.
- (G) Any person who witnesses any violation of this rule or of sections 3704.16 to 3704.162 of the Revised Code, or suspects a violation has occurred, may report the alleged violation by contacting the mobile sources section of Ohio environmental protection agency or the appropriate Ohio environmental protection agency district office or local air pollution control agency.
- (H) The following motor vehicles are exempt from the requirements of this rule:
  - (1) Race motor vehicles which are operated off of public roads and highways one hundred per cent of the time.

- (2) Motor vehicles for which salvage certificates of title have been issued under division (C) of section 4504.11 of the Revised Code.

02/03/2010  
Date

Promulgated Under: 119.03  
Statutory Authority: 3704.03  
Rule Amplifies: 3704.16  
Prior Effective Dates: 11/8/94, 1/22/05

[Comment: For dates of non-regulatory government publications, publications of recognized organizations and associations, federal rules, and federal statutory provisions referenced in this rule, see paragraph (M) of rule 3745-80-01 of the Administrative Code titled "Referenced materials."]

- (A) For the purposes of investigating reported tampering violations and conducting routine audits to determine compliance with sections 3704.16 to 3704.162 of the Revised Code, the director may inspect, during normal business hours, any motor vehicle or documents located at a motor vehicle facility.
- (B) All anti-tampering inspectors shall satisfactorily complete the training required to receive a designation of authorized representative of the United States environmental protection agency for the purpose of conducting anti-tampering investigations or other motor vehicle anti-tampering training approved by the director. Each anti-tampering inspector who satisfactorily completes the training shall be issued a certificate by the Ohio environmental protection agency. The certificate shall be valid for three years from the date of issuance. Renewal anti-tampering training may be required in order to renew the certificate. If an inspector fails to satisfactorily complete any required renewal training prior to the certificate expiration date, the inspector shall surrender the certificate.
- (C) Upon receipt of a reported anti-tampering violation regarding a motor vehicle facility, or for the purpose of inspecting a motor vehicle facility to determine compliance with sections 3704.16 to 3704.162 of the Revised Code, anti-tampering inspectors shall inspect a variety of motor vehicle makes, model years and types so as to provide an adequate cross section of the motor vehicles offered for sale at the motor vehicle facility.
- (D) During motor vehicle facility investigations, or investigations of reported violations, pursuant to paragraph (G) of rule 3745-80-02 of the Administrative Code, anti-tampering inspectors shall inspect the motor vehicle emission systems in accordance with the procedures listed in the statewide anti-tampering procedures manual. Motor vehicles shall be inspected for compliance with the original manufacturer's United States environmental protection agency design specifications. After-market replacement parts and add-on and modified parts meeting the performance criteria specified in 40 Code of Federal Regulations, Part 85, Subpart V; the requirements of the United States environmental protection agency policy document, memorandum 1A or have not otherwise been found in violation of the anti-tampering provisions of the Clean Air Act as amended, are considered to be in compliance with this chapter.
- (E) The emission system reference manual or the motor vehicle emission control information (VECI) label located on each motor vehicle shall be used to determine the motor vehicle emissions systems requiring inspection. If a conflict exists, the VECI label shall take precedence. The emission systems subject to inspection may include, but not be limited to:

- (1) Catalytic converter system;
- (2) Evaporative emission system;
- (3) Fuel inlet restrictor;
- (4) Positive crankcase ventilation system;
- (5) Thermostatic air intake system;
- (6) Air injection reaction system;
- (7) Exhaust gas recirculation system;
- (8) Oxygen sensor; and/or
- (9) Computer control system.

## **Chapter 3745-100: Toxic Chemical Release Reporting (TRI)**

*Contact:* Muhammad Elsalahat 614-644-3608  
Muhammad.Elsalahat@EPA.State.Oh.US

3745-100-01      **Definitions.**

[Comment: For dates of non-regulatory government publications, publications of recognized organizations and associations, federal rules, and federal statutory provisions referenced in this rule, see the "Incorporation by Reference" section at the end of this rule.

Terms defined in sections 313(b)(1)(C) and 329 of Title III, Emergency Planning and Community Right-to-Know Act, of the Superfund Amendments and Reauthorization Act of 1986, and not explicitly defined herein are used within the meaning given in Title III. For the purpose of this chapter:

- (A) "Act" means Title III, Emergency Planning and Community Right-to-Know Act, of the Superfund Amendments and Reauthorization Act of 1986, contained in 42 USC sections 11001 to 11050.
- (B) "Article" means a manufactured item which:
  - (1) Is formed to a specific shape or design during manufacture;
  - (2) Has end-use functions dependent in whole or part upon its shape or design during end use; and
  - (3) Does not release a toxic chemical under normal conditions of processing or use of that item at the facility or establishment.
- (C) "Benification" means the preparation of ores to regulate the size (including crushing and grinding) of the product, to remove unwanted constituents, or to improve the quality, purity, or grade of a desired product.
- (D) "Boiler" means an enclosed device using controlled flame combustion and having the following characteristics:
  - (1)
    - (a) The unit must have physical provisions for recovering and exporting thermal energy in the form of steam, heated fluids, or heated gases; and
    - (b) The unit's combustion chamber and primary energy recovery section(s) must be of integral design. To be of integral design, the combustion chamber and the primary energy recovery section(s) (such as waterwalls and superheaters) must be physically formed into one manufactured or assembled unit. A unit in which the combustion chamber and the primary energy recovery section(s) are joined only by ducts or connections carrying

flue gas is not integrally designed; however, secondary energy recovery equipment (such as economizers or air preheaters) need not be physically formed into the same unit as the combustion chamber and the primary energy recovery section. The following units are not precluded from being boilers solely because they are not integral design: process heaters (units that transfer energy directly to a process stream), and fluidized bed combustion units; and

- (c) While in operation, the unit must maintain a thermal energy recovery efficiency of at least sixty per cent, calculated in terms of the recovered energy compared with the thermal value of the fuel; and
  - (d) The unit must export and utilize at least seventy-five per cent of the recovered energy, calculated on an annual basis. In this calculation, no credit shall be given for recovered heat used internally in the same unit. (Examples of internal use are the preheating of fuel or combustion air, and the driving of induced or forced draft fans or feedwater pumps); or
- (2) The unit is one which the director has determined, on a case-by-case basis, to be a boiler, after considering the standards in 40 CFR 260.32.
- (E) "Coal extraction" means the physical removal or exposure of ore, coal, minerals, waste rock, or overburden prior to beneficiation, and encompasses all extraction-related activities prior to beneficiation. Extraction does not include beneficiation (including coal preparation), mineral processing, in situ leaching or any further activities.
  - (F) "Customs territory of the United States" means the fifty states, the District of Columbia and Puerto Rico.
  - (G) "Disposal" means any underground injection, placement in landfills/surface impoundments, land treatment, or other international land disposal.
  - (H) "Establishment" means an economic unit, generally at a single physical location, where business is conducted or where services or industrial operations are performed.
  - (I) "Facility" means all buildings, equipment, structures and other stationary items which are located on a single site or on contiguous or adjacent sites and which are owned or operated by the same person (or by any person who controls, is controlled by, or under common control with such person). A facility may contain more than one establishment.
  - (J) "Full-time employee" means two thousand hours per year of full-time equivalent employment. A facility would calculate the number of full-time employees by

totaling the hours worked during the calendar year by all employees, including contract employees, and dividing that total by two thousand hours.

- (K) "Import" means to cause a chemical to be imported into the customs territory of the United States. For purposes of this definition, "to cause" means to intend that the chemical be imported and to control the identity of the imported chemical and the amount to be imported.
- (L) "Industrial furnace" means any of the following enclosed devices that are integral components of manufacturing processes and that use thermal treatment to accomplish recovery of materials or energy:
- (1) Cement kilns.
  - (2) Lime kilns.
  - (3) Aggregate kilns.
  - (4) Phosphate kilns.
  - (5) Coke ovens.
  - (6) Blast furnaces.
  - (7) Smelting, melting and refining furnaces (including pyrometallurgical devices such as cupolas, reverberator furnaces, sintering machines, roasters, and foundry furnaces).
  - (8) Titanium dioxide chloride process oxidation reactors.
  - (9) Methane reforming furnaces.
  - (10) Pulping liquor recovery furnaces.
  - (11) Combustion devices used in the recovery of sulfur values from spent sulfuric acid.
  - (12) Halogen acid furnaces (HAFS) for the production of acid from halogenated hazardous waste generated by chemical production facilities where the furnace is located on the site of a chemical production facility, the acid product has a halogen acid content of at least three percent, the acid product is used in a manufacturing process, and, except for hazardous waste burned as fuel, hazardous waste fed to the furnace has a minimum halogen content of twenty percent as-generated.

- (13) Such other devices as the director may, after notice and comment, add to this list on the basis of one or more of the following factors:
- (a) The design and use of the device primarily to accomplish recovery of material products;
  - (b) The use of the device to burn or reduce raw materials to make a material product;
  - (c) The use of the device to burn or reduce secondary materials as effective substitutes for raw materials, in processes using raw materials as principal feedstocks;
  - (d) The use of the device to burn or reduce secondary materials as ingredients in an industrial process to make a material product;
  - (e) The use of the device in common industrial practice to produce a material product; and
  - (f) Other factors, as appropriate.
- (M) "Manufacture" means to produce, prepare, import or compound a toxic chemical. Manufacture also applies to a toxic chemical that is produced coincidentally during the manufacture, processing, use or disposal of another chemical or mixture of chemicals, including a toxic chemical that is separated from other chemicals or mixture of chemicals as a byproduct, and a toxic chemical that remains in that other chemical or mixture of chemicals as an impurity.
- (N) "Mixture" means any combination of two or more chemicals if the combination is not, in whole or in part, the result of a chemical reaction. However, if the combination was produced by a chemical reaction, but could have been produced without a chemical reaction, it is also treated as a mixture. A mixture also includes any combination which consists of a chemical and associated impurities.
- (O) "NAICS" means North American industrial classification system.
- (P) "Ohio EPA" means the Ohio environmental protection agency.
- (Q) "Otherwise use" or "use" means any use of a toxic chemical, including a toxic chemical contained in a mixture or other trade name product or waste, that is not covered by the terms "manufacture" or "process". Otherwise use of a toxic chemical does not include disposal, stabilization (without subsequent distribution in commerce), or treatment for destruction unless:
- (1) The toxic chemical that was disposed, stabilized, or treated for destruction was received from off-site for the purposes of further waste management; or

- (2) The toxic chemical that was disposed, stabilized, or treated for destruction was manufactured as a result of waste management activities on materials received from off-site for the purposes of further waste management activities.

Relabeling or redistributing a container of a toxic chemical where no repackaging of the toxic chemical occurs does not constitute use or processing of the toxic chemical.

- (R) "Overburden" means the unconsolidated material that overlies a deposit of useful materials or ores. It does not include any portion of ore or waste rock.
- (S) "Previously classified" means properly classified according to paragraph (B) of rule 3745-100-05 of the Administrative Code under a given SIC code, as identified in the "Standard Industrial Classification Manual."
- (T) "Process" means the preparation of a toxic chemical, after its manufacture, for distribution in commerce:
- (1) In the same form or physical state as, or in a different form or physical state from, that in which it was received by the person so preparing such substance; or
  - (2) As part of an article containing the toxic chemical. Process also applies to the processing of a toxic chemical contained in a mixture or trade name product.
- (U) "RCRA approved test method" includes SW-846 method 9095A ("Paint Filter Liquids Test") contained in "SW-846 Test Methods for Evaluating Solid Waste, Physical/Chemical Methods,".
- (V) "Release" means any spilling, leaking, pumping, pouring, emitting, emptying, discharging, injecting, escaping, leaching, dumping or disposing into the environment (including the abandonment or discarding of barrels, containers and other closed receptacles) of any toxic chemical.
- (W) "Senior management official" means an official with management responsibility for the person or persons completing the report, or the manager of environmental programs for the facility or establishment, or for the corporation owning or operating the facility or establishment responsible for certifying similar reports under other environmental regulatory requirements.
- (X) "SIC" means standard industrial classification.
- (Y) "Technically qualified individual" means a person or persons who:

- (1) Because of education, training or experience, or a combination of these factors, is capable of understanding the health and environmental risks associated with the chemical substance which is used under his or her supervision;
  - (2) Is responsible for enforcing appropriate methods of conducting scientific experimentation, analysis, or chemical research to minimize such risks; and
  - (3) Is responsible for the safety assessments and clearances related to the procurement, storage, use and disposal of the chemical substance as may be appropriate or required within the scope of conducting a research and development activity.
- (Z) "Title III" means Title III, Emergency Planning and Community Right-to-Know Act, of the Superfund Amendments and Reauthorization Act of 1986, contained in 42 USC sections 11001 to 11050.
- (AA) "Toxic chemical" means a chemical or chemical category listed in rule 3745-100-10 of the Administrative Code.
- (BB) "Trade name product" means a chemical or mixture of chemicals that is distributed to other persons and that incorporate a toxic chemical component that is not identified by the applicable chemical name or "Chemical Abstracts Service" registry number listed in rule 3745-100-10 of the Administrative Code.
- (CC) "Treatment for destruction" means the destruction of a toxic chemical in waste such that the substance is no longer the toxic chemical subject to reporting under Section 313 of the Emergency Planning and Community Right-to Know Act of 1986. Treatment for destruction does not include the destruction of a toxic chemical in waste where the toxic chemical has a heat value greater than five thousand British thermal units and is combusted in any device that is an industrial furnace or boiler.
- (DD) "USEPA" means the United States environmental protection agency.
- (EE) "Waste stabilization" means any physical or chemical process used to either reduce the mobility of hazardous constituents in a hazardous waste or eliminate free liquid as determined by a Resource Conservation and Recovery Act approved test method for evaluating solid waste as defined in this section. A waste stabilization process includes mixing the hazardous waste with binders or other materials, and curing the resulting hazardous waste and binder mixture. Other synonymous terms used to refer to this process are "stabilization," "waste fixation," or "waste solidification".
- (FF) Incorporation by reference. This chapter includes references to certain matter or materials. The text of the incorporated materials is not included in the regulations contained in this chapter. The materials are hereby made a part of the regulations in this chapter. For materials subject to change, only the specific version specified in the regulation are incorporated. Material is incorporated as it exists on the effective

date of this rule. Except for subsequent annual publication of existing (unmodified) Code of Federal Regulation compilations, any amendment or revision to a referenced document is not incorporated unless and until this rule has been amended to specify the new dates.

(1) Availability. The materials incorporated by reference are available as follows:

- (a) Chemical abstract service (CAS). Information can be obtained by writing to: "Chemical Abstract Service, 2540 Olentangy River Road, Columbus, OH 43202," or by visiting their web site at [www.cas.org](http://www.cas.org).
- (b) Code of Federal Regulations. Information and copies may be obtained by writing to: "Superintendent of Documents, Attention: New Orders, PO Box 371954, Pittsburgh, PA 15250-7954." The full text of the CFR is also available in electronic format at [www.access.gpo.gov/nara/cfr/](http://www.access.gpo.gov/nara/cfr/). The CFR compilations are also available for inspection and copying at most public libraries and "The State Library of Ohio."
- (c) Consumer Product Safety Act. Information and copies may be obtained by writing to: "U.S. Consumer Product Safety Commission, Washington, D.C. 20207-0001." Or electronically at <http://www.cpsc.gov/businfo/cpsatext.html>. A copy of the Act is also available for inspection and copying at most public libraries and "The State Library of Ohio."
- (d) Dunn & Bradstreet. Information may be obtained by contacting: The D&B Corporation, 103 JFK Parkway, Short Hills, NJ 07078; or by calling their customer service number at 1-800-234-3467 or by visiting the web site at <http://www.dnb.com/us/>
- (e) Emergency Planning and Community Right-to-Know Act of 1986. Information and copies may be obtained by writing to: "Superintendent of Documents, Attention: New Orders, PO Box 371954, Pittsburgh, PA 15250-7954." The full text of the Act is also available in electronic format at <http://www4.law.cornell.edu/uscode/42/ch116.html>. The act is also available for inspection and copying at most public libraries and "The State Library of Ohio."
- (f) Resource Conservation and Recovery Act. Information and copies may be obtained by writing to: "Superintendent of Documents, Attn: New Orders, PO Box 371954, Pittsburgh, PA 15250-7954." The full text of the act is also available in electronic format at <http://www4.law.cornell.edu/uscode/42/ch82.html>. A copy of the act is also available for inspection and copying at most public libraries and "The State Library of Ohio."

- (g) Restatement of Torts, Sec. 757, comment B, 1939. Available for inspection and copying at most public libraries and "The State Library of Ohio."
- (h) Standard industrial classification manual (SICM). Information and copies may be ordered by writing to: "U.S. Department of Commerce, Technology Administration, National Technical Information Service, Springfield, Virginia, 22161." or by calling 1-800-553-6847. A copy of the manual is also available for inspection and copying at most public libraries and "The State Library of Ohio."
- (i) Substitute Senate Bill 367 of the 117th General Assembly. This law, Chapter 3750. of the Revised Code (emergency planning, ORC), provides, for the implementation of EPCRA in Ohio. The administrative body for the implementation of Chapter 3750. of the Revised Code, is the state emergency response commission (SERC), created by executive order in 1987. A copy of the bill is available for inspection and copying at most public libraries and "The State Library of Ohio."
- (j) Superfund Amendments and Reauthorization Act of 1986. Information and copies may be obtained by writing to: "Superintendent of Documents, Attention: New Orders, PO Box 371954, Pittsburgh, PA 15250-7954." The full text of the act is also available in electronic format at <http://www4.law.cornell.edu/uscode/42/ch103.html>. The act is also available for inspection and copying at most public libraries and "The State Library of Ohio."
- (k) SW-846 method 9095A as contained in "SW-846 Test Methods for Evaluating Solid Waste, Physical/Chemical Methods," Information and copies may be obtained by writing to: "Superintendent of Documents, Attn: New Orders, PO Box 371954, Pittsburgh, PA 15250-7954." These documents are also available in electronic format at <http://www.epa.gov/epaoswer/hazwaste/test/main.htm>. SW-846 methods are also available for inspection and copying at most public libraries and "the State library of Ohio."
- (l) United States Code. Information and copies may be obtained by writing to: "Superintendent of Documents, Attn: New Orders, PO Box 371954, Pittsburgh, PA 15250-7954." The full text of the United States Code is also available in electronic format at <http://www4.law.cornell.edu/uscode/>. The U.S.C. compilations are also available for inspection and copying at most public libraries and "The State Library of Ohio."
- (m) USEPA Form R (EPA Form 9350-1) Form R schedule 1, and Form A. The most current version of USEPA Form R (EPA Form 9350-1), Form R schedule 1, and Form A may be found on the following USEPA program web site: <http://www.epa.gov/tri>. Any subsequent changes to the Form R,

Form R Schedule 1, or Form A will be posted on this web site. Submitters may also contact the TRI program at (202) 564-9554 to obtain this information.

(2) Incorporated materials.

- (a) 15 USC 2051 to 2084; "Consumer Product Safety Act;" Public Law 92-573, 86 Stat. 1207, Oct. 27, 1972.
- (b) 29 CFR 1910.1200; "Hazard communication;" 59 FR 6170, Feb 9, 1994, as amended at 59 FR 17479, Apr. 13 1994; 59 FR 65948, Dec. 22, 1994; 61 FR 9245, Mar. 7. 1996.
- (c) 40 CFR 260.32; "Variances to be classified as a boiler;" 50 FR 662, Jan. 4, 1985, as amended at 59 FR 48041, Sept. 19, 1994.
- (d) 40 CFR 350.7; "Substantiating claims of trade secrecy;" 53 FR 28801, July 29, 1988.
- (e) 40 CFR 350.16; "Address to send trade secrecy claims and petitions requesting disclosure;" 68 FR 64724, Nov. 14, 2003.
- (f) 40 CFR 372; "Toxic Chemical Release Reporting: Community Right-to-Know;" 53 FR 4525, Feb. 16, 1988, as amended at 53 FR 12748, Apr. 18, 1988; 55 FR 30656, July 26, 1990; 53 FR 12748, Apr. 18, 1988; 56 FR 29185, June 26, 1991; 59 FR 61501, Nov. 30, 1994; 59 FR 61502, Nov. 30, 1994; 62 FR 23891, May 1, 1997;; 62 FR 23892, May 1, 1997; 64 FR 58750, Oct. 29, 1999; 64 FR 58751, Oct. 29, 1999; 64 FR 58753, Oct. 29, 1999; 66 FR 4527, Jan. 17, 2001.
- (g) 40 CFR 372.27; "Alternate thresholds and certifications;" 59 FR 61502, Nov. 30, 1994, as amended at 64 FR 58750, Oct. 29, 1999; 71 FR 76944, Dec. 22, 2006.
- (h) 40 CFR 372.85; "Toxic Chemical Release Reporting form and instructions;" 56 FR 29186, June 26, 1991, as amended at 64 FR 58753, Oct. 29, 1999.
- (i) 42 USC 11001 to 11050; "Title III of the Superfund Amendments and Reauthorization Act of 1986; Contained in 42 USC 11001 to 11050; published January 6, 2003 in Supplement II of the 2000 edition of the United States Code; Pub. L. 99-499, Title III, Section 301-330, October 17, 1986, 100 Stat.1729-1758.
- (j) "Consumer Product Safety Act;" Public Law 92-573, 86 Stat. 1207, Oct. 27, 1972.

- (k) Resource Conservation and Recovery Act; Subtitle C, contained in 42 USC Section 6921 to 6939e, "Hazardous Waste Management;" Pub. L. 89-272, title II, Sec. 3001, as added Pub. L. 94-580, Sec. 2, Oct. 21, 1976, 90 Stat. 2806; amended Pub. L. 96-482, Sec. 7, Oct. 21, 1980, 94 Stat. 2336; Pub. L. 98-616, title II, Secs. 221(a), 222, 223(a), Nov. 8, 1984, 98 Stat. 3248, 3251, 3252; Pub. L. 104-119, Sec. 4(1), Mar. 26, 1996, 110 Stat. 833.
- (l) "Restatement of Torts, Sec. 757, comment B, 1939".
- (m) Section 313 of the Emergency Planning and Community Right-to-Know Act; "Toxic chemical release forms;" contained in 42 USC 11023 and 11048; published January 3, 2005 in Supplement IV of the 2000 edition of the United States Code; Pub. L. 99-499, title III, Sec. 313, Oct. 17, 1986, 100 Stat. 1741.
- (n) Section 329 of the Emergency Planning and Community Right-to-Know Act; contained in 42 USC 11049; "Definitions;" published January 3, 2005 in Supplement IV of the 2000 edition of the United States Code; Pub. L. 99-499, title III, Sec. 329, Oct. 17, 1986, 100 Stat. 1757.
- (o) Standard industrial classification manual; United States. office of management and budget; last amended 1988.
- (p) SW-846 method 9095A; "Paint filter liquids test;" revision 2, November, 2004.
- (q) Title III of the Superfund Amendments and Reauthorization Act of 1986; contained in 42 USC 11001 to 11050. Published January 3, 2005 in Supplement IV of the 2000 edition of the United States Code; Pub. L.99-499, Title III, Section 301-330, October 17, 1986, 100 Stat.1729-1758.
- (r) USEPA Form A (EPA Form 9350-2); most current form as reviewed and approved by the United States office of management and budget.
- (s) USEPA Form R and USEPA Form R Schedule 1 (EPA Form 9350-1); most current form as reviewed and approved by the United States office of management and budget.

3745-100-02      **Persons subject to this chapter.**

Owners and operators of facilities described in rules 3745-100-05 and 3745-100-09 of the Administrative Code are subject to the requirements of this chapter. If the owner and operator of a facility are different persons, only one need report under rule 3745-100-07 of the Administrative Code or provide a notice under rule 3745-100-09 of the Administrative Code for each toxic chemical in a mixture or trade name product distributed from the facility. However, if no report is submitted or notice provided, the Ohio EPA will hold both the owner and the operator liable under section 3751.10 of the Revised Code, except as provided in paragraph (E) of rule 3745-100-08 and paragraph (G) of rule 3745-100-09 of the Administrative Code.

Effective: 09/25/2008

3745-100-03      **Record keeping.**

- (A) Each person subject to the reporting requirements of this chapter must retain the following records for a period of three years from the date of submission of a report under rule 3745-100-07 of the Administrative Code:
- (1) A copy of each report submitted by the person under rule 3745-100-07 of the Administrative Code.
  - (2) All supporting materials and documentation used by the person to make the compliance determination that the facility or establishments is a covered facility under rule 3745-100-05 or 3745-100-09 of the Administrative Code.
  - (3) Documentation supporting the report submitted under rule 3745-100-07 of the Administrative Code including:
    - (a) Documentation supporting any determination that a claimed allowable exemption under rule 3745-100-08 of the Administrative Code applies.
    - (b) Data supporting the determination of whether a threshold under rule 3745-100-06 of the Administrative Code applies for each toxic chemical.
    - (c) Documentation supporting the calculations of the quantity of each toxic chemical released to the environment or transferred to an off-site location.
    - (d) Documentation supporting the use indications and quantity on-site reporting for each toxic chemical, including dates of manufacturing, processing or use.
    - (e) Documentation supporting the basis of estimate used in developing any release or off-site transfer estimates for each toxic chemical.
    - (f) Receipts or manifests associated with the transfer of each toxic chemical in waste to off-site locations.
    - (g) Documentation supporting reported waste treatment methods, estimates of treatment efficiencies, ranges of influent concentrations to such treatment, the sequential nature of treatment steps, if applicable, and the actual operating data, if applicable, to support the waste treatment efficiency estimate for each toxic chemical.
- (B) Each person subject to the notification requirements of this chapter must retain the following records for a period of three years from the date of the submission of a notification under rule 3745-100-09 of the Administrative Code.

- (1) All supporting materials and documentation used by the person to determine whether a notice is required under rule 3745-100-09 of the Administrative Code.
  - (2) All supporting materials and documentation used in developing each required notice under rule 3745-100-09 of the Administrative Code and a copy of each notice.
- (C) Records retained under this rule must be maintained at the facility to which the report applies or from which a notification was provided. Such records must be readily available for purposes of inspection by the Ohio EPA.
- (D) Each owner or operator who determines that the owner operator may apply the alternate threshold as specified under rule 3745-100-14(A) of the Administrative Code must retain the following records for a period of three years from the date of the submission of the certification statement as required under rule 3745-100-14(B) of the Administrative Code.
- (1) A copy of each certification statement submitted by the person under rule 3745-100-14(B) of the Administrative Code.
  - (2) All supporting materials and documentation used by the person to make the compliance determination that the facility or establishment is eligible to apply the alternate threshold as specified in rule 3745-100-14 of the Administrative Code.
  - (3) Documentation supporting the certification statement submitted under rule 3745-100-14(B) of the Administrative Code including:
    - (a) Data supporting the determination of whether the alternate threshold specified under rule 3745-100-14(A) of the Administrative Code applies for each toxic chemical.
    - (b) Documentation supporting the calculation of annual reportable amount, as defined in rule 3745-100-14(A) of the Administrative Code, for each toxic chemical, including documentation supporting the calculations and the calculations of each data element combined for the annual reportable amount.
    - (c) Receipts or manifests associated with the transfer of each chemical in waste to off-site locations.

Effective: 01/16/2006

3745-100-05      **Covered facilities for toxic chemical release reporting.**

[Comment: For dates of non-regulatory government publications, publications of recognized organizations and associations, federal rules, and federal statutory provisions referenced in this rule, see the "Incorporation by Reference" paragraph at the end of rule 3745-100-01 of the Administrative Code.]

A facility that meets all of the following criteria for a calendar year is a covered facility for that calendar year and must report under rule 3745-100-07 of the Administrative Code.

- (A) The facility has ten or more full-time employees.
- (B) The facility is in a standard industrial classification (SIC) (as in effect on January 1, 1987) major group or industry code listed in paragraph (A) of rule 3745-100-17 of the Administrative Code for which the corresponding North American industry classification (NAICS) (as in effect on January 1, 2007, for reporting year 2008 and thereafter) subsector and industry codes are listed in paragraphs (B) and (C) of rule 3745-100-17 of the Administrative Code) by virtue of the fact that it meets one of the following criteria:
  - (1) The facility is an establishment with a primary SIC major group or industry code listed in paragraph (A) of rule 3745-100-17 of the Administrative Code, or a primary NAICS subsector or industry code listed in paragraph (B) or (C) of rule 3745-100-17 of the Administrative Code.
  - (2) The facility is a multi-establishment complex where all establishments have primary SIC major group or industry codes listed in paragraph (A) of rule 3745-100-17 of the Administrative Code, or primary NAICS subsector or industry codes listed in paragraph (B) or (C) of rule 3745-100-17 of the Administrative Code.
  - (3) The facility is a multi-establishment complex in which one of the following is true:
    - (a) The sum of the value of services provided and/or products shipped and/or produced from those establishments that have primary SIC major group or industry codes listed in paragraph (A) of rule 3745-100-17 of the Administrative Code, or primary NAICS subsector or industry codes listed in paragraph (B) or (C) of rule 3745-100-17 of the Administrative Code is greater than fifty per cent of the total value of all services provided and/or products shipped from and/or produced by all establishments at the facility.
    - (b) One establishment having a primary SIC major group or industry code listed in paragraph (A) of rule 3745-100-17 of the Administrative Code, or a

primary NAICS subsector or industry code listed in paragraph (B) or (C) of rule 3745-100-17 of the Administrative Code contributes more in terms of value of services provided and/or products shipped from and/or produced at the facility than any other establishment within the facility.

- (c) The facility manufactured (including imported), processed or otherwise used a toxic chemical in excess of an applicable threshold quantity of that chemical as set forth in rule 3745-100-06, 3745-100-14, or 3745-100-16 of the Administrative Code.

3745-100-06      **Thresholds for reporting.**

Except as provided in rule 3745-100-14 and rule 3745-100-16 of the Administrative Code, the threshold amounts for purposes of reporting under rule 3745-100-07 of the Administrative Code for toxic chemicals are as follows.

- (A) With respect to a toxic chemical manufactured (including imported) or processed at a facility during the following calendar years:
  - (1) 1987 - seventy-five thousand pounds of the chemical manufactured or processed for the year.
  - (2) 1988 - fifty thousand pounds of the chemical manufactured or processed for the year.
  - (3) 1989 and thereafter - twenty-five thousand pounds of the chemical manufactured or processed for the year.
- (B) With respect to a chemical otherwise used at a facility, ten thousand pounds of the chemical used for the applicable calendar year.
- (C) With respect to activities involving a toxic chemical at a facility, when more than one threshold applies to the activities, the owner or operator of the facility must report if it exceeds any applicable threshold and must report on all activities at the facility involving the chemical, except as provided in rule 3745-100-08 of the Administrative Code.
- (D) When a facility manufactures, processes or otherwise uses more than one member of a chemical category listed in paragraph (C) of rule 3745-100-10 of the Administrative Code, the owner or operator of the facility must report if it exceeds any applicable threshold for the total volume of all the members of the category involved in the applicable activity. Any such report must cover all activities at the facility involving members of the category.
- (E) A facility may process or otherwise use a toxic chemical in a recycle/reuse operation. To determine whether the facility has processed or used more than an applicable threshold of the chemical, the owner or operator of the facility shall count the amount of the chemical added to the recycle/reuse operation during the calendar year. In particular, if the facility starts up such an operation during a calendar year, or in the event that the contents of the whole recycle/reuse operation are replaced in a calendar year, the owner or operator of the facility shall also count the amount of the chemical placed into the system at these times.
- (F) A toxic chemical may be listed in rule 3745-100-10 of the Administrative Code with the notation that only persons who manufacture the chemical, or manufacture it by a

certain method, are required to report. In that case, only owners or operators of facilities that manufacture that chemical as described in rule 3745-100-10 of the Administrative Code in excess of the threshold applicable to such manufacture in rules 3745-10-06, 3745-100-14, and 3745-100-16 of the Administrative Code are required to report. In completing the reporting form, the owner or operator is only required to account for the quantity of the chemical so manufactured and releases associated with such manufacturing, but not releases associated with subsequent processing or use of the chemical at that facility. Owners and operators of facilities that solely process or use such a chemical are not required to report for that chemical.

- (G) A toxic chemical may be listed in rule 3745-100-10 of the Administrative Code with the notation that it is in a specific form (e.g., fume or dust, solution, or friable) or of a specific color (e.g., yellow or white). In that case, only owners or operators of facilities that manufacture, process or use that chemical in the form or of the color specified in rule 3745-100-10 of the Administrative Code, in excess of the threshold applicable to such activity in rules 3745-10-06, 3745-100-14, and 3745-100-16 of the Administrative Code, are required to report. In completing the reporting form, the owner or operator is only required to account for the quantity of the chemical manufactured, processed or used in the form or color specified in rule 3745-100-10 of the Administrative Code and for releases associated with the chemical in that form or color. Owners or operators of facilities that solely manufacture, process or use such a chemical in a form or color other than those specified by rule 3745-100-10 of the Administrative Code are not required to report for that chemical.
- (H) Metal compound categories are listed in paragraph (C) of rule 3745-100-10 of the Administrative Code. For purposes of determining whether any of the thresholds specified in rules 3745-10-06, 3745-100-14, and 3745-100-16 of the Administrative Code are met for the metal compound category, the owner or operator of a facility must make the threshold determination based on the total amount of all members of the metal compound category manufactured, processed or used at the facility. In completing the release portion of the reporting form for releases of the metal compounds, the owner or operator is only required to account for the weight of the parent metal released. Any contribution to the mass of the release attributable to other portions of each compound in the category is excluded.

**Reporting requirements and schedule for reporting.**

[Comment: For dates of non-regulatory government publications, publications of recognized organizations and associations, federal rules, and federal statutory provisions referenced in this rule, see the "Incorporation by Reference" section at the end of rule 3745-100-01 of the Administrative Code.]

- (A) For each toxic chemical known by the owner or operator to be manufactured (including imported), processed or otherwise used in excess of an applicable threshold quantity in rule 3745-100-06, 3745-100-14, or 3745-100-16 of the Administrative Code at its covered facility described in rule 3745-100-05 of the Administrative Code for a calendar year, the owner or operator must submit to the EPA a completed "U.S. EPA Form R" (EPA Form 9350-1) and, for the dioxin and dioxin-like compounds category, EPA Form R Schedule 1 (EPA Form 9350-3) in accordance with the instructions in rule 3745-100-11 of the Administrative Code.
- (B)
- (1) The owner or operator of a covered facility is required to report as described in paragraph (A) of this rule on a toxic chemical that the owner or operator knows is present as a component of a mixture or trade name product which the owner or operator receives from another person, if that chemical is imported, processed or otherwise used by the owner or operator in excess of an applicable threshold quantity in rule 3745-100-06, 3745-100-14, or 3745-100-16 of the Administrative Code at the facility as part of that mixture or trade name product.
  - (2) The owner or operator knows that a toxic chemical is present as a component of a mixture or trade name product:
    - (a) If the owner or operator knows or has been told the chemical identity or "Chemical Abstracts Service" registry number of the chemical and the identity or number corresponds to an identity or number in rule 3745-100-10 of the Administrative Code; or
    - (b) If the owner or operator has been told by the supplier of the mixture or trade name product that the mixture or trade name product contains a toxic chemical subject to section 313 of the act or this rule.
  - (3) To determine whether a toxic chemical which is a component of a mixture or trade name product has been imported, processed or otherwise used in excess of an applicable threshold in rule 3745-100-06 of the Administrative Code at the facility, the owner or operator shall consider only the portion of the mixture or trade name product that consists of the toxic chemical and that is imported, processed or otherwise used at the facility, together with any other amounts of

the same toxic chemical that the owner or operator manufacturers, imports, processes or otherwise uses at the facility as follows:

- (a) If the owner or operator knows the specific chemical identity of the toxic chemical and the specific concentration at which it is present in the mixture or trade name product, the owner or operator shall determine the weight of the chemical imported, processed or otherwise used as part of the mixture or trade name product at the facility and shall combine that with the weight of the toxic chemical manufactured (including imported), processed or otherwise used at the facility other than as part of the mixture or trade name product. After combining these amounts, if the owner or operator determines that the toxic chemical was manufactured, processed or otherwise used in excess of an applicable threshold in rule 3745-100-06 of the Administrative Code, the owner or operator shall report the specific chemical identity and all releases of the toxic chemical on "U.S. EPA Form R" in accordance with the instructions specified in rule 3745-100-11 of the Administrative Code.
- (b) If the owner or operator knows the specific chemical identity of the toxic chemical and does not know the specific concentration at which the chemical is present in the mixture or trade name product, but has been told the upper-bound concentration of the chemical in the mixture or trade name product, the owner or operator shall presume that the toxic chemical is present in the mixture or trade name product at the upper-bound concentration, shall determine whether the chemical has been manufactured, processed or otherwise used at the facility in excess of an applicable threshold as provided in paragraph (B)(3)(a) of this rule and shall report as provided in paragraph (B)(3)(a) of this rule.
- (c) If the owner or operator knows the specific chemical identity of the toxic chemical, does not know the specific concentration at which the chemical is present in the mixture or trade name product and has not been told the upper-bound concentration of the chemical in the mixture or trade name product, and has not otherwise developed information on the composition of the chemical in the mixture or trade name product, then the owner or operator is not required to factor that chemical in that mixture or trade name product into threshold and release calculations for that chemical.
- (d) If the owner or operator has been told that a mixture or trade name product contains a toxic chemical, does not know the specific chemical identity of the chemical and knows the specific concentration at which it is present in the mixture or trade name product, the owner or operator shall determine the weight of the chemical imported, processed or otherwise used as part of the mixture or trade name product at the facility. Since the owner or operator does not know the specific identity of the toxic chemical, the owner or operator shall make the threshold determination only for the

weight of the toxic chemical in the mixture or trade name product. If the owner or operator determines that the toxic chemical was imported, processed or otherwise used as part of the mixture or trade name product in excess of an applicable threshold in rule 3745-100-06 of the Administrative Code, the owner or operator shall report the generic chemical name of the toxic chemical, or a trade name if the generic chemical name is not known, and all releases of the toxic chemical on "U.S. EPA Form R" and in accordance with the instructions specified in rule 3745-100-11 of the Administrative Code.

- (e) If the owner or operator has been told that a mixture or trade name product contains a toxic chemical, does not know the specific chemical identity of the chemical, and does not know the specific concentration at which the chemical is present in the mixture or trade name product, but has been told the upper-bound concentration of the chemical in the mixture or trade name product, the owner or operator shall presume that the toxic chemical is present in the mixture or trade name product at the upper-bound concentration, shall determine whether the chemical has been imported, processed or otherwise used at the facility in excess of applicable threshold as provided in paragraph (B)(3)(d) of this rule, and shall report as provided in paragraph (B)(3)(d) of this rule.
  - (f) If the owner or operator has been told that a mixture or trade name product contains a toxic chemical, does not know the specific chemical identity of the chemical, and does not know the specific concentration at which the chemical is present in the mixture or trade name product, including information they have themselves developed, and has not been told the upper-bound concentration of the chemical in the mixture or trade name product, the owner or operator is not required to report with respect to that toxic chemical.
- (C) A covered facility may consist of more than one establishment. The owner or operator of such a facility at which a toxic chemical was manufactured (including imported), processed or otherwise used in excess of an applicable threshold may submit a separate "U.S. EPA Form R" for each establishment or for each group of establishments within the facility to report the activities involving the toxic chemical at each establishment or group of establishments, provided that activities involving that toxic chemical at all the establishments within the covered facility are reported. If each establishment or group of establishments files separate reports, then for all other chemicals subject to reporting at that facility they must also submit separate reports. However, an establishment or group of establishments does not have to submit a report for a chemical that is not manufactured (including imported), processed, or otherwise used or released at that establishment or group of establishments.

- (D) Each report under this rule for activities involving a toxic chemical that occurred during a calendar year at a covered facility must be submitted on or before July first of the next year. The first such report for calendar year 1988 activities must be submitted on or before July 1, 1989.

3745-100-08      **Exemptions.**

[Comment: For dates of non-regulatory government publications, publications of recognized organizations and associations, federal rules, and federal statutory provisions referenced in this rule, see the "Incorporation by Reference" section at the end of rule 3745-100-01.]

- (A) De Minimis concentrations of a toxic chemical in a mixture. If a toxic chemical is present in a mixture of chemicals at a covered facility, and the toxic chemical is in a concentration in the mixture which is below one percent of the mixture, or 0.1 per cent of the mixture in the case of a toxic chemical which is a carcinogen as defined in 29 CFR 1910.1200 (d)(4), a person is not required to consider the quantity of the toxic chemical present in such mixture when determining whether an applicable threshold has been met under rule 3745-100-06 of the Administrative Code or determining the amount of release to be reported under rule 3745-100-07 of the Administrative Code. This exemption applies whether the person received the mixture from another person or the person produced the mixture, either by mixing the chemicals involved or by causing a chemical reaction which resulted in the creation of the toxic chemical in the mixture. However, this exemption applies only to the quantity of the toxic chemical present in the mixture. If the toxic chemical is also manufactured (including imported), processed or otherwise used at the covered facility other than as part of the mixture or in a mixture at higher concentrations in excess of an applicable threshold quantity set forth in rule 3745-100-06 of the Administrative Code, the person is required to report under rule 3745-100-07 of the Administrative Code. This exemption does not apply to toxic chemicals listed in rule 3745-100-16 of the Administrative Code, except for purposes of rule 3745-100-09 (D)(1) of the Administrative Code.
- (B) Articles. If a toxic chemical is present in an article at a covered facility, a person is not required to consider the quantity of the toxic chemical present in such article when determining whether an applicable threshold has been met under rules 3745-100-06, 3745-100-14, or 3745-100-16 of the Administrative Code or determining the amount of release to be reported under rule 3745-100-07 of the Administrative Code. This exemption applies whether the person received the article from another person or the person produced the article. However, this exemption applies only to the quantity of the toxic chemical present in the article. If the toxic chemical is manufactured (including imported), processed or otherwise used at the covered facility other than as part of the article in excess of an applicable threshold quantity set forth in rule 3745-100-06 of the Administrative Code, the person is required to report under rule 3745-100-07 of the Administrative Code. Persons potentially subject to this exemption should carefully review the definitions of "article" and "release" in rule 3745-100-01 of the Administrative Code. If a release of a toxic chemical occurs as a result of the processing or use of an item at the facility, that item does not meet the definition of "article."

- (C) Uses. If a toxic chemical is used at a covered facility for a purpose described in paragraphs (C)(1) to (C)(5) of this rule, a person is not required to consider the quantity of the toxic chemical used for such purpose when determining whether an applicable threshold has been met under rule 3745-100-06, 3745-100-14, or 3745-100-16 of the Administrative Code or determining the amount of releases to be reported under rule 3745-100-07 of the Administrative Code. However, this exemption only applies to the quantity of the toxic chemical used for the purpose described in paragraphs (C)(1) to (C)(5) of this rule. If the toxic chemical is also manufactured (including imported), processed or otherwise used at the covered facility other than as described in paragraphs (C)(1) to (C)(5) of this rule in excess of an applicable threshold quantity set forth in rule 3745-100-06 of the Administrative Code, the person is required to report under rule 3745-100-07 of the Administrative Code. This exemption only applies to the quantity of the toxic chemical for the following purposes:
- (1) Use as a structural component of the facility.
  - (2) Use of products for routine janitorial or facility grounds maintenance. Examples include use of janitorial cleaning supplies, fertilizers and pesticides similar in type or concentration to consumer products.
  - (3) Personal use by employees or other persons at the facility of foods, drugs, cosmetics or other personal items containing toxic chemicals, including supplies of such products within the facility such as in a facility-operated cafeteria, store or infirmary.
  - (4) Use of products containing toxic chemicals for the purpose of maintaining motor vehicles operated by the facility.
  - (5) Use of toxic chemicals present in process water and noncontact cooling water as drawn from the environment or from municipal sources, or toxic chemicals present in air used either as compressed air or as part of combustion.
- (D) Activities in laboratories. If a toxic chemical is manufactured, processed or used in a laboratory at a covered facility under the supervision of a technically qualified individual as defined in paragraph (O) of rule 3745-100-01 of the Administrative Code, a person is not required to consider the quantity so manufactured, processed or used when determining whether an applicable threshold has been met under rule 3745-100-06, 3745-100-14, or 3745-100-16 of the Administrative Code or determining the amount of release to be reported under rule 3745-100-07 of the Administrative Code. This exemption does not apply in the following cases:
- (1) Specialty chemical production.
  - (2) Manufacture, processing or use of toxic chemicals in pilot plant scale operations.

- (3) Activities conducted outside the laboratory.
- (E) Certain owners of leased property. The owner of a covered facility is not subject to reporting under rule 3745-100-07 of the Administrative Code if such owner's only interest in the facility is ownership of the real estate upon which the facility is operated. This exemption applies to owners of facilities such as industrial parks, all or part of which are leased to persons who operate establishments within SIC codes 20 through 39, where the owner has no other business interest in the operation of the covered facility.
- (F) Reporting by certain operators of establishments on leased property such as industrial parks. If two or more persons, who do not have any common corporate or business interest (including common ownership or control), operate separate establishments within a single facility, each such person shall treat the establishments it operates as a facility for purposes of this rule. The determinations in rules 3745-100-05 and 3745-100-06 of the Administrative Code shall be made for those establishments. If any such operator determines that its establishment is a covered facility under rule 3745-100-05 of the Administrative Code and that a toxic chemical has been manufactured (including imported), processed or otherwise used at the establishment in excess of an applicable threshold in rule 3745-100-06 of the Administrative Code for a calendar year, the operator shall submit a report in accordance with rule 3745-100-07 of the Administrative Code for the establishment. For purposes of this, a common corporate or business interest includes ownership, partnership, joint ventures, ownership of a controlling interest in one person by the other, or ownership of a controlling interest in both persons by a third person.
- (G) Coal extraction activities. If a toxic chemical is manufactured, processed, or otherwise used in extraction by facilities in SIC code 12, a person is not required to consider the quantity of the toxic chemical so manufactured, processed, or otherwise used when determining whether an applicable threshold has been met under rule 3745-100-06, 3745-100-14, or 3745-100-16 of the Administrative Code, or determining the amounts to be reported under rule 3745-100-07 of the Administrative Code.
- (H) Metal mining overburden. If a toxic chemical that is a constituent of overburden is processed or otherwise used by facilities in SIC code 10, a person is not required to consider the quantity of the toxic chemical so processed, or otherwise used when determining whether an applicable threshold has been met under rule 3745-100-06, 3745-100-14, or 3745-100-16 of the Administrative Code, or determining the amounts to be reported under rule 3745-100-07 of the Administrative Code.

3745-100-09      **Notification about toxic chemicals.**

[Comment: For dates of non-regulatory government publications, publications of recognized organizations and associations, federal rules, and federal statutory provisions referenced in this rule, see the "Incorporation by Reference" section at the end of rule 3745-100-01.]

(A) Except as provided in paragraphs (C), (D) and (E) of this rule, and rule 3745-100-10 of the Administrative Code, a person who owns or operates a facility or establishment which:

- (1) Is in SIC code 20 through 39 as set forth in paragraph (B) of rule 3745-100-05 of the Administrative Code;
- (2) Manufacturers (including imports) or processes a toxic chemical; and
- (3) Sells or otherwise distributes a mixture or trade name product containing the toxic chemical to a facility described in rule 3745-100-05 of the Administrative Code, or to a person who in turn may sell or otherwise distribute such mixture or trade name product to a facility described in paragraph (B) of rule 3745-100-05 of the Administrative Code

A person who owns or operates a facility or establishment shall notify each person to whom the mixture or trade name product is sold or otherwise distributed from the facility or establishment in accordance with paragraph (B) of this rule.

(B) The notification required in paragraph (A) of this rule shall be in writing and shall include:

- (1) A statement that the mixture or trade name product contains a toxic chemical subject to the reporting requirements of section 313 of Title III of the Superfund Amendments and Reauthorization Act of 1986 and 40 CFR part 372.
- (2) The name of each toxic chemical, and the associated "Chemical Abstracts Service" registry number of each chemical, if applicable, as set forth in rule 3745-100-10 of the Administrative Code.
- (3) The per cent by weight of each toxic chemical in the mixture or trade name product.

(C) Notification under this rule shall be provided as follows:

- (1) For a mixture or trade name product containing a toxic chemical listed in rule 3745-100-10 of the Administrative Code with an effective date of January 1,

1987, the person shall provide the written notice described in paragraph (B) of this rule to each recipient of the mixture or trade name product with at least the first shipment of each mixture or trade name product to each recipient in each calendar year, beginning January 1, 1989.

- (2) For a mixture or trade name product containing a toxic chemical listed in rule 3745-100-10 of the Administrative Code with an effective date of January 1, 1989 or later, the person shall provide the written notice described in paragraph (B) of this rule to each recipient of the mixture or trade name product with at least the first shipment of the mixture or trade name product to each recipient in each calendar year beginning with the applicable effective date.
- (3) If a person changes a mixture or trade name product for which notification was previously provided under paragraph (B) of this rule by adding a toxic chemical, removing a toxic chemical, or changing the per cent by weight of a toxic chemical in the mixture or trade name product, the person shall provide each recipient of the changed mixture or trade name product a revised notification reflecting the change with the first shipment of the changed mixture or trade name product to the recipient.
- (4) If a person discovers that a mixture or trade name product previously sold or otherwise distributed to another person during the calendar year of the discovery contains one or more toxic chemicals and that any notification provided to such other person in that calendar year for the mixture or trade name product either did not properly identify any of the toxic chemicals or did not accurately present the per cent by weight of any of the toxic chemicals in the mixture or trade name product, the person shall provide a new notification to the recipient within thirty days of the discovery which contains the information described in paragraph (B) of this rule, and identifies the prior shipments of the mixture or product in that calendar year to which the new notification applies.
- (5) If a "Material Safety Data Sheet" is required to be prepared and distributed for the mixture or trade name product in accordance with 29 CFR 1910.1200, the notification must be attached to or otherwise incorporated into such "Material Safety Data Sheet." When the notification is attached to the "Material Safety Data Sheet," the notice must contain clear instructions that the notification must not be detached from the "Material Safety Data Sheet" and that any copying and redistribution of the "Material Safety Data Sheet" shall include copying and redistribution of the notice attached to copies of the "Material Safety Data Sheet" subsequently redistributed.

(D) Notifications are not required in the following instances:

- (1) If a mixture or trade name product contains no toxic chemical in excess of the applicable de minimis concentration as specified in paragraph (A) of rule 3745-100-08 of the Administrative Code.

- (2) If a mixture or trade name product is on of the following:
- (a) An "article" as defined in rule 3745-100-01 of the Administrative Code.
  - (b) Foods, drugs, cosmetics, alcoholic beverages, tobacco or tobacco products packaged for distribution to the general public.
  - (c) Any consumer product, as the term is defined in the Consumer Product Safety Act contained in 15 U.S.C. 2051 to 2084, packaged for distribution to the general public.
- (E) If the person considers the specific identity of a toxic chemical in a mixture or trade name product to be a trade secret under provisions of 29 CFR 1910.1200, the notice shall contain a generic chemical name that is descriptive of that toxic chemical.
- (F) If the person considers the specific per cent by weight composition of a toxic chemical in the mixture or trade name product to be a trade secret under applicable state law or under the "Restatement of Torts," section 757, comment B, the notice must contain a statement that the chemical is present at a concentration that does not exceed a specified upper-bound concentration value: for example, a mixture contains twelve per cent of a toxic chemical. However, the supplier considers the specific concentration of the toxic chemical in the product to be a trade secret. The notice would indicate that the toxic chemical is present in the mixture in a concentration of no more than fifteen per cent by weight. The upper-bound value chosen must be no larger than necessary to adequately protect the trade secret.
- (G) A person is not subject to the requirements of this rule to the extent the person does not know that the facility or establishment is selling or otherwise distributing a toxic chemical to another person in a mixture or trade name product. However, for purposes of this rule, a person has such knowledge if the person receives a notice under this rule from a supplier of a mixture or trade name product and the person in turn sells or otherwise distributes that mixture or trade name product to another person.
- (H) If two or more persons who do not have any common corporate or business interest (including common ownership or control), as described in paragraph (F) of rule 3745-100-08 of the Administrative Code, operate separate establishments within a single facility, each such person shall treat the establishment it operates as a facility for purposes of this rule. The determination under paragraph (A) of this rule shall be made for those establishments.

3745-100-10 **Applicable chemicals and chemical categories.**

[Comment: For dates of non-regulatory government publications, publications of recognized organizations and associations, federal rules, and federal statutory provisions referenced in this rule, see the "Incorporation by Reference" section at the end of rule 3745-100-01.]

The requirements of this chapter apply to the following chemicals and chemical categories. This rule contains three listings. Paragraph (A) of this rule is an alphabetical order listing of those chemicals that have an associated "Chemical Abstracts Service (CAS)" registry number. Paragraph (B) of this rule contains a CAS registry number order list of the same chemicals listed in paragraph (A) of this rule. Paragraph (C) of this rule contains the chemical categories for which reporting is required. These chemical categories are listed in alphabetical order and do not have CAS registry numbers.

(A) Alphabetical listing:

--

Chemical Name	CAS Number
abamectin (avermectin B1)	71751-41-2
acephate (acetylphosphoramidothioic acid o,s-dimethyl ester)	30560-19-1
acetaldehyde	75-07-0
acetamide	60-35-5
acetonitrile	75-05-8
acetophenone	98-86-2
2-acetylaminofluorene	53-96-3
acifluorfen, sodium salt (5- (2-chloro-4- (trifluoromethyl) - phenoxy)-2-nitro-benzoic acid, sodium salt)	62476-59-9
acrolein	107-02-8
acrylamide	79-06-1
acrylic acid	79-10-7
acrylonitrile	107-13-1
alachlor	15972-60-8
aldicarb	116-06-3
aldrin [1,4,5,8-dimethanonaphthalene, 1,2,3,4,10,10-hexachloro-1,4,4A,5,8,8a-hexahydro- (1 alpha, 4 alpha, 4a beta, 5 alpha, 8 alpha, 8A beta) -]	309-00-2
d-trans-allethrin [d-trans-chrysanthemic acid of d-allethron]	28057-48-9
allyl alcohol	107-18-6
allylamine	107-11-9
allyl chloride	107-05-1
aluminum (fume or dust)	7429-90-5
aluminum phosphide	20859-73-8
aluminum oxide (fibrous forms)	1344-28-1

ametryn (n-ethyl-n'- (1-methylethyl)-6-(methylthio) -1,3,5,-triazine-2,4-diamine)	834-12-8
2-aminoanthraquinone	117-79-3
4-aminoazobenzene	60-09-3
4-aminobiphenyl	92-67-1
1-amino-2-methylantraquinone	82-28-0
amitraz	33089-61-1
amitrole	61-82-5
ammonia (includes anhydrous ammonia and aqueous ammonia from water dissociable ammonium salts and other sources; "ten" percent of total aqueous ammonia is reportable under this listing)	7664-41-7
ammonium nitrate (solution)	6484-52-2
anilazine [4,6-dichloro-n-(2-chlorophenyl)-1,3,5-triazin-2-amine]	101-05-3
aniline	62-53-3
o-anisidine	90-04-0
p-anisidine	104-94-9
o-anisidine hydrochloride	134-29-2
anthracene	120-12-7
antimony	7440-36-0
arsenic	7440-38-2
asbestos (friable)	1332-21-4
atrazine (6-chloro-n-ethyl-n'-(1-methylethyl)-1,3,5-triazine-2,4-diamine)	1912-24-9
barium	7440-39-3
bendiocarb [2,2-dimethyl-1,3-benzodioxol-4-ol methylcarbamate]	22781-23-3
benfluralin (n-butyl-n-ethyl-2, 6-dinitro-4-(trifluoromethyl)-benzenamine)	1861-40-1
benomyl	17804-35-2
benzal chloride	98-87-3
benzamide	55-21-0
benz(a)anthracene	56-55-3
benzene	71-43-2
benzidine	92-87-5
benzo(b)fluoranthene	205-99-2
benzo(g,h,i)perylene	191-24-2
benzo(j)fluoranthene	205-82-3
benzo(k)fluoranthene	207-08-9
benzoic trichloride (benzotrichloride)	98-07-7
benzo(rst)pentaphene	189-55-9
benzo(a)phenanthrene	218-01-9
benzo(a)pyrene	50-32-8
benzoyl chloride	98-88-4
benzoyl peroxide	94-36-0
benzyl chloride	100-44-7

beryllium	7440-41-7
bifenthrin	82657-04-3
biphenyl	92-52-4
bis (2-chloroethoxy) methane	111-91-1
bis (2-chloroethyl) ether	111-44-4
bis (chloromethyl) ether	542-88-1
bis (2-chloro-1-methylethyl) ether	108-60-1
1,4-bis (methylisocyanate) cyclohexane	10347-54-3
1,3-bis (methylisocyanate) cyclohexane	38661-72-2
bis (tributyltin) oxide	56-35-9
boron trichloride	10294-34-5
boron trifluoride	7637-07-2
bromacil (5-bromo-6-methyl-3- (1-methylpropyl)-2,4- (1h,3h)-pyrimidinedione)	314-40-9
bromacil, lithium salt (2,4-(1h,3h)-pyrimidinedione, 5-bromo-6-methyl-3- (1-methylpropyl), lithium salt)	53404-19-6
bromine	7726-95-6
1-bromo-1-(bromomethyl)-1,3-propanedicarbonitrile	35691-65-7
bromochlorodifluoromethane (halon 1211)	353-59-3
bromoform (tribromomethane)	75-25-2
bromomethane (methyl bromide)	74-83-9
bromotrifluoromethane (halon 1301)	75-63-8
bromoxynil (3,5-dibromo-4-hydroxybenzonitrile)	1689-84-5
bromoxynil octanoate (octanoic acid, 2,6-dibromo-4-cyanophenyl ester)	1689-99-2
brucine	357-57-3
1,3-butadiene	106-99-0
butyl acrylate	141-32-2
n-butyl alcohol	71-36-3
sec-butyl alcohol	78-92-2
tert-butyl alcohol	75-65-0
1,2-butylene oxide	106-88-7
butyraldehyde	123-72-8
C.I. Acid Green 3	4680-78-8
C.I. Acid Red 114	6459-94-5
C.I. Basic Green 4	569-64-2
C.I. Basic Red 1	989-38-8
C.I. Direct Black 38	1937-37-7
C.I. Direct Blue 6	2602-46-2
C.I. Direct Blue 218	28407-37-6

C.I. Solvent Yellow 3	97-56-3
C.I. Solvent Yellow 14	842-07-9
C.I. Solvent Yellow 34 (auramine)	492-80-8
C.I. Vat Yellow 4	128-66-5
cadmium	7440-43-9
calcium cyanamide	156-62-7
captan [1h-isoindole-1,3(2h)-dione, 3a,4,7,7a-tetrahydro-2- [(trichloromethyl)thio]-]	133-06-2
carbaryl (1-naphthalenol, methylcarbamate)	63-25-2
carbofuran	1563-66-2
carbon disulfide	75-15-0
carbon tetrachloride	56-23-5
carbonyl sulfide	463-58-1
carboxin (5,6-dihydro-2-methyl-n-phenyl-1,4-oxathiin-3- carboxamide)	5234-68-4
catechol	120-80-9
chinomethionat (6-methyl-1,3-dithiolo [4,5-b] quinoxalin-2-one)	2439-01-2
chloramben (benzoic acid, 3-amino-2,5-dichloro-)	133-90-4
chlordan (4,7-methanoindan, 1,2,4,5,6,7,8,8-octachloro- 2,3,3a,4,7,7a-hexahydro-)	57-74-9
chlorendic acid	115-28-6
chlorimuron ethyl (ethyl-2-[[[(4-chloro-6-methoxyprimidin-2-yl) - carbonyl] -amino]sulfonyl]benzoate)	90982-32-4
chlorine	7782-50-5
chlorine dioxide	10049-04-4
chloroacetic acid	79-11-8
2-chloroacetophenone	532-27-4
1-(3-chloroallyl)-3,5,7-triaza-1-azoniaadamantane chloride	4080-31-3
p-chloroaniline	106-47-8
chlorobenzene	108-90-7
chlorobenzilate (benzeneacetic acid,4-chloro-alpha- (4- chlorophenyl) - alpha-hydroxy-, ethyl ester)	510-15-6
1-chloro-1,1-difluoroethane (HCFC-142b)	75-68-3
chlorodifluoromethane (HCFC-22)	75-45-6
chloroethane (ethyl chloride)	75-00-3
chloroform	67-66-3
chloromethane (methyl chloride)	74-87-3
chloromethyl methyl ether	107-30-2
3-chloro-2-methyl-1-propene	563-47-3
p-chlorophenyl isocyanate	104-12-1
chloropicrin	76-06-2
chloroprene	126-99-8
3-chloropropionitrile	542-76-7

chlorotetrafluoroethane	63938-10-3
1-chloro-1,1,2,2-tetrafluoroethane (HCFC-124a)	354-25-6
2-chloro-1,1,1,2-tetrafluoroethane (HCFC-124)	2837-89-0
chlorothalonil (1,3-benzenedicarbonitrile,2,4,5,6-tetrachloro-)	1897-45-6
p-chloro-o-toluidine	95-69-2
2-chloro-1,1,1-trifluoroethane (HCFC-133a)	75-88-7
chlorotrifluoromethane (CFC-13)	75-72-9
3-chloro-1,1,1-trifluoropropane (HCFC-253fb)	460-35-5
chlorpyrifos methyl (o,o-dimethyl-o- (3,5,6-trichloro-2-pyridyl) phosphorothioate)	5598-13-0
chlorsulfuron (2-chloro-n-[[4-methoxy-6-methyl-1,3,5-triazin-2-yl) amino]carbonyl]benzenesulfonamide)	64902-72-3
chromium	7440-47-3
cobalt	7440-48-4
copper	7440-50-8
creosote	8001-58-9
p-cresidine	120-71-8
m-cresol	108-39-4
o-cresol	95-48-7
p-cresol	106-44-5
cresol (mixed isomers)	1319-77-3
crotonaldehyde	4170-30-3
cumene	98-82-8
cumene hydroperoxide	80-15-9
cupferron (benzeneamine, N-hydroxy-N-nitroso, ammonium salt)	135-20-6
cyanazine	21725-46-2
cycloate	1134-23-2
cyclohexane	110-82-7
cyclohexanol	108-93-0
cyfluthrin (3-(2,2-dichloroethenyl) - 2,2-dimethylcyclopropanecarboxylic acid, cyano(4-fluoro-3-phenoxyphenyl) methyl ester)	68359-37-5
cyhalothrin (3- (2-chloro-3,3,3-trifluoro-1-propenyl) - 2,2-dimethylcyclopropanecarboxylic acid cyano (3-phenoxyphenyl) methyl ester)	68085-85-8
2,4-D (acetic acid, (2,4-dichlorophenoxy)-)	94-75-7
dazomet (tetrahydro-3,5-dimethyl-2h-1,3,5-thiadiazine-2-thione)	533-74-4
dazomet, sodium salt (tetrahydro-3,5-dimethyl-2h-1,3,5-thiadiazine-2-thione, ion(1-), sodium)	53404-60-7
2,4-DB	94-82-6
2,4-D butoxyethyl ester	1929-73-3
2,4-D butyl ester	94-80-4
2,4-D chlorocrotyl ester	2971-38-2

1,2-diphenylhydrazine (hydrazobenzene)	122-66-7
dipotassium endothall (7-oxabicyclo (2.2.1) heptane-2,3-dicarboxylic acid, dipotassium salt)	2164-07-0
dipropyl isocinchomerate	136-45-8
disodium cyanodithioimidocarbonate	138-93-2
2,4-D isopropyl ester	94-11-1
2,4-dithiobiuret	541-53-7
diuron	330-54-1
dodine (dodecylguanidine monoacetate)	2439-10-3

2,4-dp	120-36-5
2,4-D propylene glycol butyl ether ester	1320-18-9
2,4-D sodium salt	2702-72-9
epichlorohydrin	106-89-8
ethoprop (phosphorodithioic acid o-ethyl s,s-dipropyl ester)	13194-48-4
2-ethoxyethanol	110-80-5
ethyl acrylate	140-88-5
ethylbenzene	100-41-4
ethyl chloroformate	541-41-3
ethyl dipropylthiocarbamate (EPTC)	759-94-4
ethylene	74-85-1
ethylene glycol	107-21-1
ethyleneimine (aziridine)	151-56-4
ethylene oxide	75-21-8
ethylene thiourea	96-45-7
ethylidene dichloride	75-34-3
famphur	52-85-7
fenarimol (alpha-(2-chlorophenyl)-alpha-4-chlorophenyl) -5-pyrimidinemethanol)	60168-88-9
fenbutatin oxide (hexakis (2-methyl-2-phenylpropyl) distannoxane)	13356-08-6
fenoxaprop ethyl (2-(4-((6-chloro-2-benzoxazolyl) oxy) phenoxy) propanoic acid, ethyl ester)	66441-23-4
fenoxycarb (2-(4-phenoxy-phenoxy)-ethylcarbamic acid ethyl ester)	72490-01-8
fenpropathrin (2,2,3,3-tetramethylcyclopropane carboxylic acid cyano (3-phenoxyphenyl) methyl ester)	39515-41-8
fenthion (o,o-dimethyl o-[3-methyl-4-(methylthio) phenyl] ester, phosphorothioic acid)	55-38-9
fenvalerate (4-chloro-alpha- (1-methylethyl) benzeneacetic acid cyano (3-phenoxyphenyl) methyl ester)	51630-58-1
ferbam (tris (dimethylcarbamodithioato-s,s') iron)	14484-64-1
fluazifop butyl (2- [4- [[5-(trifluoromethyl)-2-pyridinyl] oxy]-phenoxy] propanoic acid, butyl ester)	69806-50-4
fluometuron (urea, N,N-dimethyl-N-(3- (trifluoromethyl) phenyl)-)	2164-17-2
fluorine	7782-41-4
fluorouracil (5-fluorouracil)	51-21-8
fluvalinate (n-[2-chloro-4-(trifluoromethyl) phenyl] -dl-valine(+)-cyano (3-phenoxyphenyl) methyl ester)	69409-94-5
folpet	133-07-3
fomesafen (5-(2-chloro-4-(trifluoromethyl) phenoxy) - n methylsulfonyl) -2-nitrobenzamide)	72178-02-0
formaldehyde	50-00-0
formic acid	64-18-6
freon 113 (ethane, 1,1,2-trichloro-1,2,2,-trifluoro-)	76-13-1
heptachlor (1,4,5,6,7,8,8-heptachloro-3a,4,7,7a- tetrahydro-4,7-methano-1H-indene)	76-44-8

hexachlorobenzene	118-74-1
hexachloro-1,3-butadiene	87-68-3
hexachlorocyclopentadiene	77-47-4
alpha-hexachlorocyclohexane	319-84-6
hexachloroethane	67-72-1
hexachloronaphthalene	1335-87-1
hexachlorophene	70-30-4
hexamethylene-1,6-diisocyanate	822-06-0
hexamethylphosphoramide	680-31-9
n-hexane	110-54-3
hexazinone	51235-04-2
hydramethylnon (tetrahydro-5,5-dimethyl-2 (1h) - pyrimidinone[3-[4-(trifluoromethyl) phenyl]-1-[2-[4-(trifluoromethyl) phenyl] ethenyl] -2-propenylidene] hydrazone)	67485-29-4
hydrazine	302-01-2
hydrazine sulfate	10034-93-2
hydrochloric acid (acid aerosols including mists, vapors, gas, fog, and other airborne species of any particle size)	7647-01-0
hydrogen cyanide	74-90-8
hydrogen fluoride	7664-39-3
hydrogen sulfide	7783-06-4
hydroquinone	123-31-9
imazalil (1-[2-(2,4-dichlorophenyl)-2-(2-propenyloxy)ethyl]-1h-imidazole)	35554-44-0
indeno[1,2,3-CD] pyrene	193-39-5
3-iodo-2-propynyl butylcarbamate	55406-53-6
iron pentacarbonyl	13463-40-6
isobutyraldehyde	78-84-2
isodrin	465-73-6
isofenphos (2-[[ethoxyl[(1-methylethyl)amino]phosphinothioyl]oxy] benzoic acid 1-methylethyl ester)	25311-71-1
isophorone diisocyanate	4098-71-9
isopropyl alcohol (only persons who manufacture by the strong acid process are subject, no supplier notification)	67-63-0
4,4-isopropylidenediphenol	80-05-7
isosafrole	120-58-1
lactofen (benzoic acid, (5-2-chloro-4-(trifluoromethyl)phenoxy) -2-nitro-2-ethoxy-1-methyl-2-oxoethyl ester)	77501-63-4
lead	7439-92-1
lindane (cyclohexane, 1,2,3,4,5,6-hexachloro-, (1 alpha,2 alpha,3 beta, 4 alpha, 5 alpha, 6 beta)-)	58-89-9
linuron	330-55-2
lithium carbonate	554-13-2
malathion	121-75-5

maleic anhydride	108-31-6
malononitrile	109-77-3
maneb (carbamodithioic acid, 1,2-ethanediylbis-, manganese complex)	12427-38-2
manganese	7439-96-5
mecoprop	93-65-2
2-mercaptobenzothiazole (MBT)	149-30-4
mercury	7439-97-6
merphos	150-50-5
methacrylonitrile	126-98-7
metham sodium (sodium methylthiocarbamate)	137-42-8
methanol	67-56-1
methazole (2-(3,4-dichlorophenyl) - 4 - methyl-1,2,4-oxadiazolidine-3,5-dione)	20354-26-1
methiocarb	2032-65-7
methoxone ((4-chloro-2-methylphenoxy) acetic acid) (MCPA)	94-74-6
methoxone sodium salt ((4-chloro-2-methylphenoxy) acetate sodium salt)	3653-48-3
methoxychlor (benzene, 1,1-(2,2,2-trichloro-ethylidene)bis(4-methoxy-))	72-43-5
2-methoxyethanol	109-86-4
methyl acrylate	96-33-3
methyl tert-butyl ether	1634-04-4
methyl chlorocarbonate	79-22-1
5-methylchrysene	3697-24-3
4-methyldiphenylmethane-3,4-diisocyanate	75790-84-0
4,4-methylenebis(2-chloroaniline) (MBOCA)	101-14-4
4,4-methylenebis(N,N-dimethyl)benzenamine	101-61-1
1,1-methylene bis (4-isocyanatocyclohexane)	5124-30-1
methylene bromide	74-95-3
4,4-methylenedianiline	101-77-9
methyl hydrazine	60-34-4
methyl iodide	74-88-4
methyl isobutyl ketone	108-10-1
methyl isocyanate	624-83-9
methyl isothiocyanate (isothiocyanatomethane)	556-61-6
2-methylactonitrile	75-86-5
methyl mercaptan	74-93-1
methyl methacrylate	80-62-6
n-methylolacrylamide	924-42-5
methyl parathion	298-00-0
2-methylpyridine	109-06-8
n-methyl-2-pyrrolidone	872-50-4
methyltrichlorosilane	75-79-6

metiram	9006-42-2
metribuzin	21087-64-9
mevinphos	7786-34-7
michler's ketone	90-94-8
molinate (1h-azepine-1-carbothioic acid, hexahydro-s-ethyl ester)	2212-67-1
molybdenum trioxide	1313-27-5
monochloropentafluoroethane (CFC-115)	76-15-3
monuron	150-68-5
mustard gas (ethane, 1,1-thiobis(2-chloro-))	505-60-2
myclobutanil (alpha-butyl-alpha- (4-chlorophenyl) - 1h-1,2,4-triazole-1-propanenitrile)	88671-89-0
nabam	142-59-6
naled	300-76-5
naphthalene	91-20-3
1,5-naphthalene diisocyanate	3173-72-6
alpha-naphthylamine	134-32-7
beta-naphthylamine	91-59-8
nickel	7440-02-0
nitrapyrin (2-chloro-6-(trichloromethyl) pyridine)	1929-82-4
nitrate compounds (water dissociable; reportable only when in aqueous solution)	
nitric acid	7697-37-2
nitriлотriacetic acid	139-13-9
p-nitroaniline	100-01-6
5-nitro-o-anisidine	99-59-2
nitrobenzene	98-95-3
4-nitrobiphenyl	92-93-3
nitrofen (benzene, 2,4-dichloro-1- (4-nitrophenoxy) -)	1836-75-5
nitrogen mustard (2-chloro-n-(2-chloroethyl) -n-methylethanamine)	51-75-2
nitroglycerin	55-63-0
2-nitrophenol	88-75-5
4-nitrophenol	100-02-7
2-nitropropane	79-46-9
1-nitropyrene	5522-43-0
p-nitrosodiphenylamine	156-10-5
N,N-dimethylaniline	121-69-7
N-nitrosodi-n-butylamine	924-16-3
N-nitrosodiethylamine	55-18-5
N-nitrosodimethylamine	62-75-9
N-nitrosodiphenylamine	86-30-6
N-nitrosodi-n-propylamine	621-64-7
N-nitrosomethylvinylamine	4549-40-0
N-nitrosomorpholine	59-89-2
N-nitroso-N-ethylurea	759-73-9

N-nitroso-N-methylurea	684-93-5
N-nitrosornicotine	16543-55-8
N-nitrosopiperidine	100-75-4
5-nitro-o-toluidine	99-55-8
norflurazon (4-chloro-5-(methylamino)-2-[3-(trifluoromethyl)phenyl]-3 (2h)-pyridazinone)	27314-13-2
octachloronaphthalene	2234-13-1
octachlorostyrene	29082-74-4
oryzalin (4-(dipropylamino)-3,5-dinitrobenzenesulfonamide)	19044-88-3
osmium tetroxide	20816-12-0
oxydemeton methyl (s- (2-(ethylsulfinyl) ethyl) o,o-dimethyl ester phosphorothioic acid)	301-12-2
oxydiazon (3-[2,4-dichloro-5-(1-methylethoxy) phenyl] - 5 - (1,1-dimethylethyl)-1,3,4-oxadiazol-2 (3h)-one)	19666-30-9
oxyfluorfen	42874-03-3
ozone	10028-15-6
paraldehyde	123-63-7
paraquat dichloride	1910-42-5
parathion (phosphorothioic acid, o,o-diethyl-o-(4-nitrophenyl) ester)	56-38-2
pebulate (butylethylcarbamoithioic acid s-propyl ester)	1114-71-2
pendimethalin (n-(1-ethylpropyl)-3,4-dimethyl-2,6-dinitrobenzenamine)	40487-42-1
pentachloroethane	76-01-7
pentachlorophenol (PCP)	87-86-5
pentachlorobenzene	608-93-5
pentobarbital sodium	57-33-0
peracetic acid	79-21-0
perchloromethyl mercaptan	594-42-3
permethrin (3-(2,2-dichloroethenyl)-2,2-dimethylcyclopropane carboxylic acid, (3-phenoxyphenyl) methyl ester)	52645-53-1
phenanthrene	85-01-8
phenol	108-95-2
phenothrin (2,2-dimethyl-3-(2-methyl-1-propenyl) cyclopropanecarboxylic acid (3-phenoxyphenyl)methyl ester)	26002-80-2
1,2-phenylenediamine	95-54-5
1,3-phenylenediamine	108-45-2
p-phenylenediamine	106-50-3
1,2-phenylenediamine dihydrochloride	615-28-1
1,4-phenylenediamine dihydrochloride	624-18-0
1,3-phenylene diisocyanate	123-61-5
1,4-phenylene diisocyanate	104-49-4
2-phenylphenol	90-43-7
phenytoin	57-41-0
phosgene	75-44-5

phosphine	7803-51-2
phosphorus (yellow or white)	7723-14-0
phthalic anhydride	85-44-9
picloram	1918-02-1
picric acid	88-89-1
piperonyl butoxide	51-03-6
pirimiphos methyl (o-(2-(diethylamino) - 6 - methyl-4-pyrimidinyl)-o,o-dimethyl phosphorothioate)	29232-93-7
polychlorinated biphenyls (PCB's)	1336-36-3
polymeric diphenylmethane diisocyanate	9016-87-9
potassium bromate	7758-01-2
potassium dimethyldithiocarbamate	128-03-0
potassium n-methyldithiocarbamate	137-41-7
profenofos (o-(4-bromo-2-chlorophenyl) - o - ethyl-s-propylphosphorothioate)	41198-08-7
prometryn (n,n'-bis(1-methylethyl) - 6-methylthio-1,3,5-triazine-2,4-diamine)	7287-19-6
pronamide	23950-58-5
propachlor (2-chloro-n-(1-methylethyl)-n-phenylacetamide)	1918-16-7
propane sultone	1120-71-4
propanil (n-(3,4-dichlorophenyl) propanamide)	709-98-8
propargite	2312-35-8
propargyl alcohol	107-19-7
propetamphos (3-[(ethylamino)methoxyphosphinothioyl]oxy] -2-butenoic acid, 1-methylethyl ester)	31218-83-4
propiconazole (1-[2-(2,4-dichlorophenyl)-4-propyl-1,3-dioxolan-2-yl]-methyl-1h-1,2,4,-triazole)	60207-90-1
beta-propiolactone	57-57-8
propionaldehyde	123-38-6
propoxur (phenol, 2-(1-methylethoxy)-, methylcarbamate)	114-26-1
propylene (propene)	115-07-1
propyleneimine	75-55-8
propylene oxide	75-56-9
pyridine	110-86-1
quinoline	91-22-5
quinone	106-51-4
quintozene (pentachloronitrobenzene)	82-68-8
quizalofop-ethyl (2- [4-[(6-chloro-2-quinoxaliny] oxy] phenoxy] propanoic acid ethyl ester)	76578-14-8
resmethrin ([5- (phenylmethyl) -3-furanyl] methyl-2, 2-dimethyl-3-(2-methyl-1-propenyl) cyclopropanecarboxylate])	10453-86-8
saccharin (only persons who manufacture are subject, no supplier notification) (1,2-benzisothiazol-3 (2H) -one,1,1-dioxide)	81-07-2
safrole	94-59-7

selenium	7782-49-2
sethoxydim (2-[1-(ethoxyimino) butyl] - 5-[2-(ethylthio) propyl]-3-hydroxyl-2-cyclohexen-1-one)	74051-80-2
silver	7440-22-4
simazine	122-34-9
sodium azide	26628-22-8
sodium dicamba (3,6-dichloro-2-methoxybenzoic acid, sodium salt)	1982-69-0
sodium dimethyldithiocarbamate	128-04-1
sodium fluoroacetate	62-74-8
sodium nitrite	7632-00-0
sodium pentachlorophenate	131-52-2
sodium o-phenylphenoxide	132-27-4
strychnine and salts	
styrene	100-42-5
styrene oxide	96-09-3
sulfuric acid (acid aerosols including mists, vapors, gas, fog, and other airborne species of any particle size)	7664-93-9
sulfuryl fluoride (vikane)	2699-79-8
sulprofos (o-ethyl o-[4-(methylthio)phenyl] phosphorodithioic acid s-propyl ester)	35400-43-2
tebuthiuron (n-[5-(1,1-dimethylethyl) - 1,3,4-thiadiazol-2-yl] -n,n'-dimethylurea)	34014-18-1
temephos	3383-96-8
terbacil (5-chloro-3-(1,1-dimethylethyl) -6-methyl-2,4(1h,3h) -pyrimidinedione)	5902-51-2
1,1,1,2-tetrachloroethane	630-20-6
1,1,2,2-tetrachloroethane	79-34-5
1,1,2,2-tetrachloro-1-fluoroethane (HCFC-121)	354-14-3
1,1,1,2-tetrachloro-2-fluoroethane (HCFC-121a)	354-11-0
tetrabromobisphenol a	79-94-7
tetrachloroethylene (perchloroethylene)	127-18-4
tetrachlorvinphos (phosphoric acid, 2-chloro-1- (2,4,5-trichlorophenyl) ethenyl dimethyl ester)	961-11-5
tetracycline hydrochloride	64-75-5
tetramethrin (2,2-dimethyl-3-(2-methyl-1-propenyl) cyclopropanecarboxylic acid (1,3,4,5,6,7-hexahydro-1,3-dioxo- 2h-isoindol-2-yl) methyl ester)	7696-12-0
thallium	7440-28-0
thiabendazole (2-(4-thiazolyl)-1h-benzimidazole)	148-79-8
thioacetamide	62-55-5
thiobencarb (carbamic acid, diethylthio-,s- (p-chlorobenzyl) ester)	28249-77-6
4,4'-thiodianiline	139-65-1
thiodicarb	59669-26-0
thiophanate ethyl ([1,2-phenylenebis (iminocarbonothioyl)] biscalbamic acid diethyl ester)	23564-06-9

thiophanate-methyl	23564-05-8
thiosemicarbazide	79-19-6
thiourea	62-56-6
thiram	137-26-8
thorium dioxide	1314-20-1
titanium tetrachloride	7550-45-0
toluene	108-88-3
toluene-2,4-diisocyanate	584-84-9
toluene-2,6-diisocyanate	91-08-7
toluenediisocyanate (mixed isomers)	26471-62-5
o-toluidine	95-53-4
o-toluidine hydrochloride	636-21-5
toxaphene	8001-35-2
triadimefon (1-(4-chlorophenoxy)-3,3-dimethyl-1-(1h-1,2,4-triazol-1-yl)-2-butanone)	43121-43-3
triallate	2303-17-5
triaziquone (2,5-cyclohexadiene-1,4-dione,2,3,5-tris(1-aziridinyl)-)	68-76-8
tribenuron methyl (2-((((4-methoxy-6-methyl-1,3,5-triazin-2-yl)-methylamino) carbonyl)amino) sulfonyl)-, methyl ester)	101200-048-0
tributyltin fluoride	1983-10-4
tributyltin methacrylate	2155-70-6
s,s,s-tributyltrithiophosphate (DEF)	78-48-8
trichlorfon (phosphonic acid, (2,2,2-trichloro-1-hydroxyethyl)-,dimethyl ester)	52-68-6
trichloroacetyl chloride	76-02-8
1,2,4-trichlorobenzene	120-82-1
1,1,1-trichloroethane (methyl chloroform)	71-55-6
1,1,2-trichloroethane	79-00-5
trichloroethylene	79-01-6
trichlorofluoromethane (CFC-11)	75-69-4
2,4,5-trichlorophenol	95-95-4
2,4,6-trichlorophenol	88-06-2
1,2,3-trichloropropane	96-18-4
triclopyr triethylammonium salt	57213-69-1
triethylamine	121-44-8
trifluralin (benzeneamine, 2,6-dinitro-n,n-dipropyl-4-(trifluoromethyl)-)	1582-09-8
triforine (n,n'-[1,4-piperazinediylbis(2,2,2-trichloroethylidene)]bisformamide)	26644-46-2
1,2,4-trimethylbenzene	95-63-6
trimethylchlorosilane	75-77-4
2,2,4-trimethylhexamethylene diisocyanate	16938-22-0
2,4,4-trimethylhexamethylene diisocyanate	15646-96-5
2,3,5-trimethylphenyl methylcarbamate	2655-15-4

triphenyltin chloride	639-58-7
triphenyltin hydroxide	76-87-9
tris(2,3-dibromopropyl) phosphate	126-72-7
trypan blue	72-57-1
urethane (ethyl carbamate)	51-79-6
vanadium (except when contained in an alloy)	7440-62-2
vinclozolin (3-(3,5-dichlorophenyl) - 5 - ethenyl-5-methyl-2,4-oxazolidinedione)	50471-44-8
vinyl acetate	108-05-4
vinyl bromide	593-60-2
vinyl chloride	75-01-4
vinylidene chloride	75-35-4
xylene (mixed isomers)	1330-20-7
m-xylene	108-38-3
o-xylene	95-47-6
p-xylene	106-42-3
2,6-xylidine	87-62-7
zinc (fume or dust)	7440-66-6
zineb [carbamodithioic acid, 1,2-ethanediybis-, zinc complex]	12122-67-7

## (B) CAS number listing

--

CAS Number	Chemical Name
50-00-0	formaldehyde
51-03-6	piperonyl butoxide
51-28-5	2,4-dinitrophenol
51-75-2	nitrogen mustard (2-chloro-N-(2-chloroethyl) -N-methylethanamine)
51-79-6	urethane (ethyl carbamate)
52-68-6	trichlorfon (phosphonic acid, (2,2, 2-trichloro-1-hydroxyethyl) - dimethyl ester)
52-85-7	famphur
53-96-3	2-acetylaminofluorene
55-18-5	N-nitrosodiethylamine
55-21-0	benzamide
55-38-9	fenthion (o,o-dimethyl o(3methyl-4-(methylthio) phenyl) ester, phosphoric acid)
55-63-0	nitroglycerin
56-23-5	carbon tetrachloride
56-35-9	bis (tributyltin) oxide
56-38-2	parathion (phosphorothioic acid, o-o-diethyl-o- (4-nitrophenyl)ester)
57-14-7	1,1-dimethyl hydrazine
57-33-0	pentobarbital sodium
57-41-0	phenytoin

57-57-8	beta-propiolactone
57-74-9	chlordane (4,7-methanoindan, 1,2,4,5,6,7,8,8-octachloro-2,3,3a,4,7,7a-hexahydro-)
58-89-9	lindane (cyclohexane, 1,2,3,4,5,6-hexachlor-(1 alpha, 2 alpha, 3 beta, 4 alpha, 5 alpha, 6 beta)-)
59-89-2	N-nitrosomorpholine
60-09-3	4-aminoazobenzene
60-11-7	4-dimethylaminoazobenzene
60-34-4	methyl hydrazine
60-35-5	acetamide
60-51-5	dimethoate
61-82-5	amitrole
62-53-3	aniline
62-55-5	thioacetamide
62-56-6	thiourea
62-73-7	dichlorvos (phosphoric acid, 2,2-dichloroethenyl dimethyl ester)
62-74-8	sodium fluoroacetate
62-75-9	N-nitrosodimethylamine
63-25-2	carbaryl (1-naphthalenol, methylcarbamate)
64-18-6	formic acid
64-67-5	diethyl sulfate
64-75-5	tetracycline hydrochloride
67-56-1	methanol
67-63-0	isopropyl alcohol (only persons who manufacture by the strong acid process are subject, no supplier notification)
67-66-3	chloroform
67-72-1	hexachloroethane
68-12-2	n,n-dimethylformamide
68-76-8	triaziquone (2,5-cyclohexadiene-1,4-dione, n-butyl alcohol 2,3,5-tris(1-aziridinyl)-)
70-30-4	hexachlorophene
71-36-3	n-butyl alcohol
71-43-2	benzene
71-55-6	1,1,1-trichloroethane (methyl chloroform)
72-43-5	methoxychlor (benzene, 1,1-(2,2,2 trichloro-ethylidene) bis(4-methoxy-))
72-57-1	trypan blue
74-83-9	bromomethane (methyl bromide)
74-85-1	ethylene
74-87-3	chloromethane (methyl chloride)
74-88-4	methyl iodide
74-90-8	hydrogen cyanide
74-95-3	methylene bromide
75-00-3	chloroethane (ethyl chloride)

75-01-4	vinyl chloride
75-05-8	acetonitrile
75-07-0	acetaldehyde
75-09-2	dichloromethane (methylene chloride)
75-15-0	carbon disulfide
75-21-8	ethylene oxide
75-25-2	bromoform (tribromomethane)
75-27-4	dichlorobromomethane
75-34-3	ethylidene dichloride
75-35-4	vinylidene chloride
75-43-4	dichlorofluoromethane (HCFC-21)
75-44-5	phosgene
75-45-6	chlorodifluoromethane (HCFC-22)
75-55-8	propyleneimine
75-56-9	propylene oxide
75-63-8	bromotrifluoromethane (halon 1301)
75-65-0	tert-butyl alcohol
75-68-3	1-chloro-1,1-difluoroethane (HCFC-142b)
75-69-4	trichlorofluoromethane (CFC-11)
75-71-8	dichlorodifluoromethane (CFC-12)
75-72-9	chlorotrifluoromethane (CFC-13)
75-86-5	2-methylacetonitrile
75-88-7	2-chloro-1,1,1-trifluoroethane (HCFC-133a)
76-01-7	pentachloroethane
76-02-8	trichloroacetyl chloride
76-06-2	chloropicrin
76-13-1	freon 113 (ethane, 1,1,2-trichloro-1,2,2-trifluoro-)
76-14-2	dichlorotetrafluoroethane (CFC-114)
76-15-3	monochloropentafluoroethane (CFC-115)
76-44-8	heptachlor (1,4,5,6,7,8,8-heptachloro- 3A, 4,7,7a-tetrahydro-4,7-methano-1H-indene)
76-87-9	triphenyltin hydroxide
77-47-4	hexachlorocyclopentadiene
77-73-6	dicyclopentadiene
77-78-1	dimethyl sulfate
77-48-8	s,s,s-tributyltrithiophosphate (DEF)
78-84-2	isobutyraldehyde
78-87-5	1,2-dichloropropane
78-88-6	2,3-dichloropropene
78-92-2	sec-butyl alcohol
79-00-5	1,1,2-trichloroethane
79-01-6	trichloroethylene
79-06-1	acrylamide
79-10-7	acrylic acid

79-11-8	chloroacetic acid
79-19-6	thiosemicarbazide
79-21-0	peracetic acid
79-22-1	methyl chlorocarbonate
79-34-5	1,1,2,2-tetrachloroethane
79-44-7	dimethylcarbamyl chloride
79-46-9	2-nitropropane
79-94-7	tetrabromodisphenol a
80-05-7	4,4-isopropylidenediphenol
80-15-9	cumene hydroperoxide
80-62-6	methyl methacrylate
81-07-2	saccharin (only persons who manufacture are subject, no supplier notification) (1,2-benzisothiazol-3 (2H)-one,1,1-dioxide)
81-88-9	C.I. Food Red 15
82-28-0	1-amino-2-methylantraquinone
82-68-8	quintozene (pentachloronitrobenzene)
84-74-2	dibutyl phthalate
85-01-8	phenanthrene
85-44-9	phthalic anhydride
86-30-6	N-nitrosodiphenylamine
87-62-7	2,6-xylidine
87-68-3	hexachloro-1,3-butadiene
87-86-5	pentachlorophenol (PCP)
88-06-2	2,4,6-trichlorophenol
88-75-5	2-nitrophenol
88-85-7	dinitrobutyl phenol (dinoseb)
88-89-1	picric acid
90-04-0	o-anisidine
90-43-7	2-phenylphenol
90-94-8	michler's ketone
91-08-7	toluene-2,6-diisocyanate
91-20-3	naphthalene
91-22-5	quinoline
91-59-8	beta-naphthylamine
91-94-1	3,3-dichlorobenzidine
92-52-4	biphenyl
92-67-1	4-aminobiphenyl
92-87-5	benzidine
92-93-3	4-nitrobiphenyl
93-65-2	mecoprop
94-11-1	2,4-D isopropyl ester
94-36-0	benzoyl peroxide
94-58-6	dihydrosafrole
94-59-7	safrole

94-74-6	methoxone ((4-chloro-2methylphenoxy) acetic acid) (MCPA)
94-75-7	2,4-D (acetic acid, (2,4-dichlorophenoxy)-)
94-80-4	2,4-D butyl ester
94-82-6	2,4-DB
95-47-6	o-xylene
95-48-7	o-cresol
95-50-1	1,2-dichlorobenzene
95-53-4	o-toluidine
95-54-5	1,2-phenylenediamine
95-63-6	1,2,4-trimethylbenzene
95-69-2	p-chloro-o-toluidine
95-80-7	2,4-diaminotoluene
95-95-4	2,4,5-trichlorophenol
96-09-3	styrene oxide
96-12-8	1,2-dibromo-3-chloropropane (DBCP)
96-18-4	1,2,3-trichloropropane
96-33-3	methyl acrylate
96-45-7	ethylene thiourea
96-23-4	dichlorophene (2,2'-methylenebis(4-chlorophenol))
97-56-3	C.I. Solvent Yellow 3
98-07-7	benzoic trichloride (benzotrichloride)
98-82-8	cumene
98-86-2	acetophenone
98-87-3	benzal chloride
98-88-4	benzoyl chloride
98-95-3	nitrobenzene
99-30-9	dichloran (2,6-dichloro-4-nitroaniline)
99-55-8	5-nitro-o-toluidine
99-59-2	5-nitro-o-anisidine
99-65-0	m-dinitrobenzene
100-01-6	p-nitroaniline
100-02-7	4-nitrophenol
100-25-4	p-dinitrobenzene
100-41-4	ethylbenzene
100-42-5	styrene
100-44-7	benzyl chloride
100-75-4	N-nitrosopiperidine
101-05-3	anilazine (4,6-dichloro-n-(2-chlorophenyl) -1,3,5-triazin-2-amine)
101-14-4	4,4-methylenebis (2-chloroaniline) (MBOCA)
101-61-1	4,4-methylenebis (N,N-dimethyl) benzenamine
101-77-9	4,4-methylenedianiline
101-80-4	4,4-diaminodiphenyl ether
101-90-6	diglycidyl resorcinol ether
104-12-1	p-chlorophenyl isocyanate

104-94-9	p-anisidine
105-67-9	2,4-dimethylphenol
106-42-3	p-xylene
106-44-5	p-cresol
106-46-7	1,4-dichlorobenzene
106-47-8	p-chloroaniline
106-50-3	p-phenylenediamine
106-51-4	quinone
106-88-7	1,2-butylene oxide
106-89-8	epichlorohydrin
106-93-4	1,2-dibromoethane (ethylene dibromide)
106-99-0	1,3-butadiene
107-02-8	acrolein
107-05-1	allyl chloride
107-06-2	1,2-dichloroethane (ethylene dichloride)
107-11-9	allylamine
107-13-1	acrylonitrile
107-18-6	allyl alcohol
107-19-7	propargyl alcohol
107-21-1	ethylene glycol
107-30-2	chloromethyl methyl ether
108-05-4	vinyl acetate
108-10-1	methyl isobutyl ketone
108-31-6	maleic anhydride
108-38-3	m-xylene
108-39-4	m-cresol
108-45-2	1,3-phenylenediamine
108-60-1	bis(2-chloro-1-methylethyl) ether
108-88-3	toluene
108-90-7	chlorobenzene
108-93-0	cyclohexanol
108-95-2	phenol
109-06-8	2-methylpyridine
109-77-3	malononitrile
109-86-4	2-methoxyethanol
110-54-3	n-hexane
110-57-6	trans-1,4-dichloro-2-butene
110-80-5	2-ethoxyethanol
110-82-7	cyclohexane
110-86-1	pyridine
111-42-2	diethanolamine
111-44-4	bis (2-chloroethyl) ether
111-91-1	bis (2-chloroethoxy) methane
114-26-1	propoxur (phenol, 2-(1-methylethoxy), methylcarbamate)

115-07-1	propylene (propene)
115-28-6	chlorendic acid
115-32-2	dicofol (benzenemethanol, 4-chloro-alpha- (4-chlorophenyl) - alpha - (trichloromethyl)-)
116-06-3	aldicarb
117-79-3	2-aminoanthraquinone
117-81-7	di-(2-ethylhexyl) phthalate (DEHP)
118-74-1	hexachlorobenzene
119-90-4	3,3-dimethoxybenzidine
119-93-7	3,3-dimethylbenzidine (o-tolidine)
120-12-7	anthracene
120-36-5	2, 4-DP
120-58-1	isosafrole
120-71-8	p-cresidine
120-80-9	catechol
120-82-1	1,2,4-trichlorobenzene
120-83-2	2,4-dichlorophenol
121-14-2	2,4-dinitrotoluene
121-44-8	triethylamine
121-69-7	N,N-dimethylaniline
121-75-5	malathion
122-34-9	simazine
122-39-4	diphenylamine
122-66-7	1,2-diphenylhydrazine (hydrazobenzene)
123-31-9	hydroquinone
123-38-6	propionaldehyde
123-63-7	paraldehyde
123-72-8	butyraldehyde
123-91-1	1,4-dioxane
124-40-3	dimethylamine
124-73-2	dibromotetrafluoroethane (halon 2402)
126-72-7	tris (2,3-dibromopropyl) phosphate
126-98-7	methacrylonitrile
126-99-8	chloroprene
127-18-4	tetrachloroethylene (perchloroethylene)
128-03-0	potassium dimethyldithiocarbamate
128-04-1	sodium dimethyldithiocarbamate
128-66-5	C.I. Vat Yellow 4
131-11-3	dimethyl phthalate
131-52-2	sodium pentachlorophenate
132-27-4	sodium o-phenylphenoxide
132-64-9	dibenzofuran
133-06-2	captan (1H-isoindole-1,3 (2H) -dione, 3a,4,7,7a- tetrahydro-2[(trichloromethyl) thio]-)

133-07-3	folpet
133-90-4	chloramben (benzoic acid, 3-amino- 2,5,-dichloro-)
134-29-2	o-anisidine hydrochloride
134-32-7	alpha-naphthylamine
135-20-6	cupferron (benzeneamine, N-hydroxy-N-nitroso, ammonium salt)
136-45-8	dipropyl isocinchomeronate
137-26-8	thiram
137-41-7	potassium n-methyldithio-carbamate
137-42-8	metham sodium (sodium methyldithiocarbamate)
138-93-2	disodium cyanodithioimido-carbonate
139-13-9	nitrilotriacetic acid
139-65-1	4,4-thiodianiline
140-88-5	ethyl acrylate
141-32-2	butyl acrylate
142-59-6	nabam
148-79-8	thiabendazole (2-(4-thiazolyl) -1h-benzimidazole)
149-30-4	2-mercaptobenzothiazole (MBT)
150-50-5	merphos
150-68-5	monuron
151-56-4	ethyleneimine (aziridine)
156-10-5	p-nitrosodiphenylamine
156-62-7	calcium cyanamide
191-24-2	benzo (g,h,i) perylene
298-00-0	methyl parathion
300-76-5	naled
301-12-2	oxydemeton metheyl (s-(2-(ethylsulfinyl) ethyl)o,o-dimethyl ester phosphorothioic acid)
302-01-2	hydrazine
306-83-2	2,2-dichloro-1,1,1-trifluoroethane (HCFC-123)
309-00-2	aldrin (1,4,5,8-dimethanonaphthalene, 1,2,3,4,10,10-hexachloro-1,4,4a,5,8,8a- hexahydro- (1 alpha, 4 alpha, 4a beta, 5 alpha, 8 alpha, 8a beta)-)
314-40-9	bromacil (5-bromo-6-methyl-3- (1-methyl-propyl)2,4-(1h,3h)-pyrimidine-dione
319-84-6	alpha-hexachlorocyclohexane
330-54-1	diuron
330-55-2	linuron
333-41-5	diazinon
334-88-3	diazomethane
353-59-3	bromochlorodifluoromethane (halon 1211)
354-11-0	1,1,1,2-tetrachloro-2-fluoroethane (HCFC-121a)
354-14-3	1,1,2,2-tetrachloro-1-fluoroethane (HCFC-121)
354-23-4	1,2-dichloro-1,1,2-trifluoroethane (HCFC-123a)
354-25-6	1-chloro-1,1,2,2-tetrafluoroethane (HCFC-124a)

357-57-3	brucine
422-44-6	1,2-dichloro-1,1,2,3,3-pentafluoropropane (HCFC-225bb)
422-48-0	2,3-dichloro-1,1,1,2,3-pentafluoropropane (HCFC-225ba)
422-56-0	3,3-dichloro-1,1,1,2,2-pentafluoropropane (HCFC-225ca)
431-86-7	1,2-dichloro-1,1,3,3,3-pentafluoropropane (HCFC-225da)
460-35-5	3-chloro-1,1,1-trifluoropropane (HCFC-253fb)
463-58-1	carbonyl sulfide
465-73-6	isodrin
492-80-8	C.I. Solvent Yellow 34 (aurimine)
505-60-2	mustard gas (ethane, 1,1-thiobis (2-chloro-))
507-55-1	1,3-dichloro-1,1,2,2,3-pentafluoropropane (HCFC-225cb)
510-15-6	chlorobenzilate (benzeneacetic acid, 4-chloro-alpha(4-chlorophenyl) - alpha-hydroxy-ethyl ester)
528-29-0	o-dinitrobenzene
532-27-4	2-chloroacetophenone
533-74-4	dazomet (tetrahydro-3, 5-dimethyl-2h-1,3,5-thiadiazine-2-thione)
534-52-1	4,6-dinitro-o-cresol
540-59-0	1,2-dichlorethylene
541-41-3	ethyl chloroformate
541-53-7	2,4-dithiobiuret
541-73-1	1,3-dichlorobenzene
542-75-6	1,3-dichloropropylene
542-76-7	3-chloropropionitrile
542-88-1	bis(chloromethyl)ether
554-13-2	lithium carbonate
556-61-6	methyl isothiocyanate (isothiocyanatomethane)
563-47-3	3-chloro-2-methyl-1-propene
569-64-2	C.I. Basic Green 4
584-84-9	toluene-2,4-diisocyanate
593-60-2	vinyl bromide
594-42-3	perchloromethyl mercaptan
606-20-2	2,6-dinitrotoluene
608-93-5	pentachlorobenzene
612-82-8	3,3'-dimethylbenzidine dihydrochloride (o-tolidine dihydrochloride)
612-83-9	3,3'-dichlorobenzidine dihydrochloride
615-05-4	2,4-diaminoanisole
615-28-1	1,2-phenylenediamine dihydrochloride
621-64-7	N-nitrosodi-n-propylamine
624-18-0	1,4-phenylenediamine dihydrochloride
624-83-9	methyl isocyanate
630-20-6	1,1,1,2-tetrachlorethane
636-21-5	o-toluidine hydrochloride
639-58-7	triphenyltin chloride
680-31-9	hexamethylphosphoramide

684-93-5	N-nitroso-N-methylurea
709-98-8	propanil (n-(3,4-dichlorophenyl) propanamide)
759-73-9	N-nitroso-N-ethylurea
759-94-4	ethyl dipropylthiocarbamate (EPTC)
764-41-0	1,4-dichloro-2-butene
812-04-4	1,1-dichloro-1,2,2-trifluoroethane (HCFC-123b)
834-12-8	ametryn (n-ethyl-n'-(1-methylethyl) - 6 - (methylthio) - 1,3,5,- triazine-2, 4-diamine)
842-07-9	C.I. Solvent Yellow 14
872-50-4	n-methyl-2-pyrrolidone
924-16-3	N-nitrosodi-n-butylamine
924-42-5	n-methylolacrylamide
957-51-7	diphenamid
961-11-5	tetrachlorvinphos (phosphoric acid, 2-chloro-1-(2,4,5,- trichlorophenyl) ethenyl dimethyl ester)
989-38-8	C.I. Basic Red 1
1114-71-2	pebulate (butylethylcarbamothioic acid s-propyl ester)
1120-71-4	propane sultone
1134-23-2	cycloate
1163-19-5	decabromodiphenyl oxide
1313-27-5	molybdenum trioxide
1314-20-1	thorium dioxide
1319-77-3	cresol (mixed isomers)
1320-18-9	2,4-D propylene glycol butyl ether ester
1330-20-7	xylene (mixed isomers)
1332-21-4	asbestos (friable)
1335-87-1	hexachloronaphthalene
1336-36-3	polychlorinated biphenyls (PCB's)
1344-28-1	aluminum oxide (fibrous forms)
1464-53-5	diepoxybutane
1563-66-2	carbofuran
1582-09-8	trifluralin (benzeneamine,2,6-dinitro-N,N-dipropyl- 4,(trifluoromethyl)-)
1634-04-4	methyl tert-butyl ether
1649-08-7	1,2-dichloro-1,1-difluoroethane (HCFC-132b)
1689-84-5	bromoxynil (3,5-dibromo-4-hydroxybenzonitrile)
1689-99-2	bromoxynil octanoate (octanoic acid, 2,6-dibromo-4-cyanophenyl ester)
1717-00-6	1,1-dichloro-1-fluoroethane (HCFC-141b)
1836-75-5	nitrofen (benzene,2,4-dichloro-1-(4-nitrophenoxy)-)
1861-40-1	benfluralin (n-butyl-n-ethyl-2,6-dinitro-4-(trifluoromethyl) benzenamine)
1897-45-6	chlorothalonil (1,3-benzenedicarbo-nitrile,2,4,5,6-tetrachloro-)
1910-42-5	paraquat dichloride

1912-24-9	atrazine (6-chloro-n-ethyl-n'-(1-methyl-ethyl) - 1,3,5-triazine-2, 4-diamine)
1918-00-9	dicamba (3,6-dichloro-2-methoxybenzoic acid)
1918-02-1	picloram
1918-16-7	propachlor (2-chloro-n-(1-methylethyl)-n-phenylacetamide)
1928-43-4	2,4-d 2-ethylhexyl ester
1929-73-3	2,4-d butoxyethyl ester
1929-82-4	nitrapyrin (2-chloro-6-(trichloromethyl)-pyridine)
1937-37-7	C.I. Direct Black 38
1982-69-0	sodium dicamba (3,6-dichloro-2-methoxybenzoic acid, sodium salt)
1983-10-4	tributyltin fluoride
2032-65-7	methiocarb
2155-70-6	tributyltin methacrylate
2164-07-0	dipotassium endothall (7-oxabicyclo(2.2.1)heptane-2,3-dicarboxylic acid, dipotassium salt)
2164-17-2	fluometuron (urea,N,N-dimethyl-N (3-(trifluoromethyl phenyl)-)
2212-67-1	molinate (1h-azepine-1-carbothioic acid, hexahydro-s-ethyl ester)
2234-13-1	octachloronaphthalene
2300-66-5	dimethylamine dicamba
2303-16-4	diallate (carbomethioic acid, bis (1-methylethyl) - S - (2,3-dichloro-2-propenyl) ester)
2303-17-5	triallate
2312-35-8	propargite
2439-01-2	chinomethionat (6-methyl-1,3-dithiolo(4,5-b)-quinoxalin-2-one)
2439-10-3	dodine (dodecylguanidine monoacetate)
2524-03-0	dimethyl chlorothiophosphate
2602-46-2	C.I. Direct Blue 6
2655-15-4	2,3,5-trimethylphenyl methyl carbamate
2699-79-8	sulfuryl fluoride (vikane)
2702-72-9	2,4-D sodium salt
2832-40-8	C.I. Disperse Yellow 3
2837-89-0	2-chloro-1,1,1,2-tetrafluoroethane (HCFC-124)
2971-38-2	2,4-D chlorocrotyl ester
3118-97-6	C.I. Solvent Orange 7
3383-96-8	temephos
3653-48-3	methoxone sodium salt ((4-chloro-2-methylphenoxy) acetate sodium salt)
3761-53-3	C.I. Food Red 5
4080-31-3	1-(3-chloroallyl)-3,5,7-triaza-1-azoniaadamantane chloride
4170-30-3	crotonaldehyde
4549-40-0	N-nitrosomethylvinylamine
4680-78-8	C.I. Acid Green 3
5234-68-4	carboxin (5,6-dihydro-2-methyl-n-phenyl-1,4-oxathiin-3-carboxamide)

5598-13-0	chlorpyrifos methyl (o,o-dimethyl-o-(3,5,6-trichloro-2-pyridyl) phosphorothioate)
5902-51-2	terbacil (5-chloro-3-(1,1-dimethylethyl) - 6 - methyl-2,4(1h,3h) - pyrimidinedione)
6459-94-5	C.I. Acid red 114
7287-19-6	prometryn (n,n'-bis(1-methylethyl) - 6-methylthio-1,3,5-triazine-2,4-diamine)
7429-90-5	aluminum (fume or dust)
7439-92-1	lead
7439-96-5	manganese
7439-97-6	mercury
7440-02-0	nickel
7440-22-4	silver
7440-28-0	thallium
7440-36-0	antimony
7440-38-2	arsenic
7440-39-3	barium
7440-41-7	beryllium
7440-43-9	cadmium
7440-47-3	chromium
7440-48-4	cobalt
7440-50-8	copper
7440-62-2	vanadium (except when contained in an alloy)
7440-66-6	zinc (fume or dust)
7550-45-0	titanium tetrachloride
7632-00-0	sodium nitrite
7637-07-2	boron trifluoride
7647-01-0	hydrochloric acid (acid aerosols including mists, vapors, gas, fog, and other airborne species of any particle size)
7664-39-3	hydrogen fluoride
7664-41-7	ammonia (includes anhydrous ammonia and aqueous ammonia from water dissociable ammonium salts and other sources; "ten" percent of total aqueous ammonia is reportable under this listing)
7664-93-9	sulfuric acid (acid aerosols including mists, vapors, gas, fog, and other airborne species of any particle size)
7696-12-0	tetramethrin (2,2-dimethyl-3- (2-methyl-1-propenyl (cyclopropanecarboxylic acid (1,3,4,5,6,7-hexahydro-1,3-dioxo-2h-isoindol-2-yl) methyl ester)
7697-37-2	nitric acid
7723-14-0	phosphorus (yellow or white)
7726-95-6	bromine
7758-01-2	potassium bromate
7782-41-4	fluorine
7782-49-2	selenium
7782-50-5	chlorine

7786-34-7	mevinphos
7803-51-2	phosphine
8001-35-2	toxaphene
8001-58-9	creosote
9006-42-2	metiram
10028-15-6	ozone
10034-93-2	hydrazine sulfate
10049-04-4	chlorine dioxide
10061-02-6	trans-1,3-dichloropropene
10294-34-5	boron trichloride
10453-86-8	resmethrin ((5-(phenylmethyl) - 3 - furanyl) methyl-2,2-dimethyl-3-(2-methyl-1-propenyl) cyclopropanecarboxylate))
12122-67-7	zineb (carbamodithioic acid, 1,2-ethanediylbis, zinc complex)
12427-38-2	maneb (carbamodithioic acid, 1,2-ethanediylbis-, manganese complex)
13194-48-4	ethoprop (phosphorodithioic acid o-ethyl s,s-dipropyl ester)
13356-08-6	fenbutatin oxide (hexakis(2-methyl-2-phenylpropyl)distannoxane)
13463-40-6	iron pentacarbonyl
13474-88-9	1,1-dichloro-1,2,2,3,3-pentafluoropropane (HCFC-225cc)
13684-56-5	desmedipham
14484-64-1	ferbam (tris(dimethylcarbamodithioato-s,s') iron)
15972-60-8	alachlor
16071-86-6	C.I. Direct Brown 95
16543-55-8	N-nitrosornicotine
17804-35-2	benomyl
19044-88-3	oryzalin (4-(dipropylamino)-3,5-dinitrobenzenesulfonamide)
19666-30-9	oxydiazon (3-(2,4-dichloro-5(1-methyl-ethoxy)phenyl) - 5 - (1,1-dimethyl-ethyl)-1,3,4-oxadiazol-2(3h)-one)
20325-40-0	3,3'-dimethoxybenzidine dihydrochlorine(o-dianisidine dihydrochlorine)
20354-26-1	methazole (2-(3,4-dichlorophenyl) - 4 - methyl-1,2,4-oxadiazolidine-3,5-dione)
20816-12-0	osmium tetroxide
20859-73-8	aluminum phosphide
21087-64-9	metribuzin
21725-46-2	cyanazine
22781-23-3	bendiocarb (2,2-dimethyl-1,3-benzodioxol-4-ol methylcarbamate)
23564-05-8	thiophanatemethyl
23564-06-9	thiophanate ethyl ((1,2-phenylenebis-(iminocarbonothioyl)) biscalbamic acid diethyl ester)
23950-58-5	pronamide
25311-71-1	isofenphos (2-((ethoxyl((1-methylethyl)-amino)phosphinothioyl) benzoic acid 1-methylethyl ester)
25321-14-6	dinitrotoluene (mixed isomers)

25321-22-6	dichlorobenzene (mixed isomers)
25376-45-8	diaminotoluene (mixed isomers)
26002-80-2	phenothrin (2,2-dimethyl-3-(2-methyl-1-propenyl) cyclopropanecarboxylic acid (3-phenoxyphenyl)methyl ester)
26471-62-5	toluene diisocyanate (mixed isomers)
26628-22-8	sodium azide
26644-46-2	triforine (n,n'-(1,4-piperazinediylbis(2,2,2-trichloroethylidene)) bisformamide)
27314-13-2	norflurazon (4-chloro-5-(methylamino)-2-(3-(trifluoromethyl) phenyl) - 3 (2h)-pyridazinone)
28057-48-9	d-trans-allethrin (d-trans-chrysanthemic acid of d-allethron)
28249-77-6	thiobencarb (carbamic acid, diethylthio-,s-(p-chlorobenzyl) ester)
28407-37-6	C.I. Direct blue 218
29082-74-4	octachlorostyrene
29232-93-7	pirimiphos methyl (o-(2-(diethylamino)-6-methyl-4-pyrimidinyl)-o, o-dimethyl phosphorothioate)
30560-19-1	acephate (acetylphosphoramidothioic acid o,s-dimethyl ester)
31218-83-4	propetamphos (3-((ethylamino) methoxy phosphinothioyl)oxy] - 2 - butenoic acid, 1-methylethyl ester)
33089-61-1	amitraz
34014-18-1	tebuthiuron (n-(5-(1,1-dimethylethyl) -1,3,4-thiadiazol-2-yl) -n,n'-dimethylurea)
34077-87-7	dichlorotrifluoroethane
35367-38-5	diflubenzuron
35400-43-2	sulprofos (o-ethyl o-(4-(methylthio)phenyl) phosphorodithioic acid s-propyl ester)
35554-44-0	imazalil (1-(2-(2,4-dichlorophenyl) - 2 - (2-propenyloxy)ethyl)-1h-imidazole)
35691-65-7	1-bromo-1-(bromomethyl)-1,3-propane dicarbonitrile
38727-55-8	diethatyl ethyl
39156-41-7	2,4-diaminoanisole sulfate
39300-45-3	dinocap
39515-41-8	fenpropathrin (2,2,3,3-tetramethylcyclopropane carboxylic acid cyano(3-phenoxyphenyl)methyl ester)
40487-42-1	pendimethalin (n-(1-ethylpropyl)-3,4- dimethyl-2,6-dinitrobenzenamine)
41198-08-7	profenofos (o- (4-bromo-2-chlorophenyl) -o-ethyl-s-propylphosphorothioate)
41766-75-0	3,3'-dimethylbenzidine dihydrofluoride (o-tolidine dihydrofluoride)
42874-03-3	oxyfluorfen
43121-43-3	triadimefon (1-(4-chlorophenoxy) -3,3-dimethyl-1-(1h-1,2,4-triazol-1-yl)-2-butanone)
50471-44-8	vinclozolin (3-(3,5-dichlorophenyl) -5-ethenyl-5-methyl-2,4-oxazolidinedione)
51235-04-2	hexazinone

51338-27-3	diclofop methyl (2-(4-(2,4-dichlorophenoxy)phenoxy)propanoic acid, methyl ester)
51630-58-1	fenvalerate (4-chloro-alpha-(1-methylethyl) -benzeneacetic acid cyano (3-phenoxyphenyl)methyl ester)
52645-53-1	permethrin (3-(2,2-dichloroethenyl)-2,2-dimethylcyclopropane carboxylic acid, (3-phenoxyphenyl)methyl ester)
53404-19-6	bromacil, lithium salt (2,4-(1h,3h) -pyrimidinedione, 5-bromo-6-methyl-3-(1-methylpropyl), lithium salt)
53404-37-8	2,4-D 2-ethyl-4-methylpentyl ester
53404-60-7	dazomet, sodium salt (tetrahydro-3,5-dimethyl-2h-1,3,5-thiadiazine-2-thione, ion(1-), sodium)
55290-64-7	dimethipin (2,3,-dihydro-5,6-dimethyl-1,4-dithiin 1,1,4,4-tetraoxide)
55406-53-6	3-iodo-2-propynyl butylcarbamate
57213-69-1	triclopyr triethylammonium salt
59669-26-0	thiodicarb
60168-88-9	fenarimol (alpha -(2-chlorophenyl)- alpha -4-chlorophenyl) - 5-pyrimidinemethanol)
60207-90-1	propiconazole (1-[2-(2,4-dichlorophenyl)-4-propyl-1,3-dioxolan-2-yl] -methyl-1h-1,2,4,-triazole)
62476-59-9	acifluorfen, sodium salt (5- (2-chloro-4- (trifluoromethyl) phenoxy)-2-nitrobenzoic acid, sodium salt)
63938-10-3	chlorotetrafluoroethane
64902-72-3	chlorsulfuron (2-chloro-n-(((4-methoxy-6-methyl-1,3,5-triazin-2-yl)amino] carbonyl) benzene sulfonamide)
64969-34-2	3,3'-dichlorobenzidine sulfate
66441-23-4	fenoxaprop ethyl (2-(4-((6-chloro-2-benzoxazolyl)oxy)phenoxy)propanoic acid, ethyl ester)
67485-29-4	hydramethylnon (tetrahydro-5, 5-dimethyl-2(1h)-pyrimidinone[3-(4-(trifluoromethyl)phenyl) -1-(2-(4-(trifluoromethyl) phenyl)ethenyl)-2-propenylidene)hydrazone)
68085-85-8	cyhalothrin (3-(2-chloro-3,3,3-trifluoro-1-propenyl)-2,2-dimethylcyclopropanecarboxylic acid cyano (3-phenoxyphenyl)methyl ester)
68359-37-5	cyfluthrin (3-(2,2-dichloroethenyl)-2,2-dimethylcyclopropanecarboxylic acid, cyano(4-fluoro-3-phenoxyphenyl)methyl ester)
69409-94-5	fluvalinate (n-(2-chloro-4- (trifluoromethyl) phenyl)-dl-valine(+)-cyano (3-phenoxyphenyl)methyl ester)
69806-50-4	fluazifop butyl (2-(4-((5-(trifluoromethyl)-2-pyridinyl)oxy)-phenoxy)propanoic acid, butyl ester)
71751-41-2	abamectin (avermectin b1)
72178-02-0	fomesafen (5-(2-chloro-4-(trifluoromethyl)phenoxy) -n-methylsulfonyl)-2-nitrobenzamide)
72490-01-8	fenoxycarb (2-(4-phenoxy-phenoxy)-ethylcarbamic acid ethyl ester)
74051-80-2	sethoxydim (2-(1-(ethoxyimino) butyl)-5-(2-(ethylthio)propyl) -3-

	hydroxyl-2-cyclohexen-1-one)
76578-14-8	quizalofop-ethyl (2-(4-((6-chloro-2-quinoxalinyloxy)phenoxy)propanoic acid ethyl ester)
77501-63-4	lactofen (benzoic acid, (5-(2-chloro-4-(trifluoromethyl)phenoxy)-2-nitro-2-ethoxy-1-methyl-2-oxoethyl ester)
82657-04-3	bifenthrin
88671-89-0	myclobutanil (alpha-butyl-alpha-(4-chlorophenyl)-1H-1,2,4-triazole-1-propanenitrile)
90454-18-5	dichloro-1,1,2-trifluoroethane
90982-32-4	chlorimuron ethyl (ethyl-2-((((4-chloro-6-methoxyprimidin-2-yl)-carbonyl)-amino)sulfonyl)benzoate)
101200-48-0	tribenuron methyl (2-((((4-methoxy-6-methyl-1,3,5-triazin-2-yl)-methylamino)carbonyl)amino)sulfonyl-, methyl ester)
111512-56-2	1,1-dichloro-1,2,3,3,3-pentafluoropropane (HCFC-225eb)
111984-09-9	3,3'-dimethoxybenzidine hydrochloride (o-dianisidine hydrochloride)
127564-92-5	dichloropentafluoropropane
128903-21-9	2,2-dichloro-1,1,1,3,3-
	pentafluoropropane (HCFC-225aa)
136013-79-1	1,3-dichloro-1,1,2,3,3-pentafluoropropane (HCFC-225ea)

(C) Chemical categories in alphabetical order:

antimony compounds: includes any unique chemical substance that contains antimony as part of that chemical's infrastructure.

arsenic compounds: includes any unique chemical substance that contains arsenic as part of that chemical's infrastructure.

barium compounds: includes any unique chemical substance that contains barium as part of that chemical's infrastructure.

beryllium compounds: includes any unique chemical substance that contains beryllium as part of that chemical's infrastructure.

cadmium compounds: includes any unique chemical substance that contains cadmium as part of that chemical's infrastructure.

chlorophenols:

where x = 1 to 5

chromium compounds: includes any unique chemical substance that contains chromium as part of that chemical's infrastructure.

cobalt compounds: includes any unique chemical substance that contains cobalt as part of that chemical's infrastructure.

copper compounds: includes any unique chemical substance that contains copper as part of that chemical's infrastructure.

cyanide compounds:  $X^+ CN^-$  where  $X = H^+$  or any other group where a formal dissociation can be made. For example, KCN or CA  $(CN)_2$ .

diisocyanates: This category includes only those chemicals listed below.

--

38661-72-2	1,3-bis(methylisocyanate)-cyclohexane
10347-54-3	1,4-bis(methylisocyanate)-cyclohexane
2556-36-71	1,4-cyclohexane diisocyanate
134190-37-7	diethyldiisocyanatobenzene
4128-73-84	4,4'-diisocyanatodiphenyl ether
75790-87-32	2,4'-diisocyanatodiphenyl sulfide
91-93-0	3,3'-dimethoxybenzidine-4,4'-diisocyanate
91-97-4	3,3'-dimethyl-4,4'diphenylene diisocyanate
139-25-3	3,3'-dimethyldiphenylmethane-4,4'-diisocyanate
822-06-0	hexamethylene-1,6-diisocyanate
4098-71-9	isophorone diisocyanate
75790-84-0	4-methyldiphenylmethane-3,4-diisocyanate
5124-30-1	1,1methylene bis(4-isocyanatocyclohexane)
101-68-8	methylene bis (phenylisocyanate) (mdi)
3173-72-6	1,5-naphthalene diisocyanate
123-61-5	1,3-phenylene diisocyanate
104-49-4	1,4-phenylene diisocyanate
9016-87-9	polymeric diphenylmethane diisocyanate
16938-22-0	2,2,4-trimethylhexamethylene diisocyanate
15646-96-5	2,4,4-trimethylhexamethylene diisocyanate

Dioxin and dioxin-like compounds (manufacturing; and the processing or otherwise use of dioxin-like compounds if the dioxin and dioxin-like compounds are present as contaminants in a chemical and if they were created during the manufacturing of that chemical) (this category includes only those chemicals listed below).

--

67562-39-4	1,2,3,4,6,7,8-heptachlorodibenzofuran
55673-89-7	1,2,3,4,7,8,9-heptachlorodibenzofuran
70648-26-9	1,2,3,4,7,8-hexachlorodibenzofuran
55117-44-9	1,2,3,6,7,8-hexachlorodibenzofuran
72918-21-9	1,2,3,7,8,9-hexachlorodibenzofuran
60851-34-5	2,3,4,6,7,8-hexachlorodibenzofuran
39227-28-6	1,2,3,4,7,8-hexachlorodibenzo-p-dioxin
57653-85-7	1,2,3,6,7,8-hexachlorodibenzo-p-dioxin

19408-74-3	1,2,3,7,8,9-hexachlorodibenzo-p-dioxin
35822-46-9	1,2,3,4,6,7,8-hexachlorodibenzo-p-dioxin
39001-02-0	1,2,3,4,6,7,8,9-octachlorodibenzofuran
03268-87-9	1,2,3,4,6,7,8,9-octachlorodibenzo-p-dioxin
57117-41-6	1,2,3,7,8-pentachlorodibenzofuran
57117-31-4	2,3,4,7,8-pentachlorodibenzofuran
40321-76-4	1,2,3,7,8-pentachlorodibenzo-p-dioxin
51207-31-9	2,3,7,8-tetrachlorodibenzofuran
01746-01-6	2,3,7,8-tetrachlorodibenzo-p-dioxin

mercury compounds: includes any unique chemical substance that contains mercury as part of that chemical's infrastructure.

ethylenebisdithiocarbamic acid, salts and esters: includes any unique chemical substance that contains EDBC or an EDBC salt as part of that chemical's infrastructure.

certain glycol ethers:

Where N = 1, 2 or 3

R = alkyl C7 or less; or

R = phenyl or alkyl subtitled phenyl;

R' = H or alkyl C7 or less; or

OR' consisting of carboxylic acid ester, sulfate, phosphate, nitrate, or sulfonate.

lead compounds: includes any unique chemical substance that contains lead as part of that chemical's infrastructure.

manganese compounds: includes any unique chemical substance that contains manganese as part of that chemical's infrastructure.

mercury compounds: includes any unique chemical substance that contains mercury as part of that chemical's infrastructure.

nickel compounds: includes any unique chemical substance that contains nickel as part of that chemical's infrastructure.

nicotine and salts: includes any unique chemical substance that contains nicotine or a nicotine salt as part of that chemical's infrastructure.

nitrate compounds (water dissociable; reportable only when in aqueous solution)

polybrominated biphenyls (PBBS)

where X = 1 to 10

polychlorinated alkanes (C<sub>10</sub>to C<sub>13</sub>): includes those chemicals defined by the following formula:

Where X = 10 to 13; Y = 3 to 12; and where the average chlorine content ranges from 40-70% with the limiting molecular formulas C<sub>10</sub>H<sub>19</sub>Cl<sub>3</sub> and C<sub>13</sub>H<sub>16</sub>Cl<sub>12</sub>.

polycyclic aromatic compounds (PACs): this category includes only those chemicals listed below.

--

00056-55-3	benz (a) anthracene
00205-99-2	benzo (b) fluoranthene
00205-82-3	benzo (j) fluoranthene
00207-08-9	benzo (k) fluoranthene
00206-44-0	benzo (j,k) fluorene
00189-55-9	benzo (r,s,t) pentaphene
00218-01-9	benzo (a) phenanthrene
00050-32-8	benzo (a) pyrene
00226-36-8	dibenz (a,h) acridine
00224-42-0	dibenz (a,j) acridine
00053-70-3	dibenzo (a,h) anthracene
00194-59-2	7h-dibenzo (c,g) carbazole
05385-75-1	dibenzo (a,e) fluoranthene
00192-65-4	dibenzo (a,e) pyrene
00189-64-0	dibenzo (a,h) pyrene
00191-30-0	dibenzo (a,l) pyrene
00057-97-6	7, 12-dimethylbenz (a) anthracene
00193-39-5	indeno [1,2,3-cd] pyrene
00056-49-5	3-methylcholanthrene
03697-24-3	5-methylchrysene
05522-43-0	1-nitropyrene

selenium compounds: includes any unique chemical substance that contains selenium as part of that chemical's infrastructure.

silver compounds: includes any unique chemical substance that contains silver as part of that chemical's infrastructure.

strychnine and salts: includes any unique chemical substance that contains strychnine or a strychnine salt as part of that chemical's infrastructure.

thallium compounds: includes any unique chemical substance that contains thallium as part of that chemical's infrastructure.

vanadium compounds: includes any unique chemical substance that contains thallium as part of that chemical's infrastructure.

warfarin and salts: includes any unique chemical substance that contains warfarin or a warfarin salt as part of that chemical's infrastructure.

zinc compounds: includes any unique chemical substance that contains zinc as part of that chemical's infrastructure.

Effective: 01/16/2006

3745-100-11      **Toxic chemical release reporting form and instructions.**

[Comment: For dates of non-regulatory government publications, publications of recognized organizations and associations, federal rules, and federal statutory provisions referenced in this rule, see the "Incorporation by Reference" paragraph at the end of rule 3745-100-01 of the Administrative Code.]

- (A) Availability of reporting form and instructions. The most current version of EPA Form R and Form R Schedule 1 may be found on the following USEPA program web site: <http://www.epa.gov/tri>. Any subsequent changes to the Form R or Form R Schedule 1 will be posted on this web site. Submitters may also contact the TRI Program at (202) 564-9554 to obtain this information. Ohio EPA also encourages facilities subject to this part to submit the required information to Ohio EPA by using magnetic media (computer disk) in lieu of Form R. Instructions for submitting and using magnetic media may also be obtained from the address given in this paragraph.
- (B) Form elements. Information elements reportable on EPA Form R and Form R Schedule 1, or equivalent magnetic media format include the following:
  - (1) An indication of whether the report:
    - (a) Claims chemical identity as trade secret.
    - (b) Covers the entire facility or part of a facility.
  - (2) Signature of a senior management official certifying the following; "I hereby certify that I have reviewed the attached documents and, to the best of my knowledge and belief, the submitted information is true and complete and that amounts and values in this report are accurate based upon reasonable estimates using data available to the preparer of the report."
  - (3) Facility name and address including the toxic chemical release inventory facility identification number if known.
  - (4) Name and telephone number for both a technical contact and a public contact.
  - (5) The four-digit SIC code(s) for the facility or establishments in the facility until the reporting year ending December 31, 2005, for which reporting forms are due July 1, 2006. Beginning with the reporting year ending December 31, 2006, for which reporting forms are due July 1, 2007, and for each subsequent reporting year, the six-digit NAICS code(s) for the facility or establishments in the facility.
  - (6) Dun and Bradstreet identification number.

- (7) The name(s) of receiving stream(s) or water body to which the chemical is released.
- (8) Name of the facility's parent company and its Dunn and Bradstreet identification number.
- (9) Name and chemical abstract number (CAS) (if applicable) of the chemical reported.
- (10) If the chemical identity is claimed trade secret, a generic name for the chemical.
- (11) A mixture component identity if the chemical identity is not known.
- (12) An indication of the activities and uses of the chemical at the facility.
- (13) An indication of the maximum amount of the chemical on site at any point in time during the reporting year.
- (14) Information on releases of the chemical to the environment as follows:
  - (a) An estimate of total releases in pounds (except for dioxin and dioxin-like compounds, which shall be reported in grams) per year (releases of less than one thousand pounds per year may be indicated in ranges, except for chemicals set forth in rule 3745-100-16 of the Administrative Code) from the facility plus an indication of the basis of estimate for the following:
    - (i) Fugitive or non-point air emissions.
    - (ii) Stack or point air emissions
    - (iii) Discharges to receiving streams or water bodies including an indication of the "per cent" of releases due to stormwater.
    - (iv) Underground injection on site.
    - (v) Releases to land on site.
  - (b) Additional reporting for the dioxin and dioxin-like compounds category.
    - (i) For reports pertaining to a reporting year ending on or before December 31, 2007, report a distribution of the chemicals included in the dioxin and dioxin-like compounds category. Such distribution shall either represent the distribution of the total quantity of dioxin and dioxin-like compounds released to all media from the facility; or its one best media-specific distribution.

- (ii) For reports pertaining to a reporting year ending after December 31, 2007, report the quantity of each member of the dioxin and dioxin-like compounds category in units of grams per year on Form R Schedule 1.

(15) Information on transfers of chemicals in wastes to off-site locations as follows:

(a) For transfers to publicly owned treatment works (POTW):

- (i) The name and address (including county) of each POTW to which the chemical is transferred.
- (ii) An estimate of the amount of the chemical transferred in pounds (except for dioxin and dioxin-like compounds, which shall be reported in grams) per year (transfers of less than one thousand pounds per year may be indicated as a range, except for chemicals set forth in rule 3745-100-16 of the Administrative Code) and an indication of the basis of the estimate. In addition, for reports pertaining to a reporting year ending after December 31, 2007, report the quantity of each member of the dioxin and dioxin-like compounds category in units of grams per year on Form R Schedule 1.

(b) For transfers to other off-site locations:

- (i) The name, address (including county), and EPA identification number (RCRA I.D. number) of each off-site location, including an indication of whether the location is owned or controlled by the reporting facility or its parent company.
- (ii) An estimate of the amount of the chemical in waste transferred in pounds (except for dioxin and dioxin-like compounds, which shall be reported in grams) per year (transfers of less than one thousand pounds may be indicated in ranges, except for chemicals set forth in rule 3745-100-16 of the Administrative Code) and an indication of the basis of the estimate. In addition, for reports pertaining to a reporting year ending after December 31, 2007, report the quantity of each member of the dioxin and dioxin-like compounds category in units of grams per year on Form R Schedule 1.

(16) The following information relative to waste treatment:

- (a) An indication of the general type of wastestream containing the reported chemical.
- (b) The treatment method applied to the wastestream.

- (c) An indication of the concentration of the chemical in the wastestream prior to treatment. An estimate of the efficiency of the treatment, which shall be indicated by a range.
  - (d) An indication (use is optional) of whether treatments listed are part of a treatment sequence.
- (C) The owner or operator subject to the reporting requirements must submit to the Ohio EPA a completed USEPA Form R or Form R Schedule 1 on or before July first of each year in accordance with the instructions in 40 CFR 372.85.
- (D) The director shall prescribe and publish a "Fee Calculation Worksheet" which shall be submitted by owners and operators subject to the reporting requirements.

[Comment: For dates of non-regulatory government publications, publications of recognized organizations and associations, federal rules, and federal statutory provisions referenced in this rule, see the "Incorporation by Reference" section at the end of rule 3745-100-01.]

- (A) The owner or operator of a facility required to annually file one or more toxic chemical release forms shall submit with the release form a filing fee of fifty dollars.
- (B) The owner or operator shall submit an additional fee of fifteen dollars per release form filed, but not exceeding a total additional fee of five hundred dollars.
- (C) The owner or operator of a facility who fails to submit a "Toxic Chemical Release Form" within thirty days after the applicable date prescribed in paragraph (F) of rule 3745-100-07 of the Administrative Code shall submit with the form a late filing fee of fifteen per cent of the total fees due under paragraphs (A) and (B) of this rule, in addition to the fees due under those paragraphs.
- (D) Fees collected by the director as required under this rule shall be credited to the "Toxic Release Reporting Fund" created in the state treasury by Substitute Senate Bill 367 of the 117th General Assembly for the implementation, administration and operation of the program.

[Comment: For dates of non-regulatory government publications, publications of recognized organizations and associations, federal rules, and federal statutory provisions referenced in this rule, see the "Incorporation by Reference" section at the end of rule 3745-100-01.]

The owner or operator of a facility subject to the reporting requirements that claims a trade secret shall conform to paragraphs (A) to (D) of this rule.

- (A) A submitter making a trade secrecy claim under this rule shall submit to entities other than U.S. EPA (e.g., the Ohio EPA, local emergency planning committee and local fire department) only the sanitized or public copy of the submission and substantiation.
- (B) Method of asserting claims of trade secrecy for information submitted under section 313 of the act.
  - (1) Submitters may claim as trade secret the specific chemical identity, including the chemical name and other specific identification, of any chemical subject to reporting under section 313.
  - (2) To make a claim, the submitter shall submit to U.S. EPA the following:
    - (a) An unsanitized copy of the toxic release inventory form under section 313 of the act with the information claimed as trade secret clearly identified. To do this, the submitter shall check the box on the form indicating that the chemical identity is being claimed as a trade secret. The submitter shall enter the generic class or category that is structurally descriptive of the chemical, as specified in paragraph (C) of this rule.
    - (b) A sanitized copy of the toxic release inventory form. This copy shall be identical to the document in paragraph (B)(1)(a) of this rule, except that the submitter shall delete the chemical identity claimed as a trade secret. This copy shall also be submitted to the state official or officials designated to receive this information.
    - (c) A sanitized and unsanitized substantiation in accordance with 40 CFR 350.7 for every chemical identity claimed as trade secret.
  - (3) If the submitter wishes to claim information in the substantiation as trade secret or business confidential, it shall do so in accordance with 40 CFR 350.7(d).
  - (4) Section 313 claims shall be sent to the address specified in 40 CFR 350.16.

- (C) Method of choosing a generic class or category for section 313 of the act. A facility owner or operator claiming a chemical identity as a trade secret should choose a generic class or category for the chemical that is structurally descriptive of the chemical.
- (D) If a specific chemical identity is submitted under Title III to U.S. EPA, or to a state emergency response commission, designated state agency, local emergency planning committee or local fire department, without asserting a trade secret claim, the chemical identity shall be considered to have been voluntarily disclosed, and a nontrade secret.

3745-100-14      **Alternate threshold and certification.**

[Comment: For dates of non-regulatory government publications, publications of recognized organizations and associations, federal rules, and federal statutory provisions referenced in this rule, see the "Incorporation by Reference" paragraph at the end of rule 3745-100-01 of the Administrative Code.]

(A) Except as provided in paragraph (E) of this rule:

- (1) General. With respect to the manufacture, process, or otherwise use of a toxic chemical, the owner or operator of a facility may apply an alternate threshold of one million pounds per year to that chemical if the owner or operator calculates that the facility would have:
  - (a) No more than two thousand pounds of total on-site and off-site disposal or other releases (including disposal or other releases that resulted from catastrophic events); and
  - (b) An annual reportable amount of that toxic chemical not exceeding five thousand pounds for the combined total quantities released at the facility; disposed within the facility; treated for destruction at the facility; recovered at the facility as a result of recycling operations; combusted for the purpose of energy recovery at the facility; transferred from the facility to off-site locations for the purpose of recycling, energy recovery, treatment, and/or disposal; and managed as a result of remedial actions, catastrophic events, or one-time events not associated with production processes during the reporting year. These volumes correspond to the sum of amounts reportable for data elements on USEPA Form R as part II column B or sections 8.1 (total quantity released), 8.2 (quantity used for energy recovery on-site), 8.3 (quantity used for energy recovery off-site), 8.4 (quantity recycled on-site), 8.5 (quantity recycled off-site), 8.6 (quantity treated on-site), 8.7 (quantity treated off-site), and 8.8 (quantity released to the environment as a result of remedial actions, catastrophic events, or one-time events not associated with production processes).
- (2) Chemicals of special concern. With respect to the manufacture, process, or otherwise use of a toxic chemical, the owner or operator of a facility may apply an alternate threshold of one million pounds per year to that chemical if the owner or operator calculates that the facility would have:
  - (a) Zero on-site and off-site disposal or other releases (including disposal or other releases that resulted from catastrophic events); and

- (b) An annual reportable amount of a chemical of special concern not exceeding five hundred pounds. The annual reportable amount of a chemical of special concern is the combined total of:
  - (i) Quantities treated for destruction at the facility;
  - (ii) Quantities recovered at the facility as a result of recycling operations;
  - (iii) Quantities combusted for the purpose of energy recovery at the facility;
  - (iv) Quantities combusted for the purpose of energy recovery at the facility;
  - (v) Quantities transferred from the facility to off-site locations for the purpose of recycling, energy recovery, and/or treatment; and
  - (vi) Quantities managed through recycling, energy recovery, or treatment for destruction that were the result of remedial actions, catastrophic events, or one-time events not associated with production processes during the reporting year.
  
- (B) If an owner or operator of a facility determines that the owner or operator may apply the alternate reporting threshold specified in paragraph (A) of this rule for a specific toxic chemical, the owner or operator is not required to submit a report for that chemical under rule 3745-100-07 of the Administrative Code, but must submit a certification statement that contains the information required in rule 3745-100-15 of the Administrative Code. The owner or operator of the facility must also keep records as specified in paragraph (D) of rule 3745-100-03 of the Administrative Code.
  
- (C) Threshold determination provisions of rule 3745-100-06 of the Administrative Code and exemptions pertaining to threshold determinations in rule 3745-100-08 of the Administrative Code are applicable to the determination of whether the alternate threshold has been met.
  
- (D) Each certification statement under this section for activities involving a toxic chemical that occurred during a calendar year at a facility must be submitted to Ohio EPA on or before July first of the next year.
  
- (E) The alternative thresholds described in paragraph (A) of this rule are limited by the following:
  - (1) The provisions of paragraph (A)(1) of this rule do not apply to any chemicals listed in rule 3745-100-16 of the Administrative Code.
  - (2) The provisions of paragraph (A)(2) of this rule apply only to chemicals listed in rule 3745-100-16 of the Administrative Code.

- (3) Dioxins and dioxin-like compounds are not eligible for the alternate thresholds described in paragraph (A) of this rule.

3745-100-15      **Alternate threshold certification and instructions.**

[Comment: For dates of non-regulatory government publications, publications of recognized organizations and associations, federal rules, and federal statutory provisions referenced in this rule, see the "Incorporation by Reference" paragraph at the end of rule 3745-100-01 of the Administrative Code.]

- (A) Availability of the alternate threshold certification statement and instructions. Availability of the alternate threshold certification statement and instructions is the same as provided in rule 3745-100-11 of the Administrative Code for availability of the reporting form and instructions.
  
- (B) Alternate threshold certification statement elements. The following information must be reported on an alternate threshold certification statement pursuant to rule 3745-100-14 of the Administrative Code:
  - (1) Reporting year.
  
  - (2) An indication of whether the chemical identified is being claimed as trade secret.
  
  - (3) Chemical name and chemical abstract number (CAS) (if applicable) of the chemical, or the category name.
  
  - (4) Signature of a senior management official certifying the following:
    - (a) "Pursuant to paragraph (A)(1) of rule 3745-100-14 of the Administrative Code, I hereby certify that to the best of my knowledge and belief for the toxic chemical(s) listed in this statement, for this reporting year, the annual reportable amount for each chemical, as defined in 40 CFR 372.27(a)(1), did not exceed five thousand pounds, which included no more than two thousand pounds of total disposal or other releases to the environment, and that the chemical was manufactured, or processed, or otherwise used in an amount not exceeding one million pounds during this reporting year"; and/or
  
    - (b) "Pursuant to paragraph (A)(2) of rule 3745-100-14 of the Administrative Code, I hereby certify that to the best of my knowledge and belief for the toxic chemical(s) of special concern listed in this statement, there were zero disposals or other releases to the environment (including disposals or other releases that resulted from catastrophic events) for this reporting year, the Annual Reportable Amount of a Chemical of Special Concern for each such chemical, as defined in paragraph (A)(2) of rule 3745-100-14 of the Administrative Code, did not exceed five hundred pounds for this reporting year, and that the chemical was manufactured, or processed, or otherwise

used in an amount not exceeding one million pounds during this reporting year."

- (5) Date signed.
- (6) Facility name and address.
- (7) Mailing address of the facility if different than paragraph (B)(6) of this rule.
- (8) Toxic chemical release inventory facility identification number if known.
- (9) Name and telephone number of a technical contact.
- (10) The four-digit SIC code(s) for the facility or establishments in the facility until the reporting year ending December 31, 2005, for which reporting forms are due July 1, 2006. Beginning with the reporting year ending December 31, 2006, for which reporting forms are due July 1, 2007, and for each subsequent reporting year, the six-digit NAICS code(s) for the facility or establishments in the facility.
- (11) Dun and Bradstreet Number of the facility
- (12) Name of the facility's parent company.
- (13) Parent company's Dunn and Bradstreet number.

3745-100-17 **SIC and NAICS codes to which this chapter applies.**

[Comment: For dates of non-regulatory government publications, publications of recognized organizations and associations, federal rules, and federal statutory provisions referenced in this rule, see the "Incorporation by Reference" paragraph at the end of rule 3745-100-01 of the Administrative Code.]

The requirements of this chapter apply to facilities in the following SIC and NAICS codes. This rule contains three listings: Paragraph (A) of this rule lists the SIC codes to which this chapter applies. Paragraph (B) of this rule lists the NAICS codes that correspond to SIC codes 20 to 39 to which this chapter applies. Paragraph (C) of this chapter lists the NAICS codes that correspond to SIC codes other than SIC codes 20 to 39 to which this chapter applies.

(A) SIC codes

--

Major group or industry code	Exceptions and/or limitations
10	Except 1011, 1081, and 1094.
12	Except 1241.
20 to 39	
4911, 4931, 4939	Limited to facilities that combust coal and/or oil for the purpose of generating power for distribution in commerce.
4953	Limited to facilities regulated under the Resource Conservation and Recovery Act.
5169	
5171	
7389	Limited to facilities primarily engaged in solvent recovery services on a contract or fee basis.

(B) NAICS codes that correspond to SIC codes 20 to 39

--

Subsector code or industry code	Exceptions and/or limitations
113310	
311	Except 311119-Exception is limited to facilities primarily engaged in Custom Grain Grinding for Animal Feed (previously classified under SIC 0723, Crop Preparation Services for Market, Except Cotton Ginning);
	Except 311330-Exception is limited to facilities primarily engaged in the retail sale of candy, nuts, popcorn and other confections not for immediate consumption made on the premises (previously classified

	under SIC 5441, Candy, Nut, and Confectionery Stores);
	Except 311340-Exception is limited to facilities primarily engaged in the retail sale of candy, nuts, popcorn and other confections not or immediate consumption made on the premises (previously classified under SIC 5441, Candy, Nut, and Confectionery Stores);
	Except 311811-Retail Bakeries (previously classified under SIC 5461, Retail Bakeries);
	Except 311611-Exception is limited to facilities primarily engaged in Custom Slaughtering for individuals (previously classified under SIC 0751, Livestock Services, Except Veterinary, Slaughtering, custom: for individuals);
	Except 311612-Exception is limited to facilities primarily engaged in the cutting up and resale of purchased fresh carcasses for the trade (including boxed beef), and in the wholesale distribution of fresh, cured, and processed (but not canned) meats and lard (previously classified under SIC 5147, Meats and Meat Products);
312	Except 312112-Exception is limited to facilities primarily engaged in bottling mineral or spring water (previously classified under SIC 5149, Groceries and Related Products, NEC);
	Except 312229-Exception is limited to facilities primarily engaged in providing Tobacco Sheeting Services (previously classified under SIC 7389, Business Services, NEC);
313	Except 313311-Exception is limited to facilities primarily engaged in converting broadwoven piece goods and broadwoven textiles, (previously classified under SIC 5131, Piece Goods Notions, and Other Dry Goods, broadwoven and non-broadwoven piece good converters), and facilities primarily engaged in sponging fabric for tailors and dressmakers (previously classified under SIC 7389, Business Services, NEC (Sponging fabric for tailors and dressmakers));
	Except 313312 Exception is limited to facilities primarily engaged in converting narrow woven Textiles, and narrow woven piece goods, (previously classified under SIC 5131, Piece Goods Notions, and Other Dry Goods, converters, except broadwoven fabric);
314	Except 314121-Exception is limited to facilities primarily engaged in making Custom drapery for retail sale (previously classified under SIC 5714, Drapery, Curtain, and Upholstery Stores);
	Except 314129 Exception is limited to facilities primarily engaged in making Custom slipcovers for retail sale (previously classified under SIC 5714, Drapery, Curtain, and Upholstery Stores);
	Except 314999-Exception is limited to facilities primarily engaged in Binding carpets and rugs for the trade, Carpet cutting and binding, and Embroidering on textile products (except apparel) for the trade (previously classified under SIC 7389, Business Services Not Elsewhere Classified, Embroidering of advertising on shirts and Rug binding for the trade);
315	Except 315222-Exception is limited to custom tailors primarily engaged in making and selling men's and boys' suits, cut and sewn from

	purchased fabric (previously classified under SIC 5699, Miscellaneous Apparel and Accessory Stores (custom tailors));
	Except 315223-Exception is limited to custom tailors primarily engaged in making and selling men's and boys' dress shirts, cut and sewn from purchased fabric (previously classified under SIC 5699, Miscellaneous Apparel and Accessory Stores (custom tailors));
	Except 315233-Exception is limited to custom tailors primarily engaged in making and selling bridal dresses or gowns, or women's, misses' and girls' dresses cut and sewn from purchased fabric (except apparel contractors)(custom dressmakers) (previously classified under SIC Code 5699, Miscellaneous Apparel and Accessory Stores);
316	
321	
322	
323	Except 323114-Exception is limited to facilities primarily engaged in reproducing text, drawings, plans, maps, or other copy, by blueprinting, photocopying, mimeographing, or other methods of duplication other than printing or microfilming (i.e., instant printing) (previously classified under SIC 7334, Photocopying and Duplicating Services, (instant printing));
324	
325	Except 325998-Exception is limited to facilities primarily engaged in Aerosol can filling on a job order or contract basis (previously classified under SIC 7389, Business Services, NEC (aerosol packaging));
326	Except 326212-Tire Retreading, (previously classified under SIC 7534, Tire Retreading and Repair Shops (rebuilding));
327	Except 327112-Exception is limited to facilities primarily engaged in manufacturing and selling pottery on site (previously classified under SIC 5719, Miscellaneous Homefurnishing Stores);
331	
332	
333	
334	Except 334611-Software Reproducing (previously classified under SIC 7372, Prepackaged Software, (reproduction of software));
	Except 334612-Exception is limited to facilities primarily engaged in mass reproducing pre-recorded Video cassettes, and mass reproducing Video tape or disk (previously classified under SIC 7819, Services Allied to Motion Picture Production (reproduction of Video));
335	Except 335312-Exception is limited to facilities primarily engaged in armature rewinding on a factory basis (previously classified under SIC 7694 (Armature Rewinding Shops (remanufacturing));
336	
337	Except 337110-Exception is limited to facilities primarily engaged in the retail sale of household furniture and that manufacture custom wood kitchen cabinets and counter tops (previously classified under SIC 5712, Furniture Stores (custom wood cabinets));
	Except 337121-Exception is limited to facilities primarily engaged in the

	retail sale of household furniture and that manufacture custom made upholstered household furniture (previously classified under SIC 5712, Furniture Stores (upholstered, custom made furniture));
	Except 337122-Exception is limited to facilities primarily engaged in the retail sale of household furniture and that manufacture nonupholstered, household type, custom wood furniture (previously classified under SIC 5712, Furniture Stores (custom made wood nonupholstered household furniture except cabinets));
339	Except 339113-Exception is limited to facilities primarily engaged in manufacturing orthopedic devices to prescription in a retail environment (previously classified under SIC 5999, Miscellaneous Retail Stores, NEC);
	Except 339115-Exception is limited to lens grinding facilities that are primarily engaged in the retail sale of eyeglasses and contact lenses to prescription for individuals (previously classified under SIC 5995, Optical Goods Stores (optical laboratories grinding of lenses to prescription));
	Except 339116-Dental Laboratories (previously classified under SIC 8072, Dental Laboratories);
111998	Limited to facilities primarily engaged in reducing maple sap to maple syrup (previously classified under SIC 2099, Food Preparations, NEC, Reducing Maple Sap to Maple Syrup);
211112	Limited to facilities that recover sulfur from natural gas (previously classified under SIC 2819, Industrial Inorganic chemicals, NEC (recovering sulfur from natural gas));
212324	Limited to facilities operating without a mine or quarry and that are primarily engaged in beneficiating kaolin and clay (previously classified under SIC 3295, Minerals and Earths, Ground or Otherwise Treated (grinding, washing, separating, etc. of minerals in SIC 1455));
212325	Limited to facilities operating without a mine or quarry and that are primarily engaged in beneficiating clay and ceramic and refractory minerals (previously classified under SIC 3295, Minerals and Earths, Ground or Otherwise Treated (grinding, washing, separating, etc. of minerals in SIC 1459));
212393	Limited to facilities operating without a mine or quarry and that are primarily engaged in beneficiating chemical or fertilizer mineral raw materials (previously classified under SIC 3295, Minerals and Earths, Ground or Otherwise Treated (grinding, washing, separating, etc. of minerals in SIC 1479));
212399	Limited to facilities operating without a mine or quarry and that are primarily engaged in beneficiating nonmetallic minerals (previously classified under SIC 3295, Minerals and Earths, Ground or Otherwise Treated (grinding, washing, separating, etc. of minerals in SIC 1499));
488390	Limited to facilities that are primarily engaged in providing routine repair and maintenance of ships and boats from floating drydocks (previously classified under SIC 3731, Shipbuilding and Repairing (floating drydocks not associated with a shipyard));

511110	
511120	
511130	
511140	Except facilities that are primarily engaged in furnishing services for direct mail advertising including Address list compilers, Address list publishers, Address list publishers and printing combined, Address list publishing , Business directory publishers, Catalog of collections publishers, Catalog of collections publishers and printing combined, Mailing list compilers, Directory compilers, and Mailing list compiling services (previously classified under SIC 7331, Direct Mail Advertising Services (mailing list compilers));
511191	
511199	
512220	
512230	Except facilities primarily engaged in Music copyright authorizing use, Music copyright buying and licensing, and Music publishers working on their own account (previously classified under SIC 8999, Services, NEC (music publishing));
519130	Limited to facilities primarily engaged in Internet newspaper publishing (previously classified under SIC 2711, Newspapers: Publishing, or Publishing and Printing), Internet periodical publishing (previously classified under SIC 2721, Periodicals: Publishing, or Publishing and Printing), Internet book publishing (previously classified under SIC 2731, Books: Publishing, or Publishing and Printing), Miscellaneous Internet publishing (previously classified under SIC 2741, Miscellaneous Publishing), Internet greeting card publishers (previously classified under SIC 2771, Greeting Cards); Except for facilities primarily engaged in web search portals;
541712	Limited to facilities that are primarily engaged in Guided missile and space vehicle engine research and development (previously classified under SIC 3764, Guided Missile and Space Vehicle Propulsion Units and Propulsion Unit Parts), and in Guided missile and space vehicle parts (except engines) research and development (previously classified under SIC 3769, Guided Missile and Space Vehicle Parts and Auxiliary Equipment, Not Elsewhere Classified);
811490	Limited to facilities that are primarily engaged in repairing and servicing pleasure and sail boats without retailing new boats (previously classified under SIC 3732, Boat Building and Repairing (pleasure boat building));

(C) NAICS codes that correspond to SIC codes other than SIC codes 20 to 39

## **Chapter 3745-101: Transportation Conformity Rules**

*Contact:* Paul Braun 614-644-3734  
Paul.Braun@EPA.State.Oh.US

3745-101-01      **Purpose.**

[Comment: For dates of non-regulatory government publications, publications of recognized organizations and associations, federal rules, and federal statutory provisions referenced in this rule, see the last paragraph of rule 3745-101-02 of the Administrative Code titled "Incorporation by reference."]

The purpose of this chapter is to implement Section 176 (c) of the CAA the related requirements of 23 USC 109 (j), and regulations under 40 CFR Part 51, Subpart T, with respect to the conformity of transportation plans, programs, and projects which are developed, funded, or approved by the USDOT, by the Ohio DOT , and by metropolitan planning organizations or other recipients of funds under Title 23 of the United States Code or the Federal Transit Act contained in 49 USC 5303 . This chapter sets forth policy, criteria, and procedures for demonstrating and assuring conformity of such activities to this applicable implementation plan, developed and applicable pursuant to section 110 of the CAA and part D of Title I of the CAA.

Effective: 11/03/2006

R.C. 119.032 review dates: 08/16/2006 and 11/03/2011

3745-101-02      **Definitions.**

[Comment: For dates of non-regulatory government publications, publications of recognized organizations and associations, federal rules, and federal statutory provisions referenced in this rule, see the "Incorporation by Reference" paragraph at the end of this rule.]

(A) Terms used but not defined in this chapter shall have the meaning given them by the CAA, Titles 23 and 49 of the United States Code, other USEPA regulations, other USDOT regulations, or other state or local air quality or transportation rules, in that order of priority. Except as otherwise provided in this rule, the definitions in rule 3745-15-01 of the Administrative Code shall apply to this chapter.

(B) As used in Chapter 3745-101 of the Administrative Code:

- (1) "1-hour ozone NAAQS" means the one hour ozone national ambient air quality standard codified in 40 CFR 50.9.
- (2) "8-hour ozone NAAQS" means the eight hour ozone national ambient air quality standard codified in 40 CFR 50.10.
- (3) "Action scenario" means the future transportation system that would result from the implementation of the proposed transportation plan, program, and projects.
- (4) "Applicable implementation plan" as defined in Section 302(q) of the CAA means the portion, or portions, of the state's implementation plan, or most recent revision thereof, which has been approved under Section 110 of the CAA, or promulgated under Section 110(c) of the CAA, or promulgated or approved pursuant to regulations promulgated under Section 301(d) of the CAA and which implements the relevant requirements of the CAA.
- (5) "Baseline scenario" means the transportation system that would result from the continued implementation of current programs, as specified in 40 CFR 93.119.
- (6) "CAA " means the Clean Air Act as amended November 15, 1990; 42 USC 7401 to 7671q. .
- (7) "Cause or contribute to a new violation" for a project means:
  - (a) To cause or contribute to a new violation of a standard in the area substantially affected by the project or over a region which would otherwise not be in violation of the standard during the future period in question, if the project were not implemented, or

- (b) To contribute to a new violation in a manner that would increase the frequency or severity of a new violation of a standard in such area.
- (8) "CERCLA" means the Comprehensive Environmental Response, Compensation, and Liability Act, contained in 42 USC 9601 to 9675. .
- (9) "Clean data" means air quality monitoring data determined by EPA to meet the requirements of 40 CFR Part 58 that indicate attainment of the national ambient air quality standard.
- (10) "CO" means carbon monoxide.
- (11) "Consultation" means that one party confers with another identified party, provides all appropriate information to that party needed for meaningful input, and prior to taking any action, considers the views of that party and, except with respect to those actions for which only notification is required and those actions subject to paragraph (C)(1)(f) of rule 3745-101-04 of the Administrative Code, responds to those views in a timely, substantive written manner prior to any final decision on such action.
- (12) "Control strategy implementation plan revision" means the applicable implementation plan which contains specific strategies for controlling the emissions of and reducing ambient levels of pollutants in order to satisfy CAA requirements for demonstrations of reasonable further progress and attainment including implementation plan revisions submitted to satisfy 172(c), 182(b)(1), 182(c)(2)(A), 182(c)(2)(B), 187(a)(7), 187(g), 189(a)(1)(B), and 189(b)(1)(A) of the CAA ; and Sections 189(d), 192(a), and 192 (b) of the CAA, , for nitrogen dioxide; and any other applicable CAA provision requiring a demonstration of reasonable further progress or attainment).
- (13) "Design concept" means the type of facility identified by the project, e.g., freeway, expressway, arterial highway, grade-separated highway, reserved right-of-way rail transit, mixed-traffic rail transit, exclusive busway, etc.
- (14) "Design scope" means the design aspects of a facility which will affect the proposed facility's impact on regional emissions, usually as they relate to vehicle or person carrying capacity and control, e.g., number of lanes or tracks to be constructed or added, length of project, signalization, access control including approximate number and location of interchanges, preferential treatment for high occupancy vehicles, etc.
- (15) "Donut areas" are geographic areas outside a metropolitan planning area boundary, but inside the boundary of a nonattainment or maintenance area that contains any part of a metropolitan area(s). These areas are not isolated rural nonattainment and maintenance areas.

- (16) "EAC" means early action compact.
- (17) "EMFAC" means a computer-based mathematical model used by the state of California to calculate motor vehicle emissions.
- (18) "Facility" means any building, structure, roadway, installation, operation, or combination thereof.
- (19) "FHWA" means the federal highway administration of USDOT.
- (20) "FHWA/FTA project", for the purpose of this chapter, means any highway or transit project which is proposed to receive funding assistance and approval through the federal-aid highway program or the federal mass transit program or requires federal highway administration (FHWA) or federal transit administration (FTA) approval for some aspect of the project, such as connection to an interstate highway or deviation from applicable design standards on the interstate system.
- (21) "FTA" means the federal transit administration of USDOT.
- (22) "Fiscally constrained" means that full funding is reasonably anticipated to be available within the time period contemplated for completion of the projects in the transportation plan or in the transportation improvement plan in accordance with the metropolitan planning regulations at 23 CFR Part 450.
- (23) "Forecast period" with respect to a transportation plan or the transportation improvement plan means the period covered by the transportation plan or the transportation improvement plan pursuant to 23 CFR Part 450.
- (24) "Highway project" means an undertaking to implement or modify a highway facility or highway-related program. Such an undertaking consists of all required phases necessary for implementation. For analytical purposes, it shall be defined sufficiently to:
  - (a) Connect logical termini and be of sufficient length to address environmental matters on a broad scale;
  - (b) Have independent utility or significance, i.e., be usable and be a reasonable expenditure even if no additional transportation improvements in the area are made; and
  - (c) Not restrict consideration of alternatives for other reasonably foreseeable transportation improvements.

- (25) "Horizon year" means a year for which the transportation plan or the transportation improvement plan describes the envisioned transportation system in accordance with 40 CFR 93.106.
- (26) "Hot-spot analysis" means an estimation of likely future localized CO and PM<sub>10</sub> pollutant concentrations and a comparison of those concentrations to the national ambient air quality standards. A hot-spot analysis assesses impacts on a scale smaller than the entire nonattainment or maintenance area, including, for example, congested roadway intersections and highways or transit terminals, and uses an air quality dispersion model to determine the effects of emissions on air quality.
- (27) "HPMS" means highway performance monitoring system.
- (28) "Incomplete data area" means any ozone nonattainment area which is classified by USEPA, as an incomplete data area, pursuant to 40 CFR Part 81.
- (29) "Increase the frequency or severity" means to cause a location or region to exceed a standard more often or to cause a violation at a greater concentration than previously existed and/or would otherwise exist during the future period in question, if the project were not implemented.
- (30) "Lapse" means that the conformity determination for a transportation plan or a transportation improvement plan has expired, and thus there is no currently conforming transportation plan and transportation improvement plan .
- (31) "Lead agency" means the agency responsible for preparing the document, as referred to in paragraph (B)(2) of rule 3745-101-04 of the Administrative Code, unless otherwise provided by a memorandum of understanding or contract.
- (32) "Isolated rural nonattainment and maintenance areas" are areas that do not contain or are not part of any metropolitan planning area as designated under the transportation planning regulations. Isolated rural areas do not have federally required metropolitan transportation plans or transportation improvement plans and do not have projects that are part of the emissions analysis of any metropolitan planning organization's metropolitan transportation plan or transportation improvement plan. Projects in such areas are instead included in statewide transportation improvement programs. These areas are not donut areas.
- (33) "Level of service" is a qualitative measure describing operational conditions of traffic, generally described in terms of speed and travel time, freedom to maneuver, traffic interruptions, comfort, convenience, and safety. The following six levels of service define a facility's operating condition:
- (a) Level of service A - free flow, no restrictions on operating speed.

- (b) Level of service B - stable flow, few speed restrictions
  - (c) Level of service C - stable flow, higher volumes, some restricted speed and lane changing
  - (d) Level of service D - approaching unstable flow, little freedom to maneuver
  - (e) Level of service E - unstable flow, lower speed with some stops
  - (f) Level of service F - forced flow, low speed with many stops
  - (g) "Limited maintenance plan" is a maintenance plan that USEPA has determined meets USEPA's limited maintenance plan policy criteria for a given NAAQS and pollutant. To qualify for a limited maintenance plan, for example, an area must have a design value that is significantly below a given NAAQS, and it must be reasonable to expect that a NAAQS violation will not result from any level of future motor vehicle emissions growth.
- (34) "Local air agency" means an agency that has been delegated air pollution control responsibilities by the director of the Ohio EPA pursuant to Section 3704.03 of the Revised Code.
- (35) "Maintenance area" means any geographic region of the United States previously designated nonattainment pursuant to the CAA and subsequently redesignated to attainment subject to the requirement to develop a maintenance plan under Section 175 (a) of the CAA.
- (36) "Maintenance plan" means an implementation plan under Section 175(a) of the CAA..
- (37) "Memorandum of understanding" or "MOU" means an agreement among the agencies required to perform consultation under this chapter defining their respective responsibilities in air quality and transportation planning processes for each nonattainment area.
- (38) "Metropolitan planning organization" or "MPO" means that organization designated as being responsible, together with the state, for conducting the continuing, cooperative, and comprehensive transportation planning process under 23 USC 134 and 49 USC 5303 within the MPO boundary as recognized by the governor of Ohio. It is the forum for cooperative transportation decision-making.
- (39) "Milestone" has the meaning given in Sections 182(g)(1) and 189(c) of the CAA for serious and above ozone nonattainment areas and PM<sub>10</sub> nonattainment areas, respectively. For all other nonattainment areas, a milestone consists of an

emissions level and the date on which that level is to be achieved as required by the applicable CAA provision for reasonable further progress towards attainment.

- (40) "Motor vehicle emissions budget" means that portion of the total allowable emissions allocated by the applicable implementation plan to highway and transit vehicles. Such portion of the total allowable emissions is defined in a revision to the applicable implementation plan for a certain date for the purpose of meeting reasonable further progress milestones, or attainment or maintenance demonstrations, for any criteria pollutant or its precursors. Such portion can also be defined in an implementation plan revision which was endorsed by the governor or by the Ohio EPA, subject to a public hearing, and submitted to, but not yet approved by, the USEPA. The applicable implementation plan for an ozone nonattainment area may also designate a motor vehicle emissions budget for NO<sub>x</sub> for a reasonable further progress milestone year if the applicable implementation plan demonstrates that this NO<sub>x</sub> budget will be achieved with measures in the implementation plan (as an implementation plan shall do for VOC milestone requirements). The applicable implementation plan for an ozone nonattainment area includes a NO<sub>x</sub> budget if NO<sub>x</sub> reductions are being substituted for the reductions in VOC in milestone years which are required for reasonable further progress.
- (41) "National ambient air quality standards" or "NAAQS" means those standards established pursuant to section 109 of the CAA.
- (42) "NEPA" means the National Environmental Policy Act of 1969, contained in 42 USC 4321 to 4370(f).
- (43) "NEPA process completion", for the purposes of this chapter, with respect to FHWA or FTA, means the point at which there is a specific action to make a formal final determination that a project is categorically excluded, to make a finding of no significant impact, or to issue a record of decision on a final environmental impact statement under NEPA.
- (44) "NH<sub>3</sub>" means ammonia.
- (45) "Nonattainment area" means any geographic region of the United States which has been designated as nonattainment under Section 107 of the CAA for any pollutant for which a national ambient air quality standard exists.
- (46) "Not classified area" means any carbon monoxide nonattainment area which USEPA has not classified as either moderate or serious.
- (47) "NO<sub>x</sub>" means oxides of nitrogen.
- (48) "NO<sub>2</sub>" means nitrogen dioxide.

- (49) "Ohio DOT" means the Ohio department of transportation.
- (50) "Ohio EPA" means the Ohio environmental protection agency.
- (51) "PM<sub>10</sub>" means particulate matter with an aerodynamic diameter less than or equal to ten microns.
- (52) "PM<sub>2.5</sub>" mean particulate matter with an aerodynamic diameter less than or equal to a nominal 2.5 microns.
- (53) "Precursor for PM<sub>10</sub>" means transportation-related emissions of volatile organic compounds and oxides of nitrogen.
- (54) "Precursor for PM<sub>2.5</sub>" means transportation-related emissions of sulfur oxides, ammonia, volatile organic compounds and oxides of nitrogen
- (55) "Project" means a highway project or transit project.
- (56) "Protective finding" means a determination by USEPA that the control strategy contained in a submitted control strategy implementation plan revision would have been considered approvable with respect to requirements for emissions reductions if all committed measures had been submitted in enforceable form as required by Section 110(a)(2)(A) of the CAA.
- (57) "Recipient of funds designated under Title 23 of the United States Code or the Federal Transit Act" means any agency at any level of state, county, city or regional government that routinely receives Title 23 of the United States Code or Federal Transit Act funds to construct FHWA/FTA projects, operate FHWA/FTA projects or equipment, purchase equipment, or undertake other services or operations via contracts or agreements. This definition does not include private landowners or developers, or contractors or entities that are only paid for services or products created by their own employees.
- (58) "Regionally significant project" means a transportation project, other than an exempt project, that is on a facility which serves regional transportation needs (such as access to and from the area outside of the region, major activity centers in the region, major planned developments such as new retail malls, sports complexes, etc., or transportation terminals as well as most terminals themselves) and would normally be included in the modeling of a metropolitan area's transportation network which shall include, at a minimum:
  - (a) All principal arterial highways,
  - (b) All fixed guideway transit facilities that offer an alternative to regional highway travel,

- (c) Any project that Ohio EPA identifies as having the potential to affect air quality on a regional basis.
- (59) "Rural area" means an area external to all metropolitan planning organization boundaries recognized by the governor of Ohio.
- (60) "Safety margin" means the amount by which the total projected emissions from all sources of a given pollutant are less than the total emissions that would satisfy the applicable requirement for reasonable further progress, attainment, or maintenance.
- (61) "SO<sub>x</sub>" means sulfur oxides.
- (62) "Standard" means a national ambient air quality standard.
- (63) "State project" means any highway or transit project which is proposed to receive funding assistance or approval through any state or local transportation program.
- (64) "Statewide transportation improvement program" or "STIP" means a staged, multi-year, intermodal program of transportation projects covering the state, or the nonattainment area, attainment area, or maintenance area, which is consistent with the statewide transportation plan and metropolitan transportation plans, and developed pursuant to 23 CFR Part 450.
- (65) "Statewide transportation plan" means the official intermodal statewide transportation plan that is developed through the statewide planning process for the state, developed pursuant to 23 CFR Part 450.
- (66) "Submarginal area" means any ozone nonattainment area which USEPA has classified as submarginal in 40 CFR Part 81.
- (67) "TIP" means transportation improvement plan.
- (68) "Title 23 USC" means Title 23 of the United States Code.
- (69) "Transit" means mass transportation by bus, rail, or other conveyance which provides general or special service to the public on a regular and continuing basis. It does not include school buses or charter or sightseeing services.
- (70) "Transit project" means an undertaking to implement or modify a transit facility or transit-related program, purchase transit vehicles or equipment, or provide financial assistance for transit operations. It does not include actions that are solely within the jurisdiction of local transit agencies, such as changes in routes,

schedules, or fares. It may consist of several phases. For analytical purposes, it shall be defined inclusively enough to:

- (a) Connect logical termini and be of sufficient length to address environmental matters on a broad scope;
  - (b) Have independent utility or independent significance, i.e., be a reasonable expenditure even if no additional transportation improvements in the area are made; and
  - (c) Not restrict consideration of alternatives for other reasonably foreseeable transportation improvements.
- (71) "Transitional area" means any ozone nonattainment area which USEPA has classified as transitional in 40 CFR Part 81.
- (72) "Transportation control measure" or "TCM" means any measure that is specifically identified and committed to in the applicable implementation plan that is either one of the types listed in Section 08 of the CAA , or any other measure for the purpose of reducing emissions or concentrations of air pollutants from transportation sources by reducing vehicle use or changing traffic flow or congestion conditions. Notwithstanding the above, vehicle technology-based, fuel-based, and maintenance-based measures which control the emissions from vehicles under fixed traffic conditions are not TCMs for the purpose of this chapter.
- (73) "Transportation improvement program" or "TIP" means a staged, multi-year, intermodal program of transportation projects covering a metropolitan planning area which is consistent with the metropolitan transportation plan, and developed pursuant to 23 CFR Part 450.
- (74) "Transportation plan" means the official intermodal metropolitan transportation plan that is developed through the metropolitan planning process for the metropolitan planning area, developed pursuant to 23 CFR Part 450.
- (75) "Transportation project" means a highway project or a transit project.
- (76) "USDOT" means the United States department of transportation.
- (77) "USEPA" means the United States environmental protection agency.
- (78) "VMT" means total miles traveled by all vehicles on a given roadway.
- (79) "VOC" means volatile organic compound as defined in paragraph (B)(6) of rule 3745-21-01 of the Administrative Code.

(80) "Written commitment" for the purposes of this chapter means a written commitment that includes a description of the action to be taken; a schedule for the completion of the action; a demonstration that funding necessary to implement the action has been authorized by the appropriating or authorizing body; and an acknowledgment that the commitment is an enforceable obligation under the applicable implementation plan.

(C) Incorporation by reference. This chapter includes references to certain matter or materials. The text of the incorporated materials is not included in the regulations contained in this chapter. The materials are hereby made a part of the regulations in this chapter. For materials subject to change, only the specific version specified in the regulation are incorporated. Material is incorporated as it exists on the effective date of this rule. Except for subsequent annual publication of existing (unmodified) Code of Federal Regulation compilations, any amendment or revision to a referenced document is not incorporated unless and until this rule has been amended to specify the new dates.

(1) Availability. The materials incorporated by reference are available as follows:

- (a) Clean Air Act. Information and copies may be obtained by writing to: "Superintendent of Documents, Attn: New Orders, PO Box 371954, Pittsburgh, PA 15250-7954." The full text of the Act as amended in 1990 is also available in electronic format at [www.epa.gov/oar/caa/](http://www.epa.gov/oar/caa/). A copy of the Act is also available for inspection and copying at most public libraries and "The State Library of Ohio."
- (b) Code of Federal Regulations. Information and copies may be obtained by writing to: "Superintendent of Documents, Attention: New Orders, PO Box 371954, Pittsburgh, PA 15250-7954." The full text of the CFR is also available in electronic format at [www.access.gpo.gov/nara/cfr/](http://www.access.gpo.gov/nara/cfr/). The CFR compilations are also available for inspection and copying at most public libraries and "The State Library of Ohio."
- (c) Comprehensive Environmental Response, Compensation, and Liability Act. Information and copies may be obtained by writing to: "Superintendent of Documents, Attn: New Orders, PO Box 371954, Pittsburgh, PA 15250-7954." The full text of the Act as amended in 1980 is also available in electronic format at <http://www4.law.cornell.edu/uscode/>. A copy of the Act is also available for inspection and copying at most public libraries and "The State Library of Ohio."
- (d) Federal Transit Act. Information and copies may be obtained by writing to: "Superintendent of Documents, Attn: New Orders, PO Box 371954, Pittsburgh, PA 15250-7954." The full text of the Act as amended in 1998 is also available in electronic format at <http://www4.law.cornell.edu/uscode/>.

A copy of the Act is also available for inspection and copying at most public libraries and "The State Library of Ohio."

- (e) National Environmental Policy Act. Information and copies may be obtained by writing to: "Superintendent of Documents, Attn: New Orders, PO Box 371954, Pittsburgh, PA 15250-7954." A copy of the Act is also available for inspection and copying at most public libraries and "The State Library of Ohio."
- (f) United States Code. Information and copies may be obtained by writing to: "Superintendent of Documents, Attn: New Orders, PO Box 371954, Pittsburgh, PA 15250-7954." The full text of the United States Code is also available in electronic format at <http://www4.law.cornell.edu/uscode/>. The USC compilations are also available for inspection and copying at most public libraries and "The State Library of Ohio."

3745-101-03      **Applicability, priority, and frequency of conformity determinations.**

[Comment: For dates of non-regulatory government publications, publications of recognized organizations and associations, federal rules, and federal statutory provisions referenced in this rule, see the last paragraph of rule 3745-101-02 of the Administrative Code titled "Incorporation by reference."]

- (A) Except as provided for in paragraph (F) of this rule or in 40 CFR 93.126, conformity determinations are required for:
- (1) The adoption, acceptance, approval or support of transportation plans and transportation plan amendments developed pursuant to 23 CFR Part 450 or 49 CFR Part 613 by an MPO or Ohio DOT;
  - (2) The adoption, acceptance, approval or support of TIPs and TIP amendments or the STIP developed pursuant to 23 CFR Part 450 or 49 CFR Part 613 by an MPO or Ohio DOT; and
  - (3) The approval, funding, or implementation of FHWA/FTA projects.
- (B) Conformity determinations are not required under this chapter for individual projects which are not FHWA/FTA projects. However, 40 CFR 93.121 applies to such projects if they are regionally significant.
- (C) The provisions of this chapter shall apply in all nonattainment and maintenance areas for transportation-related criteria pollutants for which the area is designated nonattainment or has a maintenance plan.
- (1) The provisions of this chapter apply with respect to emissions of the following criteria pollutants: ozone, CO, NO<sub>2</sub>, PM<sub>10</sub> and PM<sub>2.5</sub>.
  - (2) The provisions of this chapter also apply with respect to emissions of the following precursor pollutants:
    - (a) VOC and NO<sub>x</sub> in ozone areas;
    - (b) NO<sub>x</sub> in NO<sub>2</sub> areas;
    - (c) VOC and/or NO<sub>x</sub> in PM<sub>10</sub> areas if the USEPA regional administrator or the director has made a finding that transportation-related precursor emissions of one or both of these precursors within the nonattainment area are a significant contributor to the PM<sub>10</sub> nonattainment problem and has so notified the MPO and Ohio DOT, or if the applicable implementation plan, or implementation plan submission, establishes an approved or adequate

budget for such emissions as part of the reasonable further progress, attainment or maintenance strategy;

- (d)  $\text{NO}_x$  in  $\text{PM}_{2.5}$  areas, unless both the USEPA regional administrator and the director have made a finding that transportation-related emissions of  $\text{NO}_x$  within the nonattainment area are not a significant contributor to the  $\text{PM}_{2.5}$  nonattainment problem and has so notified the MPO and Ohio DOT, or the applicable implementation plan, or implementation plan submission does not establish an approved or adequate budget for such emissions as part of the reasonable further progress, attainment or maintenance strategy; and
  - (e) VOC,  $\text{SO}_x$  and/or  $\text{NH}_3$  in  $\text{PM}_{2.5}$  areas if either the USEPA regional administrator or the director has made a finding that transportation-related emissions of any of these precursors within the nonattainment area are a significant contributor to the  $\text{PM}_{2.5}$  nonattainment problem and has so notified the MPO and Ohio DOT, or if the applicable implementation plan, or implementation plan submission establishes an approved or adequate budget for such emissions as part of the reasonable further progress, attainment or maintenance strategy.
- (D) The provisions of this chapter apply to  $\text{PM}_{2.5}$  nonattainment and maintenance areas with respect to  $\text{PM}_{2.5}$  from re-entrained road dust if the USEPA regional administrator or the director has made a finding that re-entrained road dust emissions within the area are a significant contributor to the  $\text{PM}_{2.5}$  nonattainment problem and has so notified the MPO and Ohio DOT, or if the applicable implementation plan, or implementation plan submission includes re-entrained road dust in the approved or adequate budget as part of the reasonable further progress, attainment or maintenance strategy. Re-entrained road dust emissions are produced by travel on paved and unpaved roads including emissions from anti-skid and deicing materials.
- (E) The provisions of this chapter apply to maintenance areas for twenty years from the date USEPA approves the area's request under Section 107 (d) of the CAA for redesignation to attainment, unless the applicable implementation plan specifies that the provisions of this chapter shall apply for more than twenty years.
- (F) The following limitations shall apply to conformity determinations:
- (1) Projects subject to this chapter for which the NEPA process and a conformity determination have been completed by FHWA or FTA may proceed toward implementation without further conformity determinations if one of the following major steps has occurred within the most recent four year period: NEPA process completion; start of final design; acquisition of a significant portion of the right-of-way; or approval of the plans, specifications and estimates. All phases of such projects which were considered in the conformity determination are also included, if those phases were for the purpose of funding,

final design, right-of-way acquisition, construction, or any combination of these phases.

- (2) A new conformity determination for the project will be required if there is a significant change in project design concept and scope, if a supplemental environmental document for air quality purposes is initiated, or if no major steps to advance the project have occurred within the most recent four year period.
- (G) Grace period for new nonattainment areas. For areas or portions of areas which have been continuously designated attainment or not designated for any NAAQS for ozone, CO, PM<sub>10</sub>, PM<sub>2.5</sub> or NO<sub>2</sub> since 1990 and are subsequently redesignated to nonattainment or designated nonattainment for any NAAQS for any of these pollutants, the provisions of this chapter shall not apply with respect to that NAAQS for twelve months following the effective date of final designation to nonattainment of each NAAQS for such pollutant.
- (H) When assisting or approving any action with air quality-related consequences, FHWA and FTA shall give priority to the implementation of those transportation portions of an applicable implementation plan prepared to attain and maintain the NAAQS. This priority shall be consistent with statutory requirements for allocation of funds among states or other jurisdictions.
- (I) Conformity determinations and conformity redeterminations for transportation plans, TIPs, and FHWA/FTA projects shall be made according to the requirements of this rule and the applicable implementation plan.
- (J) Each new transportation plan shall be found to conform, before the transportation plan is approved by the MPO or accepted by USDOT.
- (1) All transportation plan revisions shall be found to conform before the transportation plan revisions are approved by MPO or accepted by USDOT, unless the revision merely adds or deletes exempt projects listed in 40 CFR 93.126 or 40 CFR 93.127 and has been made in accordance with the notification provisions of paragraph (C)(1)(f) of rule 3745-101-04 of the Administrative Code. The conformity determination shall be based on the transportation plan and the revision taken as a whole.
  - (2) In any case, conformity determinations shall be made no less frequently than every four years, or the existing conformity determination will lapse.
- (K)
- (1) A new TIP shall be demonstrated to conform, before the TIP is approved by the MPO and approved by the governor or his designee or accepted by USDOT.

- (2) A TIP amendment requires a new conformity determination for the entire TIP before the amendment is approved by the MPO and approved by the governor or his designee or accepted by USDOT, unless the amendment merely adds or deletes exempt projects listed in 40 CFR 93.126 or 40 CFR 93.127 and has been made in accordance with the notification provisions of paragraph (C)(1)(f) of rule 3745-101-04 of the Administrative Code.
  - (3) After an MPO adopts a new or revised transportation plan, conformity of the TIP shall be redetermined by the MPO and USDOT within six months, unless the new or revised plan merely adds or deletes exempt projects listed in 40 CFR 93.126 or 40 CFR 93.127 and has been made in accordance with the notification provisions of paragraph (C)(1)(f) of rule 3745-101-04 of the Administrative Code. Otherwise, the existing conformity determination for the TIP will lapse.
  - (4) In any case, conformity determinations shall be made no less frequently than every four years or the existing conformity determination will lapse.
- (L) FHWA/FTA projects shall be found to conform by the FHWA and FTA before they are adopted, accepted, approved, or funded. Conformity shall be redetermined for any FHWA/FTA project if one of the following occurs: a significant change in the project's design concept and scope; three years elapse since the most recent major step to advance the project; or initiation of a supplemental environmental document for air quality purposes. Major steps include: NEPA process completion; start of final design; acquisition of a significant portion of the right-of-way; and, construction including federal approval of the plans, specifications and estimates.

3745-101-04      **Consultation.**

[Comment: For dates of non-regulatory government publications, publications of recognized organizations and associations, federal rules, and federal statutory provisions referenced in this rule, see the last paragraph of rule 3745-101-02 of the Administrative Code titled "Incorporation by reference."]

(A) This rule provides procedures for federal, state and local interagency consultation, and resolution of conflicts, and public consultation. Public consultation procedures will be developed in accordance with the requirements for public involvement in 23 CFR Part 450.

(1) Such consultation procedures shall be undertaken by MPOs, Ohio DOT, and USDOT with Ohio EPA and local air agencies and USEPA before making conformity determinations, and by Ohio EPA and local air agencies and USEPA with MPOs, the Ohio DOT, and USDOT in developing applicable implementation plans.

(2) Before this chapter is approved by USEPA, MPOs before making any conformity determinations shall provide reasonable opportunity for consultation with Ohio EPA, local air and transportation agencies, Ohio DOT, USDOT, and USEPA, including consultation on the issues described in paragraph (C)(1) of this rule.

(B) Interagency consultation procedures: general factors.

(1) Representatives of the MPOs, Ohio EPA, local air agencies, and Ohio DOT and local transportation agencies shall undertake an interagency consultation process in accordance with this rule with each other and with local or regional offices of USEPA, FHWA, and FTA on the development of the implementation plan, of the list of TCMs in the applicable implementation plan, of the transportation plan, of the TIP, of the STIP and of the statewide transportation plan, of any revisions to the preceding documents, and of all conformity determinations required by this chapter.

(2)

(a) Ohio EPA shall be the lead agency responsible for preparing the final document or decision and for assuring the adequacy of the interagency consultation process with respect to the development of applicable implementation plans and control strategy implementation plan revisions and the list of TCMs in the applicable implementation plan.

(b) The respective MPO shall be the lead agency responsible for preparing the final document or decision and for assuring the adequacy of the interagency consultation process with respect to the development of the transportation

plan, the TIP, and any amendments or revisions thereto. The respective MPO shall be the lead agency responsible for preparing the final document or decision and for assuring the adequacy of the interagency consultation process with respect to any determinations of conformity under this rule for which the MPO is responsible.

- (c) In the case of non-metropolitan areas, Ohio DOT shall be the lead agency responsible for preparing the final document or decision and for assuring the adequacy of the interagency consultation process with respect to the development of the statewide transportation plan, the STIP, and any amendments or revisions thereto.
- (3) In addition to the lead agencies identified in paragraphs (B)(2)(a) and (B)(2)(b) of this rule, other agencies entitled to participate in any interagency consultation process under this rule include Ohio DOT (headquarters and each affected regional or district office), each affected MPO, the FHWA regional office and state division, the FTA regional office, Ohio EPA, and local air agencies, and in interstate nonattainment areas and interstate maintenance areas the state and local transportation agencies and state and local air quality agencies from the states in the interstate nonattainment area and interstate maintenance area.
- (4)
- (a) It shall be the role and responsibility of each lead agency in an interagency consultation process, as specified in paragraphs (B)(2)(a) and (B)(2)(b) of this rule, to confer with all other agencies identified under paragraph (B)(3) of this rule with an interest in the document to be developed; provide all appropriate information to those agencies needed for meaningful input; solicit early and continuing input from those agencies; conduct the consultation process described in the applicable portions of paragraph (B) of this rule, where required; assure policy-level contact with those agencies; consider the views of each such agency and respond to those views in a timely, substantive written manner prior to any final decision on such document; and assure that such views and written response are made part of the record of any decision or action.
  - (b) It shall be the role and responsibility of each agency specified in paragraph (B)(3) of this rule, when not fulfilling the role and responsibilities of a lead agency, to confer with the lead agency and other participants in the consultation process; review and comment as appropriate (including comments in writing) on all proposed and final documents and decisions in a timely manner; attend consultation and decision meetings; assure policy-level contact with other participants; provide input on any area of substantive expertise or responsibility, including planning assumptions, modeling, information on status of TCM implementation, and interpretation of regulatory or other requirements; and provide technical assistance to the

lead agency or consultation process in accordance with this paragraph when requested.

- (5) Specific roles and responsibilities of various participants in the interagency consultation process shall be as follows:
  - (a) Ohio EPA, unless another agency is identified via a MOU or contract with Ohio EPA, shall be responsible for developing:
    - (i) Emissions inventories,
    - (ii) Emissions budgets,
    - (iii) Air quality modeling,
    - (iv) Attainment demonstrations,
    - (v) Control strategy implementation plan revisions,
    - (vi) Regulatory TCMs, and
    - (vii) Updated motor vehicle emissions factors.
  - (b) The respective MPO shall be responsible for:
    - (i) Developing transportation plans and TIPs,
    - (ii) Evaluating TCM transportation impacts,
    - (iii) Developing transportation and socioeconomic data and planning assumptions for use in air quality analysis to determine conformity of transportation plans, TIPs, and projects, and providing such data and planning assumptions to other agencies for air quality analysis,
    - (iv) Monitoring regionally significant projects,
    - (v) Developing system- or facility-based or other programmatic (non-regulatory) TCMs,
    - (vi) Providing technical and policy input on emissions budgets,
    - (vii) Performing transportation modeling, regional emissions analyses and documentation of timely implementation of TCMs needed for conformity assessments, or providing Ohio DOT with the data for this purpose,

(viii) And making conformity determinations on transportation plans, TIPs, and projects.

(c) The Ohio DOT shall be responsible for:

- (i) Developing the statewide transportation plan and STIP,
- (ii) Performing transportation modeling for MPOs as agreed to by the MPO,
- (iii) Providing technical input on proposed revisions to motor vehicle emissions factors,
- (iv) Distributing draft and final project environmental documents to other agencies,
- (v) Convening air quality technical review meetings on specific projects when requested by other agencies or as needed,
- (vi) And coordinating the conformity process and making conformity determinations for rural nonattainment areas.

(d) FHWA and FTA shall be responsible for:

- (i) Assuring timely action on final findings of conformity, after consultation with other agencies as provided in this rule and 40 CFR section 51.402,
- (ii) Providing guidance on conformity and the transportation planning process to agencies in interagency consultation.

(e) USEPA shall be responsible for:

- (i) Reviewing and approving updated motor vehicle emissions factors,
- (ii) Providing guidance on conformity criteria and procedures to agencies in interagency consultation,
- (iii) Reviewing conformity findings.

(6) It shall be the affirmative responsibility of the lead agency to initiate the process by preparing an initial draft of the document, together with necessary supporting information; notifying other potential participants in the consultation process; circulating the draft document to those expressing an interest in participating; and convening consultation meetings early in the process of decision on the final document. Such lead agency shall convene technical meetings as necessary, and assure that all relevant documents and information are supplied to all participants in the consultation process in a timely manner.

- (a) Regular consultation on major activities such as the development of an implementation plan or any control strategy implementation plan revision, the development of a transportation plan, the development of a TIP, or any determination of conformity on transportation plans or TIPs, shall include meetings beginning no later than three months prior to the date a final document is required (or the date on which such agency begins its own work on such document, if later). Representatives at the policy level of each agency shall receive adequate notice of such meetings. In addition, technical meetings shall be convened as necessary.
  - (b) Each lead agency with the responsibility for preparing the final document subject to the interagency consultation process shall confer with all other agencies identified under paragraphs (B)(1) to (B)(5) of this rule with an interest in the document to be developed, provide all appropriate information to those agencies needed for meaningful input, and, prior to taking any action, consider the views of each such agency and respond to those views in a timely, substantive written manner prior to any final decision on such document. Such views and written response shall be made part of the record of any decision or action.
- (7) Within sixty days of adopting or approving a document or making a determination, each lead agency subject to an interagency consultation process under this rule, including any federal agency, shall provide each final document that is the product of such consultation process, including applicable implementation plans or implementation plan revisions, transportation plans, TIPs, and determinations of conformity, together with all supporting information, to each other agency that has participated in the consultation process. Any such agency may supply a checklist of available supporting information, which such other participating agencies may use to request all or part of such supporting information, in lieu of generally distributing all supporting information.
- (8) A meeting that is scheduled or required for another purpose may be used for the purposes of consultation if the conformity consultation purpose is identified in the public notice for the meeting.

(C) Interagency consultation procedures: specific processes.

- (1) An interagency consultation process in accordance with paragraph (B) of this rule involving the MPO, Ohio EPA and local air agencies, Ohio DOT and local transportation agencies, USEPA, and USDOT shall be undertaken for the following:
  - (a) Evaluating and choosing each model, or models, and associated methods and assumptions to be used in hot-spot analyses and regional emissions

analyses, including VMT forecasting, to be initiated by the lead agency and conducted in accordance with paragraph (B)(6) of this rule;

- (b) Determining which minor arterials and other transportation projects, in addition to those functionally classified as principal arterial or higher or fixed guideway systems or extensions that offer an alternative to regional highway travel, should be considered "regionally significant" for the purposes of regional emissions analysis, and which projects should be considered to have a significant change in design concept and scope from the transportation plan or TIP. This consultation process is to be initiated by the lead agency and conducted in accordance with paragraph (B)(6) of this rule;
- (c) Evaluating whether projects otherwise exempted from meeting the requirements of this chapter, according to 40 CFR 93.126 and 40 CFR 93.127, should be treated as non-exempt in cases where potential adverse emissions impacts may exist for any reason. This consultation process is to be initiated by the lead agency and conducted in accordance with paragraph (B)(6) of this rule;
- (d) Making a determination, as required by 40 CFR 93.113(c)(1), whether past obstacles to implementation of TCMs which are behind the schedule established in the applicable implementation plan have been identified and are being overcome, and whether state and local agencies with influence over approvals or funding for TCMs are giving maximum priority to approval or funding for TCMs. This consultation process is to be initiated by the lead agency and conducted in accordance with paragraph (B)(6) of this rule. This consultation process shall also consider whether delays in TCM implementation necessitate revisions to the applicable implementation plan to remove TCMs or substitute TCMs or other emission reduction measures;
- (e) Identifying, as required by 40 CFR 93.123(b), projects located at sites in PM<sub>10</sub> nonattainment areas with vehicle and roadway emission and dispersion characteristics which are essentially identical to those at sites with violations verified by monitoring, and which therefore require quantitative PM<sub>10</sub> hot-spot analysis. This consultation process is to be initiated by the lead agency and conducted in accordance with paragraph (B)(6) of this rule;
- (f) Receiving notification of transportation plan or TIP revisions or amendments which merely add or delete exempt projects listed in 40 CFR 93.126 or 40 CFR 93.127, to be initiated by the lead agency and conducted in accordance with paragraph (B)(6) of this rule, other than the requirement that such notice be provided prior to final action;

- (g) Choosing conformity tests and methodologies for isolated rural nonattainment and maintenance areas, as required by 40 CFR 93.109(l)(2)(iii).
- (2) An interagency consultation process in accordance with paragraph (B) of this rule involving the MPO, Ohio EPA and local air agencies, Ohio DOT and local transportation agencies, shall be undertaken for the following:
    - (a) Evaluating events which will trigger new conformity determinations in addition to those triggering events established in 40 CFR 93.104. This consultation process is to be initiated by the lead agency and conducted in accordance with paragraph (B)(6) of this rule; and
    - (b) Consulting on emissions analysis for transportation activities which cross the borders of MPOs or nonattainment areas or air basins. This consultation process is to be initiated by the lead agency and conducted in accordance with paragraph (B)(6) of this rule.
  - (3) Where the metropolitan planning area does not include the entire nonattainment or maintenance area, an interagency consultation process in accordance with paragraph (B) of this rule involving the MPOs and Ohio DOT shall be undertaken for cooperative planning and analysis for purposes of determining conformity of all projects outside the metropolitan area and within the nonattainment or maintenance area. This consultation process is to be initiated by the lead agency and conducted in accordance with paragraph (B)(6) of this rule.
  - (4) A process involving all entities pursuing non-federally funded regionally significant projects (including local transportation agencies) to ensure that plans for construction of regionally significant projects which are not FHWA/FTA projects (including projects for which alternative locations, design concept and scope, or the no-build option are still being considered), including those by recipients of funds designated under Title 23 USC or the federal transit laws, are disclosed to the MPO on a regular basis, and to ensure that any changes to those plans are immediately disclosed.
  - (5) An interagency consultation process, in accordance with paragraph (B) of this rule, involving the MPO and other recipients of funds designated under Title 23 USC or the Federal Transit Act shall be undertaken for assuming the location and design concept and scope of projects which are disclosed to the MPO, as required by paragraph (C)(4) of this rule, but whose sponsors have not yet decided these features, in sufficient detail to perform the regional emissions analysis according to the requirements of 40 CFR 93.122. This consultation process is to be initiated by the lead agency and conducted in accordance with paragraph (B)(6) of this rule.

- (6) An interagency consultation process, in accordance with paragraph (B) of this rule, involving the MPO, Ohio EPA and local air agencies, Ohio DOT and local transportation agencies, shall be undertaken for the design, schedule, and funding of research and data collection efforts and regional transportation model development by the MPO (e.g., household/travel transportation surveys). This consultation process is to be initiated by the lead agency and conducted in accordance with paragraph (B)(6) of this rule.
- (7) A process for providing final documents (including applicable implementation plans and implementation plan revisions) and supporting information to each agency after approval or adoption. This process is applicable to all agencies described in paragraph (A)(1) of this rule, including federal agencies.

(D) Resolving conflicts.

- (1) Any conflict concerning conformity process among state agencies or between state agencies and an MPO shall be submitted for resolution to the governor if the conflict cannot be resolved by the heads of the involved agencies. Before submittal to the governor, such agencies shall make every effort to resolve any differences, including personal meetings between the heads of such agencies or their policy-level representatives, to the extent possible.
- (2) Ohio EPA has fourteen calendar days to appeal a proposed determination of conformity, or other policy decision under this chapter, to the governor after Ohio DOT or MPO has notified Ohio EPA of the resolution of all comments on such proposed determination of conformity or policy decision.
  - (a) Such fourteen day period shall commence when the MPO or Ohio DOT has confirmed receipt by the director of Ohio EPA of the resolution of the comments of Ohio EPA. If Ohio EPA appeals to the governor, the final conformity determination shall have the concurrence of the governor. Ohio EPA shall provide notice of any appeal under this paragraph to the MPO and Ohio DOT. If Ohio EPA does not appeal to the governor within fourteen days, the MPO or Ohio DOT may proceed with the final conformity determination.
  - (b) In the case of any comments with regard to findings of fiscal constraint under 40 CFR 93.108 or to the air quality effects of any proposed determination of conformity, Ohio DOT has fourteen calendar days to appeal a proposed determination of conformity, or other policy decision under this chapter, to the governor after the MPO has notified Ohio EPA or Ohio DOT of the resolution of all comments on such proposed determination of conformity or policy decision. Such fourteen day period shall commence when the MPO has confirmed receipt by the director of the Ohio EPA or Ohio DOT of the resolution of the comments of Ohio DOT. If Ohio DOT appeals to the governor, the final conformity determination

shall have the concurrence of the governor. Ohio DOT shall provide notice of any appeal under paragraph (D) of this rule to the MPO and Ohio EPA. If Ohio DOT does not appeal to the governor within fourteen days, the MPO may proceed with the final conformity determination.

- (3) The governor may delegate the role of hearing any such appeal under paragraph (D) of this rule and of deciding whether to concur in the conformity determination to another official or agency within the state, but not to the head or staff of Ohio EPA or to any local air agency, to Ohio DOT, to a state transportation commission or board, to any agency that has responsibility for only one of these functions, or to an MPO.

(E) Public consultation procedures.

- (1) Affected agencies making conformity determinations on transportation plans, programs, and projects shall establish and continuously implement a proactive public involvement process which provides opportunity for public review and comment and by, at a minimum, providing reasonable public access to technical and policy information considered by the agency at the beginning of the public comment period and prior to taking formal action on a conformity determination for all transportation plans and TIPs, consistent with the requirements of 23 CFR Part 450, including 23 CFR 450.316(b), 23 CFR 450.322(c), and 23 CFR 450.324(c) as in effect on the effective date of this chapter. Any charges imposed for public inspection and copying should be no more stringent than with the fee schedule contained in 49 CFR 7.43.
- (2) In addition, any such agency shall specifically address in writing all public comments that known plans for a regionally significant project which is not receiving FHWA or FTA funding or approval have not been properly reflected in the emissions analysis supporting a proposed conformity finding for a transportation plan or TIP.
- (3) Any such agency shall also provide opportunity for public involvement in conformity determinations for projects to the extent otherwise required by law, e.g. NEPA. The opportunity for public involvement provided under this paragraph shall include access to information, emissions data, analyses, models and modeling assumptions used to perform a conformity determination, and the obligation of any such agency to consider and respond to significant comments. No transportation plan, TIP, or project may be found to conform unless the conformity determination has been subject to a public involvement process in accordance with this paragraph, without regard to whether the USDOT has certified any process under 23 CFR Part 450.

**Procedures for determining regional transportation-related emissions.**

[Comment: For dates of non-regulatory government publications, publications of recognized organizations and associations, federal rules, and federal statutory provisions referenced in this rule, see the last paragraph of rule 3745-101-02 of the Administrative Code titled "Incorporation by reference."]

**(A) General requirements.**

- (1) The regional emissions analysis required by 40 CFR 93.118 and 40 CFR 93.119 for the transportation plan, TIP, or project not from a conforming plan and TIP must include all regionally significant projects expected in the nonattainment or maintenance area. The analysis must include FHWA/FTA projects proposed in the transportation plan and TIP and all other regionally significant projects which are disclosed to the MPO as required by 40 CFR 93.105. Projects which are not regionally significant are not required to be explicitly modeled, but vehicle miles traveled (VMT) from such projects must be estimated in accordance with reasonable professional practice. The effects of TCMs and similar projects that are not regionally significant may also be estimated in accordance with reasonable professional practice.
- (2) The emissions analysis may not include for emissions reduction credit any TCMs or other measures in the applicable implementation plan which have been delayed beyond the scheduled date(s) until such time as their implementation has been assured. If the measure has been partially implemented and it can be demonstrated that it is providing quantifiable emission reduction benefits, the emissions analysis may include that emissions reduction credit.
- (3) Emissions reduction credit from projects, programs, or activities which require a regulatory action in order to be implemented may not be included in the emissions analysis unless:
  - (a) The regulatory action is already adopted by the enforcing jurisdiction;
  - (b) The project, program, or activity is included in the applicable implementation plan;
  - (c) The control strategy implementation plan submission or maintenance plan submission that establishes the motor vehicle emissions budget(s) for the purposes of 40 CFR 93.118 contains a written commitment to the project, program, or activity by the agency with authority to implement it; or
  - (d) USEPA has approved an opt-in to a federally enforced program, USEPA has promulgated the program (if the control program is a federal responsibility,

such as vehicle tailpipe standards), or the CAA requires the program without need for individual state action and without any discretionary authority for USEPA to set its stringency, delay its effective date, or not implement the program.

- (4) Emissions reduction credit from control measures that are not included in the transportation plan and TIP and that do not require a regulatory action in order to be implemented may not be included in the emissions analysis unless the conformity determination includes written commitments to implementation from the appropriate entities.
    - (a) Persons or entities voluntarily committing to control measures must comply with the obligations of such commitments.
    - (b) The conformity implementation plan revision required in 40 CFR 51.390 must provide that written commitments to control measures that are not included in the transportation plan and TIP must be obtained prior to a conformity determination and that such commitments must be fulfilled.
  - (5) A regional emissions analysis for the purpose of satisfying the requirements of 40 CFR 93.119 must make the same assumptions in both the "baseline" and "action" scenarios regarding control measures that are external to the transportation system itself, such as vehicle tailpipe or evaporative emission standards, limits on gasoline volatility, vehicle inspection and maintenance programs, and oxygenated or reformulated gasoline or diesel fuel.
  - (6) The ambient temperatures used for the regional emissions analysis must be consistent with those used to establish the emissions budget in the applicable implementation plan. All other factors, for example the fraction of travel in a hot stabilized engine mode, must be consistent with the applicable implementation plan, unless modified after interagency consultation according to 40 CFR 93.105(C)(1)(i) to incorporate additional or more geographically specific information or represent a logically estimated trend in such factors beyond the period considered in the applicable implementation plan.
  - (7) Reasonable methods must be used to estimate nonattainment or maintenance area VMT on off-network roadways within the urban transportation planning area, and on roadways outside the urban transportation planning area.
- (B) Regional emissions analysis in serious, severe, and extreme ozone nonattainment areas and serious CO nonattainment areas must meet the requirements of paragraphs (B)(1) to (B)(3) of this rule if their metropolitan planning area contains an urbanized area population over two hundred thousand.
- (1) Estimates of regional transportation-related emissions used to support conformity determinations must be made at a minimum using network-based travel models

according to procedures and methods that are available and in practice and supported by current and available documentation. These procedures, methods, and practices are available from DOT and will be updated periodically.

Agencies must discuss these modeling procedures and practices through the interagency consultation process, as required by 40 CFR 93.105. Network-based travel models must at a minimum satisfy the following requirements:

- (a) Network-based travel models must be validated against observed counts (peak and off-peak, if possible) for a base year that is not more than ten years prior to the date of the conformity determination. Model forecasts must be analyzed for reasonableness and compared to historical trends and other factors, and the results must be documented;
  - (b) Land use, population, employment, and other network-based travel model assumptions must be documented and based on the best available information;
  - (c) Scenarios of land development and use must be consistent with the future transportation system alternatives for which emissions are being estimated. The distribution of employment and residences for different transportation options must be reasonable;
  - (d) A capacity-sensitive assignment methodology must be used, and emissions estimates must be based on a methodology which differentiates between peak and off-peak link volumes and speeds and uses speeds based on final assigned volumes;
  - (e) Zone-to-zone travel impedances used to distribute trips between origin and destination pairs must be in reasonable agreement with the travel times that are estimated from final assigned traffic volumes. Where use of transit currently is anticipated to be a significant factor in satisfying transportation demand, these times should also be used for modeling mode splits; and
  - (f) Network-based travel models must be reasonably sensitive to changes in the time(s), cost(s), and other factors affecting travel choices.
- (2) Reasonable methods in accordance with good practice must be used to estimate traffic speeds and delays in a manner that is sensitive to the estimated volume of travel on each roadway segment represented in the network-based travel model.
  - (3) Highway performance monitoring system (HPMS) estimates of vehicle miles traveled (VMT) must be considered the primary measure of VMT within the portion of the nonattainment or maintenance area and for the functional classes of roadways included in HPMS, for urban areas which are sampled on a separate urban area basis. For areas with network-based travel models, a factor (or

factors) may be developed to reconcile and calibrate the network-based travel model estimates of VMT in the base year of its validation to the HPMS estimates for the same period. These factors may then be applied to model estimates of future VMT. In this factoring process, consideration will be given to differences between HPMS and network-based travel models, such as differences in the facility coverage of the HPMS and the modeled network description. Locally developed count-based programs and other departures from these procedures are permitted subject to the interagency consultation procedures of 40 CFR 93.105(c)(1)(i).

- (C) Two-year grace period for regional emissions analysis requirements in certain ozone and CO areas. The requirements of paragraph (B) of this rule apply to such areas or portions of such areas that have not previously been required to meet these requirements for any existing NAAQS two years from the following:
  - (1) The effective date of USEPA's reclassification of an ozone or CO nonattainment area that has an urbanized area population greater than two hundred thousand to serious or above;
  - (2) The official notice by the United States census bureau that determines the urbanized area population of a serious or above ozone or CO nonattainment area to be greater than two hundred thousand; or
  - (3) The effective date of USEPA's action that classifies newly designated ozone or CO nonattainment area population greater than two hundred thousand as serious or above.
- (D) In all areas not otherwise subject to paragraph (B) of this rule, regional emissions analyses must use those procedures described in paragraph (B) of this rule if the use of those procedures has been the previous practice of the MPO. Otherwise, areas not subject to paragraph (B) of this rule may estimate regional emissions using any appropriate methods that account for VMT growth by, for example, extrapolating historical VMT or projecting future VMT by considering growth in population and historical growth trends for VMT per person. These methods must also consider future economic activity, transit alternatives, and transportation system policies.
- (E) PM<sub>10</sub> from construction-related fugitive dust.
  - (1) For areas in which the implementation plan does not identify construction-related fugitive PM<sub>10</sub> as a contributor to the nonattainment problem, the fugitive PM<sub>10</sub> emissions associated with highway and transit project construction are not required to be considered in the regional emissions analysis.
  - (2) In PM<sub>10</sub> nonattainment and maintenance areas with implementation plans which identify construction-related fugitive PM<sub>10</sub> as a contributor to the nonattainment problem, the regional PM<sub>10</sub> emissions analysis must consider construction-

related fugitive PM<sub>10</sub> and must account for the level of construction activity, the fugitive PM<sub>10</sub> control measures in the applicable implementation plan, and the dust-producing capacity of the proposed activities.

(F) PM<sub>2.5</sub> from construction-related fugitive dust.

- (1) For PM<sub>2.5</sub> areas in which the implementation plan does not identify construction-related fugitive PM<sub>2.5</sub> as a significant contributor to the nonattainment problem, the fugitive PM<sub>2.5</sub> emissions associated with highway and transit project construction are not required to be considered in the regional emissions analysis.
- (2) In PM<sub>2.5</sub> nonattainment and maintenance areas with implementation plans which identify construction-related fugitive PM<sub>2.5</sub> as a significant contributor to the nonattainment problem, the regional PM<sub>2.5</sub> emissions analysis shall consider construction-related fugitive PM<sub>2.5</sub> and shall account for the level of construction activity, the fugitive PM<sub>2.5</sub> control measures in the applicable implementation plan, and the dust-producing capacity of the proposed activities.

(G) Reliance on previous regional emissions analysis.

- (1) Conformity determinations for a new transportation plan and/or TIP may be demonstrated to satisfy the requirements of 40 CFR 93.118 "Criteria and procedures: Motor vehicle emissions budget" or 40 CFR 93.119 "Criteria and procedures: Interim emissions in areas without motor vehicle emissions budgets" without new regional emissions analysis if the regional emissions analysis already performed for the plan also applies to the TIP. This requires a demonstration that:
  - (a) The new plan and/or TIP contain all projects which must be started in the plan and TIP's timeframes in order to achieve the highway and transit system envisioned by the transportation plan;
  - (b) All plan and TIP projects which are regionally significant are included in the transportation plan with design concept and scope adequate to determine their contribution to the transportation plan's regional emissions at the time of the transportation plan's conformity determination;
  - (c) The design concept and scope of each regionally significant project in the new plan and/or TIP are not significantly different from that described in the transportation plan; and
  - (d) The previous regional emissions analysis is consistent with the requirements of 40 CFR 93.118 (including that conformity to all currently applicable budgets is demonstrated) and/or 40 CFR 93.119 as applicable.

- (2) A project which is not from a conforming transportation plan and a conforming TIP may be demonstrated to satisfy the requirements of 40 CFR 93.118 or 40 CFR 93.119 without additional regional emissions analysis if allocating funds to the project will not delay the implementation of projects in the transportation plan or TIP which are necessary to achieve the highway and transit system envisioned by the transportation plan, and if the project is either:
  - (a) Not regionally significant; or
  - (b) Included in the conforming transportation plan (even if it is not specifically included in the latest conforming TIP) with design concept and scope adequate to determine its contribution to the transportation plan's regional emissions at the time of the transportation plan's conformity determination, and the design concept and scope of the project is not significantly different from that described in the transportation plan.
- (3) A conformity determination that relies on paragraph (G) of this rule does not satisfy the frequency requirements of paragraph (J) or (K) of rule 3745-101-03 of the Administrative Code.

**Enforceability of design concept and scope and project-level mitigation and control measures.**

[Comment: For dates of non-regulatory government publications, publications of recognized organizations and associations, federal rules, and federal statutory provisions referenced in this rule, see the last paragraph of rule 3745-101-02 of the Administrative Code titled "Incorporation by reference."]

- (A) Prior to determining that a transportation project is in conformity, the MPO, other recipient of funds designated under Title 23 USC or the Federal Transit Act, the FHWA, or FTA shall obtain, from the project sponsor or operator, enforceable written commitments to implement in the construction of the project and operation of the resulting facility or service, any project-level mitigation or control measures which are identified as conditions for NEPA process completion with respect to local PM<sub>10</sub> or CO impacts. Before making conformity determinations, enforceable written commitments shall also be obtained for project-level mitigation or control measures which are conditions for making conformity determinations for a transportation plan or TIP and included in the project design concept and scope which is used in the regional emissions analysis required by 40 CFR 93.118 "Criteria and procedures: Motor vehicle emissions budget" and 40 CFR 93.119 "Criteria and procedures: Interim emissions in areas without motor vehicle emissions budgets" or used in the project-level hot-spot analysis required by 40 CFR 93.116.
- (B) Project sponsors voluntarily committing to mitigation measures to facilitate positive conformity determinations shall provide enforceable written commitments and shall comply with the obligations of such commitments.
- (C) Enforceable written commitments to mitigation or control measures shall be obtained prior to a positive conformity determination, and project sponsors shall comply with such commitments.
- (D) If the MPO or project sponsor believes the mitigation or control measure is no longer necessary for conformity, then the project sponsor or operator may be relieved of its obligation to implement the mitigation or control measure if it can demonstrate that the applicable hot-spot requirements of 40 CFR 93.116, the emission budget requirements of 40 CFR 93.118, and emission reduction requirements of 40 CFR 93.119 are satisfied without the mitigation or control measure, and so notifies the agencies involved in the interagency consultation process required under rule 3745-101-04 of the Administrative Code. The MPO and USDOT shall confirm that the transportation plan and TIP still satisfy the requirements of 40 CFR 93.118 and/or 40 CFR 93.119, that the project still satisfies the requirements of 40 CFR 93.116, and that the conformity determinations for the transportation plan, TIP, and project are therefore still valid. This finding is subject to the applicable public consultation requirements in paragraph (E) of rule 3745-101-04 of the Administrative Code for conformity determinations for projects.

## **Chapter 3745-102: General Conformity Rules**

*Contact:* Paul Braun 614-644-3734  
Paul.Braun@EPA.State.Oh.US

3745-102-01      **Purpose.**

[Comment: For dates of non-regulatory government publications, publications of recognized organizations and associations, federal rules, and federal statutory provisions referenced in this rule, see the last paragraph of rule 3745-102-02 of the Administrative Code titled "Incorporation by reference."]

- (A) The purpose of this chapter is to implement Section 176(c) of the CAA and regulations under 40 CFR Part 51, Subpart W, with respect to the conformity of general federal actions to the applicable implementation plan. Under those authorities, no department, agency or instrumentality of the federal government shall engage in, support in any way or provide financial assistance for, license or permit, or approve any activity which does not conform to an applicable implementation plan. This chapter sets forth policy, criteria, and procedures for demonstrating and assuring conformity of such actions to the applicable implementation plan.
- (B) Under Section 176(c) of the CAA and 40 CFR Part 51, Subpart W, a federal agency shall make a determination that a federal action conforms to the applicable implementation plan in accordance with the requirements of this chapter before the action is taken.
- (C) The preceding sentence does not include federal actions where either:
  - (1) A National Environmental Policy Act of 1969 analysis was completed as evidenced by a final environmental assessment, environmental impact statement, or finding of no significant impact that was prepared prior to January 31, 1994; or
  - (2)
    - (a) Prior to January 31, 1994, an environmental assessment was commenced or a contract was awarded to develop the specific environmental analysis;
    - (b) Sufficient environmental analysis is completed by March 15, 1994, so that a federal agency may determine that the federal action is in conformity with the specific requirements and the purposes of the applicable implementation plan pursuant to the agency's affirmative obligation under Section 176(c) of the CAA; and
    - (c) A written determination of conformity under Section 176(c) of the CAA has been made by the federal agency responsible for the federal action by March 15, 1994.
- (D) Notwithstanding any provision of this chapter, a determination that an action is in conformity with the applicable implementation plan does not exempt the action from

any other requirements of the applicable implementation plan, the National Environmental Policy Act of 1969, or the CAA.

Effective: 11/03/2006

R.C. 119.032 review dates: 08/16/2006 and 11/03/2011

3745-102-02      **Definitions.**

[Comment: For dates of non-regulatory government publications, publications of recognized organizations and associations, federal rules, and federal statutory provisions referenced in this rule, see the "Incorporation by Reference" paragraph at the end of this rule.]

(A) Terms used but not defined in this chapter shall have the meaning given them by the CAA and USEPA's regulations, in that order of priority. Except as otherwise provided in this rule, the definitions in rule 3745-15-01 of the Administrative Code shall apply to this chapter.

(B) As used in Chapter 3745-102 of the Administrative Code:

- (1) "Affected federal land manager" means the federal agency or the federal official charged with direct responsibility for management of an area designated as Class I under 42 USC 7472 that is located within one hundred kilometers of the proposed federal action.
- (2) "Applicable implementation plan" means the portion or portions of the state's implementation plan, or most recent revision thereof, which has been approved under Section 110 of the CAA, or promulgated under Section 110(c) of the CAA, or promulgated or approved pursuant to regulations promulgated under Section 301(d) of the CAA and which implements the relevant requirements of the CAA.
- (3) "Areawide air quality modeling analysis" means an assessment on a scale that includes the entire nonattainment or maintenance area, which uses an air quality dispersion model to determine the effects of emissions on air quality.
- (4) "CAA" means the Clean Air Act as amended November 15, 1990; 42 USC 7401 to 7671q.
- (5) "Cause or contribute to a new violation" means a federal action that:
  - (a) Causes a new violation of a national ambient air quality standard at a location in a nonattainment or maintenance area which would otherwise not be in violation of the standard during the future period in question if the federal action were not taken; or
  - (b) Contributes, in conjunction with other reasonably foreseeable actions, to a new violation of a national ambient air quality standard at a location in a nonattainment or maintenance area in a manner that would increase the frequency or severity of the new violation.

- (6) "Caused by", as used in the terms "direct emissions" and "indirect emissions," means emissions that would not otherwise occur in the absence of the federal action.
- (7) "CERCLA" means the Comprehensive Environmental Response, Compensation, and Liability Act, contained in 42 USC 9601 to 9675. .
- (8) "CO" means carbon monoxide.
- (9) "Criteria pollutant or standard" means any pollutant for which there is an established national ambient air quality standard at 40 CFR Part 50.
- (10) "Direct emissions" means those emissions of a criteria pollutant or its precursors that are caused or initiated by the federal action and occur at the same time and place as the action.
- (11) "Emergency" means a situation where extremely quick action on the part of the federal agencies involved is needed and where the timing of such federal activities makes it impractical to meet the requirements of this chapter, such as natural disasters like hurricanes or earthquakes, civil disturbances such as terrorist acts, and military mobilizations.
- (12) "Emissions budgets" means those portions of the total allowable emissions defined in a USEPA-approved revision to the applicable implementation plan for a certain date for the purpose of meeting reasonable further progress milestones or attainment or maintenance demonstrations, for any criteria pollutant or its precursors, specifically allocated by the applicable implementation plan to mobile sources, to any stationary source or class of stationary sources, to any federal action or class of action, to any class of area sources, or to any subcategory of the emissions inventory. The allocation system shall be specific enough to assure meeting the criteria of Section 176(c)(1)(B) of the CAA. An emissions budget may be expressed in terms of an annual period, a daily period, or other period established in the applicable implementation plan.
- (13) "Emission offsets" for the purposes of paragraph (B) of rule 3745-102-05 of the Administrative Code, means emissions reductions which are quantifiable, consistent with the applicable implementation plan attainment and reasonable further progress demonstrations, surplus to reductions required by and credited to other applicable implementation plan provisions, enforceable under both state and federal law, and permanent within the time frame specified by the program. Emissions reductions intended to be achieved as emissions offsets under this chapter shall be monitored and enforced in a manner equivalent to that under USEPA's new source review requirements.

- (14) "Emissions that a federal agency has a continuing program responsibility for" means emissions that are specifically caused by an agency carrying out its authorities, and does not include emissions that occur due to subsequent activities, unless such activities are required by the federal agency. Where an agency, in performing its normal program responsibilities, takes actions itself or imposes conditions that result in air pollutant emissions by a non-federal entity taking subsequent actions, such emissions are covered by the meaning of a continuing program responsibility.
- (15) "Facility" means any building, structure, roadway, installation, operation, or combination thereof.
- (16) "Federal action" means any activity engaged in by a department, agency or instrumentality of the federal government, or any activity that a department, agency or instrumentality of the federal government supports in any way, provides financial assistance for, licenses, permits, or approves, other than activities related to transportation plans, programs, and projects developed, funded, or approved under Title 23 of the United States Code or the Federal Transit Act, contained in 49 USC 53. Where the federal action is a permit, license, or other approval for some aspect of a non-federal undertaking, the relevant activity is the part, portion, or phase of the non-federal undertaking that requires the federal permit, license, or approval.
- (17) "Federal agency" means, for purposes of this chapter, a federal department, agency, or instrumentality of the federal government to the extent that it is engaging in, supporting in any way or providing financial assistance for, licensing or permitting, or approving an action in the state of Ohio.
- (18) "Increase the frequency or severity of any existing violation of any standard in any area" means to cause a nonattainment area to exceed a standard more often, or to cause a violation at a greater concentration than previously existed or would otherwise exist during the future period in question if the project were not implemented.
- (19) "Indirect emissions" means those emissions of a criteria pollutant or its precursors that:
- (a) Are caused by the federal action, but may occur later in time or may be farther removed in distance from the action itself but are still reasonably foreseeable; and
  - (b) The federal agency can practicably control and will maintain control over due to a continuing program responsibility of the federal agency.

- (20) "Local air agency" means an agency that has been delegated air pollution control responsibilities by the director pursuant to Section 3704.03 of the Revised Code.
- (21) "Local air quality modeling analysis" means an assessment of localized impacts on a scale smaller than the entire nonattainment or maintenance area, including, for example, congested roadway intersections and highways or transit terminals, which uses an air quality dispersion model to determine the effects of emissions on air quality.
- (22) "Maintenance area" means any geographic region of the United States previously designated nonattainment pursuant to the CAA and subsequently redesignated to attainment subject to the requirement to develop a maintenance plan under Section 175A of the CAA.
- (23) "Maintenance plan" means a revision to the applicable implementation plan, meeting the requirements of Section 175A of the CAA.
- (24) "Metropolitan planning organization" or "MPO" means that organization designated as being responsible, together with the state, for conducting the continuing, cooperative, and comprehensive planning process under 23 USC 134 and 49 USC 5303 within the MPO boundary as recognized by the governor of Ohio.
- (25) "Milestone" has the meaning given in Sections 182(g)(1) and 189(c)(1) of the CAA. A milestone consists of an emissions level and the date on which it is required to be achieved.
- (26) "National ambient air quality standards" or "NAAQS" means those standards established pursuant to Section 109 of the CAA and include standards for CO, Pb, NO<sub>2</sub>, ozone, PM<sub>10</sub> and SO<sub>2</sub>.
- (27) "NEPA" means the National Environmental Policy Act of 1969, contained in 42 USC 4321 to 4370(f).
- (28) "Nonattainment area" or "NAA" means any geographic area of the United States which has been designated as nonattainment under Section 107 of the CAA and described in 40 CFR Part 81.
- (29) "NO<sub>x</sub>" means oxides of nitrogen.
- (30) "NO<sub>2</sub>" means nitrogen dioxide.
- (31) "Pb" means lead.

- (32) "PM<sub>10</sub>" means particulate matter with an aerodynamic diameter less than or equal to ten microns.
- (33) "Precursors of a criteria pollutant" means:
- (a) For ozone: NO<sub>x</sub>, unless an area is exempted from NO<sub>x</sub> requirements under Section 182(f) of the CAA, and volatile organic compounds (VOC); and
  - (b) For PM<sub>10</sub>: those pollutants described in the PM<sub>10</sub> nonattainment area applicable implementation plan as significant contributors to the PM<sub>10</sub> levels.
- (34) "Reasonably foreseeable emissions" means projected future indirect emissions that are identified at the time the conformity determination is made; the location of such emissions is known to the extent adequate to determine the impact of such emissions; and the emissions are quantifiable, as described and documented by the federal agency based on its own information and after reviewing any information presented to the federal agency.
- (35) "Regionally significant action" means a federal action for which the direct and indirect emissions of any pollutant represent ten per cent or more of a nonattainment or maintenance area's emissions inventory for that pollutant.
- (36) "Regional water or wastewater projects" include construction, operation, and maintenance of water or wastewater conveyances, water or wastewater treatment facilities, and water storage reservoirs which affect a large portion of a nonattainment or maintenance area.
- (37) "Total of direct and indirect emissions" means the sum of direct and indirect emissions increases and decreases caused by the federal action; i.e., the "net" emissions considering all direct and indirect emissions. The portion of emissions which are exempt or presumed to conform under paragraph (C), (D), (E) or (F) of rule 3745-102-03 of the Administrative Code are not included in the "total of direct and indirect emissions" except as provided in paragraph (J) of rule 3745-102-03 of the Administrative Code. The "total of direct and indirect emissions" includes emissions of criteria pollutants and emissions of precursors of criteria pollutants. The segmentation of projects for conformity analyses when emissions are reasonably foreseeable is not permitted by this chapter.
- (38) "USEPA" means the United States environmental protection agency.
- (39) "VOC" means volatile organic compound as defined in paragraph (B)(6) of rule 3745-21-01 of the Administrative Code.
- (C) Incorporation by reference. This chapter includes references to certain matter or materials. The text of the incorporated materials is not included in the regulations

contained in this chapter. The materials are hereby made a part of the regulations in this chapter. For materials subject to change, only the specific version specified in the regulation are incorporated. Material is incorporated as it exists on the effective date of this rule. Except for subsequent annual publication of existing (unmodified) Code of Federal Regulation compilations, any amendment or revision to a referenced document is not incorporated unless and until this rule has been amended to specify the new dates.

(1) Availability. The materials incorporated by reference are available as follows:

- (a) Clean Air Act. Information and copies may be obtained by writing to: "Superintendent of Documents, Attn: New Orders, PO Box 371954, Pittsburgh, PA 15250-7954." The full text of the Act as amended in 1990 is also available in electronic format at [www.epa.gov/oar/caa/](http://www.epa.gov/oar/caa/). A copy of the Act is also available for inspection and copying at most public libraries and "The State Library of Ohio."
- (b) Code of Federal Regulations. Information and copies may be obtained by writing to: "Superintendent of Documents, Attention: New Orders, PO Box 371954, Pittsburgh, PA 15250-7954." The full text of the CFR is also available in electronic format at [www.access.gpo.gov/nara/cfr/](http://www.access.gpo.gov/nara/cfr/). The CFR compilations are also available for inspection and copying at most public libraries and "The State Library of Ohio."
- (c) Compilation of air pollutant emission factors, AP-42. Information and copies may be obtained by writing to: "Superintendent of Documents, Attn: New Orders, PO Box 371954, Pittsburgh, PA 15250-7954." The full text of the compilation of air pollutant emission factors, AP-42, is also available in electronic format at <http://www.epa.gov/ttn/chief/ap42/index.html>. The compilation of air pollutant emission factors, AP-42, are also available for inspection and copying at most public libraries and "The State Library of Ohio."
- (d) Comprehensive Environmental Response, Compensation, and Liability Act. Information and copies may be obtained by writing to: "Superintendent of Documents, Attn: New Orders, PO Box 371954, Pittsburgh, PA 15250-7954." The full text of the Act as amended in 1980 is also available in electronic format at <http://www4.law.cornell.edu/uscode/>. A copy of the Act is also available for inspection and copying at most public libraries and "The State Library of Ohio."
- (e) a. Federal Register. Information and copies may be obtained by writing to: "Superintendent of Documents, Attn: New Orders, PO Box 371954, Pittsburgh, PA 15250-7954." It is also available in electronic format at <http://www.gpoaccess.gov/nara/index.html>. A copy of the Register is also

available for inspection and copying at most public libraries and "The State Library of Ohio."

- (f) Federal Transit Act. Information and copies may be obtained by writing to: "Superintendent of Documents, Attn: New Orders, PO Box 371954, Pittsburgh, PA 15250-7954." The full text of the Act as amended in 1998 is also available in electronic format at <http://www4.law.cornell.edu/uscode/>. A copy of the Act is also available for inspection and copying at most public libraries and "The State Library of Ohio."
- (g) National Environmental Policy Act. Information and copies may be obtained by writing to: "Superintendent of Documents, Attn: New Orders, PO Box 371954, Pittsburgh, PA 15250-7954." A copy of the Act is also available for inspection and copying at most public libraries and "The State Library of Ohio."
- (h) United States Code. Information and copies may be obtained by writing to: "Superintendent of Documents, Attn: New Orders, PO Box 371954, Pittsburgh, PA 15250-7954." The full text of the United States Code is also available in electronic format at <http://www4.law.cornell.edu/uscode/>. The USC compilations are also available for inspection and copying at most public libraries and "The State Library of Ohio."

- (ee) Title 49 of the United States Code; "Transportation;" published January 19, 2004 in Supplement III of the 2000 Edition of the United States Code.

Effective: 11/03/2006

R.C. 119.032 review dates: 08/16/2006 and 11/03/2011

CERTIFIED ELECTRONICALLY  
Certification

10/24/2006  
Date

Promulgated Under: 119.03  
Statutory Authority: ORC 3704.03(E)  
Rule Amplifies: ORC 3704.033, 3704.03(E)  
Prior Effective Dates: 8/21/95

3745-102-03      **Applicability.**

[Comment: For dates of non-regulatory government publications, publications of recognized organizations and associations, federal rules, and federal statutory provisions referenced in this rule, see the last paragraph of rule 3745-102-02 of the Administrative Code titled "Incorporation by reference."]

- (A) Conformity determinations for federal actions related to transportation plans, programs, and projects developed, funded, or approved under Title 23 of the United States Code or the Federal Transit Act, contained in 49 USC 5303 shall meet the procedures and criteria of Chapter 3745-101 of the Administrative Code, in lieu of the procedures set forth in this chapter.
- (B) For federal actions not covered by paragraph (A) of this rule, a conformity determination by the federal agency taking the action for which the conformity determination is being made is required for each pollutant where the total of direct and indirect emissions in a nonattainment or maintenance area caused by a federal action would equal or exceed any of the rates in paragraph (B)(1) or (B)(2) of this rule.

(1) For purposes of paragraph (B) of this rule, the following rates apply in NAA's:

--

Pollutant	Tons/Year
Ozone (VOC or NO <sub>x</sub> )	
Serious NAAs	50
Severe NAAs	25
Extreme NAAs	10
Other ozone NAAs outside an ozone transport region	100
Marginal and moderate NAAs inside an ozone transport region	
VOC	50
NO <sub>x</sub>	100
Carbon monoxide	
All NAAs	100
SO <sub>2</sub> or NO <sub>2</sub>	
All NAAs	100
PM <sub>10</sub>	
Moderate NAAs	100
Serious NAAs	70
Pb	
All NAAs	25

- (2) For purposes of paragraph (B) of this rule, the following rates apply in maintenance areas:

--

Pollutant	Tons/Year
Ozone (NO <sub>x</sub> ), SO <sub>2</sub> or NO <sub>2</sub>	
All maintenance areas	100
Ozone (VOC)	
Maintenance areas inside an ozone transport region	50
Maintenance areas outside an ozone transport region	100
Carbon monoxide	
All maintenance areas	100
PM <sub>10</sub>	
All maintenance areas	100
Pb	
All maintenance areas	25

(C) The requirements of this chapter shall not apply to:

- (1) Actions where the total of direct and indirect emissions are below the emissions levels specified in paragraph (B) of this rule.
- (2) The following actions which would result in no emissions increase or an increase in emissions that is clearly de minimis:
  - (a) Judicial and legislative proceedings.
  - (b) Continuing and recurring activities such as permit renewals where activities conducted will be similar in scope and operation to activities currently being conducted.
  - (c) Rulemaking and policy development and issuance;
  - (d) Routine maintenance and repair activities, including repair and maintenance of administrative sites, roads, trails, and facilities.
  - (e) Civil and criminal enforcement activities, such as investigations, audits, inspections, examinations, prosecutions, and the training of law enforcement personnel.
  - (f) Administrative actions such as personnel actions, organizational changes, debt management or collection, cash management, internal agency audits, program budget proposals, and matters relating to the administration and collection of taxes, duties and fees.

- (g) The routine, recurring transportation of materiel and personnel.
- (h) Routine movement of mobile assets, such as ships and aircraft, in home port reassignments and stations (when no new support facilities or personnel are required) to perform as operational groups or for repair or overhaul.
- (i) Maintenance dredging and debris disposal where no new depths are required, applicable permits are secured, and disposal will be at an approved disposal site.
- (j) With respect to existing structures, properties, facilities and lands where future activities conducted will be similar in scope and operation to activities currently being conducted at the existing structures, properties, facilities, and lands, actions such as relocation of personnel, disposition of federally-owned existing structures, properties, facilities, and lands, rent subsidies, operation and maintenance cost subsidies, the exercise of receivership or conservatorship authority, assistance in purchasing structures, and the production of coins and currency.
- (k) The granting of leases, licenses such as for exports and trade, permits, and easements where activities conducted will be similar in scope and operation to activities currently being conducted.
- (l) Planning, studies, and provision of technical assistance.
- (m) Routine operation of facilities, mobile assets and equipment.
- (n) Transfers of ownership, interests, and titles in land, facilities, and real and personal properties, regardless of the form or method of the transfer.
- (o) The designation of empowerment zones, enterprise communities, or viticultural areas.
- (p) Actions by any of the federal banking agencies or the federal reserve banks, including actions regarding charters, applications, notices, licenses, the supervision or examination of depository institutions or depository institution holding companies, access to the discount window, or the provision of financial services to banking organizations or to any department, agency or instrumentality of the United States.
- (q) Actions by the board of governors of the federal reserve system or any federal reserve bank to effect monetary or exchange rate policy.
- (r) Actions that implement a foreign affairs function of the United States.

- (s) Actions, or portions thereof, associated with transfers of land, facilities, title, and real properties through an enforceable contract or lease agreement where the delivery of the deed is required to occur promptly after a specific, reasonable condition is met, such as promptly after the land is certified as meeting the requirements of CERCLA, and where the federal agency does not retain continuing authority to control emissions associated with the lands, facilities, title, or real properties.
  - (t) Transfers of real property, including land, facilities, and related personal property from a federal entity to another federal entity and assignments of real property, including land, facilities, and related personal property from a federal entity to another federal entity for subsequent deeding to eligible applicants.
  - (u) Actions by the department of the treasury to effect fiscal policy and to exercise the borrowing authority of the United States.
- (3) The following actions where the emissions are not reasonably foreseeable:
- (a) Initial outer continental shelf lease sales which are made on a broad scale and are followed by exploration and development plans on a project level.
  - (b) Electric power marketing activities that involve the acquisition, sale and transmission of electric energy.
- (4) Individual actions which implement a decision to conduct or carry out a program that has been found to conform to the applicable implementation plan, such as prescribed burning actions which are consistent with a land management plan that has been found to conform to the applicable implementation plan. Such land management plan shall have been found to conform within the past five years.
- (D) Notwithstanding the other requirements of this chapter, a conformity determination is not required for the following federal actions, or portion thereof:
- (1) The portion of an action that includes major new or modified stationary sources that require a permit under the new source review program pursuant to Section 173 of the CAA or the prevention of significant deterioration program under Part C of Title I of the CAA.
  - (2) Actions in response to emergencies or natural disasters such as hurricanes, earthquakes, etc., which are commenced on the order of hours or days after the emergency or disaster and, if applicable, which meet the requirements of paragraph (E) of this rule.
  - (3) Research, investigations, studies, demonstrations, or training, other than those exempted under paragraph (C)(2) of this rule, where no environmental detriment

is incurred or the particular action furthers air quality research, as determined by the Ohio EPA, which is responsible for the applicable implementation plan.

- (4) Alteration and additions of existing structures as specifically required by new or existing applicable environmental legislation or environmental regulations e.g., hush houses for aircraft engines and scrubbers for air emissions.
  - (5) Direct emissions from remedial and removal actions carried out under CERCLA and associated regulations to the extent such emissions either comply with the substantive requirements of the prevention of significant deterioration/new source review permitting program or are exempted from other environmental regulation under the provisions of CERCLA and applicable regulations issued under CERCLA.
- (E) Federal actions which are part of a continuing response to an emergency or disaster under paragraph (D)(2) of this rule and which are to be taken more than six months after the commencement of the response to the emergency or disaster under paragraph (D)(2) of this rule are exempt from the requirements of this chapter only if:
- (1) The federal agency taking the actions makes a written determination that, for a specified period not to exceed an additional six months, it is impractical to prepare the conformity analyses which would otherwise be required and the actions cannot be delayed due to overriding concerns for public health and welfare, national security interests and foreign policy commitments; or
  - (2) For actions which are to be taken after those actions covered by paragraph (E)(1) of this rule, the federal agency makes a new determination as provided in paragraph (E)(1) of this rule.
- (F) Notwithstanding other requirements of this chapter, individual actions or classes of actions specified by individual federal agencies that have met the criteria set forth in either paragraph (G)(1) or (G)(2) of this rule and the procedures set forth in paragraph (H) of this rule are presumed to conform, except as provided in paragraph (J) of this rule.
- (G) The federal agency shall meet the criteria for establishing activities that are presumed to conform by fulfilling the requirements set forth in either paragraph (G)(1) or (G)(2) of this rule:
- (1) The federal agency shall clearly demonstrate, using methods consistent with this chapter, that the total of direct and indirect emissions from the type of activities which would be presumed to conform would not:
    - (a) Cause or contribute to any new violation of any standard in any area;

- (b) Interfere with provisions in the applicable implementation plan for maintenance of any standard;
  - (c) Increase the frequency or severity of any existing violation of any standard in any area; or
  - (d) Delay timely attainment of any standard or any required interim emission reductions or other milestones in any area including, where applicable, emission levels specified in the applicable implementation plan for purposes of:
    - (i) A demonstration of reasonable further progress;
    - (ii) A demonstration of attainment; or
    - (iii) A maintenance plan; or
  - (2) The federal agency shall provide documentation that the total of direct and indirect emissions from such future actions would be below the emission rates for a conformity determination that are established in paragraph (B) of this rule, based, for example, on similar actions taken over recent years.
- (H) In addition to meeting the criteria for establishing exemptions set forth in paragraph (G)(1) or (G)(2) of this rule, the following procedures shall also be complied with to presume that activities will conform:
- (1) The federal agency shall identify through publication in the Federal Register its list of proposed activities that are presumed to conform and the basis for the presumptions;
  - (2) The federal agency shall notify the appropriate USEPA regional office(s), Ohio EPA and local air agencies and, where applicable, the agency designated under Section 174 of the CAA and the MPO and provide at least thirty days for the public to comment on the list of proposed activities presumed to conform;
  - (3) The federal agency shall document its response to all the comments received and make the comments, response, and final list of activities available to the public upon request; and
  - (4) The federal agency shall publish the final list of such activities in the Federal Register.
- (I) Notwithstanding the other requirements of this chapter, when the total of direct and indirect emissions of any pollutant from a federal action does not equal or exceed the rates specified in paragraph (B) of this rule, but represents ten per cent or more of a nonattainment or maintenance area's total emissions of that pollutant, the action is

defined as a regionally significant action and the requirements of rule 3745-102-01 and of paragraph (B) of rule 3745-102-04 to rule 3745-102-06 of the Administrative Code shall apply for the federal action.

- (J) Where an action presumed to be de minimis under paragraph (C)(1) or (C)(2) of this rule or otherwise presumed to conform under paragraph (F) of this rule is a regionally significant action or where an action otherwise presumed to conform under paragraph (F) of this rule does not in fact meet one of the criteria in paragraph (G)(1) of this rule, that action shall not be considered de minimis or presumed to conform and the requirements of rule 3745-102-01 and of paragraph (B) of rule 3745-102-04 to rule 3745-102-06 of the Administrative Code shall apply for the federal action.
  
- (K) The provisions of this chapter shall apply in all nonattainment and maintenance areas.

3745-102-04      **Conformity analysis, reporting requirements, public participation and consultation.**

[Comment: For dates of non-regulatory government publications, publications of recognized organizations and associations, federal rules, and federal statutory provisions referenced in this rule, see the last paragraph of rule 3745-102-02 of the Administrative Code titled "Incorporation by reference."]

- (A) Any federal department, agency, or instrumentality of the federal government taking an action subject to 40 CFR Part 51, Subpart W and this chapter shall make its own conformity determination consistent with the requirements of this chapter. In making its conformity determination, a federal agency shall consider comments from any interested parties. Where multiple federal agencies have jurisdiction for various aspects of a project, a federal agency may choose to adopt the analysis of another federal agency, to the extent that the proposed action and impacts analyzed are the same as the project for which a conformity determination is required, or to develop its own analysis in order to make its conformity determination.
- (B) A federal agency making a conformity determination under paragraph (B) of rule 3745-102-05 of the Administrative Code shall:
  - (1) Provide to the appropriate USEPA regional office(s), to Ohio EPA and local air agencies and, where applicable, to affected federal land managers, to the agency designated under Section 174 of the CAA, and to the MPO, a thirty-day notice which describes the proposed action and the federal agency's draft conformity determination on the action.
  - (2) Notify the appropriate USEPA regional office(s), Ohio EPA and local air agencies and, where applicable, affected federal land managers, the agency designated under Section 174 of the CAA, and the MPO, within thirty days after making a final conformity determination under paragraph (B) of rule 3745-102-05 of the Administrative Code.
- (C) Upon request by any person regarding a specific federal action, a federal agency shall make available for review its draft conformity determination under paragraph (B) of rule 3745-102-05 of the Administrative Code with supporting materials which describe the analytical methods, assumptions, and conclusions relied upon in making the applicability analysis and draft conformity determination. In addition, a federal agency shall:
  - (1) Make public its draft conformity determination under paragraph (B) of rule 3745-102-05 of the Administrative Code by placing a notice by prominent advertisement in a daily newspaper of general circulation in the areas affected by the action, and by providing thirty days for written public comment prior to taking any formal action on the draft determination. This comment period may

be concurrent with any other public involvement, such as occurs in the NEPA process.

- (2) Document its response to all the comments received on its draft conformity determination under paragraph (B) of rule 3745-102-05 of the Administrative Code and make the comments and responses available, upon request by any person regarding a specific federal action, within thirty days of the final conformity determination.
- (3) Make public its final conformity determination under paragraph (B) of rule 3745-102-05 of the Administrative Code for a federal action by placing a notice by prominent advertisement in a daily newspaper of general circulation in the area affected by the action within thirty days of the final conformity determination.

3745-102-05      **Conformity determinations.**

[Comment: For dates of non-regulatory government publications, publications of recognized organizations and associations, federal rules, and federal statutory provisions referenced in this rule, see the last paragraph of rule 3745-102-02 of the Administrative Code titled "Incorporation by reference."]

(A) Frequency of conformity determinations.

- (1) The conformity status of a federal action automatically lapses five years from the date a final conformity determination is reported under paragraph (B) of rule 3745-102-04 of the Administrative Code, unless the federal action has been completed or a continuous program has been commenced to implement that federal action within a reasonable time.
- (2) Ongoing federal activities at a given site showing continuous progress are not new actions and do not require periodic redeterminations so long as the emissions associated with such activities are within the scope of the final conformity determination reported under paragraph (B) of rule 3745-102-04 of the Administrative Code.
- (3) If, after the conformity determination is made, the federal action is changed so that there is an increase in the total of direct and indirect emissions above the levels in paragraph (B) of rule 3745-102-03 of the Administrative Code, then a new conformity determination is required.

(B) Criteria for determining conformity of general federal actions.

- (1) The areawide and local air quality modeling analyses shall:
  - (a) Meet the requirements in paragraph (C) of this rule; and
  - (b) Show that the action does not:
    - (i) Cause or contribute to any new violation of any standard in any area; or
    - (ii) Increase the frequency or severity of any existing violation of any standard in any area.
- (2) Notwithstanding any other requirements of paragraph (B) of this rule, an action subject to this chapter shall not be determined to conform to the applicable implementation plan unless the total of direct and indirect emissions from the action is in compliance or is consistent with all relevant requirements and milestones contained in the applicable implementation plan, such as elements identified as part of the reasonable further progress schedules, assumptions

specified in the attainment or maintenance demonstration, prohibitions, numerical emission limits, and work practice requirements, and such action is otherwise in compliance with all relevant requirements of the applicable implementation plan.

- (3) Any analyses required under paragraph (B) of this rule shall be completed, and any mitigation requirements necessary for a finding of conformity shall be identified in compliance with rule 3745-102-06 of the Administrative Code, before the determination of conformity is made.
- (4) An action required under rule 3745-102-03 of the Administrative Code to have a conformity determination for a specific pollutant will be determined to conform to the applicable implementation plan if, for each pollutant that exceeds the rates in paragraph (B) of rule 3745-102-03 of the Administrative Code or otherwise requires a conformity determination due to the total of direct and indirect emissions from the action, the action meets the requirements of paragraph (B)(2) of this rule and meets any of the following requirements:
  - (a) For any criteria pollutant, the total of direct and indirect emissions from the action are specifically identified and accounted for in the applicable implementation plan's attainment or maintenance demonstration;
  - (b) For ozone or NO<sub>2</sub>, the total of direct and indirect emissions from the action are fully offset within the same nonattainment or maintenance area through a revision to the applicable implementation plan or a measure similarly enforceable under state and federal law that effects emission reductions so that there is no net increase in emissions of that pollutant;
  - (c) For any criteria pollutant, except ozone and nitrogen dioxide, the total of direct and indirect emissions from the action meet the requirements:
    - (i) Specified in paragraph (B)(1) of this rule, based on areawide air quality modeling analysis and local air quality modeling analysis; or
    - (ii) Specified in paragraph (B)(4)(e) of this rule and, for local air quality modeling analysis, the requirement of paragraph (B)(1) of this rule;
  - (d) For CO or PM<sub>10</sub>:
    - (i) Where Ohio EPA determines, in accordance with paragraphs (B) and (C) of rule 3745-102-04 of the Administrative Code and consistent with the applicable implementation plan, that an areawide air quality modeling analysis is not needed, the total of direct and indirect emissions from the action meet the requirements specified in paragraph (B)(1) of this rule, based on local air quality modeling analysis; or

- (ii) Where Ohio EPA determines, in accordance with paragraphs (B) and (C) of rule 3745-102-04 of the Administrative Code and consistent with the applicable implementation plan, that an areawide air quality modeling analysis is appropriate and that a local air quality modeling analysis is not needed, the total of direct and indirect emissions from the action meet the requirements specified in paragraph (B)(1) of this rule, based on areawide modeling, or meet the requirements of paragraph (B)(4)(e) of this rule; or
- (e) For ozone or nitrogen dioxide, and for purposes of paragraphs (B)(4)(c)(ii) and (B)(4)(d)(ii) of this rule, each portion of the action or the action as a whole meets any of the following requirements:
- (i) Where USEPA has approved a revision to an area's attainment or maintenance demonstration after 1990 and the state makes a determination as provided in paragraph (B)(4)(e)(i)(a) of this rule or where the state makes a commitment as provided in paragraph (B)(4)(e)(i)(b) of this rule. Any such determination or commitment shall be made in compliance with paragraphs (B) and (C) of rule 3745-102-04 of the Administrative Code:
    - (a) The total of direct and indirect emissions from the action, or portion thereof, is determined and documented by Ohio EPA to result in a level of emissions which, together with all other emissions in the nonattainment or maintenance area, would not exceed the emissions budgets specified in the applicable implementation plan.
    - (b) The total of direct and indirect emissions from the action, or portion thereof, is determined by Ohio EPA to result in a level of emissions which, together with all other emissions in the nonattainment or maintenance area, would exceed an emissions budget specified in the applicable implementation plan and the governor or Ohio EPA makes a written commitment to USEPA which includes the following:
      - (i) A specific schedule for adoption and submittal of a revision to the applicable implementation plan which would achieve the needed emission reductions prior to the time that emissions from the federal action would occur;
      - (ii) Identification of specific measures for incorporation into the applicable implementation plan which would result in a level of emissions which, together with all other emissions in the nonattainment or maintenance area, would not exceed any emissions budget specified in the applicable implementation plan;

- (iii) A demonstration that all existing applicable implementation plan requirements are being implemented in the area for the pollutants affected by the federal action, and that local authority to implement additional requirements has been fully pursued;
    - (iv) A determination that the responsible federal agencies have required all reasonable mitigation measures associated with their action;
    - (v) Written documentation including all air quality analyses supporting the conformity determination.
  - (c) Where a federal agency made a conformity determination based on a state commitment under paragraph (B)(4)(e)(i)(b) of this rule, such a state commitment is automatically deemed a call for an implementation plan revision by USEPA under Section 110 (k)(5) of the CAA , effective on the date of the federal conformity determination and requiring response within eighteen months or any shorter time within which the state commits to revise the applicable implementation plan;
- (ii) The action, or portion thereof, as determined by the MPO, is specifically included in a current transportation plan and transportation improvement program which have been found to conform to the applicable implementation plan under Chapter 3745-101 of the Administrative Code or 40 CFR Part 93, Subpart A;
- (iii) The action, or portion thereof, fully offsets its emissions within the same nonattainment or maintenance area through a revision to the applicable implementation plan or through an equally enforceable measure that effects emission reductions equal to or greater than the total of direct and indirect emissions from the action so that there is no net increase in emissions of that pollutant;
- (iv) Where USEPA has not approved a revision to the applicable implementation plan attainment or maintenance demonstration since 1990, the total of direct and indirect emissions from the action for the future years (described in paragraph (C)(4) of this rule) do not increase emissions with respect to the baseline emissions, and:
  - (a) The baseline emissions reflect the historical activity levels that occurred in the geographic area affected by the proposed federal action during:

- (i) Calendar year 1990,
  - (ii) The calendar year that is the basis for the classification (or, where the classification is based on multiple years, the year that is most representative in terms of the level of activity), if a classification is promulgated in 40 CFR Part 81; or
  - (iii) The year of the baseline inventory in the PM<sub>10</sub> applicable implementation plan;
- (b) The baseline emissions are the total of direct and indirect emissions calculated for the future years (described in paragraph (C)(4) of this rule) using the historic activity levels, which are described in paragraph (B)(4)(e)(iv)(a) of this rule, and appropriate emission factors for the future years; or
- (v) Where the action involves regional water or wastewater projects, such projects are sized to meet only the needs of population projections that are in the applicable implementation plan, based on assumptions regarding per capita use that are developed or approved in accordance with paragraph (C)(1) of this rule.

(C) Procedures for conformity determinations of general federal actions.

- (1) The analyses required under this chapter shall be based on the latest planning assumptions.
  - (a) All planning assumptions shall be derived from the estimates of current and future population, employment, travel, and congestion most recently developed by the MPO (including, but not limited to, assumptions regarding per capita water and sewer use, vehicle miles traveled per capita or per household, trip generation per household, vehicle occupancy, household size, vehicle fleet mix, vehicle ownership, wood stoves per household, and the geographic distribution of population growth). The conformity determination shall also be based on the latest assumptions about current and future background concentrations and other federal actions.
  - (b) Any revisions to these estimates used as part of the conformity determination, including projected shifts in geographic location or level of population, employment, travel, and congestion, shall be approved by the MPO or other agency authorized to make such estimates for the area.
- (2) The analyses required under this chapter shall be based on the latest and most accurate emission estimation techniques available as described below, unless such techniques are inappropriate. If such techniques are inappropriate and written approval of the USEPA regional administrator is obtained for any

modification or substitution, then they may be modified or another technique substituted on a case-by-case basis or, where appropriate, on a generic basis for a specific federal agency program.

- (a) For motor vehicle emissions, the most current version of the motor vehicle emissions model specified by USEPA for use in the preparation or revision of implementation plans in the state or area shall be used for the conformity analysis as specified below:
    - (i) The USEPA publishes in the Federal Register a notice of availability of any new motor vehicle emissions model; and
    - (ii) A grace period of three months shall apply during which the motor vehicle emissions model previously specified by USEPA as the most current version may be used. Conformity analyses for which the analysis was begun during the grace period or no more than three years before the Federal Register notice of availability of the latest emission model may continue to use the previous version of the model specified by USEPA, if a final determination as to conformity is made within three years of such analysis.
  - (b) For non-motor vehicle sources, including stationary and area source emissions, the latest emission factors specified by USEPA in the "Compilation of Air Pollutant Emission Factors (AP-42)" shall be used for the conformity analysis unless more accurate emission data are available, such as actual stack test data from stationary sources which are part of the conformity analysis.
- (3) The air quality modeling analyses required under this chapter shall be based on the applicable air quality models, data bases, and other requirements specified in the most recent version of the "Guideline on Air Quality Models" contained in 40 CFR Part 51, Appendix W, unless:
    - (a) The guideline techniques are inappropriate, in which case the model may be modified or another model substituted on a case-by-case basis or, where appropriate, on a generic basis for a specific federal agency program; and
    - (b) Written approval of the USEPA regional administrator is obtained for any modification or substitution.
  - (4) The analyses required under this chapter shall be based on the total of direct and indirect emissions from the action and shall reflect emission scenarios that are expected to occur under each of the following cases:
    - (a) The CAA mandated attainment year or, if applicable, the farthest year for which emissions are projected in the maintenance plan;

- (b) The year during which the total of direct and indirect emissions from the action for each pollutant analyzed is expected to be the greatest on an annual basis; and
- (c) Any year for which the applicable implementation plan specifies an emissions budget.

3745-102-06      **Mitigation of air quality impacts.**

- (A) Any measures that are intended to mitigate air quality impacts shall be identified in the conformity determination, including the identification and quantification of all emission reductions claimed, and the process for implementation, including any necessary funding of such measures and tracking of such emission reductions, and enforcement of such measures shall be described, including an implementation schedule containing explicit timelines for implementation.
- (B) Prior to determining that a federal action is in conformity, the federal agency making the conformity determination shall obtain written commitments from the appropriate persons or agencies to implement any mitigation measures which are identified as conditions for making conformity determinations. Such written commitment shall describe such mitigation measures and the nature of the commitment, in a manner consistent with paragraph (A) of this rule.
- (C) Persons or agencies voluntarily committing to mitigation measures to facilitate positive conformity determinations shall comply with the obligations of such commitments.
- (D) In instances where the federal agency is licensing, permitting or otherwise approving the action of another governmental or private entity, the federal agency shall condition its approval in the conformity determination on the other entity meeting the mitigation measures set forth in the conformity determination, as provided in paragraph (A) of this rule.
- (E) When necessary because of changed circumstances, mitigation measures may be modified so long as the new mitigation measures continue to support the conformity determination in accordance with this rule and with paragraphs (B) and (C) of rule 3745-102-05 of the Administrative Code. Any proposed change in the mitigation measures is subject to the reporting requirements of paragraph (B) of rule 3745-102-04 of the Administrative Code and the public participation requirements of paragraph (C) of rule 3745-102-04 of the Administrative Code.
- (F) The federal agency shall obtain written commitments that mitigation measures will be implemented before the federal agency makes a determination that the project conforms and that such commitments shall be fulfilled.
- (G) After this implementation plan revision is approved by USEPA, any agreements, including mitigation measures, necessary for a conformity determination will be both state and federally enforceable. Enforceability through the applicable implementation plan will apply to all persons who agree to mitigate direct and indirect emissions associated with a federal action for a conformity determination.

## **Chapter 3745-103: Acid Rain Permits and Compliance**

*Contact:* Dana Thompson 614-644-3701  
Dana.Thompson@EPA.State.Oh.US

3745-103-01      **Definitions and incorporation by reference.**

[Comment: For dates of non-regulatory government publications, publications of recognized organizations and associations, federal rules, and federal statutory provisions referenced in this rule, see the last paragraph of this rule titled "Incorporation by reference."]

(A) Except as otherwise provided in this rule, the definitions in rule 3745-15-01 of the Administrative Code shall apply to this chapter.

(B) As used in Chapter 3745-103 of the Administrative Code:

(1) "Acid rain compliance option" means one of the methods of compliance used by an affected unit under the acid rain program as described in a compliance plan submitted and approved in accordance with rules 3745-103-09 and 3745-103-10 of the Administrative Code, rules 3745-103-22 to 3745-103-54 of the Administrative Code, and 40 CFR Part 76.

(2) "Acid rain emissions limitation" means:

(a) For the purposes of sulfur dioxide emissions:

(i) The tonnage equivalent of the allowances authorized to be allocated to the affected units at a source for use in a calendar year; under paragraphs (a)(1), (a)(3), and (h) of section 404 of the Clean Air Act, 42 USC 7401, or the basic phase II allowance allocations authorized to be allocated to an affected unit for use in a calendar year, or the allowances authorized to be allocated to an opt-in source under section 410 of the Clean Air Act for use in a calendar year;

(ii) As adjusted:

(a) By allowances allocated by the USEPA pursuant to section 403, section 405 paragraphs (a)(2), (a)(3), (b)(2), (c)(4), (d)(3), and (h)(2), and section 406 of the Clean Air Act;

(b) By allowances allocated by the USEPA pursuant to 40 CFR Part 72, Subpart D;

(c) By allowance transfers to or from the compliance account for that source that were recorded or properly submitted for recordation by the allowance transfer deadline as provided in 40 CFR 73.35, after deductions and other adjustments are made pursuant to 40 CFR 73.34(c).

- (b) For purposes of nitrogen oxides emissions, the applicable limitation under 40 CFR Part 76.
- (3) "Acid rain emissions reduction requirement" means a requirement under the acid rain program to reduce the emissions of sulfur dioxide or nitrogen oxides from a unit to a specified level or by a specified percentage.
- (4) "Acid rain permit" or "permit" means the legally binding written document or portion of such document, including any permit revision, that is issued by the director under this rule and specifies the acid rain program requirements applicable to an affected source and to the owners and operators and the designated representative of the affected source or the affected unit.
- (5) "Acid rain program" means the national sulfur dioxide and nitrogen oxides air pollution control and emissions reduction program established in accordance with Title IV of the Clean Air Act, rules 3745-103-01 to 3745-103-67 of the Administrative Code, and 40 CFR Parts 73, 74, 75, 76, 77, and 78.
- (6) "Actual SO<sub>2</sub> emissions rate" means the annual average sulfur dioxide emissions rate for the unit (expressed in lb/MMBtu), for the specified calendar year; provided that, if the unit is listed in the National Allowance Data Base (NADB), the "1985 actual SO<sub>2</sub> emissions rate" for the unit shall be the rate specified by the USEPA in the NADB under the data field "SO2RTE."
- (7) "Affected source" means a source that includes one or more affected units.
- (8) "Affected states" means all states:
- (a) Whose air quality may be affected and that are contiguous to the state when a permit, permit modification or permit renewal is being proposed; or
  - (b) That are within fifty miles of the permitted source.
- (9) "Affected unit" means a unit that is subject to any acid rain emissions reduction requirement or acid rain emissions limitation under rule 3745-103-02 or rules 3745-103-22 to 3745-103-54 of the Administrative Code.
- (10) "Allowable SO<sub>2</sub> emissions rate" means the most stringent federally enforceable emissions limitation for sulfur dioxide (in lb/MMBtu) applicable to the unit or combustion source for the specified calendar year, or for such subsequent year as determined by the U.S. EPA where such a limitation does not exist for the specified year; provided that, if a phase I or phase II unit is listed in the NADB, the "1985 allowable SO<sub>2</sub> emission rate" for the phase I or phase II unit shall be the rate specified by the USEPA in the NADB under the data field "1985 annualized boiler SO<sub>2</sub> emission limit."
- (11) "Allowance" means an authorization by the USEPA under the acid rain program to emit up to one ton of sulfur dioxide during or after a specified calendar year.

- (12) "Allowance deduction," or "deduct" when referring to allowances, means the permanent withdrawal of allowances by the USEPA from an allowance tracking system compliance account, to account for the number of tons of SO<sub>2</sub> emissions from the affected units at an affected source for the calendar year, for tonnage emissions estimates calculated for periods of missing data as provided in 40 CFR Part 75, or for any other allowance surrender obligations of the acid rain program.
- (13) "Allowances held" or "hold allowances" means the allowances recorded by the USEPA, or submitted to the USEPA for recordation in accordance with 40 CFR 73.50, in an allowance tracking system account.
- (14) "Allowance transfer deadline" means midnight of March first (or February twenty-ninth in any leap year) or, if such day is not a business day, midnight of the first business day thereafter and is the deadline by which allowances may be submitted for recordation in an affected source's compliance account for the purposes of meeting the source's acid rain emissions limitation requirements for sulfur dioxide for the previous calendar year.
- (15) "Alternative contemporaneous annual emission limitation" means the maximum allowable NO<sub>x</sub> emission rate (on a pound per MMBtu, annual average basis) assigned to an individual unit in a NO<sub>x</sub> emissions averaging plan pursuant to rule 3745-103-63 of the Administrative Code.
- (16) "Alternative technology" means a control technology for reducing NO<sub>x</sub> emissions that is outside the scope of the definition of low NO<sub>x</sub> burner technology. Alternative technology does not include overfire air as applied to wall-fired boilers or separated overfire air as applied to tangentially fired boilers.
- (17) "Approved clean coal technology demonstration project" means a project using funds appropriated under the United States department of energy's "Clean Coal Technology Demonstration Program," up to a total amount of two billion five hundred million dollars for commercial demonstration of clean coal technology, or similar projects funded through appropriations for USEPA. The federal contribution for a qualifying project shall be at least twenty per cent of the total cost of the demonstration project.
- (18) "Arch-fired boiler" means a dry bottom boiler with circular burners, or coal and air pipes, oriented downward and mounted on waterwalls that are at an angle significantly different from the horizontal axis and the vertical axis. This definition shall include only the following units: Holtwood unit 17, Hunlock unit 6, and Sunbury units 1a, 1b, 2a, and 2b. This definition shall exclude dry bottom turbo fired boilers.
- (19) "Authorized account representative" means a responsible natural person who is authorized, in accordance with 40 CFR Part 73, to transfer and otherwise dispose of allowances held in an allowance tracking system general account; or

in the case of a compliance account, the designated representative of the owners or operators of the affected source and the affected units at the source.

- (20) "Basic Phase II allowance allocations" means:
- (a) For calendar years 2000 through 2009 inclusive, allocations of allowances made by the USEPA pursuant to section 403, and paragraphs (b)(1), (3), and (4); (c)(1), (2), (3), and (5); (d)(1), (2), (4), and (5); (e); (f); (g)(1), (2), (3), (4), and (5); (h)(1); (i); and (j) of section 405 of the Clean Air Act.
  - (b) For each calendar year beginning in 2010, allocations of allowances made by the U.S. EPA pursuant to section 403 and paragraphs (b)(1), (3), and (4); (c)(1), (2), (3), and (5); (d)(1), (2), (4), and (5); (e); (f); (g)(1), (2), (3), (4), and (5); (h)(1) and (3); (i); and (j) of section 405 of the Clean Air Act.
- (21) "Boiler" means an enclosed fossil or other fuel-fired combustion device used to produce heat and to transfer heat to recirculating water, steam, or any other medium.
- (22) "Btu" means British thermal unit.
- (23) "Cell burner boiler" means a wall-fired boiler that utilizes two or three circular burners combined into a single vertically oriented assembly that results in a compact, intense flame. Any low NO<sub>x</sub> retrofit of a cell burner boiler that reuses the existing cell burner, close-coupled wall opening configuration would not change the designation of the unit as a cell burner boiler.
- (24) "CEMS" means continuous emission monitoring system.
- (25) "Clean Air Act" means the Clean Air Act Amendments of 1990 contained in 42 USC 7401 through 7671q.
- (26) "CO<sub>2</sub>" means carbon dioxide.
- (27) "Coal" means all solid fuels classified as anthracite, bituminous, subbituminous, or lignite by the American society for testing and materials designation ASTM D388-92 "Standard Classification of Coals by Rank."
- (28) "Coal-derived fuel" means any fuel, whether in a solid, liquid, or gaseous state, produced by the mechanical, thermal, or chemical processing of coal (including, but not limited to, pulverized coal, coal refuse, liquefied or gasified coal, washed coal, chemically cleaned coal, coal-oil mixtures, and coke).
- (29) "Coal-fired" means for all purposes under the acid rain program, except for purposes of applying rules 3745-103-55 to 3745-103-66 of the Administrative Code, the combustion of fuel consisting of coal or any coal-derived fuel (except a coal-derived gaseous fuel that meets the definition of very low sulfur fuel in this rule), alone or in combination with any other fuel, where a unit is coal-fired

if it uses coal or coal-derived fuel as its primary fuel (expressed in MMBtu); provided that, if the unit is listed in the NADB, the primary fuel is the fuel listed in the NADB under the data field PRIMEFUEL.

- (30) "Coal-fired utility unit" means a utility unit in which the combustion of coal (or any coal-derived fuel) on a Btu basis exceeds 50.0 per cent of its annual heat input during the following calendar year: for phase I units, in calendar year 1990; and, for phase II units, in calendar year 1995 or, for a phase II unit that did not combust any fuel that resulted in the generation of electricity in calendar year 1995, in any calendar year during the period 1990-1995. For purposes of applying rules 3745-103-55 to 3745-103-66 of the Administrative Code, this definition shall apply notwithstanding any other definition in this rule.
- (31) "Combustion controls" means technology that minimizes NO<sub>x</sub> formation by staging fuel and combustion air flows in a boiler. This definition shall include low NO<sub>x</sub> burners, overfire air, or low NO<sub>x</sub> burners with overfire air.
- (32) "Combustion source" means a stationary fossil fuel-fired boiler, turbine, or internal combustion engine where the designated representative has submitted or intends to submit an opt-in permit application under rule 3745-103-28 of the Administrative Code to enter into the "opt-in program."
- (33) "Cogeneration unit" means a unit that has equipment used to produce electric energy and forms of useful thermal energy (such as heat or steam) for industrial, commercial, heating, or cooling purposes, through sequential use of energy.
- (34) "Commence commercial operation" means to have begun to generate electricity for sale, including the sale of electricity during testing.
- (35) "Commence construction" means that an owner or operator has either undertaken a continuous program of construction or has entered into a contractual obligation to undertake and complete, within a reasonable time, a continuous program of construction.
- (36) "Commence operation" means to have begun any mechanical, chemical, or electronic process, including start-up of an emissions control technology or emissions monitor or of a unit's combustion chamber.
- (37) "Common stack" means the exhaust of emissions from two or more units through a single flue.
- (38) "Compensating unit" means an affected unit that is not otherwise subject to acid rain emissions limitation or acid rain emissions reduction requirements during phase I and that is designated as a phase I unit in a reduced utilization plan under 40 CFR 72.43; provided that an opt-in source shall not be a compensating unit.

- (39) "Compliance account" means an Allowance Tracking System account, established by the USEPA under 40 CFR 73.31(a), 40 CFR 73.31(b), or 40 CFR 74.40(a) for an affected source and for each affected unit at the source.
- (40) "Compliance certification" means a submission to the USEPA or the director of Ohio environmental protection agency, as appropriate, that is required by this chapter or by 40 CFR Parts 72, 73, 74, 75, 76, 77, or 78, to report an affected source's or an affected unit's compliance or non-compliance with a provision of the acid rain program and that is signed and verified by the designated representative in accordance with rule 3745-103-06 of the Administrative Code, 40 CFR Part 72, Subpart B and Subpart I, and the acid rain program regulations.
- (41) "Compliance plan" means the document submitted for an affected source in accordance with rules 3745-103-07 and 3745-103-08, or 3745-103-41 to 3745-103-51 of the Administrative Code, or 40 CFR Part 76, specifying the method(s) (including one or more acid rain compliance options as provided under rules 3745-103-09 and 3745-103-10 of the Administrative Code or rules 3745-103-41 to 3745-103-51 of the Administrative Code, or 40 CFR Part 76) by which each affected unit at the source will meet the applicable acid rain emissions limitation and acid rain emissions reduction requirements.
- (42) "Compliance use date" means the first calendar year for which an allowance may be used for purposes of meeting a source's acid rain emissions limitation for sulfur dioxide.
- (43) "Conditionally valid data" means data from a continuous monitoring system that are not quality assured, but which may become quality assured if certain conditions are met. Examples of data that may qualify as conditionally valid are:
- (a) Data recorded by an uncertified monitoring system prior to its initial certification; or
  - (b) Data recorded by a certified monitoring system following a significant change to the system that may affect its ability to accurately measure and record emissions.

A monitoring system must pass a probationary calibration error test, in accordance with 40 CFR Part 75, Appendix B, Section 2.1.1, to initiate the conditionally valid data status. In order for conditionally valid emission data to become quality assured, one or more quality assurance tests or diagnostic tests must be passed within a specified time period in accordance with paragraph (b)(3) of 40 CFR 75.20.

- (44) "Construction" means fabrication, erection, or installation of a unit or any portion of a unit.

- (45) "Customer" means a purchaser of electricity not for the purposes of retransmission or resale. For generating rural electric cooperatives, the customers of the distribution cooperatives served by the generating cooperative will be considered customers of the generating cooperative.
- (46) "Demonstration period" means a period of time not less than fifteen months, approved under rule 3745-103-62 of the Administrative Code, for demonstrating that the affected unit cannot meet the applicable emission limitation under rules 3745-103-57, 3745-103-58, or 3745-103-59 of the Administrative Code and establishing the minimum NO<sub>x</sub> emission rate that the unit can achieve during long-term load dispatch operation.
- (47) "Designated representative" means a responsible natural person authorized by the owners and operators of an affected source and of all affected units at the source, as evidenced by a certificate of representation submitted in accordance with 40 CFR Part 72, Subpart B, to represent and legally bind each owner and operator, as a matter of federal law, in matters pertaining to the acid rain program. The term "designated representative" shall be construed to include the alternate designated representative, if any.
- (48) "Diesel fuel" means a low sulfur fuel oil of grades 1-D or 2-D, as defined by the American society for testing and materials ASTM D975-91, "Standard Specification for Diesel Fuel Oils," grades 1-GT or 2-GT, as defined by ASTM D2880-90a, "Standard Specification for Gas Turbine Fuel Oils," or grade one or grade two, as defined by ASTM D396-90a, "Standard Specification for Fuel Oils."
- (49) "Direct public utility ownership" means direct ownership of equipment and facilities by one or more corporations, the principal business of which is sale of electricity to the public at retail. Percentage ownership of such equipment and facilities shall be measured on the basis of book value.
- (50) "Dry bottom" means a boiler has a furnace bottom temperature below the ash melting point and the bottom ash is removed as a solid.
- (51) "Eligible Indian tribe" means any Indian tribe, band, or other organized group or community which is federally recognized as eligible for the special programs and services provided by the United States to Indians because of their status as Indians.
- (52) "Emissions" means air pollutants exhausted from a unit or source into the atmosphere, as measured, recorded, and reported to the USEPA by the designated representative and as determined by the USEPA, in accordance with the emissions monitoring requirements of 40 CFR Part 75.
- (53) "EPA protocol gas" means a calibration gas mixture prepared and analyzed according to section two of the "EPA Traceability Protocol for Assay and Certification of Gaseous Calibration Standards," EPA-600/R97/121.

- (54) "Excess emissions" means:
- (a) Any tonnage of sulfur dioxide emitted by the affected units at an affected source during a calendar year that exceeds the acid rain emissions limitation for sulfur dioxide for the source; and
  - (b) Any tonnage of nitrogen oxide emitted by an affected unit during a calendar year that exceeds the annual tonnage equivalent of the acid rain emissions limitation for nitrogen oxides applicable to the affected unit taking into account the unit's heat input for the year.
- (55) "Existing unit" means a unit (including a unit subject to section 111 of the Clean Air Act) that commenced commercial operation before November 15, 1990 and that on or after November 15, 1990 served a generator with a nameplate capacity of greater than twenty-five MWe. Existing unit does not include simple combustion turbines or any unit that on or after November 15, 1990 served only generators with a nameplate capacity of twenty-five MWe or less. Any existing unit that is modified, reconstructed, or repowered after November 15, 1990, shall continue to be an existing unit.
- (56) "Fast-track modification" means that at the option of the designated representative, the permittee publicizes the proposed permit modifications in a newspaper of general circulation in the area where the source is located or in a state publication and gives notice to the interested parties. The public has thirty days to comment to the Ohio EPA. The permittee submits its proposed modifications to the Ohio EPA, and the agency has thirty days after the close of the comment period to rule on the proposed modifications.
- (57) "Flue gas" means the combustion products arising from the combustion of fossil fuel in a utility boiler.
- (58) "Fossil fuel" means natural gas, petroleum, coal, or any form of solid, liquid, or gaseous fuel derived from such material.
- (59) "Fossil fuel-fired" means the combustion of fossil fuel or any derivative of fossil fuel, alone or in combination with any other fuel, independent of the percentage of fossil fuel consumed in any calendar year (expressed in MMBtu).
- (60) "Fuel flowmeter quality assurance operating quarter" means a unit operating quarter in which the unit combusts the fuel measured by the fuel flowmeter for at least one hundred sixty-eight or more unit operating hours.
- (61) "Fuel oil" means any petroleum-based fuel (including diesel fuel or petroleum derivatives such as oil tar) as defined by the American society for testing and materials in ASTM D396-90a, "Standard Specification for Fuel Oils," and any recycled or blended petroleum products or petroleum by-products used as a fuel whether in a liquid, solid or gaseous state.

(62) "Gas-fired" means:

- (a) For all purposes under the acid rain program, except for 40 CFR Part 75, the combustion of:
  - (i) Natural gas or other gaseous fuel (including coal-derived gaseous fuel), for at least 90.0 per cent of the unit's average annual heat input during the previous three calendar years and for at least 85.0 per cent of the annual heat input in each of those calendar years; and
  - (ii) Any fuel, except coal or solid or liquid coal-derived fuel, for the remaining heat input, if any.
- (b) For purposes of 40 CFR Part 75, the combustion of:
  - (i) Natural gas or other gaseous fuel (including coal-derived fuel) for at least 90.0 per cent of the unit's average annual heat input during the previous three calendar years and for at least 85.0 per cent of the annual heat input in each of those calendar years; and
  - (ii) Fuel oil, for the remaining heat input, if any.
- (c) For purposes of 40 CFR Part 75, a unit may initially qualify as gas-fired if the designated representative demonstrates to the satisfaction of the Ohio EPA that the requirements of paragraph (b) of this definition are met, or will in the future be met, through one of the following submissions:
  - (i) For a unit for which a monitoring plan has not been submitted under 40 CFR 75.62, the designated representative submits either:
    - (a) Fuel usage data for the unit for the three calendar years immediately preceding the date of initial submission of the monitoring for the unit under 40 CFR 75.62; or
    - (b) If a unit does not have fuel usage data for one or more of the three calendar years immediately preceding the date of initial submission of the monitoring for the unit under 40 CFR 75.62, the unit's designated fuel usage; all available fuel usage data (including the percentage of the unit's heat input derived from the combustion of gaseous fuels), beginning with the date on which the unit commenced commercial operation; and the unit's projected fuel usage.
  - (ii) For a unit for which a monitoring plan has already been submitted under 40 CFR 75.62, that has not qualified as gas-fired under paragraph (c)(i) of this definition, and whose fuel usage changes, the designated representative submits either:

- (a) Three calendar years of data following a change in the unit's fuel usage, showing that no less than 90.0 per cent of the unit's average annual heat input during the previous three calendar years, and no less than 85.0 per cent of the unit's annual heat input during any one of the previous three calendar years, if from the combustion of gaseous fuels and the remaining heat input is from the combustion of fuel oil; or
  - (b) A minimum of seven hundred twenty hours of unit operating data following the change in the unit's fuel usage, showing that no less than 90.0 per cent of the unit's heat input is from the combustion of gaseous fuels and the remaining heat input is from the combustion of fuel oil, and a statement that this changed pattern of fuel usage is considered permanent and is projected to continue for the foreseeable future.
  - (iii) If a unit qualifies as gas-fired under paragraphs (c)(i) or (c)(ii) of this definition, the unit is classified as gas-fired as of the date of the submission under such paragraph.
  - (d) For the purpose of 40 CFR Part 75, a unit that initially qualifies as gas-fired under paragraphs (c)(i) or (c)(ii) of this definition must meet the criteria in paragraph (b) of this definition each year in order to continue to qualify as gas-fired. If such a unit combusts only gaseous fuel and fuel oil but fails to meet such criteria for a given year, the unit no longer qualifies as gas-fired starting the day after the first day for which the criteria are not met. If a unit failing to meet the criteria in paragraph (b) of this definition initially qualified as a gas-fired unit under paragraph (c) of this definition, the unit may qualify as a gas-fired unit for a subsequent year only if the designated representative submits the data specified in paragraph (c)(ii)(a) of this definition.
- (63) "Gas manufacturers intermediate standard (GMIS)" means a compressed gas calibration standard that has been assayed and certified by direct comparison to a standard reference material (SRM), an SRM-equivalent PRM, a NIST/EPA-approved certified reference material (CRM), or a NIST traceable reference material (NTRM) in accordance with section 2.1.2.1 of the "EPA Traceability Protocol for Assay and Certification of Gaseous Calibration Standards," EPA-600/R-97/121.
- (64) "Generator" means a device that produces electricity and was or would have been required to be reported as a generating unit pursuant to the United States department of energy form 860 (1990 edition).
- (65) "Generator output capacity" means the full-load continuous rating of a generator under specific conditions as designated by the manufacturer.

- (66) "Group one boiler" means a tangentially fired boiler or a dry bottom wall-fired boiler (other than a unit applying cell burner technology).
- (67) "Group two boiler" means a wet bottom wall-fired boiler, a cyclone boiler, a boiler applying cell burner technology, a vertically fired boiler, an arch-fired boiler, or any other type of utility boiler (such as a fluidized bed or stoker boiler) that is not a group one boiler.
- (68) "Heat input" means the product (expressed in MMBtu per unit of time) of the gross calorific value of the fuel (expressed in Btu per pound) and the fuel feed rate into the combustion device (expressed in mass of fuel per unit of time) and does not include the heat derived from preheated combustion air, recirculated flue gases, or exhaust from other sources.
- (69) "Independent power production facility" or "IPP" means a source that:
- (a) Is nonrecourse project financed, as defined by the secretary of energy at 10 CFR Part 715;
  - (b) Is used for the generation of electricity, eighty per cent or more of which is sold at wholesale; and
  - (c) Is a new unit required to hold allowances under Title IV of the Clean Air Act; provided that direct public utility ownership of the equipment comprising the facility does not exceed fifty per cent.
- (70) "Kacfm" means thousands of cubic feet per minute actual conditions.
- (71) "Kscfh" means thousands of cubic feet per hour at standard conditions.
- (72) "KWH" means kilowatt hour.
- (73) "Life-of-the-unit, firm power contractual arrangement" means a unit participation power sales agreement under which a utility or industrial customer reserves, or is entitled to receive, a specified amount or percentage of nameplate capacity and associated energy generated by any specified generating unit and pays its proportional amount of such unit's total costs, pursuant to a contract:
- (a) For the life of the unit;
  - (b) For a cumulative term of no less than thirty years, including contracts that permit an election for early termination; or
  - (c) For a period equal to or greater than twenty-five years or seventy per cent of the economic useful life of the unit, determined as of the time the unit was built, with option rights to purchase or release some portion of the nameplate capacity and associated energy generated by the unit at the end of the period.

- (74) "Low NO<sub>x</sub> burners" and "low NO<sub>x</sub> burner technology" means commercially available combustion modification NO<sub>x</sub> controls that minimize NO<sub>x</sub> formation by introducing coal and its associated combustion air into a boiler such that initial combustion occurs in a manner that promotes rapid coal devolatilization in a fuel-rich (i.e., oxygen deficient) environment and introduces additional air to achieve a final fuel-lean (i.e., oxygen rich) environment to complete the combustion process. This definition shall include the staging of any portion of the combustion air using air nozzles or registers located inside any waterwall hole that includes a burner. This definition shall exclude the staging of any portion of the combustion air using air nozzles or ports located outside any waterwall hole that includes a burner (commonly referred to as NO<sub>x</sub> ports or separated overfire air ports).
- (75) "Maximum continuous steam flow at one hundred per cent of load" means the maximum capacity of a boiler as reported in item three (maximum continuous steam flow at one hundred per cent load in thousand pounds per hour), section C (design parameters), part iii (boiler information) of the United States department of energy's form EIA-767 for 1995.
- (76) "MMBtu" means million Btu.
- (77) "MWe" means megawatt electrical.
- (78) "Nameplate capacity" means the maximum electrical generating output (expressed in MWe) that a generator can sustain over a specified period of time when not restricted by seasonal or other deratings, as listed in the NADB under the data field "NAMECAP" if the generator is listed in the NADB or as measured in accordance with the United States department of energy standards if the generator is not listed in the NADB.
- (79) "National allowance data base" or "NADB" means the data base established under section 402 (4)(c) of the Clean Air Act.
- (80) "Natural gas" means a naturally occurring fluid mixture of hydrocarbons (e.g., methane, ethane, or propane), produced in geological formations beneath the earth's surface, that maintains a gaseous state at standard atmospheric temperature and pressure, under ordinary conditions. Natural gas contains 20.0 grains or less of total sulfur per one hundred standard cubic feet. Additionally natural gas must either be composed of at least seventy per cent methane by volume or have a gross calorific value between nine hundred fifty and one thousand one hundred Btu per standard cubic foot. Natural gas does not include the following gaseous fuels: landfill gas, digester gas, refinery gas, sour gas, blast furnace gas, coal-derived gas, producer gas, coke oven gas, or any gaseous fuel produced in a process which might result in highly variable sulfur content or heating value.

- (81) "New unit" means a unit that commences commercial operation on or after November 15, 1990, including any such unit that serves a generator with a nameplate capacity of twenty-five MWe or less or that is a simple combustion turbine.
- (82) "NIST" means national institute of standards and technology.
- (83) "NIST traceable reference material (NTRM)" means a calibration gas mixture tested by and certified by the national institutes of standards and technologies (NIST) to have a certain specified concentration of gases. NTRMs may have different concentrations from those of standard reference materials.
- (84) "Non-plug-in combustion controls" means the replacement, in a cell burner boiler, of the portions of the waterwalls containing the cell burners by new portions of the waterwalls containing low NO<sub>x</sub> burners or low NO<sub>x</sub> burners with overfire air.
- (85) "Oil-fired" means:
- (a) For all purposes under the acid rain program, except for 40 CFR Part 75 the combustion of:
    - (i) Fuel oil for more than ten per cent of the average annual heat input during the previous three calendar years or for more than fifteen per cent of the annual heat input in any one of those calendar years; and any solid, liquid, or gaseous fuel, other than coal or any other coal-derived fuel (except a coal-derived gaseous fuel with a sulfur content no greater than natural gas), for the remaining heat input, if any.
    - (ii) Any solid, liquid or gaseous fuel (including coal-derived gaseous fuel), other than coal or any other coal-derived gaseous fuel), for the remaining heat input, if any.
  - (b) For the purpose of 40 CFR Part 75, combustion of only fuel oil and gaseous fuels, provided that the unit involved does not meet the definition of gas fired.
- (86) "Operating" when referring to a combustion or process source seeking entry into the "Opt-in Program," means that the source had documented consumption of fuel input for more than eight hundred seventy-six hours in the six months immediately preceding the submission of a combustion source's opt-in application under paragraph (A) of rule 3745-103-29 of the Administrative Code.
- (87) "Operating period" means a period of time of not less than three consecutive months and that occurs not more than one month prior to applying for an alternative emission limitation demonstration period under rule 3745-103-62 of

the Administrative Code, during which the owner or operator of an affected unit that cannot meet the applicable emission limitation:

- (a) Operates the installed NO<sub>x</sub> emission controls in accordance with primary vendor specifications and procedures, with the unit operating under normal conditions; and
  - (b) Records and reports quality-assured continuous emission monitoring (CEM) and unit operating data according to the methods and procedures in 40 CFR Part 75.
- (88) "Operating permit" means a permit issued under 40 CFR Part 70 and any other regulations implementing Title V of the Clean Air Act.
- (89) "Opt- in" or "opt into" means to elect to become an affected unit under the acid rain program through the issuance of the final effective opt-in permit under rule 3745-103-28 of the Administrative Code.
- (90) "Opt-in permit" means the legally binding written document that is contained within the acid rain permit and sets forth the requirements under rule 3745-103-29 of the Administrative Code for a combustion source or rule 3745-103-30 of the Administrative Code for a process source that opts into the acid rain program.
- (91) "Opt-in source" means a combustion source or process source that has elected to become an affected unit under the acid rain program and whose opt-in permit has been issued and is in effect.
- (92) "Owner" means any of the following persons:
- (a) Any holder of any portion of the legal or equitable title in an affected unit or in a combustion source or process source;
  - (b) Any holder of a leasehold interest in an affected unit or in a combustion source or process source; or
  - (c) Any purchaser of power from an affected unit or from a combustion source or process source under a life-of-the-unit, firm power contractual arrangement as the term is defined herein and used in section 408 (i) of the Clean Air Act. However, unless expressly provided for in a leasehold agreement, owner shall not include a passive lessor, or a person who has an equitable interest through such lessor, whose rental payments are not based, either directly or indirectly, upon the revenues or income from the affected unit; or
  - (d) With respect to any allowance tracking system general account, any person identified in the submission required by 40 CFR 73.31(c) that is subject to

the binding agreement for the authorized account representative to represent that person's ownership interest with respect to allowances.

- (93) "Operator" means any person who is an owner or who operates, controls, or supervises an affected unit or affected source and shall include, but not be limited to, any holding company, utility system, or plant manager of an affected unit or affected source, combustion source, or process source.
- (94) "Ozone season" means the period of time beginning May first of a year and ending on September thirtieth of the same year, inclusive.
- (95) "Peaking unit" means:
- (a) A unit that has:
    - (i) An average capacity factor of no more than 10.0 per cent during the previous three calendar years; and
    - (ii) A capacity factor of no more than 20.0 per cent in each of those calendar years.
  - (b) For the purpose of 40 CFR Part 75, a unit may initially qualify as a peaking unit if the designated representative demonstrates to the satisfaction of the director that the requirements of paragraph (a) of this definition are met, or will in the future be met, through one of the following submissions:
    - (i) For a unit for which a monitoring plan has not been submitted under 40 CFR 75.62, the designated representative submits either:
      - (a) Capacity factor data for the unit for the three calendar years immediately preceding the date of initial submission of the monitoring plan for the unit under 40 CFR 75.62; or
      - (b) If unit does not have capacity factor data for one or more of the three years immediately preceding the date of initial submission of the monitoring plan for the unit under 40 CFR 75.62, all available capacity factor data, beginning with the date on which the unit commenced commercial operation; and projected capacity factor data.
    - (ii) For a unit for which a monitoring plan has already been submitted under 40 CFR 75.62, that has not qualified as a peaking unit under paragraph (b)(i) of this definition, and where the capacity factor changes, the designated representative submits either:
      - (a) Three calendar years of data following the change in the units capacity factor showing an average capacity factor of no more than 10.0 per cent during the three previous calendar years and a

capacity factor of no more than 20.0 per cent for each of those years; or

- (b) One calendar year of data following the change in the units capacity factor showing a capacity factor of no more than 10.0 percent and a statement that this changed pattern of operation resulting in a capacity factor less than 10.0 per cent is considered permanent and is projected to continue for the foreseeable future.
- (c) For the purpose of 40 CFR Part 75, a unit that initially qualifies as a peaking unit must meet the criteria in paragraph (a) of this definition each year in order to continue to qualify as a peaking unit. If such a unit fails to meet such criteria for a given year, the unit no longer qualifies as a peaking unit starting January first of the year after the year for which the criteria are not met. If a unit failing to meet the criteria in paragraph (a) of this definition initially qualified as a peaking unit under paragraph (b) of this definition, the unit may qualify as a peaking unit for a subsequent year only if the designated representative submits the data specified in paragraph (b)(ii)(a) of this definition.
- (d) A unit required to comply with the provisions of 40 CFR Part 75, Subpart H, under a State or Federal NO<sub>x</sub> mass emissions reduction program, may, pursuant to 40 CFR 75.74(c)(11), qualify as a peaking unit on an ozone season basis rather than an annual basis, if the owner or operator reports NO<sub>x</sub> mass emissions and heat input data only during the ozone season.
- (96) "Permitting authority" means the Ohio EPA, local agency, other state agency, or other agency authorized by the director to administer acid rain permits under rule 3745-103-13 of the Administrative Code.
- (97) "Permit revision" means a permit modification, fast track modification, administrative permit amendment, or automatic permit amendment, as provided in rules 3745-103-16 to 3745-103-19 of the Administrative Code.
- (98) "Phase I" means the acid rain program beginning January 1, 1995 and ending December 31, 1999.
- (99) "Phase I unit" means any affected unit, except an affected unit under rules 3745-103-22 to 3745-103-54 of the Administrative Code, that is subject to an acid rain emissions reduction requirement or acid rain emissions limitations beginning in phase I; or any unit exempt under rule 3745-103-04 of the Administrative Code that, but for such exemption, would be subject to an acid rain emissions limitation beginning in phase I.
- (100) "Phase II" means the acid rain program period beginning January 1, 2000, and continuing into the future thereafter.

- (101) "Phase II unit" means any affected unit, except an affected unit under rules 3745-103-22 to 3745-103-54 of the Administrative Code, that is subject to an acid rain emissions reduction requirement or acid rain emissions limitation during phase II only.
- (102) "Pipeline natural gas" means a naturally occurring fluid mixture of hydrocarbons (e.g., methane, ethane, or propane) produced in geological formations beneath the Earth's surface that maintains a gaseous state at standard atmospheric temperature and pressure under ordinary conditions, and which is provided by a supplier through a pipeline. Pipeline natural gas contains 0.5 grains or less of total sulfur per one hundred standard cubic feet. Additionally, pipeline natural gas must either be composed of at least seventy per cent methane by volume or have a gross calorific value between nine hundred fifty and eleven hundred Btu per standard cubic foot.
- (103) "Plug-in combustion controls" means the replacement, in a cell burner boiler, of existing cell burners by low NO<sub>x</sub> burners or low NO<sub>x</sub> burners with overfire air.
- (104) "Potential electrical output capacity" means the MWe capacity rating for the units which shall be equal to thirty-three per cent of the maximum design heat input capacity of the steam generating unit, as calculated according to 40 CFR Part 72, Appendix D.
- (105) "Power distribution system" means the portion of an electricity grid owned or operated by a utility that is dedicated to delivering electric energy to customers.
- (106) "Power purchase commitment" means a commitment or obligation of a utility to purchase electric power from a facility pursuant to:
- (a) A power sales agreement;
  - (b) A state regulatory authority order requiring a utility to:
    - (i) Enter into a power sales agreement with the facility;
    - (ii) Purchase from the facility; or
    - (iii) Enter into arbitration concerning the facility for the purpose of establishing terms and conditions of the utility's purchase of power;
  - (c) A letter of intent or similar instrument committing to purchase power (actual electrical output or generator output capacity) from the source at a previously offered or lower price and a power sales agreement applicable to the source is executed within the time frame established by the terms of the letter of intent, but no later than November 15, 1993 or, where the letter of intent does not specify a time frame, a power sales agreement applicable to the source is executed on or before November 15, 1993; or

- (d) A utility competitive bid solicitation that resulted in the selection of the qualifying facility or independent power production facility as the winning bidder.
- (107) "Power sales agreement" means a legally binding agreement between a QF, IPP, or firm associated with such facility and a regulated electric utility that establishes the terms and conditions for the sale of power from the facility to the utility.
- (108) "Primary fuel" or "primary fuel supply" means the main fuel type (expressed in MMBtu) consumed by an affected unit for the applicable calendar year.
- (109) "Primary vendor" means the vendor of the NO<sub>x</sub> emission control system who has primary responsibility for providing the equipment, service, and technical expertise necessary for detailed design, installation, and operation of the controls, including process data, mechanical drawings, operating manuals, or any combination thereof.
- (110) "Probationary calibration error test" means an on-line calibration error test performed in accordance with 40 CFR Part 75, Appendix B, Section 2.1.1, that is used to initiate a conditionally valid data period.
- (111) "QA operating quarter" means a calendar quarter in which there are at least one hundred sixty-eight unit operating hours or, for a common stack or bypass stack or bypass stack, a calendar quarter in which there are at least one hundred sixty-eight stack operating hours.
- (112) "Qualifying facility" or "QF" means a qualifying small power production facility within the meaning of section 3(17)(C) of the Federal Power Act or a qualifying cogeneration facility within the meaning of section 3(18)(B) of the Federal Power Act.
- (113) "Qualifying power purchase commitment" means a power purchase commitment in effect as of November 15, 1990, without regard to changes to that commitment so long as:
- (a) The identity of the electric output purchaser, or the identity of the steam purchaser and the location of the facility, remain unchanged as of the date the facility commences commercial operation; and
  - (b) The terms and conditions of the power purchase commitment are not changed in such a way as to allow the costs of compliance with the acid rain program to be shifted to the purchaser.
- (114) "Qualifying repowering technology" means replacement of an existing coal-fired boiler with one of the following clean coal technologies: atmospheric or

pressurized fluidized bed combustion, integrated gasification combined cycle, magnetohydrodynamics, direct and indirect coal-fired turbines, integrated gasification fuel cells, or as determined by the USEPA, in consultation with the secretary of energy, a derivative of one or more of these technologies, and any other technology capable of controlling multiple combustion emissions simultaneously with improved boiler or generation efficiency and with significantly greater waste reduction relative to the performance of technology in widespread commercial use as of November 15, 1990.

- (115) "RATA" means relative accuracy test audit.
- (116) "Reburning" means reducing the coal and combustion air to the main burners and injecting a reburn fuel (such as gas or oil) to create a fuel-rich secondary combustion zone above the main burner zone and final combustion air to create a fuel-lean burnout zone. The formation of NO<sub>x</sub> is inhibited in the main burner zone due to the reduced combustion intensity, and NO<sub>x</sub> is destroyed in the fuel-rich secondary combustion zone by conversion to molecular nitrogen.
- (117) "Reduced utilization" means a reduction, during any calendar year in phase I, in the heat input (expressed in MMBtu for the calendar year) at a phase I unit below the unit's baseline, where such reduction subjects the unit to the requirement to submit a reduced utilization plan under 40 CFR 72.43; or, in the case of an opt-in source, means a reduction in the average utilization, as specified in rule 3745-103-45 of the Administrative Code, of an opt-in source below the opt-in source's baseline.
- (118) "Replacement unit" means an affected unit replacing the thermal energy provided by an opt-in source, where both the affected unit and the opt-in source are governed by a thermal energy plan.
- (119) "Repowering extension" means owners or operators of certain affected units, which must have been operating in 1985 or before with 1985 SO<sub>2</sub> emission rates of 1.2 pounds per MMBtu or greater, may apply for additional phase II allowance allocations for up to four years (the extension period) in exchange for replacing existing boiler technology with new USEPA approved clean coal technology.
- (120) "Research gas mixture (RGM)" means a calibration gas mixture developed by agreement of a requestor and NIST that NIST analyzes and certifies as "NIST traceable." RGM may have concentrations different from those of standard reference materials.
- (121) "Schedule of compliance" means an enforceable sequence of actions, measures, or operations designed to achieve or maintain compliance, or correct non-compliance, with an applicable requirement of the acid rain program, including any applicable acid rain permit requirement.

- (122) "Selective catalytic reduction" means a noncombustion control technology that destroys NO<sub>x</sub> by injecting a reducing agent (e.g., ammonia) into the flue gas that, in the presence of a catalyst (e.g., vanadium, titanium, or zeolite), converts NO<sub>x</sub> into molecular nitrogen and water.
- (123) "Selective noncatalytic reduction" means a noncombustion control technology that destroys NO<sub>x</sub> by injecting a reducing agent (e.g., ammonia, urea, or cyanuric acid) into the flue gas, downstream of the combustion zone that converts NO<sub>x</sub> to molecular nitrogen, water, and when urea or cyanuric acid are used, to carbon dioxide (CO<sub>2</sub>).
- (124) "Simple combustion turbine" means a unit that is a rotary engine driven by a gas under pressure that is created by the combustion of any fuel. This term includes combined cycle units without auxiliary firing. This term excludes combined cycle units with auxiliary firing, unless the unit did not use the auxiliary firing from 1985 through 1987 and does not use auxiliary firing at any time after November 15, 1990.
- (125) "Solid waste incinerator" means a distinct operating unit of any facility which combusts any solid waste material from commercial or industrial establishments or the general public, including single and multiple residences, hotels, and motels.
- (126) "SO2RTE" means a data field listed in the national allowance data base which represents the 1985 boiler SO<sub>2</sub> emission rate expressed in pounds per MMBtu.
- (127) "SO<sub>2</sub>" means sulfur dioxide.
- (128) "Source" means any governmental, institutional, commercial, or industrial structure, installation, plant, building, or facility that emits or has the potential to emit any regulated air pollutant under the Act, provided that one or more combustion or process sources that have, under paragraph (C) of rule 3745-103-25 of the Administrative Code, a different designated representative than the designated representative for one or more affected utility units at a source shall be treated as being included in a separate source from the source that includes such utility units for purposes of 40 CFR Parts 72 through 78, but shall be treated as being included in the same source as the source that includes such utility units for purposes of section 502(c) of the Clean Air Act. For purposes of this rule, a "source," including a "source" with multiple units, shall be considered a single "facility."
- (129) "Span" means the highest pollutant or diluent concentration or flow rate that a monitor component is required to be capable of measuring under 40 CFR Part 75.
- (130) "Stack operating hour" means a clock hour during which flue gases flow through a particular stack or duct (either for the entire hour or for part of the hour) while the associated unit(s) are combusting fuel.

- (131) "Standard reference material-equivalent compressed gas primary reference material (SRM-equivalent PRM)" means those gas mixtures listed in a declaration of equivalence in accordance with section 2.1.2 of the "EPA Traceability Protocol for Assay and Certification of Gaseous Calibration Standards," EPA-600/R-97/121.
- (132) "State" means one of the forty-eight contiguous states and the District of Columbia and includes any non-federal authorities, including local agencies, interstate associations, and state-wide agencies with approved state operating permit programs. The term "state" shall have its conventional meaning where such meaning is clear from the context.
- (133) "State operating permit program" means an operating permit program that the USEPA has approved under 40 CFR Part 70.
- (134) "Stationary gas turbine" means a turbine that is not self-propelled and that combusts natural gas, other gaseous fuel with a total sulfur content no greater than the total sulfur content of natural gas, or fuel oil in order to heat inlet combustion air and thereby turn a turbine in addition to or instead of producing steam or heating water.
- (135) "Stoker boiler" means a boiler that burns solid fuel in a bed, on a stationary or moving grate, that is located at the bottom of the furnace.
- (136) "Sulfur-free generation" means the generation of electricity by a process that does not have any emissions of sulfur dioxide, including hydroelectric, nuclear, solar, and wind generation.
- (137) "Submit" or "serve" means to send or transmit a document, information, or correspondence to the person specified in accordance with the applicable regulations:
- (a) In person;
  - (b) By United States postal service; or
  - (c) By other equivalent means of dispatch, or transmission, and delivery.
- Compliance with any submission, service, or mailing deadline shall be determined by the date of dispatch, transmission, or mailing and not the date of receipt.
- (138) "Sulfur-free generator" means a generator that produces such sulfur-free generation.
- (139) "Tangentially fired boiler" means a boiler that has coal and air nozzles mounted in each corner of the furnace where the vertical furnace walls meet.

Both pulverized coal and air are directed from the furnace corners along a line tangential to a circle lying in a horizontal plane of the furnace.

- (140) "Thermal energy" means the thermal output produced by a combustion source used directly as part of a manufacturing process but not used to produce electricity.
- (141) "Ton" or "tonnage" means any short ton (i.e., two thousand pounds). For the purpose of determining compliance with the acid rain emissions limitations and reduction requirements, total tons for a year shall be calculated as the sum of all recorded hourly emissions (or the tonnage equivalent of the recorded hourly emissions rates) in accordance with 40 CFR Part 75, with any remaining fraction of a ton equal to or greater than 0.50 ton deemed to equal one ton and any fraction of a ton less than 0.50 ton deemed not to equal a ton.
- (142) "Total installed net output capacity" means the generator output capacity, excluding that portion of the electrical power actually used at the power production facility, as installed.
- (143) "Total planned net output capacity" means the planned generator output capacity, excluding that portion of the electrical power which is designed to be used at the power production facility, as specified under one or more qualifying power purchase commitments or contemporaneous documents as of November 15, 1990.
- (144) "Turbo-fired boiler" means a pulverized coal, wall-fired boiler with burners arranged on walls so that the individual flames extend down toward the furnace bottom and then turn back up through the center of the furnace.
- (145) "Unit" means a fossil fuel-fired combustion device.
- (146) "Unit operating hour" means a clock hour during which a unit combusts any fuel, either for part of the hour or for the entire hour.
- (147) "USEPA" means the United States environmental protection agency.
- (148) "Utility" means any person that sells electricity.
- (149) "Utility competitive bid solicitation" is a public request from a regulated utility for offers to the utility for meeting future generating needs. A qualifying facility, independent power production facility, or new IPP may be regarded as having been selected in such solicitation if the utility has named the facility as a project with which the utility intends to negotiate a power sales agreement.
- (150) "Utility system" means all interconnected units and generators operated by the same utility operating company as reported in the NADB under the data field "UTILNAME."

- (151) "Utility unit" means a unit owned or operated by a utility:
- (a) That serves a generator in any state that produces electricity for sale; or
  - (b) That during 1985, served a generator in any state that produced electricity for sale.
  - (c) Notwithstanding paragraphs (a) and (b) of this definition, a unit that was in operation during 1985, but did not serve a generator that produced electricity for sale during 1985, and did not commence commercial operation on or after November 15, 1990 is not a utility unit for purposes of the acid rain program.
  - (d) Notwithstanding paragraphs (a) and (b) of this definition, a unit that cogenerates steam and electricity is not a utility unit for purposes of the acid rain program, unless the unit is constructed for the purpose of supplying, or commences construction after November 15, 1990 and supplies, more than one-third of its potential electrical output capacity and more than twenty-five MWe output to any power distribution system for sale.
- (152) "Vertically fired boiler" means a dry bottom boiler with circular burners, or coal and air pipes, oriented downward and mounted on waterwalls that are horizontal or at an angle. This definition shall include dry bottom roof-fired boilers and dry bottom top-fired boilers, and shall exclude dry bottom arch-fired boilers and dry bottom turbo-fired boilers.
- (153) "Very low sulfur fuel" means either:
- (a) A fuel with a total sulfur content no greater than five hundredths per cent by weight;
  - (b) Natural gas or pipeline natural gas, as defined in this rule; or
  - (c) Any gaseous fuel with a total sulfur content no greater than twenty grains of sulfur per one hundred standard cubic feet.
- (154) "Wall-fired boiler" means a boiler that has pulverized coal burners arranged on the walls of the furnace. The burners have discrete, individual flames that extend perpendicularly into the furnace area.
- (155) "Wet bottom" means that the ash is removed from the furnace in a molten state.
- (156) "Wet bottom boiler" shall include: wet bottom wall-fired boilers, including wet bottom turbo-fired boilers; and wet bottom boilers otherwise meeting the definition of vertically fired boilers, including wet bottom arch-fired boilers, wet bottom roof-fired boilers, and wet bottom top-fired boilers. The term "wet bottom boiler" shall exclude cyclone boilers and tangentially fired boilers.

(157) "Zero air material" means either:

- (a) A calibration gas certified by the gas vendor not to contain concentrations of SO<sub>2</sub>, NO<sub>x</sub>, or total hydrocarbons above one tenth part per million, a concentration of CO above one part per million, or a concentration of CO<sub>2</sub> above four hundred parts per million;
  - (b) Ambient air conditioned and purified by a CEMS for which the CEMS manufacturer or vendor certifies that the particular CEMS model produces conditioned gas that does not contain concentrations of SO<sub>2</sub>, NO<sub>x</sub>, or total hydrocarbons above one tenth part per million, a concentration of CO above one part per million, or a concentration of CO<sub>2</sub> above four hundred parts per million.
  - (c) For dilution-type CEMS, conditioned and purified ambient air provided by a conditioning system concurrently supplying dilution air to the CEMS; or
  - (d) A multicomponent mixture certified by the supplier of the mixture that the concentration of the component being zeroed is less than or equal to the applicable concentration specified in paragraph (a) of this definition, and that the mixture's other components do not interfere with the CEMS readings.
- (C) Incorporation by reference. This chapter includes references to certain matter or materials. The text of the incorporated material is not included in the regulations contained in this chapter. For materials subject to change, only the specific version specified in the regulation is incorporated. Material is incorporated as it exists on the effective date of this rule. Except for subsequent annual publication of existing (unmodified) Code of Federal Regulation compilations, any amendment or revision to a referenced document is not incorporated unless and until this rule has been amended to specify the new dates.

(1) Availability. The materials incorporated by reference are available as follows:

- (a) American Society for Testing and Materials. Information and copies may be obtained by writing to: "ASTM International, 100 Bar Harbor Drive, P.O. Box C700, West Conshohocken, Pennsylvania 19426-2959." These documents are available for purchase at [www.astm.org](http://www.astm.org). ASTM documents are also generally available at local public libraries and "The State Library of Ohio."
- (b) The American Society of Mechanical Engineers. Information and copies may be obtained by writing to: "ASME International, Three Park Ave., New York, NY 10016." These documents are also available for purchase at [www.asme.org](http://www.asme.org). ASME documents are also generally available at local public libraries and "The State Library of Ohio."

- (c) Clean Air Act. Information and copies may be obtained by writing to: "Superintendent of Documents, Attn: New Orders, PO Box 371954, Pittsburgh, PA 15250-7954." The full text of the Act as amended in 1990 is also available in electronic format at [www.epa.gov/oar/caa/](http://www.epa.gov/oar/caa/). A copy of the Act is also available for inspection and copying at most public libraries and "The State Library of Ohio."
- (d) Code of Federal Regulations. Information and copies may be obtained by writing to: "Superintendent of Documents, Attn: New Orders, PO Box 371954, Pittsburgh, PA 15250-7954." The full text of the C.F.R. is also available in electronic format at [www.access.gpo.gov/nara/cfr/index.html](http://www.access.gpo.gov/nara/cfr/index.html). The CFR compilations are also available for inspection and copying at most public libraries and "The State Library of Ohio."
- (e) EIA-767 (2004); "Steam-Electric Plant Operation and Design Report;" Information and copies may be obtained by writing to: "Energy Information Administration, 1000 Independence Ave, SW, Washington, DC 20585." The report is also available in electronic format at <http://www.eia.doe.gov/cneaf/electricity/forms/help/eis767help.html>. A copy of the Protocol is also available for inspection and copying at most public libraries and "The State Library of Ohio."

Prior Effective Dates: 6/27/2002, 9/10/1997

3745-103-02      **Applicability.**

[Comment: For dates of non-regulatory government publications, publications of recognized organizations and associations, federal rules, and federal statutory provisions referenced in this rule, see the last paragraph of rule 3745-103-01 of the Administrative Code titled "Incorporation by reference."]

(A) Each of the following units shall be an affected unit, and any source that includes such a unit shall be an affected source, subject to the requirements of the acid rain program:

- (1) A unit listed in Table 1 of 40 CFR 73.10(a).
- (2) An existing unit that is identified in Table 2 or 3 of 40 CFR 73.10 and any other existing utility unit, except a unit under paragraph (B) of this rule.
- (3) A utility unit, except a unit under paragraph (B) of this rule, that:
  - (a) Is a new unit; or
  - (b) Did not serve a generator with a nameplate capacity greater than twenty-five MWe on November 15, 1990 but serves such a generator after November 15, 1990.
  - (c) Was a simple combustion turbine on November 15, 1990 but adds or uses auxiliary firing after November 15, 1990;
  - (d) Was an exempt cogeneration facility under paragraph (B)(4) of this rule but during any three calendar year period after November 15, 1990 sold, to a utility power distribution system, an annual average of more than one-third of its potential electrical output capacity and more than two hundred nineteen thousand MWe-hrs electric output, on a gross basis;
  - (e) Was an exempt qualifying facility under paragraph (B)(5) of this rule but, at any time after the later of November 15, 1990 or the date the facility commences commercial operation, fails to meet the definition of qualifying facility;
  - (f) Was an exempt independent power production facility under paragraph (B)(6) of this rule but, at any time after the later of November 15, 1990 or the date the facility commences commercial operation, fails to meet the definition of independent power production facility; or

- (g) Was an exempt solid waste incinerator under paragraph (B)(7) of this rule but during any three calendar year period after November 15, 1990 consumes twenty per cent or more (on a Btu basis) fossil fuel.
- (B) The following types of units are not affected units subject to the requirements of the acid rain program:
- (1) Any simple combustion turbine that commenced commercial operation before November 15, 1990.
  - (2) Any unit that commenced commercial operation before November 15, 1990 and that did not, as of November 15, 1990, and does not currently, serve a generator with a nameplate capacity of greater than twenty-five MWe.
  - (3) Any unit that, during 1985, did not serve a generator that produced electricity for sale and that did not, as of November 15, 1990, and does not currently, serve a generator that produces electricity for sale.
  - (4) Any cogeneration facility which:
    - (a) For a unit that commenced construction on or prior to November 15, 1990, was constructed for the purpose of supplying equal to or less than one-third its potential electrical output capacity equal or two hundred nineteen thousand MWe-hrs actual electric output on an annual basis to any utility power distribution system for sale (on a gross basis). If the purpose of construction is not known, it will be presumed to be consistent with the actual operation from 1985 through 1987. However, if in any three calendar year period after November 15, 1990, such unit sells to a utility power distribution system an annual average of more than one-third of its potential electrical output capacity and more than two hundred nineteen thousand MWe-hrs actual electric output (on a gross basis), that unit shall be an affected unit, subject to the requirements of the acid rain program; or
    - (b) For units that commenced construction after November 15, 1990, supplies equal to or less than one-third its potential electrical output capacity or equal to or less than two hundred nineteen thousand MWe-hrs actual electric output on an annual basis to any utility power distribution system for sale (on a gross basis). However, if in any three calendar year period after November 15, 1990, such unit sells to a utility power distribution system an annual average of more than one-third of its potential electrical output capacity and more than two hundred nineteen thousand MWe-hrs actual electric output (on a gross basis), that unit shall be an affected unit, subject to the requirements of the acid rain program.
  - (5) A qualifying facility that:

- (a) Has, as of November 15, 1990, one or more qualifying power purchase commitments to sell at least fifteen per cent of its total planned net output capacity; and
  - (b) Consists of one or more units designated by the owner or operator with total installed net output capacity not exceeding one hundred thirty per cent of the total planned net output capacity. If the emissions rates of the units are not the same, the USEPA may exercise discretion to designate which units are exempt.
- (6) An independent power production facility that:
- (a) Has, as of November 15, 1990, one or more qualifying power purchase commitments to sell at least fifteen per cent of its total planned net output capacity; and
  - (b) Consists of one or more units designated by the owner or operator with total installed net output capacity not exceeding one hundred thirty per cent of its total planned net output capacity. If the emissions rates of the units are not the same, the USEPA may exercise discretion to designate which units are exempt.
- (7) A solid waste incinerator, if more than eighty per cent (on a Btu basis) of the annual fuel consumed at such incinerator is other than fossil fuels. For solid waste incinerators which began operation before January 1, 1985, the average annual fuel consumption of non-fossil fuels for calendar years 1985 through 1987 must be greater than eighty per cent for such an incinerator to be exempt. For solid waste incinerators which began operation after January 1, 1985, the average annual fuel consumption of non-fossil fuels for the first three years of operation must be greater than eighty per cent for such an incinerator to be exempt. If, during any three calendar year period after November 15, 1990, such incinerator consume twenty per cent or more (on a Btu basis) fossil fuel, such incinerator will be an affected source under the acid rain program.
- (8) A non-utility unit.
- (9) A unit for which an exemption under rule 3745-103-03 or 3745-103-04 of the Administrative Code is in effect. Although such a unit is not an affected unit, the unit shall be subject to the requirements of rule 3745-103-03 or 3745-103-04, of the Administrative Code, as applicable to the exemption.
- (C) A certifying official of an owner or operator of any unit may petition the USEPA for a determination of applicability under this rule.
- (1) Petition content. The petition shall be in writing and include identification of the unit and relevant facts about the unit. In the petition, the certifying official shall

certify, by his or her signature, the statement set forth in paragraph (A)(2)(b) of rule 3745-103-06 of the Administrative Code. Within ten business days of receipt of any written determination by the USEPA covering the unit, the certifying official shall provide each owner or operator of the unit, facility, or source with a copy of the petition and a copy of the USEPA's response.

- (2) Timing. The petition may be submitted to the USEPA at any time but, if possible, should be submitted prior to the issuance (including renewal) of a phase II acid rain permit for the unit.

Prior Effective Dates: 6/27/2002, 9/10/1997

3745-103-03      **New units exemption.**

[Comment: For dates of non-regulatory government publications, publications of recognized organizations and associations, federal rules, and federal statutory provisions referenced in this rule, see the last paragraph of rule 3745-103-01 of the Administrative Code titled "Incorporation by reference."]

(A) Applicability. This rule applies to any new utility unit that has not previously lost an exemption and:

- (1) Serves during the entire year (except for any period before the unit commenced commercial operation) one or more generators with total nameplate capacity of twenty-five MWe or less;
- (2) Burns fuel that does not include any coal or coal-derived fuel (except coal-derived gaseous fuel with a total sulfur content no greater than natural gas); and
- (3) Burns gaseous fuel with an annual average sulfur content of five hundredths per cent or less by weight and nongaseous fuel with an annual average sulfur content of five hundredths per cent or less by weight (as determined under paragraph (D) of this rule).

(B) Exemption

- (1) Any new utility unit that meets the requirements of paragraph (A) of this rule and that is not allocated any allowances under 40 CFR Part 73, Subpart B shall be exempt from the provisions of rules 3745-103-02 and 3745-103-06 of the Administrative Code.
- (2) The exemption under paragraph (B)(1) of this rule shall be effective on January first of the first full calendar year for which the unit meets the requirements of paragraph (A) of this rule. By December thirty-first of the first year for which the unit is to be exempt under this rule, a statement signed by the designated representative (authorized in accordance with rule 3745-103-06 of the Administrative Code) or, if no designated representative has been authorized, a certifying official of each owner of the unit shall be submitted to the director and to the USEPA. The statement, which shall be in a format prescribed by the director and the USEPA, shall identify the unit, state the nameplate capacity of each generator served by the unit and the fuels currently burned or expected to be burned by the unit and their sulfur content by weight, and state that the owners and operators of the unit will comply with paragraph (F) of this rule.
- (3) After receipt of the statement under paragraph (B)(2) of this rule, the director shall amend under rule 3745-103-18 of the Administrative Code the operating permit covering the source at which the unit is located, if the source has such a

permit, to add the provisions and requirements of the exemption under paragraphs (A), (B)(1), (D), and (F) of this rule.

(C) Further requirements

- (1) Any new utility unit that meets the requirements of paragraph (A) of this rule and that is allocated one or more allowances under 40 CFR Part 73, Subpart B shall be exempt from the acid rain program, except for the provisions of rules 3745-103-02 and 3745-103-06 of the Administrative Code, if each of the following requirements are met:
  - (a) The designated representative (authorized in accordance with rule 3745-103-06 of the Administrative Code) or, if no designated representative has been authorized, a certifying official of each owner of the unit submits to the director as the person responsible for administering a phase II acid rain permit for the unit a statement (in a format prescribed by the director) that:
    - (i) Identifies the unit and states the nameplate capacity of each generator served by the unit, and the fuels currently burned or expected to be burned by the unit and their sulfur content by weight;
    - (ii) States that the owners or operators of the unit will comply with paragraph (F) of this rule;
    - (iii) Surrenders allowances equal in number to, and with the same or earlier compliance use date as, all of those allocated to the unit under 40 CFR Part 73, Subpart B for the first year that the unit is to be exempt under this rule and for each subsequent year; and
    - (iv) Surrenders any proceeds for allowances under paragraph (C)(1)(a)(ii) of this rule withheld for the unit under 40 CFR 73.10. A copy of the statement shall be submitted to the USEPA.
  - (b) The USEPA deducts from the compliance account of the source that includes the unit allowances under paragraph (C)(1)(a)(iii) of this rule and receives proceeds under paragraph (C)(1)(a)(iv) of this rule. Within five business days of receiving a statement in accordance with paragraph (C)(1)(a) of this rule, the USEPA shall either deduct the allowances under paragraph (C)(1)(a)(iii) of this rule or notify the owners and operators that there are insufficient allowances to make such deductions.
- (2) The exemption under paragraph (C)(1) of this rule shall be effective on January first of the first full calendar year for which the requirements of paragraphs (A) and (C)(1) of this rule are met. After notification by the USEPA under the third sentence of paragraph (C)(1)(b) of this rule, the director shall amend under rule 3745-103-18 of the Administrative Code, the operating permit covering the

source at which the unit is located, if the source has such a permit, to add the provisions and requirements of the exemption under paragraphs (A), (C)(1), (D) and (F) of this rule.

(D) Compliance with the requirement that fuel burned during the year have an annual average sulfur content of five hundredths per cent by weight or less shall be determined as follows using a method of determining sulfur content that provides information with reasonable precision, reliability, accessibility, and timeliness:

(1) For gaseous fuel burned during the year, if natural gas is the only gaseous fuel burned, the requirement is assumed to be met;

(2) For gaseous fuel burned during the year where other gas in addition to or besides natural gas is burned, the requirement is met if the annual average sulfur content is equal to or less than five hundredths per cent by weight. The annual average sulfur content, as percentage by weight, for the gaseous fuel burned shall be calculated as follows:

$$\%S_{\text{annual}} = \frac{\sum_{n=1}^{\text{last}} \%S_n V_n d_n}{\sum_{n=1}^{\text{last}} V_n d_n}$$

where:

$\%S_{\text{annual}}$  = annual average sulfur content of the fuel burned during the year by the unit, as a percentage by weight;

$\%S_n$  = sulfur content of the nth sample of the fuel delivered during the year to the unit, as a percentage by weight;

$V_n$  = volume of the fuel in a delivery during the year to the unit of which nth sample is taken, in standard cubic feet; or, for fuel delivered during the year to the unit continuously by pipeline, volume of the fuel delivered starting from when the nth of such fuel is taken until the next sample of such fuel is taken, in standard cubic feet;

$d_n$  = density of the nth sample of the fuel delivered during the year to the unit, in lb per standard cubic foot; and

$n$  = each sample taken of the fuel delivered during the year to the unit, taken at least once for each delivery; or, for fuel that is delivered during the year to the unit continuously by pipeline, at least once each quarter during which the fuel is delivered.

- (3) For nongaseous fuel burned during the year, the requirement is met if the annual average sulfur content is equal to or less than five hundredths percent by weight. The annual average sulfur content, as a percentage by weight, shall be calculated using the equation in paragraph (D)(2) of this rule. In lieu of the factor, volume times density ( $V_n d_n$ ), in the equation, the factor, mass ( $M_n$ ), may be used, where  $M_n$  is: mass of the nongaseous fuel in a delivery during the year to the unit of which the  $n$ th sample is taken, in pounds; or, for fuel delivered during the year to the unit continuously by pipeline, mass of the nongaseous fuel delivered starting from when the  $n$ th sample of such fuel is taken until the next sample of such fuel is taken, in pounds.

(E) Additional provisions

- (1) A utility unit that was issued a written exemption under this rule and that meets the requirements of paragraph (A) of this rule shall be exempt from the acid rain program, except for the provisions of this rule and rules 3745-103-01 and 3745-103-02 of the Administrative Code and 40 CFR sections 72.3, 72.4, 72.5, 72.10, 72.11, 72.12 and 72.13 and shall be subject to the requirements of paragraphs (A), (D), (E)(2), and (F) of this rule in lieu of the requirements set forth in the written exemption. The director shall amend under rule 3745-103-18 of the Administrative Code the operating permit covering the source at which the unit is located, if the source has such a permit, to add the provisions and requirements of the exemption under this paragraph and paragraphs (A), (D), (E)(2), and (F) of this rule.
- (2) If a utility unit under paragraph (E)(1) of this rule is allocated one or more allowances under 40 CFR Part 73, Subpart B, the designated representative (authorized in accordance with 40 CFR Part 72, Subpart B) or, if no designated representative has been authorized, a certifying official of each owner of the unit shall submit to the director, a statement (in a format prescribed by the director) meeting the requirements of paragraph (C)(1)(a)(iii) and (C)(1)(a)(iv) of this rule. The statement shall be submitted by June 30, 1998. A copy shall be submitted to the USEPA.

(F) Special provisions

- (1) The owners and operators and, to the extent applicable, the designated representative of a unit exempt from this rule shall:
  - (a) Comply with the requirements of paragraph (A) of this rule for all periods for which the unit is exempt under this rule; and
  - (b) Comply with the requirements of the acid rain program concerning all periods for which the exemption is not in effect, even if such requirements arise, or must be complied with, after the exemption takes effect.

- (2) For any period for which the unit is exempt under this rule, the unit is not an affected unit under the acid rain program and 40 CFR Parts 70 and 71 and is not eligible to be an opt-in source under rules 3745-103-22 to 3745-103-54 of the Administrative Code. As an unaffected unit, the unit shall continue to be subject to any other applicable requirements under 40 CFR Parts 70 and 71.
- (3) For a period of five years from the date the records are created, the owners and operators of a unit exempt under this rule shall retain at the source that includes the unit records demonstrating that the requirements of paragraph (A) of this rule are met. The five year period for keeping records may be extended for cause, at any time prior to the end of the period, in writing by the director.
  - (a) Such records shall include, for each delivery of fuel to the unit or for fuel delivered to the unit continuously by pipeline, the type of fuel, the sulfur content, and the sulfur content of each sample taken.
  - (b) The owners and operators bear the burden of proof that the requirements of paragraph (A) of this rule are met.
- (4) Loss of exemption.
  - (a) On the earliest of the following dates, a unit exempt under paragraph (B), (C) or (E) of this rule shall lose its exemption and become an affected unit under the acid rain program and 40 CFR Parts 70 and 71:
    - (i) The date on which the unit first serves one or more generators with total nameplate capacity in excess of twenty-five MWe;
    - (ii) The date on which the unit burns any coal or coal-derived fuel except for coal-derived gaseous fuel with a total sulfur content no greater than natural gas; or
    - (iii) January first of the year following the year in which the annual average sulfur content for gaseous fuel burned at unit exceeds five hundredths per cent by weight (as determined under paragraph (D) of this rule) or for nongaseous fuel burned at the unit exceeds five hundredths per cent by weight (as determined under paragraph (D) of this rule).
  - (b) Notwithstanding paragraph (A) of rule 3745-103-07 of the Administrative Code, the designated representative for a unit that loses its exemption under this rule shall submit a complete acid rain permit application on the later of January 1, 1998 or sixty days after the first date on which the unit is no longer exempt.

- (c) For the purpose of applying monitoring requirements under 40 CFR Part 75, a unit that loses its exemption under this rule shall be treated as a new unit that commenced commercial operation on the first date on which the unit is no longer exempt.

3745-103-04      **Retired units exemption.**

[Comment: For dates of non-regulatory government publications, publications of recognized organizations and associations, federal rules, and federal statutory provisions referenced in this rule, see the last paragraph of rule 3745-103-01 of the Administrative Code titled "Incorporation by reference."]

(A) This rule applies to any affected unit (except for an opt-in source) that is permanently retired.

(B) Provisions

(1) Any affected unit (except for an opt-in source) that is permanently retired shall be exempt from the acid rain program, except for the provisions of rules 3745-103-01 and 3745-103-02 of the Administrative Code, and 40 CFR Part 73, Subpart B.

(2) The exemption under paragraph (B)(1) of this rule shall become effective on January first of the first full calendar year during which that the unit is permanently retired. By December thirty-first of the first year that the unit is to be exempt under this rule, the designated representative (authorized in accordance with rule 3745-103-06 of the Administrative Code), or, if no designated representative has been authorized, a certifying official of each owner of the unit shall submit a statement to the director. A copy of the statement shall be submitted to USEPA. The statement shall state (in a format prescribed by the USEPA) that the unit is permanently retired and will comply with the requirements of paragraph (D) of this rule.

(3) After receipt of the notice under paragraph (B)(2) of this rule, the director shall amend under rule 3745-103-18 of the Administrative Code the operating permit covering the source at which the unit is located, if the source has such a permit, to add the provisions and requirements of the exemption under paragraphs (B)(1) and (D) of this rule.

(C) A unit that was issued a written exemption under this rule and that is permanently retired shall be exempt from the acid rain program, except for the provisions of this rule, rules 3745-103-01 and 3745-103-02 of the Administrative Code, and subpart B of 40 CFR Part 73, and shall be subject to the requirements of paragraph (D) of this rule in lieu of the requirements set forth in the written exemption. The director shall amend under rule 3745-103-18 of the Administrative Code the operating permit covering the source at which the unit is located, if the source has such a permit, to add the provisions and requirements of the exemption under this paragraph and paragraph (D) of this rule.

(D) Special provisions.

- (1) A unit exempted under this rule shall not emit any sulfur dioxide and nitrogen oxides starting on the date the exemption takes effect. The owners and operators of the unit will be allocated allowances in accordance with 40 CFR Part 73, Subpart B.
- (2) A unit exempt under this rule shall not resume operation unless the designated representative of the source that includes the unit submits a complete acid rain permit application under rule 3745-103-07 of the Administrative Code for the unit not less than twenty-four months prior to the date on which the unit is to resume operation.
- (3) The owners and operators and, to the extent applicable, the designated representative of a unit exempt under this rule shall comply with the requirements of the acid rain program concerning all periods for which the exemption is not in effect, even if such requirements arise, or must be complied with, after the exemption takes effect.
- (4) For any period for which a unit is exempt under this rule, the unit is not an affected unit under the acid rain program and 40 CFR Parts 70 and 71 and is not eligible to be an opt-in source under rules 3745-103-22 to 3745-103-54 of the Administrative Code. As an unaffected unit, the unit shall continue to be subject to any other applicable requirements under 40 CFR Parts 70 and 71.
- (5) For a period of five years from the date the records are created the owners and operators of a unit exempt under this rule shall retain at the source that includes the unit records demonstrating that the unit is permanently retired. The five year period for keeping records may be extended for cause, at any time prior to the end of the period, in writing by the director. The owners and operators bear the burden of proof that the unit is permanently retired.
- (6) Loss of exemption.
  - (a) On the earlier of the following dates, a unit exempt under paragraph (B) or (C) of this rule shall lose its exemption under the acid rain program and 40 CFR Parts 70 and 71:
    - (i) The date on which the designated representative submits an acid rain permit application under paragraph (D)(2) of this rule; or
    - (ii) The date on which the designated representative is required under paragraph (D)(2) of this rule to submit an acid rain permit application.
  - (b) For the purpose of applying monitoring requirements under 40 CFR Part 75, a unit that loses its exemption under this rule shall be treated as a new unit

that commenced commercial operation on the first date on which the unit resumes operation.

Prior Effective Dates: 6/27/2002, 9/10/1997

3745-103-05      **Standard requirements.**

[Comment: For dates of non-regulatory government publications, publications of recognized organizations and associations, federal rules, and federal statutory provisions referenced in this rule, see the last paragraph of rule 3745-103-01 of the Administrative Code titled "Incorporation by reference."]

(A) Permit requirements.

- (1) The designated representative of each affected source and each affected unit at the source shall:
  - (a) Submit a complete acid rain permit application under this chapter in accordance with the deadlines specified in rule 3745-103-07 of the Administrative Code;
  - (b) Submit within thirty days after notification by the director any supplemental information that the director determines is necessary in order to review an acid rain permit application and issue or deny an acid rain permit.
- (2) The owners and operators of each affected source and each affected unit at the source shall:
  - (a) Operate the unit in compliance with a complete acid rain permit application or a superseding acid rain permit issued by the director; and
  - (b) Have an acid rain permit.

(B) Monitoring requirements.

- (1) The owners and operators and, to the extent applicable, designated representative of each affected source and each affected unit at the source shall comply with the monitoring requirements as provided in 40 CFR Part 75 and Section 407 of the Clean Air Act.
- (2) The emissions measurements recorded and reported in accordance with 40 CFR Part 75 shall be used to determine compliance by the source or unit, as appropriate, with the acid rain emissions limitations and emissions reduction requirements for sulfur dioxide and nitrogen oxides under the acid rain program.
- (3) The requirements of 40 CFR Part 75 shall not affect the responsibility of the owners and operators to monitor emissions of other pollutants or other emissions characteristics at the unit under other applicable requirements of the Clean Air Act and other provisions of the operating permit for the source.

(C) Sulfur dioxide requirements.

- (1) The owners and operators of each source and each affected unit at the source shall:
  - (a) Hold allowances, as of the allowance transfer deadline, in the source's compliance account, after deductions under 40 CFR 73.34(C), not less than the total annual emissions of sulfur dioxide for the previous calendar year from the affected units at the source; and
  - (b) Comply with the applicable acid rain emissions limitation for sulfur dioxide.
- (2) Each ton of sulfur dioxide emitted in excess of the acid rain emissions limitations for sulfur dioxide shall constitute a separate violation of this rule.
- (3) An affected unit shall be subject to the requirements under paragraph (C)(1) of this rule as follows:
  - (a) Starting January 1, 2000, an affected unit under paragraph (A)(2) rule 3745-103-02 of the Administrative Code; or
  - (b) Starting on the later of January 1, 2000 or the deadline for monitor certification under 40 CFR Part 75, an affected unit under paragraph (A)(3) rule 3745-103-02 of the Administrative Code.
- (4) Allowances shall be held in, deducted from, or transferred among allowance tracking system accounts in accordance with the acid rain program.
- (5) An allowance shall not be deducted, in order to comply with the requirements under paragraph (C)(1)(a) of this rule, prior to the calendar year for which the allowance was allocated.
- (6) An allowance allocated by the USEPA under the acid rain program is a limited authorization to emit sulfur dioxide in accordance with the acid rain program. No provision of the acid rain program, the acid rain permit application, the acid rain permit, or an exemption under rule 3745-103-03, 3745-103-04 or 3745-103-67 of the Administrative Code and no provision of law shall be construed to limit the authority of the United States to terminate or limit such authorization.
- (7) An allowance allocated by the USEPA under the acid rain program does not constitute a property right.

(D) Nitrogen oxides requirements. The owners and operators of the source and each affected unit at the source shall comply with the applicable acid rain emissions limitation for nitrogen oxides.

(E) Excess emissions requirements.

- (1) The designated representative of an affected source that has excess emissions in any calendar year shall submit a proposed offset plan to the USEPA, as required under 40 CFR Part 77, and submit a copy to the director.
- (2) The owners and operators of an affected source that has excess emissions in any calendar year shall:
  - (a) Pay to the USEPA without demand the penalty required, and pay to the USEPA upon demand the interest on that penalty, as required by 40 CFR Part 77; and
  - (b) Comply with the terms of an approved offset plan, as required by 40 CFR Part 77.

(F) Recordkeeping and reporting requirements.

- (1) Unless otherwise provided, the owners and operators of the source and each affected unit at the source shall keep on site at the source each of the following documents for a period of five years from the date the document is created. This period may be extended for cause, at any time prior to the end of five years, in writing by the Ohio EPA.
  - (a) The certificate of representation for the designated representative for the source and each affected unit at the source and all documents that demonstrate the truth of the statements in the certificate of representation, in accordance with 40 CFR 72.24; provided that the certificate and documents shall be retained on site at the source beyond such five year period until such documents are superseded because of the submission of a new certificate of representation changing the designated representative.
  - (b) All emissions monitoring information, in accordance with 40 CFR Part 75; provided to the extent that 40 CFR Part 75 provides for a three year period of recordkeeping, the three year period shall apply.
  - (c) Copies of all reports, compliance certifications, and other submissions and all records made or required under the acid rain program.
  - (d) Copies of all documents used to complete an acid rain permit application and any other submission under the acid rain program or to demonstrate compliance with the requirements of the acid rain program.
- (2) The designated representative of an affected source and each affected unit at the source shall submit the reports and compliance certifications required under the acid rain program.

(G) Liability.

- (1) Any person who knowingly violates any requirement or prohibition of the acid rain program, a complete acid rain permit application, an acid rain permit, or an exemption under rule 3745-103-03 or 3745-103-04 of the Administrative Code, including any requirement for the payment of any penalty owed to the United States, shall be subject to enforcement by the USEPA pursuant to section 113(C) of the Clean Air Act and by the Ohio EPA pursuant to Chapter 3704. of the Revised Code.
- (2) Any person who knowingly makes a false, material statement in any record, submission, or report under the acid rain program shall be subject to criminal enforcement by the USEPA pursuant to section 113(c) of the Clean Air Act and 18 USC 1001 and by the director pursuant to Chapter 3704. of the Revised Code.
- (3) No permit revision shall excuse any violation of the requirements of the acid rain program that occurs prior to the date that the revision takes effect.
- (4) Each affected source and each affected unit shall meet the requirements of the acid rain program.
- (5) Any provision of the acid rain program that applies to an affected source, including a provision applicable to the designated representative of an affected source, shall also apply to the owners and operators of such source and of the affected units at the source.
- (6) Any provision of the acid rain program that applies to an affected unit, including a provision applicable to the designated representative of an affected unit, shall also apply to the owners and operators of such unit.
- (7) Each violation of a provision of rules 3745-103-01 to 3745-103-66 of the Administrative Code and 40 CFR Parts 72, 73, 74, 75, 76, 77, and 78, by an affected source or affected unit, or by an owner or operator or designated representative of such source or unit, shall be a separate violation.

(H) Effect on other authorities. No provision of the acid rain program, an acid rain permit application, an acid rain permit, or an exemption under rule 3745-103-03 or 3745-103-04 of the Administrative Code shall be construed as:

- (1) Except as expressly provided in Title IV of the Clean Air Act, exempting or excluding the owners and operators and, to the extent applicable, the designated representative of an affected source or affected unit from compliance with any other provision of the Clean Air Act, including the provisions of Title I of the

Clean Air Act relating to applicable national ambient air quality standards or state implementation plans;

- (2) Limiting the number of allowances a source can hold; provided, that the number of allowances held by the source shall not affect the source's obligation to comply with any other provisions of the Clean Air Act;
- (3) Requiring a change of any kind in any Ohio law regulating electric utility rates and charges, affecting any Ohio law regarding such Ohio regulation, or limiting such Ohio regulation, including any prudence review requirements under such Ohio law;
- (4) Modifying the Federal Power Act or affecting the authority of the federal energy regulatory commission under the Federal Power Act; or
- (5) Interfering with or impairing any program for competitive bidding for power supply in a state in which such program is established.

(A) Submissions.

- (1) Each submission under the acid rain program shall be submitted, signed, and certified by the designated representative for all sources on behalf of which the submission is made.
- (2) In each submission under the acid rain program, the designated representative shall certify, by his or her signature:
  - (a) The following statement, which shall be included verbatim in such submission: "I am authorized to make this submission on behalf of the owners and operators of the source or units for which the submission is made."
  - (b) The following statement, which shall be included verbatim in such submission: "I certify under penalty of law that I have personally examined, and am familiar with, the statements and information submitted in this document and all its attachments. Based on my inquiry of those individuals with primary responsibility for obtaining the information, I certify that the statements and information are to the best of my knowledge and belief true, accurate, and complete. I am aware that there are significant penalties for submitting false statements and information or omitting required statements and information, including the possibility of fine or imprisonment."
- (3) The director shall accept or act on a submission made on behalf of owners or operators of an affected source and an affected unit only if the submission has been made, signed, and certified in accordance with paragraphs (A)(1) and (A)(2) of this rule.
- (4) The designated representative of a source shall serve notice on each owner and operator of the source and of an affected unit at the source:
  - (a) By the date of submission, of any acid rain program submissions by the designated representative;
  - (b) Within ten business days of receipt of a determination, of any written determination by the USEPA or the Ohio EPA; and

(c) Provided that the submission or determination covers the source or the unit.

- (5) The designated representative of a source shall provide each owner and operator of an affected unit at the source a copy of any submission or determination under paragraph (A)(4) of this rule, unless the owner or operator expressly waives the right to receive such a copy.

(B) Objections.

- (1) Except as provided in 40 CFR 72.23, no objection or other communication submitted to the USEPA or the director concerning the authorization, or any submission, action or inaction, of the designated representative shall affect any submission, action, or inaction of the designated representative, or the finality of any decision by the Ohio EPA, under the acid rain program. In the event of such communication, the director is not required to stay any submission or the effect of any action or inaction under the acid rain program.
- (2) The director shall not adjudicate any private legal dispute concerning the authorization or any submission, action, or inaction of any designated representative, including private legal disputes concerning the proceeds of allowance transfers.

3745-103-07      **Acid rain permit applications.**

[Comment: For dates of non-regulatory government publications, publications of recognized organizations and associations, federal rules, and federal statutory provisions referenced in this rule, see the last paragraph of rule 3745-103-01 of the Administrative Code titled "Incorporation by reference."]

(A) Requirement to apply.

(1) Duty to apply. The designated representative shall submit a complete acid rain permit application for each source with an affected unit at least six months prior to the expiration of an existing acid rain permit governing the unit during phase II or an opt-in permit governing an opt-in source or such longer time as approved by the director under Chapter 3745-77 of the Administrative Code that ensures that the term of the existing permit will not expire before the effective date of the permit for which the application is submitted.

(2) Deadlines.

- (a) For any source with an existing unit described under paragraph (A)(2) of rule 3745-103-02 of the Administrative Code, the designated representative shall submit a complete acid rain permit application governing such unit to the director on or before January 1, 1996.
- (b) For any source with a new unit described under paragraph (A)(3)(a) of rule 3745-103-02 of the Administrative Code, the designated representative shall submit a complete acid rain permit application governing such unit to the director at least twenty-four months before the later of January 1, 2000 or the date on which the unit commences operation.
- (c) For any source with a unit described under paragraph (A)(3)(b) of rule 3745-103-02 of the Administrative Code, the designated representative shall submit a complete acid rain permit application governing such unit to the director at least twenty-four months before the later of January 1, 2000 or the date on which the unit begins to serve a generator with a nameplate capacity greater than twenty-five MWe.
- (d) For any source with a unit described under paragraph (A)(3)(c) of rule 3745-103-02 of the Administrative Code the designated representative shall submit a complete acid rain permit application governing such unit to the director at least twenty-four months before the later of January 1, 2000 or the date on which the auxiliary firing commences operation.
- (e) For any source with a unit described under paragraph (A)(3)(d) of rule 3745-103-02 of the Administrative Code, the designated representative shall

submit a complete acid rain permit application governing such unit to the director before the later of January 1, 1998 or March first of the year following the three calendar year period in which the unit sold to a utility power distribution system an annual average of more than one-third of its potential electrical output capacity and more than two hundred nineteen thousand MWe-hrs actual electric output on a gross basis.

- (f) For any source with a unit described under paragraph (A)(3)(e) of rule 3745-103-02 of the Administrative Code, the designated representative shall submit a complete acid rain permit application governing such unit to the director before the later of January 1, 1998 or March first of the year following the calendar year in which the facility fails to meet the definition of a "qualifying facility."
- (g) For any source with a unit described under paragraph (A)(3)(f) of rule 3745-103-02 of the Administrative Code, the designated representative shall submit a complete acid rain permit application governing such unit to the director before the later of January 1, 1998 or March first of the year following the calendar year in which the facility fails to meet the definition of an "independent power production facility."
- (h) For any source with a unit described under paragraph (A)(3)(g) of rule 3745-103-02 of the Administrative Code, the designated representative shall submit a complete acid rain permit application governing such unit to the director before the later of January 1, 1998 or March first of the year following the three calendar year period in which the incinerator consumed twenty per cent or more fossil fuel (on a Btu basis).

(B) Acid rain permit application forms.

A complete acid rain permit application shall be submitted on USEPA form 7610-16.

- (C) Where two or more affected units are located at a source, the director may, in his or her sole discretion, allow the designated representative of the source to submit, under paragraph (A)(1) of this rule, two or more acid rain permit applications covering the units at the source, provided that each affected unit is covered by only one application.

3745-103-08      **Permit application shield and binding effect of permit application.**

[Comment: For dates of non-regulatory government publications, publications of recognized organizations and associations, federal rules, and federal statutory provisions referenced in this rule, see the last paragraph of rule 3745-103-01 of the Administrative Code titled "Incorporation by reference."]

- (A) Once a designated representative submits a timely and complete acid rain permit application, the owners and operators of the affected source and the affected units covered by the permit application shall be deemed in compliance with the requirement to have an acid rain permit under paragraph (A)(2) of rule 3745-103-05 and paragraph (A)(1) of rule 3745-103-07 of the Administrative Code; provided that any delay in issuing an acid rain permit is not caused by the failure of the designated representative to submit in a complete and timely fashion supplemental information, as required by the director, necessary to issue a permit.
- (B) Prior to the earlier of the date on which an acid rain permit is issued or denied, an affected unit governed by and operated in accordance with the terms and requirements of a timely and complete acid rain permit applications shall be deemed to be operating in compliance with the acid rain program.
- (C) A complete acid rain permit application shall be binding on the owners and operators and the designated representative of the affected source and the affected units covered by the permit application and shall be enforceable as an acid rain permit from the date of submission of the complete permit application until the issuance or denial of such permit.
- (D) If a permit is appealed under 40 CFR Part 78, issuance or denial of the permit shall occur when the USEPA takes final action subject to judicial review.
- (E) 40 CFR Part 78 shall govern appeals of any final decision of the USEPA under 40 CFR Parts 72, 73, 74, 75, 76, and 77; provided that matters listed in paragraph (d) of 40 CFR 78.3 and preliminary, procedural, or intermediate decisions, such as draft acid rain permits, may not be appealed.
- (F) Filing an appeal, and exhausting administrative remedies, under 40 CFR Part 78 shall be a prerequisite to seeking judicial review. Final USEPA action occurs only when a decision appealable under 40 CFR Part 78 is issued and the procedures for appealing the decision are exhausted.

Prior Effective Dates: 6/27/2002, 9/10/1997

**Acid rain compliance plan and compliance options.**

- (A) The compliance plan may include a NO<sub>x</sub> averaging plan under rule 3745-103-63 of the Administrative Code; and
- (1) A plan for a compliance option that includes units at more than one affected source shall be complete only if:
    - (a) Such plan is signed and certified by the designated representative for each source with an affected unit governed by such plan; and
    - (b) A complete permit application is submitted covering each unit governed by such plan.
  - (2) The director's approval of a plan under paragraph (A)(1) of this rule that includes units in more than one state shall be final only after every permitting authority with jurisdiction over any such unit has approved the plan with the same modifications or conditions, if any.
- (B) Conditional approval. In the compliance plan, the designated representative of an affected unit may propose, in accordance with rule 3745-103-09 of the Administrative Code, any acid rain compliance option for conditional approval; provided that an acid rain compliance option under rules 3745-103-55 to 3745-103-66 of the Administrative Code may be conditionally proposed only to the extent provided in rules 3745-103-55 to 3745-103-66 of the Administrative Code.
- (1) To activate a conditionally approved acid rain compliance option, the designated representative shall notify the director in writing that the conditionally approved compliance option will actually be pursued beginning January first of a specified year. Such notification shall be subject to the limitations on activation under rules 3745-103-55 to 3745-103-66 of the Administrative Code. If the conditionally approved compliance option includes a plan described in paragraph (A)(1) of this rule, the designated representative of each source governed by the plan shall sign and certify the notification.
  - (2) The notification under paragraph (B)(1) of this rule shall specify the first calendar year and the last calendar year for which the conditionally approved acid rain compliance option is to be activated. A conditionally approved compliance option shall be activated, if at all, before the date of any enforceable milestone applicable to the compliance option. The date of activation of the compliance option shall not be a defense against failure to meet the requirements applicable to that compliance option during each calendar year for which the compliance option is activated.

- (3) Upon submission of a notification meeting the requirements of paragraphs (B)(1) and (B)(2) of this rule, the conditionally approved acid rain compliance option becomes binding on the owners and operators and the designated representative of any unit governed by the conditionally approved compliance option.
- (4) A notification meeting the requirements of paragraphs (B)(1) and (B)(2) of this rule will revise the unit's permit in accordance with rule 3745-103-18 of the Administrative Code.

(C) Termination of compliance option.

- (1) The designated representative for a unit may terminate an acid rain compliance option by notifying the director in writing that an approved compliance option will be terminated beginning January first of a specified year. Such notification shall be subject to the limitations on termination under rules 3745-103-55 to 3745-103-66 of the Administrative Code. If the compliance option includes a plan described in paragraph (A)(1) of this rule, the designated representative for each source governed by the plan shall sign and certify the notification.
- (2) The notification under paragraph (C)(1) of this rule shall specify the calendar year for which the termination will take effect.
- (3) Upon submission of a notification meeting the requirements of paragraphs (C)(1) and (C)(2) of this rule, the termination becomes binding on the owners and operators and the designated representative of any unit governed by the acid rain compliance option to be terminated.
- (4) A notification meeting the requirements of paragraphs (C)(1) and (C)(2) of this rule will revise the unit's permit in accordance with rule 3745-103-18 of the Administrative Code.

3745-103-13      **Issuance of acid rain permits.**

[Comment: For dates of non-regulatory government publications, publications of recognized organizations and associations, federal rules, and federal statutory provisions referenced in this rule, see the last paragraph of rule 3745-103-01 of the Administrative Code titled "Incorporation by reference."]

(A) State permit issuance.

- (1) The Ohio EPA shall be responsible for administering and enforcing acid rain permits effective in phase II for all affected sources:
  - (a) That are located in the geographic area covered by the operating permits program; and
  - (b) To the extent that the accepted state acid rain program is applicable.
- (2) In administering and enforcing acid rain permits, the Ohio EPA shall comply with the procedures for issuance, revision, renewal, and appeal of acid rain permits under this rule and rules 3745-103-14 to 3745-103-20 of the Administrative Code.

(B) Permit issuance deadline.

- (1) The Ohio EPA, to the extent that it is responsible under paragraph (A) of this rule as of December 31, 1997 (or such later date as the USEPA may establish) for administering and enforcing acid rain permits, shall:
  - (a) On or before December 31, 1997, issue an acid rain permit for phase II covering the affected units (other than opt-in sources) at each source in the geographic area for which the program is approved; provided that the designated representative of the source submitted a timely and complete acid rain permit application in accordance with rule 3745-103-06 of the Administrative Code.
  - (b) On or before January 1, 1999, for each unit subject to an acid rain NO<sub>x</sub> emission limitation, amend the acid rain permit under rule 3745-103-18 of the Administrative Code and add any NO<sub>x</sub> early election plan that was approved by the USEPA under rule 3745-103-60 of the Administrative Code and has not been terminated and reopen the acid rain permit and add any other acid rain program nitrogen oxides requirements; provided that the designated representative of the affected source submitted a timely and complete acid rain permit application for nitrogen oxides in accordance with rule 3745-103-06 of the Administrative Code.

- (2) Each acid rain permit issued in accordance with this rule shall have a term of five years commencing on its effective date; provided that, at the discretion of the Ohio EPA, an acid rain permit for phase II issued to a source may have a term of less than five years where necessary to coordinate the term of such permit with the term of an operating permit to be issued to the source under a state operating permit program. Each acid rain permit issued in accordance with paragraph (B)(1) of this rule shall take effect by the later of January 1, 2000, or, where the permit governs a unit under paragraph (A)(3) of rule 3745-103-02 of the Administrative Code, the deadline for monitor certification under 40 CFR Part 75.

3745-103-14      **Acid rain permit appeal procedures.**

[Comment: For dates of non-regulatory government publications, publications of recognized organizations and associations, federal rules, and federal statutory provisions referenced in this rule, see the last paragraph of rule 3745-103-01 of the Administrative Code titled "Incorporation by reference."]

- (A) The USEPA may intervene as a matter of right in any administrative appeal of an acid rain permit or denial of an acid rain permit.
  
- (B) No administrative appeal concerning an acid rain requirement shall result in a stay of the following requirements:
  - (1) The allowance allocations for any year during which the appeal proceeding is pending or is being conducted;
  - (2) Any standard requirement under rule 3745-103-05 of the Administrative Code;
  - (3) The emissions monitoring and reporting requirements applicable to the affected units at an affected source under 40 CFR Part 75;
  - (4) Uncontested provisions of the decision on appeal; and
  - (5) The terms of a certificate of representation submitted by a designated representative under 40 CFR Part 72, Subpart B.

3745-103-15      **Permit revisions.**

[Comment: For dates of non-regulatory government publications, publications of recognized organizations and associations, federal rules, and federal statutory provisions referenced in this rule, see the last paragraph of rule 3745-103-01 of the Administrative Code titled "Incorporation by reference."]

- (A) This rule shall govern revisions to any acid rain permit issued by the director and the acid rain portion of any operating permit issued by the director.
- (B) Notwithstanding the operating permit revision procedures specified in 40 CFR Parts 70 and 71 and rule 3745-77-08 of the Administrative Code, the provisions of this rule and rules 3745-103-14 and 3745-103-16 to 3745-103-20 of the Administrative Code shall govern revision of any acid rain program permit provision.
- (C) The terms of the existing acid rain permit shall apply while the permit revision is pending, except as provided in rule 3745-103-18 of the Administrative Code for administrative permit amendments.
- (D) The standard requirements of rule 3745-103-05 of the Administrative Code shall not be modified or voided by a permit revision.
- (E) Any permit revision involving incorporation of a compliance option that was not submitted for approval and comment during the permit issuance process, or involving a change in a compliance option that was previously submitted, shall meet the requirements for applying for such compliance option under rules 3745-103-22 to 3745-103-66 of the Administrative Code.
- (F) Any designated representative who fails to submit any relevant information or who has submitted incorrect information in a permit revision shall, upon becoming aware of such failure or incorrect submittal, promptly submit such supplementary information or corrected information to the director.

3745-103-16      **Permit modifications.**

(A) Permit modifications shall

- (1) Follow the permit issuance requirements of rule 3745-103-13 of the Administrative Code and the Ohio EPA's permit regulations adopted under rule 3745-77-07 of the Administrative Code.
- (2) For purposes of applying paragraph (A)(1) of this rule, be treated as acid rain permit applications, to the extent consistent with paragraphs (B) and (C) of rule 3745-103-15 of the Administrative Code.

(B) The following permit revisions are permit modifications:

- (1) Relaxation of an excess emission offset requirement after approval of the offset plan by the USEPA;
- (2) Incorporation of a final nitrogen oxides alternative emission limitation following a demonstration period;
- (3) At the option of the designated representative submitting the permit revision, the permit revisions listed in paragraph (B) of rule 3745-103-17 of the Administrative Code; and
- (4) Changes in a thermal energy plan that result in any addition or subtraction of a replacement unit or any change affecting the number of allowances transferred for the replacement of thermal energy.

Prior Effective Dates: 6/27/2002, 9/10/1997

(A) Fast-track modifications shall follow the following procedures:

- (1) The designated representative shall serve a copy of the fast-track modification on the USEPA, the director, and any person entitled to a written notice of a draft permit under the Ohio EPA's permit regulations adopted under rule 3745-77-08 of the Administrative Code. Within five business days of serving such copies, the designated representative shall also give public notice by publication in a newspaper of general circulation in the area where the source is located or in a state publication designed to give general public notice.
- (2) The public shall have a period of thirty days, commencing on the date of publication of the notice, to comment on the fast-track modification. Comments shall be submitted in writing to the director and to the designated representative.
- (3) The designated representative shall submit the fast-track modification to the director on or before commencement of the public comment period.
- (4) Within ninety days of the close of the public comment period, the Ohio EPA shall consider the fast-track modification and the comments received and approve, in whole or in part or with changes or conditions as appropriate, or disapprove the modification. A fast-track modification shall be subject to the same provisions for review by the USEPA and the director as are applicable to a permit modification under rule 3745-103-16 of the Administrative Code.

(B) The following permit revisions are, at the option of the designated representative submitting the permit revision, either fast-track modifications under this rule or permit modifications under rule 3745-103-16 of the Administrative Code:

- (1) Incorporation of a compliance option that the designated representative did not submit for approval and comment during the permit issuance process;
- (2) Addition of a nitrogen oxides averaging plan to a permit; and
- (3) Changes in a repowering plan, nitrogen oxides averaging plan, or nitrogen oxides compliance deadline extension.

3745-103-18      **Administrative permit amendment.**

[Comment: For dates of non-regulatory government publications, publications of recognized organizations and associations, federal rules, and federal statutory provisions referenced in this rule, see the last paragraph of rule 3745-103-01 of the Administrative Code titled "Incorporation by reference."]

- (A) Administrative amendments shall follow the procedures set forth under paragraph (B) of rule 3745-77-08 of the Administrative Code. The director will submit the revised portion of the permit to the USEPA within ten working days after the date of final action on the request for an administrative amendment.
- (B) The following permit revisions are administrative amendments:
- (1) Activation of a compliance option conditionally approved by the director; provided that all requirements for activation under paragraph (B) of rule 3745-103-09 of the Administrative Code are met;
  - (2) Changes in the designated representative or alternative designated representative; provided that a new certificate of representation is submitted to the USEPA and the director in accordance with 40 CFR Part 72, Subpart B;
  - (3) Correction of typographical errors;
  - (4) Changes in names, addresses, or telephone or facsimile numbers;
  - (5) Changes in the owners or operators; provided that a new certificate of representation is submitted within thirty days to the USEPA and the director in accordance with 40 CFR Part 72, Subpart B;
  - (6) Termination of a compliance option in the permit; provided that all requirements for termination under paragraph (C) of rule 3745-103-09 of the Administrative Code shall be met and this procedure shall not be used to terminate a repowering plan after December 31, 1999; for opt-in sources, termination of a compliance option in the permit; provided that all requirements for termination under rule 3745-103-48 of the Administrative Code are met.
  - (7) Changes in the date, specified in a new unit's acid rain permit, of commencement of operation or the deadline for monitor certification, provided that they are in accordance with rule 3745-103-05 of the Administrative Code;
  - (8) The addition of or change in a nitrogen oxides alternative emissions limitation demonstration period, provided that the requirements of rules 3745-103-55 to 3745-103-66 of the Administrative Code are met;

- (9) Adoption of changes that the USEPA has determined to be similar to those in paragraphs (B)(1) to (B)(10) of this rule;
- (10) Changes in a thermal energy plan that do not result in the addition or subtraction of a replacement unit or any change affecting the number of allowances transferred for the replacement of thermal energy;
- (11) The addition of a NO<sub>x</sub> early election plan that was approved by the USEPA under 40 CFR 76.8 and by the director under rule 3745-103-59 of the Administrative Code;
- (12) The addition of an exemption for which the requirements have been met under rules 3745-103-03 and 3745-103-04 of the Administrative Code; and
- (13) Adoption of changes that the director has determined to be similar to those in paragraphs (B)(1) to (B)(12) of this rule.

(C) Issuance of amendment

- (1) The director shall take final action on an administrative permit amendment, or for the addition of an alternative emissions limitation demonstration period. The source may implement any changes in the administrative permit amendment immediately upon submission of the requested amendment, provided that the requirements of paragraph (B) of this rule are met.
- (2) The director may, on his own motion, make an administrative permit amendment under paragraph (B)(3), (B)(4), (B)(11), or (B)(12) of this rule at least thirty days after providing notice to the designated representative of the amendment and without providing any other prior public comment.

(D) The director shall designate the permit revision under paragraph (B) of this rule as having been made as an administrative permit amendment. The director shall submit the revised portion of the permit to the USEPA.

(E) An administrative amendment shall not be subject to the provisions for review by the USEPA and affected states applicable to a permit modification under rule 3745-103-16 of the Administrative Code and 40 CFR 72.81.

3745-103-20      **Permit reopenings.**

[Comment: For dates of non-regulatory government publications, publications of recognized organizations and associations, federal rules, and federal statutory provisions referenced in this rule, see the last paragraph of rule 3745-103-01 of the Administrative Code titled "Incorporation by reference."]

- (A) The director shall reopen an acid rain permit for cause whenever:
- (1) Any additional requirement under the acid rain program becomes applicable to any affected unit governed by the permit;
  - (2) The director determines that the permit contains a material mistake or that an inaccurate statement was made in establishing the emissions standards or other terms or conditions of the permit, unless the mistake or statement is corrected in accordance with rule 3745-103-18 of the Administrative Code; or
  - (3) The director determines that the permit must be revised or revoked to assure compliance with acid rain program requirements.
- (B) In reopening an acid rain permit for cause, the director will issue a draft permit changing the provisions, or adding the requirements, for which the reopening was necessary. The draft permit shall be subject to the requirements of rules 3745-103-11 and 3745-103-13 of the Administrative Code.
- (C) As provided in paragraph (B)(1) of rule 3745-103-13 of the Administrative Code and paragraph (c)(2) of 40 CFR 72.74, the director shall reopen an acid rain permit to incorporate nitrogen oxides requirements, consistent with rules 3745-103-55 to 3745-103-66 of the Administrative Code.

3745-103-21      **Units with repowering extension plans.**

[Comment: For dates of non-regulatory government publications, publications of recognized organizations and associations, federal rules, and federal statutory provisions referenced in this rule, see the last paragraph of rule 3745-103-01 of the Administrative Code titled "Incorporation by reference."]

- (A) Removal from operation to repower. The designated representative of a unit governed by an approved repowering plan shall notify the USEPA and the Ohio EPA in writing at least sixty days in advance of the date on which the existing unit is to be removed from operation so that the qualified repowering technology can be installed, or is to be replaced by another unit with the qualified repowering technology, in accordance with the plan.
- (B) Commencement of operation. Not later than sixty days after the units repowered under an approved repowering plan commences operation at full load, the designated representative of the unit shall submit a report to the USEPA and the Ohio EPA comparing the actual hourly emissions and percent removal of each pollutant controlled at the unit to the actual hourly emissions and percent removal at the existing unit under the plan prior to repowering, determined in accordance with 40 CFR Part 75.
- (C) Decision to terminate. If at any time before the end of the repowering extension and before completion of construction and start-up testing, the owners and operators decide to terminate good faith efforts to design, construct, and test the qualified repowering technology on the unit to be repowered under an approved repowering plan, then the designated representative shall submit a notice to the USEPA and the Ohio EPA by the earlier of the end of the repowering extension or a date within thirty days of such decision, stating the date on which the decision was made.

[Comment: For dates of non-regulatory government publications, publications of recognized organizations and associations, federal rules, and federal statutory provisions referenced in this rule, see the last paragraph of rule 3745-103-01 of the Administrative Code titled "Incorporation by reference."]

The purpose of rules 3745-103-22 to 3745-103-54 of the Administrative Code is to establish the requirements and procedures for:

- (A) The election of a combustion or process source that emits sulfur dioxide to become an affected unit under the acid rain program, pursuant to section 410 of the Clean Air Act; and
- (B) Issuing and modifying operating permits; certifying monitors; and allocating, tracking, transferring, surrendering and deducting allowances for combustion or process sources electing to become affected units.

3745-103-24      **Opt-in relationship to the acid rain program requirements.**

[Comment: For dates of non-regulatory government publications, publications of recognized organizations and associations, federal rules, and federal statutory provisions referenced in this rule, see the last paragraph of rule 3745-103-01 of the Administrative Code titled "Incorporation by reference."]

(A) General.

- (1) For purposes of applying 40 CFR Parts 72, 73, 75, 77 and 78, each opt-in source shall be treated as an affected unit.
- (2) 40 CFR Part 72 Subparts A, B, G, and H, and rules 3745-103-01, 3745-103-02, 3745-103-03, 3745-103-04, and 3745-103-05 of the Administrative Code, shall apply to this rule.

(B) Permits. The director shall act in accordance with this rule and rules 3745-77-08 and 3745-103-13 of the Administrative Code, and 40 CFR Part 71 in issuing or denying an opt-in permit and incorporating it into a combustion or process source's operating permit. To the extent that any requirement of this rule, 40 CFR Part 72, 40 CFR Part 78, and rule 3745-103-13 of the Administrative Code, are inconsistent with the requirements of rule 3745-77-08 of the Administrative Code, 40 CFR Part 71, the requirements of this rule, 40 CFR Part 72, 40 CFR Part 78, and rule 3745-103-13 of the Administrative Code, shall take precedence and shall govern the issuance, denials, revision, reopening, renewal, and appeal of the opt-in permit.

(C) Appeals.

- (1) The procedures for appeals of decisions of the director under this rule are contained in Chapter 3745-47 of the Administrative Code.
- (2) The procedures for appeals of decisions of the USEPA under this rule are contained in 40 CFR Part 78.

(D) Allowances. A combustion or process source that becomes an affected unit under this rule shall be subject to all the requirements of 40 CFR Part 73, Subparts C and D, consistent with rules 3745-103-41 to 3745-103-51 of the Administrative Code.

(E) Excess emissions. A combustion or process source that becomes an affected unit under this rule shall be subject to the requirements of 40 CFR Part 77 applicable to excess emissions of sulfur dioxide and shall not be subject to the requirements of 40 CFR Part 77 applicable to excess emissions of nitrogen oxides.

(F) Monitoring. A combustion or process source that becomes an affected unit under this rule shall be subject to all the requirements of 40 CFR Part 75, consistent with rules 3745-103-52 and 3745-103-53 of the Administrative Code.

Effective: 01/12/2007

3745-103-25      **Opt-in designated representative.**

- (A) The provisions of rule 3745-103-06 of the Administrative Code shall apply to the designated representative of an opt-in source.
- (B) If a combustion or process source is located at the same facility as one or more affected units, the combustion or process source shall have the same designated representative as the other affected units at the facility.
- (C) Provisions for opt-in permit applicants
  - (1) Notwithstanding paragraph (B) of this rule, a certifying official of one or more combustion or process sources that are located at the same source as one or more affected utility units and that, on the date on which an initial opt-in permit application is submitted for such combustion or process sources and thereafter, do not serve a generator that produces electricity for sale may elect to designate, for such combustion or process sources, a different designated representative than the designated representative for the affected utility units.
  - (2) In order to make such an election, the certifying official shall submit to the USEPA, in a format prescribed by the USEPA:
    - (a) A certification that the combustion or process sources for which the election is made meet each of the requirements for election in paragraph (C)(1) of this rule; and
    - (b) A certificate of representation for the designated representative of the combustion or process sources in accordance with rule 3745-103-06 of the Administrative Code.
  - (3) The USEPA will rely on such certificate of representation in accordance with rule 3745-103-06 of the Administrative Code, unless the USEPA determines that the requirements for election in paragraph (C)(1) of this rule are not met. If, after the election is made, and the requirements for election in paragraph (C)(1) of this rule are no longer met, the election shall automatically terminate on the first date on which the requirements are no longer met and, within thirty days of that date, a certificate of representation for the designated representative of the combustion or process source shall be submitted consistent with paragraph (B) of this rule.

3745-103-26      **Roles - USEPA and director.**

(A) USEPA responsibilities. The USEPA shall be responsible for the following activities under the opt-in provisions of the acid rain program:

- (1) Calculating the baseline or alternative baseline and allowance allocation, and allocating allowances for combustion or process sources that become affected units under this rule;
- (2) Certifying or recertifying monitoring systems for combustion or process sources as provided under rules 3745-103-52 to 3745-103-54 of the Administrative Code;
- (3) Establishing allowance accounts, tracking allowances, assessing end-of-year compliance, determining reduced utilization, approving thermal energy transfer and accounting for the replacement of thermal energy, closing accounts for opt-in sources that shut down, are reconstructed, become affected under rule 3745-103-02 of the Administrative Code, or fail to renew their opt-in permit, and deducting allowances as provided under rules 3745-103-41 to 3745-103-51 of the Administrative Code; and
- (4) Ensuring that the opt-in source meets all withdrawal conditions prior to withdrawal from the acid rain program as provided in rule 3745-103-31 of the Administrative Code; and
- (5) Approving and disapproving the request to withdraw from the acid rain program.

(B) Director responsibilities. The director shall be responsible for the following activities:

- (1) Issuing the draft and final opt-in permit;
- (2) Revising and renewing the opt-in permit; and
- (3) Terminating the opt-in permit for an opt-in source as provided in rules 3745-103-31, 3745-103-47, and 3745-103-51 of the Administrative Code.

3745-103-27      **Opt-in permit contents.**

[Comment: For dates of non-regulatory government publications, publications of recognized organizations and associations, federal rules, and federal statutory provisions referenced in this rule, see the last paragraph of rule 3745-103-01 of the Administrative Code titled "Incorporation by reference."]

- (A) The opt-in permit shall be included in the acid rain permit.
- (B) Scope. The opt-in permit provisions shall apply only to the opt-in source and not to any other affected units.
- (C) Contents. Each opt-in permit, including any draft or proposed opt-in permit, shall contain the following elements in a format specified by the USEPA:
  - (1) All elements required for a complete opt-in permit application as provided in rule 3745-103-29 of the Administrative Code for combustion sources or in rule 3745-103-30 of the Administrative Code for process sources or, if applicable, all elements required for a complete opt-in permit renewal application as provided in rule 3745-103-32 of the Administrative Code for combustion sources or rule 3745-103-30 of the Administrative Code for process sources;
  - (2) The allowance allocation for the opt-in source as determined by the USEPA under rules 3745-103-33 to 3745-103-39 of the Administrative Code for combustion sources or under rules 3745-103-40 to 3745-103-51 of the Administrative Code for process sources;
  - (3) The standard permit requirements as provided under rule 3745-103-05 of the Administrative Code, except that the provisions in paragraph (D) of rule 3745-103-05 of the Administrative Code shall not be included in the opt-in permit; and
  - (4) Termination. The provision that participation of a combustion or process source in the acid rain program may be terminated only in accordance with rules 3745-103-31, 3745-103-47, and 3745-103-51 of the Administrative Code.
- (D) Each opt-in permit is deemed to incorporate the definitions of terms under rule 3745-103-01 of the Administrative Code.
- (E) Permit shield. Each opt-in source operated in accordance with the opt-in permit that governs the opt-in source and that was issued in compliance with Title IV of the Clean Air Act, as provided in 40 CFR Parts 72, 73, 74, 75, 77, and 78, shall be deemed to be operating in compliance with the acid rain program, except as provided in paragraph (G)(6) of rule 3745-103-05 of the Administrative Code.

- (F) Term of opt-in permit. An opt-in permit shall be issued for a period of five years and may be renewed in accordance with rule 3745-103-32 of the Administrative Code; provided
- (1) If an opt-in permit is issued prior to January 1, 2000, then the opt-in permit may, at the option of the director expire on December 31, 1999; and
  - (2) If an affected unit with an acid rain permit is located at the same source as the combustion source, the combustion source's opt-in permit may, at the option of the director, expire on the same date as the affected unit's acid rain permit expires.

3745-103-28      **Opt-in permit process.**

[Comment: For dates of non-regulatory government publications, publications of recognized organizations and associations, federal rules, and federal statutory provisions referenced in this rule, see the last paragraph of rule 3745-103-01 of the Administrative Code titled "Incorporation by reference."]

- (A) Submission. The designated representative of a combustion or process source may submit an opt-in permit application and a monitoring plan to the director and a copy to the USEPA at any time for any combustion or process source that is operating.
  
- (B) Issuance or denial of opt-in permits. The director shall issue or deny opt-in permits or revisions of opt-in permits in accordance with the procedures in rule 3745-77-02 of the Administrative Code, 40 CFR Part 71, and 40 CFR Part 72, Subparts F and G, except as provided in this rule.
  - (1) Supplemental information. Regardless of whether the opt-in permit application is complete, the USEPA or the director may request submission of any additional information that the USEPA or the director determines to be necessary in order to review the opt-in permit application or to issue an opt-in permit.
  - (2) Interim review of monitoring plan. The USEPA will determine, on an interim basis, the sufficiency of the monitoring plan, accompanying the opt-in permit application. A monitoring plan is sufficient, for purposes of interim review, if the plan appears to contain information demonstrating that all SO<sub>2</sub> emissions, NO<sub>x</sub> emissions, CO<sub>2</sub> emissions, and opacity of the combustion or process source are monitored and reported in accordance with 40 CFR Part 75. This interim review of sufficiency shall not be construed as the approval or disapproval of the combustion or process source's monitoring system.
  - (3) Issuance of draft opt-in permit. After the USEPA determines whether the combustion or process source's monitoring plan is sufficient under paragraph (B) of this rule, the director shall serve the draft opt-in permit or the denial of a draft permit or the draft opt-in permit revisions or the denial of draft opt-in permit revisions on the designated representative of the combustion or process source submitting an opt-in permit application. A draft permit or draft opt-in permit revision shall not be served or issued if the monitoring plan is determined not to be sufficient.
  - (4) Confirmation by source of intention to opt-in. Within twenty-one calendar days from the date of service of the draft opt-in permit or the denial of the draft opt-in permit, the designated representative of a combustion or process source submitting an opt-in permit application must submit to the USEPA and the director, in writing, a confirmation or recision of the source's intention to become an opt-in source under this rule. The USEPA shall treat the failure to

make a timely submission as a recision of the source's intention to become an opt-in source and as a withdrawal of the opt-in permit application.

- (5) Issuance of draft opt-in permit. If the designated representative confirms the combustion or process source's intention to opt in under paragraph (B) of this rule, the director will give notice of the draft opt-in permit or denial of the draft opt-in permit and an opportunity for public comment, as provided in accordance with rule 3745-77-08 of the Administrative Code with regard to a draft permit or the denial of a draft permit.
- (6) Permit decision deadlines. The director will issue or deny an opt-in permit within eighteen months of receipt of a complete opt-in permit application or such lesser time approved for operating permits under rule 3745-77-08 of the Administrative Code.
- (7) Withdrawal of opt-in permit application. A combustion or process source may withdraw its opt-in permit application at any time prior to the issuance of the final opt-in permit. Once a combustion or process source withdraws its application, in order to re-apply, the designated representative must submit a new opt-in permit application in accordance with rule 3745-103-29 of the Administrative Code for combustion sources or rule 3745-103-30 of the Administrative Code for process sources.

(C) (Reserved)

(D) Entry into the acid rain program.

- (1) Effective date. The effective date of the opt-in permit shall be either January first, April first, July first, or October first for a combustion or process source providing monthly data under rule 3745-103-33 of the Administrative Code, or January first for a combustion or process source providing annual data under rule 3745-103-33 of the Administrative Code, following the later of the issuance of the opt-in permit by the director or the completion of monitoring system certification, as provided in rules 3745-103-52 and 3745-103-53 of the Administrative Code for combustion sources or rule 3745-103-54 of the Administrative Code for process sources. The combustion or process source shall become an opt-in source and an affected unit as of the effective date of the opt-in permit.
- (2) Allowance allocation. After the opt-in permit becomes effective, the USEPA will allocate allowances to the opt-in source as provided in rule 3745-103-41 of the Administrative Code. If the effective date of the opt-in permit is not January first, allowances for the first year shall be prorated as provided in rule 3745-103-39 of the Administrative Code.

- (E) Expiration of opt-in permit. An opt-in permit that is issued before the completion of monitoring system certification under rules 3745-103-52 and 3745-103-53 of the Administrative Code for combustion sources or under rule 3745-103-54 of the Administrative Code for process sources shall expire one hundred eighty days after the director serves the opt-in permit on the designated representative of the combustion or process source governed by the opt-in permit, unless such monitoring system certification is complete. The designated representative may petition the USEPA and the director to extend this time period in which an opt-in permit expires and must explain in the petition why such an extension should be granted. The designated representative of a combustion source governed by an expired opt-in permit that seeks to become an opt-in source must submit a new opt-in permit application.

**Opt-in application requirements for combustion sources.**

- (A) Opt-in permit application. Each complete opt-in permit application for a combustion source shall contain the following elements in a format prescribed by the USEPA:
- (1) Identification of the combustion source, including company name, plant name, plant site address, mailing address, description of the combustion source, and information and diagrams on the combustion source's configuration;
  - (2) Identification of the designated representative, including name, address, telephone number, and facsimile number;
  - (3) The year and month the combustion source commenced operation;
  - (4) The number of hours the combustion source operated in the six months preceding the opt-in permit application and supporting documentation;
  - (5) The baseline or alternative baseline data under rule 3745-103-33 of the Administrative Code;
  - (6) The actual SO<sub>2</sub> emissions rate under rule 3745-103-34 of the Administrative Code;
  - (7) The allowable 1985 SO<sub>2</sub> emissions rate under rule 3745-103-35 of the Administrative Code;
  - (8) The current allowable SO<sub>2</sub> emissions rate under rule 3745-103-36 of the Administrative Code;
  - (9) The current promulgated SO<sub>2</sub> emissions rate under rule 3745-103-37 of the Administrative Code;
  - (10) If the combustion source seeks to qualify for a transfer of allowances from the replacement of thermal energy, a thermal energy plan as provided in rule 3745-103-48 of the Administrative Code for combustion sources; and
  - (11) A statement whether the combustion source was previously an affected unit under this rule;
  - (12) A statement that the combustion source is not an affected unit under rule 3745-103-02 of the Administrative Code and does not have an exemption under rule 3745-103-03 or 3745-103-04 of the Administrative Code;
  - (13) A complete compliance plan for SO<sub>2</sub> under rule 3745-103-09 of the Administrative Code; and

(14) The following statement signed by the designated representative of the combustion source: "I certify that the data submitted under rules 3745-103-33 to 3745-103-39 of the Administrative Code reflects actual operations of the combustion source and has not been adjusted in any way."

(B) Accompanying documents. The designated representative of the combustion source shall submit a monitoring plan in accordance with rule 3745-103-53 of the Administrative Code.

3745-103-31      **Opt-in withdrawal.**

[Comment: For dates of non-regulatory government publications, publications of recognized organizations and associations, federal rules, and federal statutory provisions referenced in this rule, see the last paragraph of rule 3745-103-01 of the Administrative Code titled "Incorporation by reference."]

- (A) Withdrawal through administrative amendment. An opt-in source may request to withdraw from the acid rain program by submitting an administrative amendment under rule 3745-103-18 of the Administrative Code; provided that the amendment will be treated as received by the director upon issuance of the notification of the acceptance of the request to withdraw under paragraph (F)(1) of this rule.
- (B) Requesting withdrawal. To withdraw from the acid rain Program, the designated representative of an opt-in source shall submit to the USEPA and the director a request to withdraw effective January first of the year after the year in which the submission is made. The submission shall be made no later than December first of the calendar year preceding the effective date of withdrawal.
- (C) Conditions for withdrawal. In order for an opt-in source to withdraw, the following conditions must be met:
  - (1) By no later than January thirtieth of the first calendar year in which the withdrawal is to be effective, the designated representative must submit to the USEPA an annual compliance certification report pursuant to rule 3745-103-44 of the Administrative Code.
  - (2) If the opt-in source has excess emissions in the calendar year before the year for which the withdrawal is to be in effect, the designated representative must submit an offset plan for excess emissions, pursuant to 40 CFR Part 77, that provides for immediate deduction of allowances.
- (D) USEPA's action on withdrawal. After the opt-in source meets the requirements for withdrawal under paragraphs (B) and (C) of this rule, the USEPA will deduct allowances required to be deducted under 40 CFR 73.35 and 40 CFR Part 77 and allowance equal in number to and with the same or earlier compliance use date as those allocated under rule 3745-103-41 of the Administrative Code for the first year for which the withdrawal is to be effective and all subsequent years.
- (E) Opt-in source's prior violations. An opt-in source that withdraws from the acid rain program shall comply with all requirements under the acid rain program concerning all years for which the opt-in source was an affected unit, even if such requirements arise, or must be complied with after the withdrawal takes effect.
- (F) Notification.

- (1) After the requirements for withdrawal under paragraphs (B) and (C) of this rule are met and after the USEPA's action on withdrawal under paragraph (D) of this rule is complete, the USEPA will issue a notification to the director and the designated representative of the opt-in source of the acceptance of the opt-in source's request to withdraw.
- (2) If the requirements for withdrawal under paragraphs (B) and (C) of this rule are not met or the USEPA's action under paragraph (D) of this rule cannot be completed, the USEPA will issue a notification to the director and the designated representative of the opt-in source that the opt-in source's request to withdraw is denied. If the opt-in source's request to withdraw is denied, the opt-in source shall remain in the opt-in Program and shall remain subject to the requirements for opt-in sources contained in this rule.

(G) Permit amendment.

- (1) After the USEPA issues a notification under paragraph (F)(1) of this rule that the requirements for withdrawal have been met (including the deduction of the full amount of allowances as required under paragraph (D) of, this rule), the director shall amend, in accordance with rules 3745-103-15 and 3745-103-18 of the Administrative Code, the opt-in source's acid rain permit to terminate the opt-in permit, not later than sixty days from the issuance of the notification under paragraph (F) of this rule.
- (2) The termination of the opt-in permit under paragraph (G)(1) of this rule will be effective of January first of the year for which the withdrawal is requested. An opt-in source shall continue to be an affected unit until the effective date of the termination.

(H) Reapplication upon failure to meet conditions of withdrawal. If the USEPA denies the opt-in source's request to withdraw, the designated representative may submit another request to withdraw in accordance with paragraphs (B) and (C) of this rule.

(I) Ability to return to the acid rain program. Once a combustion or process source withdraws from the acid rain program and its opt-in permit is terminated, a new opt-in permit application for the combustion or process source may not be submitted prior to the date that is four years after the date on which the opt-in permit became effective.

3745-103-32      **Revision and renewal of opt-in permit.**

[Comment: For dates of non-regulatory government publications, publications of recognized organizations and associations, federal rules, and federal statutory provisions referenced in this rule, see the last paragraph of rule 3745-103-01 of the Administrative Code titled "Incorporation by reference."]

- (A) The designated representative of an opt-in source may submit revisions to its opt-in permit in accordance with rules 3745-103-16 to 3745-103-20 of the Administrative Code.
- (B) The designated representative of an opt-in source may renew its opt-in permit by meeting the following requirements:
  - (1)
    - (a) In order to renew an opt-in permit if the director is the permitting authority for the renewed permit, the designated representative of an opt-in source must submit to the director an opt-in permit application at least eighteen months prior to the expiration of an existing opt-in permit or such shorter time as may be approved for operating permits under rule 3745-77-08 of the Administrative Code.
    - (2) Each complete opt-in permit application submitted to renew an opt-in permit shall contain the following elements in a format prescribed by the USEPA:
      - (a) Elements contained in the opt-in source's initial opt-in permit application as specified under paragraphs (A)(1), (A)(2), (A)(10), (A)(12), and (A)(13) of rule 3745-103-29 of the Administrative Code.
      - (b) An updated monitoring plan, if applicable under 40 CFR 75.53(b).
  - (C)
    - (1) Upon receipt of an opt-in permit application submitted to renew an opt-in permit, the director shall issue or deny an opt-in permit in accordance with the requirements under rules 3745-103-26 to 3745-103-32 of the Administrative Code, except as provided in paragraph (C)(2) of this rule.
    - (2) When issuing a renewed opt-in permit, the director shall not alter an opt-in source's allowance allocation, as established under rule 3745-103-26 to 3745-103-39 of the Administrative Code for combustion sources and under rules 3745-103-26 to 3745-103-32 of the Administrative Code and rule 3745-103-40 of the Administrative Code for process sources, in the opt-in permit that is being renewed.

**Opt-in data for baseline and alternative baseline.****(A) Acceptable data.**

- (1) The designated representative of a combustion source shall submit either the baseline data specified in this paragraph or alternative baseline data under paragraph (C) of this rule. The designated representative shall also submit the calculations under this rule based on such data.
- (2) The following baseline data shall be submitted for the combustion source for the calendar year(s) under paragraph (A)(3) of this rule:
  - (a) Monthly or annual quantity of each type of fuel consumed, expressed in thousands of tons for coal, thousands of barrels for oil, and million standard cubic feet for natural gas. If other fuels are used, the combustion source must specify units of measure.
  - (b) Monthly or annual heat content of fuel consumed for each type of fuel consumed, expressed in Btu per pound for coal, Btu per barrel for oil, and Btu per standard cubic foot for natural gas. If other fuels are used, the combustion source must specify units of measure.
  - (c) Monthly or annual sulfur content of fuel consumed for each type of fuel consumed, expressed as a percentage by weight.

**(3) Calendar years.**

- (a) For combustion sources that commenced operating prior to January 1, 1985, data under this rule shall be submitted for calendar years 1985, 1986, and 1987.
- (b) For combustion sources that commenced operation after January 1, 1985, the data under this rule shall be submitted for the first three consecutive calendar years during which the combustion source operated after December 31, 1985.

**(B) Calculation of baseline and alternative baseline.**

- (1) For combustion sources that commenced operation prior to January 1, 1985, the baseline is the average annual quantity of fuel consumed during calendar years 1985, 1986, and 1987, expressed in million British thermal units. The baseline shall be calculated as follows:

$$\text{Baseline} = \frac{\sum_{\text{Year} = 1985}^{1987} \text{Annual Fuel Consumption}}{3}$$

Where,

(a) For a combustion source submitting monthly data,

$$\text{Annual Fuel Consumption} = \sum_{\text{MONTHS} = \text{Jan}}^{\text{Dec}} \sum_{\text{Fuel Types}} \left[ \begin{array}{l} \text{Quantity Of Fuel Consumed} \\ \times \text{Heat Content} \times \text{Unit Conversion} \end{array} \right]$$

--

And unit conversion

= 2 for coal
= 0.001 for oil
= 1 for gas

For other fuels, the combustion source must specify unit conversion; or

(b) For a combustion source submitting annual data,

$$\text{Annual Fuel Consumption} = \sum_{\text{Fuel Type}} \left[ \begin{array}{l} \text{Quantity Of Fuel Consumed} \\ \times \text{Heat Content} \times \text{Unit Conversion} \end{array} \right]$$

--

And unit conversion

= 2 for coal
= 0.001 for oil
= 1 for gas

For other fuels, the combustion source must specify unit conversion.

(2) For combustion sources that commenced operation after January 1, 1985, the alternative baseline is the average annual quantity of fuel consumed in the first three consecutive calendar years during which the combustion source operated after December 31, 1985, expressed in MMBtu. The alternative baseline shall be calculated as follows:

$$\text{Alternative Baseline} = \frac{\sum_{\text{First 3 Consecutive Years}} \text{Annual Fuel Consumption}}{3}$$

Where,

"Annual fuel consumption" is as defined under paragraph (B)(1)(a) or (B)(1)(b) of this rule.

(C) Alternative data.

- (1) For combustion sources for which any of the data under paragraph (B) of this rule is not available due solely to a natural catastrophe, data as set forth in paragraph (A)(2) of this rule for the first three consecutive calendar years for which data is available after December 31, 1985, may be submitted. The alternative baseline for these combustion sources shall be calculated using the equation for alternative baseline in paragraph (B)(2) of this rule and the definition of annual fuel consumption in paragraph (B)(1)(a) or (B)(1)(b) of this rule.
- (2) Except as provided in paragraph (C)(1) of this rule, no alternative data may be submitted. A combustion source that cannot submit all required data, in accordance with this rule, shall not be eligible to submit an opt-in permit application.

(D) USEPA's action. The USEPA may accept in whole or in part or with changes as appropriate, request additional information, or reject data or alternative data submitted for a combustion source's baseline or alternative baseline.

Effective: 01/12/2007

3745-103-34      **Actual SO<sub>2</sub> emissions rate.**

[Comment: For dates of non-regulatory government publications, publications of recognized organizations and associations, federal rules, and federal statutory provisions referenced in this rule, see the last paragraph of rule 3745-103-01 of the Administrative Code titled "Incorporation by reference."]

- (A) Data requirements. The designated representative of a combustion source shall submit the calculations under this rule based on data submitted under rule 3745-103-33 of the Administrative Code for the following calendar year:
- (1) For combustion sources that commenced operation prior to January 1, 1985, the calendar year for calculating the actual SO<sub>2</sub> emissions rate shall be 1985.
  - (2) For combustion sources that commenced operation after January 1, 1985, the calendar year for calculating the actual SO<sub>2</sub> emissions rate shall be the first year of the three consecutive calendar years of the alternative baseline under paragraph (B)(2) of rule 3745-103-33 of the Administrative Code.
  - (3) For combustion sources meeting the requirements of paragraph (C) of rule 3745-103-33 of the Administrative Code, the calendar year for calculating the actual SO<sub>2</sub> emissions rate shall be the first year of the three consecutive calendar years to be used as alternative data under paragraph (C) of rule 3745-103-33 of the Administrative Code.
- (B) SO<sub>2</sub> emissions factor calculation. The SO<sub>2</sub> emissions factor for each type of fuel consumed during the specified year, expressed in pounds per thousand tons for coal, pounds per thousand barrels for oil and pounds per million cubic feet at standard conditions for gas, shall be calculated as follows:

SO<sub>2</sub> emissions factor = ( Average percent of sulfur by weight ) x ( K ), where,

Average percent of sulfur by weight

= Annual average, for a combustion source submitting annual data

= Monthly average, for a combustion source submitting monthly data

K = 39,000 for bituminous coal or anthracite

= 35,000 for subbituminous coal

= 30,000 for lignite

= 5,964 for distillate (light) oil

= 6,594 for residual (heavy) oil

= 0.6 for natural gas

For other fuels, the combustion source must specify the SO<sub>2</sub> emissions factor.

(C) Annual SO<sub>2</sub> emissions calculation. Annual SO<sub>2</sub> emissions for the specified calendar year, expressed in pounds, shall be calculated as follows:

(1) For a combustion source submitting monthly data,

$$\text{Annual SO}_2 \text{ Emissions} = \sum_{\text{Month} = \text{Jan}}^{\text{Dec}} \sum_{\text{Fuel TYPES}} \left[ \begin{array}{l} \text{Quantity Of Fuel Consumed} \\ \times \text{SO}_2 \text{ Emissions Factor} \\ \times (1 - \text{Control System Efficiency}) \\ \times (1 - \text{Fuel Pre-Treatment Efficiency}) \end{array} \right]$$

(2) For a combustion source submitting annual data:

$$\text{Annual SO}_2 \text{ Emissions} = \sum_{\text{Fuel Types}} \left[ \begin{array}{l} \text{Quantity Of Fuel Consumed} \\ \times \text{SO}_2 \text{ Emissions Factor} \\ \times (1 - \text{Control System Efficiency}) \\ \times (1 - \text{Fuel Pre-Treatment Efficiency}) \end{array} \right]$$

Where,

"Quantity of fuel consumed" is as defined under paragraph (A)(2)(a) of rule 3745-103-33 of the Administrative Code; "SO<sub>2</sub> emissions factor" is as defined under paragraph (B) of this rule; "control system efficiency" is as defined under 40 CFR 60.48a and 40 CFR Part 60, Appendix A, Method 19, if applicable; and "fuel pre-treatment efficiency" is as defined under 40 CFR 60.48a and 40 CFR Part 60, Appendix A, Method 19, if applicable.

(D) Annual fuel consumption calculation. Annual fuel consumption for the specified calendar year, expressed in MMBtu, shall be calculated as defined under paragraph (B)(1) or (B)(2) of rule 3745-103-33 of the Administrative Code.

(E) Actual SO<sub>2</sub> emissions rate calculation. The actual SO<sub>2</sub> emissions rate for the specified calendar year, expressed in pounds per MMBtu, shall be calculated as follows:

$$\text{Actual SO}_2 \text{ Emissions Rate} = \frac{\text{Annual SO}_2 \text{ Emissions}}{\text{Annual Fuel Consumption}}$$

Effective: 01/12/2007

3745-103-35      **1985 allowable SO<sub>2</sub> emissions rate.**

(A) Data requirements. The designated representative of the combustion source shall submit the following data and the calculations under paragraph (B) of this rule based on the submitted data:

- (1) Allowable SO<sub>2</sub> emissions rate of the combustion source expressed in pounds per MMBtu as defined under rule 3745-103-01 of the Administrative Code for the calendar year specified in paragraph (A)(2) of this rule. If the allowable SO<sub>2</sub> emissions rate is not expressed in pounds per MMBtu, the allowable emissions rate shall be converted to pounds per MMBtu by multiplying the emissions rate by the appropriate factor as specified in Table 1 of this rule.

Table 1: Factors to convert emission limits to pounds of SO<sub>2</sub>/MMBtu

--

Unit Measurement	Bituminous Coal	Subbituminous Coal	Lignite Coal	Oil
lbs sulfur/MMBtu	2.0	2.0	2.0	2.0
% sulfur in fuel	1.66	2.22	2.86	1.07
PPM SO <sub>2</sub>	0.00287	0.00384		0.00167
PPM sulfur in fuel	--	--	--	0.00334
Tons SO <sub>2</sub> /hour	$2 \times 8760 / (\text{annual fuel consumption for specified year}^1 * 10^3)$			
lbs SO <sub>2</sub> /hour	$8760 / (\text{annual fuel consumption for specified year}^1 * 10^6)$			

<sup>1</sup> Annual fuel consumption as defined under paragraph (B)(1) or (B)(2) of rule 3745-103-33 of the Administrative Code or; specified calendar year as defined under paragraph (A)(2) of rule 3745-103-35 of the Administrative Code.

- (2) Citation of statute, regulations, and any other authority under which the allowable emissions rate under paragraph (A)(1) of this rule is established as applicable to the combustion source.
- (3) Averaging time associated with the allowable emissions rate under paragraph (A)(1) of this rule.
- (4) The annualization factor for the combustion source, based on the type of combustion source and the associated averaging time of the allowable emissions rate of the combustion source, as set forth in the Table 2 of this rule:

Table 2: Annualization factors for SO<sub>2</sub> emission rates

--

Type of Combustion Source	Annualization Factor for Scrubbed Unit	Annualization Factor for Unscrubbed Unit

Unit combusting oil, gas, or some combination	1.00	1.00
Coal unit with averaging time < = 1 day	0.93	0.89
Coal unit with averaging time = 1 week	0.97	0.92
Coal unit with averaging time = 30 days	1.00	0.96
Coal unit with averaging time = 90 days	1.00	1.00
Coal unit with averaging time = 1 year	1.00	1.00
Coal unit with federal limit, but averaging time not specified	0.93	0.89

## (B) Calendar year.

- (1) For combustion sources that commenced operation prior to January 1, 1985, the calendar year for the allowable SO<sub>2</sub> emissions rate shall be 1985.
- (2) For combustion sources that commenced operation after January 1, 1985, the calendar year for the allowable SO<sub>2</sub> emissions rate shall be the first year of the three consecutive calendar years of the alternative baseline under paragraph (B)(2) rule 3745-103-33 of the Administrative Code.
- (3) For combustion sources meeting the requirements of paragraph (C) rule 3745-103-33 of the Administrative Code, the calendar year for calculating the allowable SO<sub>2</sub> emissions rate shall be the first year of the three consecutive calendar years to be used as alternative data under paragraph (C) rule 3745-103-33 of the Administrative Code.

(C) 1985 allowable SO<sub>2</sub> emissions rate calculation. The allowable SO<sub>2</sub> emissions rate for the specified calendar year shall be calculated as follows:

$$1985 \text{ allowable SO}_2 \text{ emissions rate} = (\text{allowable SO}_2 \text{ emissions rate}) \times (\text{annualization factor})$$

**Current allowable SO<sub>2</sub> emissions rate.**

The designated representative shall submit the following data:

- (A) Current allowable SO<sub>2</sub> emissions rate of the combustion source, expressed in pounds per MMBtu, which shall be the most stringent federally enforceable emissions limit in effect as of the date of submission of the opt-in application. If the allowable SO<sub>2</sub> emissions rate is not expressed in pounds per MMBtu, the allowable emissions rate shall be converted to pounds per MMBtu by multiplying the allowable rate by the appropriate factor as specified in Table 1 of rule 3745-103-35 of the Administrative Code.
- (B) Citations of statute, regulation, and any other authority under which the allowable emissions rate under paragraph (A) of this rule is established as applicable to the combustion source.
- (C) Averaging time associated with the allowable emissions rate under paragraph (A) of this rule.

3745-103-38 **Opt-in allocation formula.**

The USEPA will calculate the annual allowance allocation for a combustion source based on the data, corrected as necessary, under rules 3745-103-33 to 3745-103-37 of the Administrative Code as follows:

- (A) For combustion sources for which the current promulgated SO<sub>2</sub> emissions limit under rule 3745-103-37 of the Administrative Code is greater than or equal to the current allowable SO<sub>2</sub> emissions rate under rule 3745-103-36 of the Administrative Code, the number of allowances allocated for each year equals:

$$\text{Allowances} = \frac{\left[ \begin{array}{c} \text{Baseline} \\ \text{Or} \\ \text{Alternative Baseline} \end{array} \right] \times \text{The Lesser Of} \left[ \begin{array}{c} \text{The Actual SO}_2 \text{ Emissions Rate} \\ \text{Or} \\ \text{The 1985 Allowable SO}_2 \text{ Emissions Rate} \\ \text{Or} \\ \text{The Current Allowable SO}_2 \text{ Emissions Rate} \end{array} \right]}{2000}$$

- (B) For combustion sources for which the current promulgated SO<sub>2</sub> emissions limit under rule 3745-103-37 of the Administrative Code is less than the current allowable SO<sub>2</sub> emissions rate under rule 3745-103-36 of the Administrative Code,

- (1) The number of allowances for each year ending prior to the effective date of the promulgated SO<sub>2</sub> emissions limit equals:

$$\text{Allowances} = \frac{\left[ \begin{array}{c} \text{Baseline} \\ \text{Or} \\ \text{Alternative Baseline} \end{array} \right] \times \text{The Lesser Of} \left[ \begin{array}{c} \text{The Actual SO}_2 \text{ Emissions Rate} \\ \text{Or} \\ \text{The 1985 Allowable SO}_2 \text{ Emissions Rate} \\ \text{Or} \\ \text{The Current Allowable SO}_2 \text{ Emissions Rate} \end{array} \right]}{2000}$$

- (2) The number of allowances for the year that includes the effective date of the promulgated SO<sub>2</sub> emissions limit and for each year thereafter equals:

$$\text{Allowances} = \frac{\left[ \begin{array}{c} \text{Baseline} \\ \text{Or} \\ \text{Alternative Baseline} \end{array} \right] \times \text{The Lesser Of} \left[ \begin{array}{c} \text{The Actual SO}_2 \text{ Emissions Rate} \\ \text{Or} \\ \text{The 1985 Allowable SO}_2 \text{ Emissions Rate} \\ \text{Or} \\ \text{The Current Promulgated SO}_2 \text{ Emissions Rate} \end{array} \right]}{2000}$$

3745-103-39 **Allowance allocation for combustion sources becoming opt-in sources on a date other than January first.**

(A) Date of entry.

- (1) If an opt-in source provided monthly data under rule 3745-103-33 of the Administrative Code, the opt-in source's opt-in permit may become effective at the beginning of a calendar quarter as of January first, April first, July first, or October first.
- (2) If an opt-in source provided annual data under rule 3745-103-33 of the Administrative Code, the opt-in source's opt-in permit must become effective on January first.

(B) Prorating by calendar quarter. Where a combustion source's opt-in permit becomes effective on April first, July first, or October first of a given year, the USEPA will prorate the allowance allocation for that first year by the calendar quarters remaining in the year as follows:

Allowances for the first year

$$= \left( \frac{\text{First Year Partial Baseline}}{\text{Baseline Or Alternative Baseline}} \right) \times \text{Annual Allocation Of Allowances For The First Year}$$

(1) For combustion sources that commenced operations before January 1, 1985,

$$\text{First Year Partial Baseline} = \frac{\sum_{\text{Year} = 1985}^{1987} \text{Fuel Consumption For Remaining Calendar Quarters}}{3}$$

(2) For combustion sources that commenced operations after January 1, 1985,

$$\text{First Year Partial Baseline} = \frac{\sum_{\text{First 3 Consecutive Years}} \text{Fuel Consumption For The Remaining Calendar Quarters}}{3}$$

(3) Under paragraphs (B)(1) and (B)(2) of this rule,

(a) "Remaining calendar quarters" shall be the calendar quarters in the first year for which the opt-in permit will be effective.

(b) Fuel consumption for remaining calendar quarters =

$$\sum_{\text{Months} = \text{Apr.}, \text{Jul.}, \text{Or Oct.}}^{\text{Qtr}} \sum_{\text{Fuel Types}} \text{Quantity Of Fuel Consumed} \times \text{Heat Content} \times \text{Unit Conversion}$$

Where unit conversion = 2 for coal

= 0.001 for oil

= 1 for gas

For other fuels, the combustion source must specify unit conversion;

And where starting month = April, if effective date is April first;

= July, if effective date is July first

= October, if effective date is October first

3745-103-41      **Establishment of opt-in source allowance accounts.**

- (A) Establishing accounts. Not earlier than the date on which a combustion or process source becomes an affected unit under this chapter and upon receipt of a request for a compliance account under paragraph (B) of this rule, the USEPA will establish a compliance account (unless the source that includes the opt-in source already has a compliance account or the opt-in source has, under paragraph (C) of rule 3745-103-25 of the Administrative Code, a different designated representative than the designated representative for the source) and allocate allowances in accordance with rules 3745-103-33 to 3745-103-39 of the Administrative Code for combustion sources or rule 3745-103-40 of the Administrative Code for process sources.
  
- (B) Request for opt-in account. The designated representative of the opt-in source shall, on or after the effective date of the opt-in permit as specified in paragraph (D) of rule 3745-103-28 of the Administrative Code, submit a letter requesting the opening of a compliance account (unless the source that includes the opt-in source already has a compliance account or the opt-in has, under paragraph (C) of rule 3745-103-25 of the Administrative Code, a different designated representative than the designated representative for the source) in the allowance tracking system to the USEPA.

[Comment: For dates of non-regulatory government publications, publications of recognized organizations and associations, federal rules, and federal statutory provisions referenced in this rule, see the last paragraph of rule 3745-103-01 of the Administrative Code titled "Incorporation by reference."]

(A) Identifying allowances. Allowances allocated to an opt-in source will be assigned a serial number that identifies them as being allocated under an opt-in permit.

(B) Submittal of opt-in allowances for auction.

- (1) An authorized account representative may offer for sale in the spot auction under 40 CFR 73.70 allowances that are allocated to opt-in sources, if the allowances have a compliance use date earlier than the year in which the spot auction is to be held and if the USEPA has completed the deductions for compliance under 40 CFR 73.35(b) for the compliance year corresponding to the compliance use date of the offered allowances.
- (2) Authorized account representatives may not offer for sale in the advance auctions under 40 CFR 73.70 allowances allocated to opt-in sources.

3745-103-44      **Annual compliance certification report.**

[Comment: For dates of non-regulatory government publications, publications of recognized organizations and associations, federal rules, and federal statutory provisions referenced in this rule, see the last paragraph of rule 3745-103-01 of the Administrative Code titled "Incorporation by reference."]

- (A) Applicability and deadline. For each calendar year in which an opt-in source is subject to the acid rain emissions limitations, the designated representative of the opt-in source shall submit to the USEPA, no later than sixty days after the end of the calendar year, an annual compliance certification report for the opt-in source.
- (B) Contents of report. The designated representative shall include in the annual compliance certification report the following elements, in a format prescribed by the USEPA, concerning the opt-in source and the calendar year covered by the report:
  - (1) Identification of the opt-in source;
  - (2) An opt-in utilization report in accordance with rule 3745-103-45 of the Administrative Code for combustion sources;
  - (3) A thermal energy compliance report in accordance with rule 3745-103-48 of the Administrative Code for combustion sources, if applicable;
  - (4) Shutdown or reconstruction information in accordance with rule 3745-103-47 of the Administrative Code, if applicable;
  - (5) A statement that the opt-in source has not become an affected unit under rule 3745-103-02 of the Administrative Code;
  - (6) At the designated representative's option, the total number of allowances to be deducted for the year, using the formula in rule 3745-103-50 of the Administrative Code, and the serial numbers of the allowances that are to be deducted; and
  - (7) In an annual compliance certification report for a year during 1995 through 2005, at the designated representative's option, for opt-in sources that share a common stack and whose emissions of sulfur dioxide are not monitored separately or apportioned in accordance with 40 CFR Part 75, the percentage of the total number of allowances under paragraph (B)(6) of this rule for all such affected units that is to be deducted from each affected unit's compliance subaccount; and
  - (8) In an annual compliance certification report for a year during 1995 through 2005, the compliance certification under paragraph (C) of this rule.

- (C) Annual compliance certification. In the annual compliance certification report under paragraph (A) of this rule, the designated representative shall certify, based on reasonable inquiry of those persons with primary responsibility for operating the opt-in source in compliance with the acid rain program, whether the opt-in source was operated during the calendar year covered by the report in compliance with the requirements of the acid rain program applicable to the opt-in source, including:
- (1) Whether the opt-in source was operated in compliance with applicable acid rain emissions limitations, including whether the opt-in source held allowances, as of the allowance transfer deadline, in its compliance subaccount after accounting for any allowance deductions or other adjustments under 40 CFR 73.34(c) not less than the opt-in source's total sulfur dioxide emissions during the calendar year covered by the annual report;
  - (2) Whether the monitoring plan that governs the opt-in source has been maintained to reflect the actual operation and monitoring of the opt-in source and contains all information necessary to attribute monitored emissions to the opt-in source;
  - (3) Whether all the emissions from the opt-in source or group of affected units (including the opt-in source) using a common stack were monitored or accounted for through the missing data procedures and reported in the quarterly monitoring reports in accordance with 40 CFR Part 75;
  - (4) Whether the facts that form the basis for certification of each monitor at the opt-in source or group of affected units (including the opt-in source) using a common stack or of an opt-in source's qualifications for using an acid rain Program accepted monitoring method or approved alternative monitoring method, if any, have changed;
  - (5) If a change is required to be reported under paragraph (C)(4) of this rule, specify the nature of the change, the reason for the change, when the change occurred, and how the unit's compliance status was determined subsequent to the change, including what method was used to determine emissions when a change mandated the need for monitoring recertification; and
  - (6) When applicable, whether the opt-in source was operating in compliance with its thermal energy plan as provided in rule 3745-103-48 of the Administrative Code for combustion sources and rule 3745-103-49 of the Administrative Code for process sources.

(A) Calculation of utilization.

(1) Annual utilization.

- (a) Except as provided in paragraph (A)(1)(b) of this rule, annual utilization for the calendar year shall be calculated as follows:

Annual utilization = actual heat input + reduction from improved efficiency

Where,

- (i) "Actual heat input" shall be the actual annual heat input (in MMBtu) of the opt-in source for the calendar year determined in accordance with appendix F of 40 CFR Part 75.
- (ii) "Reduction from improved efficiency" shall be the sum of the following four elements:
- (a) Reduction from demand side measures that improve the efficiency of electricity consumption;
- (b) Reduction from demand side measures that improve the efficiency of steam consumption;
- (c) Reduction from improvements in the heat rate at the opt-in source; and
- (d) Reduction from improvement in the efficiency of steam production at the opt-in source. Qualified demand side measures applicable to the calculation of utilization for opt-in sources are listed in appendix A, section 1 of 40 CFR Part 73.
- (iii) "Reduction from demand side measures that improve the efficiency of electricity consumption" shall be a good faith estimate of the expected kilowatt hour savings during the calendar year for such measures and the corresponding reduction in heat input (in MMBtu) resulting from those measures. The demand side measures shall be implemented at the opt-in source, in the residence or facility to which the opt-in source

delivers electricity for consumption or in the residence or facility of a customer to whom the opt-in source's utility system sells electricity. The verified amount of such reduction shall be submitted in accordance with paragraph (C)(2) of this rule.

- (iv) "Reduction from demand side measures that improve the efficiency of steam consumption" shall be a good faith estimate of the expected steam savings (in MMBtu) from such measures during the calendar year and the corresponding reduction in heat input (in MMBtu) at the opt-in source as a result of those measures. The demand side measures shall be implemented at the opt-in source or in the facility to which the opt-in source delivers steam for consumption. The verified amount of such reduction shall be submitted in accordance with paragraph (C)(2) of this rule.
- (v) "Reduction from improvements in heat rate" shall be a good faith estimate of the expected reduction in heat rate during the calendar year and the corresponding reduction in heat input (in MMBtu) at the opt-in source as a result of all improved unit efficiency measures at the opt-in source and may include supply-side measures listed in appendix A, section 2.1 of 40 CFR Part 73. The verified amount of such reduction shall be submitted in accordance with paragraph (C)(2) of this rule.
- (vi) "Reduction from improvement in the efficiency of steam production at the opt-in source" shall be a good faith estimate of the expected improvement in the efficiency of steam production at the opt-in source during the calendar year and the corresponding reduction in heat input (in MMBtu) at the opt-in source as a result of all improved steam production efficiency measures. In order to claim improvements in the efficiency of steam production, the designated representative of the opt-in source must demonstrate to the satisfaction of the USEPA that the heat rate of the opt-in source has not increased. The verified amount of such reduction shall be submitted in accordance with paragraph (C)(2) of this rule.
- (vii) Notwithstanding paragraph (A)(1)(a)(ii) of this rule, where two or more opt-in sources, or two or more opt-in sources and phase I units, include in their annual compliance certification reports their good faith estimate of kilowatt hour savings or steam savings from the same specific measures:
  - (a) The designated representatives of all such opt-in sources and phase I units shall submit with their annual compliance certification reports a certification signed by all such designated representatives. The certification shall apportion the total kilowatt

hour savings or steam savings among such opt-in sources and phase I units.

(b) Each designated representative shall include in their annual compliance certification report only their share of kilowatt hour savings or steam savings.

(b) For an opt-in source whose opt-in permit becomes effective on a date other than January first,

Annual utilization for the first year shall be calculated as follows:

--

$$\text{Annual Utilization} = \text{Actual Heat Input For The Remaining Calendar Quarters} + \text{Reduction From Improved Efficiency for The Remaining Calendar Quarters}$$

Where "actual heat input" and "reduction from improved efficiency" are defined as set forth in paragraph (A)(1)(a) of this rule but are restricted to data or estimates for the "remaining calendar quarters", which are the calendar quarters that begin on or after the date the opt-in permit becomes effective.

(2) Average utilization. Average utilization for the calendar year shall be defined as the average of the annual utilization calculated as follows:

(a) For the first two calendar years after the effective date of an opt-in permit taking effect on January first, average utilization will be calculated as follows:

(i) Average utilization for the first year = annual utilization<sub>year 1</sub>

Where "annual utilization<sub>year1</sub>" is as calculated under paragraph (A)(1)(a) of this rule.

(ii) Average utilization for the second year

$$= \left( \frac{\text{Revised Annual Utilization}_{\text{year 1}} + \text{Annual Utilization}_{\text{year 2}}}{2} \right)$$

Where,

"Revised annual utilization<sub>year 1</sub>" is as submitted for the year under paragraph (C)(2)(a)(ii) of this rule and adjusted under paragraph

(C)(2)(c) of this rule; "annual utilization<sub>year 2</sub>" is as calculated under paragraph (A)(1)(a) of this rule.

(b) For the first three calendar years after the effective date of the opt-in permit taking effect on a date other than January first, average utilization will be calculated as follows:

(i) Average utilization for the first year after opt-in = annual utilization<sub>year 1</sub> where "annual utilization<sub>year 1</sub>" is as calculated under paragraph (A)(1)(b) of this rule.

(ii) Average utilization for the second year after opt-in

$$= \left( \frac{\text{Revised Annual Utilization}_{\text{Year 1}} + \text{Annual Utilization}_{\text{Year 2}}}{\left( \begin{array}{c} \text{Number Of Months} \\ \text{In Year 1 And Year 2 For Which} \\ \text{The Opt-In Permit Is Effective} \end{array} \right)} \right) \times 12$$

Where,

"Revised annual utilization<sub>year 1</sub>" is as submitted for the year under paragraph (C)(2)(a)(ii) of this rule and adjusted under paragraph (C)(2)(c) of this rule; and "annual utilization<sub>year 2</sub>" is as calculated under paragraph (A)(1)(b) of this rule.

(iii) Average utilization for the third year after opt-in

$$= \left( \frac{\text{Revised Annual Utilization}_{\text{Year 1}} + \text{Revised Annual Utilization}_{\text{Year 2}} + \text{Annual Utilization}_{\text{Year 3}}}{\left( \begin{array}{c} \text{Number Of Months} \\ \text{In Year 1, Year 2, And Year 3} \\ \text{For Which The Opt-In Permit Is Effective} \end{array} \right)} \right) \times 12$$

Where,

"Revised annual utilization<sub>year 1</sub>" is as submitted for the year under paragraph (C)(2)(a)(ii) of this rule and adjusted under paragraph (C)(2)(c) of this rule; and "revised annual utilization<sub>year 2</sub>" is as submitted for the year under paragraph (C)(2)(a)(ii) of this rule; and "annual utilization<sub>year 3</sub>" is as calculated under paragraph (A)(1)(b) of this rule.

(c) Except as provided in paragraphs (A)(2)(a) and (A)(2)(b) of this rule, average utilization shall be the sum of annual utilization for the calendar year and the revised annual utilization, submitted under paragraph (C)(2)(a)(ii) of this rule and adjusted by the USEPA under paragraph

(C)(2)(c) of this rule, for the two immediately preceding calendar years divided by three.

(B) Determination of reduced utilization and calculation of allowances.

- (1) Determination of reduced utilization. For a year during which its opt-in permit is effective, an opt-in source has reduced utilization if the opt-in source's average utilization for the calendar year, as calculated under paragraph (A) of this rule, is less than its baseline.
- (2) Calculation of allowances deducted for reduced utilization. If the USEPA determines that an opt-in source has reduced utilization for a calendar year during which the opt-in source's opt-in permit is in effect, the USEPA will deduct allowances, as calculated under paragraph (B)(2)(a) of this rule, from the compliance subaccount of the opt-in source's allowance tracking system account.

(a) Allowances deducted for reduced utilization =

$$\text{Number Of Allowances Allocated For The Calendar Year} \times \left( 1 - \left( \frac{\text{Average Utilization}_{\text{Calendar Year}}}{\text{Baseline}} \right) \right)$$

- (b) The allowances deducted shall have the same or an earlier compliance use date as those allocated under rules 3745-103-33 to 3745-103-39 of the Administrative Code for the calendar year for which the opt-in source has reduced utilization.

(C) Compliance.

- (1) Opt-in utilization report. The designated representative for each opt-in source shall submit an opt-in utilization report for the calendar year, as part of its annual compliance certification report under rule 3745-103-44 of the Administrative Code, that shall include the following elements in a format prescribed by the USEPA:
  - (a) The name, authorized account representative identification number, and telephone number of the designated representative of the opt-in source;
  - (b) The account identification number in the allowance tracking system of the source that includes the opt-in source;
  - (c) The opt-in source's annual utilization for the calendar year, as defined under paragraph (A)(1) of this rule, and the revised annual utilization, submitted under paragraph (C)(2)(a)(ii) of this rule and adjusted under paragraph (C)(2)(c) of this rule, for the two immediately preceding calendar years;

- (d) The opt-in source's average utilization for the calendar year, as defined under paragraph (A)(2) of this rule.
- (e) The difference between the opt-in source's average utilization and its baseline;
- (f) The number of allowances that shall be deducted, if any, using the formula in paragraph (B)(2)(a) of this rule and the supporting calculations.

(2) Confirmation report.

- (a) If the annual compliance certification report for an opt-in source includes estimates of any reduction in heat input resulting from improved efficiency as defined under paragraph (A)(1)(a) of this rule, the designated representative shall submit, by July first of the year in which the annual compliance certification report was submitted, a confirmation report, concerning the calendar year covered by the annual compliance certification report. The USEPA may grant, for good cause shown, an extension of the time to file the confirmation report. The confirmation report shall include the following elements in a format prescribed by the USEPA:
  - (i) Verified reduction in heat input. Any verified KWH savings or any verified steam savings from demand side measures that improve the efficiency of electricity or steam consumption, any verified reduction in the heat rate at the opt-in source, or any verified improvement in the efficiency of steam production at the opt-in source achieved and the verified corresponding reduction in heat input for the calendar year that resulted.
  - (ii) Revised annual utilization. The opt-in source's annual utilization for the calendar year as provided under paragraph (C)(1)(c) of this rule, recalculated using the verified reduction in heat input for the calendar year under paragraph (C)(2)(c)(v) of this rule.
  - (iii) Revised average utilization. The opt-in source's average utilization as provided under paragraph (C)(1)(d) of this rule, recalculated using the verified reduction in heat input for the calendar year under paragraph (C)(2)(a)(i) of this rule.
  - (iv) Recalculation of reduced utilization. The difference between the opt-in source's recalculated average utilization and its baseline.
  - (v) Allowance adjustment. The number of allowances that should be credited or deducted using the formulas in paragraphs (C)(2)(c)(iii) and (C)(2)(c)(iv) of this rule and the supporting calculations; and the

number of adjusted allowances remaining using the formula in paragraph (C)(2)(a)(i) of this rule and the supporting calculations.

(b) Documentation.

- (i) For all figures under paragraph (C)(2)(a)(i) of this rule, the opt-in source must provide as part of the confirmation report, documentation (which may follow the USEPA conservation verification protocol) verifying the figures to the satisfaction of the USEPA.
- (ii) Notwithstanding paragraph (C)(2)(a)(i) of this rule, where two or more opt-in sources and phase I units, or two or more opt-in sources and phase I units include in the confirmation report under paragraph (C)(2) of this rule or 40 CFR 72.91(b) the verified kilowatt hour savings or steam savings defined under paragraph (C)(2)(a)(i) of this rule for the calendar year, from the same specific measures:
  - (a) The designated representatives of all such opt-in sources and phase I units shall submit with their confirmation reports a certification signed by all such designated representatives. The certification shall apportion the total kilowatt hour savings or steam savings as defined under paragraph (C)(2)(a)(i) of this rule for the calendar year among such opt-in sources.
  - (b) Each designated representative shall include in the opt-in source's confirmation report only its share of the verified reduction in heat input as defined under paragraph (C)(2)(a)(i) of this rule for the calendar year under the certification under paragraph (C)(2)(b)(ii)(a) of this rule.

(c) Determination of reduced utilization based on confirmation report.

- (i) If an opt-in source must submit a confirmation report as specified under paragraph (C)(2) of this rule, the USEPA, upon such submittal, will adjust its determination of reduced utilization for the calendar year for the opt-in source. Such adjustment will include the recalculation of both annual utilization and average utilization, using verified reduction in heat input as defined under paragraph (C)(2)(a)(i) of this rule for the calendar year instead of the previously estimated values.
- (ii) Estimates confirmed. If the total, included in the confirmation report, of the amounts of verified reduction in the opt-in source's heat input equals the total estimated in the opt-in source's annual compliance certification report for the calendar year, then the designated representative shall include in the confirmation report a statement indicating that it is true.

- (iii) Underestimate. If the total, included in the confirmation report, of the amounts of verified reduction in the opt-in source's heat input is greater than the total estimated in the opt-in source's annual compliance certification report for the calendar year, then the designated representative shall include in the confirmation report the number of allowances to be credited to the compliance account of the source that includes the opt-in source calculated using the following formula:

Allowances credited for the calendar year in which the reduced utilization occurred =

$$\text{Number Of Allowances Allocated For The Calendar Year} \times \left[ \frac{\text{Average Utilization}_{\text{verified}} - \text{Average Utilization}_{\text{Estimate}}}{\text{Baseline}} \right]$$

Where,

Average utilization<sub>estimate</sub> = the average utilization of the opt-in source as defined under paragraph (A)(2) of this rule, calculated using the estimated reduction in the opt-in source's heat input under paragraph (A)(1) of this rule, and submitted in the annual compliance certification report for the calendar year. Average utilization<sub>verified</sub> = The average utilization of the opt-in source as defined under paragraph (A)(2) of this rule, calculated using the verified reduction in the opt-in source's heat input as submitted under paragraph (C)(2)(a)(i) of this rule by the designated representative in the confirmation report.

- (iv) Overestimate. If the total of the amounts of verified reduction in the opt-in source's heat input included in the confirmation report is less than the total estimated in the opt-in source's annual compliance certification report for the calendar year, then the designated representative shall include in the confirmation report the number of allowances to be deducted from the compliance account of the source that includes the opt-in source, which equals the absolute value of the result of the formula for allowances credited under paragraph (C)(2)(c)(iii) of this rule.
- (v) Adjusted allowances remaining. Unless paragraph (C)(2)(c)(ii) of this rule applies, the designated representative shall include in the confirmation report the adjusted amount of allowances that would have been held in the opt-in source's compliance subaccount if the deductions made under 40 CFR 73.35(b) had been based on the verified, rather than the estimated, reduction in the opt-in source's heat input, calculated as follows:

$$\text{Adjusted Amount Of Allowances} = \text{Allowances Held After Deduction} - \text{Excess Emissions} + \text{Allowances Credited} - \text{Allowances Deducted}$$

Where:

"Allowances held after deduction" shall be the amount of allowances held in the opt-in source's compliance subaccount after deduction of allowances was made under 40 CFR 73.35(b) based on the annual compliance certification report. "Excess emissions" shall be the amount, if any, of excess emissions determined under 40 CFR 73.35(d) for the calendar year based on the annual compliance certification report. "Allowances credited" shall be the amount of allowances calculated under paragraph (C)(2)(c)(iii) of this rule. "allowances deducted" shall be the amount of allowances calculated under paragraph (C)(2)(c)(iv) of this rule.

- (a) If the result of the formula for "adjusted amount of allowances" is negative, the absolute value of the result constitutes excess emissions of sulfur dioxide. If the result is positive, there are no excess emissions of sulfur dioxide.
- (b) If the amount of excess emissions of sulfur dioxide calculated under "adjusted amount of allowances" differs from the amount of excess emissions of sulfur dioxide determined under 40 CFR 73.35 based on the annual compliance certification report, then the designated representative shall include in the confirmation report a demonstration of:
  - (i) The number of allowances that should be deducted to offset any increase in excess emissions or returned to the account for any decrease in excess emissions; and
  - (ii) the amount of the excess emissions penalty, excluding interest, that should be paid or returned to the account for the change in excess emissions.
- (c) The USEPA will deduct immediately from the compliance account of the source that includes the opt-in source the amount of allowances that USEPA or Ohio EPA determines is necessary to offset any increase in excess emissions or will return immediately to the opt-in source's compliance subaccount the amount of allowances that is determined necessary to account for any decrease in excess emissions.

- (d) The designated representative may identify the serial numbers of the allowances to be deducted or returned. In the absence of such identification, the deduction will be on a first-in, first-out basis under 40 CFR 73.35(c)(2) and the identification of allowances returned will be at the USEPA's discretion.
- (e) If the designated representative of an opt-in source fails to submit on a timely basis a confirmation report, in accordance with paragraph (C)(2) of this rule, with regard to the estimate of reductions in heat input as defined under paragraph (C)(2)(a)(i) of this rule, then the USEPA will reject such estimate and correct it to equal zero in the opt-in source's annual compliance certification report that includes that estimate. The USEPA will deduct immediately, on a first-in, first-out basis under 40 CFR 73.35(c)(2), the amount of allowances that it determines is necessary to offset any increase in excess emissions of sulfur dioxide that results from the correction and will require the owners and operators of the opt-in source to pay an excess emission penalty in accordance with 40 CFR Part 77.
- (f) If the opt-in source is governed by an approved thermal energy plan under rule 3745-103-48 of the Administrative Code and if the opt-in source must submit a confirmation report as specified under paragraph (C)(2) of this rule, the adjusted amount of allowances that should remain in the compliance account of the source that includes the opt-in source shall be calculated as follows:

Adjusted amount of allowances =

Allowances Allocated or Acquired - Tons Emitted - The Larger Of  
[Allowances Transferred To All Replacement Units Or  
Allowances Deducted For Reduced Utilization]

Where, "allowances allocated or acquired" shall be the number of allowances held in the compliance account of the source that includes the opt-in source at the allowance transfer deadline plus the number of allowances transferred for the previous calendar year to all replacement units under an approved thermal energy plan in accordance with paragraph (A)(6) of rule 3745-103-48 of the Administrative Code. "Tons emitted" shall be the total tons of sulfur dioxide emitted by the opt-in source during the calendar year, as reported in accordance with rules 3745-103-52 and 3745-103-53 of the Administrative Code for combustion sources. "Allowances transferred to all replacement units" shall be the sum of allowances transferred to all replacement units under an approved thermal energy plan in accordance with rule 3745-103-

48 of the Administrative Code and adjusted by the USEPA in accordance with paragraph (D)(2) of rule 3745-103-48 of the Administrative Code. "Allowances deducted for reduced utilization" shall be the total number of allowances deducted for reduced utilization as calculated in accordance with this rule including any adjustments required under paragraph (C)(2)(c)(v) of this rule.

3745-103-47      **Opt-in source permanent shutdown, reconstruction, or change in affected status.**

[Comment: For dates of non-regulatory government publications, publications of recognized organizations and associations, federal rules, and federal statutory provisions referenced in this rule, see the last paragraph of rule 3745-103-01 of the Administrative Code titled "Incorporation by reference."

(A) Notification.

- (1) When an opt-in source has permanently shutdown during the calendar year, the designated representative shall notify the USEPA and Ohio EPA of the date of shutdown, within thirty days of such shutdown.
- (2) When an opt-in source has undergone a modification that qualifies as a reconstruction as defined in 40 CFR 60.15, the designated representative shall notify the USEPA of the date of completion of the reconstruction, within thirty days of such completion.
- (3) When an opt-in source becomes an affected unit under rule 3745-103-02 of the Administrative Code, the designated representative shall notify the USEPA and Ohio EPA of such change in the opt-in source's affected status within thirty days of such change.

(B) USEPA's action.

- (1) The USEPA will terminate the opt-in source's opt-in permit and deduct allowances as provided below in the following circumstances:
  - (a) When an opt-in source has permanently shutdown. The USEPA shall deduct allowances equal in number to and with the same or earlier compliance use date as those allocated to the opt-in source under rule 3745-103-41 of the Administrative Code for the calendar year in which the shut down occurs and for all future years following the year in which the shut down occurs; or
  - (b) When an opt-in source has undergone a modification that qualifies as a reconstruction as defined in 40 CFR 60.15. The USEPA shall deduct allowances equal in number to and with the same or earlier compliance use date as those allocated to the opt-in source under rule 3745-103-41 of the Administrative Code for the calendar year in which the reconstruction is completed and all future years following the year in which the reconstruction is completed; or
  - (c) When an opt-in source becomes an affected unit under rule 3745-103-02 of the Administrative Code. The USEPA shall deduct allowances equal in

number to and with the same or earlier compliance use date as those allocated to the opt-in source under rule 3745-103-41 of the Administrative Code the calendar year in which the opt-in source becomes affected under rule 3745-103-02 of the Administrative Code and all future years following the calendar year in which the opt-in source becomes affected under rule 3745-103-02 of the Administrative Code; or

- (d) When an opt-in source does not renew its opt-in permit. The USEPA shall deduct allowances equal in number to and with the same or earlier compliance use date as those allocated to the opt-in source under rule 3745-103-41 of the Administrative Code for the calendar year in which the opt-in source's opt-in permit expires and all future years following the year in which the opt-in source's opt-in permit expires.

3745-103-48      **Transfer of allowances from the replacement of thermal energy;  
combustion sources.**

[Comment: For dates of non-regulatory government publications, publications of recognized organizations and associations, federal rules, and federal statutory provisions referenced in this rule, see the last paragraph of rule 3745-103-01 of the Administrative Code titled "Incorporation by reference."]

(A) Thermal energy plan.

- (1) General provisions. The designated representative of an opt-in source that seeks to qualify for the transfer of allowances based on the replacement of thermal energy by a replacement unit shall submit a thermal energy plan subject to the requirements of paragraph (A) of rule 3745-103-09 of the Administrative Code for multi-unit compliance options and this rule. The effective period of the thermal energy plan shall begin at the beginning of the calendar quarter (either January first, April first, July first, or October first) for which the plan is approved and end December thirty-first of the last full calendar year for which the opt-in permit containing the plan is in effect.
- (2) Applicability. This section shall apply to any designated representative of an opt-in source and any designated representative of each replacement unit seeking to transfer allowances based on the replacement of thermal energy.
- (3) Contents. Each thermal energy plan shall contain the following elements in a format prescribed by the USEPA:
  - (a) The calendar year and quarter that the thermal energy plan takes effect, which shall be the first year and quarter the replacement unit(s) will replace thermal energy of the opt-in source;
  - (b) The name, authorized account representative identification number, and telephone number of the designated representative of the opt-in source;
  - (c) The name, authorized account representative identification number, and telephone number of the designated representative of each replacement unit;
  - (d) The account identification number in the allowance tracking system of the source that includes the opt-in source;
  - (e) The account identification number in the allowance tracking system of each source that includes a replacement unit;
  - (f) The type of fuel used by each replacement unit;

- (g) The allowable SO<sub>2</sub> emissions rate, expressed in pounds per MMBTU, of each replacement unit for the calendar year for which the plan will take effect. When a thermal energy plan is renewed in accordance with paragraph (A)(9) of this rule, the allowable SO<sub>2</sub> emission rate at each replacement unit will be the most stringent federally enforceable allowable SO<sub>2</sub> emissions rate applicable at the time of renewal for the calendar year for which the renewal will take effect. This rate will not be annualized;
- (h) The estimated annual amount of total thermal energy to be reduced at the opt-in source, including all energy flows (steam, gas, or hot water) used for any process or in any heating or cooling application, and, for a plan starting April first, July first, or October first such estimated amount of total thermal energy to be reduced starting April first, July first or October first respectively and ending on December thirty-first;
- (i) The estimated amount of total thermal energy at each replacement unit for the calendar year prior to the year for which the plan is to take effect, including all energy flows (steam, gas, or hot water) used for any process or in any heating or cooling application. For a plan starting April first, July first, or October first, such estimated amount of total thermal energy for the portion of such calendar year starting April first, July first, or October first respectively and ending on December thirty-first;
- (j) The estimated annual amount of total thermal energy at each replacement unit after replacing thermal energy at the opt-in source, including all energy flows (steam, gas, or hot water) used for any process or in any heating or cooling application, For a plan starting April first, July first, or October first, such estimated amount of total thermal energy at each replacement unit after replacing thermal energy at the opt-in source starting April first, July first, or October first respectively and ending December thirty-first;
- (k) The estimated annual amount of thermal energy at each replacement unit, including all energy flows (steam, gas, or hot water) used for any process or in any heating or cooling application, replacing the thermal energy at the opt-in source. For a plan starting April first, July first, or October first, such estimated amount of thermal energy replacing thermal energy at the opt-in source starting April first, July first, or October first respectively and ending December thirty-first;
- (l) The estimated total annual fuel input at each replacement unit after replacing thermal energy at the opt-in source. For a plan starting April first, July first, or October first, such estimated total fuel input after replacing thermal energy at the opt-in source starting April first, July first, or October first respectively and ending December thirty-first;

- (m) The number of allowances calculated under paragraph (B) of this rule that the opt-in source will transfer to each replacement unit represented in the thermal energy plan;
  - (n) The estimated number of allowances to be deducted for reduced utilization under rule 3745-103-45 of the Administrative Code;
  - (o) Certification that each replacement unit has entered into a legally binding steam sales agreement to provide the thermal energy, as calculated under paragraph (A)(3)(k) of this rule, that it is replacing for the opt-in source. The designated representative of each replacement unit shall maintain and make available, at the USEPA or the director's request, copies of documents demonstrating that the replacement unit is replacing the thermal energy at the opt-in source.
- (4) Submission. The designated representative of the opt-in source seeking to qualify for the transfer of allowances based on the replacement of thermal energy shall submit a thermal energy plan to the director by no later than six months prior to the first calendar year for which the plan is to be in effect. The thermal energy plan shall be signed and certified by the designated representative of the opt-in source and each replacement unit covered by the plan.
- (5) Retirement of opt-in source upon enactment of plan.
- (a) If the opt-in source will be permanently retired as of the effective date of the thermal energy plan, the opt-in source shall not be required to monitor its emissions upon retirement, consistent with 40 CFR 75.67, provided that the following requirements are met:
    - (i) The designated representative of the opt-in source shall include in the plan a request for an exemption from the requirements of 40 CFR Part 75 in accordance with 40 CFR 75.67 and shall submit the following statement: "I certify that the opt-in source "is" or "will be", as applicable permanently retired on the date specified in this plan and will not emit any sulfur dioxide or nitrogen oxides after such date."
    - (ii) The opt-in source shall not emit any sulfur dioxide or nitrogen oxides after the date specified in the plan.
  - (b) Notwithstanding the monitoring exemption discussed in paragraph (A)(5)(a) of this rule, the designated representative for the opt-in source shall submit the annual compliance certification report provided under paragraph (D) of this rule.

- (6) USEPA's action. If the director approves a thermal energy plan, the USEPA will annually transfer allowances to the compliance account of each source that includes a replacement unit, as provided in the approved plan.
- (7) Incorporation, modification and renewal of a thermal energy plan.
  - (a) An approved thermal energy plan, including any revised or renewed plan that is approved, shall be incorporated into both the opt-in permit for the opt-in source and the acid rain permit for each replacement unit governed by the plan. Upon approval, the thermal energy plan shall be incorporated into the acid rain permit for each replacement unit pursuant to the requirements for administrative permit amendments under rule 3745-103-18 of the Administrative Code.
  - (b) In order to revise an opt-in permit to add an approved thermal energy plan or to change an approved thermal energy plan, the designated representative of the opt-in source shall submit a plan or a revised plan under paragraph (A)(4) of this rule and meet the requirements for permit revisions under rule 3745-103-15 of the Administrative Code and either rule 3745-103-16 or 3745-103-17 of the Administrative Code.
- (8) Termination of plan.
  - (a) A thermal energy plan shall be in effect until the earlier of the expiration of the opt-in permit for the opt-in source or the year for which a termination of the plan takes effect under paragraph (A)(8)(b) of this rule.
  - (b) Termination of plan by opt-in source and replacement units. A notification to terminate a thermal energy plan in accordance with paragraph (C) of rule 3745-103-09 of the Administrative Code shall be submitted no later than December first of the calendar year for which the termination is to take effect.
  - (c) If the requirements of paragraph (A)(8)(b) of this rule are met and upon revision of the opt-in permit of the opt-in source and the acid rain permit of each replacement unit governed by the thermal energy plan to terminate the plan pursuant to rule 3745-103-18 of the Administrative Code, the USEPA will adjust the allowances for the opt-in source and the replacement units to reflect the transfer back to the opt-in source of the allowances transferred from the opt-in source under the plan for the year for which the termination of the plan takes effect.
- (9) Renewal of thermal energy plan. The designated representative of an opt-in source may renew the thermal energy plan as part of its opt-in permit renewal in accordance with rule 3745-103-32 of the Administrative Code.

## (B) Calculation of transferable allowances.

- (1) Qualifying thermal energy. The amount of thermal energy credited towards the transfer of allowances based on the replacement of thermal energy shall equal the qualifying thermal energy and shall be calculated for each replacement unit as follows:

--

Qualifying thermal energy = The estimated thermal energy at the replacement unit under paragraph (A)(3)(k) of this rule

- (2) Fuel associated with qualifying thermal energy. The fuel associated with the qualifying thermal energy at each replacement unit shall be calculated as follows:

$$\text{Fuel associated with qualifying thermal energy} = \frac{\text{Qualifying thermal energy}}{\text{Efficiency constant}}$$

Where,

"Qualifying thermal energy" for the replacement is as defined in paragraph (B)(1) of this rule; "efficiency constant" for the replacement unit equals 0.85, where the replacement unit is a boiler, and equals 0.80, where the replacement unit is a cogenerator.

- (3) Allowances transferable from the opt-in source to each replacement unit. The number of allowances transferable from the opt-in source to each replacement unit for the replacement of thermal energy is calculated as follows:

$$\text{Transferable allowances for the replacement unit} = \frac{\text{Fuel associated with qualifying thermal energy} \times \text{Allowable SO}_2 \text{ emission Rate}_{\text{replacement unit}} \text{ (in lb/mmBtu)}}{2000}$$

Where, "allowable SO<sub>2</sub> emission rate" for the replacement unit is as defined in paragraph (A)(3)(g) of this rule; "fuel associated with qualifying thermal energy" is as defined in paragraph (B)(2) of this rule;

- (C) Transfer prohibition. The allowances transferred from the opt-in source to each replacement unit shall not be transferred from the compliance account of the source that includes the replacement unit to any other allowance tracking system account.

## (D) Compliance

- (1) Annual compliance certification report.

- (a) As required for all opt-in sources, the designated representative of the opt-in source covered by a thermal energy plan must submit an opt-in utilization

report for the calendar year as part of its annual compliance certification report under paragraph (C)(1) of rule 3745-103-45 of the Administrative Code.

- (b) The designated representative of an opt-in source must submit a thermal energy compliance report for the calendar year as part of the annual compliance certification report, which must include the following elements in a format prescribed by the USEPA:
  - (i) The name, authorized account representative identification number, and telephone number of the designated representative of the opt-in source;
  - (ii) The name, authorized account representative identification number, and telephone number of the designated representative of each replacement unit;
  - (iii) The account identification number in the allowance tracking system of the source that includes the opt-in source;
  - (iv) The account identification number in the allowance tracking system of each source that includes a replacement unit;
  - (v) The actual amount of total thermal energy reduced at the opt-in source during the calendar year, including all energy flows (steam, gas, or hot water) used for any process or in any heating or cooling application;
  - (vi) The actual amount of thermal energy at each replacement unit, including all energy flows (steam, gas, or hot water) used for any process or in any heating or cooling application, replacing the thermal energy at the opt-in source;
  - (vii) The actual amount of total thermal energy at each replacement unit after replacing thermal energy at the opt-in source, including all energy flows (steam, gas, or hot water) used for any process or in any heating or cooling application;
  - (viii) The actual total fuel input at each replacement unit as determined in accordance with 40 CFR Part 75;
  - (ix) The calculations of allowance adjustments to be performed by the USEPA in accordance with paragraph (D)(2) of this rule.

(2) Allowance adjustments by USEPA.

- (a) The USEPA will adjust the number of allowances in the compliance account for each source that includes the opt-in source or a replacement unit to

reflect any changes between the estimated values submitted in the thermal energy plan pursuant to paragraph (A) of this rule and the actual values submitted in the thermal energy compliance report pursuant to paragraph (D) of this rule. The values to be considered for this adjustment include:

- (i) The number of allowances transferable by the opt-in source to each replacement unit, calculated in paragraph (B) of this rule using the actual, rather than estimated, thermal energy at the replacement unit replacing thermal energy at the opt-in source.
  - (ii) The number of allowances deducted from the compliance account of the source that includes the opt-in source, calculated under paragraph (B)(2) of rule 3745-103-45 of the Administrative Code.
- (b) If the opt-in source includes in the opt-in utilization report under rule 3745-103-45 of the Administrative Code estimates for reductions in heat input, then the USEPA will adjust the number of allowances in the compliance account for each source that includes the opt-in source or a replacement unit to reflect any differences between the estimated values submitted in the opt-in utilization report and the actual values submitted in the confirmation report pursuant to paragraph (C)(2) of rule 3745-103-45 of the Administrative Code.
- (3) Liability. The owners and operators of an opt-in source or a replacement unit governed by an approved thermal energy plan shall be liable for any violation of the plan or this rule at that opt-in source or replacement unit that is governed by the thermal energy plan, including liability for fulfilling the obligations specified in 40 CFR Part 77 and section 411 of the Clean Air Act.

3745-103-50      **Calculation for deducting allowances.**

(A) Allowance deduction formula. The following formula shall be used to determine the total number of allowances to be deducted for the calendar year from the allowances held in the compliance account of a source that includes an opt-in source as of the allowance transfer deadline applicable to that year:

Total allowances deducted = tons emitted + allowances deducted for reduced utilization, where:

- (1) Except as provided in paragraph (A)(2) of this rule, "tons emitted" shall be the total tons of sulfur dioxide emitted by the opt-in source during the calendar year, as reported in accordance with rules 3745-103-52 and 3745-103-53 of the Administrative Code for combustion sources or rule 3745-103-54 of the Administrative Code for process sources.
- (2) If the effective date of the opt-in source's permit took effect on a date other than January first, "tons emitted" for the first calendar year shall be the total tons of sulfur dioxide emitted by the opt-in source during the calendar quarters for which the opt-in source's opt-in permit is effective, as reported in accordance with rule 3745-103-52 and 3745-103-53 of the Administrative Code for combustion sources.

(B) "Allowances deducted for reduced utilization" shall be the total number of allowances deducted for reduced utilization as calculated in accordance with rule 3745-103-45 of the Administrative Code for combustion sources or rule 3745-103-46 of the Administrative Code for process sources.

3745-103-51      **Deducting opt-in source allowances from allowance tracking system accounts.**

[Comment: For dates of non-regulatory government publications, publications of recognized organizations and associations, federal rules, and federal statutory provisions referenced in this rule, see the last paragraph of rule 3745-103-01 of the Administrative Code titled "Incorporation by reference."]

(A) Deduction of allowances.

- (1) The USEPA may deduct any allowances that were allocated to an opt-in source under rule 3745-103-41 of the Administrative Code by removing, from any allowance tracking system accounts in which they are held, the allowances in an amount specified in paragraph (D) of this rule, under the following circumstances:
  - (a) When the opt-in source has permanently shut down; or
  - (b) When the opt-in source has been reconstructed; or
  - (c) When the opt-in source becomes an affected unit under rule 3745-103-02 of the Administrative Code; or
  - (d) When the opt-in source fails to renew its opt-in permit.
- (2) An opt-in allowance may not be deducted under paragraph (A)(1) of this rule from any allowance tracking system account other than the account of the source that includes the opt-in source allocated such allowance:
  - (a) After the USEPA has completed the process of recordation as set forth in paragraph (a) of 40 CFR 73.34 following the deduction of allowances from the compliance account of the source that includes the opt-in source for the year for which such allowance may first be used; or
  - (b) If the opt-in source includes in the annual compliance certification report estimates of any reduction in heat input resulting from improved efficiency under paragraph (A)(1)(a) of rule 3745-103-45 of the Administrative Code, after the USEPA has completed action on the confirmation report concerning such estimated reduction pursuant to paragraphs (C)(2)(c)(v)(c), (C)(2)(c)(v)(d), and (C)(2)(c)(v)(e) of rule 3745-103-45 of the Administrative Code for the year for which such allowance may first be used.

- (B) Method of deduction. The USEPA will deduct allowances beginning with those allowances with the latest recorded date of transfer out of the compliance account of the source that includes the opt-in source.
- (C) Notification of deduction. When allowances are deducted, the USEPA will send a written notification to the authorized account representative of each allowance tracking system account from which allowances were deducted. The notification will state:
- (1) The serial numbers of all allowances deducted from the account,
  - (2) The reason for deducting the allowances, and
  - (3) The date of deduction of the allowances.
- (D) Amount of deduction. The USEPA may deduct allowances in accordance with paragraph (A) of this rule in an amount required to offset any excess emissions in accordance with 40 CFR Part 77 and when the source that includes the opt-in source does not hold allowances equal in number to and with the same or earlier compliance use date for the calendar years specified under paragraphs (B)(1)(a) to (B)(1)(d) of rule 3745-103-47 of the Administrative Code in an amount required to be deducted under paragraphs (B)(1)(a) to (B)(1)(d) of rule 3745-103-47 of the Administrative Code.

3745-103-55      **NO<sub>x</sub> applicability.**

[Comment: For dates of non-regulatory government publications, publications of recognized organizations and associations, federal rules, and federal statutory provisions referenced in this rule, see the last paragraph of rule 3745-103-01 of the Administrative Code titled "Incorporation by reference."]

- (A) Except as provided in paragraphs (B) to (D) of this rule, the provisions apply to each coal-fired utility unit that is subject to an acid rain emissions limitation or reduction requirement for SO<sub>2</sub> under phase I or phase II pursuant to Sections 404, 405, or 409 of the Clean Air Act.
- (B) The emission limitations for NO<sub>x</sub> under rules 3745-103-55 to 3745-103-67 of the Administrative Code apply to each affected coal-fired utility unit subject to Section 404(d) or 409(b) of the Clean Air Act on the date the unit is required to meet the acid rain emissions reduction requirement for SO<sub>2</sub>.
- (C) The provisions of rules 3745-103-55 to 3745-103-67 of the Administrative Code apply to each coal-fired substitution unit or compensating unit, designated and approved by USEPA as a phase I unit pursuant to 40 CFR 72.41 or 40 CFR 72.43 as follows:
  - (1) A coal-fired substitution unit that is designated in a substitution plan that is approved by USEPA and active as of January 1, 1995 shall be treated as a phase I coal-fired utility unit for purposes of this rule. In the event the designation of such unit as a substitution unit is terminated after December 31, 1995, pursuant to 40 CFR 72.41 and the unit is no longer required to meet phase I SO<sub>2</sub> emissions limitations, the provisions of this part will continue to apply.
  - (2) A coal-fired substitution unit that is designated in a substitution plan that is not approved by USEPA or not active as of January 1, 1995, or a coal-fired compensating unit, shall be treated as a phase II coal-fired utility unit for purposes of this rule.
- (D) The provisions of rules 3745-103-55 to 3745-103-67 of the Administrative Code for phase I units apply to each coal-fired transfer unit governed by a phase I extension plan, approved pursuant to 40 CFR 72.42, on January 1, 1997. Notwithstanding the preceding sentence, a coal-fired transfer unit shall be subject to the acid rain emissions limitations for nitrogen oxides beginning on January 1, 1996 if, for that year, a transfer unit is allocated fewer phase I extension reserve allowances than the maximum amount that the designated representative could have requested in accordance with 40 CFR 72.42(c)(5) (as adjusted under 40 CFR 72.42(d)) unless the transfer unit is the last unit allocated phase I extension reserve allowances under the plan.

- (A) Beginning January 1, 1996, or for a unit subject to section 404(D) of the Clean Air Act, the date on which the unit is required to meet acid rain emission reduction requirements for SO<sub>2</sub>, the owner or operator of a phase I coal-fired utility unit with a tangentially fired boiler or a dry bottom wall-fired boiler (other than units applying cell burner technology) shall not discharge, or allow to be discharged, emissions of NO<sub>x</sub> to the atmosphere in excess of the following limits, except as provided in paragraph (C) or (E) of this rule or in rule 3745-103-62 or 3745-103-63 of the Administrative Code:
- (1) Forty-five hundredths pound per MMBtu of heat input on an annual average basis for tangentially fired boilers.
  - (2) Fifty hundredths pound per MMBtu of heat input on an annual average basis for dry bottom wall-fired boilers (other than units applying cell burner technology).
- (B) The owner or operator shall determine the annual average NO<sub>x</sub> emission rate, in pound per MMBtu, using the methods and procedures specified in 40 CFR Part 75.
- (C) Unless the unit meets the early election requirement of rule 3745-103-60 of the Administrative Code the owner or operator of a coal-fired substitution unit with a tangentially fired boiler or a dry bottom wall-fired boiler (other than units applying cell burner technology) that satisfies the requirements of paragraph (C)(2) of rule 3745-103-55 of the Administrative Code, shall comply with the NO<sub>x</sub> emission limitations that apply to group one, phase II boilers.
- (D) The owner or operator of a phase I unit with a cell burner boiler that converts to a conventional wall-fired boiler on or before January 1, 1995 or, for a unit subject to Section 404(d) of the Clean Air Act, the date the unit is required to meet acid rain emissions reduction requirements for SO<sub>2</sub> shall comply, by such respective date or January 1, 1996, whichever is later, with the NO<sub>x</sub> emissions limitation applicable to dry bottom wall-fired boilers under paragraph (A) of this rule, except as provided in paragraph (C) or (E) of this rule or in rule 3745-103-62 or 3745-103-63 of the Administrative Code.
- (E) The owner or operator of a phase I unit with a group one boiler that converts to a fluidized bed or other type of utility boiler not included in group one boilers on or before January 1, 1995 or, a unit subject to Section 404(d) of the Clean Air Act, the date the unit is required to meet acid rain emissions reduction requirements for SO<sub>2</sub>

is exempt from the NO<sub>x</sub> emissions limitations specified in paragraph (A) of this rule, but shall comply with the NO<sub>x</sub> emission limitations for group two boilers under rule 3745-103-58 of the Administrative Code.

- (F) Except as provided in rule 3745-103-60 of the Administrative Code and in paragraph (C) of this rule, each unit subject to the requirements of this rule is not subject to the requirements of rule 3745-103-59 of the Administrative Code.

3745-103-60      **Early election for group one, phase II boilers.**

[Comment: For dates of non-regulatory government publications, publications of recognized organizations and associations, federal rules, and federal statutory provisions referenced in this rule, see the last paragraph of rule 3745-103-01 of the Administrative Code titled "Incorporation by reference."]

(A) General provisions.

- (1) The owner or operator of a phase II coal-fired utility unit with a group one boiler may elect to have the unit become subject to the applicable emissions limitation for NO<sub>x</sub> under rule 3745-103-57 of the Administrative Code, starting no later than January 1, 1997.
- (2) The owner or operator of a phase II coal-fired utility unit with a group one boiler that elects to become subject to the applicable emission limitation under rule 3745-103-57 of the Administrative Code shall not be subject to rule 3745-103-59 of the Administrative Code until January 2008, provided the designated representative demonstrates that the unit is in compliance with the limitation under rule 3745-103-57 of the Administrative Code, using the methods and procedures specified in 40 CFR Part 75, for the period beginning January first of the year in which the early election takes effect (but not later than January 1, 1997) and ending December 31, 2007.
- (3) The owner or operator of any phase II unit with a cell burner boiler that converts to conventional burner technology may elect to become subject to the applicable emissions limitation under rule 3745-103-57 of the Administrative Code for dry bottom wall-fired boilers, provided the owner or operator complies with the provisions in paragraph (A)(2) of this rule.
- (4) The owner or operator of a phase II unit approved for early election shall not submit an application for an alternative emissions limitation demonstration period under rule 3745-103-62 of the Administrative Code until the earlier of:
  - (a) January 1, 2008; or
  - (b) Early election is terminated pursuant to paragraph (D)(3) of this rule.
- (5) The owner or operator of a phase II unit approved for early election may not incorporate the unit into an averaging plan prior to January 1, 2000. On or after January 1, 2000, for purposes of the averaging plan, the early election unit will be treated as subject to the applicable emissions limitation for NO<sub>x</sub> for phase II units with group one boilers under rule 3745-103-59 of the Administrative Code.

- (B) Designated representative. In order to obtain early election status, the designated representative of a phase II unit with a group one boiler must have submitted an early election plan to USEPA by January 1, 1997, and USEPA must have approved such plan.
- (C) Ohio EPA's action. Beginning January 1, 2000, the director will approve any early election plan previously approved by USEPA during phase I, unless the plan is terminated pursuant to paragraph (D)(3) of this rule.
- (D) Special provisions.
- (1) Nitrogen oxides. A unit that is governed by an approved early election plan shall be subject to an emissions limitation for NO<sub>x</sub> as provided under paragraph (A)(2) of this rule except as provided under paragraph (D)(3)(b)(i) of this rule.
  - (2) Liability. The owners and operators of a unit governed by an approved early election plan shall be liable for any violation of the plan or this rule at that unit. The owners and operators shall be liable, beginning January 1, 2000, for fulfilling the obligations specified in 40 CFR Part 77.
  - (3) Termination. An approved early election plan shall be in effect only until the earlier of January 1, 2008 or January first of the calendar year for which a termination of the plan takes effect.
    - (a) If the designated representative of the unit under an approved early election plan fails to demonstrate compliance with the applicable emissions limitation under rule 3745-103-57 of the Administrative Code for any year during the period beginning January first of the first year the early election plan takes effect and ending December 31, 2007, the director shall terminate the plan. The termination will take effect beginning January first of the year after the year for which there is a failure to demonstrate compliance. The designated representative may not submit a new early election plan.
    - (b) The designated representative of the unit under an approved early election plan may terminate the plan any year prior to 2008 but may not submit a new early election plan. In order to terminate the plan, the designated representative must submit a notice under paragraph (C) of rule 3745-103-09 of the Administrative Code by January first of the year for which the termination is to take effect.
      - (i) If an early election plan is terminated any year prior to 2000, the unit shall meet, beginning January 1, 2000, the applicable emissions limitation for NO<sub>x</sub> for phase II units with group one boilers under rule 3745-103-59 of the Administrative Code.

- (ii) If an early election plan is terminated in or after 2000, the unit shall meet, beginning on the effective date of the termination, the applicable emissions limitation for NO<sub>x</sub> for phase II units with group one boilers under rule 3745-103-59 of the Administrative Code.

3745-103-61      **Permit application and compliance plans.**

(A) Duty to apply.

- (1) The designated representative of any source with an affected unit subject to this rule shall submit, by the applicable deadline under paragraph (B) of this rule, a complete acid rain permit application (or, if the unit is covered by an acid rain permit, a complete permit revision) that includes a complete compliance plan for NO<sub>x</sub> emissions covering the unit.
- (2) The original and three copies of the permit application and compliance plan for NO<sub>x</sub> emissions for phase II shall be submitted to the director, and one copy of the compliance plan for NO<sub>x</sub> emissions submitted to USEPA headquarters, acid rain division.

(B) Deadlines. For a phase I or phase II unit with a group one or group two boiler, the designated representative shall have submitted a complete permit application and compliance plan for NO<sub>x</sub> emissions covering the unit in phase II to the director and USEPA not later than January 1, 1998, except that early election units shall also submit an application to USEPA not later than January 1, 1997.

(C) Information requirements for NO<sub>x</sub> compliance plans. A complete compliance plan for NO<sub>x</sub> shall, for each affected unit included in the permit application and subject to this rule, either certify that the unit will comply with the applicable emissions limitation under rule 3745-103-57, 3745-103-58, or 3745-103-59 of the Administrative Code or specify one or more other acid rain compliance options for NO<sub>x</sub> in accordance with the requirements of this rule. A complete compliance plan for NO<sub>x</sub> for a source shall include the following elements in a format prescribed by the director:

- (1) Identification of the source;
- (2) Identification of each affected unit that is at the source and is subject to this rule;
- (3) Identification of the boiler type of each unit;
- (4) Identification of the compliance option proposed for each unit (i.e., meeting the applicable emissions limitation under rule 3745-103-57 (NO<sub>x</sub> emission limitation for group one, phase I boilers); 3745-103-58 (NO<sub>x</sub> emission limitation for group two boilers); or 3745-103-59 (NO<sub>x</sub> emission limitation for group one, phase II boilers); 3745-103-60 (early election); 3745-103-62 (alternative emission limitation); or 3745-103-63 (NO<sub>x</sub> emissions averaging) of the Administrative Code; and any additional information required for the appropriate option in accordance with this rule;

- (5) Reference to the standard requirements in rule 3745-103-05 of the Administrative Code; and
  - (6) The requirement of paragraph (A) of rule 3745-103-06 of the Administrative Code.
- (D) Duty to reapply. The designated representative of any source with an affected unit subject to this rule shall submit a complete acid rain permit application, including a complete compliance plan for NO<sub>x</sub> emissions covering the unit, in accordance with the deadlines in paragraph (A)(1) of rule 3745-103-07 of the Administrative Code.

3745-103-62      **Alternative emission limitations.**

[Comment: For dates of non-regulatory government publications, publications of recognized organizations and associations, federal rules, and federal statutory provisions referenced in this rule, see the last paragraph of rule 3745-103-01 of the Administrative Code titled "Incorporation by reference."]

(A) General provisions.

(1) The designated representative of an affected unit that is not an early election unit pursuant to rule 3745-103-60 of the Administrative Code and cannot meet the applicable emission limitation in rule 3745-103-57, 3745-103-58, or 3745-103-59 of the Administrative Code,

(a) For group one boilers, using low NO<sub>x</sub> technology or an alternative technology in accordance with paragraph (E)(11) of rule 3745-103-62 of the Administrative Code, or,

(b) For tangentially fired boilers, using separated overfire air, or,

(c) For group two boilers, using the technology on which the applicable emission limitation is based

May petition the director for an alternative emission limitation less stringent than the applicable emission limitation.

(2) In order for the unit to qualify for an alternative emission limitation, the designated representative shall demonstrate that the affected unit cannot meet the applicable emission limitation in rule 3745-103-57, 3734-103-58, or 3745-103-59 of the Administrative Code based on a showing, to the satisfaction of the director and the USEPA that:

(a) For a tangentially fired boiler, the owner or operator has either properly installed low NO<sub>x</sub> burner technology or properly installed separated overfire air; or

(b) For a dry bottom wall-fired boiler (other than a unit applying cell burner technology), the owner or operator has properly installed low NO<sub>x</sub> burner technology; or

(c) For a group one boiler, the owner or operator has properly installed an alternative technology (including but not limited to reburning, selective noncatalytic reduction, or selective catalytic reduction) that achieves NO<sub>x</sub> emission reductions demonstrated in accordance with paragraph (E)(11) of this rule; or

- (d) For a group two boiler, the owner or operator has properly installed the appropriate NO<sub>x</sub> emission control technology on which the applicable emission limitation in rule 3745-103-58 of the Administrative Code is based; and
  - (i) The installed NO<sub>x</sub> emission control system has been designed to meet the applicable emission limitation in rule 3745-103-57, 3745-103-58, or 3745-103-59 of the Administrative Code; and
  - (ii) For a demonstration period of at least fifteen months or other period of time, as provided in paragraph (F)(1) of this rule:
    - (a) The NO<sub>x</sub> emission control system has been properly installed and properly operated according to specifications and procedures designed to minimize the emissions of NO<sub>x</sub> to the atmosphere;
    - (b) Unit operating data as specified in this rule show that the unit and NO<sub>x</sub> emission control system were operated in accordance with the bid and design specifications on which the design of the NO<sub>x</sub> emission control system was based; and
    - (c) Unit operating data as specified in this rule, continuous emission monitoring data obtained pursuant to 40 CFR Part 75, and the test data specific to the NO<sub>x</sub> emission control system show that the unit could not meet the applicable emission limitation in rule 3745-103-57, 3745-103-58, or 3745-103-59 of the Administrative Code.
- (B) Petitioning process. The petitioning process for an alternative emission limitation shall consist of the following steps:
  - (1) Operation during a period of at least three months, following the installation of the NO<sub>x</sub> emission control system, that shows that the specific unit and the NO<sub>x</sub> emission control system was unable to meet the applicable emissions limitation under rule 3745-103-57, 3745-103-58, or 3745-103-59 of the Administrative Code and was operated in accordance with the operating conditions upon which the design of the NO<sub>x</sub> emission control system was based and with vendor specifications and procedures;
  - (2) Submission of a petition for an alternative emission limitation demonstration period as specified in paragraph (D) of this rule;
  - (3) Operation during a demonstration period of at least fifteen months, or other period of time as provided in paragraph (F)(1) of this rule, that demonstrates the inability of the specific unit to meet the applicable emissions limitation under rule 3745-103-57, 3745-103-58, or 3745-103-59 of the Administrative Code and

the minimum NO<sub>x</sub> emissions rate that the specific unit can achieve during long-term load dispatch operation; and

- (4) Submission of a petition for a final alternative emission limitation as specified in paragraph (E) of this rule.

(C) Deadlines.

- (1) Petition for an alternative emission limitation demonstration period. The designated representative of the unit shall submit a petition for an alternative emission limitation demonstration period to the director after the unit has been operated for at least three months after installation of the NO<sub>x</sub> emission control system required under paragraph (A)(2) of this rule and by the deadline of one hundred twenty days after January first of the first calendar year for which the demonstration period is sought to apply, or one hundred twenty days after startup of the NO<sub>x</sub> emission control system if the unit is not operating at the beginning of that calendar year.
- (2) Petition for a final alternative emission limitation. Not later than ninety days after the end of an approved alternative emission limitation demonstration period for the unit, the designated representative of the unit may submit a petition for an alternative emission limitation to the director.
- (3) Renewal of an alternative emission limitation. In order to request continuation of an alternative emission limitation, the designated representative must submit a petition to renew the alternative emission limitation on the date that the application for renewal of the sources acid rain permit containing the alternative emission limitation is due.

(D) Contents of petition for an alternative emission limitation demonstration period. The designated representative of an affected unit that has met the minimum criteria under paragraph (A) of this rule and that has been operated for a period of at least three months following the installation of the required NO<sub>x</sub> emission control system may submit to the director a petition for an alternative emission limitation demonstration period. In the petition, the designated representative shall provide the following information in a format prescribed by the director and the USEPA:

- (1) Identification of the unit;
- (2) The type of NO<sub>x</sub> control technology installed (e.g., low NO<sub>x</sub> burner technology, selective noncatalytic reduction, selective catalytic reduction, reburning);
- (3) If an alternative technology is installed, the time period (not less than six consecutive months) prior to installation of the technology to be used for the demonstration required in paragraph (E)(11) of this rule;

- (4) Documentation as set forth in paragraph (A)(1) of rule 3745-103-65 of the Administrative Code showing that the installed NO<sub>x</sub> emission control system has been designed to meet the applicable emission limitation in rule 3745-103-57, 3745-103-58, or 3745-103-59 of the Administrative Code and that the system has been properly installed according to procedures and specifications designed to minimize the emissions of NO<sub>x</sub> to the atmosphere;
- (5) The date the unit commenced operation following the installation of the NO<sub>x</sub> emission control system or the date the specific unit became subject to the emission limitations of rule 3745-103-57, 3745-103-58, or 3745-103-59 of the Administrative Code, whichever is later;
- (6) The dates of the operating period (which must be at least three months long);
- (7) Certification by the designated representative that the owner(s) or operator operated the unit and the NO<sub>x</sub> emission control system during the operating period in accordance with: specifications and procedures designed to achieve the maximum NO<sub>x</sub> reduction possible with the installed NO<sub>x</sub> emission control system or the applicable emission limitation in rule 3745-103-57, 3745-103-58, or 3745-103-59 of the Administrative Code; the operating conditions upon which the design of the NO<sub>x</sub> emission control system was based; and vendor specifications and procedures;
- (8) A brief statement describing the reason(s) why the unit cannot achieve the applicable emission limitation of rule 3745-103-56, 3745-103-57, or 3745-103-58 of the Administrative Code;
- (9) A demonstration period plan, as set forth in paragraph (A)(2) of rule 3745-103-65 of the Administrative Code;
- (10) Unit operating data and quality-assured continuous emission monitoring data (including the specific data items listed in paragraph (A)(3) of rule 3745-103-65 of the Administrative Code collected in accordance with 40 CFR Part 75 during the operating period) and demonstrating the inability of the specific unit to meet the applicable emission limitation in rule 3745-103-57, 3745-103-58, or 3745-103-59 of the Administrative Code on an annual average basis while operating as certified under paragraph (D)(7) of this rule;
- (11) An interim alternative emission limitation, in lb/MMBtu, that the unit can achieve during a demonstration period of at least fifteen months. The interim alternative emission limitation shall be derived from the data specified in paragraph (D)(10) of this rule using methods and procedures satisfactory to USEPA;
- (12) The proposed dates of the demonstration period (which must be at least fifteen months long);

- (13) A report that outlines the testing and procedures to be used during the demonstration period in order to determine the maximum NO<sub>x</sub> emission reduction obtainable with the installed system. The report shall include the reasons for the NO<sub>x</sub> emission control system's failure to meet the applicable emission limitation, and the tests and procedures that will be followed to optimize the NO<sub>x</sub> emission control system's performance. Such tests and procedures may include those identified in rule 3745-103-66 of the Administrative Code as appropriate.
  - (14) The special provisions at paragraph (G)(1) of this rule.
- (E) Contents of petition for a final alternative emission limitation. After the approved demonstration period, the designated representative of the unit may petition the director and the USEPA for an alternative emission limitation. The petition shall include the following elements in a format prescribed by the director and the USEPA:
- (1) Identification of the unit;
  - (2) Certification that the owner(s) or operator operated the affected unit and the NO<sub>x</sub> emission control system during the demonstration period in accordance with: specifications and procedures designed to achieve the maximum NO<sub>x</sub> reduction possible with the installed NO<sub>x</sub> emission control system or the applicable emissions limitation in rule 3745-103-57, 3745-103-58, or 3745-103-59 of the Administrative Code; the operating conditions (including load dispatch conditions) upon which the design of the NO<sub>x</sub> emission control system was based; and vendor specifications and procedures;
  - (3) Certification that the owner(s) or operator have installed in the affected unit all NO<sub>x</sub> emission control systems, made any operational modifications, and completed any planned upgrades and/or maintenance to equipment specified in the approved demonstration period plan for optimizing NO<sub>x</sub> emission reduction performance, consistent with the demonstration period plan and the proper operation of the installed NO<sub>x</sub> emission control system. Such certification shall explain any differences between the installed NO<sub>x</sub> emission control system and the equipment configuration described in the approved demonstration period plan;
  - (4) A clear description of each step taken or modification made during the demonstration period to improve or optimize the performance of the installed NO<sub>x</sub> emission control system;
  - (5) Engineering design calculations and drawings that show the technical specifications for installation of any additional operational or emission control modifications installed during the demonstration period;

- (6) Unit operating and quality-assured continuous emission monitoring data (including the specific data listed in paragraph (B) of rule 3745-103-65 of the Administrative Code) collected in accordance with 40 CFR Part 75 during the demonstration period and demonstrating the inability of the specific unit to meet the applicable emission limitation in rule 3745-103-57, 3745-103-58, or 3745-103-59 of the Administrative Code on an annual average basis while operating in accordance with the certification under paragraph (E)(2) of this rule;
- (7) A report (based on the parametric test requirements set forth in the approved demonstration period plan as identified in paragraph (D)(13) of this rule) that demonstrates the unit was operated in accordance with the operating conditions upon which the design of the NO<sub>x</sub> emission control system was based and describes the reason(s) for the failure of the installed NO<sub>x</sub> emission control system to meet the applicable emission limitation in rules 3745-103-57, 3745-103-58, or 3745-103-59 of the Administrative Code on an annual average basis;
- (8) The minimum NO<sub>x</sub> emission rate, in pound per MMBtu, that the affected unit can achieve on an annual average basis with the installed NO<sub>x</sub> emission control system. This value, which shall be the requested alternative emission limitation, shall be derived from the data specified in this rule using methods and procedures satisfactory to USEPA and shall be the lowest annual emission rate the unit can achieve with the installed NO<sub>x</sub> emission control system;
- (9) All supporting data and calculations documenting the determination of the requested alternative emission limitation and its conformance with the methods and procedures satisfactory to the director and the USEPA;
- (10) The special provisions in paragraph (G)(2) of this rule; and
- (11) In addition to the other requirements of this rule, the owner or operator of an affected unit with a group one boiler that has installed an alternative technology in addition to or in lieu of low NO<sub>x</sub> burner technology and cannot meet the applicable emission limitation in rule 3745-103-57 of the Administrative Code shall demonstrate, to the satisfaction of the director and the USEPA, that the actual percentage reduction in NO<sub>x</sub> emissions (pound per MMBtu), on an annual average basis is greater than sixty-five per cent of the average annual NO<sub>x</sub> emissions prior to the installation of the NO<sub>x</sub> emission control system. The percentage reduction in NO<sub>x</sub> emissions shall be determined using continuous emissions monitoring data for NO<sub>x</sub> taken during the time period (under paragraph (D)(3) of this rule) prior to the installation of the NO<sub>x</sub> emission control system and during long-term load dispatch operation of the specific boiler.

(F) Ohio EPAs action.

(1) Alternative emission limitation demonstration period.

- (a) The director may approve an alternative emission limitation demonstration period and demonstration period plan, provided that the requirements of this rule are met to the satisfaction of the director. The director shall disapprove a demonstration period if the requirements of paragraph (A) of this rule were not met during the operating period.
- (b) The demonstration period as approved by the director will include, as part of the demonstration period, the four month period prior to submission of the alternative emission limitation application in the demonstration period.
- (c) The alternative emission limitation demonstration period will authorize the affected unit to emit at a rate not greater than the interim alternative emission limitation during the demonstration period on or after the applicable date established in rule 3745-103-58 or 3745-103-59 of the Administrative Code and until the date that the director and the USEPA approve or deny a final alternative emission limitation.
- (d) If the designated representative petitions for an extension of an approved alternative emission limitation demonstration period in accordance with paragraph (G)(1)(b) of this rule, the director may extend the demonstration period by administrative amendment to the acid rain permit under rule 3745-103-18 of the Administrative Code.
- (e) The director shall deny the demonstration period if the designated representative cannot demonstrate that the unit met the requirements of paragraph (A)(2) of this rule. In such cases, the director shall require that the owner or operator operate the unit in compliance with the applicable emission limitation in rule 3745-103-57, 3745-103-58, or 3745-103-59 of the Administrative Code for the period preceding the submission of the application for an alternative emission limitation demonstration period, including the operating period, if such periods are after the date on which the unit is subject to the standard limit under rule 3745-103-57, 3745-103-58, or 3745-103-59 of the Administrative Code.

(2) Alternative emission limitation.

- (a) If the director and the USEPA determine that the requirements in this rule are met, the director and the USEPA shall approve an alternative emission limitation and the director shall issue or revise an acid rain permit to apply the approved limitation, in accordance with rule 3745-103-13 of the Administrative Code. The permit will authorize the unit to emit at a rate not greater than the approved alternative emission limitation, beginning on the effective date the director revises the applicable acid rain permit to approve the alternative emission limitation.

- (b) If Ohio EPA or the USEPA disapproves an alternative emission limitation under paragraph (A)(2) of this rule, the owner or operator shall operate the affected unit in compliance with the applicable emission limitation in rule 3745-103-57, 3745-103-58, or 3745-103-59 of the Administrative Code (unless the unit is participating in an approved averaging plan under rule 3745-103-63 of the Administrative Code) beginning on the date the director revises an acid rain permit to disapprove an alternative emission limitation.

(3) Alternative emission limitation renewal.

- (a) If, upon review of a petition to renew an approved alternative emission limitation, the director determines that no changes have been made to the control technology, its operation, the operating conditions on which the alternative emission limitation was based, or the actual NO<sub>x</sub> emission rate, the alternative emission limitation shall be renewed.
- (b) If the director determines that changes have been made to either the control technology, its operation, the fuel quality, or the operating conditions on which the alternative emission limitation was based, the designated representative shall submit, in order to renew the alternative emission limitation or to obtain a new alternative emission limitation, a petition for an alternative emission limitation demonstration period that meets the requirements of paragraph (D) of this rule using a new demonstration period, and the director shall approve or deny the petition in accordance with paragraph (F) of this rule.

(G) Special provisions.

(1) Alternative emission limitation demonstration period.

(a) Emission limitations.

- (i) Each unit with an approved alternative emission limitation demonstration period shall comply with the interim emission limitation specified in the unit's permit beginning on the effective date of the demonstration period specified in the permit and, if a timely petition for a final alternative emission limitation is submitted, extending until the date on which the director issues or revises an acid rain permit to approve or disapprove an alternative emission limitation. If a timely petition is not submitted, then the unit shall comply with the standard emission limit under rule 3745-103-57, 3745-103-58, or 3745-103-59 of the Administrative Code beginning on the date the petition was required to be submitted under paragraph (C)(2) of this rule.

- (ii) During the demonstration period, when the owner or operator identifies, boiler operating or NO<sub>x</sub> emission control system modifications or upgrades that would produce further NO<sub>x</sub> emission reductions, enabling the affected unit to comply with or bring its emission rate closer to the applicable emissions limitation under rule 3745-103-57, 3745-103-58, or 3745-103-59 of the Administrative Code, the designated representative may submit a request and the director may grant, an extension of the demonstration period for such period of time (not to exceed twelve months) as may be necessary to implement such modifications or upgrades, by administrative amendment under rule 3745-103-18 of the Administrative Code.
  - (iii) If the approved interim alternative emission limitation applies to a unit for part, but not all, of a calendar year, the unit shall determine compliance for the calendar year in accordance with the procedures in 40 CFR 76.13(a).
- (b) Operating requirements.
- (i) A unit with an approved alternative emission limitation demonstration period shall be operated under load dispatch conditions consistent with the operating conditions upon which the design of the NO<sub>x</sub> emission control system and performance guarantee were based, and in accordance with the demonstration period plan.
  - (ii) A unit with an approved alternative emission limitation demonstration period shall install all NO<sub>x</sub> emission control systems, make any operational modifications, and complete any upgrades and maintenance to equipment specified in the approved demonstration period plan for optimizing NO<sub>x</sub> emission reduction performance.
  - (iii) When the owner or operator identifies boiler or NO<sub>x</sub> emission control system operating modifications that would produce higher NO<sub>x</sub> emission reductions, enabling the affected unit to comply with, or bring its emission rate closer to, the applicable emission limitation under rule 3745-103-57, 3745-103-58 or 3745-103-59 of the Administrative Code, the designated representative shall submit an administrative amendment under rule 3745-103-18 of the Administrative Code to revise the unit's acid rain permit and demonstration period plan to include such modifications.
- (c) Testing requirements. A unit with an approved alternative emission limitation demonstration period shall monitor in accordance with 40 CFR Part 75 and shall conduct all tests required under the approved demonstration period plan.

(2) Final alternative emission limitation.

(a) Emission limitations.

- (i) Each unit with an approved alternative emission limitation shall comply with the alternative emission limitation specified in the unit's permit beginning on the date specified in the permit as issued or revised by the director to apply the final alternative emission limitation.
- (ii) If the approved interim or final alternative emission limitation applies to a unit for part, but not all, of a calendar year, the unit shall determine compliance for the calendar year in accordance with the procedures in 40 CFR 76.13(a).

Effective: 01/12/2007

3745-103-63      **Emissions averaging.**

[Comment: For dates of non-regulatory government publications, publications of recognized organizations and associations, federal rules, and federal statutory provisions referenced in this rule, see the last paragraph of rule 3745-103-01 of the Administrative Code titled "Incorporation by reference."]

- (A) General provisions. In lieu of complying with the applicable emission limitation in rule 3745-103-57, 3745-103-58, or 3745-103-59 of the Administrative Code, any affected units subject to such emission limitation, under control of the same owner or operator, and having the same designated representative may average their NO<sub>x</sub> emissions under an averaging plan approved under this rule.
- (1) Each affected unit included in an averaging plan for phase II shall be a boiler subject to an emission limitation in rule 3745-103-57, 3745-103-58, or 3745-103-59 of the Administrative Code for all years for which the unit is included in the plan.
  - (2) Each unit included in an averaging plan shall have an alternative contemporaneous annual emission limitation (pound per MMBtu) and can only be included in one averaging plan.
  - (3) Each unit included in an averaging plan shall have a minimum allowable annual heat input value (MMBtu), if it has an alternative contemporaneous annual emission limitation more stringent than that unit's applicable emission limitation under rule 3745-103-57, 3745-103-58, or 3745-103-59 of the Administrative Code, and a maximum allowable annual heat input value, if it has an alternative contemporaneous annual emission limitation less stringent than that unit's applicable emission limitation under rule 3745-103-57, 3745-103-58, or 3745-103-59 of the Administrative Code.
  - (4) The Btu-weighted annual average emission rate for the units in an averaging plan shall be less than or equal to the Btu-weighted annual average emission rate for the same units had they each been operated, during the same period of time, in compliance with the applicable emission limitations in rule 3745-103-57, 3745-103-58, or 3745-103-59 of the Administrative Code.
  - (5) In order to demonstrate that the proposed plan is consistent with paragraph (A)(4) of this rule, the alternative contemporaneous annual emission limitations and annual heat input values assigned to the units in the proposed averaging plan shall meet the following requirement:

$$\frac{\sum_{i=1}^n (R_{Li} \times HI_i)}{\sum_{i=1}^n HI_i} \leq \frac{\sum_{i=1}^n (R_{ii} \times HI_i)}{\sum_{i=1}^n HI_i} \quad \text{(Equation 1)}$$

where:

$R_{Li}$  = alternative contemporaneous annual emission limitation for unit  $i$ , in pound per MMBtu, as specified in the averaging plan;

$R_{ii}$  = applicable emission limitation for unit  $i$ , in pound per MMBtu, as specified in rule 3745-103-57, 3745-103-58, or 3745-103-59 of the Administrative Code except that for early election units, which may be included in an averaging plan only on or after January 1, 2000,  $R_{ii}$  shall equal the most stringent applicable emission limitation under rule 3745-103-57 or 3745-103-59 of the Administrative Code;

$HI_i$  = annual heat input for unit  $i$ , in MMBtu, as specified in the averaging plan;

$n$  = number of units in the averaging plan.

- (6) For units with an alternative emission limitation,  $R_{Li}$  shall equal the applicable emissions limitation under rule 3745-103-57, 3745-103-58, or 3745-103-59 of the Administrative Code, not the alternative emissions limitation.
- (7) No unit may be included in more than one averaging plan.

(B) Submission requirements.

- (1) The designated representative of a unit meeting the requirements of paragraphs (A)(1) and (A)(7) of this rule may submit an averaging plan (or a revision to an approved averaging plan) to the director and any other applicable permitting authority(ies) at any time up to and including January first (or July first, if the plan is restricted to only units located within Ohio EPA's jurisdiction) of the calendar year for which the averaging plan is to become effective.
- (2) The designated representative shall submit a copy of the same averaging plan (or the same revision to an approved averaging plan) to any other permitting authority with jurisdiction over a unit in the plan, and to USEPA.

- (3) When an averaging plan (or a revision to an approved averaging plan) is not approved, the owner or operator of each unit in the plan shall operate the unit in compliance with the emission limitation that would apply in the absence of the averaging plan (or revision to a plan).
- (C) Contents of NO<sub>x</sub> averaging plan. A complete NO<sub>x</sub> averaging plan shall include the following elements in a format prescribed by the director and the USEPA:
- (1) Identification of each unit in the plan;
  - (2) Each unit's applicable emission limitation as determined by rule 3745-103-04, 3745-103-05, or 3745-103-06 of the Administrative Code;
  - (3) The alternative contemporaneous annual emission limitation for each unit (in pound per MMBtu). If any of the units identified in the NO<sub>x</sub> averaging plan utilize a common stack pursuant to 40 CFR 75.17(a)(2)(i)(b), the same alternative contemporaneous emission limitation shall be assigned to each such unit but different heat input limits may be assigned;
  - (4) The annual heat input limit for each unit (in MMBtu);
  - (5) The calculation for equation 1 in paragraph (A)(5) of this rule;
  - (6) The calendar years for which the plan will be in effect; and
  - (7) The special provisions pursuant to paragraph (D)(1) of this rule.
- (D) Special provisions.
- (1) Emission limitations. Each affected unit in an approved averaging plan is in compliance with the acid rain emission limitation for NO<sub>x</sub> under the plan only if the following requirements are met:
    - (a) For each unit, the unit's actual annual average emission rate for the calendar year, in pound per MMBtu, is less than or equal to its alternative contemporaneous annual emission limitation in the averaging plan; and
      - (i) For each unit with an alternative contemporaneous emission limitation less stringent than the applicable emission limitation in rule 3745-103-57, 3745-103-58, or 3745-103-59 of the Administrative Code, the actual annual heat input for the calendar year does not exceed the annual heat input limit in the averaging plan;
      - (ii) For each unit with an alternative contemporaneous annual emission limitation more stringent than the applicable emission limitation in rule 3745-103-57, 3745-103-58, or 3745-103-59 of the Administrative

Code, the actual annual heat input for the calendar year is not less than the annual heat input limit in the averaging plan; or

- (b) If one or more of the units does not meet the requirements under paragraph (D)(1)(a)(i) of this rule, the designated representative shall demonstrate, in accordance with paragraph (D)(1)(b)(i) of this rule (equation 2) that the actual Btu-weighted annual average emission rate for the units in the plan is less than or equal to the Btu-weighted annual average rate for the same units had they each been operated, during the same period of time, in compliance with the applicable emission limitations in rule 3745-103-57, 3745-103-58, or 3745-104-59 of the Administrative Code.

- (i) A group showing of compliance shall be made based on the following equation:

$$\frac{\sum_{i=1}^n (R_{ai} \times HI_{ai})}{\sum_{i=1}^n HI_{ai}} \leq \frac{\sum_{i=1}^n (R_{li} \times HI_{ai})}{\sum_{i=1}^n HI_{ai}} \quad \text{(Equation 2)}$$

where,

$R_{ai}$  = actual annual average emission rate for unit  $i$ , in pound per MMBtu, as determined using the procedures in 40 CFR Part 75. For units in an averaging plan utilizing a common stack pursuant to 40 CFR 75.17(a)(2)(i)(B), use the same  $NO_x$  emission rate value for each unit utilizing the common stack, and calculate this value in accordance with appendix F of 40 CFR Part 75;

$R_{li}$  = applicable annual emission limitation for unit  $i$ , in pound per MMBtu, as specified in rule 3745-103-57, 3745-103-58, or 3745-103-59 of the Administrative Code, except that for early election units, which may be included in an averaging plan only on or after January 1, 2000,  $R_{li}$  shall equal the most stringent applicable emission limitation under rule 3745-103-04 or 3745-103-06 of the Administrative Code;

$HI_{ai}$  = actual annual heat input for unit  $i$ , in MMBtu, as determined using the procedures in 40 CFR Part 75;

$n$  = number of units in the averaging plan.

- (ii) For units with an alternative emission limitation,  $R_i$  shall equal the applicable emission limitation under rule 3745-103-57, 3745-103-58, or 3745-103-59 of the Administrative Code, not the alternative emission limitation.
- (c) If there is a successful group showing of compliance under paragraph (D)(1)(b)(i) of this rule for a calendar year, then all units in the averaging plan shall be deemed to be in compliance for that year with their alternative contemporaneous emission limitations and annual heat input limits under paragraph (D)(1)(a) of this rule.
  - (i) Liability. The owners and operators of a unit governed by an approved averaging plan shall be liable for any violation of the plan or this rule at that unit or any other unit in the plan, including liability for fulfilling the obligations specified in 40 CFR Part 77 and sections 113 and 411 of the Clean Air Act.
  - (ii) Withdrawal or termination. The designated representative may submit a notification to terminate an approved averaging plan in accordance with paragraph (C) of rule 3745-103-09 of the Administrative Code, no later than October first of the calendar year for which the plan is to be withdrawn or terminated.

Rule 3745-103-64 has been rescinded as of January 12, 2007

3745-103-65      **Monitoring, recordkeeping, and reporting.**

[Comment: For dates of non-regulatory government publications, publications of recognized organizations and associations, federal rules, and federal statutory provisions referenced in this rule, see the last paragraph of rule 3745-103-01 of the Administrative Code titled "Incorporation by reference."]

(A) A petition for an alternative emission limitation demonstration period under paragraph (D) of rule 3745-103-62 of the Administrative Code shall include the following information:

(1) In accordance with paragraph (D)(4) of rule 3745-103-62 of the Administrative Code, the following information:

(a) Documentation that the owner or operator solicited bids for a NO<sub>x</sub> emission control system designed for application to the specific boiler and designed to achieve the applicable emission limitation in rule 3745-103-57, 3745-103-58, or 3745-103-59 of the Administrative Code on an annual average basis. This documentation must include a copy of all bid specifications;

(b) A copy of the performance guarantee submitted by the vendor of the installed NO<sub>x</sub> emission control system to the owner or operator showing that such system was designed to meet the applicable emission limitation in rule 3745-103-57, 3745-103-58, or 3745-103-59 of the Administrative Code on an annual average basis;

(c) Documentation describing the operational and combustion conditions that are the basis of the performance guarantee;

(d) Certification by the primary vendor of the NO<sub>x</sub> emission control system that such equipment and associated auxiliary equipment was properly installed according to the modifications and procedures specified by the vendor; and

(e) Certification by the designated representative that the owner(s) or operator installed technology that meets the requirements of paragraph (A)(2) of rule 3745-103-62 of the Administrative Code.

(2) In accordance with paragraph (D)(9) of rule 3745-103-62 of the Administrative Code, the following information:

(a) The operating conditions of the NO<sub>x</sub> emission control system including load range, oxygen range, coal volatile matter range, and, for tangentially fired boilers, distribution of combustion air within the NO<sub>x</sub> emission control system;

- (b) Certification by the designated representative that the owner(s) or operator have achieved and are following the operating conditions, boiler modifications, and upgrades that formed the basis for the system design and performance guarantee;
  - (c) Any planned equipment modifications and upgrades for the purpose of achieving the maximum NO<sub>x</sub> reduction performance of the NO<sub>x</sub> emission control system that were not included in the design specifications and performance guarantee, but that were achieved prior to submission of this application and are being followed;
  - (d) A list of any modifications or replacements of equipment that are to be done prior to the completion of the demonstration period for the purpose of reducing emissions of NO<sub>x</sub>; and
  - (e) The parametric testing that will be conducted to determine the reason or reasons if the unit fails to achieve the applicable emission limitation and to verify the proper operation of the installed NO<sub>x</sub> emission control system during the demonstration period. The tests shall include tests in rule 3745-103-66 of the Administrative Code, which may be modified as follows:
    - (i) The owner or operator of the unit may add tests to those listed in rule 3745-103-66 of the Administrative Code, if such additions provide data relevant to the failure of the installed NO<sub>x</sub> emission control system to meet the applicable emissions limitation in rule 3745-103-57, 3745-103-58, or 3745-103-59 of the Administrative Code; or
    - (ii) The owner or operator of the unit may remove tests listed in rule 3745-103-66 of the Administrative Code that are shown, to the satisfaction of the director, not to be relevant to NO<sub>x</sub> emissions from the affected unit; and
    - (iii) In the event the performance guarantee or the NO<sub>x</sub> emission control system specifications require additional tests not listed in rule 3745-103-66 of the Administrative Code, or specify operating conditions not verified by tests listed in rule 3745-103-66 of the Administrative Code, the owner or operator of the unit shall include such additional tests.
- (3) In accordance with paragraph (D)(10) of rule 3745-103-62 of the Administrative Code, the following information for the operating period:
- (a) The average NO<sub>x</sub> emission rate (in pound per MMBtu) of the specific unit;
  - (b) The highest hourly NO<sub>x</sub> emission rate (in pound per MMBtu) of the specific unit;

- (c) Hourly NO<sub>x</sub> emission rate (in pound per MMBtu), calculated in accordance with 40 CFR Part 75;
  - (d) Total heat input (in MMBtu) for the unit for each hour of operation, calculated in accordance with the requirements of 40 CFR Part 75; and
  - (e) Total integrated hourly unit load (in MWe-hrs), on a gross basis.
- (B) A petition for an alternative emission limitation shall include the following information in accordance with paragraph (E)(6) of rule 3745-103-62 of the Administrative Code.
- (1) Total heat input (in MMBtu) for the unit for each hour of operation, calculated in accordance with the requirements of 40 CFR Part 75;
  - (2) Hourly NO<sub>x</sub> emission rate (in pound per MMBtu), calculated in accordance with the requirements of 40 CFR Part 75; and
  - (3) Total integrated hourly unit load (in MWe-hrs), on a gross basis.

3745-103-66      **Test methods and procedures.**

[Comment: For dates of non-regulatory government publications, publications of recognized organizations and associations, federal rules, and federal statutory provisions referenced in this rule, see the last paragraph of rule 3745-103-01 of the Administrative Code titled "Incorporation by reference."]

- (A) The owner or operator may use the following tests as a basis for the report required by paragraph (E)(7) of rule 3745-103-62 of the Administrative Code:
- (1) An ultimate analysis of coal using ASTM D3176-89, "Standard Practice for Ultimate Analysis of Coal and Coke;"
  - (2) A proximate analysis of coal using ASTM D3172-89, "Standard Practice for Proximate Analysis of Coal and Coke;" and
  - (3) Measure the coal mass flow rate to each individual burner using ASME performance test code 4.2, "Test Code for Coal Pulverizers" or ISO 9931, "Coal - Sampling of Pulverized Coal Conveyed by Gases in Direct Fired Coal Systems."
- (B) The owner or operator may measure and record the actual NO<sub>x</sub> emission rate in accordance with the requirements of this part while varying the following parameters where possible to determine their effects on the emissions of NO<sub>x</sub> from the affected boiler:
- (1) Excess air levels;
  - (2) Settings of burners or coal and air nozzles, including tilt and yaw, or swirl;
  - (3) For tangentially fired boilers, distribution of combustion air within the NO<sub>x</sub> emission control system;
  - (4) Coal mass flow rates to each individual burner;
  - (5) Coal-to-primary air ratio (based on pound per hour) for each burner, the average coal-to-primary air ratio for all burners, and the deviations of individual burners' coal-to-primary air ratios from the average value; and
  - (6) If the boiler uses varying types of coal, the type of coal. Provide the results of proximate and ultimate analyses of each type of as-fired coal.
- (C) In performing the tests specified in paragraph (A) of this rule, the owner or operator shall begin the tests using the equipment settings for which the NO<sub>x</sub> emission control system was designed to meet the NO<sub>x</sub> emission rate guaranteed by the

primary NO<sub>x</sub> emission control system vendor. These results constitute the baseline controlled condition.

- (D) After establishing the baseline controlled condition under paragraph (C) of this rule, the owner or operator may:
- (1) Change excess air levels plus or minus five per cent from the baseline controlled condition to determine the effects on emissions of NO<sub>x</sub>, by providing a minimum of three readings (e.g., with a baseline reading of twenty per cent excess air, excess air levels may be changed to nineteen per cent and twenty-one per cent);
  - (2) For tangentially fired boilers, change the distribution of combustion air within the NO<sub>x</sub> emission control system to determine the effects on NO<sub>x</sub> emissions by providing a minimum of three readings, one with the minimum, one with the baseline, and one with the maximum amounts of staged combustion air; and
  - (3) Show that the combustion process within the boiler is optimized (e.g., that the burners are balanced).

## **Chapter 3745-104: Accidental Releases Prevention Program**

*Contact:* Dana Thompson 614-644-3701  
Dana.Thompson@EPA.State.Oh.US

3745-104-01      **Definitions.**

(A) Except as otherwise provided in this rule, the definitions in rule 3745-15-01 of the Administrative Code shall apply to this chapter.

(B) As used in Chapter 3745-104 of the Administrative Code:

- (1) "Accidental release" means an unanticipated emission of a regulated substance into the ambient air from a stationary source.
- (2) "Administrative controls" means written procedural mechanisms used for hazard control.
- (3) "AIChE/CCPS" means the American institute of chemical engineers/center for chemical process safety.
- (4) "API" means the American petroleum institute.
- (5) "Article" means a manufactured item, as defined under 29 CFR 1910.1200(b), that is formed to a specific shape or design during manufacture, that has end use functions dependent in whole or in part upon the shape or design during end use, and that does not release or otherwise result in exposure to a regulated substance under normal conditions of processing and use.
- (6) "ASME" means the American society of mechanical engineers.
- (7) "CAS" means the chemical abstracts service.
- (8) "Catastrophic release" means a major uncontrolled emission, fire, or explosion, involving one or more regulated substances that presents imminent and substantial endangerment to public health and the environment.
- (9) "Clean Air Act Amendments" means the "Clean Air Act Amendments of 1990 contained in 42 U.S.C. 7401 et. al., and regulations adopted under it.
- (10) "Condensate" means hydrocarbon liquid separated from natural gas that condenses due to changes in temperature, pressure, or both, and remains liquid at standard conditions.
- (11) "Covered process" means a process that has a regulated substance present in an amount that is in excess of the threshold quantity established in rule 3745-104-02 of the Administrative Code.
- (12) "Crude oil" means any naturally occurring, unrefined petroleum liquid.
- (13) "DOT" means the United States department of transportation.

- (14) "Environmental receptor" means natural areas such as national or state parks, forests, or monuments; federally designated or state-designated wildlife sanctuaries, preserves, refuges, or areas; and federal wilderness areas, that could be exposed at any time to toxic concentrations, radiant heat, or overpressure greater than or equal to the endpoints prescribed in rule 3745-104-10 of the Administrative Code, as a result of an accidental release and that can be identified on United States geological survey maps.
- (15) "Field gas" means gas extracted from a production well before the gas enters a natural gas processing plant.
- (16) "Hot work" means work involving electric or gas welding, cutting, brazing, or similar flame or spark-producing operations.
- (17) "Injury" means any effect on a human that requires medical treatment or hospitalization and that results from either:
  - (a) The direct exposure to toxic concentrations, radiant heat, or overpressures resulting from an accidental release; or
  - (b) The direct consequences of a vapor cloud explosion (such as flying glass, debris, and other projectiles) from an accidental release.
- (18) "Major change" means introduction of a new process, process equipment, or regulated substance, an alteration of process chemistry that results in any change to safe operating limits, or other alteration that introduces a new hazard.
- (19) "Mechanical integrity" means the process of ensuring that process equipment is fabricated from the proper materials of construction and is properly installed, maintained, and replaced to prevent failures and accidental releases.
- (20) "Medical treatment" means treatment, other than first aid, administered by a physician or registered professional personnel under standing orders from a physician.
- (21) "Mitigation" or "mitigation system" means specific activities, technologies, or equipment designed or deployed to capture or control substances upon loss of containment to minimize exposure of the public or the environment. Passive mitigation means equipment, devices, or technologies that function without human, mechanical, or other energy input. Active mitigation means equipment, devices, or technologies that need human, mechanical, or other energy input to function.
- (22) "NAICS" means North American industry classification system.
- (23) "Natural gas processing plant (gas plant)" means any processing site engaged in the extraction of natural gas liquids from field gas, fractionation of mixed natural gas liquids to natural gas products, or both, classified as North American

industrial classification system (NAICS) code 211112 (previously standard industrial classification (SIC) code 1321).

- (24) "NFPA" means the national fire protection association.
- (25) "Offsite" means areas beyond the property boundary of the stationary source, and areas within the property boundary to which the public has routine and unrestricted access during or outside business hours.
- (26) "OSHA" means the U.S. occupational safety and health administration.
- (27) "Owner or operator" means any person who owns, leases, operates, controls, or supervises a stationary source.
- (28) "Petroleum refining process unit" means a process unit used in an establishment primarily engaged in petroleum refining as defined in NAICS code 32411 for petroleum refining (formerly SIC code 2911) and used for the following: producing transportation fuels (such as gasoline, diesel fuels, and jet fuels), heating fuels (such as kerosene, fuel gas distillate, and fuel oils), or lubrications; separating petroleum, or separating, cracking, reacting, or reforming intermediate petroleum streams. Examples of such units include, but are not limited to, petroleum based solvent units, alkylation units, catalytic hydrotreating, catalytic hydrorefining, catalytic hydrocracking, catalytic reforming, catalytic cracking, crude distillation, lube oil process processing.
- (29) "Population" means the public.
- (30) "Process" means any activity involving a regulated substance, including any use, storage, manufacturing, handling, or on-site movement of the substance or any combination of these activities. Any group of vessels that are interconnected, or separate vessels that are located in such a manner that a regulated substance potentially could be involved in a release, shall be considered a single process.
- (31) "Produced water" means water extracted from the earth from an oil or natural gas production well, or that is separated from oil or natural gas after extraction.
- (32) "Public" means any person except employees or contractors at the stationary source.
- (33) "Public receptor" means off-site residences, institutions such as schools or hospitals, industrial, commercial, and office building, parks, or recreational areas inhabited or occupied by the public at any time without restriction by the stationary source where members of the public could be exposed to toxic concentrations, radiant heat, or overpressure as a result of an accidental release.

- (34) "Regulated substance" means a toxic or flammable substance listed in rule 3745-104-04 of the Administrative Code.
- (35) "Replacement in kind" means a replacement that satisfies the design specifications.
- (36) "Retail facility" means a stationary source at which more than one-half of the income is obtained from direct sales to end users or at which more than one-half of the fuel sold, by volume, is sold through a cylinder exchange program.
- (37) "Risk management plan (RMP)" means a risk management plan required in rule 3745-104-38 of the Administrative Code.
- (38) "Stationary source" means any buildings, structures, equipment, installations, or substance-emitting stationary activities that belong to the same industrial group as described in the standard industrial classification manual, 1987, that are located on one or more contiguous properties under the control of the same person or persons (or persons under common control), and from which an accidental release may occur. Properties shall not be considered contiguous solely because of a railroad or pipeline right-of-way.
- (a) "Stationary source" includes transportation containers that are used for storage not incident to transportation and transportation containers that are connected to equipment at a stationary source for loading and unloading. "Stationary source" does not include the transportation, including storage incident to transportation, of any regulated substance under this chapter. "Stationary source" does not include naturally occurring hydrocarbon reservoirs.
- (b) "Transportation" includes, but is not limited to, transportation that is subject to oversight or regulation under 49 C.F.R. part 192, 193, or 195, or to a state natural gas or hazardous liquid program for which the state has in effect a certification to the United States department of transportation under 49 U.S.C. 60105.
- (39) "Threshold quantity" means the quantity established for a regulated substance in rule 3745-104-02 of the Administrative Code that, if exceeded, subject an owner or operator to compliance with this chapter and rules adopted under it.
- (40) "Vessel" means any reactor, tank, drum, barrel, cylinder, vat, kettle, boiler, pipe, hose, or other container.
- (41) "Worst-case release" means the release of the largest quantity of a regulated substance from a vessel or process line failure that results in the greatest distance to an endpoint defined in rule 3745-104-09 of the Administrative Code.
- (C) "Incorporation by Reference. This chapter includes references to certain matter or materials. The text of the incorporated materials is not included in the regulations

contained in this chapter. The materials are hereby made a part of the regulations in this chapter. For materials subject to change, only the specific version specified in the regulation are incorporated. Material is incorporated as it exists on the effective date of this rule. Except for subsequent annual publication of existing (unmodified) Code of Federal Regulation compilations, any amendment or revision to a reference document is not incorporated unless and until this rule has been amended to specify the new dates."

(1) Availability. The materials incorporated by reference are available as follows:

- (a) Chemical Abstract Service (CAS). Information can be obtained by writing to: "Chemical Abstract Service, 2540 Olentangy River Road, Columbus, OH 43202," or by visiting their web site at [www.cas.org](http://www.cas.org).
- (b) Clean Air Act as defined in this rule. Information and copies may be obtained by writing to: "Superintendent of Documents, Attn: New Orders, PO Box 371954, Pittsburgh, PA 15250-7954." The full text of the Act as amended in 1990 is also available in electronic format at [www.epa.gov/oar/caa/](http://www.epa.gov/oar/caa/). A copy of the Act is also available for inspection and copying at most public libraries and "The State Library of Ohio."
- (c) Code of Federal Regulations. Information and copies may be obtained by writing to: "Superintendent of Documents, Attn: New Orders, PO Box 371954, Pittsburgh, PA 15250-7954." The full text of the CFR is also available in electronic format at [www.access.gpo.gov/nara/cfr/](http://www.access.gpo.gov/nara/cfr/). The CFR compilations are also available for inspection and copying at most public libraries and "The State Library of Ohio."
- (d) North American industry classification system. Information and copies may be obtained by contacting the National Technical Information Service at 1-800-553-6847. The codes are also available in electronic format at [www.census.gov/epcd/www/naics.html](http://www.census.gov/epcd/www/naics.html).
- (e) National Fire Protection Association. Information on the National Fire Protection Association codes may be obtained by contacting the association at 1 Batterymarch Park, Quincy, Massachusetts 02169-7471, 617-770-3000. Codes may be ordered on line at [www.nfpa.org/catalog/home/index.asp](http://www.nfpa.org/catalog/home/index.asp). Copies of the code are available at most public libraries and "The State Library of Ohio."
- (f) Risk Management Plan Offsite Consequence Analysis Guidance. The guidance may be obtained by contacting the U.S. EPA hotline at 1-800-424-9346. The full documentation may be obtained in electronic format at <http://yosemite.epa.gov/oswer/ceppoweb.nsf/content/index.html>. The guidance may also be obtained and copied at most public libraries and "The State Library of Ohio."

- (g) United States Code. Information and copies may be obtained by writing to: "Superintendent of Documents, Attn: New Orders, PO Box 371954, Pittsburgh, PA 15250-7954." The full text of the United States Code is also available in electronic format at <http://www4.law.cornell.edu.uscode/>. The U.S.C. compilations are also available for inspection and copying at most public libraries and "The State Library of Ohio."

3745-104-02      **Threshold determination.**

Comment: For dates of non-regulatory government publications, publications of recognized organizations and associations, federal rules, and federal statutory provisions references in this rule, see paragraph 3745-104-01(C) of the Administrative Code titled "Incorporation by reference."

- (A) A threshold quantity of a regulated substance listed in rule 3745-104-04 of the Administrative Code is present at a stationary source if the total quantity of the regulated substance contained in a process exceeds the threshold.
- (B) For the purposes of determining whether more than a threshold quantity of a regulated substance is present at the stationary source, the following exemptions apply:
  - (1) Concentrations of a regulated toxic substance in a mixture. If a regulated substance is present in a mixture and the concentration of the regulated substance is below one per cent by weight of the mixture, the amount of the substance in the mixture need not be considered when determining whether more than a threshold quantity is present at the stationary source. Except for oleum, toluene, 2,4-diisocyanate, toluene 2,6-diisocyanate, and toluene diisocyanate (unspecified isomer), if the concentration of the regulated substance in the mixture is one per cent or greater by weight, but the owner or operator can demonstrate that the partial pressure of the regulated substance in the mixture (solution) under handling or storage conditions in any portion of the process is less than ten millimeters of mercury, the amount of the regulated substance in the mixture in that portion of the process need not be considered when determining whether more than a threshold quantity is present at the stationary source. The owner or operator shall document this partial pressure measurement or estimate.
  - (2) Concentrations of a regulated flammable substance in a mixture.
    - (a) If a regulated substance is present in a mixture and the concentration of the regulated substance is below one per cent by weight of the mixture, the mixture need not be considered when determining whether more than a threshold quantity of the regulated substance is present at the stationary source. Except as provided in paragraphs (B)(2)(b) and (B)(2)(c) of this rule, if the concentration of the regulated substance is one per cent or greater by weight of the mixture, then, for purposes of determining whether a threshold quantity is present at the stationary source, the entire weight of the mixture shall be treated as the regulated substance unless the owner or operator can demonstrate that the mixture itself does not have a national fire protection association flammability hazard rating of four. The demonstration shall be in accordance with the definition of flammability hazard rating four in the NFPA 704. The owner or operator shall document the national fire protection association flammability hazard rating.

- (b) Gasoline. Regulated substances in gasoline, when in distribution or related storage for use as fuel for internal combustion engines, need not be considered when determining whether more than a threshold quantity is present at a stationary source.
  - (c) Naturally occurring hydrocarbon mixtures. Prior to entry into a natural gas processing plant or a petroleum refining process unit, regulated substances in naturally occurring hydrocarbon mixtures need not be considered when determining whether more than a threshold quantity is present at a stationary source. Naturally occurring hydrocarbon mixtures include any combination of the following: condensate, crude oil, field gas, and produces water, each as defined in rule 3745-104-01 of the Administrative Code.
- (3) Articles. Regulated substances contained in articles need not be considered when determining whether more than a threshold quantity is present at the stationary source.
- (4) Uses. Regulated substances, when in use for the following purposes, need not be included in determining whether more than a threshold quantity is present at the stationary source:
- (a) Use as a structural component of the stationary source;
  - (b) Use of products for routine janitorial maintenance;
  - (c) Use of employees of foods, drugs, cosmetics, or other personal items containing the regulated substance; and
  - (d) Use of regulated substances present in process water or non-contact cooling water as drawn from the environment or municipal sources, or use of regulated substances present in air used either as compressed air or as part of combustion.
- (5) Activities in laboratories. If a regulated substance is manufactured, processed, or used in a laboratory at a stationary source under the supervision of a technically qualified individual, the quantity of the substance need not be considered in determining whether a threshold quantity is present. This exemption does not apply to:
- (a) Speciality chemical production;
  - (b) Manufacture, processing, or use of regulated substances in pilot plant scale operations; and
  - (c) Activities conducted outside the laboratory.

3745-104-03      **Exemptions.**

- (A) Agricultural nutrients. Ammonia used as an agricultural nutrient, when held by farmers, is exempt from all provisions of Chapter 3745-104 of the Administrative Code.
  
- (B) Flammable substances used as fuel or held for sale as fuel at retail facilities. A flammable substance listed in tables 3 and 4 of appendix A of rule 3745-104-04 of the Administrative Code are exempt from all provisions of Chapter 3745-104 of the Administrative Code when the substance is used as a fuel or held for sale as a fuel at a retail facility.

3745-104-04      **List of substances.**

Comment: For dates of non-regulatory government publications, publications of recognized organizations and associations, federal rules, and federal statutory provisions referenced in this rule, see paragraph 3745-104-01(C) of the Administrative Code titled "Incorporation by reference."

- (A) Regulated toxic and flammable substances under section 112(r) of the Clean Air Act are the substances listed in appendix A. Threshold quantities for listed toxic and flammable substances are specified in the tables.
- (B) The basis for placing toxic and flammable substances on the list of regulated substances are explained in the notes to the list.

## 3745-104-04 Appendix

TABLE 1 TO §68.130 - LIST OF REGULATED TOXIC SUBSTANCES AND THRESHOLD QUANTITIES FOR ACCIDENTAL RELEASE PREVENTION  
[ALPHABETICAL ORDER - 77 SUBSTANCES]

<u>Chemical Name</u>	<u>CAS No</u>	<u>Threshold Quantity (lbs)</u>	<u>Basis for Listing</u>
Acrolein [2-Propenal]	107-02-8	5,000	b
Acrylonitrile [2-Propenenitrile]	107-13-1	20,000	b
Acrylyl chloride [2-Propenoyl chloride]	814-68-6	5,000	b
Allyl alcohol [2-Propen-1-ol]	107-18-6	15,000	b
Allylamine [2-Propen-1-amine]	107-11-9	10,000	b
Ammonia (anhydrous)	7664-41-7	10,000	a, b
Ammonia (conc 20% or greater)	7664-41-7	20,000	a, b
Arsenous trichloride	7784-34-1	15,000	b
Arsine	7784-42-1	1,000	b
Boron trichloride [Borane, trichloro-]	10294-34-5	5,000	b
Boron trifluoride [Borane, trifluoro-]	7637-07-2	5,000	b
Boron trifluoride compound with methyl ether (1:1) [Boron, trifluoro[oxybis[metane]]-, T-4-	353-42-4	15,000	b
Bromine	7726-95-6	10,000	a, b
Carbon disulfide	75-15-0	20,000	b
Chlorine	7782-50-5	2,500	a, b
Chlorine dioxide [Chlorine oxide (ClO <sub>2</sub> )]	10049-04-4	1,000	c
Chloroform [Methane, trichloro-]	67-66-3	20,000	b
Chloromethyl ether [Methane, oxybis[chloro-]	542-88-1	1,000	b
Chloromethyl methyl ether [Methane, chloromethoxy-]	107-30-2	5,000	b
Crotonaldehyde [2-Butenal]	4170-30-3	20,000	b
Crotonaldehyde, (E)- [2-Butenal, (E)-]	123-73-9	20,000	b

<u>Chemical Name</u>	<u>CAS No</u>	<u>Threshold Quantity (lbs)</u>	<u>Basis for Listing</u>
Cyanogen chloride	506-77-4	10,000	c
Cyclohexylamine [Cyclohexanamine]	108-91-8	15,000	b
Diborane	19287-45-7	2,500	b
Dimethyldichlorosilane [Silane, dichlorodimethyl-]	75-78-5	5,000	b
1,1-Dimethylhydrazine [Hydrazine, 1,1-dimethyl-]	57-14-7	15,000	b
Epichlorohydrin [Oxirane, (chloromethyl)-]	106-89-8	20,000	b
Ethylenediamine [1,2-Ethanediamine]	107-15-3	20,000	b
Ethyleneimine [Aziridine]	151-56-4	10,000	b
Ethylene oxide [Oxirane]	75-21-8	10,000	a, b
Fluorine	7782-41-4	1,000	b
Formaldehyde (solution)	50-00-0	15,000	b
Furan	110-00-9	5,000	b
Hydrazine	302-01-2	15,000	b
Hydrochloric acid (conc 37% or greater)	7647-01-0	15,000	d
Hydrocyanic acid	74-90-8	2,500	a, b
Hydrogen chloride (anhydrous) [Hydrochloric acid]	7647-01-0	5,000	a
Hydrogen fluoride/Hydrofluoric acid (conc 50% or greater) [Hydrofluoric acid]	7664-39-3	1,000	a, b
Hydrogen selenide	7783-07-5	500	b
Hydrogen sulfide	7783-06-4	10,000	a, b
Iron, pentacarbonyl- [Iron carbonyl (Fe(CO) <sub>5</sub> ), (TB-5-11)-]	13463-40-6	2,500	b
Isobutyronitrile [Propanenitrile, 2-methyl-]	78-82-0	20,000	b
Isopropyl chloroformate [Carbonochloridic acid, 1-methylethyl ester]	108-23-6	15,000	b
Methacrylonitrile [2-Propenenitrile, 2-methyl-]	126-98-7	10,000	b
Methyl chloride [Methane, chloro-]	74-87-3	10,000	a
Methyl chloroformate [Carbonochloridic acid, methylester]	79-22-1	5,000	b
Methyl hydrazine [Hydrazine, methyl-]	60-34-4	15,000	b

<u>Chemical Name</u>	<u>CAS No</u>	<u>Threshold Quantity (lbs)</u>	<u>Basis for Listing</u>
Methyl isocyanate [Methane, isocyanato-]	624-83-9	10,000	a, b
Methyl mercaptan [Methanethiol]	74-93-1	10,000	b
Methyl thiocyanate [Thiocyanic acid, methyl ester]	556-64-9	20,000	b
Methyltrichlorosilane [Silane, trichloromethyl-]	75-79-6	5,000	b
Nickel carbonyl	13463-39-3	1,000	b
Nitric acid (conc 80% or greater)	7697-37-2	15,000	b
Nitric oxide [Nitrogen oxide (NO)]	10102-43-9	10,000	b
Oleum (Fuming Sulfuric acid) [Sulfuric acid, mixture with sulfur trioxide] <sup>1</sup>	8014-95-7	10,000	e
Peracetic acid [Ethaneperoxoic acid]	79-21-0	10,000	b
Perchloromethylmercaptan [Methanesulfonyl chloride, trichloro-]	594-42-3	10,000	b
Phosgene [Carbonic dichloride]	75-44-5	500	a, b
Phosphine	7803-51-2	5,000	b
Phosphorus oxychloride [Phosphoryl chloride]	10025-87-3	5,000	b
Phosphorus trichloride [Phosphorous trichloride]	7719-12-2	15,000	b
Piperidine	110-89-4	15,000	b
Propionitrile [Propanenitrile]	107-12-0	10,000	b
Propyl chloroformate [Carbonochloridic acid, propylester]	109-61-5	15,000	b
Propyleneimine [Aziridine, 2-methyl-]	75-55-8	10,000	b
Propylene oxide [Oxirane, methyl-]	75-56-9	10,000	b
Sulfur dioxide (anhydrous)	7446-09-5	5,000	a, b
Sulfur tetrafluoride [Sulfur fluoride (SF <sub>4</sub> ), (T-4)-]	7783-60-0	2,500	b
Sulfur trioxide	7446-11-9	10,000	a, b
Tetramethyllead [Plumbane, tetramethyl-]	75-74-1	10,000	b
Tetranitromethane [Methane, tetranitro-]	509-14-8	10,000	b
Titanium tetrachloride [Titanium chloride (TiCl <sub>4</sub> ) (T-4)-]	7550-45-0	2,500	b
Toluene 2,4-diisocyanate [Benzene, 2,4-diisocyanato-1-methyl-] <sup>1</sup>	584-84-9	10,000	a
Toluene 2,6-diisocyanate [Benzene, 1,3-diisocyanato-2-methyl-] <sup>1</sup>	91-08-7	10,000	a

<u>Chemical Name</u>	<u>CAS No</u>	<u>Threshold Quantity (lbs)</u>	<u>Basis for Listing</u>
Toluene diisocyanate (unspecified isomer) [Benzene, 1,3-diisocyanatomethyl-] <sup>1</sup>	26471-62-5	10,000	a
Trimethylchlorosilane [Silane, chlorotrimethyl-]	75-77-4	10,000	b
Vinyl acetate monomer [Acetic acid ethenyl ester]	108-05-4	15,000	b

<sup>1</sup>The mixture exemption in §68.115(b)(1) does not apply to the substance.

Basis for Listing:

<sup>a</sup>Mandated for listing by Congress.

<sup>b</sup>On EHS list, vapor pressure 10 mmHg or greater.

<sup>c</sup>Toxic gas.

<sup>d</sup>Toxicity of hydrogen chloride, potential to release hydrogen chloride, and history of accidents.

<sup>e</sup>Toxicity of sulfur trioxide and sulfuric acid, potential to release sulfur trioxide, and history of accidents.

TABLE 2 TO §68.130 - LIST OF REGULATED TOXIC SUBSTANCES AND THRESHOLD QUANTITIES FOR ACCIDENTAL RELEASE PREVENTION [CAS NUMBER ORDER - 77 SUBSTANCES]

<u>CAS No.</u>	<u>Chemical Name</u>	<u>Threshold Quantity (lbs)</u>	<u>Basis for Listing</u>
50-00-0	Formaldehyde (solution)	15,000	b
57-14-7	1,1-Dimethylhydrazine [Hydrazine, 1,1-dimethyl-]	15,000	b
60-34-4	Methyl hydrazine [Hydrazine, methyl-]	15,000	b
67-66-3	Chloroform [Methane, trichloro-]	20,000	b
74-87-3	Methyl chloride [Methane, chloro-]	10,000	a
74-90-8	Hydrocyanic acid	2,500	a, b
74-93-1	Methyl mercaptan [Methanethiol]	10,000	b
75-15-0	Carbon disulfide	20,000	b
75-21-8	Ethylene oxide [Oxirane]	10,000	a, b
75-44-5	Phosgene [Carbonic dichloride]	500	a, b
75-55-8	Propyleneimine [Aziridine, 2-methyl-]	10,000	b
75-56-9	Propylene oxide [Oxirane, methyl-]	10,000	b
75-74-1	Tetramethyllead [Plumbane, tetramethyl-]	10,000	b
75-77-4	Trimethylchlorosilane [Silane, chlorotrimethyl-]	10,000	b
75-78-5	Dimethyldichlorosilane [Silane, dichlorodimethyl-]	5,000	b
75-79-6	Methyltrichlorosilane [Silane, trichloromethyl-]	5,000	b
78-82-0	Isobutyronitrile [Propanenitrile, 2-methyl-]	20,000	b
79-21-0	Peracetic acid [Ethaneperoxoic acid]	10,000	b
79-22-1	Methyl chloroformate [Carbonochloridic acid, methylester]	5,000	b
91-08-7	Toluene 2,6-diisocyanate [Benzene, 1,3-diisocyanato-2-methyl-] <sup>1</sup>	10,000	a
106-89-8	Epichlorohydrin [Oxirane, (chloromethyl)-]	20,000	b
107-02-8	Acrolein [2-Propenal]	5,000	b
107-11-9	Allylamine [2-Propen-1-amine]	10,000	b
107-12-0	Propionitrile [Propanenitrile]	10,000	b
107-13-1	Acrylonitrile [2-Propenenitrile]	20,000	b

<u>CAS No.</u>	<u>Chemical Name</u>	<u>Threshold Quantity (lbs)</u>	<u>Basis for Listing</u>
107-15-3	Ethylenediamine [1,2-Ethanediamine]	20,000	b
107-18-6	Allyl alcohol [2-Propen-1-ol]	15,000	b
107-30-2	Chloromethyl methyl ether [Methane, chloromethoxy-]	5,000	b
108-05-4	Vinyl acetate monomer [Acetic acid ethenyl ester]	15,000	b
108-23-6	Isopropyl chloroformate [Carbonochloridic acid, 1-methylethyl ester]	15,000	b
108-91-8	Cyclohexylamine [Cyclohexanamine]	15,000	b
109-61-5	Propyl chloroformate [Carbonochloridic acid, propylester]	15,000	b
110-00-9	Furan	5,000	b
110-89-4	Piperidine	15,000	b
123-73-9	Crotonaldehyde, (E)- [2-Butenal, (E)-]	20,000	b
126-98-7	Methacrylonitrile [2-Propenenitrile, 2-methyl-]	10,000	b
151-56-4	Ethyleneimine [Aziridine]	10,000	b
302-01-2	Hydrazine	15,000	b

3745-104-05      **Applicability.**

Comment: For dates of non-regulatory government publications, publications of recognized organizations and associations, federal rules, and federal statutory provisions reference in this rule, see paragraph 3745-104-01(C) of the Administrative Code titled "Incorporation by reference."

- (A) An owner or operator of a stationary source that has more than a threshold quantity of a regulated substance in a process, as determined by rule 3745-104-02 of the Administrative Code, shall comply with the requirements of this rule no later than the latest of the following dates:
  - (1) June 21, 1999;
  - (2) Three years after the date on which a regulated substance is first listed under rule 3745-104-04 of the Administrative Code; or
  - (3) The date on which a regulated substance is first present at the facility above a threshold quantity in a process.
  
- (B) Program one eligibility requirements. A covered process is eligible for program one requirements as provided in paragraph (B) of rule 3745-104-06 of the Administrative Code if it meets all of the following requirements:
  - (1) For the five years prior to the submission of an RMP, the process has not had an accidental release of a regulated substance where exposure to the substance, its reaction products, overpressure generated by an explosion involving the substance, or radiant heat generated by a fire involving the substance led to any of the following offsite:
    - (a) Death;
    - (b) Injury; or
    - (c) Response or restoration activities for an exposure of an environmental receptor;
  - (2) The distance to a toxic or flammable endpoint for a worst-case release assessment conducted under rules 3745-104-08, 3745-104-09, and 3745-104-10 of the Administrative Code is less than the distance to any public receptor, as defined in paragraph 3745-104-01 (B)(33) of the Administrative Code; and
  - (3) Emergency response procedures have been coordinated between the stationary source and local emergency planning and response organizations.
  
- (C) Program two eligibility requirements. A covered process is subject to program two requirements if it does not meet the eligibility requirements of either paragraph (B)

or (D) of this rule. A program two process shall comply with rules 3745-104-17 to 3745-104-23 of the Administrative Code to meet the prevention program requirements.

(D) Program three eligibility requirements. A covered process is subject to program three if the process does not meet the requirements of paragraph (B) of this rule, and if either of the following conditions is met:

- (1) The process is in NAICS code 32211, 32411, 32511, 325181, 325188, 325192, 325199, 325211, 325311, or 32532; or
- (2) The process is subject to the OSHA Process Safety Management Standard, 29 CFR 1910.119 as adopted by reference in rule 4167-3-01 of the Administrative Code.

Processes classified as program three as defined by paragraphs (D)(1) and (D)(2) of this rule shall comply with rules 3745-104-24 to 3745-104-35 of the Administrative Code to meet the prevention program requirements.

(E) If at any time a covered process no longer meets the eligibility criteria of its program level, the owner or operator shall comply with the requirements of the new program level that applies to the process and update the RMP as provided in rule 3745-104-49 of the Administrative Code.

Effective: 07/01/2005

3745-104-06      **General requirements.**

- (A) General requirements. The owner or operator of a stationary source subject to this rule shall submit a single RMP, as provided in rules 3745-104-38 to 3745-104-48 of the Administrative Code. The RMP shall include a registration, as defined in rule 3745-104-42 of the Administrative Code, that reflects all covered processes.
- (B) Program one requirements. In addition to meeting the requirements of paragraph (A) of this rule, the owner or operator of a stationary source with a process eligible for program one, as provided in paragraph (B) of rule 3745-104-05 of the Administrative Code, shall:
- (1) Analyze the worst-case release scenario for the process(es), as provided in rule 3745-104-10 of the Administrative Code; document that the nearest public receptor is beyond the distance to a toxic or flammable endpoint defined in paragraph (A) of rule 3745-104-09 of the Administrative Code; and submit in the RMP the worst-case release scenario as provided in rule 3745-104-43 of the Administrative Code;
  - (2) Complete the five-year accident history for the process(es) as provided in rule 3745-104-16 of the Administrative Code and submit it in the RMP as provided in rule 3745-104-44 of the Administrative Code;
  - (3) Ensure that response actions have been coordinated with local emergency planning and response agencies; and
  - (4) Certify in the RMP the following: "Based on the criteria in rule 3745-104-05 of the Administrative Code, the distance to the specified endpoint for the worst-case accidental release scenario for the following process(es) is less than the distance to the nearest public receptor: [list process(es)]. Within the past five years, the process(es) has (have) had no accidental release that caused offsite impacts provided in the risk management program rule (paragraph (B)(1) of rule 3745-104-05 of the Administrative Code). No additional measures are necessary to prevent offsite impacts from accidental releases. In the event of fire, explosion, or a release of a regulated substance from the process(es), entry within the distance to the specified endpoints may pose a danger to public emergency responders. Therefore, public emergency responders should not enter this area except as arranged with the emergency contact indicated in the RMP. The undersigned certifies that, to the best of my knowledge, information, and belief, formed after reasonable inquiry, the information submitted is true, accurate, and complete. [Signature, title, date signed]."
- (C) Program two requirements. In addition to meeting the requirements of paragraph (A) of this rule, the owner or operator of a stationary source with a process subject to

program two, as provided in paragraph (C) of rule 3745-104-05 of the Administrative Code, shall:

- (1) Develop and implement a management system as provided in rule 3745-104-07 of the Administrative Code;
- (2) Conduct a hazard assessment as provided in rules 3745-104-08 to 3745-104-16 of the Administrative Code;
- (3) Implement the program two prevention steps provided in rules 3745-104-17 to 3745-104-23 of the Administrative Code or implement the program three prevention steps provided in rules 3745-104-24 to 3745-104-35 of the Administrative Code;
- (4) Develop and implement an emergency response program as provided in rules 3745-104-36 and 3745-104-37 of the Administrative Code; and
- (5) Submit as part of the RMP the data on prevention program elements for program two processes as provided in rule 3745-104-45 of the Administrative Code.

(D) Program three requirements. In addition to meeting the requirements of paragraph (A) of this rule, the owner or operator of a stationary source with a process subject to program three, as provided in paragraph (D) of rule 3745-104-05 of the Administrative Code shall:

- (1) Develop and implement a management system as provided in rule 3745-104-07 of the Administrative Code;
- (2) Conduct a hazard assessment as provided in rules 3745-104-08 to 3745-104-16 of the Administrative Code;
- (3) Implement the prevention requirements of rules 3745-104-24 to 3745-104-35 of the Administrative Code;
- (4) Develop and implement an emergency response program as provided in rules 3745-104-36 and 3745-104-37 of the Administrative Code; and
- (5) Submit as part of the RMP the data on prevention program elements for program three processes as provided in rule 3745-104-46 of the Administrative Code.

3745-104-07      **Management.**

- (A) The owner or operator of a stationary source with processes subject to program two or program three shall develop a management system to oversee the implementation of the risk management program elements.
- (B) The owner or operator shall assign a qualified person or position that has the overall responsibility for the development, implementation, and integration of the risk management program elements.
- (C) When responsibility for implementing individual requirements of this part is assigned to persons other than the person identified under paragraph (B) of this rule, the names or positions of these people shall be documented and the lines of authority defined through an organization chart or similar document.

3745-104-08      **Hazard assessment: applicability.**

The owner or operator of a stationary source subject to Chapter 3745-104 of the Administrative Code shall prepare a worst-case release scenario analysis as provided in rule 3745-104-10 of the Administrative Code and complete the five-year accident history as provided in rule 3745-104-16 of the Administrative Code. The owner or operator of a program two and three process must comply with all requirements of Chapter 3745-104 of the Administrative Code that are applicable to the process program level.

Comment: For dates of non-regulatory government publications, publications of recognized organizations and associations, federal rules, and federal statutory provisions reference in this rule, see paragraph 3745-104-01(C) of the Administrative Code titled "Incorporation by reference."

- (A) Endpoints. For analyses of offsite consequences, the following endpoints shall be used:
- (1) Toxics. The toxic endpoints provided in appendix B of this rule.
  - (2) Flammables. The endpoints for flammables vary according to the scenarios studied:
    - (a) Explosion. An overpressure of one PSI.
    - (b) Radiant heat/exposure time. A radiant heat of five kw/m<sup>2</sup> for forty seconds.
    - (c) Lower flammability limit. A lower flammability limit as provided in NFPA documents or other generally recognized sources.
- (B) Wind speed/atmospheric stability class. For the worst-case release analysis, the owner or operator shall use a wind speed of 1.5 meters per second and F atmospheric stability class. If the owner or operator can demonstrate that local meteorological data applicable to the stationary source show a higher minimum wind speed or less stable atmosphere at all times during the previous three years, these minimums may be used. For analysis of alternative scenarios, the owner or operator may use the typical meteorological conditions for the stationary source.
- (C) Ambient temperature/humidity. For worst-case release analysis of a regulated toxic substance, the owner or operator shall use the highest daily maximum temperature in the previous three years and average humidity for the site, based on temperature/humidity data gathered at the stationary source or at a local meteorological station; an owner or operator using the "RMP Offsite Consequence Analysis Guidance" may use twenty-five°C and fifty per cent humidity as values for these variables. For analysis of alternative scenarios, the owner or operator may use typical temperature/humidity data gathered at the stationary source or at a local meteorological station.
- (D) Height of release. The worst-case release of a regulated toxic substance shall be analyzed assuming a ground level (zero feet) release. For an alternative scenario analysis of a regulated toxic substance, release height may be determined by the release scenario.

- (E) The owner or operator shall use either urban or rural topography as applicable as defined in 40 CFR Part 51, appendix W: "Guideline on Air Quality Modeling, section 8.2.8 Urban/Rural Classification."
- (F) Dense or neutrally buoyant gases. The owner or operator shall ensure that tables or models used for dispersion analysis of regulated toxic substances account for gas density.
- (G) Temperature of released substance. For worst case, liquids other than gases liquified by refrigeration only shall be considered to be released at the highest daily maximum temperature, based on data for the previous three years appropriate for the stationary source, or at process temperature, whichever is higher. For alternative scenarios, substances may be considered to be released at a process or ambient temperature that is appropriate for the scenario.

3745-104-10      **Hazard assessment: worst-case release scenario analysis.**

Comment: For dates of non-regulatory government publications, publications of recognized organizations and associations, federal rules, and federal statutory provisions referenced in this rule, see paragraph 3745-104-01(C) of the Administrative Code titled "Incorporation by reference."

(A) The owner or operator shall analyze and report in the RMP:

- (1) For program one processes, one worst-case release scenario for each program one process;
- (2) For program two and three processes:
  - (a) One worst-case release scenario that is estimated to create the greatest distance in any direction to an endpoint provided in appendix B of rule 3745-104-09 of the Administrative Code resulting from an accidental release of regulated toxic substances from covered processes under worst-case conditions defined in rule 3745-104-09 of the Administrative Code;
  - (b) One worst-case release scenario that is estimated to create the greatest distance in any direction to an endpoint defined in paragraph (A) of rule 3745-104-09 of the Administrative Code resulting from an accidental release of regulated flammable substances from covered processes under worst-case conditions defined in rule 3745-104-09 of the Administrative Code; and
  - (c) Additional worst-case release scenarios shall be reported if a worst-case release from another covered process(es) at the stationary source potentially affects public receptors different from those potentially affected by the worst-case release scenario developed under paragraph (A)(2)(a) or (A)(2)(b) of this rule.

(B) Determination of worst-case release quantity. The worst-case release quantity shall be the greater of the following:

- (1) For substances in a vessel, the greatest amount held at any time in a single vessel, taking into account administrative controls that limit the maximum quantity; or
- (2) For substances in pipes, the greatest amount at any time in a pipe, taking into account administrative controls that limit the maximum quantity.

(C) Worst-case release scenario: toxic gases.

- (1) For regulated toxic substances that are normally gases at ambient temperature and handled as either a gas or handled as a liquid under pressure, the owner or operator shall assume that the quantity in the vessel or pipe, as determined under paragraph (B) of this rule, is released as a gas over ten minutes. The release rate shall be assumed to be the total quantity divided by ten unless passive mitigation systems are in place at the covered process.
- (2) For gases handled as refrigerated liquids at ambient pressure:
  - (a) If the released substance is not contained by passive mitigation systems or if the release is contained and the contained pool would have a depth of one cm or less, the owner or operator shall assume that the substance is released as a gas in ten minutes;
  - (b) If the released substance is contained by passive mitigation systems in a pool with a depth greater than one cm, the owner or operator may assume that the quantity in the vessel or pipe, as determined under paragraph (B) of this rule, is spilled instantaneously to form a liquid pool. The release rate shall be calculated at the boiling point of the substance and at the conditions specified in paragraph (D) of this rule.

(D) Worst-case release scenario: toxic liquids.

- (1) For regulated toxic substances that are normally liquids at ambient temperature, the owner or operator shall assume that the quantity in the vessel or pipe, as determined under paragraph (B) of this rule, is spilled instantaneously to form a liquid pool.
  - (a) The surface area of the pool shall be determined by assuming that the liquid spreads to one centimeter deep unless passive mitigation systems are in place at the covered process that serve to contain the spill and limit the surface area. Where passive mitigation is in place, the surface area of the contained liquid shall be used to calculate the volatilization rate.
  - (b) If the release would occur onto a surface that is not paved or smooth, the owner or operator may take into account the actual surface characteristics.
- (2) The volatilization rate shall account for the highest daily maximum temperature occurring in the past three years, the temperature of the substance in the vessel, and the concentration of the substance if the liquid spilled is a mixture or solution.
- (3) The rate of release to air shall be determined from the volatilization rate of the liquid pool. The owner or operator may use the methodology in the "RMP Offsite Consequence Analysis Guidance" or any other publicly available techniques that account for the modeling conditions and are recognized by

industry as applicable as part of current practices. Proprietary models that account for the modeling conditions may be used provided the owner or operator allows the director or the director's representative access to the model and describes model features and differences from publicly available models to local emergency planners upon request.

- (E) Worst-case release scenario: flammable gases. The owner or operator shall assume that the quantity of the substance, as determined under paragraph (B) of this rule and the provisions below, vaporizes resulting in a vapor cloud explosion. A yield factor of ten percent of the available energy released in the explosion shall be used to determine the distance to the explosion endpoint if the model used is based on TNT equivalent methods.
- (1) For regulated flammable substances that are normally gases at ambient temperature and handled as a gas or as a liquid under pressure, the owner or operator shall assume that the quantity in the vessel or pipe, as determined under paragraph (B) of this rule, is released as a gas over ten minutes. The total quantity shall be assumed to be involved in the vapor cloud explosion.
- (2) For flammable gases handled as refrigerated liquids at ambient pressure:
- (a) If the released substance is not contained by passive mitigation systems or if the contained pool would have a depth of one centimeter or less, the owner or operator shall assume that the total quantity of the substance is released as a gas in ten minutes, and the total quantity will be involved in the vapor cloud explosion.
- (b) If the released substance is contained by passive mitigation systems in a pool with a depth greater than one centimeter, the owner or operator may assume that the quantity in the vessel or pipe, as determined under paragraph (B) of this rule, is spilled instantaneously to form a liquid pool. The volatilization rate (release rate) shall be calculated at the boiling point of the substance and at the conditions specified in paragraph (D) of this rule. The owner or operator shall assume that the quantity which becomes vapor in the first ten minutes is involved in the vapor cloud explosion.
- (F) Worst-case release scenario: flammable liquids. The owner or operator shall assume that the quantity of the substance, as determined under paragraph (B) of this rule and the provisions below, vaporizes resulting in a vapor cloud explosion. A yield factor of ten percent of the available energy released in the explosion shall be used to determine the distance to the explosion endpoint if the model used is based on TNT equivalent methods.
- (1) For regulated flammable substances that are normally liquids at ambient temperature, the owner or operator shall assume that the entire quantity in the vessel or pipe, as determined under paragraph (B) of this rule, is spilled

instantaneously to form a liquid pool. For liquids at temperatures below their atmospheric boiling point, the volatilization rate shall be calculated at the conditions specified in paragraph (D) of this rule.

- (2) The owner or operator shall assume that the quantity which becomes vapor in the first ten minutes is involved in the vapor cloud explosion.
- (G) Parameters to be applied for all covered processes. The owner or operator shall use the parameters defined in rule 3745-104-09 of the Administrative Code to determine distance to the endpoints. The owner or operator may use the methodology provided in the "RMP Offsite Consequence Analysis Guidance" or any commercially or publicly available air dispersion modeling techniques, provided the techniques account for the modeling conditions and are recognized by industry as applicable as part of current practices. Proprietary models that account for the modeling conditions may be used provided the owner or operator allows the director or the director's representative access to the model and describes model features and differences from publicly available models to local emergency planners upon request.
- (H) Consideration of passive mitigation. Passive mitigation systems may be considered for the analysis of worst case provided that the mitigation system can withstand the release event triggering the scenario and would still function as intended.
- (I) Factors in selecting a worst-case scenario. The owner or operator shall select as the worst case for flammable regulated substances or the worst case for regulated toxic substances, a scenario that would result in a greater distance to an endpoint, as defined in paragraph (A) of rule 3745-104-09 of the Administrative Code, beyond the stationary source boundary. These scenarios shall be based on the following:
- (1) Determination of worst-case release quantity as defined in paragraphs (B)(1) and (B)(2) of this rule;
  - (2) Smaller quantities handled at higher process temperature or pressure; and
  - (3) Proximity to the boundary of the stationary source.

3745-104-11      **Hazard assessment: alternative release scenario analysis.**

Comment: For dates of non-regulatory government publications, publications of recognized organizations and associations, federal rules, and federal statutory provisions referenced in this rule, see paragraph 3745-104-01(C) of the Administrative Code titled "Incorporation by reference."

- (A) The number of scenarios. The owner or operator of a stationary source with processes subject to program two or program three shall identify and analyze at least one alternative release scenario for each regulated toxic substance held in a covered process (ES) and shall identify and analyze at least one alternative release scenario to represent all flammable substances held in covered processes.
- (B) Scenarios to consider.
  - (1) For each scenario required under paragraph (A) of this rule, the owner or operator shall select a scenario:
    - (a) That is more likely to occur than the worst-case release scenario under rule 3745-104-10 of the Administrative Code; and
    - (b) That will reach an endpoint offsite, unless no such scenario exists.
  - (2) Release scenarios considered may include, but are not limited to, the following, where applicable:
    - (a) Transfer hose releases due to splits or sudden hose uncoupling;
    - (b) Process piping releases from failures at flanges, joints, welds, valves and valve seals, and drains or bleeds;
    - (c) Process vessel or pump releases due to cracks, seal failure, or drain, bleed, or plug failure;
    - (d) Vessel overfilling and spill, or overpressurization and venting through relief valves or rupture disks; and
    - (e) Shipping container mishandling and breakage or puncturing leading to a spill.
- (C) Parameters to be applied. The owner or operator shall use the appropriate parameters defined in rule 3745-104-09 of the Administrative Code to determine distance to the endpoints. The owner or operator may use either the methodology provided in the "RMP Offsite Consequence Analysis Guidance" or any commercially or publicly available air dispersion modeling techniques, provided the techniques account for the

specified modeling conditions and are recognized by industry as applicable as part of current practices. Proprietary models that account for the modeling conditions may be used provided the owner or operator allows the director or the director's representative access to the model and describes model features and differences from publicly available models to local emergency planners upon request.

- (D) Consideration of mitigation. Active and passive mitigation systems may be considered provided they can withstand the event that triggered the release and would still be functional.
- (E) Factors in selecting scenarios. The owner or operator shall consider the following in selecting alternative release scenarios:
  - (1) The five-year accident history provided in rule 3745-104-16 of the Administrative Code; and
  - (2) Failure scenarios identified under rule 3745-104-18 or 3745-104-25 of the Administrative Code.

**Hazard assessment: defining offsite impacts - population.**

- (A) The owner or operator shall estimate in the RMP the population within a circle with its center at the point of the release and a radius determined by the distance to the endpoint defined in paragraph (A) of rule 3745-104-09 of the Administrative Code.
- (B) Population to be defined. Population shall include residential population. The presence of institutions (schools, hospitals, prisons), parks and recreational areas, and major commercial, office, and industrial buildings shall be noted in the RMP.
- (C) Data sources acceptable. The owner or operator shall use the most recent census data, or other updated information, to estimate the population potentially affected.
- (D) Level of accuracy. Population shall be estimated to two significant digits.

Rule Amplifies: 3753  
Prior Effective Dates: 8/13/99

The owner or operator shall maintain the following records on the offsite consequence analyses:

- (A) For worst-case scenarios, a description of the vessel or pipeline and substance selected as worst case, assumptions and parameters used, and the rationale for selection; assumptions shall include use of any administrative controls and any passive mitigation that were assumed to limit the quantity that could be released. Documentation shall include the anticipated effect of the controls and mitigation on the release quantity and rate.
- (B) For alternative release scenarios, a description of the scenarios identified, assumptions and parameters used, and the rationale for the selection of specific scenarios; assumptions shall include use of any administrative controls and any mitigation that were assumed to limit the quantity that could be released. Documentation shall include the effect of the controls and mitigation on the release quantity and rate.
- (C) Documentation of estimated quantity released, release rate, and duration of release.
- (D) Methodology used to determine distance to endpoints.
- (E) Data used to estimate population and environmental receptors potentially affected.

3745-104-16      **Hazard assessment: five-year accident history.**

Comment: For dates of non-regulatory government publications, publications of recognized organizations and associations, federal rules, and federal statutory provisions referenced in this rule, see paragraph 3745-104-01(C) of the Administrative Code titled "Incorporation by reference."

- (A) The owner or operator shall include in the five-year accident history all accidental releases from covered processes that resulted in deaths, injuries, or significant property damage on site, or known offsite deaths, injuries, evacuations, sheltering in place, property damage, or environmental damage.
- (B) Data required. For each accidental release included in the five year accident history, the owner or operator shall report the following information:
  - (1) Date, time, and approximate duration of the release;
  - (2) Chemical(s) released;
  - (3) Estimated quantity released in pounds and, for mixtures containing regulated toxic substances, percentage concentration by weight of the released regulated toxic substance in the liquid mixture;
  - (4) Five- or six-digit NAICS code that most closely corresponds to the process;
  - (5) The type of release event and its source;
  - (6) Weather conditions, if known;
  - (7) On-site impacts;
  - (8) Known offsite impacts;
  - (9) Initiating event and contributing factors if known;
  - (10) Whether offsite responders were notified if known; and
  - (11) Operational or process changes that resulted from investigation of the release and that have been made by the time this information is submitted in accordance with rule 3745-104-44 of the Administrative Code.
- (C) Level of accuracy. Numerical estimates may be provided to two significant digits.

**Program two prevention program: safety information.**

Comment: For dates of non-regulatory government publications, publications of recognized organizations and associations, federal rules, and federal statutory provisions referenced in this rule, see paragraph 3745-104-01(C) of the Administrative Code titled "Incorporation by reference."

- (A) The owner or operator shall compile and maintain the following up-to-date safety information related to the regulated substances, processes, and equipment:
- (1) Material safety data sheets that meet the requirements of 29 CFR 1910.1200(g);
  - (2) Maximum intended inventory of equipment in which the regulated substances are stored or processed;
  - (3) Safe upper and lower temperatures, pressures, flows, and compositions;
  - (4) Equipment specifications; and
  - (5) Codes and standards used to design, build, and operate the process.
- (B) The owner or operator shall ensure that the process is designed in compliance with recognized and generally accepted good engineering practices. Compliance with federal or state regulations that address industry-specific safe design or with industry-specific design codes and standards may be used to demonstrate compliance with this paragraph.
- (C) The owner or operator shall update the safety information if a major change occurs that makes the information inaccurate.

Effective: 07/01/2005

**Program two prevention program: hazard review.**

- (A) The owner or operator shall conduct a review of the hazards associated with the regulated substances, process, and procedures. The review shall identify the following:
- (1) The hazards associated with the process and regulated substances;
  - (2) Opportunities for equipment malfunctions or human errors that could cause an accidental release;
  - (3) The safeguards used or needed to control the hazards or prevent equipment malfunction or human error; and
  - (4) Any steps used or needed to detect or monitor releases.
- (B) The owner or operator may use checklists developed by persons or organizations knowledgeable about the process and equipment as a guide to conducting the review. For processes designed to meet industry standards or federal or state design rules, the hazard review shall, by inspecting all equipment, determine whether the process is designed, fabricated, and operated in accordance with the applicable standards or rules.
- (C) The owner or operator shall document the results of the review and ensure that problems identified are resolved in a timely manner.
- (D) The review shall be updated at least once every five years. The owner or operator shall also conduct reviews whenever a major change in the process occurs; all issues identified in the review shall be resolved before startup of the changed process.

**Program two prevention program: operating procedures.**

- (A) The owner or operator shall prepare written operating procedures that provide clear instructions or steps for safely conducting activities associated with each covered process consistent with the safety information for that process. Operating procedures or instructions provided by equipment manufacturers or developed by persons or organizations knowledgeable about the process and equipment may be used as a basis for a stationary source's operating procedures.
- (B) The procedures shall address the following:
- (1) Initial startup;
  - (2) Normal operations;
  - (3) Temporary operations;
  - (4) Emergency shutdown and operations;
  - (5) Normal shutdown;
  - (6) Startup following a normal or emergency shutdown or a major change that requires a hazard review;
  - (7) Consequences of deviations and steps required to correct or avoid deviations; and
  - (8) Equipment inspections.
- (C) The owner or operator shall ensure that the operating procedures are updated, if necessary, whenever a major change occurs and prior to startup of the changed process.

**Program two prevention program: training.**

- (A) The owner or operator shall ensure that each employee presently operating a process, and each employee newly assigned to a covered process have been trained or tested competent in the operating procedures provided in rule 3745-104-19 of the Administrative Code that pertain to their duties. For those employees already operating a process on June 21, 1999, the owner or operator may certify in writing that the employee has the required knowledge, skills, and abilities to safely carry out the duties and responsibilities as provided in the operating procedures.
- (B) Refresher training. Refresher training shall be provided at least every three years, and more often if necessary, to each employee operating a process to ensure that the employee understands and adheres to the current operating procedures of the process. The owner or operator, in consultation with the employees operating the process, shall determine the appropriate frequency of refresher training.
- (C) The owner or operator may use training conducted under federal or state regulations or under industry-specific standards or codes or training conducted by covered process equipment vendors to demonstrate compliance with this rule to the extent that the training meets the requirements of this section.
- (D) The owner or operator shall ensure that operators are trained in any updated or new procedures prior to startup of a process after a major change.

**Program two prevention program: maintenance.**

- (A) The owner or operator shall prepare and implement procedures to maintain the on-going mechanical integrity of the process equipment. The owner or operator may use procedures or instructions provided by covered process equipment vendors or procedures in federal or state regulations or industry codes as the basis for stationary source maintenance procedures.
- (B) The owner or operator shall train or cause to be trained each employee involved in maintaining the on-going mechanical integrity of the process. To ensure that the employee can perform the job tasks in a safe manner, each such employee shall be trained in the hazards of the process, in how to avoid or correct unsafe conditions, and in the procedures applicable to the employee's job tasks.
- (C) Any maintenance contractor shall ensure that each contract maintenance employee is trained to perform the maintenance procedures developed under paragraph (A) of this rule.
- (D) The owner or operator shall perform or cause to be performed inspections and tests on process equipment. Inspection and testing procedures shall follow recognized and generally accepted good engineering practices. The frequency of inspections and tests of process equipment shall be consistent with applicable manufacturers' recommendations, industry standards or codes, good engineering practices, and prior operating experience.

**Program two prevention program: compliance audits.**

- (A) The owner or operator shall certify that they have evaluated compliance with the provisions of rules 3745-104-17 to 3745-104-23 of the Administrative Code at least every three years to verify that the procedures and practices developed under chapter 3745-104 of the Administrative Code are adequate and are being followed.
- (B) The compliance audit shall be conducted by at least one person knowledgeable in the process.
- (C) The owner or operator shall develop a report of the audit findings.
- (D) The owner or operator shall promptly determine and document an appropriate response to each of the findings of the compliance audit and document that deficiencies have been corrected.
- (E) The owner or operator shall retain the two most recent compliance audit reports. This requirement does not apply to any compliance audit report that is more than five years old.

**Program two prevention program: incident investigation.**

- (A) The owner or operator shall investigate each incident which resulted in, or could reasonably have resulted in a catastrophic release.
- (B) An incident investigation shall be initiated as promptly as possible, but not later than forty-eight hours following the incident.
- (C) A summary shall be prepared at the conclusion of the investigation which includes at a minimum:
  - (1) Date of incident;
  - (2) Date investigation began;
  - (3) A description of the incident;
  - (4) The factors that contributed to the incident; and,
  - (5) Any recommendations resulting from the investigation.
- (D) The owner or operator shall promptly address and resolve the investigation findings and recommendations. Resolutions and corrective actions shall be documented.
- (E) The findings shall be reviewed with all affected personnel whose job tasks are affected by the findings.
- (F) Investigation summaries shall be retained for five years.

Comment: For dates of non-regulatory government publications, publications of recognized organizations and associations, federal rules, and federal statutory provisions referenced in this rule, see paragraph 3745-104-01(C) of the Administrative Code titled "Incorporation by reference."

- (A) In accordance with the schedule set forth in rule 3745-104-25 of the Administrative Code, the owner or operator shall complete a compilation of written process safety information before conducting any process hazard analysis required by rule 3745-104-25 of the Administrative Code. The compilation of written process safety information is to enable the owner or operator and the employees involved in operating the process to identify and understand the hazards posed by those processes involving regulated substances. This process safety information shall include information pertaining to the hazards of the regulated substances used or produced by the process, information pertaining to the technology of the process, and information pertaining to the equipment in the process.
- (B) Information pertaining to the hazards of the regulated substances in the process. This information shall consist of at least the following:
- (1) Toxicity information;
  - (2) Permissible exposure limits;
  - (3) Physical data;
  - (4) Reactivity data;
  - (5) Corrosivity data;
  - (6) Thermal and chemical stability data; and
  - (7) Hazardous effects of inadvertent mixing of different materials that could foreseeably occur. Note: Material safety data sheets meeting the requirements of 29 CFR 1910.1200(g) may be used to comply with this requirement to the extent they contain the information required by paragraph (B) of this rule.
- (C) Information pertaining to the technology of the process.
- (1) Information concerning the technology of the process shall include at least the following:
    - (a) Block flow diagram or simplified process flow diagram;

- (b) Process chemistry;
  - (c) Maximum intended inventory;
  - (d) Safe upper and lower limits for such items as temperatures, pressures, flows or compositions; and,
  - (e) An evaluation of the consequences of deviations.
- (2) Where the original technical information no longer exists, such information may be developed in conjunction with the process hazard analysis in sufficient detail to support the analysis.
- (D) Information pertaining to the equipment in the process.
- (1) Information pertaining to the equipment in the process shall include:
- (a) Materials of construction;
  - (b) Piping and instrument diagrams (P&ID's);
  - (c) Electrical classification;
  - (d) Relief system design and design basis;
  - (e) Ventilation system design;
  - (f) Design codes and standards employed;
  - (g) Material and energy balances for processes built after June 21, 1999; and
  - (h) Safety systems (e.g. interlocks, detection or suppression systems).
- (2) The owner or operator shall document that equipment complies with recognized and generally accepted good engineering practices.
- (3) For existing equipment designed and constructed in accordance with codes, standards, or practices that are no longer in general use, the owner or operator shall determine and document that the equipment is designed, maintained, inspected, tested, and operating in a safe manner.

Comment: For dates of non-regulatory government publications, publications of recognized organizations and associations, federal rules, and federal statutory provisions referenced in this rule, see paragraph 3745-104-01(C) of the Administrative Code titled "Incorporation by reference."

- (A) The owner or operator shall perform an initial process hazard analysis (hazard evaluation) on processes covered by Chapter 3745-104 of the Administrative Code. The process hazard analysis shall be appropriate to the complexity of the process and shall identify, evaluate, and control the hazards involved in the process. The owner or operator shall determine and document the priority order for conducting process hazard analyses based on a rationale which includes such considerations as extent of the process hazards, number of potentially affected employees, age of the process, and operating history of the process. The process hazard analysis shall be conducted as soon as possible, but not later than June 21, 1999. Process hazards analyses completed to comply with 29 CFR 1910.119(e) are acceptable to meet requirements of this paragraph as initial process hazards analyses. These process hazard analyses shall be updated and revalidated, based on their completion date.
- (B) The owner or operator shall use one or more of the following methodologies that are appropriate to determine and evaluate the hazards of the process being analyzed.
- (1) What - if;
  - (2) Checklist;
  - (3) What - if/checklist;
  - (4) Hazard and operability study (HAZOP);
  - (5) Failure mode and effects analysis (FMEA);
  - (6) Fault tree analysis; or
  - (7) An appropriate equivalent methodology.
- (C) The process hazard analysis shall address:
- (1) The hazards of the process;
  - (2) The identification of any previous incident which had a likely potential for catastrophic consequences.

- (3) Engineering and administrative controls applicable to the hazards and their interrelationships such as appropriate application of detection methodologies to provide early warning of releases. Acceptable detection methods include process monitoring and control instrumentation with alarms, and detection hardware such as hydrocarbon sensors;
  - (4) Consequences of failure of engineering and administrative controls;
  - (5) Stationary source siting;
  - (6) Human factors; and
  - (7) A qualitative evaluation of a range of the possible safety and health effects of failure of controls.
- (D) The process hazard analysis shall be performed by a team with expertise in engineering and process operations, and the team shall include at least one employee who has experience and knowledge specific to the process being evaluated. Also, one member of the team must be knowledgeable in the specific process hazard analysis methodology being used.
- (E) The owner or operator shall establish a system to promptly address the team's findings and recommendations; assure that the recommendations are resolved in a timely manner and that the resolution is documented; document what actions are to be taken; complete actions as soon as possible; develop a written schedule of when these actions are to be completed; communicate the actions to operating, maintenance and other employees whose work assignments are in the process and who may be affected by the recommendations or actions.
- (F) At least every five years after the completion of the initial process hazard analysis, the process hazard analysis shall be updated and revalidated by a team meeting the requirements in paragraph (D) of this rule, to assure that the process hazard analysis is consistent with the current process. Updated and revalidated process hazard analyses completed to comply with 29 CFR 1910.119(e) are acceptable to meet the requirements of this paragraph.
- (G) The owner or operator shall retain process hazards analyses and updates or revalidations for each process covered by this section, as well as the documented resolution of recommendations described in paragraph (E) of this rule for the life of the process.

**Program three prevention program: operating procedures.**

(A) The owner or operator shall develop and implement written operating procedures that provide clear instructions for safely conducting activities involved in each covered process consistent with the process safety information referenced in rule 3745-104-24 of the Administrative Code and shall address at least the following elements.

(1) Steps for each operating phase:

- (a) Initial startup;
- (b) Normal operations;
- (c) Temporary operations;
- (d) Emergency shutdown including the conditions under which emergency shutdown is required, and the assignment of shutdown responsibility to qualified operators to ensure that emergency shutdown is executed in a safe and timely manner.
- (e) Emergency operations;
- (f) Normal shutdown; and,
- (g) Startup following a turnaround, or after an emergency shutdown.

(2) Operating limits:

- (a) Consequences of deviation; and
- (b) Steps required to correct or avoid deviation.

(3) Safety and health considerations:

- (a) Properties of, and hazards presented by, the chemicals used in the process;
- (b) Precautions necessary to prevent exposure to any person, public receptor or environmental receptor, including engineering controls, administrative controls, and personal protective equipment;
- (c) Control measures to be taken if physical contact or airborne exposure occurs;
- (d) Quality control for raw materials and control of hazardous chemical inventory levels; and,

- (e) Any special or unique hazards of the process or regulated substance.
- (4) Safety systems and their functions.
- (B) Operating procedures shall be readily accessible to employees who work in or maintain a process.
  - (C) The operating procedures shall reflect current operating practice, including changes that result from changes in process chemicals, technology, and equipment, and changes to stationary sources. The owner or operator shall certify annually that these operating procedures are current and accurate.
  - (D) The owner or operator shall develop and implement safe work practices to provide for the control of hazards during operations and for the control over entrance into a stationary source by maintenance, contractor, laboratory, or other support personnel. These safe work practices shall apply to employees and contractor employees.

**(A) Initial training.**

- (1) Each employee presently involved in operating a process, and each employee before being involved in operating a newly assigned process, shall be trained in an overview of the process and in the operating procedures as specified in rule 3745-104-26 of the Administrative Code. The training shall include but not be limited to emphasis on the specific safety and health hazards, emergency operations including shutdown, and safe work practices applicable to the employee's job tasks.
- (2) In lieu of initial training for those employees already involved in operating a process on June 21, 1999 an owner or operator may certify in writing that the employee has the required knowledge, skills, and abilities to safely carry out the duties and responsibilities as specified in the operating procedures.

**(B) Refresher training.** Refresher training shall be provided at least every three years, and more often if necessary, to each employee involved in operating a process to assure that the employee understands and adheres to the current operating procedures of the process.**(C) Training documentation.** The owner or operator shall ascertain that each employee involved in operating a process has received and understood the training required by this rule. The owner or operator shall prepare a record which contains the identity of the employee, the date of training, and the means used to verify that the employee understood the training.

- (A) Application. Paragraphs (B) to (F) of this rule apply to the following process equipment:
- (1) Pressure vessels and storage tanks;
  - (2) Piping systems (including piping components such as valves);
  - (3) Relief and vent systems and devices;
  - (4) Emergency shutdown systems;
  - (5) Controls (including monitoring devices and sensors, alarms, and interlocks) and,
  - (6) Pumps.
- (B) Written procedures. The owner or operator shall establish and implement written procedures to maintain the on-going integrity of process equipment.
- (C) Training for process maintenance activities. The owner or operator shall train each employee involved in maintaining the on-going integrity of process equipment in an overview of that process and its hazards and in the procedures applicable to the employee's job tasks to assure that the employee can perform the job tasks in a safe manner.
- (D) Inspection and testing.
- (1) Inspections and tests shall be performed on process equipment.
  - (2) Inspection and testing procedures shall follow recognized and generally accepted good engineering practices.
  - (3) The frequency of inspections and tests of process equipment shall be consistent with applicable manufacturers' recommendations and good engineering practices, and more frequently if determined to be necessary by prior operating experience.
  - (4) The owner or operator shall document each inspection and test that has been performed on process equipment. The documentation shall identify the date of the inspection or test, the name of the person who performed the inspection or test, the serial number or other identifier of the equipment on which the inspection or test was performed, a description of the inspection or test performed, and the results of the inspection or test.

(E) Equipment deficiencies. The owner or operator shall correct deficiencies in equipment that are outside acceptable limits (defined by the process safety information in rule 3745-104-24 of the Administrative Code) before further use or in a safe and timely manner when necessary means are taken to assure safe operation.

(F) Quality assurance.

- (1) In the construction of new plants and equipment, the owner or operator shall assure that equipment as it is fabricated is suitable for the process application for which it will be used.
- (2) Appropriate checks and inspections shall be performed to assure that equipment is installed properly and consistent with design specifications and the manufacturer's instructions.
- (3) The owner or operator shall assure that maintenance materials, spare parts and equipment are suitable for the process application for which they will be used.

**Program three prevention program: management of change.**

- (A) The owner or operator shall establish and implement written procedures to manage changes, except for "replacements in kind", to process chemicals, technology, equipment, and procedures; and, changes to stationary sources that affect a covered process.
- (B) The procedures shall include all of the following:
  - (1) The technical basis for the proposed change;
  - (2) Impact of change on safety and health;
  - (3) Modifications to operating procedures;
  - (4) Necessary time period for the change; and,
  - (5) Authorization requirements for the proposed change.
- (C) Employees, maintenance and contract employees whose job tasks will be affected by a change in the process shall be informed of, and trained in, the change prior to start-up of the process or affected part of the process.
- (D) If a change covered by this paragraph results in a change in the process safety information required by rule 3745-104-24 of the Administrative Code, such information shall be updated accordingly.
- (E) If a change covered by this paragraph results in a change in the operating procedures or practices required by rule 3745-104-26 of the Administrative Code, such procedures or practices shall be updated accordingly.

**Program three prevention program: pre-startup review.**

- (A) The owner or operator shall perform a pre-startup safety review for new stationary sources and for modified stationary sources when the modification of the covered process is significant enough to require a change in the process safety information.
- (B) The pre-startup safety review shall confirm that prior to the introduction of regulated substances to a process:
  - (1) Construction and equipment is in accordance with design specifications;
  - (2) Safety, operating, maintenance, and emergency procedures are in place and are adequate;
  - (3) For new stationary sources, a process hazard analysis has been performed and recommendations have been resolved or implemented before startup; and modified stationary sources meet the requirements contained in management of change, rule 3745-104-29 of the Administrative Code.
  - (4) Training of each employee involved in operating a process has been completed.

3745-104-31      **Program three prevention program: compliance audits.**

- (A) The owner or operator shall certify that he or she has evaluated compliance with the provisions of rules 3745-104-24 to 3745-104-35 of the Administrative Code at least every three years to verify that the procedures and practices are adequate and are being followed.
- (B) The compliance audit shall be conducted by at least one person knowledgeable in the process.
- (C) A report of the findings of the audit shall be developed.
- (D) The owner or operator shall promptly determine and document an appropriate response to each of the findings of the compliance audit, and document that deficiencies have been corrected.
- (E) The owner or operator shall retain the two most recent compliance audit reports.

**Program three prevention program: incident investigation.**

- (A) The owner or operator shall investigate each incident that resulted in, or could reasonably have resulted in a catastrophic release of a regulated substance.
- (B) An incident investigation shall be initiated as promptly as possible, but not later than forty-eight hours following the incident.
- (C) An incident investigation team shall be established and consist of at least one person knowledgeable of the process involved, including a contract employee if the incident involved work of the contractor, and other persons with appropriate knowledge and experience of the process involved to thoroughly investigate and analyze the incident.
- (D) A report shall be prepared at the conclusion of the investigation. The report shall include at a minimum:
  - (1) Date of incident;
  - (2) Date investigation began;
  - (3) A description of the incident;
  - (4) The factors that contributed to the incident; and,
  - (5) Any recommendations resulting from the investigation.
- (E) The owner or operator shall establish a system to promptly address and resolve the incident report findings and recommendations. Resolutions and corrective actions shall be documented.
- (F) The report shall be reviewed with all affected personnel whose job tasks are relevant to the incident findings, including contract employees where applicable.
- (G) Incident investigation reports shall be retained for five years.

**Program three prevention program: hot work permit.**

Comment: For dates of non-regulatory government publications, publications of recognized organizations and associations, federal rules, and federal statutory provisions referenced in this rule, see paragraph 3745-104-01(C) of the Administrative Code titled "Incorporation by reference."

- (A) The owner or operator shall issue a hot work permit to be kept on file at the facility before hot work operations are conducted on or near a covered process.
- (B) The permit shall document that the fire prevention and protection requirements in 29 CFR 1910.252(a) have been implemented prior to beginning the hot work operations; it shall indicate the date(s) authorized for hot work; and identify the object on which hot work is to be performed. The permit shall be kept on file at the facility until completion of the hot work operations.

**Program three prevention program: contractors.**

(A) Application. This rule applies to contractors performing maintenance or repair, turnaround, major renovation, or specialty work on or adjacent to a covered process. It does not apply to contractors providing incidental services that do not influence process safety, such as janitorial work, food and drink services, laundry, delivery or other supply services.

(B) Owner or operator responsibilities.

- (1) The owner or operator, prior to selecting a contractor, shall obtain and evaluate information regarding the contractor's safety performance and programs.
- (2) The owner or operator shall inform the contractor of the known potential fire, explosion, or toxic release hazards related to the contractor's work and the process.
- (3) The owner or operator shall explain to the contractor the applicable provisions of rules 3745-104-36 and 3745-104-37 of the Administrative Code.
- (4) The owner or operator shall develop and implement safe work practices consistent with paragraph (D) of rule 3745-104-26 of the Administrative Code, to control the entrance, presence, and exit of the contractor and contract employees in covered process areas.
- (5) The owner or operator shall periodically evaluate the performance of the contractor in fulfilling his or her obligations as specified in paragraph (C) of this rule.

(C) Contractor responsibilities.

- (1) The contractor shall assure that each contract employee is trained in the work practices necessary to safely perform his or her job.
- (2) The contractor shall assure that each contract employee is instructed in the known potential fire, explosion, or toxic release hazards related to his or her job and the process, and the applicable provisions of the emergency action plan.
- (3) The contractor shall document that each contract employee has received and understood the training required by this section. The contractor shall prepare a record that contains the identity of the contract employee, the date of training, and the means used to verify that the employee understood the training.

- (4) The contractor shall assure that each contract employee follows the safety rules of the stationary source including the safe work practices required by paragraph (D) of rule 3745-104-26 of the Administrative Code.
- (5) The contractor shall advise the owner or operator of any unique hazards presented by the contractor's work, or of any hazards found by the contractor's work.

3745-104-36      **Emergency response: applicability.**

Comment: For dates of non-regulatory government publications, publications of recognized organizations and associations, federal rules, and federal statutory provisions referenced in this rule, see paragraph 3745-104-01(C) of the Administrative Code titled "Incorporation by reference."

- (A) Except as provided in paragraph (B) of this rule, the owner or operator of a stationary source with program two and program three processes shall comply with the requirements of rule 3745-104-37 of the Administrative Code.
- (B) The owner or operator of a stationary source with program two and program three processes whose employees will not respond to accidental releases of regulated substances need not comply with rule 3745-104-37 of the Administrative Code provided that they meet all of the following:
  - (1) For stationary sources with any regulated toxic substance held in a process above the threshold quantity, the stationary source is included in the community emergency response plan developed under 42 U.S.C. 11003;
  - (2) For stationary sources with only regulated flammable substances held in a process above the threshold quantity, the owner or operator has coordinated response actions with the local fire department; and
  - (3) Appropriate mechanisms are in place to notify emergency responders when there is a need for a response.

3745-104-37      **Emergency response program.**

- (A) The owner or operator shall develop and implement an emergency response program for the purpose of protecting public health and the environment. Such program shall include the following elements:
- (1) An emergency response plan, which shall be maintained at the stationary source and contain at least the following elements:
    - (a) Procedures for informing the public and local emergency response agencies about accidental releases;
    - (b) Documentation of proper first-aid and emergency medical treatment necessary to treat accidental human exposures; and
    - (c) Procedures and measures for emergency response after an accidental release of a regulated substance;
  - (2) Procedures for the use of emergency response equipment and for its inspection, testing, and maintenance;
  - (3) Training for all employees in relevant procedures; and
  - (4) Procedures to review and update, as appropriate, the emergency response plan to reflect changes at the stationary source and ensure that employees are informed of changes.
- (B) A written plan that complies with other federal contingency plan regulations or is consistent with the approach in the national response team's "Integrated Contingency Plan Guidance" ("One Plan") and that, among other matters, includes the elements provided in paragraph (A) of this rule, shall satisfy the requirements of this section if the owner or operator also complies with paragraph (C) of this rule.
- (C) The emergency response plan developed under paragraph (A)(1) of this rule shall be coordinated with the community emergency response plan developed under section 3750.05 of the Revised Code or rules adopted thereunder. Upon request of the local emergency planning committee or emergency response officials, the owner or operator shall promptly provide to the local emergency response officials information necessary for developing and implementing the community emergency response plan.

3745-104-38      **Risk management plan: submission.**

Comment: For dates of non-regulatory government publications, publications of recognized organizations and associations, federal rules, and federal statutory provisions referenced in this rule, see paragraph 3745-104-10(C) of the Administrative Code titled "Incorporation by reference."

- (A) The owner or operator shall submit a single RMP that includes the information required by rules 3745-104-41 to 3745-104-48 of the Administrative Code for all covered processes. The RMP shall be submitted in a method and format to a central point as specified by U.S. EPA as of the date of submission.
- (B) The owner or operator shall submit the first RMP no later than the latest of the following:
  - (1) June 21, 1999;
  - (2) Three years after the date on which a regulated substance is first listed under 40 CFR part 68, which is incorporated into rule 3745-104-04 of the Administrative Code; or
  - (3) The date on which a regulated substance is first present above a threshold quantity in a process.

A copy of the initial RMP shall also be submitted to the Ohio environmental protection agency.

- (C) The owner or operator for which an RMP was submitted before June 21, 2004, shall revise the RMP to include the information required by paragraph (B)(6) of rule 3745-104-42(B)(6) and paragraph (B)(14) of rule 3745-104-42 of the Administrative Code by June 21, 2004 in the manner specified by U.S. EPA prior to that date. Any such submission shall also include the information required by paragraph (B)(20) of rule 3745-104-42 of the Administrative Code (indicating that the submission is a correction to include the information required by paragraph (B)(6) of rule 3745-104-42 and paragraph (B)(14) of rule 3745-104-42 of the Administrative Code or an update under rule 3745-104-49 of the Administrative Code).
- (D) Subsequent submissions of RMPs shall be in accordance with rule 3745-104-49 of the Administrative Code. A copy of subsequent submissions shall also be submitted to the Ohio environmental protection agency in accordance with rule 3745-104-49 of the Administrative Code.
- (E) Nothing in these rules is intended to enlarge or diminish any rights the owner or operator may have to make a claim to U.S.EPA for confidential business information for any such information contained in the RMP that is submitted to U.S.EPA.

However, to secure confidential treatment of information in the RMP which is submitted to Ohio EPA, the owner or operator must seek protection of the information as a trade secret exclusively in the manner set forth in rules 3745-104-39 and 3745-104-40 of the Administrative Code.

- (F) Procedures for asserting that information submitted in the RMP is entitled to protection as trade secret information are set forth in rules 3745-104-39 and 3745-104-40 of the Administrative Code.

Effective: 07/01/2005

Rule Amplifies: 3753

Prior Effective Dates: 8/13/1999, 3/09/01

- (A) Except as provided in paragraph (B) of this rule, an owner or operator of a stationary source required to report or otherwise provide information under this chapter may make a claim for trade secret protection for any such information. Such information shall be designated trade secret only after the director, pursuant to rule 3745-49-03 of the Administrative Code, determines that the information meets the definition of trade secret as defined by section 1333.61 of the Revised Code, as amended.
- (B) Notwithstanding the provisions of rule 3745-49-03 of the Administrative Code, an owner or operator may not claim as a trade secret the following information:
- (1) Registration required by paragraphs 3745-104-41(B)(1) to (B)(6), 3745-104-41(B)(8) and (B)(10) to (B)(13) of the Administrative Code and NAICS code and program level of the process set forth in rule 3745-104-(B)(7) of the Administrative Code.
  - (2) Offsite consequence analysis data required by paragraphs 3745-104-43(B)(4), 3745-104-43(B)(9), 3745-104-43(B)(10), 3745-104-43(B)(11), and 3745-104-43(B)(12) of the Administrative Code;
  - (3) Accident history data required by rule 3745-104-44 of the Administrative Code;
  - (4) Prevention program data required by paragraphs 3745-104-45(B), 3745-104-45(D), 3745-104-45(E)(1) and (F) to (K) of the Administrative Code;
  - (5) Prevention program data required by paragraphs 3745-104-46(B), 3745-104-46(D), 3745-104-46(E)(1) and (F) to (P) of the Administrative Code; and
  - (6) Emergency response program data required by rule 3745-104-47 of the Administrative Code.
- (C) Notwithstanding the procedures specified in rule 3745-49-03, and subject to all other requirements of this rule, an owner or operator asserting a claim for trade secret protection with respect to information contained in its RMP shall submit to Ohio EPA, at the time it submits the RMP, the following:
- (1) The information claimed as trade secret, provided in a format to be specified by Ohio EPA;
  - (2) A sanitized (redacted) copy of the RMP, with the notation "trade secret" substituted for the information claimed as trade secret, except that a generic category or class name shall be substituted for any chemical name or identity claimed confidential; and

- (3) The document or documents substantiating each claims of trade secret information as described in rule 3745-104-40 of the Administrative Code.

3745-104-40      **Substantiating trade secret information.**

- (A) An owner or operator claiming that information is trade secret information must substantiate that claim by providing documentation that demonstrates that the claim meets the criteria set forth in section 1333.61 of the Revised Code, as amended.
- (B) Information that is submitted as part of the substantiation may be claimed trade secret by marking it as trade secret. Information not so marked will be treated as public and may be disclosed without notice to the owner or operator. If information that is submitted as part of the substantiation is claimed as trade secret, the owner or operator must provide a sanitized and unsanitized version of the substantiation.
- (C) The owner, operator, or senior official with management responsibility of the stationary source shall sign a certification that the signer has personally examined the information submitted and that based on inquiry of the persons who compiled the information, the information is true, accurate, and complete, and that those portions of the substantiation claimed as trade secret would, if disclosed, reveal trade secrets.

**3745-104-42 Risk management plan: registration.**

Comment: For dates of non-regulatory government publications, publications of recognized organizations and associations, federal rules, and federal statutory provisions referenced in this rule, see paragraph 3745-104-01(C) of the Administrative Code titled "Incorporation by reference."

- (A) The owner or operator shall complete a single registration form as required by U.S. environmental protection agency and include it in the RMP. The form shall cover all regulated substances handled in covered processes.
- (B) The registration form shall include the following data:
- (1) Stationary source name, street, city, county, state, zip code, latitude, and longitude, method for obtaining latitude and longitude, and description of location that latitude and longitude represent;
  - (2) The stationary source Dun and Bradstreet number;
  - (3) Name and Dun and Bradstreet number of all corporate parents;
  - (4) The name, telephone number, and mailing address of the owner or operator;
  - (5) The name and title of the person or position with overall responsibility for RMP elements and implementation, and (optional) the e-mail address for that person or position;
  - (6) The name, title, telephone number, and twenty-four hour telephone number, and, as of June 21, 2004, the e-mail address (if an e-mail address exists) of the emergency contact;
  - (7) For each covered process, the name and CAS number of each regulated substance held above the threshold quantity in the process, the maximum quantity of each regulated substance or mixture in the process (in pounds) to two significant digits, the five- or six-digit NAICS code that most closely corresponds to the process, and the program level of the process;
  - (8) The stationary source U.S. EPA identifier;
  - (9) The number of full-time employees at the stationary source;
  - (10) Whether the stationary source is subject to U.S. occupational safety and health agency's process safety management (29 CFR 1910.119) as adopted by reference in rule 4167-3-01 of the Administrative Code;

- (11) Whether the stationary source is subject to 40 CFR part 355 or section 3750.05 of the Revised Code and rules adopted thereunder;
- (12) Whether the stationary source has a CAA Title V operating permit; and
- (13) The date of the last safety inspection of the stationary source by a federal, state, or local government agency and the identity of the inspecting entity;
- (14) As of June 21, 2004, the name, the mailing address, and the telephone number of the contractor who prepared the RMP (if any);
- (15) Source or parent company e-mail address (optional);
- (16) Source homepage address (optional);
- (17) Phone number at the source for public inquiries (optional);
- (18) Local emergency planning committee (optional);
- (19) OSHA voluntary protection program status (optional); and.
- (20) As of June 21, 2004, the type and the reason for any changes being made to a previously submitted RMP; the types of changes to the RMP are categorized as follows:
  - (a) Updates and re-submissions required under paragraph (B) of rule 3745-104-49 of the Administrative Code;
  - (b) Corrections under paragraph (D) of rule 3745-104-49 of the Administrative Code or for purposes of correcting minor clerical errors, updating administrative information, providing missing data elements or reflecting facility ownership changes, and which do not require an update and re-submission as specified in paragraph (B) of rule 3745-104-49 of the Administrative Code;
  - (c) De-registrations required under paragraph (C) of rule 3745-104-49 of the Administrative Code; and
  - (d) Withdrawals of an RMP for any facility that was erroneously considered subject to Chapter 3745-104 of the Administrative Code.

(A) The owner or operator shall submit in the RMP the following information:

- (1) One worst-case release scenario for each program one process; and
- (2) For program two and three processes, one worst-case release scenario to represent all regulated toxic substances held above the threshold quantity and one worst-case release scenario to represent all regulated flammable substances held above the threshold quantity. If additional worst-case scenarios for toxics or flammables are required by paragraph (A)(2)(c) of rule 3745-104-10 of the Administrative Code, the owner or operator shall submit the same information on the additional scenario(s). The owner or operator of program two and three processes shall also submit information on one alternative release scenario for each regulated toxic substance held above the threshold quantity and one alternative release scenario to represent all regulated flammable substances held above the threshold quantity.

(B) For each worst case release scenario and/or alternative release scenario required by paragraph (A) of this rule, the owner or operator shall submit the following data:

- (1) Chemical name of the regulated substance;
- (2) Percentage weight of the chemical in a liquid mixture (toxics only);
- (3) Physical state of the regulated substance (toxics only);
- (4) Basis of results (give model name if used);
- (5) Scenario (explosion, fire, toxic gas release, or liquid spill and vaporization);
- (6) Quantity released in pounds;
- (7) Release rate;
- (8) Release duration;
- (9) Wind speed and atmospheric stability class (toxics only);
- (10) Topography (toxics only);
- (11) Distance to endpoint;
- (12) Public and environmental receptors within the distance;

(13) Passive mitigation considered; and

(14) Active mitigation considered (alternative releases only).

**Risk management plan: prevention program/program three.**

- (A) For each program three process, the owner or operator shall provide the information indicated in paragraphs (A)(1) to (A)(15) of this rule. If the same information applies to more than one covered process, the owner or operator may provide the information only once, but shall indicate to which processes the information applies.
- (1) The five- or six-digit NAICS code that most closely corresponds to the process.
  - (2) The name(s) of the substance(s) covered.
  - (3) The date on which the safety information was last reviewed or revised.
  - (4) The date of completion of the most recent process hazard analysis as defined in rule 3745-104-25 of the Administrative Code or update and the technique used.
    - (a) The expected date of completion of any changes resulting from the process hazard analysis as defined in rule 3745-104-25 of the Administrative Code;
    - (b) Major hazards identified;
    - (c) Process controls in use;
    - (d) Mitigation systems in use;
    - (e) Monitoring and detection systems in use; and
    - (f) Changes since the last process hazard analysis as defined in rule 3745-104-25 of the Administrative Code.
  - (5) The date of the most recent review or revision of operating procedures.
  - (6) The date of the most recent review or revision of training programs;
    - (a) The type of training provided - classroom, classroom plus on the job, on the job; and
    - (b) The type of competency testing used.
  - (7) The date of the most recent review or revision of maintenance procedures and the date of the most recent equipment inspection or test and the equipment inspected or tested.

- (8) The date of the most recent change that triggered management of change procedures and the date of the most recent review or revision of management of change procedures.
- (9) The date of the most recent pre-startup review.
- (10) The date of the most recent compliance audit and the expected date of completion of any changes resulting from the compliance audit;
- (11) The date of the most recent incident investigation and the expected date of completion of any changes resulting from the investigation;
- (12) The date of the most recent review or revision of employee participation plans;
- (13) The date of the most recent review or revision of hot work permit procedures;
- (14) The date of the most recent review or revision of contractor safety procedures;  
and
- (15) The date of the most recent evaluation of contractor safety performance.

**Risk management plan: emergency response program.**

(A) The owner or operator shall provide in the RMP the following information:

- (1) Do you have a written emergency response plan?
- (2) Does the plan include specific actions to be taken in response to an accidental release of a regulated substance?
- (3) Does the plan include procedures for informing the public and local agencies responsible for responding to accidental releases?
- (4) Does the plan include information on emergency health care?
- (5) The date of the most recent review or update of the emergency response plan;
- (6) The date of the most recent emergency response training for employees.

(B) The owner or operator shall provide the name and telephone number of the local agency with which emergency response activities and the emergency response plan is coordinated.

(C) The owner or operator shall list in the RMP other federal or state emergency plan requirements to which the stationary source is subject.

Comment: For dates of non-regulatory government publications, publications of recognized organizations and associations, federal rules, and federal statutory provisions referenced in this rule, see paragraph 3745-104-01(C) of the Administrative Code titled "Incorporation by reference."

- (A) The owner or operator shall review and update the RMP as specified in paragraph (B) of this rule and submit it in a method and format to a central point specified by U.S.EPA as of the date of submission.
- (B) The owner or operator shall revise and update the RMP submitted under rule 3745-104-38 of the Administrative Code as follows:
  - (1) Within five consecutive years of its initial submission or each most recent update required by paragraphs (B)(2) to (B)(7) of this rule, whichever is later, and every five consecutive years thereafter. For purposes of determining the date of initial submissions, RMPs submitted before June 21, 1999 are considered to have been submitted on that date
  - (2) No later than three years after a newly regulated substance is first listed in 40 CFR part 68 by U.S.EPA;
  - (3) No later than the date on which a new regulated substance is first present in an already covered process above a threshold quantity;
  - (4) No later than the date on which a regulated substance is first present above a threshold quantity in a new process;
  - (5) Within six months of a change that requires a revised PHA or hazard review;
  - (6) Within six months of a change that requires a revised offsite consequence analysis as provided in rule 3745-104-14 of the Administrative Code; and
  - (7) Within six months of a change that changes the applicability level of the process as defined in rule 3745-104-05 of the Administrative Code.
- (C) Within six months of the date a stationary source is no longer subject to this rule, the owner or operator shall submit a de-registration to U.S. EPA indicating that the stationary source is no longer covered.
- (D) The owner or operator shall correct the RMP as follows:
  - (1) New accident history information. For any accidental release meeting the five-year accident history reporting criteria of rule 3745-104-16 of the

Administrative Code and occurring after April 9, 2004, the owner or operator shall submit the data required under rule 3745-104-44, paragraph (A)(9) of rule 3745-104-45 and paragraph (A)(11) of rule 3745-104-46 of the Administrative Code with respect to that accident within six months of the release or by the time the RMP is updated under paragraph (B) of this rule.

- (2) Emergency contact information. Beginning June 21, 2004, within one month of any change in the emergency contact information required under paragraph (B)(6) of rule 3745-104-42, the owner or operator shall submit a correction of that information.

Comment: For dates of non-regulatory government publications, publications of recognized organizations and associations, federal rules, and federal statutory provisions referenced in this rule, see paragraph 3745-104-01(C) of the Administrative Code titled "Incorporation by reference."

- (A) These requirements apply to any stationary source subject to rule 3745-104 of the Administrative Code and Chapter 3745-77 of the Administrative Code or 40 CFR part 71. The Title V or 40 CFR part 71 permit for the stationary source shall contain:
  - (1) A statement listing rule 3745-104 of the Administrative Code as an applicable requirement;
  - (2) Conditions that require the source owner or operator to submit:
    - (a) A compliance schedule for meeting the requirements of this part by the date provided in rule 3745-104-05 of the Administrative Code or;
    - (b) As part of the compliance certification submitted under paragraph (C)(10)(e) of rule 3745-77-03 of the Administrative Code, a certification statement that the source is in compliance with all requirements of this chapter, including the registration and submission of the RMP.
- (B) The owner or operator shall submit any additional relevant information requested by the Ohio environmental protection agency.
- (C) For Title V or 40 CFR part 71 permits that are issued prior to the deadline for registering and submitting the RMP and that do not contain permit conditions described in paragraph (A) of this rule, the owner or operator or the director shall initiate permit revision or reopening according to the procedures of rule 3745-77-08 of the Administrative Code or 40 CFR 71.7 to incorporate the terms and conditions consistent with paragraph (A) of this rule.

- (A) Except as provided in paragraph (D) of this rule, an owner or operator who is required to submit a risk management plan under Chapter 3745-104 of the Administrative Code shall pay annually to the Ohio environmental protection agency a fee of fifty dollars together with any of the following applicable fees:
- (1) A fee of sixty-five dollars if a covered process in the stationary source includes propane and propane is the only regulated substance at the stationary source over the threshold quantity;
  - (2) A fee of sixty-five dollars if a covered process in the stationary source includes anhydrous ammonia that is sold for use as an agricultural nutrient and is on-site over the threshold quantity;
  - (3) A fee of two hundred dollars for each regulated substance over the threshold quantity in a covered process. Propane shall be considered a regulated substance subject to the fee levied under this paragraph if it is not the only regulated substance over the threshold quantity. Anhydrous ammonia shall be considered a regulated substance subject to the fee levied under this paragraph. if it is not sold for use as an agricultural nutrient.
- (B) The fees assessed under this rule for the year 1999 shall be collected no later than January 3, 2000. Each year thereafter, the fees shall be collected no later than the first day of September of each subsequent year. The fees assessed for a stationary source shall be based upon the regulated substances present over the threshold quantity identified in the risk management plan on file as of the twenty-first day of June for calendar year 1999 and for each subsequent calendar year as of the first day of September.
- (C) An owner or operator who is required to submit a risk management plan under this chapter and who fails to submit such a plan within thirty days after the applicable filing date prescribed in paragraph (B) of this rule shall submit with the risk management plan a late filing fee of three per cent of the total fees due under paragraph (A) of this rule.
- (D) This rule does not apply to the owner or operator of a business that employs one hundred or fewer individuals and is a small business concern as defined in the "Small Business Act," 15 U.S.C. 632, .

## **Chapter 3745-105: Pathological Waste Incinerators**

*Contact:* Dana Thompson 614-644-3701  
Dana.Thompson@EPA.State.Oh.US

3745-105-01      **Applicability, definitions, and reference to materials.**

[Comment: For dates of non-regulatory government publications, publications of recognized organizations and associations, federal rules, and federal statutory provisions referenced in this rule, see the last paragraph of this rule titled "Reference to materials."]

(A) Except as otherwise provided in paragraph (B) of this rule, the definitions in rule 3745-15-01 of the Administrative Code shall apply to this chapter.

(B) For the purpose of Chapter 3745-105 of the Administrative Code:

- (1) "Batch incinerator" means an incinerator which is loaded and undergoes a cycle of combustion, ash burndown, cooling-off, and ash removal, prior to being loaded again.
- (2) "Continuous duty incinerator" means an incinerator of either a multiple chamber or controlled-air design into which waste can be charged at periodic intervals and from which ash can be removed at periodic intervals, without an ash burndown and cooling-off cycle.
- (3) "Continuous temperature recorder" means a device, which uses a temperature sensor such as a thermocouple, that is part of an instrument which continuously monitors and records the temperature at a specific location in an air pollution source.
- (4) "Infectious agent" means a type of microorganism, helminth or virus that causes, or significantly contributes to the cause of, increased morbidity or mortality of human beings.
- (5) "Intermittent feed incinerator" means an incinerator of either a multiple chamber or controlled-air design into which waste can be charged at periodic intervals and from which ash is removed after a burndown and cooling-off cycle.
- (6) "Off-site facility" means a pathological waste incinerator that burns any pathological waste from a generator that is located off-site from the location of the pathological waste incinerator.
- (7) "Pathological waste" means waste material consisting of only human or animal remains, anatomical parts, and/or tissue, the bags/containers used to collect and transport the waste material, and animal bedding if applicable.
- (8) "Pathological waste incinerator" means any device used to provide the combustion of pathological waste.
- (9) "Retention time" means the average time for gases to pass through a chamber. The retention time of the secondary chamber of an incinerator shall be calculated using the volume of the secondary chamber divided by the actual

volumetric flow rate emitted from the secondary chamber at maximum operating temperature and burning rate.

(10) "USEPA" means United States environmental protection agency.

(C) This chapter applies to the owner or operator of any pathological waste incinerator except the following:

(1) Crematories that only combust human remains and coffins.

(2) Veterinary clinics and animal shelters that only burn carcasses and bedding of animals not intentionally exposed to infectious agents during research, production of biological material, or testing of pharmaceutical products, unless the improper disposal of those materials would present a substantial threat to public health.

(3) Licensed solid waste disposal facilities and municipal solid waste disposal facilities that burn pathological wastes that have been rendered non-infectious in accordance with rule 3745-27-32 of the Administrative Code.

(4) Any incinerator which meets the applicability requirements under 40 CFR 60.32e or 40 CFR 60.50c, guidelines or standards for hospital/medical/infectious incinerators, and is not operating under an exemption from those requirements granted under 40 CFR, 60.32e(b) through (h) or 40 CFR, 60.50c(b) through (h).

(D) Reference to materials. This chapter includes references to certain matter or materials. The text of the referenced material is not included in the rules contained in this chapter. Information on the availability of the referenced materials as well as the date of, and/or the particular edition or version of the material is included in this rule. For materials subject to change, only the specific versions specified in this rule are referenced. Material is referenced as it exists on the effective date of this rule. Except for subsequent annual publication of existing (unmodified) Code of Federal Regulation compilations, any amendment or revision to a referenced document is not applicable unless and until this rule has been amended to specify the new dates.

(1) Availability. The referenced materials are available as follows:

(a) Code of Federal Regulations (CFR). Information and copies may be obtained by writing to: "Superintendent of Documents, Attn: New Orders, PO Box 371954, Pittsburgh, PA 15250-7954." The full text of the CFR is also available in electronic format at [www.access.gpo.gov/nara/cfr](http://www.access.gpo.gov/nara/cfr). The CFR compilations are also available for inspection and copying at most public libraries and "The State Library of Ohio."

(2) Referenced materials.

(a) 40 CFR, Part 60; "Standards of Performance for New Stationary Sources;" as published in the July 1, 2008 Code of Federal Regulations.

- (b) 40 CFR Part 60, Appendix B; "Performance specifications;" as published in the July 1, 2008 Code of Federal Regulations.
- (c) 40 CFR 60.7; "Notification and record keeping;" as published in the July 1, 2008 Code of Federal Regulations.
- (d) 40 CFR 60.13; "Monitoring requirements;" as published in the July 1, 2008 Code of Federal Regulations.
- (e) 40 CFR 60.32e; "Designated facilities;" as published in the July 1, 2008 Code of Federal regulations.
- (f) 40 CFR 60.50c; "Applicability and delegation of authority;" as published in the July 1, 2008 Code of Federal Regulations..
- (g) USEPA method 9; "Visual Determination of the Opacity of Emissions from Stationary Sources;" as contained in 40 CFR Part 60, Appendix A; as published in the July 1, 2008 Code of Federal Regulations.

3745-105-02      **Emission limits.**

[Comment: For dates of non-regulatory government publications, publications of recognized organizations and associations, federal rules, and federal statutory provisions referenced in this rule, see the last paragraph of rule 3745-105-01 of the Administrative Code titled "Reference to materials."]

- (A) Particulate emissions shall not exceed 0.20 pound of particulates per one hundred pounds of waste charged for any pathological waste incinerator with a capacity less than one hundred pounds of waste per hour.
- (B) Particulate emissions shall not exceed 0.10 pound of particulates per one hundred pounds of waste charged for any pathological waste incinerator with a capacity equal to or greater than one hundred pounds of waste per hour but less than one thousand eight hundred pounds of waste per hour.
- (C) Particulate emissions shall not exceed 0.06 pounds of particulate per one hundred pounds of waste charged for any pathological waste incinerator with a capacity equal to or greater than one thousand eight hundred pounds of waste per hour.
- (D) Carbon monoxide emissions from any pathological waste incinerator shall not exceed one hundred parts per million, by volume, on a dry basis, adjusted to seven per cent oxygen in the exhaust stream as an hourly average.
- (E) Visible particulate emissions from any pathological waste incinerator shall not exceed five per cent opacity except for six minutes in any continuous sixty minute period during which opacity shall not exceed ten per cent. Opacity shall be determined by USEPA method 9.

Effective: 08/24/2009

Prior Effective Dates: 3/23/04

**Design parameters and operating restrictions.**

- (A) All incineration of pathological waste shall occur in a controlled air multi-chamber incinerator, or equivalent technology as approved by the director, which provides complete combustion of waste, excluding metallic items, to carbonized or mineralized ash. Any ash that does not meet the criteria shall be reincinerated.
- (B) The primary combustion chamber for batch units and intermittent feed units shall be maintained so that the exit gas temperature is a minimum of one thousand two hundred degrees Fahrenheit. The secondary combustion chamber of any unit shall operate so that the temperature of the gas exiting the secondary combustion chamber is a minimum of one thousand six hundred degrees Fahrenheit.
- (C) The primary combustion chamber for continuous-duty units shall be maintained so that the exit gas temperature is a minimum of one thousand four hundred degrees Fahrenheit.
- (D) The secondary combustion chamber of any pathological waste incinerator constructed on or before January 1, 1991 shall provide a minimum one-second retention time at one thousand six hundred degrees Fahrenheit except for any unit that has a longer retention time specified in an Ohio EPA permit-to-install or permit-to-install and operate. The secondary combustion chamber of any pathological waste incinerator constructed after January 1, 1991 shall provide a minimum two-second retention time at one thousand six hundred degrees Fahrenheit.
- (E) All pathological waste incinerators with a capacity greater than four hundred pounds per hour shall be equipped with an automatic feeder which is designed and operated so that wastes cannot be charged if the exit gas temperature of the gas exiting the secondary combustion chamber is less than the minimum temperature specified in paragraph (B) of this rule.
- (F) Batch pathological waste incinerators shall incorporate a lockout system which will prevent the ignition of waste until the exit gas temperature of the secondary chamber reaches one thousand six hundred degrees Fahrenheit and which will prevent recharging until the combustion and burn-down cycles are complete.
- (G) Pathological waste shall not be loaded into the primary combustion chamber of a continuous feed pathological waste incinerator until the exit gas temperature has reached the minimum temperature specified in paragraph (B) of this rule.
- (H) The stack or stacks from any pathological waste incinerator shall be designed to minimize the impact of the emissions on employees, residents, patients, visitors, or nearby residences. The design of any unit shall meet good engineering practices so as not to cause excessive concentrations of any air contaminant at any air intake for heating and cooling of any building, or at operable windows, or doors.

- (I) Any mechanically-fed pathological waste incinerator must be equipped with an air lock system to prevent opening the incinerator to the room environment. The volume of the loading systems shall be designed so as to prevent overcharging of the unit to assure complete combustion of waste.
- (J) All pathological waste incinerators, including all associated equipment and grounds, shall be designed, operated and maintained to prevent the emission of objectionable odors.
- (K) Pathological waste that is also radioactive shall be managed in accordance with the applicable rules of the Ohio department of health and regulations of the United States nuclear regulatory commission.

[Note: section 3734.027 of the Revised Code prohibits the disposal of low level radioactive waste in an "infectious waste treatment facility" as that term is defined in the Revised Code.]

- (L) The owner or operator of any pathological waste incinerator shall not intentionally dispose of the following items by burning in the incinerator:
  - (1) Visible globules of mercury;
  - (2) Nickel-cadmium batteries;
  - (3) Switches, thermometers, batteries, and other devices containing mercury; and
  - (4) Bags or other containers for infectious waste handling which contain cadmium, chromium or lead as a pigmenting agent.

3745-105-04      **Monitoring requirements.**

[Comment: For dates of non-regulatory government publications, publications of recognized organizations and associations, federal rules, and federal statutory provisions referenced in this rule, see the last paragraph of rule 3745-105-01 of the Administrative Code titled "Reference to materials."]

- (A) Each incinerator unit burning pathological waste shall be equipped with a continuous temperature recorder for the primary and secondary combustion chambers.
- (B) Each pathological waste incinerator with a capacity greater than one thousand pounds per hour shall be equipped with a continuous carbon monoxide monitor and alarm. The alarm shall indicate whenever concentrations exceed one hundred fifty parts per million.
- (C) All facilities that operate a pathological waste incinerator shall install, maintain and operate a radioactivity monitor and alarm. The radioactivity monitor shall be installed to monitor all pathological waste prior to combustion.
- (D) Any pathological waste incinerator that is equipped with a bypass stack shall be equipped with a device to continuously monitor and record the temperature in the bypass stack.
- (E) The owner or operator of a pathological waste incinerator shall install a scale, accurate to within one pound, near any pathological waste incinerator to weigh all of the material charged to the unit. The owner or operator of a pathological waste incinerator shall maintain a written log to record the amount of material charged to any unit on a pounds per hour or a pounds per batch basis. Alternative arrangements may be approved by the director provided they can be shown to be of equivalent effectiveness as a method of regulating flow into the incinerator and generating a permanent record of charging rates.
- (F) Each incinerator with a capacity greater than one thousand pounds per hour shall be equipped with a continuous opacity monitor unless otherwise exempted by the director because of the influence of condensed water vapor in the stack exit gas.
- (G) Any continuous opacity or carbon monoxide monitor required under this rule shall be installed and maintained in accordance with 40 CFR Part 60.

3745-105-05      **Recordkeeping.**

[Comment: For dates of non-regulatory government publications, publications of recognized organizations and associations, federal rules, and federal statutory provisions referenced in this rule, see the last paragraph of rule 3745-105-01 of the Administrative Code titled "Reference to materials."]

- (A) Pursuant to 40 CFR Parts 60.7 and 60.13(h), the owner or operator of each incinerator with a capacity greater than one thousand pounds per hour with continuous emission monitors shall submit reports on a quarterly basis to the appropriate Ohio EPA district office or local air agency documenting all instances of values in excess of the limitations specified in rule 3745-105-02 of the Administrative Code. These quarterly excess emission reports shall be submitted by February first, May first, August first, and November first of each year and shall cover the data obtained during the previous calendar quarters.
- (B) The owner or operator of each incinerator with a capacity less than or equal to one thousand pounds per hour shall submit reports on a quarterly basis to the appropriate Ohio EPA district office or local air agency documenting all instances of values in excess of the limitations specified in rule 3745-105-02 of the Administrative Code. These quarterly reports shall be submitted by February first, May first, August first, and November first of each year and shall cover the data obtained during the previous calendar quarters.
- (C) The reports required under paragraph (A) or (B) of this rule shall include every instance of activation of the radioactivity alarm; the reason for the alarm, and corrective action taken.
- (D) All recording charts and charging records shall be maintained for a period of five years and be available for inspection by the Ohio EPA or its authorized representatives at any reasonable time.
- (E) In addition to the requirements of paragraph (C) of this rule, the owner or operator shall immediately report any instance of radioactivity alarm activation to the environmental radiation safety section of the bureau of radiation protection of the Ohio department of health.

**Compliance and performance testing requirements.**

[Comment: For dates of non-regulatory government publications, publications of recognized organizations and associations, federal rules, and federal statutory provisions referenced in this rule, see the last paragraph of rule 3745-105-01 of the Administrative Code titled "Reference to materials."]

- (A) Within thirty days after the installation of the continuous monitoring and recording equipment, the owner or operator of a pathological waste incinerator shall conduct a performance specification test of such equipment pursuant to division (I) of section 3704.03 of the Revised Code and 40 CFR Part 60, appendix B, performance specification test one. Personnel from the appropriate Ohio EPA district office or local air agency shall be permitted to witness the performance specification test, and two copies of the test results shall be submitted to the Ohio EPA field office within forty-five days after the test is completed.
- (B) All owners or operators of pathological waste incinerators with a capacity greater than four hundred pounds per hour shall conduct annual performance tests to demonstrate compliance with the requirements in paragraphs (A) to (D) of rule 3745-105-02 of the Administrative Code.
- (C) All owners or operators of pathological waste incinerators with a capacity less than or equal to four hundred pounds per hour shall conduct a stack test once every three years to demonstrate compliance with the requirements in paragraphs (A) to (D) of rule 3745-105-02 of the Administrative Code.
- (D) The director may require more frequent tests if, in the director's judgment, there may be a violation of any applicable emission standards or there has been a change in the operation that may cause an increase in emissions due to a change in waste streams, pathological waste generators, or other operating conditions.
- (E) The director or his/her representative shall be allowed to witness the tests, examine testing equipment, and require the acquisition or submission of data and information necessary to assure that the source operation and testing procedures provide a valid characterization of the emissions from the source and/or performance of the control equipment. The appropriate Ohio EPA district office or local air agency shall be notified at least thirty days in advance of any performance test by the owner or operator. The notice shall specify the date, time, place, source operating parameters, proposed test procedures, and persons conducting the test. Test results shall be submitted to the appropriate Ohio EPA district office or local air agency no later than thirty days after the completion of the test.
- (F) Any owner or operator required to install and operate a radioactivity monitor and alarm due to the provisions of paragraph (C) of rule 3745-105-04 of the Administrative Code shall achieve compliance with paragraph (C) of rule 3745-105-04 of the Administrative Code as expeditiously as practicable, but not later than August 31, 2003.

[ Note: an earlier compliance date for the radioactivity monitor and alarm may pertain under rule 3745-75-06 of the Administrative Code for pathological waste incinerators located offsite, or at facilities where radioactive materials are used or are licensed for use by the United States nuclear regulatory commission.]

3745-109-01      **CAIR NO<sub>x</sub> annual, CAIR SO<sub>2</sub> and CAIR NO<sub>x</sub> ozone season trading programs definitions and general provisions.**

[Comment: For dates of non-regulatory government publications, publications of recognized organizations and associations, federal rules, and federal statutory provisions referenced in this rule, see the "Incorporation by Reference" section at the end of this rule.]

(A) Purpose.

Rules 3745-109-01 to 3745-109-08 of the Administrative Code establish the CAIR NO<sub>x</sub> annual trading program in Ohio as a means of reducing NO<sub>x</sub> emissions in the state. The director authorizes the administrator to assist the director in implementing the state CAIR NO<sub>x</sub> annual trading program by carrying out the functions set forth for the administrator in rules 3745-109-01 to 3745-109-08 of the Administrative Code.

Rules 3745-109-01 and 3745-109-09 to 3745-109-14 of the Administrative Code establish the CAIR SO<sub>2</sub> budget trading program in Ohio as a means to control fine particulate and sulfur dioxide emissions from CAIR units in the state. The director authorizes the administrator to assist the director in implementing the state CAIR SO<sub>2</sub> budget trading program as a participant in the federal CAIR SO<sub>2</sub> budget trading program by carrying out the functions set forth for the administrator in these rules.

Rules 3745-109-01 and 3745-109-15 to 3745-109-21 of the Administrative Code establish the provisions and requirements to implement a CAIR NO<sub>x</sub> ozone season trading program in Ohio as a means of control and reductions of NO<sub>x</sub> emissions. The director authorizes the administrator to assist the director in implementing the state CAIR NO<sub>x</sub> ozone season trading program as a participant in the federal CAIR NO<sub>x</sub> ozone season trading program by carrying out the functions set forth for the administrator in these rules.

(B) Definitions.

The terms used in this rule and rules 3745-109-02 to 3745-109-21 of the Administrative Code shall have the meanings set forth in this paragraph as follows:

- (1) "Account number" means the identification number given by the administrator to each CAIR NO<sub>x</sub>, SO<sub>2</sub>, or NO<sub>x</sub> ozone season allowance tracking system account.
- (2) "Acid rain emissions limitation" means a limitation on emissions of sulfur dioxide or nitrogen oxides under the acid rain program.
- (3) "Acid rain program" means a multi-state sulfur dioxide and nitrogen oxides air pollution control and emission reduction program established by the administrator under Title IV of the CAA and 40 CFR Parts 72 to 78.

- (4) "Administrator" means the administrator of the United States environmental protection agency or the administrator's duly authorized representative.
- (5) "Allocate" or "allocation" means:
- (a) With regard to CAIR NO<sub>x</sub> allowances, the determination by a permitting authority or the administrator of the amount of such CAIR NO<sub>x</sub> allowances to be initially credited to a CAIR NO<sub>x</sub> unit, a new unit set-aside, or other entity;
  - (b) With regard to CAIR SO<sub>2</sub> allowances issued under the acid rain program, the determination by the administrator of the amount of such CAIR SO<sub>2</sub> allowances to be initially credited to a CAIR SO<sub>2</sub> unit or other entity and, with regard to CAIR SO<sub>2</sub> allowances issued under provisions of a state implementation plan that are approved under 40 CFR 51.124(o)(1) or 40 CFR 51.124(o)(2) or 40 CFR 51.124(r) or 40 CFR 97.288, the determination by a permitting authority of the amount of such CAIR SO<sub>2</sub> allowances to be initially credited to a CAIR SO<sub>2</sub> unit or other entity; and
  - (c) With regard to CAIR NO<sub>x</sub> ozone season allowances, the determination by a permitting authority or the administrator of the amount of such CAIR NO<sub>x</sub> ozone season allowances to be initially credited to a CAIR NO<sub>x</sub> ozone season unit, a new unit set-aside, or other entity.
- (6) "Allowance transfer deadline" means:
- (a) For a control period, midnight of March first (if it is a business day), or midnight of the first business day thereafter (if March first is not a business day), immediately following the control period and is the deadline by which a CAIR NO<sub>x</sub> or SO<sub>2</sub> allowance transfer must be submitted for recordation in a CAIR NO<sub>x</sub> or SO<sub>2</sub> source's compliance account in order to be used to meet the source's CAIR NO<sub>x</sub> or SO<sub>2</sub> emissions limitation for such control period in accordance with paragraph (D) of rule 3745-109-05 or paragraph (D) of rule 3745-109-11, respectively, of the Administrative Code;
  - (b) For a control period, midnight of November thirtieth (if it is a business day), or midnight of the first business day thereafter (if November thirtieth is not a business day), immediately following the control period and is the deadline by which a CAIR NO<sub>x</sub> ozone season allowance transfer must be submitted for recordation in a CAIR NO<sub>x</sub> ozone season source's compliance account in order to be used to meet the source's CAIR NO<sub>x</sub> ozone season emissions limitation for such control period in accordance with paragraph (D) of rule 3745-109-18 of the Administrative Code.
- (7) "Alternate CAIR designated representative" means:

- (a) For a CAIR NO<sub>x</sub> source and each CAIR NO<sub>x</sub> unit at the source, the natural person who is authorized by the owners and operators of the source and all such units at the source, in accordance with rules 3745-109-02 and 3745-109-08 of the Administrative Code, to act on behalf of the CAIR designated representative in matters pertaining to the CAIR NO<sub>x</sub> annual trading program. If the CAIR NO<sub>x</sub> source is also a CAIR SO<sub>2</sub> source, then this natural person shall be the same person as the alternate CAIR designated representative under the CAIR SO<sub>2</sub> trading program. If the CAIR NO<sub>x</sub> source is also a CAIR NO<sub>x</sub> ozone season source, then this natural person shall be the same person as the alternate CAIR designated representative under the CAIR NO<sub>x</sub> ozone season trading program. If the CAIR NO<sub>x</sub> source is also subject to the acid rain program, then this natural person shall be the same person as the alternate designated representative under the acid rain program. If the CAIR NO<sub>x</sub> source is also subject to the Hg budget trading program, then this natural person shall be the same person as the alternate Hg designated representative under the Hg budget trading program;
- (b) For a CAIR SO<sub>2</sub> source and each CAIR SO<sub>2</sub> unit at the source, the natural person who is authorized by the owners and operators of the source and all such units at the source, in accordance with rules 3745-109-09 and 3745-109-14 of the Administrative Code, to act on behalf of the CAIR designated representative in matters pertaining to the CAIR SO<sub>2</sub> trading program. If the CAIR SO<sub>2</sub> source is also a CAIR NO<sub>x</sub> source, then this natural person shall be the same person as the alternate CAIR designated representative under the CAIR NO<sub>x</sub> annual trading program. If the CAIR SO<sub>2</sub> source is also a CAIR NO<sub>x</sub> ozone season source, then this natural person shall be the same person as the alternate CAIR designated representative under the CAIR NO<sub>x</sub> ozone season trading program. If the CAIR SO<sub>2</sub> source is also subject to the acid rain program, then this natural person shall be the same person as the alternate designated representative under the acid rain program. If the CAIR SO<sub>2</sub> source is also subject to the Hg budget trading program, then this natural person shall be the same person as the alternate Hg designated representative under the Hg budget trading program;
- (c) For a CAIR NO<sub>x</sub> ozone season source and each CAIR NO<sub>x</sub> ozone season unit at the source, the natural person who is authorized by the owners and operators of the source and all such units at the source, in accordance with rules 3745-109-15 and 3745-109-21 of the Administrative Code, to act on behalf of the CAIR designated representative in matters pertaining to the CAIR NO<sub>x</sub> ozone season trading program. If the CAIR NO<sub>x</sub> ozone season source is also a CAIR NO<sub>x</sub> source, then this natural person shall be the same person as the alternate CAIR designated representative under the CAIR NO<sub>x</sub> annual trading program. If the CAIR NO<sub>x</sub> ozone season source is also a CAIR SO<sub>2</sub> source, then this natural person shall be the same person as the alternate CAIR designated representative under the CAIR SO<sub>2</sub> trading program. If the CAIR NO<sub>x</sub> ozone season source is also subject to the acid rain program, then this natural person shall be the same person as

the alternate designated representative under the acid rain program. If the CAIR NO<sub>x</sub> ozone season source is also subject to the Hg budget trading program, then this natural person shall be the same person as the alternate Hg designated representative under the Hg budget trading program.

- (8) "Automated data acquisition and handling system" or "DAHS" means that component of the continuous emission monitoring system, or other emissions monitoring system approved for use under rules 3745-109-07, 3745-109-13 and 3745-109-20 of the Administrative Code, designed to interpret and convert individual output signals from pollutant concentration monitors, flow monitors, diluent gas monitors, and other component parts of the monitoring system to produce a continuous record of the measured parameters in the measurement units required by rules 3745-109-07, 3745-109-13 and 3745-109-20 of the Administrative Code.
- (9) "Biomass" means:
- (a) Any organic material grown for the purpose of being converted to energy;
  - (b) Any organic byproduct of agriculture that can be converted into energy; or
  - (c) Any material that can be converted into energy and is nonmerchantable for other purposes, that is segregated from other nonmerchantable material, and that is:
    - (i) A forest-related organic resource, including mill residues, precommercial thinnings, slash, brush, or by product from conversion of trees to merchantable material; or
    - (ii) A wood material, including pallets, crates, dunnage, manufacturing and construction materials (other than pressure-treated, chemically-treated, or painted wood products), and landscape or right-of-way tree trimmings.
- (10) "Boiler" means an enclosed fossil-fuel-fired or other-fuel-fired combustion device used to produce heat and to transfer heat to recirculating water, steam, or other medium, excluding CO boilers associated with the combusting CO from fluidized catalytic crackers at petroleum refineries. The exclusion of CO boilers applies only to those units applicable to the CAIR NO<sub>x</sub> ozone season trading program under paragraph (C)(4) of this rule (non-EGUs).
- (11) "Bottoming-cycle cogeneration unit" means a cogeneration unit in which the energy input to the unit is first used to produce useful thermal energy and at least some of the reject heat from the useful thermal energy application or process is then used for electricity production.
- (12) "Btu" means British thermal unit.

- (13) "CAIR" means the clean air interstate rule.
- (14) "CAIR authorized account representative" means, with regard to a general account, a responsible natural person who is authorized, in accordance with rules 3745-109-02, 3745-109-05, 3745-109-08, 3745-109-09, 3745-109-11, 3745-109-14, 3745-109-15, 3745-109-18 and 3745-109-21 of the Administrative Code, to transfer and otherwise dispose of CAIR NO<sub>x</sub>, SO<sub>2</sub>, or NO<sub>x</sub> ozone season allowances held in the general account and, with regard to a compliance account, the CAIR designated representative of the source.
- (15) "CAIR designated representative" means:
- (a) For a CAIR NO<sub>x</sub> source and each CAIR NO<sub>x</sub> unit at the source, the natural person who is authorized by the owners and operators of the source and all such units at the source, in accordance with rules 3745-109-02 and 3745-109-08 of the Administrative Code, to represent and legally bind each owner and operator in matters pertaining to the CAIR NO<sub>x</sub> annual trading program. If the CAIR NO<sub>x</sub> source is also a CAIR SO<sub>2</sub> source, then this natural person shall be the same person as the CAIR designated representative under the CAIR SO<sub>2</sub> trading program. If the CAIR NO<sub>x</sub> source is also a CAIR NO<sub>x</sub> ozone season source, then this natural person shall be the same person as the CAIR designated representative under the CAIR NO<sub>x</sub> ozone season trading program. If the CAIR NO<sub>x</sub> source is also subject to the acid rain program, then this natural person shall be the same person as the designated representative under the acid rain program. If the CAIR NO<sub>x</sub> source is also subject to the Hg budget trading program, then this natural person shall be the same person as the Hg designated representative under the Hg budget trading program;
  - (b) For a CAIR SO<sub>2</sub> source and each CAIR SO<sub>2</sub> unit at the source, the natural person who is authorized by the owners and operators of the source and all such units at the source, in accordance with rules 3745-109-09 and 3745-109-14 of the Administrative Code, to represent and legally bind each owner and operator in matters pertaining to the CAIR SO<sub>2</sub> trading program. If the CAIR SO<sub>2</sub> source is also a CAIR NO<sub>x</sub> source, then this natural person shall be the same person as the CAIR designated representative under the CAIR NO<sub>x</sub> annual trading program. If the CAIR SO<sub>2</sub> source is also a CAIR NO<sub>x</sub> ozone season source, then this natural person shall be the same person as the CAIR designated representative under the CAIR NO<sub>x</sub> ozone season trading program. If the CAIR SO<sub>2</sub> source is also subject to the acid rain program, then this natural person shall be the same person as the designated representative under the acid rain program. If the CAIR SO<sub>2</sub> source is also subject to the Hg budget trading program, then this natural person shall be the same person as the Hg designated representative under the Hg budget trading program;
  - (c) For a CAIR NO<sub>x</sub> ozone season source and each CAIR NO<sub>x</sub> ozone season unit at the source, the natural person who is authorized by the owners and

operators of the source and all such units at the source, in accordance with rules 3745-109-15 to 3745-109-21 of the Administrative Code, to represent and legally bind each owner and operator in matters pertaining to the CAIR NO<sub>x</sub> ozone season trading program. If the CAIR NO<sub>x</sub> ozone season source is also a CAIR NO<sub>x</sub> source, then this natural person shall be the same person as the CAIR designated representative under the CAIR NO<sub>x</sub> annual trading program. If the CAIR NO<sub>x</sub> ozone season source is also a CAIR SO<sub>2</sub> source, then this natural person shall be the same person as the CAIR designated representative under the CAIR SO<sub>2</sub> trading program. If the CAIR NO<sub>x</sub> ozone season source is also subject to the acid rain program, then this natural person shall be the same person as the designated representative under the acid rain program. If the CAIR NO<sub>x</sub> ozone season source is also subject to the Hg budget trading program, then this natural person shall be the same person as the Hg designated representative under the Hg budget trading program.

- (16) "CAIR NO<sub>x</sub> allowance" means a limited authorization issued by a permitting authority or the administrator under provisions of a state implementation plan that are approved under 40 CFR 51.123 (o)(1) or 40 CFR 51.123(o)(2) or 40 CFR 51.123(p) or 40 CFR Part 97 Subpart EE or 40 CFR 97.188, to emit one ton of NO<sub>x</sub> during a control period of the specified calendar year for which the authorization is allocated or of any calendar year thereafter under the CAIR NO<sub>x</sub> annual trading program. An authorization to emit NO<sub>x</sub> that is not issued under provisions of a state implementation plan that are approved under 40 CFR 51.123(o)(1) or 40 CFR 51.123(o)(2) or 40 CFR 51.123(p) or 40 CFR Part 97 Subpart EE or 40 CFR 97.188 shall not be a CAIR NO<sub>x</sub> allowance.
- (17) "CAIR NO<sub>x</sub> allowance deduction" or "deduct CAIR NO<sub>x</sub> allowances" means the permanent withdrawal of CAIR NO<sub>x</sub> allowances by the administrator from a compliance account, e.g., in order to account for a specified number of tons of total NO<sub>x</sub> emissions from all CAIR NO<sub>x</sub> units at a CAIR NO<sub>x</sub> source for a control period, determined in accordance with rule 3745-109-07 of the Administrative Code, or to account for excess emissions.
- (18) "CAIR NO<sub>x</sub> allowance tracking system" means the system by which the administrator records allocations, deductions, and transfers of CAIR NO<sub>x</sub> allowances under the CAIR NO<sub>x</sub> annual trading program. Such allowances shall be allocated, held, deducted, or transferred only as whole allowances.
- (19) "CAIR NO<sub>x</sub> allowance tracking system account" means an account in the CAIR NO<sub>x</sub> allowance tracking system established by the administrator for purposes of recording the allocation, holding, transferring, or deducting of CAIR NO<sub>x</sub> allowances.
- (20) "CAIR NO<sub>x</sub> allowances held" or "hold CAIR NO<sub>x</sub> allowances" means the CAIR NO<sub>x</sub> allowances recorded by the administrator, or submitted to the administrator for recordation, in accordance with rules 3745-109-05, 3745-109-

06 and 3745-109-08 of the Administrative Code, in a CAIR NO<sub>x</sub> allowance tacking system account.

- (21) "CAIR NO<sub>x</sub> annual trading program" means a multi-state nitrogen oxides air pollution control and emission reduction program approved and administered by the administrator in accordance with 40 CFR Part 96, Subparts AA to II, and 40 CFR 51.123(o)(1) or 40 CFR 51.123(o)(2) or established by the administrator in accordance with 40 CFR Part 97, Subparts AA to II and 40 CFR 51.123(p) and 40 CFR 52.35, as a means of mitigating interstate transport of fine particulates and NO<sub>x</sub>.
- (22) "CAIR NO<sub>x</sub> emissions limitation" means, for a CAIR NO<sub>x</sub> source, the tonnage equivalent, in NO<sub>x</sub> emissions in a control period, of the CAIR NO<sub>x</sub> allowances available for deduction for the source under paragraphs (D)(1) and (D)(2) of rule 3745-109-05 of the Administrative Code for the control period.
- (23) "CAIR NO<sub>x</sub> ozone season allowance" means a limited authorization issued by a permitting authority or the administrator under provisions of a state implementation plan that are approved under 40 CFR 51.123(aa)(1) or (aa)(2) (and (bb)(1)), (bb)(2), (dd), or (ee), or under 40 CFR Part 97, Subpart EEEE or 40 CFR 97.388, to emit one ton of NO<sub>x</sub> during a control period of the specified calendar year for which the authorization is allocated or of any calendar year thereafter under the CAIR NO<sub>x</sub> ozone season trading program or a limited authorization issued by a permitting authority for a control period during 2003 through 2008 under the NO<sub>x</sub> budget trading program in accordance with 40 CFR 51.121(p) to emit one ton of NO<sub>x</sub> during a control period, provided that the provision in 40 CFR 51.121(b)(2)(ii)(E) shall not be used in applying this definition and the limited authorization shall not have been used to meet the allowance-holding requirement under the NO<sub>x</sub> budget trading program. An authorization to emit NO<sub>x</sub> that is not issued under provisions of a state implementation plan approved under 40 CFR 51.123(aa)(1) or (aa)(2) (and (bb)(1)), (bb)(2), (dd), or (ee) or 40 CFR Part 97, Subpart EEEE or 40 CFR 97.388 or under the NO<sub>x</sub> budget trading program as described in the prior sentence shall not be a CAIR NO<sub>x</sub> ozone season allowance.
- (24) "CAIR NO<sub>x</sub> ozone season allowance deduction" or "deduct CAIR NO<sub>x</sub> ozone season allowances" means the permanent withdrawal of CAIR NO<sub>x</sub> ozone season allowances by the administrator from a compliance account, e.g., in order to account for a specified number of tons of total NO<sub>x</sub> emissions from all CAIR NO<sub>x</sub> ozone season units at a CAIR NO<sub>x</sub> ozone season source for a control period, determined in accordance with rule 3745-109-20 of the Administrative Code, or to account for excess emissions.
- (25) "CAIR NO<sub>x</sub> ozone season allowance tracking system" means the system by which the administrator records allocations, deductions, and transfers of CAIR NO<sub>x</sub> ozone season allowances under the CAIR NO<sub>x</sub> ozone season trading program. Such allowances shall be allocated, held, deducted, or transferred only as whole allowances.

- (26) "CAIR NO<sub>x</sub> ozone season allowance tracking system account" means an account in the CAIR NO<sub>x</sub> ozone season allowance tracking system established by the administrator for purposes of recording the allocation, holding, transferring, or deducting of CAIR NO<sub>x</sub> ozone season allowances.
- (27) "CAIR NO<sub>x</sub> ozone season allowances held" or "hold CAIR NO<sub>x</sub> ozone season allowances" means the CAIR NO<sub>x</sub> ozone season allowances recorded by the administrator, or submitted to the administrator for recordation, in accordance with rules 3745-109-18, 3745-109-19 and 3745-109-21 of the Administrative Code, in a CAIR NO<sub>x</sub> ozone season allowance tracking system account.
- (28) "CAIR NO<sub>x</sub> ozone season emissions limitation" means, for a CAIR NO<sub>x</sub> ozone season source, the tonnage equivalent, in NO<sub>x</sub> emissions in a control period, of the CAIR NO<sub>x</sub> ozone season allowances available for deduction for the source under paragraphs (D)(1) and (D)(2) of rule 3745-109-18 of the Administrative Code for a control period.
- (29) "CAIR NO<sub>x</sub> ozone season source" means, in regard to the CAIR NO<sub>x</sub> annual and SO<sub>2</sub> trading programs, a source that is subject to the CAIR NO<sub>x</sub> ozone season trading program; in regard to the CAIR NO<sub>x</sub> ozone season program it means a source that includes one or more CAIR NO<sub>x</sub> ozone season units.
- (30) "CAIR NO<sub>x</sub> ozone season trading program" means a multi-state nitrogen oxides air pollution control and emission reduction program approved and administered by the administrator in accordance with 40 CFR Part 96 Subparts AAAA to IIII and 40 CFR 51.123(aa)(1) or 40 CFR 51.123(aa)(2) (and 40 CFR 51.123(bb)(1)), 40 CFR 51.123(bb)(2), or 40 CFR 51.123(dd) or established by the administrator in accordance with 40 CFR Part 97 Subparts AAAA to IIII and 40 CFR 51.123(ee) and 40 CFR 52.35, as a means of mitigating interstate transport of ozone and NO<sub>x</sub>.
- (31) "CAIR NO<sub>x</sub> ozone season unit" means a unit that is subject to the CAIR NO<sub>x</sub> ozone season trading program under paragraph (C) this rule and, except for the purposes of paragraph (D) of this rule and rule 3745-109-17 of the Administrative Code, a CAIR NO<sub>x</sub> ozone season opt-in unit under rule 3745-109-21 of the Administrative Code.
- (32) "CAIR NO<sub>x</sub> source" means, in regard to the CAIR NO<sub>x</sub> annual trading program, a source that includes one or more CAIR NO<sub>x</sub> units; in regard to the CAIR NO<sub>x</sub> ozone season and SO<sub>2</sub> trading programs it means a source that is subject to the CAIR NO<sub>x</sub> annual trading program.
- (33) "CAIR NO<sub>x</sub> unit" means a unit that is subject to the CAIR NO<sub>x</sub> annual trading program under paragraph (C) this rule and, except for the purposes of paragraph (D) of this rule and rule 3745-109-04 of the Administrative Code, a CAIR NO<sub>x</sub> opt-in unit under rule 3745-109-08 of the Administrative Code.

- (34) "CAIR permit" means the legally binding and federally enforceable written document, or portion of such document, issued by the director under rules 3745-109-03, 3745-109-10 and 3745-109-16 of the Administrative Code, including any permit revisions, specifying the CAIR NO<sub>x</sub> annual, SO<sub>2</sub>, or NO<sub>x</sub> ozone season trading program requirements applicable to a CAIR NO<sub>x</sub>, SO<sub>2</sub>, or NO<sub>x</sub> ozone season source, to each CAIR NO<sub>x</sub>, SO<sub>2</sub>, or NO<sub>x</sub> ozone season unit at the source, and to the owners and operators and the CAIR designated representative of the source and each such unit.
- (35) "CAIR SO<sub>2</sub> allowance" means a limited authorization issued by the administrator under the acid rain program, or by a permitting authority under provisions of a state implementation plan that are approved under 40 CFR 51.124(o)(1) or 40 CFR 51.124(2) or 40 CFR 51.124(r) or 40 CFR 97.288, to emit SO<sub>2</sub> during the control period of the specified calendar year for which the authorization is allocated or of any calendar year thereafter under the CAIR SO<sub>2</sub> trading program as follows:
- (a) For one CAIR SO<sub>2</sub> allowance allocated for a control period in a year before 2010, one ton of SO<sub>2</sub>, except as provided in paragraph (D)(2) of rule 3745-109-11 of the Administrative Code;
  - (b) For one CAIR SO<sub>2</sub> allowance allocated for a control period in 2010 through 2014, 0.50 ton of SO<sub>2</sub>, except as provided in paragraph (D)(2) of rule 3745-109-11 of the Administrative Code;
  - (c) For one CAIR SO<sub>2</sub> allowance allocated for a control period in 2015 or later, 0.35 ton of SO<sub>2</sub>, except as provided in paragraph (D)(2) of rule 3745-109-11 of the Administrative Code; and
  - (d) An authorization to emit SO<sub>2</sub> that is not issued under the acid rain program, under the provisions of a state implementation plan that are approved under 40 CFR 51.124(o)(1) or 40 CFR 51.124 (o)(2) or 40 CFR 51.124(r), or under 40 CFR 97.288 shall not be a CAIR SO<sub>2</sub> allowance.
- (36) "CAIR SO<sub>2</sub> allowance deduction" or "deduct CAIR SO<sub>2</sub> allowances" means the permanent withdrawal of CAIR SO<sub>2</sub> allowances by the administrator from a compliance account, e.g., in order to account for a specified number of tons of total SO<sub>2</sub> emissions from all CAIR SO<sub>2</sub> units at a CAIR SO<sub>2</sub> source for a control period, determined in accordance with rule 3745-109-13 of the Administrative Code, or to account for excess emissions.
- (37) "CAIR SO<sub>2</sub> allowance tracking system" means the system by which the administrator records allocations, deductions, and transfers of CAIR SO<sub>2</sub> allowances under the CAIR SO<sub>2</sub> trading program. This is the same system as the allowance tracking system under 40 CFR 72.2 by which the administrator records allocations, deduction, and transfers of acid rain SO<sub>2</sub> allowances under the acid rain program.

- (38) "CAIR SO<sub>2</sub> allowance tracking system account" means an account in the CAIR SO<sub>2</sub> allowance tracking system established by the administrator for purposes of recording the allocation, holding, transferring, or deducting of CAIR SO<sub>2</sub> allowances. Such allowances will be allocated, held, deducted, or transferred only as whole allowances.
- (39) "CAIR SO<sub>2</sub> allowances held" or "hold CAIR SO<sub>2</sub> allowances" means the CAIR SO<sub>2</sub> allowances recorded by the administrator, or submitted to the administrator for recordation, in accordance with rules 3745-109-11, 3745-109-12 and 3745-109-14 of the Administrative Code or 40 CFR Part 73, in a CAIR SO<sub>2</sub> allowance tracking system account.
- (40) "CAIR SO<sub>2</sub> emissions limitation" means, for a CAIR SO<sub>2</sub> source, the tonnage equivalent, in SO<sub>2</sub> emissions in a control period, of the CAIR SO<sub>2</sub> allowances available for deduction for the source under paragraphs (D)(2) and (D)(3) of rule 3745-109-11 of the Administrative Code for the control period.
- (41) "CAIR SO<sub>2</sub> source" means, in regard to the CAIR NO<sub>x</sub> annual and ozone season trading programs, a source that is subject to the CAIR SO<sub>2</sub> trading program; in regard to the CAIR SO<sub>2</sub> trading program its means a source that includes one or more CAIR SO<sub>2</sub> units.
- (42) "CAIR SO<sub>2</sub> trading program" means a multi-state sulfur dioxide air pollution control and emission reduction program approved and administered by the administrator in accordance with 40 CFR Part 96, Subparts AAA to III and 40 CFR 51.124(o)(1) or 40 CFR 51.124(o)(2) or established by the administrator in accordance with 40 CFR Part 97, Subparts AAA to III and 40 CFR 51.124(r) and 40 CFR 52.36, as a means of mitigating interstate transport of fine particulates and sulfur dioxide.
- (43) "CAIR SO<sub>2</sub> unit" means a unit that is subject to the CAIR SO<sub>2</sub> trading program under paragraph (C) of this rule and, except for purposes of paragraph (D) of this rule, a CAIR SO<sub>2</sub> opt-in unit under rule 3745-109-14 of the Administrative Code.
- (44) "Clean Air Act" or "CAA" means the Clean Air Act, 42 USC 7401 to 7671q.
- (45) "Coal" means any solid fuel classified as anthracite, bituminous, subbituminous, or lignite.
- (46) "Coal-derived fuel" means any fuel (whether in a solid, liquid, or gaseous state) produced by the mechanical, thermal, or chemical processing of coal.
- (47) "Coal-fired" means:
- (a) Except for purposes of rules 3745-109-04 and 3745-109-17 of the Administrative Code, combusting any amount of coal or coal-derived fuel,

alone or in combination with any amount of any other fuel, during any year;  
or

- (b) For purposes of rule 3745-109-04 and 3745-109-17 of the Administrative Code, combusting any amount of coal or coal-derived fuel, alone or in combination with any amount of any other fuel, during a specified year.
  - (c) For the purposes of rules 3745-109-09 to 3745-109-14 of the Administrative Code, combusting any amount of coal or coal-derived fuel, alone or in combination with any amount of any other fuel.
- (48) "Cogeneration unit" means a stationary, fossil-fuel-fired boiler or stationary, fossil-fuel-fired combustion turbine:
- (a) Having equipment used to produce electricity and useful thermal energy for industrial, commercial, heating, or cooling purposes through the sequential use of energy; and
  - (b) Except for units meeting the applicability requirements under paragraph (C)(4) of this rule, producing during the twelve-month period starting on the date the unit first produces electricity and during any calendar year after the calendar year in which the unit first produces electricity:
    - (i) For a topping-cycle cogeneration unit;
      - (a) Useful thermal energy not less than five per cent of total energy output; and
      - (b) Useful power that, when added to one-half of useful thermal energy produced, is not less than 42.5 per cent of total energy input, if useful thermal energy produced is fifteen per cent or more of total energy output, or not less than forty-five per cent of total energy input, if useful thermal energy produced is less than fifteen per cent of total energy output;
    - (ii) For a bottoming-cycle cogeneration unit, useful power not less than forty-five per cent of total energy input;
  - (c) Provided that the total energy input under paragraphs (B)(48)(b)(i)(b) and (B)(48)(b)(ii) of this rule shall equal the unit's total energy input from all fuel except biomass if the unit is a boiler.
- (49) "Combustion turbine" means:
- (a) An enclosed device comprising a compressor, a combustor, and a turbine and in which the flue gas resulting from the combustion of fuel in the combustor passes through the turbine, rotating the turbine; and

- (b) If the enclosed device under paragraph (B)(49)(a) of this rule is combined cycle, any associated duct burner, heat recovery steam generator and steam turbine.

(50) "Commence commercial operation" means, with regard to a unit:

- (a) To have begun to produce steam, gas, or other heated medium used to generate electricity for sale or use, including test generation, except as provided in paragraph (D) of this rule and paragraphs (E)(8) of rule 3745-109-08 of the Administrative Code, paragraph (E)(8) of rule 3745-109-14 of the Administrative Code, and paragraph (E)(8) of rule 3745-109-21 of the Administrative Code.
  - (i) For a unit that is a CAIR NO<sub>x</sub>, SO<sub>2</sub>, or NO<sub>x</sub> ozone season unit under paragraph (C) of this rule on the later of November 15, 1990 or the date the unit commences commercial operation as defined in paragraph (B)(50)(a) of this rule and that subsequently undergoes a physical change (other than replacement of the unit by a unit at the same source), such date shall remain the unit's date of commencement of commercial operation of the unit, which shall continue to be treated as the same unit.
  - (ii) For a unit that is a CAIR NO<sub>x</sub>, SO<sub>2</sub>, or NO<sub>x</sub> ozone season unit under paragraph (C) of this rule on the later of November 15, 1990 or the date the unit commences commercial operation as defined in paragraph (B)(50)(a) of this rule and that is subsequently replaced by a unit at the same source (e.g., repowered), such date shall remain the replaced unit's date of commencement of commercial operation, and the replacement unit shall be treated as a separate unit with a separate date for commencement of commercial operation as defined in paragraph (B)(50)(a) or (B)(50)(b) of this rule as appropriate.
- (b) Notwithstanding paragraph (B)(50)(a) of this rule and except as provided in paragraph (D) of this rule, for a unit that is not a CAIR NO<sub>x</sub>, SO<sub>2</sub>, or NO<sub>x</sub> ozone season unit under paragraph (C) of this rule on the later of November 15, 1990 or the date the unit commences commercial operation as defined in paragraph (B)(50)(a) of this rule, the unit's date for commencement of commercial operation shall be the date on which the unit becomes a CAIR NO<sub>x</sub>, SO<sub>2</sub>, or NO<sub>x</sub> ozone season unit under paragraph (C) of this rule.
  - (i) For a unit with a date for commencement of commercial operation as defined in paragraph (B)(50)(b) of this rule and that subsequently undergoes a physical change (other than replacement of the unit by a unit at the same source), such date shall remain the unit's date of commencement of commercial operation of the unit, which shall continue to be treated as the same unit.

- (ii) For a unit with a date for commencement of commercial operation as defined in paragraph (B)(50)(b) of this rule and that is subsequently replaced by a unit at the same source (e.g., repowered), such date shall remain the replaced unit's date of commencement of commercial operation, and the replacement unit shall be treated as a separate unit with a separate date for commencement of commercial operation as defined in paragraph (B)(50)(a) or (B)(50)(b) of this rule as appropriate.
- (c) Notwithstanding paragraphs (B)(50)(a) and (B)(50)(b) of this rule, for a unit not serving a generator producing electricity for sale, the unit's date of commencement of operation shall also be the unit's date of commencement of commercial operation.

(51) "Commence operation" means:

- (a) To have begun any mechanical, chemical, or electronic process, including, with regard to a unit, start-up of a unit's combustion chamber, except as provided in paragraph (E)(8) of rule 3745-109-08 of the Administrative Code, paragraph (E)(8) of rule 3745-109-14 of the Administrative Code, and paragraph (E)(8) of rule 3745-109-21 of the Administrative Code.
  - (i) For a unit that is a CAIR NO<sub>x</sub>, SO<sub>2</sub>, or NO<sub>x</sub> ozone season unit that undergoes a physical change (other than replacement of the unit by a unit at the same source), after the date the unit commences operation as defined in paragraph (B)(51)(a) of this rule, such date shall remain the unit's date of commencement of operation, which shall continue to be treated as the same unit.
  - (ii) For a unit that is a CAIR NO<sub>x</sub>, SO<sub>2</sub>, or NO<sub>x</sub> ozone season unit that is replaced by a unit at the same source (e.g., repowered), after the date the unit commences operation as defined in paragraph (B)(51)(a) of this rule, such date shall remain the replaced unit's date of commencement of operation, and the replacement unit shall be treated as a separate unit with a separate date for commencement of operation as defined in paragraph (B)(51)(a), (B)(51)(a)(i), or (B)(51)(a)(ii) of this rule as appropriate, except as provided in paragraph (E)(8) of rule 3745-109-08 of the Administrative Code for CAIR NO<sub>x</sub> units, paragraph (E)(8) of rule 3745-109-14 of the Administrative Code for CAIR SO<sub>2</sub> units and paragraph (E)(8) of rule 3745-109-21 of the Administrative Code for CAIR NO<sub>x</sub> ozone season units.
- (b) Notwithstanding paragraph (B)(51)(a) of this rule, and solely for purposes of rule 3745-109-20 of the Administrative Code, for a unit that is not a CAIR NO<sub>x</sub> ozone season unit under paragraph (C)(4) of rule 3745-109-01 of the Administrative Code (non-EGUs) on the later of November 15, 1990 or the date the unit commences operation as defined in paragraph (B)(51)(a) of this rule and that subsequently becomes such a CAIR NO<sub>x</sub> ozone season

unit, the unit's date for commencement of operation shall be the date on which the unit becomes a CAIR NO<sub>x</sub> ozone season unit under paragraph (C)(4) of rule 3745-109-01 of the Administrative Code (non-EGUs).

- (i) For a unit with a date of commencement of operation as defined in paragraph (B)(51)(b) of this rule and that subsequently undergoes a physical change (other than replacement of the unit by a unit at the same source), such date shall remain the date of commencement of operation of the unit, which shall continue to be treated as the same unit.
  - (ii) For a unit with a date for commencement of operation as defined in paragraph (B)(51)(b) of this rule and that is subsequently replaced by a unit at the same source (e.g., repowered), such date shall remain the replaced unit's date of commencement of operation, and the replacement unit shall be treated as a separate unit with a separate date for commencement of operation as defined in paragraph (B)(51)(a) or (B)(51)(b) of this rule as appropriate.
- (52) "Common stack" means a single flue through which emissions from two or more units are exhausted.
- (53) "Compliance account" means:
- (a) For a CAIR NO<sub>x</sub> allowance tracking system account, established by the administrator for a CAIR NO<sub>x</sub> source under rule 3745-109-05 or 3745-109-08 of the Administrative Code, in which any CAIR NO<sub>x</sub> allowance allocations for the CAIR NO<sub>x</sub> units at the source are initially recorded and in which are held any CAIR NO<sub>x</sub> allowances available for use for a control period in order to meet the source's CAIR NO<sub>x</sub> emissions limitation in accordance with paragraph (D) of rule 3745-109-05 of the Administrative Code;
  - (b) For a CAIR SO<sub>2</sub> allowance tracking system account, established by the administrator for a CAIR SO<sub>2</sub> source subject to an acid rain emissions limitation under 40 CFR 73.31(a) or 40 CFR 73.31(b) or for any other CAIR SO<sub>2</sub> source under rule 3745-109-11 or 3745-109-14 of the Administrative Code, in which any CAIR SO<sub>2</sub> allowance allocations for the CAIR SO<sub>2</sub> units at the source are initially recorded and in which are held any CAIR SO<sub>2</sub> allowances available for use for a control period in order to meet the source's CAIR SO<sub>2</sub> emissions limitation in accordance with paragraph (D) of rule 3745-109-11 of the Administrative Code;
  - (c) For a CAIR NO<sub>x</sub> ozone season allowance tracking system account, established by the administrator for a CAIR NO<sub>x</sub> ozone season source under rules 3745-109-18 and 3745-109-21 of the Administrative Code, in which any CAIR NO<sub>x</sub> ozone season allowance allocations for the CAIR NO<sub>x</sub> ozone season units at the source are initially recorded and in which are

held any CAIR NO<sub>x</sub> ozone season allowances available for use for a control period in order to meet the source's CAIR NO<sub>x</sub> ozone season emissions limitation in accordance with paragraph (D) of rule 3745-109-18 of the Administrative Code.

- (54) "CSP" means compliance supplement pool.
- (55) "CO<sub>2</sub>" means carbon dioxide.
- (56) "Continuous emission monitoring system" or "CEMS" means the equipment required under rule 3745-109-07, 3745-109-13, or 3745-109-20 of the Administrative Code to sample, analyze, measure, and provide, by means of readings recorded at least once every fifteen minutes (using an automated data acquisition and handling system (DAHS), a permanent record of NO<sub>x</sub> or SO<sub>2</sub> emissions, stack gas volumetric flow rate, stack gas moisture content, and oxygen or carbon dioxide concentration (as applicable), in a manner consistent with 40 CFR Part 75. The following systems are the principal types of continuous emission monitoring systems required under rule 3745-109-07, 3745-109-13, or 3745-109-20 of the Administrative Code:
- (a) A flow monitoring system, consisting of a stack flow rate monitor and an automated data acquisition and handling system and providing a permanent, continuous record of stack gas volumetric flow rate, in standard cubic feet per hour;
  - (b) A NO<sub>x</sub> concentration or SO<sub>2</sub> monitoring system, consisting of a NO<sub>x</sub> or SO<sub>2</sub> pollutant concentration monitor and an automated data acquisition and handling system and providing a permanent, continuous record of NO<sub>x</sub> or SO<sub>2</sub> emissions, in parts per million;
  - (c) A NO<sub>x</sub> emission rate (or NO<sub>x</sub>-diluent) monitoring system, consisting of a NO<sub>x</sub> pollutant concentration monitor, a diluent gas (CO<sub>2</sub> or O<sub>2</sub>) monitor, and an automated data acquisition and handling system and providing a permanent, continuous record of NO<sub>x</sub> concentration, in parts per million, diluent gas concentration, in per cent CO<sub>2</sub> or O<sub>2</sub>; and NO<sub>x</sub> emission rate, in pounds per mmBtu;
  - (d) A moisture monitoring system, as defined in 40 CFR 75.11(b)(2) and providing a permanent, continuous record of the stack gas moisture content, in per cent H<sub>2</sub>O;
  - (e) A carbon dioxide monitoring system, consisting of a CO<sub>2</sub> pollutant concentration monitor (or an oxygen monitor plus suitable mathematical equations from which the CO<sub>2</sub> concentration is derived) and an automated data acquisition and handling system and providing a permanent, continuous record of CO<sub>2</sub> emissions, in per cent CO<sub>2</sub>; and

- (f) An oxygen monitoring system, consisting of an O<sub>2</sub> concentration monitor and an automated data acquisition and handling system and providing a permanent, continuous record of O<sub>2</sub>, in per cent O<sub>2</sub>.
- (57) "Control period" means:
- (a) For the purposes of the CAIR annual trading program, the period beginning January first of a calendar year, except as provided in paragraph (E)(3)(b) of this rule and ending on December thirty-first of the same year, inclusive.
  - (b) For the purposes of the CAIR ozone season trading program, the period beginning May first of a calendar year, except as provided in paragraph (E)(3)(b) of this rule and ending on September thirtieth of the same year, inclusive.
- (58) "Director" means the director of the Ohio environmental protection agency.
- (59) "Electricity for sale under a firm contract to the electric grid" means electricity for sale where the capacity involved is intended to be available at all times during the period covered by a guaranteed commitment to deliver, even under adverse conditions.
- (60) "Emissions" means air pollutants exhausted from a unit or source into the atmosphere, as measured, recorded, and reported to the administrator by the CAIR designated representative and as determined by the administrator in accordance with rule 3745-109-07, 3745-109-13, or 3745-109-20 of the Administrative Code.
- (61) "Energy efficiency/renewable energy project" means any project that, during the ozone season, reduces end-use demand for electricity, including demand-side management practices, or displace electrical energy utilization through the use of wind power, solar power, biomass or landfill methane generation.
- (62) "Excess emissions" means:
- (a) For any ton of NO<sub>x</sub> emitted by the CAIR NO<sub>x</sub> or NO<sub>x</sub> ozone season units at a CAIR NO<sub>x</sub> or NO<sub>x</sub> ozone season source during a control period that exceeds the CAIR NO<sub>x</sub> or NO<sub>x</sub> ozone season emissions limitation for the source;
  - (b) For any ton, or portion of a ton, of sulfur dioxide emitted by the CAIR SO<sub>2</sub> units at a CAIR SO<sub>2</sub> source during a control period that exceeds the CAIR SO<sub>2</sub> emissions limitation for the source, provided that any portion of a ton of excess emissions shall be treated as one ton of excess emissions.
- (63) "Fossil fuel" means natural gas, petroleum, coal, or any form of solid, liquid, or gaseous fuel derived from such material.

- (64) "Fossil-fuel-fired" means;
- (a) For a unit meeting the applicability requirements under paragraph (C)(1) of this rule (EGUs), with regard to a unit, combusting any amount of fossil fuel in any calendar year.
  - (b) For a unit meeting the applicability requirements under paragraph (C)(4) of this rule (non-EGUs), with regard to a unit:
    - (i) For units that commenced operation before January 1, 1996, the combustion of fossil fuel, alone or in combination with any other fuel, where fossil fuel actually combusted comprises more than fifty per cent of the annual heat input, on a Btu basis, during 1995, or, if a unit had no heat input in 1995, during the last year of operation of the unit prior to 1995;
    - (ii) For units that commenced operation on or after January 1, 1996 and before January 1, 1997, the combustion of fossil fuel, alone or in combination with any other fuel, where fossil fuel actually combusted comprises more than fifty per cent of the annual heat input, on a Btu basis, during 1996; or
    - (iii) For units that commence operation on or after January 1, 1997:
      - (a) The combustion of fossil fuel, alone or in combination with any other fuel, where fossil fuel actually combusted comprises more than fifty per cent of the annual heat input, on a Btu basis, during any year; or
      - (b) The combustion of fossil fuel, alone or in combination with any other fuel, where fossil fuel is projected to comprise more than fifty per cent of the annual heat input, on a Btu basis, during any year, provided that the unit shall be "fossil fuel-fired" as of the date, during such year, on which the unit begins combusting fossil fuel.
- (65) "Fuel oil" means any petroleum-based fuel (including diesel fuel or petroleum derivatives such as oil tar) and any recycled or blended petroleum products or petroleum by-products used as a fuel whether in a liquid, solid, or gaseous state.
- (66) "General account" means a CAIR NO<sub>x</sub>, SO<sub>2</sub>, or NO<sub>x</sub> ozone season allowance tracking system account, established under rule 3745-109-05, 3745-109-11, or 3745-109-18 of the Administrative Code, that is not a compliance account.
- (67) "Generator" means a device that produces electricity.
- (68) "Gross electrical output" means, with regard to a cogeneration unit, electricity made available for use, including any such electricity used in the power

production process (which process includes, but is not limited to, any on-site processing or treatment of fuel combusted at the unit and any on-site emission controls).

- (69) "H<sub>2</sub>O" means water.
- (70) "Heat input" means, with regard to a specified period of time, the product (in mmBtu per unit of time) of the gross calorific value of the fuel (in Btu per pound) divided by one million Btu per mmBtu and multiplied by the fuel feed rate into a combustion device (in pounds of fuel per unit time), as measured, recorded, and reported to the administrator by the CAIR designated representative and determined by the administrator in accordance with rule 3745-109-07, 3745-109-13, or 3745-109-20 of the Administrative Code and excluding the heat derived from preheated combustion air, recirculated flue gases, or exhaust from other sources.
- (71) "Heat input rate" means the amount of heat input (in mmBtu) divided by unit operating time (in hours) or, with regard to a specific fuel, the amount of heat input attributed to the fuel (in mmBtu) divided by the unit operating time (in hours) during which the unit combusts the fuel
- (72) "Hg" means mercury.
- (73) "Hg budget trading program" means a multi-state Hg air pollution control and emission reduction program approved and administered by the administrator accordance with Chapter 3745-108 of the Administrative Code, or established by the administrator under Section 111 of the Clean Air Act, as a means of reducing national Hg emissions.
- (74) "Innovative technology project" means any project utilizing technology that has not been adequately demonstrated in practice, but that would have a substantial likelihood of reducing NO<sub>x</sub> ozone season emissions compared to current practices. An innovative technology project could include technology to decrease electrical energy or fuel use either in stationary or mobile sources.
- (75) "kWh" means kilowatt hour.
- (76) "Life-of-the-unit, firm power contractual arrangement" means a unit participation power sales agreement under which a utility or industrial customer reserves, or is entitled to receive, a specified amount or percentage of nameplate capacity and associated energy generated by any specified unit and pays its proportional amount of such unit's total costs, pursuant to a contract:
- (a) For the life of the unit;
  - (b) For a cumulative term of no less than thirty years, including contracts that permit an election for early termination; or

- (c) For a period no less than twenty-five years or seventy per cent of the economic useful life of the unit determined as of the time the unit is built, with option rights to purchase or release some portion of the nameplate capacity and associated energy generated by the unit at the end of the period.
- (77) "Maximum design heat input" means the maximum amount of fuel per hour (in Btu per hour) that a unit is capable of combusting on a steady state basis as of the initial installation of the unit as specified by the manufacturer of the unit.
- (78) "MmBtu" means million British thermal units.
- (79) "Monitoring system" means any monitoring system that meets the requirements of rule 3745-109-07, 3745-109-13, or 3745-109-20 of the Administrative Code, including a continuous emissions monitoring system, an alternative monitoring system, or an excepted monitoring system under 40 CFR Part 75.
- (80) "Most stringent state or federal NO<sub>x</sub> or SO<sub>2</sub> emissions limitation" means, with regard to a unit, the lowest NO<sub>x</sub> or SO<sub>2</sub> emissions limitation (in terms of pounds per mmBtu) that is applicable to the unit under state or federal law, regardless of the averaging period to which the emissions limitation applies.
- (81) "MWe" means mega watt electrical.
- (82) "MWh" means megawatt-hour.
- (83) "Nameplate capacity" means, starting from the initial installation of a generator, the maximum electrical generating output (in MWe) that the generator is capable of producing on a steady state basis and during continuous operation (when not restricted by seasonal or other deratings) as of such installation as specified by the manufacturer of the generator or, starting from the completion of any subsequent physical change in the generator resulting in an increase in the maximum electrical generating output (in MWe) that the generator is capable of producing on a steady state basis and during continuous operation (when not restricted by seasonal or other deratings), such increased maximum amount as of such completion as specified by the person conducting the physical change.
- (84) "NO<sub>x</sub>" means all oxides of nitrogen which are determined to be ozone precursors, including, but not limited to, nitrogen oxide and nitrogen dioxide, but excluding nitrous oxide.
- (85) "Oil-fired" means, for purposes of rule 3745-109-04 or 3745-109-17 of the Administrative Code, combusting fuel oil for more than 15.0 per cent of the annual heat input in a specified year and not qualifying as coal-fired.
- (86) "Operator" means any person who operates, controls, or supervises a CAIR NO<sub>x</sub>, SO<sub>2</sub>, or NO<sub>x</sub> ozone season unit or a CAIR NO<sub>x</sub>, SO<sub>2</sub>, or NO<sub>x</sub> ozone

season source and shall include, but not be limited to, any holding company, utility system, or plant manager of such a unit or source.

(87) "Owner" means any of the following persons:

(a) With regard to a CAIR NO<sub>x</sub>, SO<sub>2</sub>, or NO<sub>x</sub> ozone season source or a CAIR NO<sub>x</sub>, SO<sub>2</sub>, or NO<sub>x</sub> ozone season unit at a source, respectively:

(i) Any holder of any portion of the legal or equitable title in a CAIR NO<sub>x</sub>, SO<sub>2</sub>, or NO<sub>x</sub> ozone season unit at the source or the CAIR NO<sub>x</sub>, SO<sub>2</sub>, or NO<sub>x</sub> ozone season unit;

(ii) Any holder of a leasehold interest in a CAIR NO<sub>x</sub>, SO<sub>2</sub>, or NO<sub>x</sub> ozone season unit at the source or the CAIR NO<sub>x</sub>, SO<sub>2</sub>, or NO<sub>x</sub> ozone season unit; or

(iii) Any purchaser of power from a CAIR NO<sub>x</sub>, SO<sub>2</sub>, or NO<sub>x</sub> ozone season unit at the source or the CAIR NO<sub>x</sub>, SO<sub>2</sub>, or NO<sub>x</sub> ozone season unit under a life-of-the-unit, firm power contractual arrangement; provided that, unless expressly provided for in a leasehold agreement, owner shall not include a passive lessor, or a person who has an equitable interest through such lessor, whose rental payments are not based (either directly or indirectly) on the revenues or income from such CAIR NO<sub>x</sub>, SO<sub>2</sub>, or NO<sub>x</sub> ozone season unit; or

(b) With regard to any general account, any person who has an ownership interest with respect to the CAIR NO<sub>x</sub>, SO<sub>2</sub>, or NO<sub>x</sub> ozone season allowances held in the general account and who is subject to the binding agreement for the CAIR authorized account representative to represent the person's ownership interest with respect to CAIR NO<sub>x</sub>, SO<sub>2</sub>, or NO<sub>x</sub> ozone season allowances.

(88) "Ozone season" means the period beginning May first of a calendar year and ending on September thirtieth of the same year, inclusive.

(89) "Permitting authority" means the state air pollution control agency, local agency, other state agency, or other agency authorized by the administrator to issue or revise permits to meet the requirements of the CAIR NO<sub>x</sub> annual, CAIR SO<sub>2</sub>, and CAIR NO<sub>x</sub> ozone season trading program or, if no such agency has been so authorized, the administrator.

(90) "Potential electrical output capacity" means thirty-three per cent of a unit's maximum design heat input, divided by three thousand four hundred thirteen Btu per kWh, divided by one thousand kWh per MWh, and multiplied by eight thousand seven hundred sixty hours per year.

(91) "Receive" or "receipt of" means, when referring to the permitting authority or the administrator, to come into possession of a document, information, or

correspondence (whether sent in hard copy or by authorized electronic transmission), as indicated in an official log, or by a notation made on the document, information, or correspondence, by the permitting authority or the administrator in the regular course of business.

- (92) "Recordation," "record," or "recorded" means, with regard to CAIR NO<sub>x</sub>, SO<sub>2</sub>, or NO<sub>x</sub> ozone season allowances, the movement of CAIR NO<sub>x</sub>, SO<sub>2</sub>, or NO<sub>x</sub> ozone season allowances by the administrator into or between CAIR NO<sub>x</sub>, SO<sub>2</sub>, or NO<sub>x</sub> ozone season allowance tracking system accounts, for purposes of allocation, transfer, or deduction.
- (93) "Reference method" means any direct test method of sampling and analyzing for an air pollutant as specified in 40 CFR 75.22.
- (94) "Replacement, replace, or replaced" means, with regard to a unit, the demolishing of a unit, or the permanent shutdown and permanent disabling of a unit, and the construction of another unit (the replacement unit) to be used instead of the demolished or shut down unit (the replaced unit).
- (95) "Repowered" means, with regard to a unit, replacement of a coal-fired boiler with one of the following coal-fired technologies at the same source as the coal-fired boiler:
- (a) Atmospheric or pressurized fluidized bed combustion;
  - (b) Integrated gasification combined cycle;
  - (c) Magnetohydrodynamics;
  - (d) Direct and indirect coal-fired turbines;
  - (e) Integrated gasification fuel cells; or
  - (f) As determined by the administrator, a derivative of one or more of the technologies under paragraphs (B)(95)(a) to (B)(95)(e) of this rule and any other coal-fired technology capable of controlling multiple combustion emissions simultaneously with improved boiler or generation efficiency and with significantly greater waste reduction relative to the performance of technology in widespread commercial use as of January 1, 2005.
- (96) "Serial number" means, for a CAIR NO<sub>x</sub>, SO<sub>2</sub>, or NO<sub>x</sub> ozone season allowance, the unique identification number assigned to each CAIR NO<sub>x</sub>, SO<sub>2</sub>, or NO<sub>x</sub> ozone season allowance by the administrator.
- (97) "Sequential use of energy" means:
- (a) For a topping-cycle cogeneration unit, the use of reject heat from electricity production in a useful thermal energy application or process; or

- (b) For a bottoming-cycle cogeneration unit, the use of reject heat from useful thermal energy application or process in electricity production.
- (98) "SO<sub>2</sub>" means sulfur dioxide.
- (99) "Solid waste incineration unit" means a stationary, fossil-fuel-fired boiler or stationary, fossil-fuel-fired combustion turbine that is a "solid waste incineration unit" as defined in Section 129(g)(1) of the Clean Air Act.
- (100) "Source" means all buildings, structures, or installations located in one or more contiguous or adjacent properties under common control of the same person or persons. For purposes of Section 502(c) of the Clean Air Act, a "source," including a "source" with multiple units, shall be considered a single "facility."
- (101) "State" means the State of Ohio, or, where the context indicates, any of the states or the District of Columbia that adopts the CAIR NO<sub>x</sub> annual, the SO<sub>2</sub>, or the NO<sub>x</sub> ozone season trading program pursuant to 40 CFR 51.123(o)(1) or 40 CFR 51.123(o)(2) or 40 CFR 51.124(o)(1) or 40 CFR 51.124(o)(2).
- (102) "Submit" or "serve" means to send or transmit a document, information, or correspondence to the person specified in accordance with the applicable regulation:
- (a) In person;
  - (b) By United States postal service; or
  - (c) By other means of dispatch or transmission and delivery.
- Compliance with any submission or service deadline shall be determined by the date of dispatch, transmission, or mailing and not the date of receipt.
- (103) "Title V operating permit" means a permit issued under Chapter 3745-77 of the Administrative Code.
- (104) "Title V operating permit regulations" means Chapters 3745-77 and 3745-78 of the Administrative Code.
- (105) "Ton" means two thousand pounds. For the purpose of determining compliance with the CAIR NO<sub>x</sub>, SO<sub>2</sub>, or NO<sub>x</sub> ozone season emissions limitation, total tons of NO<sub>x</sub>, SO<sub>2</sub>, or NO<sub>x</sub> ozone season emissions for a control period shall be calculated as the sum of all recorded hourly emissions (or the mass equivalent of the recorded hourly emission rates) in accordance with rule 3745-109-07, 3745-109-13, or 3745-109-20 of the Administrative Code, but with any remaining fraction of a ton equal to or greater than 0.50 tons deemed to equal one ton and any remaining fraction of a ton less than 0.50 tons deemed to equal zero tons.

- (106) "Topping-cycle cogeneration unit" means a cogeneration unit in which the energy input to the unit is first used to produce useful power, including electricity, and at least some of the reject heat from the electricity production is then used to provide useful thermal energy.
- (107) "Total energy input" means, with regard to a cogeneration unit, total energy of all forms supplied to the cogeneration unit, excluding energy produced by the cogeneration unit itself.

Each form of energy supplied shall be measured by the lower heating value of that form of energy calculated as follows:

$$\text{LHV} = \text{HHV} - 10.55(\text{W} + 9\text{H})$$

Where:

LHV = lower heating value of fuel in Btu per pound,

HHV = higher heating value of fuel in Btu per pound,

W = Weight per cent of moisture in fuel, and

H = Weight per cent of hydrogen in fuel.

- (108) "Total energy output" means, with regard to a cogeneration unit, the sum of useful power and useful thermal energy produced by the cogeneration unit.
- (109) "Unit" means;
- (a) For a unit meeting the applicability requirements under paragraph (C)(1) of this rule (EGUs), a stationary, fossil-fuel-fired boiler or combustion turbine or other stationary, fossil-fuel-fired combustion device.
  - (b) For a unit meeting the applicability requirements under paragraph (C)(4) of this rule (non-EGUs), a fossil fuel-fired stationary boiler, combustion turbine, or combined cycle system.
- (110) "Unit operating day" means a calendar day in which a unit combusts any fuel.
- (111) "Unit operating hour" or "hour of unit operation" means an hour in which a unit combusts any fuel.
- (112) "Useful power" means, with regard to a cogeneration unit, electricity or mechanical energy made available for use, excluding any such energy used in the power production process (which process includes, but is not limited to, any on-site processing or treatment of fuel combusted at the unit and any on-site emission controls).

(113) "Useful thermal energy" means, with regard to a cogeneration unit, thermal energy that is:

- (a) Made available to an industrial or commercial process (not a power production process), excluding any heat contained in condensate return or makeup water;
- (b) Used in a heating application (e.g., space heating or domestic hot water heating); or
- (c) Used in a space cooling application (i.e., thermal energy used by an absorption chiller).

(114) "USEPA" means the United State environmental protection agency.

(115) "Utility power distribution system" means the portion of an electricity grid owned or operated by a utility and dedicated to delivering electricity to customers.

(C) Applicability.

The following units in the state shall be CAIR NO<sub>x</sub>, SO<sub>2</sub>, and NO<sub>x</sub> ozone season units, and any source that includes one or more such units shall be a CAIR NO<sub>x</sub>, SO<sub>2</sub>, and NO<sub>x</sub> ozone season source, subject to the requirements of this rule and rules 3745-109-02 to 3745-109-07, 3745-109-09 to 3745-109-13, and 3745-109-15 to 3745-109-20, respectively, of the Administrative Code.

- (1) Except as provided in paragraphs (C)(3) and (C)(5) of this rule, any stationary, fossil-fuel-fired boiler or stationary, fossil-fuel fired combustion turbine serving at any time, since the later of November 15, 1990 or the start-up of a unit's combustion chamber, a generator with nameplate capacity of more than twenty-five MWe producing electricity for sale (EGUs).
- (2) If a stationary boiler or stationary combustion turbine that, under paragraph (C)(1) of this rule, is not a CAIR NO<sub>x</sub>, CAIR SO<sub>2</sub>, and CAIR NO<sub>x</sub> ozone season unit begins to combust fossil fuel or to serve a generator with nameplate capacity of more than twenty-five MWe producing electricity for sale, the unit shall become a CAIR NO<sub>x</sub>, CAIR SO<sub>2</sub>, and CAIR NO<sub>x</sub> ozone season unit as provided in paragraph (C)(1) of this rule on the first date on which it both combusts fossil fuel and serves such generator.

The units in the state that meet the requirements set forth in paragraph (C)(3) or (C)(5) of this rule shall not be CAIR NO<sub>x</sub>, SO<sub>2</sub> or NO<sub>x</sub> ozone season units.

- (3) Any unit that is a CAIR NO<sub>x</sub>, SO<sub>2</sub>, and NO<sub>x</sub> ozone season unit under paragraph (C)(1) or (C)(2) of this rule:

- (a) Qualifying as a cogeneration unit during the twelve-month period starting on the date the unit first produces electricity and continuing to qualify as a cogeneration unit; and
  - (b) Not serving at any time, since the later of November 15, 1990 or the start-up of the unit's combustion chamber, a generator with nameplate capacity of more than twenty-five MWe and supplying in any calendar year more than one-third of the unit's potential electric output capacity or two hundred nineteen thousand MWh, whichever is greater, to any utility power distribution system for sale.
  - (c) If a unit qualifies as a cogeneration unit during the twelve-month period starting on the date the unit first produces electricity and meets the requirements of paragraphs (C)(3)(a) and (C)(3)(b) of this rule for at least one calendar year, but subsequently no longer meets all such requirements, the unit shall become CAIR NO<sub>x</sub>, SO<sub>2</sub>, and NO<sub>x</sub> ozone season unit under paragraph (C)(1) of this rule starting on the earlier of January first after the first calendar year during which the unit first no longer qualifies as a cogeneration unit or January first after the first calendar year during which the unit no longer meets the requirements of paragraph (C)(3)(b) of this rule.
- (4) The following units that are subject to the applicability requirements of the NO<sub>x</sub> SIP call in paragraph (C) of rule 3745-14-01 of the Administrative Code and that are not CAIR NO<sub>x</sub> ozone season units under paragraphs (C)(1) and (C)(2) of this rule (non-EGUs) shall be subject to the requirements of this rule and rules 3745-109-15 to 3745-109-20 of the Administrative Code (non-EGUs):
- (a) For units, other than cogeneration units:
    - (i) For units commencing operation before January 1, 1997, a unit that has a maximum design heat input greater than two hundred fifty mmBtu per hour and that did not serve during 1995 or 1996 a generator producing electricity for sale under a firm contract to the electric grid;
    - (ii) For units commencing operation before January 1, 1997, a unit serving during 1995 or 1996 a generator that had a nameplate capacity greater than twenty-five MWe and produced electricity for sale under a firm contract to the electric grid;
    - (iii) For units commencing operation on or after January 1, 1997 and before January 1, 1999, a unit that has a maximum design heat input greater than two hundred fifty mmBtu per hour and that did not serve during 1997 or 1998 a generator producing electricity for sale under a firm contract to the electric grid;
    - (iv) For units commencing operation on or after January 1, 1997 and before January 1, 1999, a unit serving during 1997 or 1998 a generator that

had a nameplate capacity greater than twenty-five MWe and produced electricity for sale under a firm contract to the electric grid;

(v) For units commencing operation on or after January 1, 1999, a unit with a maximum design heat input greater than two hundred fifty mmBtu per hour that:

(a) At no time serves a generator producing electricity for sale; or

(b) At any time serves a generator producing electricity for sale, if any such generator has a nameplate capacity of twenty-five MWe or less and has the potential to use no more than fifty per cent of the potential electrical output capacity of the unit;

(vi) For units commencing operation on or after January 1, 1999, a unit serving at any time a generator that has a nameplate capacity greater than twenty-five MWe and produces electricity for sale.

(b) For cogeneration units:

(i) For units commencing operation before January 1, 1997, a unit with a maximum design heat input greater than two hundred fifty mmBtu per hour and qualifying as an unaffected unit under 40 CFR 72.6(b)(4) under the "Acid Rain Program" for 1995 and 1996;

(ii) For units commencing operation before January 1, 1997, a unit serving during 1995 or 1996 a generator with a nameplate capacity greater than twenty-five MWe and failing to qualify as an unaffected unit under 40 CFR 72.6(b)(4) for 1995 or 1996 under the "Acid Rain Program;"

(iii) For units commencing operation in 1997 or 1998, a unit with a maximum design heat input greater than two hundred fifty mmBtu per hour and qualifying as an unaffected unit under 40 CFR 72.6(b)(4) under the "Acid Rain Program" for 1997 and 1998;

(iv) For units commencing operation in 1997 or 1998, a unit serving during 1997 or 1998 a generator with a nameplate capacity greater than twenty-five MWe and failing to qualify as an unaffected unit under 40 CFR 72.6(b)(4) for 1997 or 1998 under the "Acid Rain Program;"

(v) For units commencing on or after January 1, 1999, a unit with a maximum design heat input greater than two hundred fifty mmBtu per hour and qualifying as an unaffected unit under 40 CFR 72.6(b)(4) under the "Acid Rain Program" for each year;

(vi) For units commencing operation on or after January 1, 1999, a unit serving at any time a generator with a nameplate capacity greater than

twenty-five MWe and failing to qualify as an unaffected unit under 40 CFR 72.6(b)(4) under the "Acid Rain Program" for any year.

(5) Any unit that is a CAIR NO<sub>x</sub>, SO<sub>2</sub>, and NO<sub>x</sub> ozone season unit under paragraph (C)(1) or (C)(2) of this rule that:

(a) Commences operation before January 1, 1985 and qualifies as a solid waste incineration unit; and

(i) With an average annual fuel consumption of non-fossil fuel for 1985-1987 exceeding eighty per cent (on a Btu basis) and an average annual fuel consumption of non-fossil fuel for any three consecutive calendar years after 1990 exceeding eighty per cent (on a Btu basis).

(b) Commences operation after January 1, 1985 and qualifies as a solid waste incineration unit; and

(i) With an average annual fuel consumption of non-fossil fuel for the first three calendar years of operation exceeding eighty per cent (on a Btu basis) and an average annual fuel consumption of non-fossil fuel for any three consecutive calendar years after 1990 exceeding eighty per cent (on a Btu basis).

(c) If a unit qualifies as a solid waste incineration unit and meets the requirements of paragraph (C)(5)(a) or (C)(5)(b) of this rule for at least three consecutive calendar years, but subsequently no longer meets all such requirements, the unit shall become a CAIR NO<sub>x</sub>, SO<sub>2</sub>, and CAIR NO<sub>x</sub> ozone season unit starting on the earlier of January first after the first calendar year during which the unit first no longer qualifies as a solid waste incineration unit or January first after the first three consecutive calendar years after 1990 for which the unit has an average annual fuel consumption of fossil fuel of twenty per cent or more.

(D) Retired unit exemption.

(1) This paragraph applies to any CAIR NO<sub>x</sub>, SO<sub>2</sub>, or NO<sub>x</sub> ozone season unit, other than a CAIR NO<sub>x</sub>, SO<sub>2</sub>, or NO<sub>x</sub> ozone season opt-in unit, that is permanently retired.

(a) Any CAIR NO<sub>x</sub>, SO<sub>2</sub>, or NO<sub>x</sub> ozone season unit that is permanently retired and is not a CAIR NO<sub>x</sub>, SO<sub>2</sub>, or NO<sub>x</sub> ozone season opt-in unit under rule 3745-109-08, 3745-109-14, or 3745-109-21 of the Administrative Code shall be exempt from the CAIR NO<sub>x</sub> annual, the SO<sub>2</sub>, or the NO<sub>x</sub> ozone season trading program, except for the provisions of paragraphs (B), (C), (D), (E)(3)(d) to (E)(3)(g), (F) and (G) of this rule and rules 3745-109-02, 3745-109-04 to 3745-109-06, 3745-109-09, 3745-109-11, 3745-109-12, 3745-109-15 and 3745-109-17 to 3745-109-19 of the Administrative Code, respectively.

- (b) The exemption under paragraph (D)(1)(a) of this rule shall become effective the day on which the CAIR NO<sub>x</sub>, SO<sub>2</sub>, or NO<sub>x</sub> ozone season unit is permanently retired. Within thirty days of the unit's permanent retirement, the CAIR designated representative shall submit a statement to the director otherwise responsible for administering any CAIR permit for the unit and shall submit a copy of the statement to the administrator. The statement shall state, in a format prescribed by the director, that the unit was permanently retired on a specific date and shall comply with the requirements of paragraph (D)(2) of this rule.
- (c) After receipt of the statement under paragraph (D)(1)(b) of this rule, the director shall amend any permit under rule 3745-109-03, 3745-109-10, or 3745-109-16 of the Administrative Code covering the source at which the unit is located to add the provisions and requirements of the exemption under paragraphs (D)(1)(a) and (D)(1)(b) of this rule.

(2) Special provisions.

- (a) A unit exempt under paragraph (D)(1) of this rule shall not emit any NO<sub>x</sub> or SO<sub>2</sub> starting on the date that the exemption takes effect.
- (b) The director shall allocate CAIR NO<sub>x</sub> or NO<sub>x</sub> ozone season allowances under rule 3745-109-04 or 3745-109-17 of the Administrative Code to a unit exempt under paragraph (D)(1) of this rule.
- (c) For a period of five years from the date the records are created, the owners and operators of a unit exempt under paragraph (D)(1) of this rule shall retain, at the source that includes the unit, records demonstrating that the unit is permanently retired. The five-year period for keeping records may be extended for cause, at any time before the end of the period, in writing by the director or the administrator. The owners and operators bear the burden of proof that the unit is permanently retired.
- (d) The owners and operators and, to the extent applicable, the CAIR designated representative of a unit exempt under paragraph (D)(1) of this rule shall comply with the requirements of the CAIR NO<sub>x</sub> annual, SO<sub>2</sub>, or NO<sub>x</sub> ozone season trading program concerning all periods for which the exemption is not in effect, even if such requirements arise, or must be complied with, after the exemption takes effect.
- (e) A unit exempt under paragraph (D)(1) of this rule and located at a source that is required, or but for this exemption would be required, to have a Title V operating permit shall not resume operation unless the CAIR designated representative of the source submits a complete CAIR permit application under paragraph (C) of rule 3745-109-03 of the Administrative Code or rule 3745-109-16 of the Administrative Code for the unit not less than eighteen

months (or such lesser time provided by the director) before the later of January 1, 2009 or the date on which the unit resumes operation.

- (f) A unit exempt under paragraph (D)(1) of this rule and located at a source that is required, or but for this exemption would be required, to have a Title V operating permit shall not resume operation unless the CAIR designated representative of the source submits a complete CAIR permit application under paragraph (C) of rule 3745-109-10 of the Administrative Code for the unit not less than eighteen months (or such lesser time provided by the director) before the later of January 1, 2010 or the date on which the unit resumes operation.
- (g) On the earlier of the following dates, a unit exempt under paragraph (D)(1) of this rule shall lose its exemption:
  - (i) The date on which the CAIR designated representative submits a CAIR permit application for the unit under paragraph (D)(2)(e) or (D)(2)(f) of this rule;
  - (ii) The date on which the CAIR designated representative is required under paragraph (D)(2)(e) or (D)(2)(f) of this rule to submit a CAIR permit application for the unit; or
  - (iii) The date on which the unit resumes operation, if the CAIR designated representative is not required to submit a CAIR permit application for the unit.
- (h) For the purpose of applying monitoring, reporting, and record keeping requirements under rule 3745-109-07, 3745-109-13, or 3745-109-20 of the Administrative Code, a unit that loses its exemption under paragraph (D)(1) of this rule shall be treated as a unit that commences commercial operation on the first date on which the unit resumes operation.

(E) Standard requirements.

(1) Permit Requirements.

- (a) The CAIR designated representative of each CAIR NO<sub>x</sub>, SO<sub>2</sub>, or NO<sub>x</sub> ozone season source required to have a Title V operating permit and each CAIR NO<sub>x</sub>, SO<sub>2</sub>, or NO<sub>x</sub> ozone season unit required to have a Title V operating permit at the source shall:
  - (i) Submit to the director a complete CAIR permit application under paragraph (C) of rule 3745-109-03 of the Administrative Code, rule 3745-109-10 of the Administrative Code, or rule 3745-109-16 of the Administrative Code in accordance with the deadlines specified in rule 3745-109-03 of the Administrative Code, rule 3745-109-10 of the

Administrative Code, or rule 3745-109-16 of the Administrative Code;  
and

- (ii) Submit in a timely manner any supplemental information that the director determines is necessary in order to review a CAIR permit application and issue or deny a CAIR permit.
- (b) The owners and operators of each CAIR NO<sub>x</sub>, SO<sub>2</sub>, or NO<sub>x</sub> ozone season source required to have a Title V operating permit and each CAIR NO<sub>x</sub>, SO<sub>2</sub>, or NO<sub>x</sub> ozone season unit required to have a Title V operating permit at the source shall have a CAIR permit issued by the director under rule 3745-109-03, 3745-109-10, or 3745-109-16 of the Administrative Code for the source and operate the source and the unit in compliance with such CAIR permit.
  - (c) Except as provided in rule 3745-109-08, 3745-109-14, or 3745-109-21 of the Administrative Code, the owners and operators of a CAIR NO<sub>x</sub>, SO<sub>2</sub>, or NO<sub>x</sub> ozone season source that is not otherwise required to have a Title V operating permit and each CAIR NO<sub>x</sub>, SO<sub>2</sub>, or NO<sub>x</sub> ozone season unit that is not otherwise required to have a Title V operating permit are not required to submit a CAIR permit application, and to have a CAIR permit, under rule 3745-109-03, 3745-109-10, or 3745-109-16 of the Administrative Code for such CAIR NO<sub>x</sub>, SO<sub>2</sub>, or NO<sub>x</sub> ozone season source and such CAIR NO<sub>x</sub>, SO<sub>2</sub>, or NO<sub>x</sub> ozone season unit.
- (2) Monitoring, reporting, and record keeping requirements.
- (a) The owners and operators, and the CAIR designated representative, of each CAIR NO<sub>x</sub>, SO<sub>2</sub>, or NO<sub>x</sub> ozone season source and each CAIR NO<sub>x</sub>, SO<sub>2</sub>, or NO<sub>x</sub> ozone season unit at the source shall comply with the monitoring, reporting, and record keeping requirements of rule 3745-109-07, 3745-109-13, or 3745-109-20 of the Administrative Code.
  - (b) The emissions measurements recorded and reported in accordance with rule 3745-109-07, 3745-109-13, or 3745-109-20 of the Administrative Code shall be used to determine compliance by each CAIR NO<sub>x</sub>, SO<sub>2</sub>, or NO<sub>x</sub> ozone season source with the CAIR NO<sub>x</sub>, SO<sub>2</sub>, or NO<sub>x</sub> ozone season emissions limitation under paragraph (E)(3) of this rule.
- (3) NO<sub>x</sub>, SO<sub>2</sub>, or NO<sub>x</sub> ozone season emission requirements.
- (a) As of the allowance transfer deadline for a control period, the owners and operators of each CAIR NO<sub>x</sub> or NO<sub>x</sub> ozone season source and each CAIR NO<sub>x</sub> or NO<sub>x</sub> ozone season unit at the source shall hold, in the source's compliance account, CAIR NO<sub>x</sub> or NO<sub>x</sub> ozone season allowances available for compliance deductions for the control period under paragraph (D)(1) of rule 3745-109-05 of the Administrative Code or rule 3745-109-18 of the Administrative Code in an amount not less than the tons of total NO<sub>x</sub>

emissions for the control period from all CAIR NO<sub>x</sub> or NO<sub>x</sub> ozone season units at the source, as determined in accordance with rule 3745-109-07 or rule 3745-109-20 of the Administrative Code.

As of the allowance transfer deadline for a control period, the owners and operators of each CAIR SO<sub>2</sub> source and each CAIR SO<sub>2</sub> unit at the source shall hold, in the source's compliance account, a tonnage equivalent in CAIR SO<sub>2</sub> allowances available for compliance deductions for the control period, as determined in accordance with paragraphs (D)(1) and (D)(2) of rule 3745-109-11 of the Administrative Code, not less than the tons of total SO<sub>2</sub> emissions for the control period from all CAIR SO<sub>2</sub> units at the source, as determined in accordance with rule 3745-109-13 of the Administrative Code.

- (b) A CAIR NO<sub>x</sub> unit shall be subject to the requirements under paragraph (E)(3)(a) of this rule for the control period starting on the later of January 1, 2009 or the deadline for meeting the unit's monitor certification requirements under paragraph (A)(2)(a), (A)(2)(b) or (A)(2)(e) of rule 3745-109-07 of the Administrative Code and for each control period thereafter.

A CAIR SO<sub>2</sub> unit shall be subject to the requirements under paragraph (E)(3)(a) of this rule for the control period starting on the later of January 1, 2010 or the deadline for meeting the unit's monitor certification requirements under paragraph (A)(2)(a), (A)(2)(b) or (A)(2)(e) of rule 3745-109-13 of the Administrative Code and for each control period thereafter.

A CAIR NO<sub>x</sub> ozone season unit shall be subject to the requirements under paragraph (E)(3)(a) of this rule for the control period starting on the later of May 1, 2009 or the deadline for meeting the unit's monitor certification requirements under paragraph (A)(2)(a), (A)(2)(b), (A)(2)(c) or (A)(2)(g) of rule 3745-109-20 of the Administrative Code and for each control period thereafter.

- (c) A CAIR NO<sub>x</sub>, SO<sub>2</sub>, or NO<sub>x</sub> ozone season allowance shall not be deducted, for compliance with the requirements under paragraph (E)(3)(a) of this rule, for a control period in a calendar year before the year for which the CAIR NO<sub>x</sub>, SO<sub>2</sub>, or NO<sub>x</sub> ozone season allowance was allocated.
- (d) CAIR NO<sub>x</sub>, SO<sub>2</sub>, or NO<sub>x</sub> ozone season allowances shall be held in, deducted from, or transferred into or among CAIR NO<sub>x</sub>, SO<sub>2</sub>, or NO<sub>x</sub> ozone season allowance tracking system accounts in accordance with rule 3745-109-04, 3745-109-05, 3745-109-06, 3745-109-08, 3745-109-11, 3745-109-12, 3745-109-14, 3745-109-17, 3745-109-18, 3745-109-19, or 3745-109-21 of the Administrative Code.
- (e) A CAIR NO<sub>x</sub> or NO<sub>x</sub> ozone season allowance is a limited authorization to emit one ton of NO<sub>x</sub> in accordance with the CAIR NO<sub>x</sub> annual or ozone season trading program. No provision of the CAIR NO<sub>x</sub> annual or ozone

season trading program, the CAIR permit application, the CAIR permit, or an exemption under paragraph (D) of this rule and no provision of law shall be construed to limit the authority of the United States or the state of Ohio to terminate or limit such authorization.

A CAIR SO<sub>2</sub> allowance is a limited authorization to emit SO<sub>2</sub> in accordance with the CAIR SO<sub>2</sub> trading program. No provision of the CAIR SO<sub>2</sub> trading program, the CAIR permit application, the CAIR permit, or an exemption under paragraph (D) of this rule and no provision of law shall be construed to limit the authority of the United States or the state of Ohio to terminate or limit such authorization.

- (f) A CAIR NO<sub>x</sub>, SO<sub>2</sub>, or NO<sub>x</sub> ozone season allowance does not constitute a property right.
- (g) Upon recordation by the administrator under rules 3745-109-05, 3745-109-06, or 3745-109-08 of the Administrative Code, every allocation, transfer, or deduction of a CAIR NO<sub>x</sub> allowance to or from a CAIR NO<sub>x</sub> source's compliance account is incorporated automatically in any CAIR permit of the source.

Upon recordation by the administrator under rule 3745-109-11, 3745-109-12 or 3745-109-14 of the Administrative Code, every allocation, transfer, or deduction of a CAIR SO<sub>2</sub> allowance to or from a CAIR SO<sub>2</sub> source's compliance account is incorporated automatically in any CAIR permit of the source.

Upon recordation by the administrator under rules 3745-109-18, 3745-109-19 and 3745-109-21 of the Administrative Code, every allocation, transfer, or deduction of a CAIR NO<sub>x</sub> ozone season allowance to or from a CAIR NO<sub>x</sub> ozone season sources compliance account is incorporated automatically in any CAIR permit of the source.

(4) Excess emissions requirements.

- (a) If a CAIR NO<sub>x</sub>, SO<sub>2</sub>, or NO<sub>x</sub> ozone season source emits NO<sub>x</sub> or SO<sub>2</sub> during any control period in excess of the CAIR NO<sub>x</sub>, SO<sub>2</sub>, or NO<sub>x</sub> ozone season emissions limitation, then:
  - (i) The owners and operators of the source and each CAIR NO<sub>x</sub> or NO<sub>x</sub> ozone season unit at the source shall surrender the CAIR NO<sub>x</sub> or NO<sub>x</sub> ozone season allowances required for deduction under paragraph (D)(4)(a) of rule 3745-109-05 of the Administrative Code or rule 3745-109-18 of the Administrative Code and pay any fine, penalty, or assessment or comply with any other remedy imposed, for the same violations, under the Clean Air Act or applicable state law;

The owners and operators of the source and each CAIR SO<sub>2</sub> unit at the source shall surrender the CAIR SO<sub>2</sub> allowances required for deduction under paragraph (D)(4)(a) of rule 3745-109-11 of the Administrative Code and pay any fine, penalty, or assessment or comply with any other remedy imposed, for the same violations, under the Clean Air Act or applicable state law; and

- (ii) Each ton of such excess emissions and each day of such control period shall constitute a separate violation of this rule, the Clean Air Act, and applicable state law.

(5) Record keeping and reporting requirements.

- (a) Unless otherwise provided, the owners and operators of the CAIR NO<sub>x</sub>, SO<sub>2</sub>, or NO<sub>x</sub> ozone season source and each CAIR NO<sub>x</sub>, SO<sub>2</sub>, or NO<sub>x</sub> ozone season unit at the source shall keep on site at the source each of the following documents for a period of five years from the date the document is created. This period may be extended for cause, at any time before the end of five years, in writing by the director or the administrator.

- (i) The certificate of representation under paragraph (D) of rule 3745-109-02 of the Administrative Code, rule 3745-109-09 of the Administrative Code, or rule 3745-109-15 of the Administrative Code for the CAIR designated representative for the source and each CAIR NO<sub>x</sub>, SO<sub>2</sub>, or NO<sub>x</sub> ozone season unit at the source and all documents that demonstrate the truth of the statements in the certificate of representation; provided that the certificate and documents shall be retained on site at the source beyond such five-year period until such documents are superseded because of the submission of a new certificate of representation under paragraph (D) of rule 3745-109-02 of the Administrative Code, rule 3745-109-09 of the Administrative Code, or rule 3745-109-15 of the Administrative Code changing the CAIR designated representative.

- (ii) All emissions monitoring information, in accordance with rule 3745-109-07, 3745-109-13, or 3745-109-20 of the Administrative Code, provided that to the extent that rule 3745-109-07, 3745-109-13, or 3745-109-20 of the Administrative Code provides for a three-year period for record keeping, the three-year period shall apply.

- (iii) Copies of all reports, compliance certifications, and other submissions and all records made or required under the CAIR NO<sub>x</sub> annual, SO<sub>2</sub>, or NO<sub>x</sub> ozone season trading program.

- (iv) Copies of all documents used to complete a CAIR permit application and any other submission under the CAIR NO<sub>x</sub> annual, SO<sub>2</sub>, or NO<sub>x</sub> ozone season trading program or to demonstrate compliance with the

requirements of the CAIR NO<sub>x</sub> annual, SO<sub>2</sub>, or NO<sub>x</sub> ozone season trading program.

- (b) The CAIR designated representative of a CAIR NO<sub>x</sub>, SO<sub>2</sub>, or NO<sub>x</sub> ozone season source and each CAIR NO<sub>x</sub>, SO<sub>2</sub>, or NO<sub>x</sub> ozone season unit at the source shall submit the reports required under the CAIR NO<sub>x</sub> annual, SO<sub>2</sub>, or NO<sub>x</sub> ozone season trading program, including those under rule 3745-109-07, 3745-109-13, or 3745-109-20 of the Administrative Code.

(6) Liability.

- (a) Each CAIR NO<sub>x</sub>, SO<sub>2</sub>, or NO<sub>x</sub> ozone season source and each CAIR NO<sub>x</sub>, SO<sub>2</sub>, or NO<sub>x</sub> ozone season unit shall meet the requirements of the CAIR NO<sub>x</sub> annual, SO<sub>2</sub>, or NO<sub>x</sub> ozone season trading program.
- (b) Any provision of the CAIR NO<sub>x</sub> annual, SO<sub>2</sub>, or NO<sub>x</sub> ozone season trading program that applies to a CAIR NO<sub>x</sub>, SO<sub>2</sub>, or NO<sub>x</sub> ozone season source or the CAIR designated representative of a CAIR NO<sub>x</sub>, SO<sub>2</sub>, or NO<sub>x</sub> ozone season source shall also apply to the owners and operators of such source and of the CAIR NO<sub>x</sub>, SO<sub>2</sub>, or NO<sub>x</sub> ozone season units at the source.
- (c) Any provision of the CAIR NO<sub>x</sub> annual, SO<sub>2</sub>, or NO<sub>x</sub> ozone season trading program that applies to a CAIR NO<sub>x</sub>, SO<sub>2</sub>, or NO<sub>x</sub> ozone season unit or the CAIR designated representative of a CAIR NO<sub>x</sub>, SO<sub>2</sub>, or NO<sub>x</sub> ozone season unit shall also apply to the owners and operators of such unit.

- (7) Effect on other authorities. No provision of the CAIR NO<sub>x</sub> annual, SO<sub>2</sub>, or NO<sub>x</sub> ozone season trading program, a CAIR permit application, a CAIR permit, or an exemption under paragraph (D) of this rule shall be construed as exempting or excluding the owners and operators, and the CAIR designated representative, of a CAIR NO<sub>x</sub>, SO<sub>2</sub>, or NO<sub>x</sub> ozone season source or CAIR NO<sub>x</sub>, SO<sub>2</sub>, or NO<sub>x</sub> ozone season unit from compliance with any other provision of the applicable, approved state implementation plan, a federally enforceable permit, or the Clean Air Act.

(F) Computation of time.

- (1) Unless otherwise stated, any time period scheduled, under the CAIR NO<sub>x</sub> annual, SO<sub>2</sub>, or NO<sub>x</sub> ozone season trading program, to begin on the occurrence of an act or event shall begin on the day the act or event occurs.
- (2) Unless otherwise stated, any time period scheduled, under the CAIR NO<sub>x</sub> annual, SO<sub>2</sub>, or NO<sub>x</sub> ozone season trading program, to begin before the occurrence of an act or event shall be computed so that the period ends the day before the act or event occurs.
- (3) Unless otherwise stated, if the final day of any time period, under the CAIR NO<sub>x</sub> annual, SO<sub>2</sub>, or NO<sub>x</sub> ozone season trading program, falls on a weekend or a

state or federal holiday, the time period shall be extended to the next business day.

(G) Appeal procedures.

- (1) The appeal procedures for decisions of the administrator under the CAIR NO<sub>x</sub> annual, SO<sub>2</sub> and CAIR NO<sub>x</sub> ozone season trading programs are set forth in 40 CFR Part 78.
- (2) Final decisions of the director made pursuant to these rules may be appealed to the environmental review appeals commission pursuant to section 3745.04 of the Revised Code. Environmental review appeals commission appeal procedures are set forth in agency 3746 of the Administrative Code.

(H) Incorporation by reference. This chapter includes references to certain matter or materials. The text of the incorporated materials is not included in the regulations contained in this chapter. The materials are hereby made a part of the regulations in this chapter. For materials subject to change, only the specific version specified in the regulation are incorporated. Material is incorporated as it exists on the effective date of this rule. Except for subsequent annual publication of existing (unmodified) Code of Federal Regulation compilations, any amendment or revision to a referenced document is not incorporated unless and until this rule has been amended to specify the new dates.

(1) Availability. The materials incorporated by reference are available as follows:

- (a) Clean Air Act as defined in this rule. Information and copies may be obtained by writing to: "Superintendent of Documents, Attn: New Orders, PO Box 371954, Pittsburgh, PA 15250-7954." The full text of the Act as amended in 1990 is also available in electronic format at [www.epa.gov/oar/caa/](http://www.epa.gov/oar/caa/). A copy of the Act is also available for inspection and copying at most public libraries and "The State Library of Ohio."
- (b) Code of Federal Regulations. Information and copies may be obtained by writing to: "Superintendent of Documents, Attn: New Orders, PO Box 371954, Pittsburgh, PA 15250-7954." The full text of the CFR is also available in electronic format at [www.access.gpo.gov/nara/cfr/](http://www.access.gpo.gov/nara/cfr/). The CFR compilations are also available for inspection and copying at most Ohio public libraries and "The State Library of Ohio."
- (c) Federal Register. Information and copies may be obtained by writing to: "Superintendent of Documents, Attn: New Orders, PO Box 371954, Pittsburgh, PA 15250-7954." Text of the Federal Register is also available in electronic format at [www.gpoaccess.gov/fr/index.html](http://www.gpoaccess.gov/fr/index.html). The Federal Register is also available for inspection and copying at most Ohio public libraries and "The State Library of Ohio."

- (d) United States Code. Information and copies may be obtained by writing to: "Superintendent of Documents, Attn: New Orders, PO Box 371954, Pittsburgh, PA 15250-7954." The full text of the United States Code is also available in electronic format at <http://www4.law.cornell.edu/uscode/>. The CFR compilations are also available for inspection and copying at most public libraries and "The State Library of Ohio."

(2) Incorporated materials.

- (a) 40 CFR 51.121; Findings and requirements for submission of State implementation plan revisions relating to emissions of oxides of nitrogen;" 63 FR 57491, Oct. 27, 1998, as amended at 63 FR 71225, Dec. 24, 1998; 64 FR 26305, May 14, 1999; 65 FR 11230, Mar. 2, 2000; 65 FR 56251, Sept. 18, 2000; 69 FR 21642, Apr. 21, 2004; 70 FR 25317, May 12, 2005; 70 FR 51597, Aug. 31, 2005, 73 FR 21538, Apr. 22, 2008.

Prior Effective Dates: 09/27/2007

[Comment: For dates of non-regulatory government publications, publications of recognized organizations and associations, federal rules, and federal statutory provisions referenced in this rule, see the last paragraph of rule 3745-109-01 of the Administrative Code titled "Incorporation by reference."]

(A) Authorization and responsibilities of CAIR designated representative.

- (1) Except as provided under paragraph (B) of this rule, each CAIR NO<sub>x</sub> source, including all CAIR NO<sub>x</sub> units at the source, shall have one and only one CAIR designated representative, with regard to all matters under the CAIR NO<sub>x</sub> annual trading program concerning the source or any CAIR NO<sub>x</sub> unit at the source.
- (2) The CAIR designated representative of the CAIR NO<sub>x</sub> source shall be selected by an agreement binding on the owners and operators of the source and all CAIR NO<sub>x</sub> units at the source and shall act in accordance with the certification statement in paragraph (D)(1)(d)(iv) of this rule.
- (3) Upon receipt by the administrator of a complete certificate of representation under paragraph (D) of this rule, the CAIR designated representative of the source shall represent and, by his or her representations, actions, inactions, or submissions, legally bind each owner and operator of the CAIR NO<sub>x</sub> source represented and each CAIR NO<sub>x</sub> unit at the source in all matters pertaining to the CAIR NO<sub>x</sub> annual trading program, notwithstanding any agreement between the CAIR designated representative and such owners and operators. The owners and operators shall be bound by any decision or order issued to the CAIR designated representative by the director, the administrator, or a court regarding the source or unit.
- (4) No CAIR permit will be issued, no emissions data reports will be accepted, and no CAIR NO<sub>x</sub> allowance tracking system account will be established for a CAIR NO<sub>x</sub> unit at a source, until the administrator has received a complete certificate of representation under paragraph (D) of this rule for a CAIR designated representative of the source and the CAIR NO<sub>x</sub> units at the source.
- (5) CAIR NO<sub>x</sub> annual trading program submissions.
  - (a) Each submission under the CAIR NO<sub>x</sub> annual trading program shall be submitted, signed, and certified by the CAIR designated representative for each CAIR NO<sub>x</sub> source on behalf of which the submission is made. Each such submission shall include the following certification statement by the CAIR designated representative: "I am authorized to make this submission on behalf of the owners and operators of the source or units for which the

submission is made. I certify under penalty of law that I have personally examined, and am familiar with, the statements and information submitted in this document and all its attachments. Based on my inquiry of those individuals with primary responsibility for obtaining the information, I certify that the statements and information are to the best of my knowledge and belief true, accurate, and complete. I am aware that there are significant penalties for submitting false statements and information or omitting required statements and information, including the possibility of fine or imprisonment."

- (b) The director and the administrator shall accept or act on a submission made on behalf of owner or operators of a CAIR NOx source or a CAIR NOx unit only if the submission has been made, signed, and certified in accordance with paragraph (A)(5)(a) of this rule.

(B) Alternate CAIR designated representative.

- (1) A certificate of representation under paragraph (D) of this rule may designate one and only one alternate CAIR designated representative, who may act on behalf of the CAIR designated representative. The agreement by which the alternate CAIR designated representative is selected shall include a procedure for authorizing the alternate CAIR designated representative to act in lieu of the CAIR designated representative.
- (2) Upon receipt by the administrator of a complete certificate of representation under paragraph (D) of this rule, any representation, action, inaction, or submission by the alternate CAIR designated representative shall be deemed to be a representation, action, inaction, or submission by the CAIR designated representative.
- (3) Except in paragraph (B) of this rule and paragraph (B) of rule 3745-109-01 of the Administrative Code, paragraphs (A)(1) and (A)(4), (C), (D), (F) of this rule, paragraph (A) of rule 3745-109-05 of the Administrative Code and paragraph (C) of rule 3745-109-08 of the Administrative Code, whenever the term "CAIR designated representative" is used in rules 3745-109-01 to 3745-109-08 of the Administrative Code, the term shall be construed to include the CAIR designated representative or any alternate CAIR designated representative.

(C) Changing CAIR designated representative and alternate CAIR designated representative; changes in owners and operators.

- (1) Changing CAIR designated representative. The CAIR designated representative may be changed at any time upon receipt by the administrator of a superseding complete certificate of representation under paragraph (D) of this rule. Notwithstanding any such change, all representations, actions, inactions, and submissions by the previous CAIR designated representative before the time and

date when the administrator receives the superseding certificate of representation shall be binding on the new CAIR designated representative and the owners and operators of the CAIR NO<sub>x</sub> source and the CAIR NO<sub>x</sub> units at the source.

(2) Changing alternate CAIR designated representative. The alternate CAIR designated representative may be changed at any time upon receipt by the administrator of a superseding complete certificate of representation under paragraph (D) of this rule. Notwithstanding any such change, all representations, actions, inactions, and submissions by the previous alternate CAIR designated representative before the time and date when the administrator receives the superseding certificate of representation shall be binding on the new alternate CAIR designated representative and the owners and operators of the CAIR NO<sub>x</sub> source and the CAIR NO<sub>x</sub> units at the source.

(3) Changes in owners and operators.

(a) In the event an owner or operator of a CAIR NO<sub>x</sub> source or a CAIR NO<sub>x</sub> unit is not included in the list of owners and operators in the certificate of representation under paragraph (D) of this rule, such owner or operator shall be deemed to be subject to and bound by the certificate of representation, the representations, actions, inactions, and submissions of the CAIR designated representative and any alternate CAIR designated representative of the source or unit, and the decisions and orders of the permitting authority, the administrator, or a court, as if the owner or operator were included in such list.

(b) Within thirty days following any change in the owners and operators of a CAIR NO<sub>x</sub> source or a CAIR NO<sub>x</sub> unit, including the addition of a new owner or operator, the CAIR designated representative or any alternate CAIR designated representative shall submit a revision to the certificate of representation under paragraph (D) of this rule amending the list of owners and operators to include the change.

(D) Certificate of representation.

(1) A complete certificate of representation for a CAIR designated representative or an alternate CAIR designated representative shall include the following elements in a format prescribed by the administrator:

(a) Identification of the CAIR NO<sub>x</sub> source, and each CAIR NO<sub>x</sub> unit at the source, for which the certificate of representation is submitted, including identification and nameplate capacity of each generator served by each such unit;

- (b) The name, address, e-mail address (if any), telephone number, and facsimile transmission number (if any) of the CAIR designated representative and any alternate CAIR designated representative;
- (c) A list of the owners and operators of the CAIR NO<sub>x</sub> source and of each CAIR NO<sub>x</sub> unit at the source;
- (d) The following certification statements by the CAIR designated representative and any alternate CAIR designated representative:
  - (i) “I certify that I was selected as the CAIR designated representative or alternate CAIR designated representative, as applicable, by an agreement binding on the owners and operators of the source and each CAIR NO<sub>x</sub> unit at the source.”
  - (ii) “I certify that I have all the necessary authority to carry out my duties and responsibilities under the CAIR NO<sub>x</sub> Annual trading program on behalf of the owners and operators of the source and of each CAIR NO<sub>x</sub> unit at the source and that each such owner and operator shall be fully bound by my representations, actions, inactions, or submissions.”
  - (iii) “I certify that the owners and operators of the source and of each CAIR NO<sub>x</sub> unit at the source shall be bound by any order issued to me by the administrator, the director, or a court regarding the source or unit.”
  - (iv) Where there are multiple holders of a legal or equitable title to, or a leasehold interest in, a CAIR NO<sub>x</sub> unit, or where a utility or industrial customer purchases power from a CAIR NO<sub>x</sub> unit under a life-of-the-unit, firm power contractual arrangement, “I certify that: I have given a written notice of my selection as the ‘CAIR designated representative’ or ‘alternate CAIR designated representative’, as applicable, and of the agreement by which I was selected to each owner and operator of the source and of each CAIR NO<sub>x</sub> unit at the source; and CAIR NO<sub>x</sub> allowances and proceeds of transactions involving CAIR NO<sub>x</sub> allowances shall be deemed to be held or distributed in proportion to each holder’s legal, equitable, leasehold, or contractual reservation or entitlement, except that, if such multiple holders have expressly provided for a different distribution of CAIR NO<sub>x</sub> allowances by contract, CAIR NO<sub>x</sub> allowances and proceeds of transactions involving CAIR NO<sub>x</sub> allowances shall be deemed to be held or distributed in accordance with the contract.”
- (e) The signature of the CAIR designated representative and any alternate CAIR designated representative and the dates signed.

- (2) Unless otherwise required by the director or the administrator, documents of agreement referred to in the certificate of representation shall not be submitted to the director or the administrator. Neither the director nor the administrator shall be under any obligation to review or evaluate the sufficiency of such documents, if submitted.

(E) Objections concerning CAIR designated representative.

- (1) Once a complete certificate of representation under paragraph (D) of this rule has been submitted and received, the director and the administrator shall rely on the certificate of representation unless and until a superseding complete certificate of representation under paragraph (D) of this rule is received by the administrator.
- (2) Except as provided in paragraph (C)(1) or (C)(2) of this rule, no objection or other communication submitted to the director or the administrator concerning the authorization, or any representation, action, inaction, or submission, of the CAIR designated representative shall affect any representation, action, inaction, or submission of the CAIR designated representative or the finality of any decision or order by the director or the administrator under the CAIR NO<sub>x</sub> annual trading program.
- (3) Neither the permitting authority nor the administrator will adjudicate any private legal dispute concerning the authorization or any representation, action, inaction, or submission of any CAIR designated representative, including private legal disputes concerning the proceeds of CAIR NO<sub>x</sub> allowance transfers.

(F) Delegation by CAIR designated representative and alternate CAIR designated representative.

- (1) A CAIR designated representative may delegate, to one or more natural persons, his or her authority to make an electronic submission to the administrator provided for or required under this rule.
- (2) An alternate CAIR designated representative may delegate, to one or more natural persons, his or her authority to make an electronic submission to the administrator provided for or required under this rule.
- (3) In order to delegate authority to make an electronic submission to the administrator in accordance with paragraph (F)(1) or (F)(2) of this rule, the CAIR designated representative or alternate CAIR designated representative, as appropriate, must submit to the administrator a notice of delegation, in a format prescribed by the administrator, that includes the following elements:

- (a) The name, address, e-mail address, telephone number, and facsimile transmission number (if any) of such CAIR designated representative or alternate CAIR designated representative;
  - (b) The name, address, e-mail address, telephone number, and facsimile transmission number (if any) of each such natural person (referred to as an "agent");
  - (c) For each such natural person, a list of the type or types of electronic submissions under paragraph (F)(1) or (F)(2) of this rule for which authority is delegated to him or her; and
  - (d) The following certification statements by such CAIR designated representative or alternate CAIR designated representative:
    - (i) "I agree that any electronic submission to the administrator that is by an agent identified in this notice of delegation and of a type listed for such agent in this notice of delegation and that is made when I am a CAIR designated representative or alternate CAIR designated representative, as appropriate, and before this notice of delegation is superseded by another notice of delegation under 40 CFR 96.115(d) shall be deemed to be an electronic submission by me."
    - (ii) "Until this notice of delegation is superseded by another notice of delegation under 40 CFR 96.115(d), I agree to maintain an e-mail account and to notify the administrator immediately of any change in my e-mail address unless all delegation of authority by me under 40 CFR 96.115 is terminated."
- (4) A notice of delegation submitted under paragraph (F)(3) of this rule shall be effective, with regard to the CAIR designated representative or alternate CAIR designated representative identified in such notice, upon receipt of such notice by the administrator and until receipt by the administrator of a superseding notice of delegation submitted by such CAIR designated representative or alternate CAIR designated representative, as appropriate. The superseding notice of delegation may replace any previously identified agent, add a new agent, or eliminate entirely any delegation of authority.
- (5) Any electronic submission covered by the certification in paragraph (3)(d)(i) of this rule and made in accordance with a notice of delegation effective under paragraph (F)(4) of this rule shall be deemed to be an electronic submission by the CAIR designated representative or alternate CAIR designated representative submitting such notice of delegation.

R.C. 119.032 review dates: 09/27/2012

CERTIFIED ELECTRONICALLY  
Certification

09/17/2007  
Date

Promulgated Under: 119.03  
Statutory Authority: 3704.03(E)  
Rule Amplifies: 3704.03(A), 3704.03(E), 3704.03(V)

(A) General CAIR annual trading program permit requirements.

- (1) For each CAIR NO<sub>x</sub> source required to have a Title V operating permit or required, under rule 3745-109-08 of the Administrative Code, to have a Title V operating permit or other federally enforceable permit, such permit shall include a CAIR permit administered by the director for the Title V operating permit or the federally enforceable permit as applicable. The CAIR portion of the Title V permit or other federally enforceable permit as applicable shall be administered in accordance with the director's Title V operating permits regulations or the director's regulations for other federally enforceable permits as applicable, except as provided otherwise by paragraph (D) of rule 3745-109-01 of the Administrative Code, this rule and rule 3745-109-08 of the Administrative Code.
- (2) Each CAIR permit shall contain, with regard to the CAIR NO<sub>x</sub> source and the CAIR NO<sub>x</sub> units at the source covered by the CAIR permit, all applicable CAIR NO<sub>x</sub> annual trading program, CAIR NO<sub>x</sub> ozone season trading program, and CAIR SO<sub>2</sub> trading program requirements and shall be a complete and separable portion of the Title V operating permit or other federally enforceable permit under paragraph (A)(1) of this rule.

(B) Submission of CAIR permit applications.

- (1) Duty to apply. The CAIR designated representative of any CAIR NO<sub>x</sub> source required to have a Title V operating permit shall submit to the director a complete CAIR permit application under paragraph (C) of this rule for the source covering each CAIR NO<sub>x</sub> unit at the source at least twelve months (or such lesser time provided by the director) before the later of January 1, 2009 or the date on which the CAIR NO<sub>x</sub> unit commences commercial operation, except as provided in paragraph (D)(1) of rule 3745-109-08 of the Administrative Code.
- (2) Duty to Reapply. For a CAIR NO<sub>x</sub> source required to have a Title V operating permit, the CAIR designated representative shall submit a complete CAIR permit application under paragraph (C) of this rule for the source covering each CAIR NO<sub>x</sub> unit at the source to renew the CAIR permit in accordance with the director's Title V operating permits regulations addressing permit renewal, except as provided in paragraph (D)(2) of rule 3745-109-08 of the Administrative Code.

(C) Information requirements for CAIR permit applications. A complete CAIR permit application shall include the following elements concerning the CAIR NO<sub>x</sub> source for which the application is submitted, in a format prescribed by the director:

- (1) Identification of the CAIR NO<sub>x</sub> source;
- (2) Identification of each CAIR NO<sub>x</sub> unit at the CAIR NO<sub>x</sub> source; and
- (3) The standard requirements under paragraph (E) of rule 3745-109-01 of the Administrative Code.

(D) CAIR permit contents and term.

- (1) Each CAIR permit shall contain, in a format prescribed by the director, all elements required for a complete CAIR permit application under paragraph (C) of this rule.
- (2) Each CAIR permit is deemed to incorporate automatically the definitions of terms under paragraph (B) of rule 3745-109-01 of the Administrative Code and, upon recordation by the administrator under rules 3745-109-04, 3745-109-05, 3745-109-06 or 3745-109-08 of the Administrative Code, every allocation, transfer, or deduction of a CAIR NO<sub>x</sub> allowance to or from the compliance account of the CAIR NO<sub>x</sub> source covered by the permit.
- (3) The term of the CAIR permit shall be set by the director, as necessary to facilitate coordination of the renewal of the CAIR permit with issuance, revision, or renewal of the CAIR NO<sub>x</sub> source's Title V operating permit or other federally enforceable permit as applicable.

(E) CAIR permit revisions.

Except as provided in paragraph (D)(2) of this rule, the director shall revise the CAIR permit, as necessary, in accordance with the director's Title V operating permits regulations or the director's regulations for other federally enforceable permits as applicable addressing permit revisions.

3745-109-04      **CAIR NO<sub>x</sub> allowance allocations.**

[Comment: For dates of non-regulatory government publications, publications of recognized organizations and associations, federal rules, and federal statutory provisions referenced in this rule, see paragraph (H) of rule 3745-109-01 of the Administrative Code titled "Incorporation by Reference."]

(A) State trading budget.

The state trading budget in Ohio for the CAIR NO<sub>x</sub> annual trading program for 2009 through 2014 is one hundred eight thousand six hundred sixty-seven tons and in 2015 and thereafter is ninety thousand five hundred fifty-six tons.

(B) Timing requirements for CAIR NO<sub>x</sub> allowance allocations.

(1) No later than September 30, 2007, the director shall submit to the administrator the CAIR NO<sub>x</sub> allowance allocations, in a format prescribed by the administrator and in accordance with paragraphs (C)(1) and (C)(2) of this rule, for the control periods in 2009 through 2014.

(2) Existing units.

(a) By October 31, 2009 and by October thirty-first every six years thereafter, the director shall submit to the administrator the CAIR NO<sub>x</sub> allowance allocations, in a format prescribed by the administrator and in accordance with paragraphs (C)(1) and (C)(2) of this rule, for the control periods six years, seven years, eight years, nine years, ten years and eleven years after the year of the applicable deadline for submission under this paragraph.

(3) New units.

(a) By October 31, 2009 and by October thirty-first of each year thereafter, the director shall submit to the administrator the CAIR NO<sub>x</sub> allowance allocations, in a format prescribed by the administrator and in accordance with paragraphs (C)(1), (C)(3) and (C)(4) of this rule, for the control period in the year of the applicable deadline for submission under this paragraph.

(C) CAIR NO<sub>x</sub> allowance allocations.

(1) Existing units.

(a) The baseline heat input (in mmBtu) used with respect to CAIR NO<sub>x</sub> allowance allocations under paragraph (C)(2) of this rule for each CAIR NO<sub>x</sub> unit shall be:

- (i) For units commencing operation before January 1, 2001 the average of the three highest amounts of the unit's adjusted control period heat input for 1998 through 2005, with the adjusted control period heat input for each year calculated as follows:
    - (a) If the unit is coal-fired during the year, the unit's control period heat input for such year is multiplied by one hundred per cent;
    - (b) If the unit is oil-fired during the year, the unit's control period heat input for such year is multiplied by sixty per cent; and
    - (c) If the unit is not subject to paragraph (C)(1)(a)(i)(a) or (C)(1)(a)(i)(b) of this rule, the unit's control period heat input for such year is multiplied by forty per cent.
  - (ii) For units commencing operation on or after January 1, 2001 and operating each calendar year during a period of three or more consecutive calendar years, the average of the three highest amounts of the unit's total converted control period heat input.
- (b) Adjusted heat inputs.
- (i) A unit's control period heat input, and a unit's status as coal-fired or oil-fired, for a calendar year under paragraph (C)(1)(a)(i) of this rule, and a unit's total tons of NO<sub>x</sub> emissions during a calendar year under paragraph (C)(3)(c) of this rule, shall be determined in accordance with 40 CFR Part 75, to the extent the unit was otherwise subject to the requirements of 40 CFR Part 75 for the year, or shall be based on the best available data reported to the director for the unit, to the extent the unit was not otherwise subject to the requirements of 40 CFR Part 75 for the year.
  - (ii) A unit's converted control period heat input for a calendar year specified under paragraph (C)(1)(a)(ii) of this rule equals:
    - (a) Except as provided in paragraph (C)(1)(b)(ii)(b) or (C)(1)(b)(ii)(c) of this rule, the control period gross electrical output of the generator or generators served by the unit multiplied by seven thousand nine hundred Btu per kWh, if the unit is coal-fired for the year, or six thousand six hundred seventy-five Btu per kWh, if the unit is not coal-fired for the year, and divided by one million Btu per mmBtu, provided that if a generator is served by two or more units, then the gross electrical output of the generator shall be attributed to each unit in proportion to the unit's share of the total control period heat input of such units for the year;

- (b) For a unit that is a boiler and has equipment used to produce electricity and useful thermal energy for industrial, commercial, heating, or cooling purposes through the sequential use of energy, the total heat energy of the steam produced by the boiler during the control period, divided by 0.8 and by one million Btu per mmBtu; or
- (c) For a unit that is a combustion turbine and has equipment used to produce electricity and useful thermal energy for industrial, commercial, heating, or cooling purposes through the sequential use of energy, the control period gross electrical output of the enclosed device comprising the compressor, combustion, and turbine multiplied by three thousand four hundred thirteen Btu per kWh, plus the total heat energy of the steam produced by any associated heat recovery steam generator during the control period divided by 0.8, and with the sum divided by one million Btu per mmBtu.

(2) Adjusted allocations.

- (a) For each control period in 2009 and thereafter, the director shall allocate to all CAIR NO<sub>x</sub> units in the state that have a baseline heat input (as determined under paragraph (C)(1) of this rule) a total amount of CAIR NO<sub>x</sub> allowances equal to ninety-five per cent for a control period during 2009 through 2014, and ninety-seven per cent for a control period during 2015 and thereafter, of the tons of NO<sub>x</sub> emissions in the state trading budget under paragraph (A) of this rule (except as provided in paragraph (C)(4) of this rule).
  - (b) The director shall allocate CAIR NO<sub>x</sub> allowances to each CAIR NO<sub>x</sub> unit under paragraph (C)(2)(a) of this rule in an amount determined by multiplying the total amount of CAIR NO<sub>x</sub> allowances allocated under paragraph (C)(2)(a) of this rule by the ratio of the baseline heat input of such CAIR NO<sub>x</sub> unit to the total amount of baseline heat input of all such CAIR NO<sub>x</sub> units in the state and rounding to the nearest whole allowance as appropriate.
- (3) For each control period in 2009 and thereafter, the director shall allocate CAIR NO<sub>x</sub> allowances to CAIR NO<sub>x</sub> units in the state that are not allocated CAIR NO<sub>x</sub> allowances under paragraph (C)(2)(a) of this rule because the units do not yet have a baseline heat input under paragraph (C)(1)(a) of this rule or because the units have a baseline heat input but all CAIR NO<sub>x</sub> allowances available under paragraph (C)(2)(a) of this rule for the control period are already allocated, in accordance with the following procedures:

- (a) The director shall establish a separate new unit set-aside for each control period. Each new unit set-aside shall be allocated CAIR NO<sub>x</sub> allowances equal to five per cent for a control period in 2009 through 2014, and three per cent for a control period in 2015 and thereafter, of the amount of tons of NO<sub>x</sub> emissions in the state trading budget under paragraph (A) of this rule.
- (b) The CAIR designated representative of such a CAIR NO<sub>x</sub> unit may submit to the director a request, in a format specified by the director, to be allocated CAIR NO<sub>x</sub> allowances, starting with the later of the control period in 2009 or the first control period after the control period in which the CAIR NO<sub>x</sub> unit commences commercial operation and until the first control period for which the unit is allocated CAIR NO<sub>x</sub> allowances under paragraph (C)(2) of this rule. A separate CAIR NO<sub>x</sub> allowance allocation request for each control period for which CAIR NO<sub>x</sub> allowances are sought must be submitted on or before May first of such control period and after the date on which the CAIR NO<sub>x</sub> unit commences commercial operation.
- (c) In a CAIR NO<sub>x</sub> allowance allocation request under paragraph (C)(3)(b) of this rule, the CAIR designated representative may request for a control period CAIR NO<sub>x</sub> allowances in an amount not exceeding the CAIR NO<sub>x</sub> unit's total tons of NO<sub>x</sub> emissions during the calendar year immediately before such control period.
- (d) The director shall review each CAIR NO<sub>x</sub> allowance allocation request under paragraph (C)(3)(b) of this rule and shall allocate CAIR NO<sub>x</sub> allowances for each control period pursuant to such request as follows:
  - (i) The director shall accept an allowance allocation request only if the request meets, or is adjusted by the director as necessary to meet, the requirements of paragraphs (C)(3)(b) and (C)(3)(c) of this rule.
  - (ii) For each control period on or after May first, the director shall determine the sum of the CAIR NO<sub>x</sub> allowances requested (as adjusted under paragraph (C)(3)(d)(i) of this rule) in all allowance allocation requests accepted under paragraph (C)(3)(d)(i) of this rule for the control period.
  - (iii) If the amount of CAIR NO<sub>x</sub> allowances in the new unit set-aside for the control period is greater than or equal to the sum under paragraph (C)(3)(d)(ii) of this rule, then the director shall allocate the amount of CAIR NO<sub>x</sub> allowances requested (as adjusted under paragraph (C)(3)(d)(i) of this rule) to each CAIR NO<sub>x</sub> unit covered by an allowance allocation request accepted under paragraph (C)(3)(d)(i) of this rule.

- (iv) If the amount of CAIR NO<sub>x</sub> allowances in the new unit set-aside for the control period is less than the sum under paragraph (C)(3)(d)(ii) of this rule, then the director shall allocate to each CAIR NO<sub>x</sub> unit covered by an allowance allocation request accepted under paragraph (C)(3)(d)(i) of this rule the amount of the CAIR NO<sub>x</sub> allowances requested (as adjusted under paragraph (C)(3)(d)(i) of this rule), multiplied by the number of CAIR NO<sub>x</sub> allowances in the new unit set-aside for the control period, divided by the sum determined under paragraph (C)(3)(d)(ii) of this rule, and rounded to the nearest whole allowance as appropriate.
- (v) The director shall notify each CAIR designated representative that submitted an allowance allocation request of the amount of CAIR NO<sub>x</sub> allowances (if any) allocated for the control period to the CAIR NO<sub>x</sub> unit covered by the request.

[Comment; As stated in paragraph (C)(3) of this rule, units commencing operation on or after January 1, 2001 and lacking a baseline heat input because of insufficient heat input data availability, as stated in paragraph (C)(1)(a)(ii) of this rule, shall be allocated allowances from the new unit set-aside. The unit will continue to be allocated allowances from the new unit set-aside, even if the unit has sufficient heat input data for determination of a baseline until such time as the director has determined new allowance allocations from the state trading budget under paragraph (A) of this rule, for all units in the state with a baseline heat input based on the timing requirements in paragraph (B) of this rule.]

- (4) If, after completion of the procedures under paragraph (C)(3)(d) of this rule for a control period, any unallocated CAIR NO<sub>x</sub> allowances remain in the new unit set-aside for the control period, the director shall allocate to each CAIR NO<sub>x</sub> unit that was allocated CAIR NO<sub>x</sub> allowances under paragraph (C)(2) of this rule an amount of CAIR NO<sub>x</sub> allowances equal to the total amount of such remaining unallocated CAIR NO<sub>x</sub> allowances, multiplied by the unit's allocation under paragraph (C)(2) of this rule, divided by ninety-five per cent for a control period during 2009 through 2014, and ninety-seven per cent for a control period during 2015 and thereafter, of the amount of tons of NO<sub>x</sub> emissions in the state trading budget under paragraph (A) of this rule, and rounded to the nearest whole allowance as appropriate.

(D) Early reduction credit.

- (1) The director will create a compliance supplemental pool (CSP) of twenty-five thousand thirty-seven early reduction credits. Each CAIR NO<sub>x</sub> unit for which the designated representative requests any early reduction credit under this rule shall monitor and report NO<sub>x</sub> emissions in accordance with 40 CFR Part 75 in

the 2005 control period and for each control period for which any early reduction credit is requested. The unit's percent monitor data availability shall be not less than ninety per cent during the 2005 control period, and the unit shall be in compliance with any applicable state or federal NOx emission control requirements during 2005 through 2008.

- (2) The NOx emission rate and heat input under paragraphs (D)(3) and (D)(4) of this rule shall be determined in accordance with 40 CFR Part 75.
- (3) Each CAIR NOx unit for which the designated representative requests early reduction credit under paragraph (D)(4) of this rule shall:
  - (a) Reduce its NOx emission rate for each control period for which early reduction credit is requested to less than the unit's NOx emission rate in the 2005 control period.
  - (b) Reduce its NOx emission rate for each control period below any applicable state implementation plan limitation or the applicable NOx emission rate contained in any permit issued to the unit. Early reduction credits shall not be earned if the unit is required to achieve NOx emission reductions that are necessary to comply with any state or federal emissions limitation applicable during each control period.
  - (c) Be an existing coal-fired unit in operation during the 2007 or 2008 control periods and will be required to comply with CAIR annual NOx emission limitations beginning January 1, 2009.
- (4) A CAIR designated representative, for one or more CAIR NOx units that meet the requirements of paragraphs (D)(1) to (D)(3) of this rule, is only eligible for the units' collective proportional share of the CSP, except as specified in paragraph (D)(6). The CAIR designated representative may submit to the director a request for early reduction credit based on NOx emission rate reductions for one or more CAIR NOx units in either or both of the control periods in 2007 and 2008.
  - (a) The collective proportional share of the CSP for a CAIR designated representative shall be equal to the product twenty-five thousand thirty-seven times the percentage calculated by dividing the sum of the baseline heat input for all CAIR NOx units represented by the designated representative by the sum of the baseline heat input for all CAIR NOx units subject to this rule.
  - (b) By November 26, 2007, the director shall calculate and publish the collective proportional share of the CSP for each CAIR designated representative eligible for CAIR early reduction credits. The director will

also make available the data used to calculate the collective proportional shares of the CSP.

- (c) The CAIR designated representative may request early reduction credits for NO<sub>x</sub> reductions made at one or more CAIR NO<sub>x</sub> units in the 2007 and/or 2008 control periods in an amount equal to the following: the unit's heat input for such control period multiplied by the difference between the unit's NO<sub>x</sub> emission rate (in pounds per mmBtu) during the 2005 control period and the NO<sub>x</sub> emission rate (in pounds per mmBtu) for each control period for which early reduction credits are requested, divided by two thousand pounds per ton and rounded to the nearest whole number of tons as appropriate. The total number of early reduction credits requested by a designated representative may exceed that representative's collective proportional share, and serve as a basis for additional CAIR NO<sub>x</sub> allocations from the CSP pursuant to paragraph (D)(6) of this rule.
- (d) Requests for early reduction credits for reductions made in 2007 or 2008 shall be submitted, in a format specified by the director, by February 1, 2009.
- (5) The director shall allocate CAIR NO<sub>x</sub> allowances from the CSP to the designated representative for CAIR NO<sub>x</sub> units meeting the requirements of paragraphs (D)(1) to (D)(3) of this rule and for which early reduction credit requests meeting the requirements of paragraph (D)(4)(c) of this rule were submitted, up to the collective proportional share of the CSP available to the CAIR designated representative as defined in paragraphs (D)(4)(a) and (D)(4)(b) of this rule.
- (6) If the total number of early reduction credits allocated per paragraph (D)(5) of this rule is less than twenty-five thousand thirty-seven, the director shall allocate the remaining available NO<sub>x</sub> allowances to those CAIR designated representatives who submitted early reduction credit requests for one or more CAIR NO<sub>x</sub> units that exceeded his or her collective proportional share. The director shall allocate the remaining available NO<sub>x</sub> allowances from the CSP to each CAIR NO<sub>x</sub> unit that meets the requirements of this paragraph according to the following formula rounded to the nearest whole number of CAIR NO<sub>x</sub> allowances as appropriate:

[Twenty-five thousand thirty seven minus the CSP NO<sub>x</sub> allowances allocated under paragraph (D)(5) of this rule] multiplied by the [number of early reduction credits requested for a CAIR NO<sub>x</sub> unit under paragraph (D)(4)(c) of this rule minus the number of early reduction credits awarded to a CAIR NO<sub>x</sub> unit under paragraph (D)(5) of this rule] divided by the [(total number of early reduction credits requested for all CAIR NO<sub>x</sub> units under paragraph (D)(4)(c) minus the total number of early reduction credits awarded to all CAIR NO<sub>x</sub> units under paragraph (D)(5)]

- (7) A CAIR NO<sub>x</sub> unit's total early reduction credits allocated shall equal the sum of the early reduction credits determined under paragraphs (D)(5) and (D)(6) of this rule.
- (8) The director shall notify each CAIR authorized account representative who requested early reduction credits according to paragraph (D)(4) of this rule of the number of early reduction credit the administrator will record as CAIR NO<sub>x</sub> allowances for each CAIR NO<sub>x</sub> unit that made early reductions during the control periods in 2007 and 2008 by June 1, 2009, or at such time that sufficient 2008 unit's emissions data has been available by the administrator for the determination of the early reduction credits.
- (9) The director shall submit to the administrator the CAIR NO<sub>x</sub> allowance allocations determined in accordance with paragraphs (D)(5) and (D)(6) of this rule by November 30, 2009, or at such time based on the emissions data availability as described in paragraph (D)(8) of this rule.
- (10) The administrator will record the submitted allocations in paragraph (D)(9) of this rule by January 1, 2010.
- (11) CAIR NO<sub>x</sub> allowances available for reductions made in the 2007 and 2008 control periods and not allocated or recorded by the director in accordance with paragraphs (D)(5) and (D)(6) of this rule shall be retired.

3745-109-05      **CAIR NOx allowance tracking system.**

[Comment: For dates of non-regulatory government publications, publications of recognized organizations and associations, federal rules, and federal statutory provisions referenced in this rule, see the last paragraph of rule 3745-109-01 of the Administrative Code titled "Incorporation by Reference."]

(A) Establishment of accounts.

(1) Compliance accounts. Except as provided in paragraph (E)(5) of rule 3745-109-08 of the Administrative Code, upon receipt of a complete certificate of representation under paragraph (D) of rule 3745-109-02 of the Administrative Code, the administrator shall establish a compliance account for the CAIR NOx source for which the certificate of representation was submitted unless the source already has a compliance account.

(2) General accounts.

(a) Application for general account.

(i) Any person may apply to open a general account for the purpose of holding and transferring CAIR NOx allowances. An application for a general account may designate one and only one CAIR authorized account representative and one and only one alternate CAIR authorized account representative who may act on behalf of the CAIR authorized account representative. The agreement by which the alternate CAIR authorized account representative is selected shall include a procedure for authorizing the alternate CAIR authorized account representative to act in lieu of the CAIR authorized account representative.

(ii) A complete application for a general account shall be submitted to the administrator and shall include the following elements in a format prescribed by the administrator:

(a) Name, mailing address, e-mail address (if any), telephone number, and facsimile transmission number (if any) of the CAIR authorized account representative and any alternate CAIR authorized account representative;

(b) Organization name and type of organization, if applicable;

(c) A list of all persons subject to a binding agreement for the CAIR authorized account representative and any alternate CAIR authorized account representative to represent their ownership interest with respect to the allowances held in the general account;

authorized account representative by the administrator or a court regarding the general account.

- (c) Any representation, action, inaction, or submission by any alternate CAIR authorized account representative shall be deemed to be a representation, action, inaction, or submission by the CAIR authorized account representative.
- (ii) Each submission concerning the general account shall be submitted, signed, and certified by the CAIR authorized account representative or any alternate CAIR authorized account representative for the persons having an ownership interest with respect to CAIR NO<sub>x</sub> allowances held in the general account. Each such submission shall include the following certification statement by the CAIR authorized account representative or any alternate CAIR authorized account representative: “I am authorized to make this submission on behalf of the persons having an ownership interest with respect to the CAIR NO<sub>x</sub> allowances held in the general account. I certify under penalty of law that I have personally examined, and am familiar with, the statements and information submitted in this document and all its attachments. Based on my inquiry of those individuals with primary responsibility for obtaining the information, I certify that the statements and information are to the best of my knowledge and belief true, accurate, and complete. I am aware that there are significant penalties for submitting false statements and information or omitting required statements and information, including the possibility of fine or imprisonment.”
- (iii) The administrator shall accept or act on a submission concerning the general account only if the submission has been made, signed, and certified in accordance with paragraph (A)(2)(b)(ii) of this rule.
- (c) Changing CAIR authorized account representative and alternate CAIR authorized account representative; changes in persons with ownership interest.
- (i) The CAIR authorized account representative for a general account may be changed at any time upon receipt by the administrator of a superseding complete application for a general account under paragraph (A)(2)(a) of this rule. Notwithstanding any such change, all representations, actions, inactions, and submissions by the previous CAIR authorized account representative before the time and date when the administrator receives the superseding application for a general account shall be binding on the new CAIR authorized account representative and the persons with an ownership interest with respect to the CAIR NO<sub>x</sub> allowances in the general account.

- (ii) The alternate CAIR authorized account representative for a general account may be changed at any time upon receipt by the administrator of a superseding complete application for a general account under paragraph (A)(2)(a) of this rule. Notwithstanding any such change, all representations, actions, inactions, and submissions by the previous alternate CAIR authorized account representative before the time and date when the administrator receives the superseding application for a general account shall be binding on the new alternate CAIR authorized account representative and the persons with an ownership interest with respect to the CAIR NO<sub>x</sub> allowances in the general account.
- (iii) Ownership changes.
  - (a) In the event a person having an ownership interest with respect to CAIR NO<sub>x</sub> allowances in the general account is not included in the list of such persons in the application for a general account, such person shall be deemed to be subject to and bound by the application for a general account, the representation, actions, inactions, and submissions of the CAIR authorized account representative and any alternate CAIR authorized account representative of the account, and the decisions and orders of the administrator or a court, as if the person were included in such list.
  - (b) Within thirty days following any change in the persons having an ownership interest with respect to CAIR NO<sub>x</sub> allowances in the general account, including the addition of a new person, the CAIR authorized account representative or any alternate CAIR authorized account representative shall submit a revision to the application for a general account amending the list of persons having an ownership interest with respect to the CAIR NO<sub>x</sub> allowances in the general account to include the change.
- (d) Objections concerning CAIR authorized account representative and alternate CAIR authorized account representative.
  - (i) Once a complete application for a general account under paragraph (A)(2)(a) of this rule has been submitted and received, the administrator shall rely on the application unless and until a superseding complete application for a general account under paragraph (A)(2)(a) of this rule is received by the administrator.
  - (ii) Except as provided in paragraph (A)(2)(c)(i) or (A)(2)(c)(ii) of this rule, no objection or other communication submitted to the administrator concerning the authorization, or any representation, action, inaction, or submission of the CAIR authorized account representative or any alternate CAIR authorized account representative for a general account

shall affect any representation, action, inaction, or submission of the CAIR authorized account representative or any alternate CAIR authorized account representative or the finality of any decision or order by the administrator under the CAIR NO<sub>x</sub> annual trading program.

- (iii) The administrator will not adjudicate any private legal dispute concerning the authorization or any representation, action, inaction, or submission of the CAIR authorized account representative or any alternate CAIR authorized account representative for a general account, including private legal disputes concerning the proceeds of CAIR NO<sub>x</sub> allowance transfers.
- (e) Delegation by CAIR authorized account representative and alternate CAIR authorized account representative.
- (i) A CAIR authorized account representative may delegate, to one or more natural persons, his or her authority to make an electronic submission to the administrator provided for or required under rules 3745-109-05 and 3745-109-06 of the Administrative Code.
  - (ii) An alternate CAIR authorized account representative may delegate, to one or more natural persons, his or her authority to make an electronic submission to the administrator provided for or required under rules 3745-109-05 and 3745-109-06 of the Administrative Code .
  - (iii) In order to delegate authority to make an electronic submission to the administrator in accordance with paragraph (A)(2)(e)(i) or (A)(2)(e)(ii) of this rule, the CAIR authorized account representative or alternate CAIR authorized account representative, as appropriate, must submit to the administrator a notice of delegation, in a format prescribed by the administrator, that includes the following elements:
    - (a) The name, address, e-mail address, telephone number, and facsimile transmission number (if any) of such CAIR authorized account representative or alternate CAIR authorized account representative;
    - (b) The name, address, e-mail address, telephone number, and facsimile transmission number (if any) of each such natural person (referred to as an "agent");
    - (c) For each such natural person, a list of the type or types of electronic submissions under paragraph (A)(2)(e)(i) or (A)(2)(e)(ii) of this rule for which authority is delegated to him or her;

Following the establishment of a CAIR NO<sub>x</sub> allowance tracking system account, all submissions to the administrator pertaining to the account, including, but not limited to, submissions concerning the deduction or transfer of CAIR NO<sub>x</sub> allowances in the account, shall be made only by the CAIR authorized account representative for the account.

(C) Recordation of CAIR NO<sub>x</sub> allowance allocations.

- (1) By September 30, 2007, the administrator shall record in the CAIR NO<sub>x</sub> source's compliance account the CAIR NO<sub>x</sub> allowances allocated for the CAIR NO<sub>x</sub> units at the source, as submitted by the director in accordance with paragraph (B)(1) of rule 3745-109-04 of the Administrative Code, for the control periods in 2009, 2010, 2011, 2012, 2013, and 2014..
- (2) By December 1, 2009, and December first every six years thereafter, the administrator shall record in the CAIR NO<sub>x</sub> source's compliance account the CAIR NO<sub>x</sub> allowances allocated for the CAIR NO<sub>x</sub> units at the source, as submitted by the director in accordance with paragraph (B)(2)(a) of rule 3745-109-04 of the Administrative Code, for the control periods in the six years, seven years, eight years, nine years, ten years and eleven years after the year of the applicable deadline for recordation under this paragraph.
- (3) Serial numbers for allocated CAIR NO<sub>x</sub> allowances. When recording the allocation of CAIR NO<sub>x</sub> allowances for a CAIR NO<sub>x</sub> unit in a compliance account, the administrator shall assign each CAIR NO<sub>x</sub> allowance a unique identification number that shall include digits identifying the year of the control period for which the CAIR NO<sub>x</sub> allowance is allocated.

(D) Compliance with CAIR NO<sub>x</sub> emissions limitation.

- (1) Allowance transfer deadline. The CAIR NO<sub>x</sub> allowances are available to be deducted for compliance with a source's CAIR NO<sub>x</sub> emissions limitation for a control period in a given calendar year only if the CAIR NO<sub>x</sub> allowances:
  - (a) Were allocated for the control period in the year or a prior year; and
  - (b) Are held in the compliance account as of the allowance transfer deadline for the control period or are transferred into the compliance account by a CAIR NO<sub>x</sub> allowance transfer correctly submitted for recordation under paragraph (A) and (B) of rule 3745-109-06 of the Administrative Code by the allowance transfer deadline for the control period.
- (2) Deductions for compliance. Following the recordation, in accordance with paragraph (B) of rule 3745-109-06 of the Administrative Code, of CAIR NO<sub>x</sub> allowance transfers submitted for recordation in a source's compliance account by the allowance transfer deadline for a control period, the administrator will

deduct from the compliance account CAIR NO<sub>x</sub> allowances available under paragraph (D)(1) of this rule in order to determine whether the source meets the CAIR NO<sub>x</sub> emissions limitation for the control period, as follows:

- (a) Until the amount of CAIR NO<sub>x</sub> allowances deducted equals the number of tons of total NO<sub>x</sub> emissions, determined in accordance with rule 3745-109-07 of the Administrative Code, from all CAIR NO<sub>x</sub> units at the source for the control period; or
  - (b) If there are insufficient CAIR NO<sub>x</sub> allowances to complete the deductions in paragraph (D)(2)(a) of this rule, until no more CAIR NO<sub>x</sub> allowances available under paragraph (D)(1) of this rule remain in the compliance account.
- (3) Identification of allowances deducted.
- (a) Identification of CAIR NO<sub>x</sub> allowances by serial number. The CAIR authorized account representative for a source's compliance account may request that specific CAIR NO<sub>x</sub> allowances, identified by serial number, in the compliance account be deducted for emissions or excess emissions for a control period in accordance with paragraph (D)(2) or (D)(4) of this rule. Such request shall be submitted to the administrator by the allowance transfer deadline for the control period and include, in a format prescribed by the administrator, the identification of the CAIR NO<sub>x</sub> source and the appropriate serial numbers.
  - (b) First-in, first-out. The administrator will deduct CAIR NO<sub>x</sub> allowances under paragraph (D)(2) or (D)(4) of this rule from the source's compliance account, in the absence of an identification or in the case of a partial identification of CAIR NO<sub>x</sub> allowances by serial number under paragraph (D)(3)(a) of this rule, on a first-in, first-out (FIFO) accounting basis in the following order:
    - (i) Any CAIR NO<sub>x</sub> allowances that were allocated to the units at the source, in the order of recordation; and then
    - (ii) Any CAIR NO<sub>x</sub> allowances that were allocated to any entity and transferred and recorded in the compliance account pursuant to rule 3745-109-06 of the Administrative Code, in the order of recordation.
- (4) Deductions for excess emissions.
- (a) After making the deductions for compliance under paragraph (D)(2) of this rule for a control period in a calendar year in which the CAIR NO<sub>x</sub> source has excess emissions, the administrator shall deduct from the source's compliance account an amount of CAIR NO<sub>x</sub> allowances, allocated for the

control period in the immediately following calendar year, equal to three times the number of tons of the source's excess emissions.

- (b) Any allowance deduction required under paragraph (D)(4)(a) of this rule shall not affect the liability of the owners and operators of the CAIR NO<sub>x</sub> source or the CAIR NO<sub>x</sub> units at the source for any fine, penalty, or assessment, or their obligation to comply with any other remedy, for the same violations, as ordered under the Clean Air Act or applicable state law.
- (5) Recordation of deductions. The administrator will record in the appropriate compliance account all deductions from such an account under paragraph (D)(2) or (D)(4) of this rule and rule 3745-109-08 of the Administrative Code.
- (6) Administrator's action on submissions.
- (a) The administrator may review and conduct independent audits concerning any submission under the CAIR NO<sub>x</sub> annual trading program and make appropriate adjustments of the information in the submissions.
  - (b) The administrator may deduct CAIR NO<sub>x</sub> allowances from or transfer CAIR NO<sub>x</sub> allowances to a source's compliance account based on the information in the submissions, as adjusted under paragraph (D)(6)(a) of this rule, and record such deductions and transfers.

(E) Banking.

- (1) CAIR NO<sub>x</sub> allowances may be banked for future use or transfer in a compliance account or a general account in accordance with paragraph (E)(2) of this rule.
- (2) Any CAIR NO<sub>x</sub> allowance that is held in a compliance account or a general account shall remain in such account unless and until the CAIR NO<sub>x</sub> allowance is deducted or transferred under paragraphs (D) and (F) of rule 3745-109-05 of the Administrative Code or rule 3745-109-06 or rule 3745-109-08 of the Administrative Code.

(F) Account error.

The administrator may, at his or her sole discretion and on his or her own motion, correct any error in any CAIR NO<sub>x</sub> allowance tracking system account. Within ten business days of making such correction, the administrator shall notify the CAIR authorized account representative for the account.

(G) Closing of general accounts.

- (1) The CAIR authorized account representative of a general account may submit to the administrator a request to close the account, which shall include a correctly

submitted allowance transfer under paragraphs (A) and (B) of rule 3745-109-06 of the Administrative Code for any CAIR NOx allowances in the account to one or more other CAIR NOx allowance tracking system accounts.

- (2) If a general account has no allowance transfers in or out of the account for a twelve-month period or longer and does not contain any CAIR NOx allowances, the administrator may notify the CAIR authorized account representative for the account that the account will be closed following twenty business days after the notice is sent. The account will be closed after the twenty-day period unless, before the end of the twenty-day period, the administrator receives a correctly submitted transfer of CAIR NOx allowances into the account under paragraphs (A) and (B) of rule 3745-109-06 of the Administrative Code or a statement submitted by the CAIR authorized account representative demonstrating to the satisfaction of the administrator good cause as to why the account should not be closed.

Rule Amplifies: 3704.03(A), 3704.03(E), 3704.03(V)

(A) Submission of CAIR NOx allowance transfers.

A CAIR authorized account representative seeking recordation of a CAIR NOx allowance transfer shall submit the transfer to the administrator. To be considered correctly submitted, the CAIR NOx allowance transfer shall include the following elements, in a format specified by the administrator:

- (1) The account numbers for both the transferor and transferee accounts;
- (2) The serial number of each CAIR NOx allowance that is in the transferor account and is to be transferred; and
- (3) The name and signature of the CAIR authorized account representative of the transferor account and the date signed.

(B) Recordation.

- (1) Within five business days (except as provided in paragraph (B)(2) of this rule) of receiving a CAIR NOx allowance transfer, the administrator shall record a CAIR NOx allowance transfer by moving each CAIR NOx allowance from the transferor account to the transferee account as specified by the request, provided that:
  - (a) The transfer is correctly submitted under paragraph (A) of this rule; and
  - (b) The transferor account includes each CAIR NOx allowance identified by serial number in the transfer.
- (2) A CAIR NOx allowance transfer that is submitted for recordation after the allowance transfer deadline for a control period and that includes any CAIR NOx allowances allocated for any control period before such allowance transfer deadline will not be recorded until after the administrator completes the deductions under paragraph (D) of rule 3745-109-05 of the Administrative Code for the control period immediately before such allowance transfer deadline.
- (3) Where a CAIR NOx allowance transfer submitted for recordation fails to meet the requirements of paragraph (B)(1) of this rule, the administrator shall not record such transfer.

(C) Notification.

- (1) Notification of recordation. Within five business days of recordation of a CAIR NOx allowance transfer under paragraph (B) of this rule, the administrator shall

notify the CAIR authorized account representatives of both the transferor and transferee accounts.

- (2) Notification of non-recordation. Within ten business days of receipt of a CAIR NO<sub>x</sub> allowance transfer that fails to meet the requirements of paragraph (B)(1) of this rule, the administrator shall notify the CAIR authorized account representatives of both accounts subject to the transfer of:
  - (a) A decision not to record the transfer, and
  - (b) The reasons for such non-recordation.
- (3) Nothing in this rule shall preclude the submission of a CAIR NO<sub>x</sub> allowance transfer for recordation following notification of non-recordation.

3745-109-07      **Monitoring and reporting.**

[Comment: For dates of non-regulatory government publications, publications of recognized organizations and associations, federal rules, and federal statutory provisions referenced in this rule, see paragraph (H) of rule 3745-109-01 of the Administrative Code titled "Incorporation by Reference."]

(A) General requirements.

The owners and operators, and to the extent applicable, the CAIR designated representative, of a CAIR NO<sub>x</sub> unit, shall comply with the monitoring, record keeping, and reporting requirements as provided in this rule and in 40 CFR Part 75, Subpart H. For purposes of complying with such requirements, the definitions in paragraph (B) of rule 3745-109-01 of the Administrative Code and in 40 CFR 72.2 shall apply, and the terms "affected unit," "designated representative," and "continuous emission monitoring system" (or "CEMS") in 40 CFR Part 75 shall be deemed to refer to the terms "CAIR NO<sub>x</sub> unit," "CAIR designated representative," and "continuous emission monitoring system" (or "CEMS") respectively, as defined in paragraph (B) of rule 3745-109-01 of the Administrative Code. The owner or operator of a unit that is not a CAIR NO<sub>x</sub> unit but that is monitored under 40 CFR 75.72(b)(2)(ii) shall comply with the same monitoring, record keeping, and reporting requirements as a CAIR NO<sub>x</sub> unit.

- (1) Requirements for installation, certification, and data accounting. The owner or operator of each CAIR NO<sub>x</sub> unit shall:
  - (a) Install all monitoring systems required under this rule for monitoring NO<sub>x</sub> mass emissions and individual unit heat input (including all systems required to monitor NO<sub>x</sub> emission rate, NO<sub>x</sub> concentration, stack gas moisture content, stack gas flow rate, CO<sub>2</sub> or O<sub>2</sub> concentration, and fuel flow rate, as applicable, in accordance with 40 CFR 75.71 and 40 CFR 75.72);
  - (b) Successfully complete all certification tests required under paragraph (B) of this rule and meet all other requirements of this rule and 40 CFR Part 75 applicable to the monitoring systems under paragraph (A)(1)(a) of this rule; and
  - (c) Record, report, and quality-assure the data from the monitoring systems under paragraph (A)(1)(a) of this rule.
- (2) Compliance deadlines. Except as provided in paragraph (A)(5) of this rule, the owner or operator shall meet the monitoring system certification and other requirements of paragraphs (A)(1)(a) and (A)(1)(b) of this rule on or before the following dates. The owner or operator shall record, report, and quality-assure

the data from the monitoring systems under paragraph (A)(1)(a) of this rule on and after the following dates:

- (a) For the owner or operator of a CAIR NO<sub>x</sub> unit that commences commercial operation before July 1, 2007, by January 1, 2008.
  - (b) For the owner or operator of a CAIR NO<sub>x</sub> unit that commences commercial operation on or after July 1, 2007, by the later of the following dates:
    - (i) January 1, 2008; or
    - (ii) Ninety unit operating days or one hundred eighty calendar days, whichever occurs first, after the date on which the unit commences commercial operation.
  - (c) For the owner or operator of a CAIR NO<sub>x</sub> unit for which construction of a new stack or flue or installation of add-on NO<sub>x</sub> emission controls is completed after the applicable deadline under paragraph (A)(2)(a), (A)(2)(b), (A)(2)(d) or (A)(2)(e) of this rule, by ninety unit operating days or one hundred eighty calendar days, whichever occurs first, after the date on which emissions first exit to the atmosphere through the new stack or flue or add-on NO<sub>x</sub> emissions controls.
  - (d) Notwithstanding the dates in paragraphs (A)(2)(a) and (A)(2)(b) of this rule, for the owner or operator of a unit for which a CAIR opt-in permit application is submitted and not withdrawn and a CAIR opt-in permit is not yet issued or denied under rule 3745-109-08 of the Administrative Code, by the date specified in paragraph (E)(2) of rule 3745-109-08 of the Administrative Code.
  - (e) Notwithstanding the dates in paragraphs (A)(2)(a) and (A)(2)(b) of this rule, for the owner or operator of a CAIR NO<sub>x</sub> opt-in unit under rule 3745-109-08 of the Administrative Code, by the date on which the CAIR NO<sub>x</sub> opt-in unit enters the CAIR NO<sub>x</sub> annual trading program as provided in paragraph (E)(7) of rule 3745-109-08 of the Administrative Code.
- (3) Reporting data.

The owner or operator of a CAIR NO<sub>x</sub> unit that does not meet the applicable compliance date set forth in paragraph (A)(2) of this rule for any monitoring system under paragraph (A)(1)(a) of this rule shall, for each such monitoring system, determine, record, and report maximum potential (or, as appropriate, minimum potential) values for NO<sub>x</sub> concentration, NO<sub>x</sub> emission rate, stack gas flow rate, stack gas moisture content, fuel flow rate, and any other parameters required to determine NO<sub>x</sub> mass emissions and heat input in accordance with 40

CFR 75.31(b)(2) or 40 CFR 75.31(c)(3), 40 CFR Part 75, Appendix D, Section 2.4, or 40 CFR Part 75, Appendix E, Section 2.5 as applicable.

(4) Prohibitions.

- (a) No owner or operator of a CAIR NO<sub>x</sub> unit shall use any alternative monitoring system, alternative reference method, or any other alternative to any requirement of this rule without having obtained prior written approval in accordance with paragraph (F) of this rule.
- (b) No owner or operator of a CAIR NO<sub>x</sub> unit shall operate the unit so as to discharge, or allow to be discharged, NO<sub>x</sub> emissions to the atmosphere without accounting for all such emissions in accordance with the applicable provisions of this rule and 40 CFR Part 75.
- (c) No owner or operator of a CAIR NO<sub>x</sub> unit shall disrupt the continuous emission monitoring system, any portion thereof, or any other approved emission monitoring method, and thereby avoid monitoring and recording NO<sub>x</sub> mass emissions discharged into the atmosphere or heat input, except for periods of recertification or periods when calibration, quality assurance testing, or maintenance is performed in accordance with the applicable provisions of this rule and 40 CFR Part 75.
- (d) No owner or operator of a CAIR NO<sub>x</sub> unit shall retire or permanently discontinue use of the continuous emission monitoring system, any component thereof, or any other approved monitoring system under this rule, except under any one of the following circumstances:
  - (i) During the period that the unit is covered by an exemption under paragraph (D) of rule 3745-109-01 of the Administrative Code that is in effect;
  - (ii) The owner or operator is monitoring emissions from the unit with another certified monitoring system approved, in accordance with the applicable provisions of this rule and 40 CFR Part 75, by the director for use at that unit that provides emission data for the same pollutant or parameter as the retired or discontinued monitoring system; or
  - (iii) The CAIR designated representative submits notification of the date of certification testing of a replacement monitoring system for the retired or discontinued monitoring system in accordance with paragraph (B)(4)(c)(i) of this rule.

(5) Long term cold storage.

The owner or operator of a CAIR NO<sub>x</sub> unit is subject to the applicable provisions of 40 CFR Part 75 of this rule concerning units in long-term cold storage.

(B) Initial certification and recertification procedures.

- (1) The owner or operator of a CAIR NO<sub>x</sub> unit shall be exempt from the initial certification requirements of this rule for a monitoring system under paragraph (A)(1)(a) of this rule if the following conditions are met:
  - (a) The monitoring system has been previously certified in accordance with 40 CFR Part 75; and
  - (b) The applicable quality-assurance and quality-control requirements of 40 CFR 75.21 and 40 CFR Part 75, Appendices B, D, and E are fully met for the certified monitoring system described in paragraph (B)(1)(a) of this rule.
- (2) The recertification provisions of this rule shall apply to a monitoring system under paragraph (A)(1)(a) of this rule exempt from initial certification requirements under paragraph (B)(1) of this rule.
- (3) If the administrator has previously approved a petition under 40 CFR 75.17(a) or (b) for apportioning the NO<sub>x</sub> emission rate measured in a common stack or a petition under 40 CFR 75.66 for an alternative to a requirement in 40 CFR 75.12 or 40 CFR 75.17, the CAIR designated representative shall resubmit the petition to the administrator under paragraph (F)(1) of this rule to determine whether the approval applies under the CAIR NO<sub>x</sub> annual trading program.
- (4) Except as provided in paragraph (B)(1) of this rule, the owner or operator of a CAIR NO<sub>x</sub> unit shall comply with the following initial certification and recertification procedures for a continuous monitoring system (i.e., a continuous emission monitoring system and an excepted monitoring system under 40 CFR Part 75, Appendices D and E) under paragraph (A)(1)(a) of this rule. The owner or operator of a unit that qualifies to use the low mass emissions excepted monitoring methodology under 40 CFR 75.19 or that qualifies to use an alternative monitoring system under 40 CFR Part 75, Subpart E shall comply with the procedures in paragraph (B)(5) or (B)(6) of this rule respectively.
  - (a) Requirements for initial certification. The owner or operator shall ensure that each continuous monitoring system under paragraph (A)(1)(a) of this rule of the Administrative Code (including the automated data acquisition and handling system) successfully completes all of the initial certification testing required under 40 CFR 75.20 by the applicable deadline in paragraph (A)(2) of this rule. In addition, whenever the owner or operator installs a monitoring system to meet the requirements of this rule in a

location where no such monitoring system was previously installed, initial certification in accordance with 40 CFR 75.20 is required.

- (b) Requirements for recertification. Whenever the owner or operator makes a replacement, modification, or change in any certified continuous emission monitoring system under paragraph (A)(1)(a) of this rule that may significantly affect the ability of the system to accurately measure or record NO<sub>x</sub> mass emissions or heat input rate or to meet the quality-assurance and quality-control requirements of 40 CFR 75.21 or 40 CFR Part 75, Appendix B, the owner or operator shall recertify the monitoring system in accordance with 40 CFR 75.20(b). Furthermore, whenever the owner or operator makes a replacement, modification, or change to the flue gas handling system or the unit's operation that may significantly change the stack flow or concentration profile, the owner or operator shall recertify each continuous emission monitoring system whose accuracy is potentially affected by the change, in accordance with 40 CFR 75.20(b). Examples of changes to a continuous emission monitoring system that require recertification include replacement of the analyzer, complete replacement of an existing continuous emission monitoring system, or change in location or orientation of the sampling probe or site. Any fuel flowmeter system, and any excepted NO<sub>x</sub> monitoring system under 40 CFR Part 75, Appendix E under paragraph (A)(1)(a) of this rule are subject to the recertification requirements in 40 CFR 75.20(g)(6).
- (c) Approval process for initial certification and recertification. Paragraphs (B)(4)(c)(i) to (B)(4)(c)(iv) of this rule apply to both initial certification and recertification of a continuous monitoring system under paragraph (A)(1)(a) of this rule. For recertifications, replace the words "certification" and "initial certification" with the word "recertification", replace the word "certified" with the word "recertified," and follow the procedures in 40 CFR 75.20(b)(5) and 40 CFR 75.20(g)(7) in lieu of the procedures in paragraph (B)(4)(c)(v) of this rule.
  - (i) Notification of certification. The CAIR designated representative shall submit to the director, the USEPA region V office, and the administrator written notice of the dates of certification testing, in accordance with paragraph (D) of this rule.
  - (ii) Certification application. The CAIR designated representative shall submit to the director a certification application for each monitoring system. A complete certification application shall include the information specified in 40 CFR 75.63.
  - (iii) Provisional certification date. The provisional certification date for a monitoring system shall be determined in accordance with 40 CFR 75.20(a)(3). A provisionally certified monitoring system may be used

under the CAIR NO<sub>x</sub> annual trading program for a period not to exceed one hundred twenty days after receipt by the director of the complete certification application for the monitoring system under paragraph (B)(4)(c)(ii) of this rule. Data measured and recorded by the provisionally certified monitoring system, in accordance with the requirements of 40 CFR Part 75, shall be considered valid quality assured data (retroactive to the date and time of provisional certification), provided that the director does not invalidate the provisional certification by issuing a notice of disapproval within one hundred twenty days of the date of receipt of the complete certification application by the director.

- (iv) Certification application approval process. The director shall issue a written notice of approval or disapproval of the certification application to the owner or operator within one hundred twenty days of receipt of the complete certification application under paragraph (B)(4)(c)(ii) of this rule. In the event the director does not issue such a notice within such one hundred twenty-day period, each monitoring system that meets the applicable performance requirements of 40 CFR Part 75 and is included in the certification application shall be deemed certified for use under the CAIR NO<sub>x</sub> annual trading program.
  - (a) Approval notice. If the certification application is complete and shows that each monitoring system meets the applicable performance requirements of 40 CFR Part 75, then the director shall issue a written notice of approval of the certification application within one hundred twenty days of receipt.
  - (b) Incomplete application notice. If the certification application is not complete, then the director shall issue a written notice of incompleteness that sets a reasonable date by which the CAIR designated representative must submit the additional information required to complete the certification application. If the CAIR designated representative does not comply with the notice of incompleteness by the specified date, then the director may issue a notice of disapproval under paragraph (B)(4)(c)(iv)(c) of this rule. The one hundred twenty-day review period shall not begin before receipt of a complete certification application.
  - (c) Disapproval notice. If the certification application shows that any monitoring system does not meet the performance requirements of 40 CFR Part 75 or if the certification application is incomplete and the requirement for disapproval under paragraph (B)(4)(c)(iv)(b) of this rule is met, then the director shall issue a written notice of disapproval of the certification application. Upon issuance of such notice of disapproval, the provisional certification is invalidated by

the director and the data measured and recorded by each uncertified monitoring system shall not be considered valid quality-assured data beginning with the date and hour of provisional certification (as defined under 40 CFR 75.20(a)(3)). The owner or operator shall follow the procedures for loss of certification in paragraph (B)(4)(c)(v) of this rule for each monitoring system that is disapproved for initial certification.

- (d) Audit decertification. The director or, for a CAIR NO<sub>x</sub> opt-in unit or a unit for which a CAIR opt-in permit application is submitted and not withdrawn and a CAIR opt-in permit is not yet issued or denied under rule 3745-109-08 of the Administrative Code, the administrator may issue a notice of disapproval of the certification status of a monitor in accordance with paragraph (C)(2) of this rule.
- (v) Procedures for loss of certification. If the director or the administrator issues a notice of disapproval of a certification application under paragraph (B)(4)(c)(iv)(c) of this rule or a notice of disapproval of certification status under paragraph (B)(4)(c)(iv)(d) of this rule, then:
  - (a) The owner or operator shall substitute the following values, for each disapproved monitoring system, for each hour of unit operation during the period of invalid data specified under 40 CFR 75.20(a)(4)(iii), 40 CFR 75.20(g)(7), or 40 CFR 75.21(e) and continuing until the applicable date and hour specified under 40 CFR 75.20(a)(5)(i) or 40 CFR 75.20(g)(7):
    - (i) For a disapproved NO<sub>x</sub> emission rate (i.e., NO<sub>x</sub>-diluent) system, the maximum potential NO<sub>x</sub> emission rate, as defined in 40 CFR 72.2;
    - (ii) For a disapproved NO<sub>x</sub> pollutant concentration monitor and disapproved flow monitor, respectively, the maximum potential concentration of NO<sub>x</sub> and the maximum potential flow rate, as defined in 40 CFR Part 75, Appendix A, Sections 2.1.2.1 and 2.1.4.1;
    - (iii) For a disapproved moisture monitoring system and disapproved diluent gas monitoring system, respectively, the minimum potential moisture percentage and either the maximum potential CO<sub>2</sub> concentration or the minimum potential O<sub>2</sub> concentration (as applicable), as defined in 40 CFR Part 75, Appendix A, Sections 2.1.3.1, 2.1.3.2, and 2.1.5;

- (iv) For a disapproved fuel flowmeter system, the maximum potential fuel flow rate, as defined in 40 CFR Part 75, Appendix D, Section 2.4.2.1; and
        - (v) For a disapproved excepted NO<sub>x</sub> monitoring system under 40 CFR Part 75, Appendix E, the fuel-specific maximum potential NO<sub>x</sub> emission rate, as defined in 40 CFR 72.2.
  - (b) The CAIR designated representative shall submit a notification of certification retest dates and a new certification application in accordance with paragraphs (B)(4)(c)(i) and (B)(4)(c)(ii) of this rule.
  - (c) The owner or operator shall repeat all certification tests or other requirements that were failed by the monitoring system, as indicated in the director's or the administrator's notice of disapproval, no later than thirty unit operating days after the date of issuance of the notice of disapproval.
- (5) Initial certification and recertification procedures for units using the low mass emission excepted methodology under 40 CFR 75.19. The owner or operator of a unit qualified to use the low mass emissions (LME) excepted methodology under 40 CFR 75.19 shall meet the applicable certification and recertification requirements in 40 CFR 75.19(a)(2) and 40 CFR 75.20(h). If the owner or operator of such a unit elects to certify a fuel flowmeter system for heat input determination, the owner or operator shall also meet the certification and recertification requirements in 40 CFR 75.20(g).
- (6) Certification/recertification procedures for alternative monitoring systems. The CAIR designated representative of each unit for which the owner or operator intends to use an alternative monitoring system approved by the administrator and, if applicable, the director under 40 CFR Part 75, Subpart E shall comply with the applicable notification and application procedures of 40 CFR 75.20(f).

(C) Out of control periods.

- (1) Whenever any monitoring system fails to meet the quality-assurance and quality-control requirements or data validation requirements of 40 CFR Part 75, data shall be substituted using the applicable missing data procedures in 40 CFR Part 75, Subparts D or H, or 40 CFR Part 75, Appendices D or E.
- (2) Audit decertification. Whenever both an audit of a monitoring system and a review of the initial certification or recertification application reveal that any monitoring system should not have been certified or recertified because it did not meet a particular performance specification or other requirement under paragraph (B) of this rule or the applicable provisions of 40 CFR Part 75, both at

the time of the initial certification or recertification application submission and at the time of the audit, the director or, for a CAIR NO<sub>x</sub> opt-in unit or a unit for which a CAIR opt-in permit application is submitted and not withdrawn and a CAIR opt-in permit is not yet issued or denied under rule 3745-109-08 of the Administrative Code, the administrator shall issue a notice of disapproval of the certification status of such monitoring system. For the purposes of this paragraph, an audit shall be either a field audit or an audit of any information submitted to the director or the administrator. By issuing the notice of disapproval, the director or the administrator revokes prospectively the certification status of the monitoring system. The data measured and recorded by the monitoring system shall not be considered valid quality-assured data from the date of issuance of the notification of the revoked certification status until the date and time that the owner or operator completes subsequently approved initial certification or recertification tests for the monitoring system. The owner or operator shall follow the applicable initial certification or recertification procedures in paragraph (B) of this rule for each disapproved monitoring system.

(D) Notifications.

The CAIR designated representative for a CAIR NO<sub>x</sub> unit shall submit written notice to the director and the administrator in accordance with 40 CFR 75.61.

(E) Record keeping and reporting.

- (1) General provisions. The CAIR designated representative shall comply with all record keeping and reporting requirements in this paragraph, the applicable record keeping and reporting requirements under 40 CFR 75.73, and the requirements of paragraph (A)(5)(a) of rule 3745-109-02 of the Administrative Code.
- (2) Monitoring plans. The owner or operator of a CAIR NO<sub>x</sub> unit shall comply with requirements of 40 CFR 75.73(c) and (e) and, for a unit for which a CAIR opt-in permit application is submitted and not withdrawn and a CAIR opt-in permit is not yet issued or denied under paragraphs (D) and (E)(1) of rule 3745-109-08 of the Administrative Code.
- (3) Certification applications. The CAIR designated representative shall submit an application to the director within forty-five days after completing all initial certification or recertification tests required under paragraph (B) of this rule, including the information required under 40 CFR 75.63.
- (4) Quarterly reports. The CAIR designated representative shall submit quarterly reports, as follows:

- (a) The CAIR designated representative shall report the NO<sub>x</sub> mass emissions data and heat input data for the CAIR NO<sub>x</sub> unit, in an electronic quarterly report in a format prescribed by the administrator, for each calendar quarter beginning with:
    - (i) For a unit that commences commercial operation before July 1, 2007, the calendar quarter covering January 1, 2008 to March 31, 2008;
    - (ii) For a unit that commences commercial operation on or after July 1, 2007, the calendar quarter corresponding to the earlier of the date of provisional certification or the applicable deadline for initial certification under paragraph (A)(2) of this rule, unless that quarter is the third or fourth quarter of 2007, in which case reporting shall commence in the quarter covering January 1, 2008 to March 31, 2008;
    - (iii) Notwithstanding paragraphs (E)(4)(a)(i) and (E)(4)(a)(ii) of this rule, for a unit for which a CAIR opt-in permit application is submitted and not withdrawn and a CAIR opt-in permit is not yet issued or denied under rule 3745-109-08 of the Administrative Code, the calendar quarter corresponding to the date specified in paragraph (E)(2) of rule 3745-109-08 of the Administrative Code; and
    - (iv) Notwithstanding paragraphs (E)(4)(a)(i) and (E)(4)(a)(ii) of this rule, for a CAIR NO<sub>x</sub> opt-in unit under rule 3745-109-08 of the Administrative Code, the calendar quarter corresponding to the date on which the CAIR NO<sub>x</sub> opt-in unit enters the CAIR NO<sub>x</sub> annual trading program as provided in paragraph (E)(7) of rule 3745-109-08 of the Administrative Code.
  - (b) The CAIR designated representative shall submit each quarterly report to the administrator within thirty days following the end of the calendar quarter covered by the report. Quarterly reports shall be submitted in the manner specified in 40 CFR 75.73(f);
  - (c) For CAIR NO<sub>x</sub> units that are also subject to an acid rain emissions limitation or the CAIR NO<sub>x</sub> ozone season trading program, CAIR SO<sub>2</sub> trading program, or Hg budget trading program, quarterly reports shall include the applicable data and information required by 40 CFR Part 75, Subparts F to I, as applicable, in addition to the NO<sub>x</sub> mass emission data, heat input data, and other information required by this rule.
- (5) Compliance certification. The CAIR designated representative shall submit to the administrator a compliance certification (in a format prescribed by the administrator) in support of each quarterly report based on reasonable inquiry of those persons with primary responsibility for ensuring that all of the unit's emissions are correctly and fully monitored. The certification shall state that:

- (a) The monitoring data submitted were recorded in accordance with the applicable requirements of this rule and 40 CFR Part 75, including the quality assurance procedures and specifications; and
- (b) For a unit with add-on NO<sub>x</sub> emission controls and for all hours where NO<sub>x</sub> data are substituted in accordance with 40 CFR 75.34(a)(1), the add-on emission controls were operating within the range of parameters listed in the quality assurance/quality control program under 40 CFR Part 75, Appendix B, and the substitute data values do not systematically underestimate NO<sub>x</sub> emissions.

(F) Petitions.

- (1) Except as provided in paragraph (F)(2)(b) of this rule, the CAIR designated representative of a CAIR NO<sub>x</sub> unit that is subject to an acid rain emissions limitation may submit a petition under 40 CFR 75.66 to the administrator requesting approval to apply an alternative to any requirement of this rule. Application of an alternative to any requirement of this rule is in accordance with this rule only to the extent that the petition is approved in writing by the administrator, in consultation with the director.

(2) Petition process.

- (a) The CAIR designated representative of a CAIR NO<sub>x</sub> unit that is not subject to an acid rain emissions limitation may submit a petition under 40 CFR 75.66 to the director and the administrator requesting approval to apply an alternative to any requirement of this rule. Application of an alternative to any requirement of this rule is in accordance with this rule only to the extent that the petition is approved in writing by both the director and the administrator.
- (b) The CAIR designated representative of a CAIR NO<sub>x</sub> unit that is subject to an acid rain emissions limitation may submit a petition under 40 CFR 75.66 to the director and the administrator requesting approval to apply an alternative to a requirement concerning any additional continuous emission monitoring system required under 40 CFR 75.72. Application of an alternative to any such requirement is in accordance with this rule only to the extent that the petition is approved in writing by both the director and the administrator.

3745-109-08      **CAIR NOx opt-in units.**

[Comment: For dates of non-regulatory government publications, publications of recognized organizations and associations, federal rules, and federal statutory provisions referenced in this rule, see paragraph (H) of rule 3745-109-01 of the Administrative Code titled "Incorporation by Reference."]

(A) Applicability.

A CAIR NOx opt-in unit must be a unit that:

- (1) Is located in the state;
- (2) Is not a CAIR NOx unit under paragraph (C) of rule 3745-109-01 of the Administrative Code and is not covered by a retired unit exemption under paragraph (D) of rule 3745-109-01 of the Administrative Code that is in effect;
- (3) Is not covered by a retired unit exemption under 40 CFR 72.8 that is in effect;
- (4) Has or is required or qualified to have a Title V operating permit or other federally enforceable permit; and
- (5) Vents all of its emissions to a stack and can meet the monitoring, record keeping, and reporting requirements of rule 3745-109-07 of the Administrative Code.

(B) General requirements.

- (1) Except as otherwise provided in paragraphs (A) to (C) and (E) to (G) of rule 3745-109-01 of the Administrative Code, rules 3745-109-02, 3745-109-03, and 3745-109-05 to 3745-109-07 of the Administrative Code, a CAIR NOx opt-in unit shall be treated as a CAIR NOx unit for purposes of applying such paragraphs and rules.
- (2) Solely for purposes of applying, as provided in this rule, the requirements of rule 3745-109-07 of the Administrative Code to a unit for which a CAIR opt-in permit application is submitted and not withdrawn and a CAIR opt-in permit is not yet issued or denied under this rule, such unit shall be treated as a CAIR NOx unit before issuance of a CAIR opt-in permit for such unit.

(C) CAIR designated representative.

Any CAIR NOx opt-in unit, and any unit for which a CAIR opt-in permit application is submitted and not withdrawn and a CAIR opt-in permit is not yet issued or denied under this rule, located at the same source as one or more CAIR NOx units shall

have the same CAIR designated representative and alternate CAIR designated representative as such CAIR NOx units.

(D) Applying for CAIR opt-in permit.

- (1) Applying for initial CAIR opt-in permit. The CAIR designated representative of a unit meeting the requirements for a CAIR NOx opt-in unit in paragraph (A) of this rule may apply for an initial CAIR opt-in permit at any time, except as provided under paragraphs (G)(6) and (G)(7) of rule 3745-109-08 of the Administrative Code, and, in order to apply, must submit the following:
  - (a) A complete CAIR permit application under paragraph (C) of rule 3745-109-03 of the Administrative Code;
  - (b) A certification, in a format specified by the director, that the unit:
    - (i) Is not a CAIR NOx unit under paragraph (C) of rule 3745-109-01 of the Administrative Code and is not covered by a retired unit exemption under paragraph (D) of rule 3745-109-01 of the Administrative Code that is in effect;
    - (ii) Is not covered by a retired unit exemption under 40 CFR 72.8 that is in effect;
    - (iii) Vents all of its emissions to a stack; and
    - (iv) Has documented heat input for more than eight hundred seventy-six hours during the six months immediately preceding submission of the CAIR permit application under paragraph (C) of rule 3745-109-03 of the Administrative Code;
  - (c) A monitoring plan in accordance with rule 3745-109-07 of the Administrative Code;
  - (d) A complete certificate of representation under paragraph (D) of rule 3745-109-02 of the Administrative Code consistent with paragraph (D) of this rule, if no CAIR designated representative has been previously designated for the source that includes the unit; and
  - (e) A statement, in a format specified by the director, whether the CAIR designated representative requests that the unit be allocated CAIR NOx allowances under paragraph (I)(2) or (I)(3) of this rule (subject to the conditions in paragraphs (E)(8) and (G)(7) of this rule). If allocation under paragraph (I)(3) of this rule is requested, this statement shall include a statement that the owners and operators of the unit intend to repower the

unit before January 1, 2015 and that they will provide, upon request, documentation demonstrating such intent.

(2) Duty to reapply.

- (a) The CAIR designated representative of a CAIR NO<sub>x</sub> opt-in unit shall submit a complete CAIR permit application under paragraph (C) of rule 3745-109-03 of the Administrative Code to renew the CAIR opt-in unit permit in accordance with the director's regulations for Title V operating permits, or the director's regulations for other federally enforceable permits if applicable, addressing permit renewal.
- (b) Unless the director issues a notification of acceptance of withdrawal of the CAIR NO<sub>x</sub> opt-in unit from the CAIR NO<sub>x</sub> annual trading program in accordance with paragraph (G) of this rule or the unit becomes a CAIR NO<sub>x</sub> unit under paragraph (C) of rule 3745-109-01 of the Administrative Code, the CAIR NO<sub>x</sub> opt-in unit shall remain subject to the requirements for a CAIR NO<sub>x</sub> opt-in unit, even if the CAIR designated representative for the CAIR NO<sub>x</sub> opt-in unit fails to submit a CAIR permit application that is required for renewal of the CAIR opt-in permit under paragraph (D)(2)(a) of this rule.

(E) Opt-in process.

The director shall issue or deny a CAIR opt-in permit for a unit for which an initial application for a CAIR opt-in permit under paragraph (D) of this rule is submitted in accordance with the following:

- (1) Interim review of monitoring plan. The director and the administrator shall determine, on an interim basis, the sufficiency of the monitoring plan accompanying the initial application for a CAIR opt-in permit under paragraph (D) of this rule. A monitoring plan is sufficient, for purposes of interim review, if the plan appears to contain information demonstrating that the NO<sub>x</sub> emissions rate and heat input of the unit and all other applicable parameters are monitored and reported in accordance with rule 3745-109-07 of the Administrative Code. A determination of sufficiency shall not be construed as acceptance or approval of the monitoring plan.
- (2) Monitoring and reporting.
  - (a) Monitoring.
    - (i) If the director and the administrator determine that the monitoring plan is sufficient under paragraph (E)(1) of this rule, the owner or operator shall monitor and report the NO<sub>x</sub> emissions rate and the heat input of the unit and all other applicable parameters, in accordance with rule

3745-109-07 of the Administrative Code, starting on the date of certification of the appropriate monitoring systems under rule 3745-109-07 of the Administrative Code and continuing until a CAIR opt-in permit is denied under paragraph (E)(6) of this rule or, if a CAIR opt-in permit is issued, the date and time when the unit is withdrawn from the CAIR NO<sub>x</sub> annual trading program in accordance with paragraph (G) of this rule.

- (ii) The monitoring and reporting under paragraph (E)(2)(a)(i) of this rule shall include the entire control period immediately before the date on which the unit enters the CAIR NO<sub>x</sub> annual trading program under paragraph (E)(7) of this rule, during which period monitoring system availability must not be less than ninety per cent under rule 3745-109-07 of the Administrative Code and the unit must be in full compliance with any applicable state or federal emissions or emissions-related requirements.
- (b) To the extent the NO<sub>x</sub> emissions rate and the heat input of the unit are monitored and reported in accordance with rule 3745-109-07 of the Administrative Code for one or more control periods, in addition to the control period under paragraph (E)(2)(a)(ii) of this rule, during which control periods monitoring system availability is not less than ninety per cent under rule 3745-109-07 of the Administrative Code and the unit is in full compliance with any applicable state or federal emissions or emissions-related requirements and which control periods begin not more than three years before the unit enters the CAIR NO<sub>x</sub> annual trading program under paragraph (E)(7) of this rule, such information shall be used as provided in paragraphs (E)(3) and (E)(4) of this rule.
- (3) Baseline heat input. The unit's baseline heat input shall equal:
- (a) If the unit's NO<sub>x</sub> emissions rate and heat input are monitored and reported for only one control period, in accordance with paragraph (E)(2)(a) of this rule, the unit's total heat input (in mmBtu) for the control period; or
  - (b) If the unit's NO<sub>x</sub> emissions rate and heat input are monitored and reported for more than one control period, in accordance with paragraphs (E)(2)(a) and (E)(2)(b) of this rule, the average of the amounts of the unit's total heat input (in mmBtu) for the control period under paragraphs (E)(2)(a)(ii) and (E)(2)(b) of this rule.
- (4) Baseline NO<sub>x</sub> emission rate. The unit's baseline NO<sub>x</sub> emission rate shall equal:
- (a) If the unit's NO<sub>x</sub> emissions rate and heat input are monitored and reported for only one control period, in accordance with paragraph (E)(2)(a) of this

rule, the unit's NOx emissions rate (in pounds per mmBtu) for the control period;

- (b) If the unit's NOx emissions rate and heat input are monitored and reported for more than one control period, in accordance with paragraphs (E)(2)(a) and (E)(2)(b) of this rule, and the unit does not have add-on NOx emission controls during any such control periods, the average of the amounts of the unit's NOx emissions rate (in pounds per mmBtu) for the control period under paragraphs (E)(2)(a)(ii) and (E)(2)(b) of this rule; or
  - (c) If the unit's NOx emissions rate and heat input are monitored and reported for more than one control period, in accordance with paragraphs (E)(2)(a) and (E)(2)(b) of this rule, and the unit has add-on NOx emission controls during any such control periods, the average of the amounts of the unit's NOx emissions rate (in pounds per mmBtu) for such control period during which the unit has add-on NOx emission controls.
- (5) Issuance of CAIR opt-in permit. After calculating the baseline heat input and the baseline NOx emissions rate for the unit under paragraphs (E)(3) and (E)(4) of this rule and if the director determines that the CAIR designated representative shows that the unit meets the requirements for a CAIR NOx opt-in unit in paragraph (A) of this rule and meets the elements certified in paragraph (D)(1)(b) of this rule, the director shall issue a CAIR opt-in permit. The director shall provide a copy of the CAIR opt-in permit to the administrator, who shall then establish a compliance account for the source that includes the CAIR NOx opt-in unit unless the source already has a compliance account.
- (6) Denial of CAIR opt-in permit. Notwithstanding paragraphs (E)(1) to (E)(5) of this rule, if at any time before issuance of a CAIR opt-in permit for the unit, the director determines that the CAIR designated representative fails to show that the unit meets the requirements for a CAIR NOx opt-in unit in paragraph (A) of this rule or meets the elements certified in paragraph (D)(1)(b) of this rule, the director shall issue a denial of a CAIR NOx opt-in permit for the unit.
- (7) Date of entry into CAIR NOx annual trading program. A unit for which an initial CAIR opt-in permit is issued by the director shall become a CAIR NOx opt-in unit, and a CAIR NOx unit, as of the later of January 1, 2009 or January first of the first control period during which such CAIR opt-in permit is issued.
- (8) Repowered CAIR NOx opt-in unit.
- (a) If the CAIR designated representative requests, and the director issues a CAIR opt-in permit providing for, allocation to a CAIR NOx opt-in unit of CAIR NOx allowances under paragraph (I)(3) of this rule and such unit is repowered after its date of entry into the CAIR NOx annual trading program under paragraph (E)(7) of this rule, the repowered unit shall be treated as a

CAIR NO<sub>x</sub> opt-in unit replacing the original CAIR NO<sub>x</sub> opt-in unit, as of the date of start-up of the repowered unit's combustion chamber.

- (b) Notwithstanding paragraphs (E)(3) and (E)(4) of this rule, as of the date of start-up under paragraph (E)(8)(a) of this rule, the repowered unit shall be deemed to have the same date of commencement of operation, date of commencement of commercial operation, baseline heat input, and baseline NO<sub>x</sub> emission rate as the original CAIR NO<sub>x</sub> opt-in unit, and the original CAIR NO<sub>x</sub> opt-in unit shall no longer be treated as a CAIR NO<sub>x</sub> opt-in unit or a CAIR NO<sub>x</sub> unit.

(F) CAIR opt-in permit contents.

(1) Each CAIR opt-in permit shall contain:

- (a) All elements required for a complete CAIR permit application under paragraph (C) of rule 3745-109-03 of the Administrative Code;
  - (b) The certification in paragraph (D)(1)(b) of this rule;
  - (c) The unit's baseline heat input under paragraph (E)(3) of this rule;
  - (d) The unit's baseline NO<sub>x</sub> emission rate under paragraph (E)(4) of this rule;
  - (e) A statement whether the unit is to be allocated CAIR NO<sub>x</sub> allowances under paragraph (I)(2) or (I)(3) of this rule (subject to the conditions in paragraphs (E)(8) and (G)(7) of this rule);
  - (f) A statement that the unit may withdraw from the CAIR NO<sub>x</sub> annual trading program only in accordance with paragraph (G) of rule; and
  - (g) A statement that the unit is subject to, and the owners and operators of the unit must comply with, the requirements of paragraph (H) of this rule.
- (2) Each CAIR opt-in permit is deemed to incorporate automatically the definitions of terms under paragraph (B) of rule 3745-109-01 of the Administrative Code and, upon recordation by the administrator under rule 3745-109-05 or 3745-109-06 of the Administrative Code, every allocation, transfer, or deduction of CAIR NO<sub>x</sub> allowances to or from the compliance account of the source that includes a CAIR NO<sub>x</sub> opt-in unit covered by the CAIR opt-in permit.
- (3) The CAIR opt-in permit shall be included, in a format specified by the permitting authority, in the CAIR permit for the source where the CAIR NO<sub>x</sub> opt-in unit is located and in a Title V operating permit or other federally enforceable permit for the source.

(G) Withdrawal from CAIR NOx annual trading program.

Except as provided under paragraph (G)(7) of this rule, a CAIR NOx opt-in unit may withdraw from the CAIR NOx annual trading program, but only if the director issues a notification to the CAIR designated representative of the CAIR NOx opt-in unit of the acceptance of the withdrawal of the CAIR NOx opt-in unit in accordance with paragraph (G)(4) of this rule.

- (1) Requesting withdrawal. In order to withdraw a CAIR NOx opt-in unit from the CAIR NOx annual trading program, the CAIR designated representative of the CAIR NOx opt-in unit shall submit to the director a request to withdraw effective as of midnight of December thirty-first of a specified calendar year, which date must be at least four years after December thirty-first of the year of entry into the CAIR NOx annual trading program under paragraph (E)(7) of this rule. The request must be submitted no later than ninety days before the requested effective date of withdrawal.
- (2) Conditions for withdrawal. Before a CAIR NOx opt-in unit covered by a request under paragraph (G)(1) of this rule may withdraw from the CAIR NOx annual trading program and the CAIR opt-in permit may be terminated under paragraph (G)(5) of this rule, the following conditions must be met:
  - (a) For the control period ending on the date on which the withdrawal is to be effective, the source that includes the CAIR NOx opt-in unit must meet the requirement to hold CAIR NOx allowances under paragraph (E)(3) of rule 3745-109-01 of the Administrative Code and cannot have any excess emissions.
  - (b) After the requirement for withdrawal under paragraph (G)(2)(a) of this rule is met, the administrator shall deduct from the compliance account of the source that includes the CAIR NOx opt-in unit CAIR NOx allowances equal in amount to and allocated for the same or a prior control period as any CAIR NOx allowances allocated to the CAIR NOx opt-in unit under paragraph (I) of this rule for any control period for which the withdrawal is to be effective. If there are no remaining CAIR NOx units at the source, the administrator shall close the compliance account, and the owners and operators of the CAIR NOx opt-in unit may submit a CAIR NOx allowance transfer for any remaining CAIR NOx allowances to another CAIR NOx allowance tracking system in accordance with rule 3745-109-06 of the Administrative Code.
- (3) Notification.
  - (a) After the requirements for withdrawal under paragraphs (G)(1) and (G)(2) of this rule are met (including deduction of the full amount of CAIR NOx allowances required), the director shall issue a notification to the CAIR

designated representative of the CAIR NO<sub>x</sub> opt-in unit of the acceptance of the withdrawal of the CAIR NO<sub>x</sub> opt-in unit as of midnight on December thirty-first of the calendar year for which the withdrawal was requested.

- (b) If the requirements for withdrawal under paragraphs (G)(1) and (G)(2) of this rule are not met, the director shall issue a notification to the CAIR designated representative of the CAIR NO<sub>x</sub> opt-in unit that the CAIR NO<sub>x</sub> opt-in unit's request to withdraw is denied. Such CAIR NO<sub>x</sub> opt-in unit shall continue to be a CAIR NO<sub>x</sub> opt-in unit.
- (4) Permit amendment. After the director issues a notification under paragraph (G)(3)(a) of this rule that the requirements for withdrawal have been met, the director shall revise the CAIR permit covering the CAIR NO<sub>x</sub> opt-in unit to terminate the CAIR opt-in permit for such unit as of the effective date specified under paragraph (E)(3)(a) of this rule. The unit shall continue to be a CAIR NO<sub>x</sub> opt-in unit until the effective date of the termination and shall comply with all requirements under the CAIR NO<sub>x</sub> annual trading program concerning any control periods for which the unit is a CAIR NO<sub>x</sub> opt-in unit, even if such requirements arise or must be complied with after the withdrawal takes effect.
  - (5) Reapplication upon failure to meet conditions of withdrawal. If the director denies the CAIR NO<sub>x</sub> opt-in unit's request to withdraw, the CAIR designated representative may submit another request to withdraw in accordance with paragraphs (G)(1) and (G)(2) of this rule.
  - (6) Ability to reapply to the CAIR NO<sub>x</sub> annual trading program. Once a CAIR NO<sub>x</sub> opt-in unit withdraws from the CAIR NO<sub>x</sub> annual trading program and its CAIR opt-in permit is terminated under this rule, the CAIR designated representative may not submit another application for a CAIR opt-in permit under paragraph (D) of this rule for such CAIR NO<sub>x</sub> opt-in unit before the date that is four years after the date on which the withdrawal became effective. Such new application for a CAIR opt-in permit shall be treated as an initial application for a CAIR opt-in permit under paragraph (E) of this rule.
  - (7) Inability to withdraw. Notwithstanding paragraphs (G)(1) to (G)(6) of this rule, a CAIR NO<sub>x</sub> opt-in unit shall not be eligible to withdraw from the CAIR NO<sub>x</sub> annual trading program if the CAIR designated representative of the CAIR NO<sub>x</sub> opt-in unit requests, and the director issues a CAIR NO<sub>x</sub> opt-in permit providing for, allocation to the CAIR NO<sub>x</sub> opt-in unit of CAIR NO<sub>x</sub> allowances under paragraph (I)(3) of this rule.
- (H) Change in regulatory status.
- (1) Notification. If a CAIR NO<sub>x</sub> opt-in unit becomes a CAIR NO<sub>x</sub> unit under paragraph (C) of rule 3745-109-01 of the Administrative Code, then the CAIR designated representative shall notify in writing the director and the

administrator of such change in the CAIR NO<sub>x</sub> opt-in unit's regulatory status, within thirty days of such change.

(2) Director's and administrator's actions.

(a) If a CAIR NO<sub>x</sub> opt-in unit becomes a CAIR NO<sub>x</sub> unit under paragraph (C) of rule 3745-109-01 of the Administrative Code, the director shall revise the CAIR NO<sub>x</sub> opt-in unit's CAIR opt-in permit to meet the requirements of a CAIR permit under paragraph (D) of rule 3745-109-03 of the Administrative Code, and remove the CAIR opt-in permit provisions, as of the date on which the CAIR NO<sub>x</sub> opt-in unit becomes a CAIR NO<sub>x</sub> unit under paragraph (C) of rule 3745-109-01 of the Administrative Code.

(b) Allowance deductions.

(i) The administrator shall deduct from the compliance account of the source that includes the CAIR NO<sub>x</sub> opt-in unit that becomes a CAIR NO<sub>x</sub> unit under paragraph (C) of rule 3745-109-01 of the Administrative Code, CAIR NO<sub>x</sub> allowances equal in amount to and allocated for the same or a prior control period as:

(a) Any CAIR NO<sub>x</sub> allowances allocated to the CAIR NO<sub>x</sub> opt-in unit under paragraph (I) of this rule for any control period after the date on which the CAIR NO<sub>x</sub> opt-in unit becomes a CAIR NO<sub>x</sub> unit under paragraph (C) of rule 3745-109-01 of the Administrative Code; and

(b) If the date on which the CAIR NO<sub>x</sub> opt-in unit becomes a CAIR NO<sub>x</sub> unit under paragraph (C) of rule 3745-109-01 of the Administrative Code is not December thirty-first, the CAIR NO<sub>x</sub> allowances allocated to the CAIR NO<sub>x</sub> opt-in unit under paragraph (I) of this rule for the control period that includes the date on which the CAIR NO<sub>x</sub> opt-in unit becomes a CAIR NO<sub>x</sub> unit under paragraph (C) of rule 3745-109-01 of the Administrative Code, multiplied by the ratio of the number of days, in the control period, starting with the date on which the CAIR NO<sub>x</sub> opt-in unit becomes a CAIR NO<sub>x</sub> unit under paragraph (C) of rule 3745-109-01 of the Administrative Code divided by the total number of days in the control period and rounded to the nearest whole allowance as appropriate.

(ii) The CAIR designated representative shall ensure that the compliance account of the source that includes the CAIR NO<sub>x</sub> opt-in unit that becomes a CAIR NO<sub>x</sub> unit under paragraph (C) of rule 3745-109-01 of the Administrative Code contains the CAIR NO<sub>x</sub> allowances necessary

for completion of the deduction under paragraph (H)(2)(b)(i) of this rule.

(c) Allowance allocations.

(i) For every control period after the date on which the CAIR NO<sub>x</sub> opt-in unit becomes a CAIR NO<sub>x</sub> unit under paragraph (C) of rule 3745-109-01 of the Administrative Code, the CAIR NO<sub>x</sub> opt-in unit shall be allocated CAIR NO<sub>x</sub> allowances under paragraph (C) of rule 3745-109-04 of the Administrative Code.

(ii) If the date on which the CAIR NO<sub>x</sub> opt-in unit becomes a CAIR NO<sub>x</sub> unit under paragraph (C) of rule 3745-109-01 of the Administrative Code is not December thirty-first, the following amount of CAIR NO<sub>x</sub> allowances shall be allocated to the CAIR NO<sub>x</sub> opt-in unit (as a CAIR NO<sub>x</sub> unit) under paragraph (C) of rule 3745-109-04 of the Administrative Code for the control period that includes the date on which the CAIR NO<sub>x</sub> opt-in unit becomes a CAIR NO<sub>x</sub> unit under paragraph (C) of rule 3745-109-01 of the Administrative Code:

(a) The amount of CAIR NO<sub>x</sub> allowances otherwise allocated to the CAIR NO<sub>x</sub> opt-in unit (as a CAIR NO<sub>x</sub> unit) under paragraph (C) of rule 3745-109-04 of the Administrative Code for the control period multiplied by;

(b) The ratio of the number of days, in the control period, starting with the date on which the CAIR NO<sub>x</sub> opt-in unit becomes a CAIR NO<sub>x</sub> unit under paragraph (C) of rule 3745-109-01 of the Administrative Code, divided by the total number of days in the control period; and

(c) Rounded to the nearest whole allowance as appropriate.

(I) CAIR NO<sub>x</sub> allowance allocations to CAIR NO<sub>x</sub> opt-in units.

(1) Timing requirements.

(a) When the CAIR opt-in permit is issued under paragraph (E)(5) of this rule, the director shall allocate CAIR NO<sub>x</sub> allowances to the CAIR NO<sub>x</sub> opt-in unit, and submit to the administrator the allocation for the control period in which a CAIR NO<sub>x</sub> opt-in unit enters the CAIR NO<sub>x</sub> annual trading program under paragraph (E)(7) of this rule, in accordance with paragraph (I)(2) or (I)(3) of this rule.

(b) By no later than October thirty-first of the control period after the control period in which a CAIR opt-in unit enters the CAIR NO<sub>x</sub> annual trading

program under paragraph (E)(7) of this rule, and October thirty-first of each year thereafter, the director shall allocate CAIR NO<sub>x</sub> allowances to the CAIR NO<sub>x</sub> opt-in unit, and submit to the administrator the allocation for the control period that includes such submission deadline and in which the unit is a CAIR NO<sub>x</sub> opt-in unit, in accordance with paragraph (I)(2) or (I)(3) of this rule.

- (2) Calculation of allocation. For each control period for which a CAIR NO<sub>x</sub> opt-in unit is to be allocated CAIR NO<sub>x</sub> allowances, the director shall allocate in accordance with the following procedures:
  - (a) The heat input (in mmBtu) used for calculating the CAIR NO<sub>x</sub> allowance allocation shall be the lesser of:
    - (i) The CAIR NO<sub>x</sub> opt-in unit's baseline heat input determined under paragraph (E)(3) of this rule; or
    - (ii) The CAIR NO<sub>x</sub> opt-in unit's heat input, as determined in accordance with rule 3745-109-07 of the Administrative Code, for immediately prior control period, except when the allocation is being calculated for the control period in which the CAIR NO<sub>x</sub> opt-in unit enters the CAIR NO<sub>x</sub> annual trading program under paragraph (E)(7) of this rule.
  - (b) The NO<sub>x</sub> emission rate (in pounds per mmBtu) used for calculating CAIR NO<sub>x</sub> allowance allocations shall be the lesser of:
    - (i) The CAIR NO<sub>x</sub> opt-in unit's baseline NO<sub>x</sub> emissions rate (in pounds per mmBtu) determined under paragraph (E)(4) of this rule and multiplied by seventy per cent; or
    - (ii) The most stringent state or federal NO<sub>x</sub> emissions limitation applicable to the CAIR NO<sub>x</sub> opt-in unit at any time during the control period for which CAIR NO<sub>x</sub> allowances are to be allocated.
  - (c) The director shall allocate CAIR NO<sub>x</sub> allowances to the CAIR NO<sub>x</sub> opt-in unit in an amount equaling the heat input under paragraph (I)(2)(a) of this rule, multiplied by the NO<sub>x</sub> emission rate under paragraph (I)(2)(b) of this rule, divided by two thousand pounds per ton, and rounded to the nearest whole allowance as appropriate.
- (3) Notwithstanding paragraph (I)(2) of this rule and if the CAIR designated representative requests, and the director issues a CAIR opt-in permit (based on a demonstration of the intent to repower stated under paragraph (D)(1)(e) of this rule) providing for, allocation to a CAIR NO<sub>x</sub> opt-in unit of CAIR NO<sub>x</sub> allowances under this paragraph (subject to the conditions in paragraphs (E)(8)

and (G)(7) of this rule), the director shall allocate to the CAIR NO<sub>x</sub> opt-in unit as follows:

- (a) For each control period in 2009 to 2014 for which the CAIR NO<sub>x</sub> opt-in unit is to be allocated CAIR NO<sub>x</sub> allowances:
  - (i) The heat input (in mmBtu) used for calculating CAIR NO<sub>x</sub> allowance allocations shall be determined as described in paragraph (I)(2)(a) of this rule; and
  - (ii) The NO<sub>x</sub> emission rate (in pounds per mmBtu) used for calculating CAIR NO<sub>x</sub> allowance allocations shall be the lesser of:
    - (a) The CAIR NO<sub>x</sub> opt-in unit's baseline NO<sub>x</sub> emissions rate (in pounds per mmBtu) determined under paragraph (E)(4) of this rule; or
    - (b) The most stringent state or federal NO<sub>x</sub> emissions limitation applicable to the CAIR NO<sub>x</sub> opt-in unit at any time during the control period in which the CAIR NO<sub>x</sub> opt-in unit enters the CAIR NO<sub>x</sub> annual trading program under paragraph (E)(7) of this rule.
  - (iii) The director shall allocate CAIR NO<sub>x</sub> allowances to the CAIR NO<sub>x</sub> opt-in unit in an amount equaling the heat input under paragraph (I)(3)(a)(i) of this rule, multiplied by the NO<sub>x</sub> emission rate under paragraph (I)(3)(a)(ii) of this rule, divided by two thousand pounds per ton, and rounded to the nearest whole allowance as appropriate.
- (b) For each control period in 2015 and thereafter for which the CAIR NO<sub>x</sub> opt-in unit is to be allocated CAIR NO<sub>x</sub> allowances:
  - (i) The heat input (in mmBtu) used for calculating the CAIR NO<sub>x</sub> allowance allocations shall be determined as described in paragraph (I)(2)(a) of this rule; and
  - (ii) The NO<sub>x</sub> emission rate (in pounds per mmBtu) used for calculating the CAIR NO<sub>x</sub> allowance allocation shall be the lesser of:
    - (a) 0.15 pounds per mmBtu;
    - (b) The CAIR NO<sub>x</sub> opt-in unit's baseline NO<sub>x</sub> emissions rate (in pounds per mmBtu) determined under paragraph (E)(4) of this rule; or
    - (c) The most stringent state or federal NO<sub>x</sub> emissions limitation applicable to the CAIR NO<sub>x</sub> opt-in unit at any time during the

control period for which CAIR NO<sub>x</sub> allowances are to be allocated.

- (iii) The director shall allocate CAIR NO<sub>x</sub> allowances to the CAIR NO<sub>x</sub> opt-in unit in an amount equaling the heat input under paragraph (I)(3)(b)(i) of this rule multiplied by the NO<sub>x</sub> emission rate under paragraph (I)(3)(b)(ii) of this rule, divided by two thousand pounds per ton, and rounded to the nearest whole allowance as appropriate.

(4) Recordation.

- (a) The administrator shall record, in the compliance account of the source that includes the CAIR NO<sub>x</sub> opt-in unit, the CAIR NO<sub>x</sub> allowances allocated by the director to the CAIR NO<sub>x</sub> opt-in unit under paragraph (I)(1)(a) of this rule.
- (b) By December first, of the control period in which a CAIR opt-in unit enters the CAIR NO<sub>x</sub> annual trading program under (E)(7) of this rule, and December first of each year thereafter, the administrator shall record, in the compliance account of the source that includes the CAIR NO<sub>x</sub> opt-in unit, the CAIR NO<sub>x</sub> allowances allocated by the director to the CAIR NO<sub>x</sub> opt-in unit under paragraph (I)(1)(b) of this rule.

(A) Authorization and responsibilities of CAIR designated representative.

- (1) Except as provided under paragraph (B) of this rule, each CAIR SO2 source, including all CAIR SO2 units at the source, shall have one and only one CAIR designated representative, with regard to all matters under the CAIR SO2 trading program concerning the source or any CAIR SO2 unit at the source.
- (2) The CAIR designated representative of the CAIR SO2 source shall be selected by an agreement binding on the owners and operators of the source and all CAIR SO2 units at the source and shall act in accordance with the certification statement in paragraph (D)(1)(d) of this rule.
- (3) Upon receipt by the administrator of a complete certificate of representation under paragraph (D) of this rule, the CAIR designated representative of the source shall represent and, by his or her representations, actions, inactions, or submissions, legally bind each owner and operator of the CAIR SO2 source represented and each CAIR SO2 unit at the source in all matters pertaining to the CAIR SO2 trading program, notwithstanding any agreement between the CAIR designated representative and such owners and operators. The owners and operators shall be bound by any decision or order issued to the CAIR designated representative by the director, the administrator, or a court regarding the source or unit.
- (4) No CAIR permit will be issued, no emissions data reports will be accepted, and no CAIR SO2 allowance tracking system account will be established for a CAIR SO2 unit at a source, until the administrator has received a complete certificate of representation under paragraph (D) of this rule for a CAIR designated representative of the source and the CAIR SO2 units at the source.
- (5) Submissions under the CAIR SO2 trading program.
  - (a) Each submission under the CAIR SO2 trading program shall be submitted, signed, and certified by the CAIR designated representative for each CAIR SO2 source on behalf of which the submission is made. Each such submission shall include the following certification statement by the CAIR designated representative: "I am authorized to make this submission on behalf of the owners and operators of the source or units for which the submission is made. I certify under penalty of law that I have personally

examined, and am familiar with, the statements and information submitted in this document and all its attachments. Based on my inquiry of those individuals with primary responsibility for obtaining the information, I certify that the statements and information are to the best of my knowledge and belief true, accurate, and complete. I am aware that there are significant penalties for submitting false statements and information or omitting required statements and information, including the possibility of fine or imprisonment."

- (b) The director and the administrator will accept or act on a submission made on behalf of owner or operators of a CAIR SO<sub>2</sub> source or a CAIR SO<sub>2</sub> unit only if the submission has been made, signed, and certified in accordance with paragraph (A)(5)(a) of this rule.

(B) Alternate CAIR designated representative.

- (1) A certificate of representation under paragraph (D) of this rule may designate one and only one alternate CAIR designated representative, who may act on behalf of the CAIR designated representative. The agreement by which the alternate CAIR designated representative is selected shall include a procedure for authorizing the alternate CAIR designated representative to act in lieu of the CAIR designated representative.
- (2) Upon receipt by the administrator of a complete certificate of representation under paragraph (D) of this rule, any representation, action, inaction, or submission by the alternate CAIR designated representative shall be deemed to be a representation, action, inaction, or submission by the CAIR designated representative.
- (3) Except in paragraph (B) of this rule and paragraph (B) of rule 3745-109-01 of the Administrative Code, paragraphs (A)(1) and (A)(4), (C), (D), (F) of this rule, paragraph (A) of rule 3745-109-11 of the Administrative Code and paragraph (C) of rule 3745-109-14 of the Administrative Code, whenever the term CAIR designated representative is used in rules 3745-109-01 and 3745-109-09 to 3745-109-14 of the Administrative Code, the term shall be construed to include the CAIR designated representative or any alternate CAIR designated representative.

(C) Changing CAIR designated representative and alternate CAIR designated representative; changes in owners and operators.

- (1) Changing CAIR designated representative. The CAIR designated representative may be changed at any time upon receipt by the administrator of a superseding complete certificate of representation under paragraph (D) of this rule. Notwithstanding any such change, all representations, actions, inactions, and submissions by the previous CAIR designated representative before the time and

date when the administrator receives the superseding certificate of representation shall be binding on the new CAIR designated representative and the owners and operators of the CAIR SO<sub>2</sub> source and the CAIR SO<sub>2</sub> units at the source.

- (2) Changing alternate CAIR designated representative. The alternate CAIR designated representative may be changed at any time upon receipt by the administrator of a superseding complete certificate of representation under paragraph (D) of this rule. Notwithstanding any such change, all representations, actions, inactions, and submissions by the previous alternate CAIR designated representative before the time and date when the administrator receives the superseding certificate of representation shall be binding on the new alternate CAIR designated representative and the owners and operators of the CAIR SO<sub>2</sub> source and the CAIR SO<sub>2</sub> units at the source.

- (3) Changes in owners and operators.

- (a) In the event an owner or operator of a CAIR SO<sub>2</sub> source or a CAIR SO<sub>2</sub> unit is not included in the list of owners and operators in the certificate of representation under paragraph (D) of this rule, such owner or operator shall be deemed to be subject to and bound by the certificate of representation, the representations, actions, inactions, and submissions of the CAIR designated representative and any alternate CAIR designated representative of the source or unit, and the decisions and orders of the director, the administrator, or a court, as if the owner or operator were included in such list.

- (b) Within thirty days following any change in the owners and operators of a CAIR SO<sub>2</sub> source or a CAIR SO<sub>2</sub> unit, including the addition of a new owner or operator, the CAIR designated representative or any alternate CAIR designated representative shall submit a revision to the certificate of representation under paragraph (D) of this rule amending the list of owners and operators to include the change.

(D) Certificate of representation.

- (1) A complete certificate of representation for a CAIR designated representative or an alternate CAIR designated representative shall include the following elements in a format prescribed by the administrator:

- (a) Identification of the CAIR SO<sub>2</sub> source, and each CAIR SO<sub>2</sub> unit at the source, for which the certificate of representation is submitted, including identification and nameplate capacity of each generator served by each such unit;

- (b) The name, address, e-mail address (if any), telephone number, and facsimile transmission number (if any) of the CAIR designated representative and any alternate CAIR designated representative;
- (c) A list of the owners and operators of the CAIR SO<sub>2</sub> source and of each CAIR SO<sub>2</sub> unit at the source;
- (d) The following certification statements by the CAIR designated representative and any alternate CAIR designated representative:
  - (i) "I certify that I was selected as the CAIR designated representative or alternate CAIR designated representative, as applicable, by an agreement binding on the owners and operators of the source and each CAIR SO<sub>2</sub> unit at the source."
  - (ii) "I certify that I have all the necessary authority to carry out my duties and responsibilities under the CAIR SO<sub>2</sub> trading program on behalf of the owners and operators of the source and of each CAIR SO<sub>2</sub> unit at the source and that each such owner and operator shall be fully bound by my representations, actions, inactions, or submissions."
  - (iii) "I certify that the owners and operators of the source and of each CAIR SO<sub>2</sub> unit at the source shall be bound by any order issued to me by the administrator, the director, or a court regarding the source or unit."
  - (iv) "Where there are multiple holders of a legal or equitable title to, or a leasehold interest in, a CAIR SO<sub>2</sub> unit, or where a utility or industrial customer purchases power from a CAIR SO<sub>2</sub> unit under a life-of-the-unit, firm power contractual arrangement, I certify that: I have given a written notice of my selection as the 'CAIR designated representative' or 'alternate CAIR designated representative', as applicable, and of the agreement by which I was selected to each owner and operator of the source and of each CAIR SO<sub>2</sub> unit at the source; and CAIR SO<sub>2</sub> allowances and proceeds of transactions involving CAIR SO<sub>2</sub> allowances will be deemed to be held or distributed in proportion to each holder's legal, equitable, leasehold, or contractual reservation or entitlement, except that, if such multiple holders have expressly provided for a different distribution of CAIR SO<sub>2</sub> allowances by contract, CAIR SO<sub>2</sub> allowances and proceeds of transactions involving CAIR SO<sub>2</sub> allowances will be deemed to be held or distributed in accordance with the contract."
- (e) The signature of the CAIR designated representative and any alternate CAIR designated representative and the dates signed.

- (2) Unless otherwise required by the director or the administrator, documents of agreement referred to in the certificate of representation shall not be submitted to the director or the administrator. Neither the director nor the administrator shall be under any obligation to review or evaluate the sufficiency of such documents, if submitted.

(E) Objections concerning CAIR designated representative.

- (1) Once a complete certificate of representation under paragraph (D) of this rule has been submitted and received, the director and the administrator will rely on the certificate of representation unless and until a superseding complete certificate of representation under paragraph (D) of this rule is received by the administrator.
- (2) Except as provided in paragraph (C)(1) or (C)(2) of this rule, no objection or other communication submitted to the director or the administrator concerning the authorization, or any representation, action, inaction, or submission, of the CAIR designated representative shall affect any representation, action, inaction, or submission of the CAIR designated representative or the finality of any decision or order by the director or the administrator under the CAIR SO<sub>2</sub> trading program.
- (3) Neither the director nor the administrator will adjudicate any private legal dispute concerning the authorization or any representation, action, inaction, or submission of any CAIR designated representative, including private legal disputes concerning the proceeds of CAIR SO<sub>2</sub> allowance transfers.

(F) Delegation by CAIR designated representative and alternative CAIR designated representative.

- (1) A CAIR designated representative may delegate, to one or more natural persons, his or her authority to make an electronic submission to the administrator provided for or required under this part.
- (2) An alternate CAIR designated representative may delegate, to one or more natural persons, his or her authority to make an electronic submission to the administrator provided for or required under this part.
- (3) In order to delegate authority to make an electronic submission to the administrator in accordance with paragraph (F)(1) or (F)(2) of this rule, the CAIR designated representative or alternate CAIR designated representative, as appropriate, must submit to the administrator a notice of delegation, in a format prescribed by the administrator, that includes the following elements:

- (a) The name, address, e-mail address, telephone number, and facsimile transmission number (if any) of such CAIR designated representative or alternate CAIR designated representative;
  - (b) The name, address, e-mail address, telephone number, and facsimile transmission number (if any) of each such natural person (referred to as an "agent");
  - (c) For each such natural person, a list of the type or types of electronic submissions under paragraph (F)(1) or (F)(2) of this rule for which authority is delegated to him or her; and
  - (d) The following certification statements by such CAIR designated representative or alternate CAIR designated representative:
    - (i) "I agree that any electronic submission to the administrator that is by an agent identified in this notice of delegation and of a type listed for such agent in this notice of delegation and that is made when I am a CAIR designated representative or alternate CAIR designated representative, as appropriate, and before this notice of delegation is superseded by another notice of delegation under 40 CFR 96.215(d) shall be deemed to be an electronic submission by me."
    - (ii) "Until this notice of delegation is superseded by another notice of delegation under 40 CFR 96.215(d), I agree to maintain an e-mail account and to notify the administrator immediately of any change in my e-mail address unless all delegation of authority by me under 40 CFR 96.215 is terminated."
- (4) A notice of delegation submitted under paragraph (F)(3) of this rule shall be effective, with regard to the CAIR designated representative or alternate CAIR designated representative identified in such notice, upon receipt of such notice by the administrator and until receipt by the administrator of a superseding notice of delegation submitted by such CAIR designated representative or alternate CAIR designated representative, as appropriate. The superseding notice of delegation may replace any previously identified agent, add a new agent, or eliminate entirely any delegation of authority.
- (5) Any electronic submission covered by the certification in paragraph (3)(d)(i) of this rule and made in accordance with a notice of delegation effective under paragraph (F)(4) of this rule shall be deemed to be an electronic submission by the CAIR designated representative or alternate CAIR designated representative submitting such notice of delegation.

Promulgated Under: 119.03  
Statutory Authority: 3704.03(E)  
Rule Amplifies: 3704.03(A), 3704.03(E), 3704.03(V)

3745-109-10      **Permits.**

[Comment: For dates of non-regulatory government publications, publications of recognized organizations and associations, federal rules, and federal statutory provisions referenced in this rule, see the last paragraph of rule 3745-109-01 of the Administrative Code titled "Incorporation by reference."]

(A) General CAIR trading program permit requirements.

- (1) For each CAIR SO<sub>2</sub> source required to have a Title V operating permit or required, under rule 3745-109-14 of the Administrative Code, to have a Title V operating permit or other federally enforceable permit, such permit shall include a CAIR permit administered by the director for the Title V operating permit or the federally enforceable permit as applicable. The CAIR portion of the Title V permit or other federally enforceable permit as applicable shall be administered in accordance with the director's Title V operating permits regulations promulgated under 40 CFR Parts 70 or 71 or the director's regulations for other federally enforceable permits as applicable, except as provided otherwise by paragraph (D) of rule 3745-109-01 of the Administrative Code, this rule and rule 3745-109-14 of the Administrative Code.
- (2) Each CAIR permit shall contain, with regard to the CAIR SO<sub>2</sub> source and the CAIR SO<sub>2</sub> units at the source covered by the CAIR permit, all applicable CAIR SO<sub>2</sub> trading program, CAIR NO<sub>x</sub> annual trading program, and CAIR NO<sub>x</sub> ozone season trading program requirements and shall be a complete and separable portion of the Title V operating permit or other federally enforceable permit under paragraph (A)(1) of this rule.

(B) Submission of CAIR permit applications.

- (1) Duty to apply. The CAIR designated representative of any CAIR SO<sub>2</sub> source required to have a Title V operating permit shall submit to the director a complete CAIR permit application under paragraph (C) of this rule for the source covering each CAIR SO<sub>2</sub> unit at the source at least eighteen months (or such lesser time provided by the director) before the later of January 1, 2010 or the date on which the CAIR SO<sub>2</sub> unit commences commercial operation, except as provided in paragraph (D)(1) of rule 3745-109-14 of the Administrative Code.
- (2) Duty to Reapply. For a CAIR SO<sub>2</sub> source required to have a Title V operating permit, the CAIR designated representative shall submit a complete CAIR permit application under paragraph (C) of this rule for the source covering each CAIR SO<sub>2</sub> unit at the source to renew the CAIR permit in accordance with the director's Title V operating permits regulations addressing permit renewal,

except as provided in paragraph (D)(2) of rule 3745-109-14 of the Administrative Code.

(C) Information requirements for CAIR permit applications.

A complete CAIR permit application shall include the following elements concerning the CAIR SO<sub>2</sub> source for which the application is submitted, in a format prescribed by the director:

- (1) Identification of the CAIR SO<sub>2</sub> source;
- (2) Identification of each CAIR SO<sub>2</sub> unit at the CAIR SO<sub>2</sub> source; and
- (3) The standard requirements under paragraph (E) of rule 3745-109-01 of the Administrative Code.

(D) CAIR permit contents and term.

- (1) Each CAIR permit shall contain, in a format prescribed by the director, all elements required for a complete CAIR permit application under paragraph (C) of this rule.
- (2) Each CAIR permit is deemed to incorporate automatically the definitions of terms under paragraph (B) of rule 3745-109-01 of the Administrative Code and, upon recordation by the administrator under rules 3745-109-11, 3745-109-12 or 3745-109-14 of the Administrative Code, every allocation, transfer, or deduction of a CAIR SO<sub>2</sub> allowance to or from the compliance account of the CAIR SO<sub>2</sub> source covered by the permit.
- (3) The term of the CAIR permit shall be set by the director, as necessary to facilitate coordination of the renewal of the CAIR permit with issuance, revision, or renewal of the CAIR SO<sub>2</sub> source's Title V operating permit or other federally enforceable permit as applicable.

(E) CAIR permit revisions.

Except as provided in paragraph (D)(2) of this rule, the director shall revise the CAIR permit, as necessary, in accordance with the director's Title V operating permits regulations or the director's regulations for other federally enforceable permits as applicable addressing permit revisions.

3745-109-11      **CAIR SO2 allowance tracking system.**

[Comment: For dates of non-regulatory government publications, publications of recognized organizations and associations, federal rules, and federal statutory provisions referenced in this rule, see paragraph (H) of rule 3745-109-01 of the Administrative Code titled "Incorporation by Reference."]

(A) Establishment of accounts.

(1) Compliance accounts. Except as provided in paragraph (E)(5) of rule 3745-109-14 of the Administrative Code, upon receipt of a complete certificate of representation under paragraph (D) of rule 3745-109-09 of the Administrative Code, the administrator shall establish a compliance account for the CAIR SO2 source for which the certificate of representation was submitted, unless the source already has a compliance account.

(2) General accounts.

(a) Application for general account.

(i) Any person may apply to open a general account for the purpose of holding and transferring CAIR SO2 allowances. An application for a general account may designate one and only one CAIR authorized account representative and one and only one alternate CAIR authorized account representative who may act on behalf of the CAIR authorized account representative. The agreement by which the alternate CAIR authorized account representative is selected shall include a procedure for authorizing the alternate CAIR authorized account representative to act in lieu of the CAIR authorized account representative.

(ii) A complete application for a general account shall be submitted to the administrator and shall include the following elements in a format prescribed by the administrator:

(a) Name, mailing address, e-mail address (if any), telephone number, and facsimile transmission number (if any) of the CAIR authorized account representative and any alternate CAIR authorized account representative;

(b) Organization name and type of organization, if applicable;

(c) A list of all persons subject to a binding agreement for the CAIR authorized account representative and any alternate CAIR authorized account representative to represent their ownership

interest with respect to the CAIR SO<sub>2</sub> allowances held in the general account;

- (d) The following certification statement by the CAIR authorized account representative and any alternate CAIR authorized account representative: "I certify that I was selected as the CAIR authorized account representative or the alternate CAIR authorized account representative, as applicable, by an agreement that is binding on all persons who have an ownership interest with respect to CAIR SO<sub>2</sub> allowances held in the general account. I certify that I have all the necessary authority to carry out my duties and responsibilities under the CAIR SO<sub>2</sub> trading program on behalf of such persons and that each such person shall be fully bound by my representations, actions, inactions, or submissions and by any order or decision issued to me by the administrator or a court regarding the general account."
  - (e) The signature of the CAIR authorized account representative and any alternate CAIR authorized account representative and the dates signed.
- (iii) Unless otherwise required by the director or the administrator, documents of agreement referred to in the application for a general account shall not be submitted to the director or the administrator. Neither the director nor the administrator shall be under any obligation to review or evaluate the sufficiency of such documents, if submitted.
  - (iv) Authorization of CAIR authorized account representative and alternate CAIR authorized account representative.
    - (a) Upon receipt by the administrator of a complete application for a general account under paragraph (A)(2)(a) of this rule:
      - (i) The administrator shall establish a general account for the person or persons for whom the application is submitted.
      - (ii) The CAIR authorized account representative and any alternate CAIR authorized account representative for the general account shall represent and, by his or her representations, actions, inactions, or submissions, legally bind each person who has an ownership interest with respect to CAIR SO<sub>2</sub> allowances held in the general account in all matters pertaining to the CAIR SO<sub>2</sub> trading program, notwithstanding any agreement between the CAIR authorized account representative or any alternate CAIR authorized account representative and such person. Any such person shall be

bound by any order or decision issued to the CAIR authorized account representative or any alternate CAIR authorized account representative by the administrator or a court regarding the general account.

- (iii) Any representation, action, inaction, or submission by any alternate CAIR authorized account representative shall be deemed to be a representation, action, inaction, or submission by the CAIR authorized account representative.
- (b) Each submission concerning the general account shall be submitted, signed, and certified by the CAIR authorized account representative or any alternate CAIR authorized account representative for the persons having an ownership interest with respect to CAIR SO<sub>2</sub> allowances held in the general account. Each such submission shall include the following certification statement by the CAIR authorized account representative or any alternate CAIR authorized account representative: "I am authorized to make this submission on behalf of the persons having an ownership interest with respect to the CAIR SO<sub>2</sub> allowances held in the general account. I certify under penalty of law that I have personally examined, and am familiar with, the statements and information submitted in this document and all its attachments. Based on my inquiry of those individuals with primary responsibility for obtaining the information, I certify that the statements and information are to the best of my knowledge and belief true, accurate, and complete. I am aware that there are significant penalties for submitting false statements and information or omitting required statements and information, including the possibility of fine or imprisonment."
- (c) The administrator shall accept or act on a submission concerning the general account only if the submission has been made, signed, and certified in accordance with paragraph (A)(2)(b)(ii) of this rule.
- (v) Changing CAIR authorized account representative, alternate CAIR authorized account representative and changes in persons with ownership interest.

  - (a) The CAIR authorized account representative for a general account may be changed at any time upon receipt by the administrator of a superseding complete application for a general account under paragraph (A)(2)(a) of this rule. Notwithstanding any such change, all representations, actions, inactions, and submissions by the previous CAIR authorized account representative before the time and date when the administrator receives the superseding

application for a general account shall be binding on the new CAIR authorized account representative and the persons with an ownership interest with respect to the CAIR SO<sub>2</sub> allowances in the general account.

(b) The alternate CAIR authorized account representative for a general account may be changed at any time upon receipt by the administrator of a superseding complete application for a general account under paragraph (A)(2)(a) of this rule. Notwithstanding any such change, all representations, actions, inactions, and submissions by the previous alternate CAIR authorized account representative before the time and date when the administrator receives the superseding application for a general account shall be binding on the new alternate CAIR authorized account representative and the persons with an ownership interest with respect to the CAIR SO<sub>2</sub> allowances in the general account.

(c) For changes in ownership interests:

(i) In the event a person having an ownership interest with respect to CAIR SO<sub>2</sub> allowances in the general account is not included in the list of such persons in the application for a general account, such person shall be deemed to be subject to and bound by the application for a general account, the representation, actions, inactions, and submissions of the CAIR authorized account representative and any alternate CAIR authorized account representative of the account, and the decisions and orders of the administrator or a court, as if the person were included in such list.

(ii) Within thirty days following any change in the persons having an ownership interest with respect to CAIR SO<sub>2</sub> allowances in the general account, including the addition of a new person, the CAIR authorized account representative or any alternate CAIR authorized account representative shall submit a revision to the application for a general account amending the list of persons having an ownership interest with respect to the CAIR SO<sub>2</sub> allowances in the general account to include the change.

(vi) Objections concerning CAIR authorized account representative and alternate CAIR authorized account representative.

(a) Once a complete application for a general account under paragraph (A)(2)(a) of this rule has been submitted and received, the administrator shall rely on the application unless and until a

superseding complete application for a general account under paragraph (A)(2)(a) of this rule is received by the administrator.

- (b) Except as provided in paragraph (A)(2)(c)(i) or (A)(2)(c)(ii) of this rule, no objection or other communication submitted to the administrator concerning the authorization, or any representation, action, inaction, or submission of the CAIR authorized account representative or any alternate CAIR authorized account representative for a general account shall affect any representation, action, inaction, or submission of the CAIR authorized account representative or any alternate CAIR authorized account representative or the finality of any decision or order by the administrator under the CAIR SO<sub>2</sub> trading program.
  - (c) The administrator shall not adjudicate any private legal dispute concerning the authorization or any representation, action, inaction, or submission of the CAIR authorized account representative or any alternate CAIR authorized account representative for a general account, including private legal disputes concerning the proceeds of CAIR SO<sub>2</sub> allowance transfers.
- (vii) Delegation by CAIR authorized account representative and alternate CAIR authorized account representative.
- (a) A CAIR authorized account representative may delegate, to one or more natural persons, his or her authority to make an electronic submission to the administrator provided for or required under rules 3745-109-11 and 3745-109-12 of the Administrative Code.
  - (b) An alternate CAIR authorized account representative may delegate, to one or more natural persons, his or her authority to make an electronic submission to the administrator provided for or required under rules 3745-109-11 and 3745-109-12 of the Administrative Code
  - (c) In order to delegate authority to make an electronic submission to the administrator in accordance with paragraph (A)(2)(a)(vii)(a) or (A)(2)(a)(vii)(b) of this rule, the CAIR authorized account representative or alternate CAIR authorized account representative, as appropriate, must submit to the administrator a notice of delegation, in a format prescribed by the administrator, that includes the following elements:

    - (i) The name, address, e-mail address, telephone number, and facsimile transmission number (if any) of such CAIR

authorized account representative or alternate CAIR authorized account representative;

- (ii) The name, address, e-mail address, telephone number, and, facsimile transmission number (if any) of each such natural person (referred to as an "agent");
  - (iii) For each such natural person, a list of the type or types of electronic submissions under paragraph (A)(2)(a)(vii)(a) or (A)(2)(a)(vii)(b) of this rule for which authority is delegated to him or her;
  - (iv) The following certification statement by such CAIR authorized account representative or alternate CAIR authorized account representative: "I agree that any electronic submission to the administrator that is by an agent identified in this notice of delegation and of a type listed for such agent in this notice of delegation and that is made when I am a CAIR authorized account representative or alternate CAIR authorized representative, as appropriate, and before this notice of delegation is superseded by another notice of delegation under paragraph (A)(2)(vii)(d) of rule 3745-109-11 of the Administrative Code rule shall be deemed to be an electronic submission by me."; and
  - (v) The following certification statement by such CAIR authorized account representative or alternate CAIR authorized account representative: "Until this notice of delegation is superseded by another notice of delegation under paragraph (A)(2)(vii)(d) of rule 3745-109-11 of the Administrative Code, I agree to maintain an e-mail account and to notify the administrator immediately of any change in my e-mail address, unless all delegation of authority by me under paragraph (A)(2)(vii) of rule 3745-109-11 of the Administrative Code is terminated."
- (d) A notice of delegation submitted under paragraph (A)(2)(vii)(c) of this rule shall be effective, with regard to the CAIR authorized account representative or alternate CAIR authorized account representative identified in such notice, upon receipt of such notice by the administrator and until receipt by the administrator of a superseding notice of delegation submitted by such CAIR authorized account representative or alternate CAIR authorized account representative, as appropriate. The superseding notice of delegation may replace any previously identified agent, add a new agent, or eliminate entirely any delegation of authority.

(e) Any electronic submission covered by the certification in paragraph (A)(2)(vii)(c)(iv) of this rule and made in accordance with a notice of delegation effective under paragraph (A)(2)(vii)(d) of this rule shall be deemed to be an electronic submission by the CAIR designated representative or alternate CAIR designated representative submitting such notice of delegation.

(3) Account identification. The administrator shall assign a unique identifying number to each account established under paragraph (A)(1) or (A)(2) of this rule.

(B) Responsibilities of CAIR authorized account representative.

Following the establishment of a CAIR SO<sub>2</sub> allowance tracking system account, all submissions to the administrator pertaining to the account, including, but not limited to, submissions concerning the deduction or transfer of CAIR SO<sub>2</sub> allowances in the account, shall be made only by the CAIR authorized account representative for the account.

(C) Recordation of CAIR SO<sub>2</sub> allowances.

(1) Recordation for compliance accounts.

(a) After a compliance account is established under paragraph (A)(1) of this rule or 40 CFR 73.31(a) or (b), the administrator shall record in the compliance account any CAIR SO<sub>2</sub> allowance allocated to any CAIR SO<sub>2</sub> unit at the source for each of the thirty years starting the later of 2010 or the year in which the compliance account is established and any CAIR SO<sub>2</sub> allowance allocated for each of the thirty years starting the later of 2010 or the year in which the compliance account is established and transferred to the source in accordance with rule 3745-109-12 of the Administrative Code or 40 CFR Part 73.

(b) In 2011 and each year thereafter, after administrator has completed all deductions under paragraph (C)(2) of this rule, the administrator shall record in the compliance account any CAIR SO<sub>2</sub> allowance allocated to any CAIR SO<sub>2</sub> unit at the source, for the new thirtieth year (i.e., the year that is thirty years after the calendar year for which such deductions are or could be made) and any CAIR SO<sub>2</sub> allowance allocated for the new thirtieth year and transferred to the source in accordance with rule 3745-109-12 of the Administrative Code or 40 CFR Part 73, Subpart D.

(2) Recordation for general accounts.

(a) After a general account is established under paragraph (A)(2) of this rule or 40 CFR 73.31(c), the administrator shall record in the general account any

CAIR SO<sub>2</sub> allowance allocated for each of the thirty years starting the later of 2010 or the year in which the general account is established and transferred to the general account in accordance with rule 3745-109-12 of the Administrative Code or 40 CFR Part 73, Subpart D.

- (b) In 2011 and each year thereafter, after administrator has completed all deductions under paragraph (A)(2) of this rule, the administrator shall record in the general account any CAIR SO<sub>2</sub> allowance allocated for the new thirtieth year (i.e., the year that is thirty years after the calendar year for which such deductions are or could be made) and transferred to the general account in accordance with rule 3745-109-12 of the Administrative Code or 40 CFR Part 73, Subpart D.
- (3) Serial numbers for allocated CAIR SO<sub>2</sub> allowances. When recording the allocation of CAIR SO<sub>2</sub> allowances issued by a director under paragraph (I) of rule 3745-109-14 of the Administrative Code, the administrator shall assign each such CAIR SO<sub>2</sub> allowance a unique identification number that shall include digits identifying the year of the control period for which the CAIR SO<sub>2</sub> allowance is allocated.

(D) Compliance with CAIR SO<sub>2</sub> emissions limitation.

- (1) Allowance transfer deadline. The CAIR SO<sub>2</sub> allowances are available to be deducted for compliance with a source's CAIR SO<sub>2</sub> emissions limitation for a control period in a given calendar year only if the CAIR SO<sub>2</sub> allowances:
  - (a) Were allocated for the control period in the year or a prior year; and
  - (b) Are held in the compliance account as of the allowance transfer deadline for the control period or are transferred into the compliance account by a CAIR SO<sub>2</sub> allowance transfer correctly submitted for recordation under paragraphs (A) and (B) of rule 3745-109-12 of the Administrative Code by the allowance transfer deadline for the control period.
- (2) Deductions for compliance. Following the recordation, in accordance with paragraph (B) of rule 3745-109-12 of the Administrative Code, of CAIR SO<sub>2</sub> allowance transfers submitted for recordation in a source's compliance account by the allowance transfer deadline for a control period, the administrator shall deduct from the compliance account CAIR SO<sub>2</sub> allowances available under paragraph (D)(1) of this rule in order to determine whether the source meets the CAIR SO<sub>2</sub> emissions limitation for the control period as follows:
  - (a) For a CAIR SO<sub>2</sub> source subject to an acid rain emissions limitation, the administrator will, in the following order:

- (i) Deduct the amount of CAIR SO<sub>2</sub> allowances, available under paragraph (D)(1) of this rule and not issued by the director under paragraph (I) of rule 3745-109-14 of the Administrative Code, that is required under 40 CFR 73.35 (b) and (c). If there are sufficient CAIR SO<sub>2</sub> allowances to complete this deduction, the deduction shall be treated as satisfying the requirements of 40 CFR 73.35 (b) and (c).
  - (ii) Deduct the amount of CAIR SO<sub>2</sub> allowances, not issued by the director under paragraph (I) of rule 3745-109-14 of the Administrative Code, that is required under 40 CFR 73.35 (d) and 40 CFR 77.5. If there are sufficient CAIR SO<sub>2</sub> allowances to complete this deduction, the deduction shall be treated as satisfying the requirements of 40 CFR 73.35 (d) and 40 CFR 77.5.
  - (iii) Treating the CAIR SO<sub>2</sub> allowances deducted under paragraph (D)(2)(a)(i) of this rule as also being deducted under this paragraph (D)(2)(a)(iii) of this rule, deduct CAIR SO<sub>2</sub> allowances available under paragraph (D)(1) of this rule (including any issued by the director under paragraph (I) of rule 3745-109-14 of the Administrative Code) in order to determine whether the source meets the CAIR SO<sub>2</sub> emissions limitation for the control period, as follows:
    - (a) Until the tonnage equivalent of the CAIR SO<sub>2</sub> allowances deducted equals, or exceeds in accordance with paragraphs (D)(3)(a) and (D)(3)(b) of this rule, the number of tons of total SO<sub>2</sub> emissions, determined in accordance with rule 3745-109-13 of the Administrative Code, from all CAIR SO<sub>2</sub> units at the source for the control period; or
    - (b) If there are insufficient CAIR SO<sub>2</sub> allowances to complete the deductions in paragraph (D)(2)(a)(iii)(a) of this rule, until no more CAIR SO<sub>2</sub> allowances available under paragraph (D)(1) of this rule (including any issued by the director under paragraph (I) of rule 3745-109-14 of the Administrative Code) remain in the compliance account.
- (b) For a CAIR SO<sub>2</sub> source not subject to an acid rain emissions limitation, the administrator shall deduct CAIR SO<sub>2</sub> allowances available under paragraph (D)(1) of this rule (including any issued by the director under paragraph (I) of rule 3745-109-14 of the Administrative Code) in order to determine whether the source meets the CAIR SO<sub>2</sub> emissions limitation for the control period, as follows:
- (i) Until the tonnage equivalent of the CAIR SO<sub>2</sub> allowances deducted equals, or exceeds in accordance with paragraphs (D)(3)(a) and (D)(3)(b) of this rule, the number of tons of total SO<sub>2</sub> emissions,

determined in accordance with rule 3745-109-13 of the Administrative Code, from all CAIR SO<sub>2</sub> units at the source for the control period; or

- (ii) If there are insufficient CAIR SO<sub>2</sub> allowances to complete the deductions in paragraph (D)(2)(b)(i) of this rule, until no more CAIR SO<sub>2</sub> allowances available under paragraph (D)(1) of this rule (including those issued by the director under paragraph (I) of rule 3745-109-14 of the Administrative Code) remain in the compliance account.

(3) Identification of CAIR SO<sub>2</sub> allowances by serial number.

- (a) Identification of CAIR SO<sub>2</sub> allowances by serial number. The CAIR authorized account representative for a source's compliance account may request that specific CAIR SO<sub>2</sub> allowances, identified by serial number, in the compliance account be deducted for emissions or excess emissions for a control period in accordance with paragraph (D)(2) or (D)(4) of this rule. Such request shall be submitted to the administrator by the allowance transfer deadline for the control period and include, in a format prescribed by the administrator, the identification of the CAIR SO<sub>2</sub> source and the appropriate serial numbers.
- (b) First-in, first-out. The administrator shall deduct CAIR SO<sub>2</sub> allowances under paragraph (D)(2) or (D)(4) of this rule from the source's compliance account, in the absence of an identification or in the case of a partial identification of CAIR SO<sub>2</sub> allowances by serial number under paragraph (D)(3)(a) of rule 3745-109-11 of the Administrative Code, on a first-in, first-out (FIFO) accounting basis in the following order:
  - (i) Any CAIR SO<sub>2</sub> allowances that were allocated to the units at the source for a control period before 2010, in the order of recordation;
  - (ii) Any CAIR SO<sub>2</sub> allowances that were allocated to any entity for a control period before 2010 and transferred and recorded in the compliance account pursuant to rule 3745-109-12 of the Administrative Code or 40 CFR Part 73, Subpart D, in the order of recordation;
  - (iii) Any CAIR SO<sub>2</sub> allowances that were allocated to the units at the source for a control period during 2010 through 2014, in the order of recordation;
  - (iv) Any CAIR SO<sub>2</sub> allowances that were allocated to any entity for a control period during 2010 through 2014 and transferred and recorded in the compliance account pursuant to rule 3745-109-12 of the Administrative Code or 40 CFR Part 73, Subpart D, in the order of recordation;

- (v) Any CAIR SO<sub>2</sub> allowances that were allocated to the units at the source for a control period in 2015 or later, in the order of recordation; and
  - (vi) Any CAIR SO<sub>2</sub> allowances that were allocated to any entity for a control period in 2015 or later and transferred and recorded in the compliance account pursuant to rule 3745-109-12 of the Administrative Code or 40 CFR Part 73, Subpart D, in the order of recordation.
- (4) Deductions for excess emissions.
- (a) After making the deductions for compliance under paragraph (D)(2) of rule 3745-109-11 of the Administrative Code for a control period in a calendar year in which the CAIR SO<sub>2</sub> source has excess emissions, the administrator shall deduct from the source's compliance account the tonnage equivalent in CAIR SO<sub>2</sub> allowances, allocated for the control period in the immediately following calendar year (including any issued by the director under paragraph (I) of rule 3745-109-14 of the Administrative Code), equal to, or exceeding in accordance with paragraphs (D)(3)(a) and (D)(3)(b) of this rule, three times the following amount: the number of tons of the source's excess emissions minus, if the source is subject to an acid rain emissions limitation, the amount of the CAIR SO<sub>2</sub> allowances required to be deducted under paragraph (D)(2)(a)(ii) of this rule.
  - (b) Any allowance deduction required under paragraph (D)(4)(a) of this rule shall not affect the liability of the owners and operators of the CAIR SO<sub>2</sub> source or the CAIR SO<sub>2</sub> units at the source for any fine, penalty, or assessment, or their obligation to comply with any other remedy, for the same violations, as ordered under the Clean Air Act or applicable state law.
- (5) Recordation of deductions. The administrator shall record in the appropriate compliance account all deductions from such an account under paragraphs (D)(2) and (D)(4) of this rule and rule 3745-109-14 of the Administrative Code.
- (6) Administrator's action on submissions.
- (a) The administrator may review and conduct independent audits concerning any submission under the CAIR SO<sub>2</sub> trading program and make appropriate adjustments of the information in the submissions.
  - (b) The administrator may deduct CAIR SO<sub>2</sub> allowances from or transfer CAIR SO<sub>2</sub> allowances to a source's compliance account based on the information in the submissions, as adjusted under paragraph (D)(5)(a) of this rule, and record such deductions and transfers.
- (E) Banking.

- (1) CAIR SO<sub>2</sub> allowances may be banked for future use or transfer in a compliance account or a general account in accordance with paragraph (E)(2) of rule 3745-109-12 of the Administrative Code.
- (2) Any CAIR SO<sub>2</sub> allowance that is held in a compliance account or a general account shall remain in such account unless and until the CAIR SO<sub>2</sub> allowance is deducted or transferred under paragraph (D) or (F) of this rule, or rule 3745-109-12 or 3745-109-14 of the Administrative Code.

(F) Account error.

The administrator may, at his or her sole discretion and on his or her own motion, correct any error in any CAIR SO<sub>2</sub> allowance tracking system account. Within ten business days of making such correction, the administrator shall notify the CAIR authorized account representative for the account.

(G) Closing of general accounts.

- (1) The CAIR authorized account representative of a general account may submit to the administrator a request to close the account, which shall include a correctly submitted allowance transfer under paragraphs (A) and (B) of rule 3745-109-12 of the Administrative Code for any CAIR SO<sub>2</sub> allowances in the account to one or more other CAIR SO<sub>2</sub> allowance tracking system accounts.
- (2) If a general account has no allowance transfers in or out of the account for a twelve-month period or longer and does not contain any CAIR SO<sub>2</sub> allowances, the administrator may notify the CAIR authorized account representative for the account that the account shall be closed following twenty business days after the notice is sent. The account shall be closed after the twenty-day period unless, before the end of the twenty-day period, the administrator receives a correctly submitted transfer of CAIR SO<sub>2</sub> allowances into the account under paragraphs (A) and (B) of rule 3745-109-12 of the Administrative Code or a statement submitted by the CAIR authorized account representative demonstrating to the satisfaction of the administrator good cause as to why the account should not be closed.

(A) Submission of CAIR SO2 allowance transfers.

- (1) A CAIR authorized account representative seeking recordation of a CAIR SO2 allowance transfer shall submit the transfer to the administrator. To be considered correctly submitted, the CAIR SO2 allowance transfer shall include the following elements, in a format specified by the administrator:
  - (a) The account numbers of both the transferor and transferee accounts;
  - (b) The serial number of each CAIR SO2 allowance that is in the transferor account and is to be transferred; and
  - (c) The name and signature of the CAIR authorized account representatives of the transferor and transferee accounts and the dates signed:
    - (i) The CAIR authorized account representative for the transferee account can meet the requirements in paragraph (A)(1)(c) of this rule by submitting, in a format prescribed by the administrator, a statement signed by the CAIR authorized account representative and identifying each account into which any transfer of allowances, submitted on or after the date on which the administrator receives such statement, is authorized. Such authorization shall be binding on any CAIR authorized account representative for such account and shall apply to all transfers into the account that are submitted on or after such date of receipt, unless and until the administrator receives a statement signed by the CAIR authorized account representative retracting the authorization for the account.
    - (ii) The statement under paragraph (A)(1)(c)(i) of this rule shall include the following: "By this signature I authorize any transfer of allowances into each account listed herein, except that I do not waive any remedies under state or federal law to obtain correction of any erroneous transfers into such accounts. This authorization shall be binding on any CAIR authorized account representative for such account unless and until a statement signed by the CAIR authorized account representative retracting this authorization for the account is received by the administrator."

(B) EPA recordation.

- (1) Within five business days (except as necessary to perform a transfer in perpetuity of CAIR SO<sub>2</sub> allowances allocated to a CAIR SO<sub>2</sub> unit or as provided in paragraph (B)(2) of this rule) of receiving a CAIR SO<sub>2</sub> allowance transfer, the administrator shall record a CAIR SO<sub>2</sub> allowance transfer by moving each CAIR SO<sub>2</sub> allowance from the transferor account to the transferee account as specified by the request, provided that:
  - (a) The transfer is correctly submitted under paragraph (A) of this rule;
  - (b) The transferor account includes each CAIR SO<sub>2</sub> allowance identified by serial number in the transfer; and
  - (c) The transfer is in accordance with the limitation on transfer under 40 CFR 74.42 and 40 CFR 74.47(c), as applicable.
- (2) A CAIR SO<sub>2</sub> allowance transfer that is submitted for recordation after the allowance transfer deadline for a control period and that includes any CAIR SO<sub>2</sub> allowances allocated for any control period before such allowance transfer deadline shall not be recorded until after the administrator completes the deductions under paragraph (C) of rule 3745-109-11 of the Administrative Code for the control period immediately before such allowance transfer deadline.
- (3) Where a CAIR SO<sub>2</sub> allowance transfer submitted for recordation fails to meet the requirements of paragraph (B)(1) of this rule, the administrator shall not record such transfer.

(C) Notification.

- (1) Notification of recordation. Within five business days of recordation of a CAIR SO<sub>2</sub> allowance transfer under paragraph (B) of this rule, the administrator shall notify the CAIR authorized account representatives of both the transferor and transferee accounts.
- (2) Notification of non-recordation. Within ten business days of receipt of a CAIR SO<sub>2</sub> allowance transfer that fails to meet the requirements of paragraph (B)(1) of this rule, the administrator shall notify the CAIR authorized account representatives of both accounts subject to the transfer of:
  - (a) A decision not to record the transfer, and
  - (b) The reasons for such non-recordation.
- (3) Nothing in this paragraph shall preclude the submission of a CAIR SO<sub>2</sub> allowance transfer for recordation following notification of non-recordation.

3745-109-13      **Monitoring and reporting.**

[Comment: For dates of non-regulatory government publications, publications of recognized organizations and associations, federal rules, and federal statutory provisions referenced in this rule, see paragraph (H) of rule 3745-109-01 of the Administrative Code titled "Incorporation by Reference."]

(A) Monitoring and reporting general requirements.

The owners and operators, and to the extent applicable, the CAIR designated representative, of a CAIR SO<sub>2</sub> unit, shall comply with the monitoring, record keeping, and reporting requirements as provided in this rule and in 40 CFR Part 75, Subparts F and G. For purposes of complying with such requirements, the definitions in paragraph (B) of rule 3745-109-01 of the Administrative Code and in 40 CFR 72.2 shall apply, and the terms affected unit, designated representative, and continuous emission monitoring system (or CEMS) in 40 CFR Part 75 shall be deemed to refer to the terms CAIR SO<sub>2</sub> unit, CAIR designated representative, and continuous emission monitoring system (or CEMS) respectively, as defined in paragraph (B) of rule 3745-109-01 of the Administrative Code. The owner or operator of a unit that is not a CAIR SO<sub>2</sub> unit but that is monitored under 40 CFR 75.16(b)(2) shall comply with the same monitoring, record keeping, and reporting requirements as a CAIR SO<sub>2</sub> unit.

- (1) Requirements for installation, certification, and data accounting. The owner or operator of each CAIR SO<sub>2</sub> unit shall:
  - (a) Install all monitoring systems required under this rule for monitoring SO<sub>2</sub> mass emissions and individual unit heat input (including all systems required to monitor SO<sub>2</sub> concentration, stack gas moisture content, stack gas flow rate, CO<sub>2</sub> or O<sub>2</sub> concentration, and fuel flow rate, as applicable, in accordance with 40 CFR 75.11 and 40 CFR 75.16);
  - (b) Successfully complete all certification tests required under paragraph (B) of this rule and meet all other requirements of this rule and 40 CFR Part 75 applicable to the monitoring systems under paragraph (A)(1)(a) of this rule; and
  - (c) Record, report, and quality-assure the data from the monitoring systems under paragraph (A)(1)(a) of this rule.
- (2) Compliance deadlines. Except as provided in paragraph (A)(5) of this rule, the owner or operator shall meet the monitoring system certification and other requirements of paragraphs (A)(1)(a) and (A)(1)(b) of this rule on or before the following dates. The owner or operator shall record, report, and quality-assure

the data from the monitoring systems under paragraph (A)(1)(a) of this rule on and after the following dates.

- (a) For the owner or operator of a CAIR SO<sub>2</sub> unit that commences commercial operation before July 1, 2008, by January 1, 2009.
  - (b) For the owner or operator of a CAIR SO<sub>2</sub> unit that commences commercial operation on or after July 1, 2008, by the later of the following dates:
    - (i) January 1, 2009; or
    - (ii) Ninety unit operating days or one hundred eighty calendar days, whichever occurs first, after the date on which the unit commences commercial operation.
  - (c) For the owner or operator of a CAIR SO<sub>2</sub> unit for which construction of a new stack or flue or installation of add-on SO<sub>2</sub> emission controls is completed after the applicable deadline under paragraphs (A)(2)(a) to (A)(2)(e) of this rule, by ninety unit operating days or one hundred eighty calendar days, whichever occurs first, after the date on which emissions first exit to the atmosphere through the new stack or flue or add-on SO<sub>2</sub> emissions controls.
  - (d) Notwithstanding the dates in paragraphs (A)(2)(a) and (A)(2)(b) of this rule, for the owner or operator of a unit for which a CAIR opt-in permit application is submitted and not withdrawn and a CAIR opt-in permit is not yet issued or denied under rule 3745-109-14 of the Administrative Code, by the date specified in paragraph (E)(2) of rule 3745-109-14 of the Administrative Code.
  - (e) Notwithstanding the dates in paragraphs (A)(2)(a) and (A)(2)(b) of this rule, for the owner or operator of a CAIR SO<sub>2</sub> opt-in unit under rule 3745-109-14 of the Administrative Code, by the date on which the CAIR SO<sub>2</sub> opt-in unit enters the CAIR SO<sub>2</sub> trading program as provided in paragraph (E)(8) of rule 3745-109-14 of the Administrative Code.
- (3) Reporting data.

The owner or operator of a CAIR SO<sub>2</sub> unit that does not meet the applicable compliance date set forth in paragraph (A)(2) of this rule for any monitoring system under paragraph (A)(1)(a) of this rule shall, for each such monitoring system, determine, record, and report maximum potential (or, as appropriate, minimum potential) values for SO<sub>2</sub> concentration, stack gas flow rate, stack gas moisture content, fuel flow rate, and any other parameters required to determine SO<sub>2</sub> mass emissions and heat input in accordance with 40 CFR 75.31(b)(2) or 40 CFR 75.31(c)(3) or 40 CFR Part 75, Appendix D, Section 2.4, as applicable.

(4) Prohibitions.

- (a) No owner or operator of a CAIR SO<sub>2</sub> unit shall use any alternative monitoring system, alternative reference method, or any other alternative to any requirement of this rule without having obtained prior written approval in accordance with paragraph (F) of this rule.
- (b) No owner or operator of a CAIR SO<sub>2</sub> unit shall operate the unit so as to discharge, or allow to be discharged, SO<sub>2</sub> emissions to the atmosphere without accounting for all such emissions in accordance with the applicable provisions of this rule and 40 CFR Part 75.
- (c) No owner or operator of a CAIR SO<sub>2</sub> unit shall disrupt the continuous emission monitoring system, any portion thereof, or any other approved emission monitoring method, and thereby avoid monitoring and recording SO<sub>2</sub> mass emissions discharged into the atmosphere or heat input, except for periods of recertification or periods when calibration, quality assurance testing, or maintenance is performed in accordance with the applicable provisions of this rule and 40 CFR Part 75.
- (d) No owner or operator of a CAIR SO<sub>2</sub> unit shall retire or permanently discontinue use of the continuous emission monitoring system, any component thereof, or any other approved monitoring system under this rule, except under any one of the following circumstances:
  - (i) During the period that the unit is covered by an exemption under paragraph (D) of rule 3745-109-01 of the Administrative Code that is in effect;
  - (ii) The owner or operator is monitoring emissions from the unit with another certified monitoring system approved, in accordance with the applicable provisions of this rule and 40 CFR Part 75, by the director for use at that unit that provides emission data for the same pollutant or parameter as the retired or discontinued monitoring system; or
  - (iii) The CAIR designated representative submits notification of the date of certification testing of a replacement monitoring system for the retired or discontinued monitoring system in accordance with paragraph (B)(4)(c)(i) of this rule.

(5) Long-term cold storage.

The owner or operator of a CAIR SO<sub>2</sub> unit is subject to the applicable provisions of 40 CFR Part 75 of this rule concerning units in long-term cold storage.

(B) Initial certification and recertification procedures.

- (1) The owner or operator of a CAIR SO<sub>2</sub> unit shall be exempt from the initial certification requirements of this rule for a monitoring system under paragraph (A)(1)(a) of this rule if the following conditions are met:
  - (a) The monitoring system has been previously certified in accordance with 40 CFR Part 75; and
  - (b) The applicable quality-assurance and quality-control requirements of 40 CFR 75.21 and 40 CFR Part 75, Appendices B and D are fully met for the certified monitoring system described in paragraph (A)(1)(a) of this rule.
- (2) The recertification provisions of this rule shall apply to a monitoring system under paragraph (A)(1)(a) of this rule exempt from initial certification requirements under paragraph (A)(1) of this rule.
- (3) [Reserved].
- (4) Except as provided in paragraph (B)(1) of this rule, the owner or operator of a CAIR SO<sub>2</sub> unit shall comply with the following initial certification and recertification procedures, for a continuous monitoring system (i.e., a continuous emission monitoring system and an excepted monitoring system under 40 CFR Part 75, Appendix D) under paragraph (A)(1)(a) of this rule. The owner or operator of a unit that qualifies to use the low mass emissions excepted monitoring methodology under 40 CFR 75.19 or that qualifies to use an alternative monitoring system under 40 CFR Part 75, Subpart E shall comply with the procedures in paragraph (B)(5) or (B)(6) of this rule respectively.
  - (a) Requirements for initial certification. The owner or operator shall ensure that each continuous monitoring system under paragraph (A)(1)(a) of this rule (including the automated data acquisition and handling system) successfully completes all of the initial certification testing required under 40 CFR 75.20 by the applicable deadline in paragraph (A)(2) of this rule. In addition, whenever the owner or operator installs a monitoring system to meet the requirements of this rule in a location where no such monitoring system was previously installed, initial certification in accordance with 40 CFR 75.20 is required.
  - (b) Requirements for recertification. Whenever the owner or operator makes a replacement, modification, or change in any certified continuous emission monitoring system under paragraph (A)(1)(a) of this rule that may significantly affect the ability of the system to accurately measure or record SO<sub>2</sub> mass emissions or heat input rate or to meet the quality-assurance and quality-control requirements of 40 CFR 75.21 or 40 CFR Part 75, Appendix

B, the owner or operator shall recertify the monitoring system in accordance with 40 CFR 75.20(b). Furthermore, whenever the owner or operator makes a replacement, modification, or change to the flue gas handling system or the unit's operation that may significantly change the stack flow or concentration profile, the owner or operator shall recertify each continuous emission monitoring system whose accuracy is potentially affected by the change, in accordance with 40 CFR 75.20(b). Examples of changes to a continuous emission monitoring system that require recertification include: replacement of the analyzer, complete replacement of an existing continuous emission monitoring system, or change in location or orientation of the sampling probe or site. Any fuel flowmeter system under paragraph (A)(1)(a) of this rule is subject to the recertification requirements in 40 CFR 75.20(g)(6).

- (c) Approval process for initial certification and recertification. Paragraphs (B)(4)(c)(i) to (B)(4)(c)(iv) of this rule apply to both initial certification and recertification of a continuous monitoring system under paragraph (A)(1)(a) of this rule. For recertifications, replace the words "certification" and "initial certification" with the word "recertification," replace the word "certified" with the word "recertified," and follow the procedures in 40 CFR 75.20(b)(5) and 40 CFR 75.20(g)(7) in lieu of the procedures in paragraph (B)(4)(c)(v) of this rule.
- (i) Notification of certification. The CAIR designated representative shall submit to the director, the USEPA region V office, and the administrator written notice of the dates of certification testing, in accordance with paragraph (D) of this rule.
- (ii) Certification application. The CAIR designated representative shall submit to the director a certification application for each monitoring system. A complete certification application shall include the information specified in 40 CFR 75.63.
- (iii) Provisional certification date. The provisional certification date for a monitoring system shall be determined in accordance with 40 CFR 75.20(a)(3). A provisionally certified monitoring system may be used under the CAIR SO<sub>2</sub> trading program for a period not to exceed one hundred twenty days after receipt by the director of the complete certification application for the monitoring system under paragraph (B)(4)(c)(ii) of this rule. Data measured and recorded by the provisionally certified monitoring system, in accordance with the requirements of 40 CFR Part 75, shall be considered valid quality assured data (retroactive to the date and time of provisional certification), provided that the director does not invalidate the provisional certification by issuing a notice of disapproval within one

hundred twenty days of the date of receipt of the complete certification application by the director.

- (iv) Certification application approval process. The director shall issue a written notice of approval or disapproval of the certification application to the owner or operator within one hundred twenty days of receipt of the complete certification application under paragraph (B)(4)(c)(ii) of this rule. In the event the director does not issue such a notice within such one hundred twenty-day period, each monitoring system that meets the applicable performance requirements of 40 CFR Part 75 and is included in the certification application shall be deemed certified for use under the CAIR SO<sub>2</sub> trading program.
  - (a) Approval notice. If the certification application is complete and shows that each monitoring system meets the applicable performance requirements of 40 CFR Part 75, then the director shall issue a written notice of approval of the certification application within one hundred twenty days of receipt.
  - (b) Incomplete application notice. If the certification application is not complete, then the director shall issue a written notice of incompleteness that sets a reasonable date by which the CAIR designated representative must submit the additional information required to complete the certification application. If the CAIR designated representative does not comply with the notice of incompleteness by the specified date, then the director may issue a notice of disapproval under paragraph (B)(4)(c)(iv)(c) of this rule. The one hundred twenty-day review period shall not begin before receipt of a complete certification application.
  - (c) Disapproval notice. If the certification application shows that any monitoring system does not meet the performance requirements of 40 CFR Part 75 or if the certification application is incomplete and the requirement for disapproval under paragraph (B)(4)(c)(iv)(b) of this rule is met, then the director shall issue a written notice of disapproval of the certification application. Upon issuance of such notice of disapproval, the provisional certification is invalidated by the director and the data measured and recorded by each uncertified monitoring system shall not be considered valid quality-assured data beginning with the date and hour of provisional certification (as defined under 40 CFR 75.20(a)(3)). The owner or operator shall follow the procedures for loss of certification in paragraph (B)(4)(c)(v) of this rule for each monitoring system that is disapproved for initial certification.

(d) Audit decertification. The director or, for a CAIR SO<sub>2</sub> opt-in unit or a unit for which a CAIR opt-in permit application is submitted and not withdrawn and a CAIR opt-in permit is not yet issued or denied under rule 3745-109-14 of the Administrative Code, the administrator may issue a notice of disapproval of the certification status of a monitor in accordance with paragraph (C)(2) of this rule.

(v) Procedures for loss of certification. If the director or the administrator issues a notice of disapproval of a certification application under paragraph (B)(4)(c)(iv)(c) of this rule or a notice of disapproval of certification status under paragraph (B)(4)(c)(iv)(d) of this rule, then:

(a) The owner or operator shall substitute the following values, for each disapproved monitoring system, for each hour of unit operation during the period of invalid data specified under 40 CFR 75.20(a)(4)(iii), 40 CFR 75.20(g)(7), or 40 CFR 75.21(e) and continuing until the applicable date and hour specified under 40 CFR 75.20(a)(5)(i) or 40 CFR 75.20(g)(7):

(i) For a disapproved SO<sub>2</sub> pollutant concentration monitor and disapproved flow monitor, respectively, the maximum potential concentration of SO<sub>2</sub> and the maximum potential flow rate, as defined in 40 CFR Part 75, Appendix A, Sections 2.1.1.1 and 2.1.4.1;

(ii) For a disapproved moisture monitoring system and disapproved diluent gas monitoring system, respectively, the minimum potential moisture percentage and either the maximum potential CO<sub>2</sub> concentration or the minimum potential O<sub>2</sub> concentration (as applicable), as defined in 40 CFR Part 75, Appendix A, Sections 2.1.3.1, 2.1.3.2, and 2.1.5; and

(iii) For a disapproved fuel flowmeter system, the maximum potential fuel flow rate, as defined in 40 CFR Part 75, Appendix D, Section 2.4.2.1.

(b) The CAIR designated representative shall submit a notification of certification retest dates and a new certification application in accordance with paragraphs (B)(4)(c)(i) and (B)(4)(c)(ii) of this rule.

(c) The owner or operator shall repeat all certification tests or other requirements that were failed by the monitoring system, as indicated in the director's or the administrator's notice of

disapproval, no later than thirty unit operating days after the date of issuance of the notice of disapproval.

- (5) Initial certification and recertification procedures for units using the low mass emission excepted methodology under 40 CFR 75.19. The owner or operator of a unit qualified to use the low mass emissions (LME) excepted methodology under 40 CFR 75.19 shall meet the applicable certification and recertification requirements in 40 CFR 75.19(a)(2) and 40 CFR 75.20(h). If the owner or operator of such a unit elects to certify a fuel flowmeter system for heat input determination, the owner or operator shall also meet the certification and recertification requirements in 40 CFR 75.20(g).
- (6) Certification/recertification procedures for alternative monitoring systems. The CAIR designated representative of each unit for which the owner or operator intends to use an alternative monitoring system approved by the administrator and, if applicable, the director under 40 CFR Part 75, Subpart E shall comply with the applicable notification and application procedures of 40 CFR 75.20(f).

(C) Out of control periods.

- (1) Whenever any monitoring system fails to meet the quality-assurance and quality-control requirements or data validation requirements of 40 CFR Part 75, data shall be substituted using the applicable missing data procedures in 40 CFR Part 75, Subpart D, or 40 CFR Part 75, Appendix D.
- (2) Audit decertification. Whenever both an audit of a monitoring system and a review of the initial certification or recertification application reveal that any monitoring system should not have been certified or recertified because it did not meet a particular performance specification or other requirement under paragraph (B) of this rule or the applicable provisions of 40 CFR Part 75, both at the time of the initial certification or recertification application submission and at the time of the audit, the director or, for a CAIR SO<sub>2</sub> opt-in unit or a unit for which a CAIR opt-in permit application is submitted and not withdrawn and a CAIR opt-in permit is not yet issued or denied under rule 3745-109-14 of the Administrative Code, the administrator shall issue a notice of disapproval of the certification status of such monitoring system. For the purposes of this paragraph, an audit shall be either a field audit or an audit of any information submitted to the director or the administrator. By issuing the notice of disapproval, the director or the administrator revokes prospectively the certification status of the monitoring system. The data measured and recorded by the monitoring system shall not be considered valid quality-assured data from the date of issuance of the notification of the revoked certification status until the date and time that the owner or operator completes subsequently approved initial certification or recertification tests for the monitoring system. The owner or operator shall follow the applicable initial certification or recertification

procedures in paragraph (B) of this rule for each disapproved monitoring system.

(D) Notifications.

The CAIR designated representative for a CAIR SO<sub>2</sub> unit shall submit written notice to the director and the administrator in accordance with 40 CFR 75.61.

(E) Record keeping and reporting.

- (1) General provisions. The CAIR designated representative shall comply with all record keeping and reporting requirements in this paragraph, the applicable record keeping and reporting requirements in 40 CFR Part 75, Subparts F and G, and the requirements of paragraph (A)(5)(a) of rule 3745-109-09 of the Administrative Code.
- (2) Monitoring plans. The owner or operator of a CAIR SO<sub>2</sub> unit shall comply with requirements of 40 CFR 75.62 and, for a unit for which a CAIR opt-in permit application is submitted and not withdrawn and a CAIR opt-in permit is not yet issued or denied under rule 3745-109-14 of the Administrative Code paragraphs (D) and (E)(1) of rule 3745-109-14 of the Administrative Code.
- (3) Certification applications. The CAIR designated representative shall submit an application to the director within forty-five days after completing all initial certification or recertification tests required under paragraph (B) of this rule, including the information required under 40 CFR 75.63.
- (4) Quarterly reports. The CAIR designated representative shall submit quarterly reports, as follows:
  - (a) The CAIR designated representative shall report the SO<sub>2</sub> mass emissions data and heat input data for the CAIR SO<sub>2</sub> unit, in an electronic quarterly report in a format prescribed by the administrator, for each calendar quarter beginning with:
    - (i) For a unit that commences commercial operation before July 1, 2008, the calendar quarter covering January 1, 2009 to March 31, 2009;
    - (ii) For a unit that commences commercial operation on or after July 1, 2008, the calendar quarter corresponding to the earlier of the date of provisional certification or the applicable deadline for initial certification under paragraph (A)(2) of this rule, unless that quarter is the third or fourth quarter of 2008, in which case reporting shall commence in the quarter covering January 1, 2009 to March 31, 2009;

- (iii) Notwithstanding paragraphs (E)(4)(a)(i) and (E)(4)(a)(ii) of this rule, for a unit for which a CAIR opt-in permit application is submitted and not withdrawn and a CAIR opt-in permit is not yet issued or denied under rule 3745-109-14 of the Administrative Code, the calendar quarter corresponding to the date specified in paragraph (E)(2) of rule 3745-109-14 of the Administrative Code; and
    - (iv) Notwithstanding paragraphs (E)(4)(a)(i) and (E)(4)(a)(ii) of this rule, for a CAIR SO<sub>2</sub> opt-in unit under rule 3745-109-14 of the Administrative Code, the calendar quarter corresponding to the date on which the CAIR SO<sub>2</sub> opt-in unit enters the CAIR SO<sub>2</sub> trading program as provided in paragraph (E)(7) of rule 3745-109-14 of the Administrative Code.
  - (b) The CAIR designated representative shall submit each quarterly report to the administrator within thirty days following the end of the calendar quarter covered by the report. Quarterly reports shall be submitted in the manner specified in 40 CFR 75.64.
  - (c) For CAIR SO<sub>2</sub> units that are also subject to an acid rain emissions limitation or the CAIR NO<sub>x</sub> annual trading program, CAIR NO<sub>x</sub> ozone season trading program, or Hg budget trading program, quarterly reports shall include the applicable data and information required by 40 CFR Part 75, Subparts F to I as applicable, in addition to the SO<sub>2</sub> mass emission data, heat input data, and other information required by this rule.
  - (5) Compliance certification. The CAIR designated representative shall submit to the administrator a compliance certification (in a format prescribed by the administrator) in support of each quarterly report based on reasonable inquiry of those persons with primary responsibility for ensuring that all of the unit's emissions are correctly and fully monitored. The certification shall state that:
    - (a) The monitoring data submitted were recorded in accordance with the applicable requirements of this rule and 40 CFR Part 75, including the quality assurance procedures and specifications; and
    - (b) For a unit with add-on SO<sub>2</sub> emission controls and for all hours where SO<sub>2</sub> data are substituted in accordance with 40 CFR 75.34(a)(1), the add-on emission controls were operating within the range of parameters listed in the quality assurance/quality control program under 40 CFR Part 75, Appendix B and the substitute data values do not systematically underestimate SO<sub>2</sub> emissions.
- (F) Petitions.

- (1) The CAIR designated representative of a CAIR SO<sub>2</sub> unit that is subject to an acid rain emissions limitation may submit a petition under 40 CFR 75.66 to the administrator requesting approval to apply an alternative to any requirement of this rule. Application of an alternative to any requirement of this rule is in accordance with this rule only to the extent that the petition is approved in writing by the administrator, in consultation with the director.
- (2) The CAIR designated representative of a CAIR SO<sub>2</sub> unit that is not subject to an acid rain emissions limitation may submit a petition under 40 CFR 75.66 to the director and the administrator requesting approval to apply an alternative to any requirement of this rule. Application of an alternative to any requirement of this rule is in accordance with this rule only to the extent that the petition is approved in writing by both the director and the administrator.

3745-109-14      **CAIR SO2 opt-in units.**

[Comment: For dates of non-regulatory government publications, publications of recognized organizations and associations, federal rules, and federal statutory provisions referenced in this rule, see paragraph (H) of rule 3745-109-01 of the Administrative Code titled "Incorporation by Reference."]

(A) Opt-in unit applicability.

A CAIR SO2 opt-in unit must be a unit that:

- (1) Is located in the state;
- (2) Is not a CAIR SO2 unit under paragraph (C) of rule 3745-109-01 of the Administrative Code and is not covered by a retired unit exemption under paragraph (D) of rule 3745-109-01 of the Administrative Code that is in effect;
- (3) Is not covered by a retired unit exemption under 40 CFR 72.8 that is in effect and is not an opt-in source under 40 CFR Part 74;
- (4) Has or is required or qualified to have a Title V operating permit or other federally enforceable permit; and
- (5) Vents all of its emissions to a stack and can meet the monitoring, record keeping, and reporting requirements of rule 3745-109-13 of the Administrative Code.

(B) General.

- (1) Except as otherwise provided in paragraphs (A), (B), (C), (E), (F) and (G) of rule 3745-109-01 of the Administrative Code, rules 3745-109-09, 3745-109-10, 3745-109-11, and 3745-109-13 of the Administrative Code, a CAIR SO2 opt-in unit shall be treated as a CAIR SO2 unit for purposes of applying such paragraphs and rules.
- (2) Solely for purposes of applying, as provided in this rule, the requirements of rule 3745-109-13 of the Administrative Code shall apply to a unit for which a CAIR opt-in permit application is submitted and not withdrawn and a CAIR opt-in permit is not yet issued or denied under this rule, such unit shall be treated as a CAIR SO2 unit before issuance of a CAIR opt-in permit for such unit.

(C) Designated representative.

Any CAIR SO2 opt-in unit, and any unit for which a CAIR opt-in permit application is submitted and not withdrawn and a CAIR opt-in permit is not yet issued or denied under this rule, located at the same source as one or more CAIR SO2 units shall have

the same CAIR designated representative and alternate CAIR designated representative as such CAIR SO<sub>2</sub> units.

(D) Applying for CAIR opt-in permit.

(1) The CAIR designated representative of a unit meeting the requirements for a CAIR SO<sub>2</sub> opt-in unit in paragraph (A) of this rule may apply for an initial CAIR opt-in permit at any time, except as provided under paragraphs (G)(6) and (G)(7) of this rule, and, in order to apply, must submit the following:

(a) A complete CAIR permit application under paragraph (C) of rule 3745-109-10 of the Administrative Code;

(b) A certification, in a format specified by the director, that the unit:

(i) Is not a CAIR SO<sub>2</sub> unit under paragraph (C) of rule 3745-109-01 of the Administrative Code and is not covered by a retired unit exemption under paragraph (D) of rule 3745-109-01 of the Administrative Code that is in effect;

(ii) Is not covered by a retired unit exemption under 40 CFR 72.8 that is in effect;

(iii) Is not and, so long as the unit is a CAIR SO<sub>2</sub> opt-in unit, shall not become, an opt-in source under 40 CFR Part 74;

(iv) Vents all of its emissions to a stack; and

(v) Has documented heat input for more than eight hundred seventy-six hours during the six months immediately preceding submission of the CAIR permit application under paragraph (C) of rule 3745-109-10 of the Administrative Code;

(c) A monitoring plan in accordance with rule 3745-109-13 of the Administrative Code;

(d) A complete certificate of representation under paragraph (D) of rule 3745-109-09 of the Administrative Code consistent with paragraph (C) of this rule, if no CAIR designated representative has been previously designated for the source that includes the unit; and

(e) A statement, in a format specified by the director, whether the CAIR designated representative requests that the unit be allocated CAIR SO<sub>2</sub> allowances under paragraph (I)(2) or (I)(3) of this rule (subject to the conditions in paragraphs (E)(8) and (G)(7) of this rule). If allocation under paragraph (I)(3) of this rule is requested, this statement shall include a

statement that the owners and operators of the unit intend to repower the unit before January 1, 2015 and that they will provide, upon request, documentation demonstrating such intent.

(2) Duty to reapply.

- (a) The CAIR designated representative of a CAIR SO<sub>2</sub> opt-in unit shall submit a complete CAIR permit application under paragraph (C) of rule 3745-109-10 of the Administrative Code to renew the CAIR opt-in unit permit in accordance with the director's regulations for Title V operating permits, or the director's regulations for other federally enforceable permits if applicable, addressing permit renewal.
- (b) Unless the permitting authority issues a notification of acceptance of withdrawal of the CAIR SO<sub>2</sub> opt-in unit from the CAIR SO<sub>2</sub> trading program in accordance with paragraph (G) of this rule or the unit becomes a CAIR SO<sub>2</sub> unit under paragraph (C) of rule 3745-109-01 of the Administrative Code, the CAIR SO<sub>2</sub> opt-in unit shall remain subject to the requirements for a CAIR SO<sub>2</sub> opt-in unit, even if the CAIR designated representative for the CAIR SO<sub>2</sub> opt-in unit fails to submit a CAIR permit application that is required for renewal of the CAIR opt-in permit under paragraph (D)(2)(a) of this rule.

(E) Opt-in process.

The director shall issue or deny a CAIR opt-in permit for a unit for which an initial application for a CAIR opt-in permit under paragraph (D) of this rule is submitted in accordance with the following:

- (1) Interim review of monitoring plan. The director and the administrator shall determine, on an interim basis, the sufficiency of the monitoring plan accompanying the initial application for a CAIR opt-in permit under paragraph (D) of this rule. A monitoring plan is sufficient, for purposes of interim review, if the plan appears to contain information demonstrating that the SO<sub>2</sub> emissions rate and heat input of the unit and all other applicable parameters are monitored and reported in accordance with rule 3745-109-13 of the Administrative Code. A determination of sufficiency shall not be construed as acceptance or approval of the monitoring plan.
- (2) Monitoring and reporting.
  - (a) If the director and the administrator determine that the monitoring plan is sufficient under paragraph (E)(1) of this rule, the owner or operator shall monitor and report the SO<sub>2</sub> emissions rate and the heat input of the unit and all other applicable parameters, in accordance with rule 3745-109-13 of the Administrative Code, starting on the date of certification of the appropriate

monitoring systems under rule 3745-109-13 of the Administrative Code and continuing until a CAIR opt-in permit is denied under paragraph (E)(6) of this rule or, if a CAIR opt-in permit is issued, the date and time when the unit is withdrawn from the CAIR SO<sub>2</sub> trading program in accordance with paragraph (G) of this rule.

- (b) The monitoring and reporting under paragraph (E)(2)(a) of this rule shall include the entire control period immediately before the date on which the unit enters the CAIR SO<sub>2</sub> trading program under paragraph (E)(7) of this rule, during which period monitoring system availability must not be less than ninety per cent under rule 3745-109-13 of the Administrative Code and the unit must be in full compliance with any applicable state or federal emissions or emissions-related requirements.
- (c) To the extent the SO<sub>2</sub> emissions rate and the heat input of the unit are monitored and reported in accordance with rule 3745-109-13 of the Administrative Code for one or more control periods, in addition to the control period under paragraph (E)(2)(b) of this rule, during which control periods monitoring system availability is not less than ninety per cent under rule 3745-109-13 of the Administrative Code and the unit is in full compliance with any applicable state or federal emissions or emissions-related requirements and which control periods begin not more than three years before the unit enters the CAIR SO<sub>2</sub> trading program under paragraph (E)(7) of this rule, such information shall be used as provided in paragraphs (E)(3) and (E)(4) of this rule.

(3) The unit's baseline heat input shall equal:

- (a) If the unit's SO<sub>2</sub> emissions rate and heat input are monitored and reported for only one control period, in accordance with paragraph (E)(2)(a) of this rule, the unit's total heat input (in mmBtu) for the control period; or
- (b) If the unit's SO<sub>2</sub> emissions rate and heat input are monitored and reported for more than one control period, in accordance with paragraphs (E)(2)(a), (E)(2)(b) and (E)(2)(c) of this rule, the average of the amounts of the unit's total heat input (in mmBtu) for the control periods under paragraphs (E)(2)(b) and (E)(2)(c) of this rule.

(4) The unit's baseline SO<sub>2</sub> emission rate shall equal:

- (a) If the unit's SO<sub>2</sub> emissions rate and heat input are monitored and reported for only one control period, in accordance with paragraph (E)(2)(a) of this rule, the unit's SO<sub>2</sub> emissions rate (in pounds per mmBtu) for the control period;
- (b) If the unit's SO<sub>2</sub> emissions rate and heat input are monitored and reported for more than one control period, in accordance with paragraphs (E)(2)(b) and

(E)(2)(c) of this rule, and the unit does not have add-on SO<sub>2</sub> emission controls during any such control periods, the average of the amounts of the unit's SO<sub>2</sub> emissions rate (in pounds per mmBtu) for the control periods under paragraphs (E)(2)(b) and (E)(2)(c) of this rule; or

- (c) If the unit's SO<sub>2</sub> emissions rate and heat input are monitored and reported for more than one control period, in accordance with paragraphs (E)(2)(a) and (E)(2)(b) of this rule, and the unit has add-on SO<sub>2</sub> emission controls during any such control periods, the average of the amounts of the unit's SO<sub>2</sub> emissions rate (in pounds per mmBtu) for such control periods during which the unit has add-on SO<sub>2</sub> emission controls.
- (5) Issuance of CAIR opt-in permit. After calculating the baseline heat input and the baseline SO<sub>2</sub> emissions rate for the unit under paragraphs (E)(3) and (E)(4) of this rule and if the director determines that the CAIR designated representative shows that the unit meets the requirements for a CAIR SO<sub>2</sub> opt-in unit in paragraph (A) of this rule and meets the elements certified in paragraph (D)(1)(b) of this rule, the director shall issue a CAIR opt-in permit. The director shall provide a copy of the CAIR opt-in permit to the administrator, who shall then establish a compliance account for the source that includes the CAIR SO<sub>2</sub> opt-in unit unless the source already has a compliance account.
- (6) Issuance of denial of CAIR opt-in permit. Notwithstanding paragraphs (E)(1) to (E)(5) of this rule, if at any time before issuance of a CAIR opt-in permit for the unit, the director determines that the CAIR designated representative fails to show that the unit meets the requirements for a CAIR SO<sub>2</sub> opt-in unit in paragraph (A) of this rule or meets the elements certified in paragraph (D)(1)(b) of this rule, the director shall issue a denial of a CAIR opt-in permit for the unit.
- (7) Date of entry into CAIR SO<sub>2</sub> trading program. A unit for which an initial CAIR opt-in permit is issued by the director shall become a CAIR SO<sub>2</sub> opt-in unit, and a CAIR SO<sub>2</sub> unit, as of the later of January 1, 2010 or January first of the first control period during which such CAIR opt-in permit is issued.
- (8) Repowered CAIR SO<sub>2</sub> opt-in unit.
  - (a) If a CAIR designated representative requests, and the director issues a CAIR opt-in permit providing for, allocation to a CAIR SO<sub>2</sub> opt-in unit of CAIR SO<sub>2</sub> allowances under paragraph (I)(3) of this rule and such unit is repowered after its date of entry into the CAIR SO<sub>2</sub> trading program under paragraph (E)(7) of this rule, the repowered unit shall be treated as a CAIR SO<sub>2</sub> opt-in unit replacing the original CAIR SO<sub>2</sub> opt-in unit, as of the date of start-up of the repowered unit's combustion chamber.
  - (b) Notwithstanding paragraphs (E)(3) and (E)(4) of this rule, as of the date of start-up under paragraph (E)(8)(a) of this rule, the repowered unit shall be

deemed to have the same date of commencement of operation, date of commencement of commercial operation, baseline heat input, and baseline SO<sub>2</sub> emission rate as the original CAIR SO<sub>2</sub> opt-in unit, and the original CAIR SO<sub>2</sub> opt-in unit shall no longer be treated as a CAIR SO<sub>2</sub> opt-in unit or a CAIR SO<sub>2</sub> unit.

(F) CAIR opt-in permit contents.

(1) Each CAIR opt-in permit shall contain:

- (a) All elements required for a complete CAIR permit application under paragraph (C) of rule 3745-109-10 of the Administrative Code;
  - (b) The certification in paragraph (D)(1)(b) of this rule;
  - (c) The unit's baseline heat input under paragraph (E)(3) of this rule;
  - (d) The unit's baseline SO<sub>2</sub> emission rate under paragraph (E)(4) of this rule;
  - (e) A statement whether the unit is to be allocated CAIR SO<sub>2</sub> allowances under paragraph (I)(2) or (I)(3) of this rule (subject to the conditions in paragraphs (E)(8) and (G)(7) of this rule);
  - (f) A statement that the unit may withdraw from the CAIR SO<sub>2</sub> trading program only in accordance with paragraph (G) of this rule; and
  - (g) A statement that the unit is subject to, and the owners and operators of the unit must comply with, the requirements of paragraph (H) of this rule.
- (2) Each CAIR opt-in permit is deemed to incorporate automatically the definitions of terms under paragraph (B) of rule 3745-109-01 of the Administrative Code and, upon recordation by the administrator under rule 3745-109-11 or 3745-109-12 of the Administrative Code or this rule, every allocation, transfer, or deduction of CAIR SO<sub>2</sub> allowances to or from the compliance account of the source that includes a CAIR SO<sub>2</sub> opt-in unit covered by the CAIR opt-in permit.
- (3) The CAIR opt-in permit shall be included, in a format specified by the permitting authority, in the CAIR permit for the source where the CAIR SO<sub>2</sub> opt-in unit is located and in a title V operating permit or other federally enforceable permit for the source.

(G) Withdrawal from CAIR SO<sub>2</sub> trading program.

Except as provided under paragraph (G)(7) of this rule, a CAIR SO<sub>2</sub> opt-in unit may withdraw from the CAIR SO<sub>2</sub> trading program, but only if the director issues a notification to the CAIR designated representative of the CAIR SO<sub>2</sub> opt-in unit of

the acceptance of the withdrawal of the CAIR SO<sub>2</sub> opt-in unit in accordance with paragraph (G)(4) of this rule.

- (1) Requesting withdrawal. In order to withdraw a CAIR SO<sub>2</sub> opt-in unit from the CAIR SO<sub>2</sub> trading program, the CAIR designated representative of the CAIR SO<sub>2</sub> opt-in unit shall submit to the director a request to withdraw effective as of midnight of December thirty-first of a specified calendar year, which date must be at least four years after December thirty-first of the year of entry into the CAIR SO<sub>2</sub> trading program under paragraph (E)(7) of this rule. The request must be submitted no later than ninety days before the requested effective date of withdrawal.
- (2) Conditions for withdrawal. Before a CAIR SO<sub>2</sub> opt-in unit covered by a request under paragraph (G)(1) of this rule may withdraw from the CAIR SO<sub>2</sub> trading program and the CAIR opt-in permit may be terminated under paragraph (G)(5) of this rule, the following conditions must be met:
  - (a) For the control period ending on the date on which the withdrawal is to be effective, the source that includes the CAIR SO<sub>2</sub> opt-in unit must meet the requirement to hold CAIR SO<sub>2</sub> allowances under paragraph (E)(3) of rule 3745-109-01 of the Administrative Code and cannot have any excess emissions.
  - (b) After the requirement for withdrawal under paragraph (G)(2)(a) of this rule is met, the administrator shall deduct from the compliance account of the source that includes the CAIR SO<sub>2</sub> opt-in unit CAIR SO<sub>2</sub> allowances equal in amount to and allocated for the same or a prior control period as any CAIR SO<sub>2</sub> allowances allocated to the CAIR SO<sub>2</sub> opt-in unit under paragraph (I) of this rule for any control period for which the withdrawal is to be effective. If there are no remaining CAIR SO<sub>2</sub> units at the source, the administrator shall close the compliance account, and the owners and operators of the CAIR SO<sub>2</sub> opt-in unit may submit a CAIR SO<sub>2</sub> allowance transfer for any remaining CAIR SO<sub>2</sub> allowances to another CAIR SO<sub>2</sub> allowance tracking system in accordance with rule 3745-109-12 of the Administrative Code.
- (3) Notification.
  - (a) After the requirements for withdrawal under paragraphs (G)(1) and (G)(2) of this rule are met (including deduction of the full amount of CAIR SO<sub>2</sub> allowances required), the director shall issue a notification to the CAIR designated representative of the CAIR SO<sub>2</sub> opt-in unit of the acceptance of the withdrawal of the CAIR SO<sub>2</sub> opt-in unit as of midnight on December thirty-first of the calendar year for which the withdrawal was requested.

- (b) If the requirements for withdrawal under paragraphs (G)(1) and (G)(2) of this rule are not met, the director shall issue a notification to the CAIR designated representative of the CAIR SO<sub>2</sub> opt-in unit that the CAIR SO<sub>2</sub> opt-in unit's request to withdraw is denied. Such CAIR SO<sub>2</sub> opt-in unit shall continue to be a CAIR SO<sub>2</sub> opt-in unit.
  - (4) Permit amendment. After the director issues a notification under paragraph (G)(3)(a) of this rule that the requirements for withdrawal have been met, the director shall revise the CAIR permit covering the CAIR SO<sub>2</sub> opt-in unit to terminate the CAIR opt-in permit for such unit as of the effective date specified under paragraph (G)(3)(a) of this rule. The unit shall continue to be a CAIR SO<sub>2</sub> opt-in unit until the effective date of the termination and shall comply with all requirements under the CAIR SO<sub>2</sub> trading program concerning any control periods for which the unit is a CAIR SO<sub>2</sub> opt-in unit, even if such requirements arise or must be complied with after the withdrawal takes effect.
  - (5) Reapplication upon failure to meet conditions of withdrawal. If the director denies the CAIR SO<sub>2</sub> opt-in unit's request to withdraw, the CAIR designated representative may submit another request to withdraw in accordance with paragraphs (G)(1) and (G)(2) of this rule.
  - (6) Ability to reapply to the CAIR SO<sub>2</sub> trading program. Once a CAIR SO<sub>2</sub> opt-in unit withdraws from the CAIR SO<sub>2</sub> trading program and its CAIR opt-in permit is terminated under this rule, the CAIR designated representative may not submit another application for a CAIR opt-in permit under paragraph (D) of this rule for such CAIR SO<sub>2</sub> opt-in unit before the date that is four years after the date on which the withdrawal became effective. Such new application for a CAIR opt-in permit shall be treated as an initial application for a CAIR opt-in permit under paragraph (E) of this rule.
  - (7) Inability to withdraw. Notwithstanding paragraphs (G)(1) to (G)(6) of this rule, a CAIR SO<sub>2</sub> opt-in unit shall not be eligible to withdraw from the CAIR SO<sub>2</sub> trading program if the CAIR designated representative of the CAIR SO<sub>2</sub> opt-in unit requests, and the director issues a CAIR opt-in permit providing for, allocation to the CAIR SO<sub>2</sub> opt-in unit of CAIR SO<sub>2</sub> allowances under paragraph (I)(3) of this rule.
- (H) Change in regulatory status.
- (1) Notification. If a CAIR SO<sub>2</sub> opt-in unit becomes a CAIR SO<sub>2</sub> unit under paragraph (C) of rule 3745-109-01 of the Administrative Code, then the CAIR designated representative shall notify in writing the director and the administrator of such change in the CAIR SO<sub>2</sub> opt-in unit's regulatory status, within thirty days of such change.
  - (2) Director's and administrator's actions.

- (a) If a CAIR SO<sub>2</sub> opt-in unit becomes a CAIR SO<sub>2</sub> unit under paragraph (C) of rule 3745-109-01 of the Administrative Code, the director shall revise the CAIR SO<sub>2</sub> opt-in unit's CAIR opt-in permit to meet the requirements of a CAIR permit under paragraph (D) of rule 3745-109-10 of the Administrative Code, and remove the CAIR opt-in unit provisions, as of the date on which the CAIR SO<sub>2</sub> opt-in unit becomes a CAIR SO<sub>2</sub> unit under paragraph (C) of rule 3745-109-01 of the Administrative Code.
- (b) Compliance deductions.
  - (i) The administrator shall deduct from the compliance account of the source that includes a CAIR SO<sub>2</sub> opt-in unit that becomes a CAIR SO<sub>2</sub> unit under paragraph (C) of rule 3745-109-01 of the Administrative Code, CAIR SO<sub>2</sub> allowances equal in amount to and allocated for the same or a prior control period as:
    - (a) Any CAIR SO<sub>2</sub> allowances allocated to the CAIR SO<sub>2</sub> opt-in unit under paragraph (I) of rule 3745-109-14 of the Administrative Code for any control period after the date on which the CAIR SO<sub>2</sub> opt-in unit becomes a CAIR SO<sub>2</sub> unit under paragraph (C) of rule 3745-109-01 of the Administrative Code; and
    - (b) If the date on which the CAIR SO<sub>2</sub> opt-in unit becomes a CAIR SO<sub>2</sub> unit under paragraph (C) of rule 3745-109-01 of the Administrative Code is not December thirty-first, the CAIR SO<sub>2</sub> allowances allocated to the CAIR SO<sub>2</sub> opt-in unit under paragraph (I) of this rule for the control period that includes the date on which the CAIR SO<sub>2</sub> opt-in unit becomes a CAIR SO<sub>2</sub> unit under paragraph (C) of rule 3745-109-01 of the Administrative Code, multiplied by the ratio of the number of days, in the control period, starting with the date on which the CAIR SO<sub>2</sub> opt-in unit becomes a CAIR SO<sub>2</sub> unit under paragraph (C) of rule 3745-109-01 of the Administrative Code divided by the total number of days in the control period and rounded to the nearest whole allowance as appropriate.
  - (ii) The CAIR designated representative shall ensure that the compliance account of the source that includes the CAIR SO<sub>2</sub> opt-in unit that becomes a CAIR SO<sub>2</sub> unit under paragraph (C) of rule 3745-109-01 of the Administrative Code contains the CAIR SO<sub>2</sub> allowances necessary for completion of the deduction under paragraph (H)(2)(b)(i) of this rule.

(I) CAIR SO<sub>2</sub> allowance allocations to CAIR SO<sub>2</sub> opt-in units.

- (1) Timing requirements.
  - (a) When the CAIR opt-in permit is issued under paragraph (E)(5) of this rule, the director shall allocate CAIR SO<sub>2</sub> allowances to the CAIR SO<sub>2</sub> opt-in unit, and submit to the administrator the allocation for the control period in which a CAIR SO<sub>2</sub> opt-in unit enters the CAIR SO<sub>2</sub> trading program under paragraph (E)(7) of this rule, in accordance with paragraph (I)(2) or (I)(3) of this rule.
  - (b) By no later than October thirty-first of the control period after the control period in which a CAIR SO<sub>2</sub> opt-in unit enters the CAIR SO<sub>2</sub> trading program under paragraph (E)(7) of this rule, and October thirty-first of each year thereafter, the director shall allocate CAIR SO<sub>2</sub> allowances to the CAIR SO<sub>2</sub> opt-in unit, and submit to the administrator the allocation for the control period that includes such submission deadline and in which the unit is a CAIR SO<sub>2</sub> opt-in unit, in accordance with paragraph (I)(2) or (I)(3) of this rule.
- (2) Calculation of allocation. For each control period for which a CAIR SO<sub>2</sub> opt-in unit is to be allocated CAIR SO<sub>2</sub> allowances, the director shall allocate in accordance with the following procedures:
  - (a) The heat input (in mmBtu) used for calculating the CAIR SO<sub>2</sub> allowance allocation shall be the lesser of:
    - (i) The CAIR SO<sub>2</sub> opt-in unit's baseline heat input determined under paragraph (E)(3) of this rule; or
    - (ii) The CAIR SO<sub>2</sub> opt-in unit's heat input, as determined in accordance with rule 3745-109-13 of the Administrative Code, for immediately prior control period, except when the allocation is being calculated for the control period in which the CAIR SO<sub>2</sub> opt-in unit enters the CAIR SO<sub>2</sub> trading program under paragraph (E)(7) of this rule.
  - (b) The SO<sub>2</sub> emission rate (in pounds per mmBtu) used for calculating CAIR SO<sub>2</sub> allowance allocations shall be the lesser of:
    - (i) The CAIR SO<sub>2</sub> opt-in unit's baseline SO<sub>2</sub> emissions rate (in pounds per mmBtu) determined under paragraph (E)(4) of this rule and multiplied by seventy per cent; or
    - (ii) The most stringent state or federal SO<sub>2</sub> emissions limitation applicable to the CAIR SO<sub>2</sub> opt-in unit at any time during the control period for which CAIR SO<sub>2</sub> allowances are to be allocated.

- (c) The director shall allocate CAIR SO<sub>2</sub> allowances to the CAIR SO<sub>2</sub> opt-in unit with a tonnage equivalent equal to, or less than by the smallest possible amount, the heat input under paragraph (I)(2)(a) of this rule, multiplied by the SO<sub>2</sub> emission rate under paragraph (I)(2)(b) of this rule, and divided by two thousand pounds per ton.
- (3) Notwithstanding paragraph (I)(2) of this rule and if the CAIR designated representative requests, and the director issues a CAIR opt-in permit (based on a demonstration of the intent to repower stated under paragraph (D)(1)(e) of this rule) providing for, allocation to a CAIR SO<sub>2</sub> opt-in unit of CAIR SO<sub>2</sub> allowances under this rule (subject to the conditions in paragraphs (E)(8) and (G)(7) of this rule), the director shall allocate to the CAIR SO<sub>2</sub> opt-in unit as follows:
- (a) For each control period in 2010 to 2014 for which the CAIR SO<sub>2</sub> opt-in unit is to be allocated CAIR SO<sub>2</sub> allowances;
    - (i) The heat input (in mmBtu) used for calculating CAIR SO<sub>2</sub> allowance allocations shall be determined as described in paragraph (I)(2)(a) of this rule;
    - (ii) The SO<sub>2</sub> emission rate (in pounds per mmBtu) used for calculating CAIR SO<sub>2</sub> allowance allocations shall be the lesser of:
      - (a) The CAIR SO<sub>2</sub> opt-in unit's baseline SO<sub>2</sub> emissions rate (in pounds per mmBtu) determined under paragraph (E)(4) of this rule; or
      - (b) The most stringent state or federal SO<sub>2</sub> emissions limitation applicable to the CAIR SO<sub>2</sub> opt-in unit at any time during the control period in which the CAIR SO<sub>2</sub> opt-in unit enters the CAIR SO<sub>2</sub> trading program under paragraph (E)(7) of this rule;
    - (iii) The director shall allocate CAIR SO<sub>2</sub> allowances to the CAIR SO<sub>2</sub> opt-in unit with a tonnage equivalent equal to, or less than by the smallest possible amount, the heat input under paragraph (I)(3)(a)(i) of this rule, multiplied by the SO<sub>2</sub> emission rate under paragraph (I)(3)(a)(ii) of this rule, and divided by two thousand pounds per ton.
  - (b) For each control period in 2015 and thereafter for which the CAIR SO<sub>2</sub> opt-in unit is to be allocated CAIR SO<sub>2</sub> allowances;
    - (i) The heat input (in mmBtu) used for calculating the CAIR SO<sub>2</sub> allowance allocations shall be determined as described in paragraph (I)(2)(a) of this rule;

- (ii) The SO<sub>2</sub> emission rate (in pounds per mmBtu) used for calculating the CAIR SO<sub>2</sub> allowance allocation shall be the lesser of:
  - (a) The CAIR SO<sub>2</sub> opt-in unit's baseline SO<sub>2</sub> emissions rate (in pounds per mmBtu) determined under paragraph (E)(4) of this rule multiplied by ten per cent; or
  - (b) The most stringent state or federal SO<sub>2</sub> emissions limitation applicable to the CAIR SO<sub>2</sub> opt-in unit at any time during the control period for which CAIR SO<sub>2</sub> allowances are to be allocated;
- (iii) The director shall allocate CAIR SO<sub>2</sub> allowances to the CAIR SO<sub>2</sub> opt-in unit with a tonnage equivalent equal to, or less than by the smallest possible amount, the heat input under paragraph (I)(3)(b)(i) of this rule, multiplied by the SO<sub>2</sub> emission rate under paragraph (I)(3)(b)(ii) of this rule, and divided by two thousand pounds per ton.

(4) Recordation.

- (a) The administrator shall record, in the compliance account of the source that includes the CAIR SO<sub>2</sub> opt-in unit, the CAIR SO<sub>2</sub> allowances allocated by the director to the CAIR SO<sub>2</sub> opt-in unit under paragraph (I)(1)(a) of this rule.
- (b) By December first, after the control period in which a CAIR SO<sub>2</sub> opt-in unit enters the CAIR SO<sub>2</sub> trading program under paragraph (E)(7) of this rule, and December first of each year thereafter, the administrator shall record, in the compliance account of the source that includes the CAIR SO<sub>2</sub> opt-in unit, the CAIR SO<sub>2</sub> allowances allocated by the director to the CAIR SO<sub>2</sub> opt-in unit under paragraph (I)(1)(b) of this rule.

**CAIR designated representative for CAIR NO<sub>x</sub> ozone season sources.**

[Comment: For dates of non-regulatory government publications, publications of recognized organizations and associations, federal rules, and federal statutory provisions referenced in this rule, see the last paragraph of rule 3745-109-01 of the Administrative Code titled "Incorporation by reference."]

**(A) Authorization and responsibilities of CAIR designated representative.**

- (1) Except as provided under paragraph (B) of this rule, each CAIR NO<sub>x</sub> ozone season source, including all CAIR NO<sub>x</sub> ozone season units at the source, shall have one and only one CAIR designated representative, with regard to all matters under the CAIR NO<sub>x</sub> ozone season trading program concerning the source or any CAIR NO<sub>x</sub> ozone season unit at the source.
- (2) The CAIR designated representative of the CAIR NO<sub>x</sub> ozone season source shall be selected by an agreement binding on the owners and operators of the source and all CAIR NO<sub>x</sub> ozone season units at the source and shall act in accordance with the certification statement in paragraph (D)(1)(d)(iv) of this rule.
- (3) Upon receipt by the administrator of a complete certificate of representation under paragraph (D) of this rule, the CAIR designated representative of the source shall represent and, by his or her representations, actions, inactions, or submissions, legally bind each owner and operator of the CAIR NO<sub>x</sub> ozone season source represented and each CAIR NO<sub>x</sub> ozone season unit at the source in all matters pertaining to the CAIR NO<sub>x</sub> ozone season trading program, notwithstanding any agreement between the CAIR designated representative and such owners and operators. The owners and operators shall be bound by any decision or order issued to the CAIR designated representative by the director, the administrator, or a court regarding the source or unit.
- (4) No CAIR permit will be issued, no emissions data reports will be accepted, and no CAIR NO<sub>x</sub> ozone season allowance tracking system account will be established for a CAIR NO<sub>x</sub> ozone season unit at a source, until the administrator has received a complete certificate of representation under paragraph (D) of this rule for a CAIR designated representative of the source and the CAIR NO<sub>x</sub> ozone season units at the source.
- (5) CAIR NO<sub>x</sub> ozone season trading program submissions.
  - (a) Each submission under the CAIR NO<sub>x</sub> ozone season trading program shall be submitted, signed, and certified by the CAIR designated representative for each CAIR NO<sub>x</sub> ozone season source on behalf of which the submission is made. Each such submission shall include the following certification

statement by the CAIR designated representative: "I am authorized to make this submission on behalf of the owners and operators of the source or units for which the submission is made. I certify under penalty of law that I have personally examined, and am familiar with, the statements and information submitted in this document and all its attachments. Based on my inquiry of those individuals with primary responsibility for obtaining the information, I certify that the statements and information are to the best of my knowledge and belief true, accurate, and complete. I am aware that there are significant penalties for submitting false statements and information or omitting required statements and information, including the possibility of fine or imprisonment."

- (b) The director and the administrator shall accept or act on a submission made on behalf of owner or operators of a CAIR NO<sub>x</sub> ozone season source or a CAIR NO<sub>x</sub> ozone season unit only if the submission has been made, signed, and certified in accordance with paragraph (A)(5)(a) of this rule.

(B) Alternate CAIR designated representative.

- (1) A certificate of representation under paragraph (D) of this rule may designate one and only one alternate CAIR designated representative, who may act on behalf of the CAIR designated representative. The agreement by which the alternate CAIR designated representative is selected shall include a procedure for authorizing the alternate CAIR designated representative to act in lieu of the CAIR designated representative.
- (2) Upon receipt by the administrator of a complete certificate of representation under paragraph (D) of this rule, any representation, action, inaction, or submission by the alternate CAIR designated representative shall be deemed to be a representation, action, inaction, or submission by the CAIR designated representative.
- (3) Except in paragraph (B) of this rule and paragraph (B) of rule 3745-109-01 of the Administrative Code, paragraphs (A)(1) and (A)(4), (C), (D), (F) of this rule, paragraph (A) of rule 3745-109-18 of the Administrative Code and paragraph (C) of rule 3745-109-21 of the Administrative Code, whenever the term CAIR designated representative is used in rules 3745-109-01 and 3745-109-15 to 3745-109-21 of the Administrative Code, the term shall be construed to include the CAIR designated representative or any alternate CAIR designated representative.

(C) Changing CAIR designated representative and alternate CAIR designated representative; changes in owners and operators.

- (1) Changing CAIR designated representative. The CAIR designated representative may be changed at any time upon receipt by the administrator of a superseding

complete certificate of representation under paragraph (D) of this rule. Notwithstanding any such change, all representations, actions, inactions, and submissions by the previous CAIR designated representative before the time and date when the administrator receives the superseding certificate of representation shall be binding on the new CAIR designated representative and the owners and operators of the CAIR NO<sub>x</sub> ozone season source and the CAIR NO<sub>x</sub> ozone season units at the source.

- (2) Changing alternate CAIR designated representative. The alternate CAIR designated representative may be changed at any time upon receipt by the administrator of a superseding complete certificate of representation under paragraph (D) of this rule. Notwithstanding any such change, all representations, actions, inactions, and submissions by the previous alternate CAIR designated representative before the time and date when the administrator receives the superseding certificate of representation shall be binding on the new alternate CAIR designated representative and the owners and operators of the CAIR NO<sub>x</sub> ozone season source and the CAIR NO<sub>x</sub> ozone season units at the source.
- (3) Changes in owners and operators.
  - (a) In the event a owner or operator of a CAIR NO<sub>x</sub> ozone season source or a CAIR NO<sub>x</sub> ozone season unit is not included in the list of owners and operators in the certificate of representation under paragraph (D) of this rule, such owner or operator shall be deemed to be subject to and bound by the certificate of representation, the representations, actions, inactions, and submissions of the CAIR designated representative and any alternate CAIR designated representative of the source or unit, and the decisions and orders of the director, the administrator, or a court, as if the owner or operator were included in such list.
  - (b) Within thirty days following any change in the owners and operators of a CAIR NO<sub>x</sub> ozone season source or a CAIR NO<sub>x</sub> ozone season unit, including the addition of a new owner or operator, the CAIR designated representative or any alternate CAIR designated representative shall submit a revision to the certificate of representation under paragraph (D) of this rule amending the list of owners and operators to include the change.

(D) Certificate of representation.

- (1) A complete certificate of representation for a CAIR designated representative or an alternate CAIR designated representative shall include the following elements in a format prescribed by the administrator:
  - (a) Identification of the CAIR NO<sub>x</sub> ozone season source, and each CAIR NO<sub>x</sub> ozone season unit at the source, for which the certificate of representation is

submitted, including identification and nameplate capacity of each generator served by each such unit;

- (b) The name, address, e-mail address (if any), telephone number, and facsimile transmission number (if any) of the CAIR designated representative and any alternate CAIR designated representative;
- (c) A list of the owners and operators of the CAIR NO<sub>x</sub> ozone season source and of each CAIR NO<sub>x</sub> ozone season unit at the source;
- (d) The following certification statements by the CAIR designated representative and any alternate CAIR designated representative:
  - (i) "I certify that I was selected as the CAIR designated representative or alternate CAIR designated representative, as applicable, by an agreement binding on the owners and operators of the source and each CAIR NO<sub>x</sub> ozone season unit at the source."
  - (ii) "I certify that I have all the necessary authority to carry out my duties and responsibilities under the CAIR NO<sub>x</sub> ozone season trading program on behalf of the owners and operators of the source and of each CAIR NO<sub>x</sub> ozone season unit at the source and that each such owner and operator shall be fully bound by my representations, actions, inactions, or submissions."
  - (iii) "I certify that the owners and operators of the source and of each CAIR NO<sub>x</sub> ozone season unit at the source shall be bound by any order issued to me by the administrator, the director, or a court regarding the source or unit."
  - (iv) Where there are multiple holders of a legal or equitable title to, or a leasehold interest in, a CAIR NO<sub>x</sub> ozone season unit, or where a utility or industrial customer purchases power from a CAIR NO<sub>x</sub> ozone season unit under a life-of-the-unit, firm power contractual arrangement, "I certify that: I have given a written notice of my selection as the 'CAIR designated representative' or 'alternate CAIR designated representative', as applicable, and of the agreement by which I was selected to each owner and operator of the source and of each CAIR NO<sub>x</sub> ozone season unit at the source; and CAIR NO<sub>x</sub> ozone season allowances and proceeds of transactions involving CAIR NO<sub>x</sub> ozone season allowances will be deemed to be held or distributed in proportion to each holder's legal, equitable, leasehold, or contractual reservation or entitlement, except that, if such multiple holders have expressly provided for a different distribution of CAIR NO<sub>x</sub> ozone season allowances by contract, CAIR NO<sub>x</sub> ozone season allowances and proceeds of transactions involving CAIR NO<sub>x</sub> ozone season

allowances will be deemed to be held or distributed in accordance with the contract."

(e) The signature of the CAIR designated representative and any alternate CAIR designated representative and the dates signed.

(2) Unless otherwise required by the director or the administrator, documents of agreement referred to in the certificate of representation shall not be submitted to the director or the administrator. Neither the director nor the administrator shall be under any obligation to review or evaluate the sufficiency of such documents, if submitted.

(E) Objections concerning CAIR designated representative.

(1) Once a complete certificate of representation under paragraph (D) of this rule has been submitted and received, the director and the administrator shall rely on the certificate of representation unless and until a superseding complete certificate of representation under paragraph (D) of this rule is received by the administrator.

(2) Except as provided in paragraphs (C)(1) and (C)(2) of this rule, no objection or other communication submitted to the director or the administrator concerning the authorization, or any representation, action, inaction, or submission, of the CAIR designated representative shall affect any representation, action, inaction, or submission of the CAIR designated representative or the finality of any decision or order by the director or the administrator under the CAIR NOx ozone season trading program.

(3) Neither the director nor the administrator will adjudicate any private legal dispute concerning the authorization or any representation, action, inaction, or submission of any CAIR designated representative, including private legal disputes concerning the proceeds of CAIR NOx ozone season allowance transfers.

(F) Delegation by CAIR designated representative and alternate CAIR designated representative.

(1) A CAIR designated representative may delegate, to one or more natural persons, his or her authority to make an electronic submission to the administrator provided for or required under this rule.

(2) An alternate CAIR designated representative may delegate, to one or more natural persons, his or her authority to make an electronic submission to the administrator provided for or required under this rule.

- (3) In order to delegate authority to make an electronic submission to the administrator in accordance with paragraph (F)(1) or (F)(2) of this rule, the CAIR designated representative or alternate CAIR designated representative, as appropriate, must submit to the administrator a notice of delegation, in a format prescribed by the administrator, that includes the following elements:
  - (a) The name, address, e-mail address, telephone number, and facsimile transmission number (if any) of such CAIR designated representative or alternate CAIR designated representative;
  - (b) The name, address, e-mail address, telephone number, and facsimile transmission number (if any) of each such natural person (referred to as an "agent");
  - (c) For each such natural person, a list of the type or types of electronic submissions under paragraph (F)(1) or (F)(2) of this rule for which authority is delegated to him or her; and
  - (d) The following certification statements by such CAIR designated representative or alternate CAIR designated representative:
    - (i) "I agree that any electronic submission to the administrator that is by an agent identified in this notice of delegation and of a type listed for such agent in this notice of delegation and that is made when I am a CAIR designated representative or alternate CAIR designated representative, as appropriate, and before this notice of delegation is superseded by another notice of delegation under 40 CFR 96.315(d) shall be deemed to be an electronic submission by me."
    - (ii) "Until this notice of delegation is superseded by another notice of delegation under 40 CFR 96.315(d), I agree to maintain an e-mail account and to notify the administrator immediately of any change in my e-mail address unless all delegation of authority by me under 40 CFR 96.315 is terminated."
- (4) A notice of delegation submitted under paragraph (F)(3) of this rule shall be effective, with regard to the CAIR designated representative or alternate CAIR designated representative identified in such notice, upon receipt of such notice by the administrator and until receipt by the administrator of a superseding notice of delegation submitted by such CAIR designated representative or alternate CAIR designated representative, as appropriate. The superseding notice of delegation may replace any previously identified agent, add a new agent, or eliminate entirely any delegation of authority.
- (5) Any electronic submission covered by the certification in paragraph (F)(3)(d)(i) of this rule and made in accordance with a notice of delegation effective under

paragraph (F)(4) of this rule shall be deemed to be an electronic submission by the CAIR designated representative or alternate CAIR designated representative submitting such notice of delegation.

[Comment: For dates of non-regulatory government publications, publications of recognized organizations and associations, federal rules, and federal statutory provisions referenced in this rule, see the last paragraph of rule 3745-109-01 of the Administrative Code titled "Incorporation by Reference."]

(A) General CAIR ozone season trading program permit requirements.

- (1) For each CAIR NO<sub>x</sub> ozone season source required to have a Title V operating permit or required, under rule 3745-109-21 of the Administrative Code, to have an operating permit or other federally enforceable permit, such permit shall include a CAIR permit administered by the director for the Title V operating permit or the federally enforceable permit as applicable. The CAIR portion of the Title V permit or other federally enforceable permit as applicable shall be administered in accordance with the director's Title V operating permits regulations promulgated under 40 CFR Part 70 or 71 or the director's regulations for other federally enforceable permits as applicable, except as provided otherwise by paragraph (D) of rule 3745-109-01, this rule, and rule 3745-109-21 of the Administrative Code.
- (2) Each CAIR permit shall contain, with regard to the CAIR NO<sub>x</sub> ozone season source and the CAIR NO<sub>x</sub> ozone season units at the source covered by the CAIR permit, all applicable CAIR NO<sub>x</sub> ozone season trading program, CAIR NO<sub>x</sub> annual trading program, and CAIR SO<sub>2</sub> trading program requirements and shall be a complete and separable portion of the Title V operating permit or other federally enforceable permit under paragraph (A)(1) of this rule.

(B) Submission of CAIR permit applications.

- (1) Duty to apply. The CAIR designated representative of any CAIR NO<sub>x</sub> ozone season source required to have a Title V operating permit shall submit to the director a complete CAIR permit application under paragraph (C) of this rule for the source covering each CAIR NO<sub>x</sub> ozone season unit at the source at least twelve months (or such lesser time provided by the director) before the later of January 1, 2009 or the date on which the CAIR NO<sub>x</sub> ozone season unit commences commercial operation, except as provided in paragraph (D)(1) of rule 3745-109-21 of the Administrative Code.
- (2) Duty to Reapply. For a CAIR NO<sub>x</sub> ozone season source required to have a Title V operating permit, the CAIR designated representative shall submit a complete CAIR permit application under paragraph (C) of this rule for the source covering each CAIR NO<sub>x</sub> ozone season unit at the source to renew the CAIR permit in accordance with the director's Title V operating permits regulations addressing

permit renewal, except as provided in paragraph (D)(2) of rule 3745-109-21 of the Administrative Code.

(C) Information requirements for CAIR permit applications.

A complete CAIR permit application shall include the following elements concerning the CAIR NO<sub>x</sub> ozone season source for which the application is submitted, in a format prescribed by the director:

- (1) Identification of the CAIR NO<sub>x</sub> ozone season source;
- (2) Identification of each CAIR NO<sub>x</sub> ozone season unit at the CAIR NO<sub>x</sub> ozone season source; and
- (3) The standard requirements under paragraph (E) of rule 3745-109-01 of the Administrative Code.

(D) CAIR permit contents and term.

- (1) Each CAIR permit shall contain, in a format prescribed by the director, all elements required for a complete CAIR permit application under paragraph (C) of this rule.
- (2) Each CAIR permit is deemed to incorporate automatically the definitions of terms under paragraph (B) of rule 3745-109-01 of the Administrative Code and, upon recordation by the administrator under rules 3745-109-18, 3745-109-19 or 3745-109-21 of the Administrative Code, every allocation, transfer, or deduction of a CAIR NO<sub>x</sub> ozone season allowance to or from the compliance account of the CAIR NO<sub>x</sub> ozone season source covered by the permit.
- (3) The term of the CAIR permit shall be set by the director, as necessary to facilitate coordination of the renewal of the CAIR permit with issuance, revision, or renewal of the CAIR NO<sub>x</sub> ozone season source's Title V operating permit or other federally enforceable permit as applicable.

(E) CAIR permit revisions.

Except as provided in paragraph (D) of this rule, the director shall revise the CAIR permit, as necessary, in accordance with the director's Title V operating permits regulations or the director's regulations for other federally enforceable permits as applicable addressing permit revisions.

[Comment: For dates of non-regulatory government publications, publications of recognized organizations and associations, federal rules, and federal statutory provisions referenced in this rule, see paragraph (H) of rule 3745-109-01 of the Administrative Code titled "Incorporation by Reference."]

(A) State trading budget.

The state trading budget in Ohio for annual allocations of CAIR NOx ozone season allowances for the control periods in 2009 to 2014 is forty-five thousand six hundred sixty four tons and in 2015 and thereafter is thirty-nine thousand nine hundred forty-five tons for units under paragraphs (C)(1), (C)(2), (C)(3) and (C)(5) of rule 3745-109-01 of the Administrative Code (EGUs); for units under paragraph (C)(4) of rule 3745-109-01 of the Administrative Code, CAIR NOx ozone season allowances for control periods 2009 and thereafter are four thousand thirty tons (non-EGUs).

(B) Timing requirements for CAIR NOx ozone season allowance allocations.

(1) No later than September 30, 2007, the director shall submit to the administrator the CAIR NOx ozone season allowance allocations, in a format prescribed by the administrator and in accordance with paragraphs (C)(1) and (C)(2) of this rule, for the control periods in 2009, 2010, 2011, 2012, 2013 and 2014.

(2) Existing units.

(a) By October 31, 2009 and October thirty-first every six years thereafter, the director shall submit to the administrator the CAIR NOx ozone season allowance allocations, in a format prescribed by the administrator and in accordance with paragraphs (C)(1) and (C)(2) of this rule, for the control periods six years, seven years, eight years, nine years, ten years and eleven years after the year of the applicable deadline for submission under this paragraph.

(3) New units.

(a) By July 31, 2009 and July thirty-first of each year thereafter, the director shall submit to the administrator the CAIR NOx ozone season allowance allocations, in a format prescribed by the administrator and in accordance with paragraphs (C)(1), (C)(3) and (C)(4) of this rule, for the control period in the year of the applicable deadline for submission under this paragraph.

(C) CAIR NOx ozone season allowance allocations.

(1) Heat inputs to be used for existing units.

- (a) The baseline heat input (in mmBtu) used with respect to CAIR NO<sub>x</sub> ozone season allowance allocations under paragraph (C)(2) of this rule for each CAIR NO<sub>x</sub> ozone season unit shall be:
- (i) For units commencing operation before January 1, 2001 the average of the three highest amounts of the unit's adjusted control period heat input for 1998 to 2005, with the adjusted control period heat input for each year calculated as follows:
    - (a) If the unit is coal-fired during the year, the unit's control period heat input for such year is multiplied by one hundred per cent;
    - (b) If the unit is oil-fired during the year, the unit's control period heat input for such year is multiplied by sixty per cent; and
    - (c) If the unit is not subject to paragraph (C)(1)(a)(i)(a) or (C)(1)(a)(i)(b) of this rule, the unit's control period heat input for such year is multiplied by forty per cent.
    - (d) If the unit is a non-EGU, as applicable to units identified by paragraph (C)(4) of rule 3745-109-01 of the Administrative Code, the baseline heat input (in mmBtu) determination in paragraph (C)(1)(a)(i) or (C)(1)(a)(ii) shall not include any adjustments for heat inputs as described in paragraphs (C)(1)(a)(i)(a) to (C)(1)(a)(i)(c) and (C)(1)(b) of this rule.
  - (ii) For units commencing operation on or after January 1, 2001 and operating each calendar year during a period of three or more consecutive calendar years the average of the three highest amounts of the unit's total converted control period heat input.
- (b) Adjusted heat inputs.
- (i) A unit's control period heat input, and a unit's status as coal-fired or oil-fired, for a calendar year under paragraph (C)(1)(a)(i) of this rule, and a unit's total tons of NO<sub>x</sub> emissions during a control period in a calendar year under paragraph (C)(3)(c) of this rule, shall be determined in accordance with 40 CFR Part 75, to the extent the unit was otherwise subject to the requirements of 40 CFR Part 75 for the year, or shall be based on the best available data reported to the director for the unit, to the extent the unit was not otherwise subject to the requirements of 40 CFR Part 75 for the year.
  - (ii) A unit's converted control period heat input for a calendar year specified under paragraph (C)(1)(a)(ii) of this rule equals:

- (a) Except as provided in paragraph (C)(1)(b)(ii)(b) or (C)(1)(b)(ii)(c) of this rule, the control period gross electrical output of the generator or generators served by the unit multiplied by seven thousand nine hundred Btu per kWh, if the unit is coal-fired for the year, or six thousand six hundred seventy-five Btu per kWh, if the unit is not coal-fired for the year, and divided by one million Btu per mmBtu, provided that if a generator is served by two or more units, then the gross electrical output of the generator will be attributed to each unit in proportion to the unit's share of the total control period heat input of such units for the year;
- (b) For a unit that is a boiler and has equipment used to produce electricity and useful thermal energy for industrial, commercial, heating, or cooling purposes through the sequential use of energy, the total heat energy (in Btu) of the steam produced by the boiler during the control period, divided by 0.8 and by one million Btu per mmBtu; or
- (c) For a unit that is a combustion turbine and has equipment used to produce electricity and useful thermal energy for industrial, commercial, heating, or cooling purposes through the sequential use of energy, the control period gross electrical output of the enclosed device comprising the compressor, combustor, and turbine multiplied by three thousand four hundred thirteen Btu per kWh, plus the total heat energy of the steam produced by any associated heat recovery steam generator during the control period divided by 0.8, and with the sum divided by one million Btu per mmBtu.

(2) Adjusted allocations.

- (a) For each control period in 2009 and thereafter, the director shall allocate to all CAIR NO<sub>x</sub> ozone season units in the state that have a baseline heat input (as determined under paragraph (C)(1) of this rule) a total amount of CAIR NO<sub>x</sub> ozone season allowances equal to ninety-three per cent for a control period during 2009 to 2014, and ninety-five per cent for a control period during 2015 and thereafter, of the tons of NO<sub>x</sub> emissions in the state trading budget under paragraph (A) of this rule (except as provided in paragraph (C)(4) of this rule) for units under paragraph (C)(1) of rule 3745-109-01 of the Administrative Code (EGUs).
- (b) For each control period in 2009 and thereafter, the director shall allocate to all CAIR NO<sub>x</sub> ozone season units in the state that have a baseline heat input (as determined under paragraph (C)(1) of this rule) a total amount of CAIR NO<sub>x</sub> ozone season allowances equal to ninety-five per cent for a control

period during 2009 to 2014, and ninety-seven per cent for a control period during 2015 and thereafter, of the tons of NO<sub>x</sub> emissions in the state trading budget under paragraph (A) of this rule (except as provided in paragraph (C)(4) of this rule) for units under paragraph (C)(4) of rule 3745-109-01 of the Administrative Code (non-EGUs).

The director shall allocate separately, the available allowances for the above control periods, each portion of the state trading budget under paragraph (A) of this rule for EGUs and non-EGUs.

- (c) The director shall allocate CAIR NO<sub>x</sub> ozone season allowances to each CAIR NO<sub>x</sub> ozone season unit under paragraph (C)(2)(a) of this rule in an amount determined by multiplying the total amount of CAIR NO<sub>x</sub> ozone season allowances allocated under paragraph (C)(2)(a) of this rule by the ratio of the baseline heat input of such CAIR NO<sub>x</sub> ozone season unit to the total amount of baseline heat input of all such CAIR NO<sub>x</sub> ozone season units in the state and rounding to the nearest whole allowance as appropriate.
- (d) The director shall allocate CAIR NO<sub>x</sub> ozone season allowances to each CAIR NO<sub>x</sub> ozone season unit under paragraph (C)(2)(b) of this rule in an amount equaling the lesser of 0.17 pound per mmBtu or the unit's most stringent state or federal NO<sub>x</sub> emission limitation multiplied by the baseline heat input of such CAIR NO<sub>x</sub> ozone season unit determined under paragraph (C)(1)(a)(i)(d) of this rule, divided by two thousand pounds per ton, and rounding to the nearest whole allowance as appropriate.
- (e) If the initial total number of CAIR NO<sub>x</sub> ozone season allowances allocated to all CAIR NO<sub>x</sub> ozone season units under paragraph (C)(4) of rule 3745-109-01 of the Administrative Code (non-EGUs) for a control period under paragraph (C)(2)(b) of this rule exceeds the total amount of the CAIR NO<sub>x</sub> ozone season allowances available under paragraph (C)(2)(b) of this rule covering such units, the director shall adjust the total number of CAIR NO<sub>x</sub> ozone season allowances allocated to all such CAIR NO<sub>x</sub> ozone season units for the control period under paragraph (C)(2)(b) of this rule so that the total number of CAIR NO<sub>x</sub> ozone season allowances allocated equals the total amount of the CAIR NO<sub>x</sub> ozone season allowances available under paragraph (C)(2)(b) of this rule covering such units. This adjustment shall be made by multiplying each unit's allocation by the amount of the CAIR NO<sub>x</sub> ozone season allowances available under paragraph (C)(2)(b) of this rule covering such units, dividing by the total number of CAIR NO<sub>x</sub> ozone season allowances allocated under paragraph (C)(2)(d) of this rule, and rounding to the nearest whole CAIR NO<sub>x</sub> ozone season allowance as appropriate.

- (f) If the initial total number of CAIR NO<sub>x</sub> ozone season allowances allocated to all CAIR NO<sub>x</sub> ozone season units under paragraph (C)(4) of rule 3745-109-01 of the Administrative Code (non-EGUs) for a control period under paragraph (C)(2)(b) of this rule is less than the total amount of the CAIR NO<sub>x</sub> ozone season allowances available under paragraph (C)(2)(b) of this rule covering such units, any such unallocated CAIR NO<sub>x</sub> ozone season allowances will be placed into an account controlled by the state of Ohio. The director of Ohio EPA shall determine if any such unallocated CAIR NO<sub>x</sub> ozone season allowances will be retired, distributed, stored or used for whatever purpose the director deems necessary.
- (3) For each control period in 2009 and thereafter, the director shall allocate CAIR NO<sub>x</sub> ozone season allowances to CAIR NO<sub>x</sub> ozone season units in the state that are not allocated CAIR NO<sub>x</sub> Ozone Season allowances under paragraph (C)(2)(a) of this rule because the units do not yet have a baseline heat input under paragraph (C)(1)(a) of this rule or because the units have a baseline heat input but all CAIR NO<sub>x</sub> ozone season allowances available under paragraph (C)(2)(a) of this rule for the control period are already allocated, in accordance with the following procedures:
- (a) The director shall establish a separate new unit set-aside for each control period. Each new unit set-aside shall be allocated CAIR NO<sub>x</sub> ozone season allowances equal to five per cent for the control periods in 2009 to 2014, and three per cent for control periods in 2015 and thereafter, of the amount of tons of NO<sub>x</sub> emissions in the state trading budget for both EGUs and non-EGUs under paragraph (A) of this rule (EGUs and non-EGUs will have separate new unit set-asides established using the amount of tons of NO<sub>x</sub> emissions available in their respective portions of the state trading budgets under paragraph (A) of this rule).
- (b) The CAIR designated representative of such a CAIR NO<sub>x</sub> ozone season unit may submit to the director a request, in a format specified by the director, to be allocated CAIR NO<sub>x</sub> ozone season allowances, starting with the later of the control period in 2009 or the first control period after the control period in which the CAIR NO<sub>x</sub> ozone season unit commences commercial operation and until the first control period for which the unit is allocated CAIR NO<sub>x</sub> ozone season allowances under paragraph (C)(2) of this rule. A separate CAIR NO<sub>x</sub> ozone season allowance allocation request for each control period for which CAIR NO<sub>x</sub> ozone season allowances are sought must be submitted on or before February first before such control period and after the date on which the CAIR NO<sub>x</sub> ozone season unit commences commercial operation.
- (c) In a CAIR NO<sub>x</sub> ozone season allowance allocation request under paragraph (C)(3)(b) of this rule, the CAIR designated representative may request for a control period CAIR NO<sub>x</sub> ozone season allowances in an amount not

exceeding the CAIR NO<sub>x</sub> ozone season unit's total tons of NO<sub>x</sub> emissions during the control period immediately before such control period.

- (d) The director shall review each CAIR NO<sub>x</sub> ozone season allowance allocation request under paragraph (C)(3)(b) of this rule and shall allocate CAIR NO<sub>x</sub> ozone season allowances for each control period pursuant to such request as follows:
  - (i) The director shall accept an allowance allocation request only if the request meets, or is adjusted by the director as necessary to meet, the requirements of paragraphs (C)(3)(b) and (C)(3)(c) of this rule.
  - (ii) On or after February first before the control period, the director shall determine the sum of the CAIR NO<sub>x</sub> ozone season allowances requested (as adjusted under paragraph (C)(3)(d)(i) of this rule) in all allowance allocation requests accepted under paragraph (C)(3)(d)(i) of this rule for the control period.
  - (iii) If the amount of CAIR NO<sub>x</sub> ozone season allowances in the new unit set-aside for the control period is greater than or equal to the sum under paragraph (C)(3)(d)(ii) of this rule, then the director shall allocate the amount of CAIR NO<sub>x</sub> ozone season allowances requested (as adjusted under paragraph (C)(3)(d)(i) of this rule) to each CAIR NO<sub>x</sub> ozone season unit covered by an allowance allocation request accepted under paragraph (C)(3)(d)(i) of this rule.
  - (iv) If the amount of CAIR NO<sub>x</sub> ozone season allowances in the new unit set-aside for the control period is less than the sum under paragraph (C)(3)(d)(ii) of this rule, then the director shall allocate to each CAIR NO<sub>x</sub> ozone season unit covered by an allowance allocation request accepted under paragraph (C)(3)(d)(i) of this rule the amount of the CAIR NO<sub>x</sub> ozone season allowances requested (as adjusted under paragraph (C)(3)(d)(i) of this rule), multiplied by the number of CAIR NO<sub>x</sub> ozone season allowances in the new unit set-aside for the control period, divided by the sum determined under paragraph (C)(3)(d)(ii) of this rule, and rounded to the nearest whole allowance as appropriate.
  - (v) The director shall notify each CAIR designated representative that submitted an allowance allocation request of the amount of CAIR NO<sub>x</sub> ozone season allowances (if any) allocated for the control period to the CAIR NO<sub>x</sub> ozone season unit covered by the request.

[Comment: As stated in paragraph (C)(3) of this rule, units commencing operation on or after January 1, 2001 and lacking a baseline heat input because of insufficient heat input data availability, as stated in paragraph (C)(1)(a)(ii) of this rule, shall be allocated

allowances from the new unit set-aside. The unit will continue to be allocated allowances from the new unit set-aside, even if the unit has sufficient heat input data for determination of a baseline until such time as the director has determined new allowance allocations from the state trading budget under paragraph (A) of this rule, for all units in the state with a baseline heat input based on the timing requirements in paragraph (B) of this rule.]

- (4) If, after completion of the procedures under paragraph (C)(3)(d) of this rule for a control period, any unallocated CAIR NO<sub>x</sub> ozone season allowances remain in the new unit set-aside for the control period, the director shall allocate to each CAIR NO<sub>x</sub> ozone season unit that was allocated CAIR NO<sub>x</sub> ozone season allowances under paragraph (C)(2) of this rule an amount of CAIR NO<sub>x</sub> ozone season allowances equal to the total amount of such remaining unallocated CAIR NO<sub>x</sub> ozone season allowances, multiplied by the unit's allocation under paragraph (C)(2) of this rule, divided by ninety-five per cent for a control period during 2009 to 2014, and ninety-seven per cent for a control period during 2015 and thereafter, of the amount of tons of NO<sub>x</sub> emissions in the state trading budget under paragraph (A) of rule 3745-109-17 of the Administrative Code, and rounded to the nearest whole allowance as appropriate.
- (5) The director shall establish an allocation set-aside for each control period beginning in 2009 for energy efficiency/renewable energy projects. Each energy efficiency/renewable energy project set-aside shall be allocated CAIR NO<sub>x</sub> ozone season allowances equal to one per cent of the tons of NO<sub>x</sub> emissions in the state trading budget under paragraph (A) of this rule, as applicable to units identified by paragraph (C)(1) of rule 3745-109-01 of the Administrative Code (EGUs only), rounded to the nearest whole NO<sub>x</sub> allowance as appropriate.
  - (a) Applicants may submit a proposal to the director for an energy efficiency/renewable energy project and request allocations from the energy efficiency/renewable energy project set-aside for energy reductions obtained as a result of the project. The director shall review proposals based on criteria determined by the director, and notify applicants of approved projects. Proposals must contain the following:
    - (i) A detailed description of the project; and
    - (ii) An estimate of the number of allocations that will be requested.
    - (iii) The director will calculate the number of NO<sub>x</sub> allowances requested for each approved project based on the energy savings or NO<sub>x</sub> emissions reduced by the project. By March first of each year, the director will determine the total number of NO<sub>x</sub> allowances to be reserved for approved projects. If the total number of NO<sub>x</sub> allowances requested for approved projects is less than or equal to the number of NO<sub>x</sub>

allowances in the designated set-aside, the number of allowances requested will be reserved for each approved project. If more NOx allowances are requested than exist in the set-aside, allowances will be reserved on a pro-rated basis based on the number of allowances available. Approved projects requesting only one NOx allowance will not be pro-rated.

- (b) To receive allocations for the energy efficiency/renewable energy projects approved by the director, the applicant must submit a completed project report that verifies that the project was completed as proposed and that proposed energy reductions were obtained.
  - (c) Upon verification of the project's success, the director shall award the required allocations to the applicant.
  - (d) Allocations shall be awarded on an annual basis and for no more than five consecutive years for each approved energy efficiency/renewable energy project.
- (6) The director shall establish an allocation set-aside for each control period beginning in 2009 for innovative technology projects. Each innovative technology project set-aside shall be allocated CAIR NOx ozone season allowances equal to one per cent of the tons of NOx emissions in the state trading budget under paragraph (A) of this rule, as applicable to units identified by paragraph (C)(1) of rule 3745-109-01 of the Administrative Code (EGUs only), rounded to the nearest whole NOx allowance as appropriate.
- (a) Applicants may submit a proposal to the director for an innovative technology project and request allocations from the innovative technology project set-aside for NOx emissions reductions or energy reductions obtained. The director shall review proposals based on criteria determined by the director, and notify applicants of approved projects. Proposals must contain the following:
    - (i) A detailed description of the project; and
    - (ii) An estimate of the number of allocations that will be requested.
    - (iii) The director will calculate the number of NOx allowances requested for each approved project based on the energy savings or NOx emissions reduced by the project. By March first of each year, the director will determine the total number of NOx allowances to be reserved for approved projects. If the total number of NOx allowances requested for approved projects is less than or equal to the number of NOx allowances in the designated set-aside, the number of allowances requested will be reserved for each approved project. If more NOx

allowances are requested than exist in the set-aside, allowances will be reserved on a pro-rated basis based on the number of allowances available. Approved projects requesting only one NO<sub>x</sub> allowance will not be pro-rated.

- (b) To receive allocations for the innovative technology projects approved by the director, the applicant shall submit a completed project report that verifies that the project was completed as proposed and that proposed NO<sub>x</sub> emissions reductions or energy reductions were obtained.
  - (c) Upon verification of the project's success, the director shall award the required allocations to the applicant.
  - (d) Allocations shall be awarded on an annual basis and for no more than five consecutive years for each approved innovative technology project.
- (7) Allowances remaining at the end of each year in the energy efficiency/renewable energy allocation set-aside or in the innovative technology project allocation set-aside, shall be allocated to CAIR NO<sub>x</sub> ozone season units under paragraph (C)(1) of rule 3745-109-01 of the Administrative Code (EGUs) in the following year, prorated on the basis of each unit's previous year allocations.
- (8) The director, beginning with the end of the 2009 CAIR NO<sub>x</sub> ozone season control period and every three years thereafter, will review the number of the allowances requested for approved projects for the control period from both the energy efficiency/renewable energy allocation set-aside and the innovative technology project allocation set-aside, and compare that number to each currently available set-aside. If the number of allowances requested for approved projects exceeds the available allowance set-aside by more than twenty-five per cent for either set-aside, the director shall adjust each set-aside upward as necessary at the first control period available after such time as the director has determined new allowance allocations from the state trading budget under paragraph (A) of this rule, as applicable to units identified by paragraph (C)(1) of rule 3745-109-01 of the Administrative Code (EGUs), in the state with a baseline heat input based on the timing requirements in paragraph (B) of this rule, but up to a maximum of five per cent for the energy efficiency/renewable energy set-aside or the innovative technology project set aside.

[Comment: If the energy efficiency/renewable energy or the innovative technology project set-aside(s) are proposed to be increased, as outlined above, during a new allowance allocation cycle based on the timing requirements in paragraph (B) of this rule as applicable to units identified by paragraph (C)(1) of rule 3745-109-01 of the Administrative Code (EGUs), then the available allowances from the state budget for allocation to units identified by paragraph (C)(1) of rule 3745-109-01 of the Administrative Code, will be reduced by an amount equal to the difference between the existing set-aside amount and the

new set-aside amount. In 2015 and beyond, the new unit side aside for EGUs is fixed at three per cent, so any increase in the energy efficiency/renewable energy or innovative technology set-aside, should that occur, is the only variable that could decrease the existing unit's allocation amount.]

(A) Establishment of accounts.

(1) Compliance accounts. Except as provided in paragraph (E)(5) of rule 3745-109-21 of the Administrative Code, upon receipt of a complete certificate of representation under paragraph (D) of rule 3745-109-15 of the Administrative Code, the administrator shall establish a compliance account for the CAIR NOx ozone season source for which the certificate of representation was submitted, unless the source already has a compliance account.

(2) General accounts.

(a) Application for general account.

(i) Any person may apply to open a general account for the purpose of holding and transferring CAIR NOx ozone season allowances. An application for a general account may designate one and only one CAIR authorized account representative and one and only one alternate CAIR authorized account representative who may act on behalf of the CAIR authorized account representative. The agreement by which the alternate CAIR authorized account representative is selected shall include a procedure for authorizing the alternate CAIR authorized account representative to act in lieu of the CAIR authorized account representative.

(ii) A complete application for a general account shall be submitted to the administrator and shall include the following elements in a format prescribed by the administrator:

(a) Name, mailing address, e-mail address (if any), telephone number, and facsimile transmission number (if any) of the CAIR authorized account representative and any alternate CAIR authorized account representative;

(b) Organization name and type of organization, if applicable;

(c) A list of all persons subject to a binding agreement for the CAIR authorized account representative and any alternate CAIR

authorized account representative to represent their ownership interest with respect to the allowances held in the general account;

- (d) The following certification statement by the CAIR authorized account representative and any alternate CAIR authorized account representative: "I certify that I was selected as the CAIR authorized account representative or the alternate CAIR authorized account representative, as applicable, by an agreement that is binding on all persons who have an ownership interest with respect to allowances held in the general account. I certify that I have all the necessary authority to carry out my duties and responsibilities under the CAIR NO<sub>x</sub> ozone season trading program on behalf of such persons and that each such person shall be fully bound by my representations, actions, inactions, or submissions and by any order or decision issued to me by the administrator or a court regarding the general account."
  - (e) The signature of the CAIR authorized account representative and any alternate CAIR authorized account representative and the dates signed.
- (iii) Unless otherwise required by the director or the administrator, documents of agreement referred to in the application for a general account shall not be submitted to the director or the administrator. Neither the director nor the administrator shall be under any obligation to review or evaluate the sufficiency of such documents, if submitted.
- (b) Authorization of CAIR authorized account representative and alternate CAIR authorized account representative.
- (i) Upon receipt by the administrator of a complete application for a general account under paragraph (A)(2)(a) of this rule:
    - (a) The administrator shall establish a general account for the person or persons for whom the application is submitted.
    - (b) The CAIR authorized account representative and any alternate CAIR authorized account representative for the general account shall represent and, by his or her representations, actions, inactions, or submissions, legally bind each person who has an ownership interest with respect to CAIR NO<sub>x</sub> ozone season allowances held in the general account in all matters pertaining to the CAIR NO<sub>x</sub> ozone season trading program, notwithstanding any agreement between the CAIR authorized account representative or any alternate CAIR authorized account representative and such person. Any such person shall be bound by any order or decision

issued to the CAIR authorized account representative or any alternate CAIR authorized account representative by the administrator or a court regarding the general account.

- (c) Any representation, action, inaction, or submission by any alternate CAIR authorized account representative shall be deemed to be a representation, action, inaction, or submission by the CAIR authorized account representative.
  - (ii) Each submission concerning the general account shall be submitted, signed, and certified by the CAIR authorized account representative or any alternate CAIR authorized account representative for the persons having an ownership interest with respect to CAIR NO<sub>x</sub> ozone season allowances held in the general account. Each such submission shall include the following certification statement by the CAIR authorized account representative or any alternate CAIR authorized account representative: "I am authorized to make this submission on behalf of the persons having an ownership interest with respect to the CAIR NO<sub>x</sub> ozone season allowances held in the general account. I certify under penalty of law that I have personally examined, and am familiar with, the statements and information submitted in this document and all its attachments. Based on my inquiry of those individuals with primary responsibility for obtaining the information, I certify that the statements and information are to the best of my knowledge and belief true, accurate, and complete. I am aware that there are significant penalties for submitting false statements and information or omitting required statements and information, including the possibility of fine or imprisonment."
  - (iii) The administrator shall accept or act on a submission concerning the general account only if the submission has been made, signed, and certified in accordance with paragraph (A)(2)(b)(ii) of this rule.
- (c) Changing CAIR authorized account representative and alternate CAIR authorized account representative; changes in persons with ownership interest.
- (i) The CAIR authorized account representative for a general account may be changed at any time upon receipt by the administrator of a superseding complete application for a general account under paragraph (A)(2)(a) of this rule. Notwithstanding any such change, all representations, actions, inactions, and submissions by the previous CAIR authorized account representative before the time and date when the administrator receives the superseding application for a general account shall be binding on the new CAIR authorized account

representative and the persons with an ownership interest with respect to the CAIR NO<sub>x</sub> ozone season allowances in the general account.

- (ii) The alternate CAIR authorized account representative for a general account may be changed at any time upon receipt by the administrator of a superseding complete application for a general account under paragraph (A)(2)(a) of this rule. Notwithstanding any such change, all representations, actions, inactions, and submissions by the previous alternate CAIR authorized account representative before the time and date when the administrator receives the superseding application for a general account shall be binding on the new alternate CAIR authorized account representative and the persons with an ownership interest with respect to the CAIR NO<sub>x</sub> ozone season allowances in the general account.
- (iii) Ownership change.
  - (a) In the event a person having an ownership interest with respect to CAIR NO<sub>x</sub> ozone season allowances in the general account is not included in the list of such persons in the application for a general account, such person shall be deemed to be subject to and bound by the application for a general account, the representation, actions, inactions, and submissions of the CAIR authorized account representative and any alternate CAIR authorized account representative of the account, and the decisions and orders of the administrator or a court, as if the person were included in such list.
  - (b) Within thirty days following any change in the persons having an ownership interest with respect to CAIR NO<sub>x</sub> ozone season allowances in the general account, including the addition of a new person, the CAIR authorized account representative or any alternate CAIR authorized account representative shall submit a revision to the application for a general account amending the list of persons having an ownership interest with respect to the CAIR NO<sub>x</sub> ozone season allowances in the general account to include the change.
- (d) Objections concerning CAIR authorized account representative and alternate CAIR authorized account representative.
  - (i) Once a complete application for a general account under paragraph (A)(2)(a) of this rule has been submitted and received, the administrator shall rely on the application unless and until a superseding complete application for a general account under paragraph (A)(2)(a) of this rule is received by the administrator.

- (ii) Except as provided in paragraphs (A)(2)(c)(i) and (A)(2)(c)(ii) of this rule of this section, no objection or other communication submitted to the administrator concerning the authorization, or any representation, action, inaction, or submission of the CAIR authorized account representative or any alternate CAIR authorized account representative for a general account shall affect any representation, action, inaction, or submission of the CAIR authorized account representative or any alternate CAIR authorized account representative or the finality of any decision or order by the administrator under the CAIR NO<sub>x</sub> ozone season trading program.
  - (iii) The administrator will not adjudicate any private legal dispute concerning the authorization or any representation, action, inaction, or submission of the CAIR authorized account representative or any alternate CAIR authorized account representative for a general account, including private legal disputes concerning the proceeds of CAIR NO<sub>x</sub> ozone season allowance transfers.
- (e) Delegation by CAIR authorized account representative and alternate CAIR authorized account representative.
- (i) A CAIR authorized account representative may delegate, to one or more natural persons, his or her authority to make an electronic submission to the administrator provided for or required under rules 3745-109-18 and 3745-109-19 of the Administrative Code.
  - (ii) An alternate CAIR authorized account representative may delegate, to one or more natural persons, his or her authority to make an electronic submission to the administrator provided for or required under rules 3745-109-18 and 3745-109-19 of the Administrative Code.
  - (iii) In order to delegate authority to make an electronic submission to the administrator in accordance with paragraph (A)(2)(e)(i) or (A)(2)(e)(ii) of this rule, the CAIR authorized account representative or alternate CAIR authorized account representative, as appropriate, must submit to the administrator a notice of delegation, in a format prescribed by the administrator, that includes the following elements:
    - (a) The name, address, e-mail address, telephone number, and facsimile transmission number (if any) of such CAIR authorized account representative or alternate CAIR authorized account representative;
    - (b) The name, address, e-mail address, telephone number, and facsimile transmission number (if any) of each such natural person (referred to as an "agent");

- (c) For each such natural person, a list of the type or types of electronic submissions under paragraph (A)(2)(e)(i) or (A)(2)(e)(ii) of this rule for which authority is delegated to him or her;
  - (d) The following certification statement by such CAIR authorized account representative or alternate CAIR authorized account representative: "I agree that any electronic submission to the administrator that is by an agent identified in this notice of delegation and of a type listed for such agent in this notice of delegation and that is made when I am a CAIR authorized account representative or alternate CAIR authorized representative, as appropriate, and before this notice of delegation is superseded by another notice of delegation under paragraph (A)(2)(e)(iv) of rule 3745-109-18 of the Administrative Code shall be deemed to be an electronic submission by me."; and
  - (e) The following certification statement by such CAIR authorized account representative or alternate CAIR authorized account representative: "Until this notice of delegation is superseded by another notice of delegation under paragraph (A)(2)(e)(iv) of rule 3745-109-18 of the Administrative Code, I agree to maintain an e-mail account and to notify the administrator immediately of any change in my e-mail address unless all delegation of authority by me under paragraph (A)(2)(e) of rule 3745-109-18 of the Administrative Code is terminated."
- (iv) A notice of delegation submitted under paragraph (A)(2)(e)(iii) of this rule shall be effective, with regard to the CAIR authorized account representative or alternate CAIR authorized account representative identified in such notice, upon receipt of such notice by the Administrator and until receipt by the administrator of a superseding notice of delegation submitted by such CAIR authorized account representative or alternate CAIR authorized account representative, as appropriate. The superseding notice of delegation may replace any previously identified agent, add a new agent, or eliminate entirely any delegation of authority.
- (v) Any electronic submission covered by the certification in paragraph (A)(2)(e)(iii)(d) of this rule and made in accordance with a notice of delegation effective under paragraph (A)(2)(e)(iv) of this rule shall be deemed to be an electronic submission by the CAIR designated representative or alternate CAIR designated representative submitting such notice of delegation.

- (3) Account identification. The administrator shall assign a unique identifying number to each account established under paragraph (A)(1) or (A)(2) of this rule.

(B) Responsibilities of CAIR authorized account representative.

- (1) Following the establishment of a CAIR NO<sub>x</sub> ozone season allowance tracking system account, all submissions to the administrator pertaining to the account, including, but not limited to, submissions concerning the deduction or transfer of CAIR NO<sub>x</sub> ozone season allowances in the account, shall be made only by the CAIR authorized account representative for the account.

(C) Recordation of CAIR NO<sub>x</sub> ozone season allowance allocations.

- (1) By September 30, 2007, the administrator shall record in the CAIR NO<sub>x</sub> ozone season source's compliance account the CAIR NO<sub>x</sub> ozone season allowances allocated for the CAIR NO<sub>x</sub> ozone season units at the source, as submitted by the director in accordance with paragraph (B)(1) of rule 3745-109-17 of the Administrative Code, for the control periods in 2009, 2010, 2011, 2012, 2013, and 2014.
- (2) By December 1, 2009, and December first every six years thereafter, the administrator shall record in the CAIR NO<sub>x</sub> ozone season source's compliance account the CAIR NO<sub>x</sub> ozone season allowances allocated for the CAIR NO<sub>x</sub> ozone season units at the source as submitted by the director in accordance with paragraph (B)(2)(a) of rule 3745-109-17 of the Administrative Code, for the control periods in the six years, seven years, eight years, nine years, ten years and eleven years after the year of the applicable deadline for recordation under this paragraph.
- (3) Serial numbers for allocated CAIR NO<sub>x</sub> ozone season allowances. When recording the allocation of CAIR NO<sub>x</sub> ozone season allowances for a CAIR NO<sub>x</sub> ozone season unit in a compliance account, the administrator shall assign each CAIR NO<sub>x</sub> ozone season allowance a unique identification number that will include digits identifying the year of the control period for which the CAIR NO<sub>x</sub> ozone season allowance is allocated.

(D) Compliance with CAIR NO<sub>x</sub> ozone season emissions limitation.

- (1) Allowance transfer deadline. The CAIR NO<sub>x</sub> ozone season allowances are available to be deducted for compliance with a source's CAIR NO<sub>x</sub> ozone season emissions limitation for a control period in a given calendar year only if the CAIR NO<sub>x</sub> ozone season allowances:
  - (a) Were allocated for the control period in the year or a prior year; and

- (b) Are held in the compliance account as of the allowance transfer deadline for the control period or are transferred into the compliance account by a CAIR NO<sub>x</sub> ozone season allowance transfer correctly submitted for recordation under paragraphs (A) and (B) of rule 3745-109-19 of the Administrative Code by the allowance transfer deadline for the control period; and
- (2) Deductions for compliance. Following the recordation, in accordance with paragraph (B) of rule 3745-109-19 of the Administrative Code, of CAIR NO<sub>x</sub> ozone season allowance transfers submitted for recordation in a source's compliance account by the allowance transfer deadline for a control period, the administrator shall deduct from the compliance account CAIR NO<sub>x</sub> ozone season allowances available under paragraph (D)(1) of this rule in order to determine whether the source meets the CAIR NO<sub>x</sub> ozone season emissions limitation for the control period, as follows:
  - (a) Until the amount of CAIR NO<sub>x</sub> ozone season allowances deducted equals the number of tons of total NO<sub>x</sub> emissions, determined in accordance with rule 3745-109-20 of the Administrative Code, from all CAIR NO<sub>x</sub> ozone season units at the source for the control period; or
  - (b) If there are insufficient CAIR NO<sub>x</sub> ozone season allowances to complete the deductions in paragraph (D)(2)(a) of this rule, until no more CAIR NO<sub>x</sub> ozone season allowances available under paragraph (D)(1) of this rule remain in the compliance account.
- (3) Identification of allowances deducted.
  - (a) Identification of CAIR NO<sub>x</sub> ozone season allowances by serial number. The CAIR authorized account representative for a source's compliance account may request that specific CAIR NO<sub>x</sub> ozone season allowances, identified by serial number, in the compliance account be deducted for emissions or excess emissions for a control period in accordance with paragraph (D)(2) or (D)(4) of this rule. Such request shall be submitted to the administrator by the allowance transfer deadline for the control period and include, in a format prescribed by the administrator, the identification of the CAIR NO<sub>x</sub> ozone season source and the appropriate serial numbers.
  - (b) First-in, first-out. The administrator shall deduct CAIR NO<sub>x</sub> ozone season allowances under paragraph (D)(2) or (D)(4) of this rule from the source's compliance account, in the absence of an identification or in the case of a partial identification of CAIR NO<sub>x</sub> ozone season allowances by serial number under paragraph (D)(3)(a) of this rule, on a first-in, first-out (FIFO) accounting basis in the following order:
    - (i) Any CAIR NO<sub>x</sub> ozone season allowances that were allocated to the units at the source, in the order of recordation; and

- (ii) Any CAIR NO<sub>x</sub> ozone season allowances that were allocated to any entity and transferred and recorded in the compliance account pursuant to rule 3745-109-19 of the Administrative Code, in the order of recordation.

(4) Deductions for excess emissions.

- (a) After making the deductions for compliance under paragraph (D)(2) of this rule for a control period in a calendar year in which the CAIR NO<sub>x</sub> ozone season source has excess emissions, the administrator shall deduct from the source's compliance account an amount of CAIR NO<sub>x</sub> ozone season allowances, allocated for the control period in the immediately following calendar year, equal to three times the number of tons of the source's excess emissions.
- (b) Any allowance deduction required under paragraph (D)(4)(a) of this rule shall not affect the liability of the owners and operators of the CAIR NO<sub>x</sub> ozone season source or the CAIR NO<sub>x</sub> ozone season units at the source for any fine, penalty, or assessment, or their obligation to comply with any other remedy, for the same violations, as ordered under the Clean Air Act or applicable state law.

(5) Recordation of deductions. The administrator shall record in the appropriate compliance account all deductions from such an account under paragraph (D)(2) or (D)(4) of this rule and rule 3745-109-21 of the Administrative Code.

(6) Administrator's action on submissions.

- (a) The administrator may review and conduct independent audits concerning any submission under the CAIR NO<sub>x</sub> ozone season trading program and make appropriate adjustments of the information in the submissions.
- (b) The administrator may deduct CAIR NO<sub>x</sub> ozone season allowances from or transfer CAIR NO<sub>x</sub> ozone season allowances to a source's compliance account based on the information in the submissions, as adjusted under paragraph (D)(6)(a) of this rule, and record such deductions and transfers.

(E) Banking.

- (1) CAIR NO<sub>x</sub> ozone season allowances may be banked for future use or transfer in a compliance account or a general account in accordance with paragraph (E)(2) of this rule.
- (2) Any CAIR NO<sub>x</sub> ozone season allowance that is held in a compliance account or a general account shall remain in such account unless and until the CAIR NO<sub>x</sub>

ozone season allowance is deducted or transferred under paragraphs (D) and (F) of this rule, or rule 3745-109-19 or rule 3745-109-21 of the Administrative Code.

(F) Account error.

The administrator may, at his or her sole discretion and on his or her own motion, correct any error in any CAIR NO<sub>x</sub> ozone season allowance tracking system account. Within ten business days of making such correction, the administrator shall notify the CAIR authorized account representative for the account.

(G) Closing of general accounts.

- (1) The CAIR authorized account representative of a general account may submit to the administrator a request to close the account, which shall include a correctly submitted allowance transfer under paragraphs (A) and (B) of rule 3745-109-19 of the Administrative Code for any CAIR NO<sub>x</sub> ozone season allowances in the account to one or more other CAIR NO<sub>x</sub> ozone season allowance tracking system accounts.
- (2) If a general account has no allowance transfers in or out of the account for a twelve-month period or longer and does not contain any CAIR NO<sub>x</sub> ozone season allowances, the administrator may notify the CAIR authorized account representative for the account that the account shall be closed following twenty business days after the notice is sent. The account shall be closed after the twenty-day period unless, before the end of the twenty-day period, the administrator receives a correctly submitted transfer of CAIR NO<sub>x</sub> ozone season allowances into the account under paragraphs (A) and (B) of rule 3745-109-19 of the Administrative Code or a statement submitted by the CAIR authorized account representative demonstrating to the satisfaction of the administrator good cause as to why the account should not be closed.

Prior Effective Dates: 9/27/2007

**(A) Submission of CAIR NOx ozone season allowance transfers.**

A CAIR authorized account representative seeking recordation of a CAIR NOx ozone season allowance transfer shall submit the transfer to the administrator. To be considered correctly submitted, the CAIR NOx ozone season allowance transfer shall include the following elements, in a format specified by the administrator:

- (1) The account numbers for both the transferor and transferee accounts;
- (2) The serial number of each CAIR NOx ozone season allowance that is in the transferor account and is to be transferred; and
- (3) The name and signature of the CAIR authorized account representative of the transferor account and the date signed.

**(B) Recordation.**

- (1) Within five business days (except as provided in paragraph (B)(2) of this rule) of receiving a CAIR NOx ozone season allowance transfer, the administrator shall record a CAIR NOx ozone season allowance transfer by moving each CAIR NOx ozone season allowance from the transferor account to the transferee account as specified by the request, provided that:
  - (a) The transfer is correctly submitted under paragraph (A) of this rule; and
  - (b) The transferor account includes each CAIR NOx ozone season allowance identified by serial number in the transfer.
- (2) A CAIR NOx ozone season allowance transfer that is submitted for recordation after the allowance transfer deadline for a control period and that includes any CAIR NOx ozone season allowances allocated for any control period before such allowance transfer deadline shall not be recorded until after the administrator completes the deductions under paragraph (D) of rule 3745-109-18 of the Administrative Code for the control period immediately before such allowance transfer deadline.
- (3) Where a CAIR NOx ozone season allowance transfer submitted for recordation fails to meet the requirements of paragraph (B)(1) of this rule, the administrator shall not record such transfer.

**(C) Notification.**

- (1) Notification of recordation. Within five business days of recordation of a CAIR NO<sub>x</sub> ozone season allowance transfer under paragraph (B) of this rule, the administrator shall notify the CAIR authorized account representatives of both the transferor and transferee accounts.
- (2) Notification of non-recordation. Within ten business days of receipt of a CAIR NO<sub>x</sub> ozone season allowance transfer that fails to meet the requirements of paragraph (B)(1) of this rule, the administrator shall notify the CAIR authorized account representatives of both accounts subject to the transfer of:
  - (a) A decision not to record the transfer, and
  - (b) The reasons for such non-recordation.
- (3) Nothing in this section shall preclude the submission of a CAIR NO<sub>x</sub> ozone season allowance transfer for recordation following notification of non-recordation.

3745-109-20      **Monitoring and reporting.**

[Comment: For dates of non-regulatory government publications, publications of recognized organizations and associations, federal rules, and federal statutory provisions referenced in this rule, see paragraph (H) of rule 3745-109-01 of the Administrative Code titled "Incorporation by Reference."]

(A) General requirements.

The owners and operators, and to the extent applicable, the CAIR designated representative, of a CAIR NO<sub>x</sub> ozone season unit, shall comply with the monitoring, record keeping, and reporting requirements as provided in this rule and in 40 CFR Part 75, Subpart H. For purposes of complying with such requirements, the definitions in paragraph (B) of rule 3745-109-01 of the Administrative Code and in 40 CFR 72.2 shall apply, and the terms affected unit, designated representative, and continuous emission monitoring system (or CEMS) in 40 CFR Part 75 shall be deemed to refer to the terms CAIR NO<sub>x</sub> ozone season unit, CAIR designated representative, and continuous emission monitoring system (or CEMS) respectively, as defined in paragraph (B) of rule 3745-109-01 of the Administrative Code. The owner or operator of a unit that is not a CAIR NO<sub>x</sub> ozone season unit but that is monitored under 40 CFR 75.72(b)(2)(ii) shall comply with the same monitoring, record keeping, and reporting requirements as a CAIR NO<sub>x</sub> ozone season unit.

- (1) Requirements for installation, certification, and data accounting. The owner or operator of each CAIR NO<sub>x</sub> ozone season unit shall:
  - (a) Install all monitoring systems required under this rule for monitoring NO<sub>x</sub> mass emissions and individual unit heat input (including all systems required to monitor NO<sub>x</sub> emission rate, NO<sub>x</sub> concentration, stack gas moisture content, stack gas flow rate, CO<sub>2</sub> or O<sub>2</sub> concentration, and fuel flow rate, as applicable, in accordance with 40 CFR 75.71 and 40 CFR 75.72);
  - (b) Successfully complete all certification tests required under paragraph (B) of this rule and meet all other requirements of this rule and 40 CFR Part 75 applicable to the monitoring systems under paragraph (A)(1)(a) of this rule; and
  - (c) Record, report, and quality-assure the data from the monitoring systems under paragraph (A)(1)(a) of this rule.
- (2) Compliance deadlines. Except as provided in paragraph (A)(5) of this rule, the owner or operator shall meet the monitoring system certification and other requirements of paragraphs (A)(1)(a) and (A)(1)(b) of this rule on or before the following dates. The owner or operator shall record, report, and quality-assure

the data from the monitoring systems under paragraph (A)(1)(a) of this rule on and after the following dates:

- (a) For the owner or operator of a CAIR NO<sub>x</sub> ozone season unit that commences commercial operation before July 1, 2007, by May 1, 2008:
- (b) For the owner or operator of a CAIR NO<sub>x</sub> ozone season unit that commences commercial operation on or after July 1, 2007 and that reports on an annual basis under paragraph (E)(4) of this rule, by the later of the following dates:
  - (i) Ninety unit operating days or one hundred eighty calendar days, whichever occurs first, after the date on which the unit commences commercial operation; or
  - (ii) May 1, 2008.
- (c) For the owner or operator of a CAIR NO<sub>x</sub> ozone season unit that commences commercial operation on or after July 1, 2007 and that reports on a control period basis under paragraph (E)(4)(b)(ii) of this rule, by the later of the following dates:
  - (i) Ninety unit operating days or one hundred eighty calendar days, whichever occurs first, after the date on which the unit commences commercial operation; or
  - (ii) If the compliance date under paragraph (A)(2)(c)(i) of this rule is not during a control period, May first immediately following the compliance date under paragraph (A)(2)(c)(i) of this rule.
- (d) For the owner or operator of a CAIR NO<sub>x</sub> ozone season unit for which construction of a new stack or flue or installation of add-on NO<sub>x</sub> emission controls is completed after the applicable deadline under paragraph (A)(2)(a), (A)(2)(b), (A)(2)(f) or (A)(2)(g) of this rule and that reports on an annual basis under paragraph (E)(4) of this rule, by ninety unit operating days or one hundred eighty calendar days, whichever occurs first, after the date on which emissions first exit to the atmosphere through the new stack or flue or add-on NO<sub>x</sub> emissions controls.
- (e) For the owner or operator of a CAIR NO<sub>x</sub> ozone season unit for which construction of a new stack or flue or installation of add-on NO<sub>x</sub> emission controls is completed after the applicable deadline under paragraph (A)(2)(a), (A)(2)(c), (A)(2)(f) or (A)(2)(g) of this rule and that reports on a control period basis under paragraph (E)(4)(b)(ii) of this rule, by the later of the following dates:

- (i) Ninety unit operating days or one hundred eighty calendar days, whichever occurs first, after the date on which emissions first exit to the atmosphere through the new stack or flue or add-on NO<sub>x</sub> emissions controls; or
  - (ii) If the compliance date under paragraph (A)(2)(e)(i) of this rule is not during a control period, May first immediately following the compliance date under paragraph (A)(2)(e)(i) of this rule.
- (f) Notwithstanding the dates in paragraphs (A)(2)(a), (A)(2)(b) and (A)(2)(c) of this rule, for the owner or operator of a unit for which a CAIR NO<sub>x</sub> ozone season opt-in permit application is submitted and not withdrawn and a CAIR opt-in permit is not yet issued or denied under rule 3745-109-21 of the Administrative Code, by the date specified in paragraph (E)(2) of rule 3745-109-21 of the Administrative Code.
- (g) Notwithstanding the dates in paragraphs (A)(2)(a), (A)(2)(b) and (A)(2)(c) of this rule, for the owner or operator of a CAIR NO<sub>x</sub> ozone season opt-in unit under rule 3745-109-21 of the Administrative Code, by the date on which the CAIR NO<sub>x</sub> ozone season opt-in unit enters the CAIR NO<sub>x</sub> ozone season trading program as provided in paragraph (E)(7) of rule 3745-109-21 of the Administrative Code.

(3) Reporting data.

The owner or operator of a CAIR NO<sub>x</sub> ozone season unit that does not meet the applicable compliance date set forth in paragraph (A)(2) of this rule for any monitoring system under paragraph (A)(1)(a) of this rule shall, for each such monitoring system, determine, record, and report maximum potential (or, as appropriate, minimum potential) values for NO<sub>x</sub> concentration, NO<sub>x</sub> emission rate, stack gas flow rate, stack gas moisture content, fuel flow rate, and any other parameters required to determine NO<sub>x</sub> mass emissions and heat input in accordance with 40 CFR 75.31 (b)(2) or (c)(3), 40 CFR Part 75, Appendix D, Section 2.4, or 40 CFR Part 75, Appendix E, Section 2.5, as applicable.

(4) Prohibitions

- (a) No owner or operator of a CAIR NO<sub>x</sub> ozone season unit shall use any alternative monitoring system, alternative reference method, or any other alternative to any requirement of this rule without having obtained prior written approval in accordance with paragraph (F) of this rule.
- (b) No owner or operator of a CAIR NO<sub>x</sub> ozone season unit shall operate the unit so as to discharge, or allow to be discharged, NO<sub>x</sub> emissions to the atmosphere without accounting for all such emissions in accordance with the applicable provisions of this rule and 40 CFR Part 75.

- (c) No owner or operator of a CAIR NO<sub>x</sub> ozone season unit shall disrupt the continuous emission monitoring system, any portion thereof, or any other approved emission monitoring method, and thereby avoid monitoring and recording NO<sub>x</sub> mass emissions discharged into the atmosphere or heat input, except for periods of recertification or periods when calibration, quality assurance testing, or maintenance is performed in accordance with the applicable provisions of this rule and 40 CFR Part 75.
- (d) No owner or operator of a CAIR NO<sub>x</sub> ozone season unit shall retire or permanently discontinue use of the continuous emission monitoring system, any component thereof, or any other approved monitoring system under this rule, except under any one of the following circumstances:
  - (i) During the period that the unit is covered by an exemption under paragraph (D) of rule 3745-109-01 of the Administrative Code that is in effect;
  - (ii) The owner or operator is monitoring emissions from the unit with another certified monitoring system approved, in accordance with the applicable provisions of this rule and 40 CFR Part 75, by the director for use at that unit that provides emission data for the same pollutant or parameter as the retired or discontinued monitoring system; or
  - (iii) The CAIR designated representative submits notification of the date of certification testing of a replacement monitoring system for the retired or discontinued monitoring system in accordance with paragraph (B)(4)(c)(i) of this rule.

(5) Long-term cold storage.

The owner or operator of a CAIR NO<sub>x</sub> ozone season unit is subject to the applicable provisions of 40 CFR Part 75 of this rule concerning units in long-term cold storage.

(B) Initial certification and recertification procedures.

- (1) The owner or operator of a CAIR NO<sub>x</sub> ozone season unit shall be exempt from the initial certification requirements of this section for a monitoring system under paragraph (A)(1)(a) of this rule if the following conditions are met:
  - (a) The monitoring system has been previously certified in accordance with 40 CFR Part 75; and

- (b) The applicable quality-assurance and quality-control requirements of 40 CFR 75.21 and 40 CFR Part 75, Appendices B, D and E, are fully met for the certified monitoring system described in paragraph (B)(1)(a) of this rule.
- (2) The recertification provisions of this section shall apply to a monitoring system under paragraph (A)(1)(a) of rule 3745-109-20 of the Administrative Code exempt from initial certification requirements under paragraph (B)(1) of this rule.
- (3) If the administrator has previously approved a petition under 40 CFR 75.17(a) or (b) for apportioning the NO<sub>x</sub> emission rate measured in a common stack or a petition under 40 CFR 75.66 for an alternative to a requirement in 40 CFR 75.12 or 40 CFR 75.17, the CAIR designated representative shall resubmit the petition to the administrator under paragraph (F)(1) of this rule to determine whether the approval applies under the CAIR NO<sub>x</sub> ozone season trading program.
- (4) Except as provided in paragraph (B)(1) of this rule, the owner or operator of a CAIR NO<sub>x</sub> ozone season unit shall comply with the following initial certification and recertification procedures for a continuous monitoring system (i.e., a continuous emission monitoring system and an excepted monitoring system under 40 CFR Part 75, Appendices D and E) under paragraph (A)(1)(a) of this rule. The owner or operator of a unit that qualifies to use the low mass emissions excepted monitoring methodology under 40 CFR 75.19 or that qualifies to use an alternative monitoring system under 40 CFR Part 75, Subpart E shall comply with the procedures in paragraph (B)(5) or (B)(6) of this rule respectively.
- (a) Requirements for initial certification. The owner or operator shall ensure that each continuous monitoring system under paragraph (A)(1)(a) of this rule (including the automated data acquisition and handling system) successfully completes all of the initial certification testing required under 40 CFR 75.20 by the applicable deadline in paragraph (A)(2) of this rule. In addition, whenever the owner or operator installs a monitoring system to meet the requirements of this rule in a location where no such monitoring system was previously installed, initial certification in accordance with 40 CFR 75.20 is required.
- (b) Requirements for recertification. Whenever the owner or operator makes a replacement, modification, or change in any certified continuous emission monitoring system under paragraph (A)(1)(a) of this rule that may significantly affect the ability of the system to accurately measure or record NO<sub>x</sub> mass emissions or heat input rate or to meet the quality-assurance and quality-control requirements of 40 CFR 75.21 or 40 CFR Part 75, Appendix B, the owner or operator shall recertify the monitoring system in accordance with 40 CFR 75.20(b). Furthermore, whenever the owner or operator makes a replacement, modification, or change to the flue gas handling system or

the unit's operation that may significantly change the stack flow or concentration profile, the owner or operator shall recertify each continuous emission monitoring system whose accuracy is potentially affected by the change, in accordance with 40 CFR 75.20(b). Examples of changes to a continuous emission monitoring system that require recertification include: replacement of the analyzer, complete replacement of an existing continuous emission monitoring system, or change in location or orientation of the sampling probe or site. Any fuel flowmeter systems, and any excepted NO<sub>x</sub> monitoring system under 40 CFR Part 75, Appendix E under paragraph (A)(1)(a) of this rule are subject to the recertification requirements in 40 CFR 75.20(g)(6).

- (c) Approval process for initial certification and recertification. Paragraphs (B)(4)(c)(i) to (B)(4)(c)(iv) of this rule apply to both initial certification and recertification of a continuous monitoring system under paragraph (A)(1)(a) of this rule. For recertifications, replace the words certification and initial certification with the word recertification, replace the word certified with the word recertified, and follow the procedures in 40 CFR 75.20(b)(5) and 40 CFR 75.20(g)(7) in lieu of the procedures in paragraph (B)(4)(c)(v) of this rule.
  - (i) Notification of certification. The CAIR designated representative shall submit to the director, USEPA Region 5, and the administrator written notice of the dates of certification testing, in accordance with paragraph (D) of this rule.
  - (ii) Certification application. The CAIR designated representative shall submit to the director a certification application for each monitoring system. A complete certification application shall include the information specified in 40 CFR 75.63.
  - (iii) Provisional certification date. The provisional certification date for a monitoring system shall be determined in accordance with 40 CFR 75.20(a)(3). A provisionally certified monitoring system may be used under the CAIR NO<sub>x</sub> ozone season trading program for a period not to exceed one hundred twenty days after receipt by the director of the complete certification application for the monitoring system under paragraph (B)(4)(c)(ii) of this rule. Data measured and recorded by the provisionally certified monitoring system, in accordance with the requirements of 40 CFR Part 75, shall be considered valid quality assured data (retroactive to the date and time of provisional certification), provided that the director does not invalidate the provisional certification by issuing a notice of disapproval within one hundred twenty days of the date of receipt of the complete certification application by the director.

- (iv) Certification application approval process. The director shall issue a written notice of approval or disapproval of the certification application to the owner or operator within one hundred twenty days of receipt of the complete certification application under paragraph (B)(4)(c)(ii) of this rule. In the event the director does not issue such a notice within such one hundred twenty-day period, each monitoring system that meets the applicable performance requirements of 40 CFR Part 75 and is included in the certification application shall be deemed certified for use under the CAIR NO<sub>x</sub> ozone season trading program.
- (a) Approval notice. If the certification application is complete and shows that each monitoring system meets the applicable performance requirements of 40 CFR Part 75, then the director shall issue a written notice of approval of the certification application within one hundred twenty days of receipt.
- (b) Incomplete application notice. If the certification application is not complete, then the director shall issue a written notice of incompleteness that sets a reasonable date by which the CAIR designated representative must submit the additional information required to complete the certification application. If the CAIR designated representative does not comply with the notice of incompleteness by the specified date, then the director may issue a notice of disapproval under paragraph (B)(4)(c)(iv)(c) of this rule. The one-hundred-twenty day review period shall not begin before receipt of a complete certification application.
- (c) Disapproval notice. If the certification application shows that any monitoring system does not meet the performance requirements of 40 CFR Part 75 or if the certification application is incomplete and the requirement for disapproval under paragraph (B)(4)(c)(iv)(b) of this rule is met, then the director shall issue a written notice of disapproval of the certification application. Upon issuance of such notice of disapproval, the provisional certification is invalidated by the director and the data measured and recorded by each uncertified monitoring system shall not be considered valid quality-assured data beginning with the date and hour of provisional certification (as defined under 40 CFR 75.20(a)(3)). The owner or operator shall follow the procedures for loss of certification in paragraph (B)(4)(c)(v) of this rule for each monitoring system that is disapproved for initial certification.
- (d) Audit decertification. The director or, for a CAIR NO<sub>x</sub> ozone season opt-in unit or a unit for which a CAIR opt-in permit application is submitted and not withdrawn and a CAIR opt-in permit is not yet issued or denied under rule 3745-109-21 of the

Administrative Code, the administrator may issue a notice of disapproval of the certification status of a monitor in accordance with paragraph (C)(2) of this rule.

- (v) Procedures for loss of certification. If the director or the administrator issues a notice of disapproval of a certification application under paragraph (B)(4)(c)(iv)(c) of this rule or a notice of disapproval of certification status under paragraph (B)(4)(c)(iv)(d) of this rule, then:
- (a) The owner or operator shall substitute the following values, for each disapproved monitoring system, for each hour of unit operation during the period of invalid data specified under 40 CFR 75.20(a)(4)(iii) and 40 CFR 75.20(g)(7) or 40 CFR 75.21(e) and continuing until the applicable date and hour specified under 40 CFR 75.20 (a)(5)(i) or 40 CFR 75.20(g)(7):
- (i) For a disapproved NO<sub>x</sub> emission rate (i.e., NO<sub>x</sub>-diluent) system, the maximum potential NO<sub>x</sub> emission rate, as defined in 40 CFR 72.2;
- (ii) For a disapproved NO<sub>x</sub> pollutant concentration monitor and disapproved flow monitor, respectively, the maximum potential concentration of NO<sub>x</sub> and the maximum potential flow rate, as defined in 40 CFR Part 75, Appendix A, Sections 2.1.2.1 and 2.1.4.1;
- (iii) For a disapproved moisture monitoring system and disapproved diluent gas monitoring system, respectively, the minimum potential moisture percentage and either the maximum potential CO<sub>2</sub> concentration or the minimum potential oxygen concentration (as applicable), as defined in 40 CFR Part 75, Appendix A, Sections 2.1.3.1, 2.1.3.2, and 2.1.5;
- (iv) For a disapproved fuel flowmeter system, the maximum potential fuel flow rate, as defined in 40 CFR Part 75, Appendix D, Section 2.4.2.1; and
- (v) For a disapproved excepted NO<sub>x</sub> monitoring system under 40 CFR Part 75, Appendix E, the fuel-specific maximum potential NO<sub>x</sub> emission rate, as defined in 40 CFR 72.2.
- (b) The CAIR designated representative shall submit a notification of certification retest dates and a new certification application in accordance with paragraphs (B)(4)(c)(i) and (B)(4)(c)(ii) of this rule.

- (c) The owner or operator shall repeat all certification tests or other requirements that were failed by the monitoring system, as indicated in the director's or the administrator's notice of disapproval, no later than thirty unit operating days after the date of issuance of the notice of disapproval.
  - (5) Initial certification and recertification procedures for units using the low mass emission excepted methodology under 40 CFR 75.19. The owner or operator of a unit qualified to use the low mass emissions (LME) excepted methodology under 40 CFR 75.19 shall meet the applicable certification and recertification requirements in 40 CFR 75.19(a)(2) and 40 CFR 75.20(h). If the owner or operator of such a unit elects to certify a fuel flowmeter system for heat input determination, the owner or operator shall also meet the certification and recertification requirements in 40 CFR 75.20(g).
  - (6) Certification/recertification procedures for alternative monitoring systems. The CAIR designated representative of each unit for which the owner or operator intends to use an alternative monitoring system approved by the administrator and, if applicable, the director under 40 CFR Part 75, Subpart E shall comply with the applicable notification and application procedures of 40 CFR 75.20(f).
- (C) Out of control periods.
- (1) Whenever any monitoring system fails to meet the quality-assurance and quality-control requirements or data validation requirements of 40 CFR Part 75, data shall be substituted using the applicable missing data procedures in 40 CFR Part 75, Subparts D or H, or 40 CFR Part 75, Appendices D or E.
  - (2) Audit decertification. Whenever both an audit of a monitoring system and a review of the initial certification or recertification application reveal that any monitoring system should not have been certified or recertified because it did not meet a particular performance specification or other requirement under paragraph (B) of this rule or the applicable provisions of 40 CFR Part 75, both at the time of the initial certification or recertification application submission and at the time of the audit, the director or, for a CAIR NO<sub>x</sub> ozone season opt-in unit or a unit for which a CAIR opt-in permit application is submitted and not withdrawn and a CAIR opt-in permit is not yet issued or denied under rule 3745-109-21 of the Administrative Code, the administrator shall issue a notice of disapproval of the certification status of such monitoring system. For the purposes of this paragraph, an audit shall be either a field audit or an audit of any information submitted to the director or the administrator. By issuing the notice of disapproval, the director or the administrator revokes prospectively the certification status of the monitoring system. The data measured and recorded by the monitoring system shall not be considered valid quality-assured data from the date of issuance of the notification of the revoked certification status until

the date and time that the owner or operator completes subsequently approved initial certification or recertification tests for the monitoring system. The owner or operator shall follow the applicable initial certification or recertification procedures in paragraph (B) of this rule for each disapproved monitoring system.

(D) Notifications.

The CAIR designated representative for a CAIR NO<sub>x</sub> ozone season unit shall submit written notice to the director and the administrator in accordance with 40 CFR 75.61.

(E) Record keeping and reporting.

- (1) General provisions. The CAIR designated representative shall comply with all record keeping and reporting requirements in this section, the applicable record keeping and reporting requirements under 40 CFR 75.73, and the requirements of paragraph (A)(5)(a) of rule 3745-109-15 of the Administrative Code.
- (2) Monitoring plans. The owner or operator of a CAIR NO<sub>x</sub> ozone season unit shall comply with requirements of 40 CFR 75.73(c) and 40 CFR 75.73(e) and, for a unit for which a CAIR opt-in permit application is submitted and not withdrawn and a CAIR opt-in permit is not yet issued or denied under paragraphs (D) and (E)(1) of rule 3745-109-21 of the Administrative Code.
- (3) Certification applications. The CAIR designated representative shall submit an application to the director within forty-five days after completing all initial certification or recertification tests required under paragraph (B) of this rule, including the information required under 40 CFR 75.63.
- (4) Quarterly reports. The CAIR designated representative shall submit quarterly reports, as follows:
  - (a) If the CAIR NO<sub>x</sub> ozone season unit is subject to an acid rain emissions limitation or a CAIR NO<sub>x</sub> emissions limitation or if the owner or operator of such unit chooses to report on an annual basis under this rule, the CAIR designated representative shall meet the requirements of 40 CFR Part 75, Subpart H (concerning monitoring of NO<sub>x</sub> mass emissions) for such unit for the entire year and shall report the NO<sub>x</sub> mass emissions data and heat input data for such unit, in an electronic quarterly report in a format prescribed by the administrator, for each calendar quarter beginning with:
    - (i) For a unit that commences commercial operation before July 1, 2007, the calendar quarter covering May 1, 2008 to June 30, 2008;
    - (ii) For a unit that commences commercial operation on or after July 1, 2007, the calendar quarter corresponding to the earlier of the date of

provisional certification or the applicable deadline for initial certification under paragraph (A)(2) of this rule, unless that quarter is the third or fourth quarter of 2007 or the first quarter of 2008, in which case reporting shall commence in the quarter covering May 1, 2008 to June 30, 2008;

- (iii) Notwithstanding paragraphs (E)(4)(a)(i) and (E)(4)(a)(ii) of this rule, for a unit for which a CAIR opt-in permit application is submitted and not withdrawn and a CAIR opt-in permit is not yet issued or denied under rule 3745-109-21 of the Administrative Code, the calendar quarter corresponding to the date specified in paragraph (E)(2) of rule 3745-109-21 of the Administrative Code; and
  - (iv) Notwithstanding paragraphs (E)(4)(a)(i) and (E)(4)(a)(ii), for a CAIR NO<sub>x</sub> ozone season opt-in unit under rule 3745-109-21 of the Administrative Code, the calendar quarter corresponding to the date on which the CAIR NO<sub>x</sub> ozone season opt-in unit enters the CAIR NO<sub>x</sub> ozone season trading program as provided in paragraph (E)(7) of rule 3745-109-21 of the Administrative Code.
- (b) If the CAIR NO<sub>x</sub> ozone season unit is not subject to an acid rain emissions limitation or a CAIR NO<sub>x</sub> emissions limitation, then the CAIR designated representative shall either:
- (i) Meet the requirements of 40 CFR Part 75, Subpart H (concerning monitoring of NO<sub>x</sub> mass emissions) for such unit for the entire year and report the NO<sub>x</sub> mass emissions data and heat input data for such unit in accordance with paragraph (E)(4)(a) of this rule; or
  - (ii) Meet the requirements of 40 CFR Part 75, Subpart H for the control period (including the requirements in 40 CFR 75.74(c)) and report NO<sub>x</sub> mass emissions data and heat input data (including the data described in 40 CFR 75.74(c)(6)) for such unit only for the control period of each year and report, in an electronic quarterly report in a format prescribed by the administrator, for each calendar quarter beginning with:
    - (a) For a unit that commences commercial operation before July 1, 2007, the calendar quarter covering May 1, 2008 to June 30, 2008;
    - (b) For a unit that commences commercial operation on or after July 1, 2007, the calendar quarter corresponding to the earlier of the date of provisional certification or the applicable deadline for initial certification under paragraph (A)(2) of this rule, unless that date is not during a control period, in which case reporting shall commence in the quarter that includes May first to June thirtieth of the first control period after such date;

- (c) For a unit that is reporting on a control period basis under paragraph (E)(4)(b)(ii) of this rule, the NO<sub>x</sub> emission rate and NO<sub>x</sub> concentration values substituted for missing data under 40 CFR Part 75, Subpart D are calculated using only values from a control period and do not systematically underestimate NO<sub>x</sub> emissions.

(F) Petitions.

- (1) Except as provided in paragraph (F)(2)(a) of this rule, the CAIR designated representative of a CAIR NO<sub>x</sub> ozone season unit that is subject to an acid rain emissions limitation may submit a petition under 40 CFR 75.66 to the administrator requesting approval to apply an alternative to any requirement of this rule. Application of an alternative to any requirement of this rule is in accordance with this rule only to the extent that the petition is approved in writing by the administrator, in consultation with the director.

(2) Petition process.

- (a) The CAIR designated representative of a CAIR NO<sub>x</sub> ozone season unit that is not subject to an acid rain emissions limitation may submit a petition under 40 CFR 75.66 to the director and the administrator requesting approval to apply an alternative to any requirement of this rule. Application of an alternative to any requirement of this subpart is in accordance with this rule only to the extent that the petition is approved in writing by both the director and the administrator.
- (b) The CAIR designated representative of a CAIR NO<sub>x</sub> ozone season unit that is subject to an acid rain emissions limitation may submit a petition under 40 CFR 75.66 to the director and the administrator requesting approval to apply an alternative to a requirement concerning any additional continuous emission monitoring system required under 40 CFR 75.72. Application of an alternative to any such requirement is in accordance with this rule only to the extent that the petition is approved in writing by both the director and the administrator.

3745-109-21      **CAIR NOx ozone season opt-in units.**

[Comment: For dates of non-regulatory government publications, publications of recognized organizations and associations, federal rules, and federal statutory provisions referenced in this rule, see paragraph (H) of rule 3745-109-01 of the Administrative Code titled "Incorporation by Reference."]

(A) Applicability.

A CAIR NOx ozone season opt-in unit must be a unit that:

- (1) Is located in the state;
- (2) Is not a CAIR NOx ozone season unit under paragraph (C) of rule 3745-109-01 of the Administrative Code and is not covered by a retired unit exemption under paragraph (D) of rule 3745-109-01 of the Administrative Code that is in effect;
- (3) Is not covered by a retired unit exemption under 40 CFR 72.8 that is in effect;
- (4) Has or is required or qualified to have a Title V operating permit or other federally enforceable permit; and
- (5) Vents all of its emissions to a stack and can meet the monitoring, record keeping, and reporting requirements of rule 3745-109-20 of the Administrative Code.

(B) General requirements.

- (1) Except as otherwise provided in paragraphs (A) to (C) and (E) to (G) of rule 3745-109-01 of the Administrative Code, and rules 3745-109-15, 3745-109-16, 3745-109-18, 3745-109-19 and 3745-109-20 of the Administrative Code, a CAIR NOx ozone season opt-in unit shall be treated as a CAIR NOx ozone season unit for purposes of applying such paragraphs and rules.
- (2) Solely for purposes of applying, as provided in this rule, the requirements of rule 3745-109-20 of the Administrative Code to a unit for which a CAIR opt-in permit application is submitted and not withdrawn and a CAIR opt-in permit is not yet issued or denied under this rule, such unit shall be treated as a CAIR NOx ozone season unit before issuance of a CAIR opt-in permit for such unit.

(C) CAIR designated representative.

Any CAIR NOx ozone season opt-in unit, and any unit for which a CAIR opt-in permit application is submitted and not withdrawn and a CAIR opt-in permit is not yet issued or denied under this rule, located at the same source as one or more CAIR NOx ozone season units shall have the same CAIR designated representative and alternate CAIR designated representative as such CAIR NOx ozone season units.

(D) Applying for CAIR opt-in permit.

- (1) Applying for initial CAIR opt-in permit. The CAIR designated representative of a unit meeting the requirements for a CAIR NO<sub>x</sub> ozone season opt-in unit in paragraph (A) of this rule may apply for an initial CAIR opt-in permit at any time, except as provided under paragraphs (G)(6) and (G)(7) of this rule, and, in order to apply, must submit the following:
  - (a) A complete CAIR permit application under paragraph (C) of rule 3745-109-16 of the Administrative Code;
  - (b) A certification, in a format specified by the director, that the unit:
    - (i) Is not a CAIR NO<sub>x</sub> ozone season unit under paragraph (C) of rule 3745-109-01 of the Administrative Code and is not covered by a retired unit exemption under paragraph (D) of rule 3745-109-01 of the Administrative Code that is in effect;
    - (ii) Is not covered by a retired unit exemption under 40 CFR 72.8 that is in effect;
    - (iii) Vents all of its emissions to a stack; and
    - (iv) Has documented heat input for more than eight hundred seventy-six hours during the six months immediately preceding submission of the CAIR permit application under paragraph (C) of rule 3745-109-16 of the Administrative Code;
  - (c) A monitoring plan in accordance with rule 3745-109-20 of the Administrative Code;
  - (d) A complete certificate of representation under paragraph (D) of rule 3745-109-15 of the Administrative Code consistent with paragraph (C) of this rule, if no CAIR designated representative has been previously designated for the source that includes the unit; and
  - (e) A statement, in a format specified by the director, whether the CAIR designated representative requests that the unit be allocated CAIR NO<sub>x</sub> ozone season allowances under paragraph (I)(2) or (I)(3) of this rule (subject to the conditions in paragraphs (E)(8) and (G)(7) of this rule). If allocation under paragraph (I)(3) of this rule is requested, this statement shall include a statement that the owners and operators of the unit intend to repower the unit before January 1, 2015 and that they will provide, upon request, documentation demonstrating such intent.
- (2) Duty to reapply.

- (a) The CAIR designated representative of a CAIR NO<sub>x</sub> ozone season opt-in unit shall submit a complete CAIR permit application under paragraph (C) of rule 3745-109-16 of the Administrative Code to renew the CAIR opt-in unit permit in accordance with the director's regulations for Title V operating permits, or the director's regulations for other federally enforceable permits if applicable, addressing permit renewal.
- (b) Unless the director issues a notification of acceptance of withdrawal of the CAIR NO<sub>x</sub> ozone season opt-in unit from the CAIR NO<sub>x</sub> ozone season trading program in accordance with paragraph (G) of this rule or the unit becomes a CAIR NO<sub>x</sub> ozone season unit under paragraph (C) of rule 3745-109-01 of the Administrative Code, the CAIR NO<sub>x</sub> ozone season opt-in unit shall remain subject to the requirements for a CAIR NO<sub>x</sub> ozone season opt-in unit, even if the CAIR designated representative for the CAIR NO<sub>x</sub> ozone season opt-in unit fails to submit a CAIR permit application that is required for renewal of the CAIR opt-in permit under paragraph (D)(2)(a) of this rule.

(E) Opt-in process.

The director shall issue or deny a CAIR opt-in permit for a unit for which an initial application for a CAIR opt-in permit under paragraph (D) of this rule is submitted in accordance with the following:

- (1) Interim review of monitoring plan. The director and the administrator shall determine, on an interim basis, the sufficiency of the monitoring plan accompanying the initial application for a CAIR opt-in permit under paragraph (D) of this rule. A monitoring plan is sufficient, for purposes of interim review, if the plan appears to contain information demonstrating that the NO<sub>x</sub> emissions rate and heat input of the unit and all other applicable parameters are monitored and reported in accordance with rule 3745-109-20 of the Administrative Code. A determination of sufficiency shall not be construed as acceptance or approval of the monitoring plan.
- (2) Monitoring and reporting.
  - (a) Monitoring.
    - (i) If the director and the administrator determine that the monitoring plan is sufficient under paragraph (E)(1) of this rule, the owner or operator shall monitor and report the NO<sub>x</sub> emissions rate and the heat input of the unit and all other applicable parameters, in accordance with rule 3745-109-20 of the Administrative Code, starting on the date of certification of the appropriate monitoring systems under rule 3745-109-20 of the Administrative Code and continuing until a CAIR opt-in permit is denied under paragraph (E)(6) of this rule or, if a CAIR opt-in permit is issued, the date and time when the unit is withdrawn from the

CAIR NO<sub>x</sub> ozone season trading program in accordance with paragraph (G) of this rule.

- (ii) The monitoring and reporting under paragraph (E)(2)(a)(i) of this rule shall include the entire control period immediately before the date on which the unit enters the CAIR NO<sub>x</sub> ozone season trading program under paragraph (E)(7) of this rule, during which period monitoring system availability must not be less than ninety per cent under rule 3745-109-20 of the Administrative Code and the unit must be in full compliance with any applicable state or federal emissions or emissions-related requirements.
  - (b) To the extent the NO<sub>x</sub> emissions rate and the heat input of the unit are monitored and reported in accordance with rule 3745-109-20 of the Administrative Code for one or more control periods, in addition to the control period under paragraph (E)(2)(a)(ii) of this rule, during which control periods monitoring system availability is not less than ninety per cent under rule 3745-109-20 of the Administrative Code and the unit is in full compliance with any applicable state or federal emissions or emissions-related requirements and which control periods begin not more than three years before the unit enters the CAIR NO<sub>x</sub> ozone season trading program under paragraph (E)(7) of this rule, such information shall be used as provided in paragraphs (E)(3) and (E)(4) of this rule.
- (3) Baseline heat input. The unit's baseline heat rate shall equal:
- (a) If the unit's NO<sub>x</sub> emissions rate and heat input are monitored and reported for only one control period, in accordance with paragraph (E)(2)(a) of this rule, the unit's total heat input (in mmBtu) for the control period; or
  - (b) If the unit's NO<sub>x</sub> emissions rate and heat input are monitored and reported for more than one control period, in accordance with paragraphs (E)(2)(a) and (E)(2)(b) of this rule, the average of the amounts of the unit's total heat input (in mmBtu) for the control periods under paragraphs (E)(2)(a)(ii) and (E)(2)(b) of this rule.
- (4) Baseline NO<sub>x</sub> emission rate. The unit's baseline NO<sub>x</sub> emission rate shall equal:
- (a) If the unit's NO<sub>x</sub> emissions rate and heat input are monitored and reported for only one control period, in accordance with paragraph (E)(2)(a) of this rule of this section, the unit's NO<sub>x</sub> emissions rate (in pounds per mmBtu) for the control period;
  - (b) If the unit's NO<sub>x</sub> emissions rate and heat input are monitored and reported for more than one control period, in accordance with paragraphs (E)(2)(a) and (E)(2)(b) of this rule, and the unit does not have add-on NO<sub>x</sub> emission controls during any such control periods, the average of the amounts of the

unit's NO<sub>x</sub> emissions rate (in pounds per mmBtu) for the control periods under paragraphs (E)(2)(a)(ii) and (E)(2)(b) of this rule; or

- (c) If the unit's NO<sub>x</sub> emissions rate and heat input are monitored and reported for more than one control period, in accordance with paragraphs (E)(2)(a) and (E)(2)(b) of this rule, and the unit has add-on NO<sub>x</sub> emission controls during any such control periods, the average of the amounts of the unit's NO<sub>x</sub> emissions rate (in pounds per mmBtu) for such control periods during which the unit has add-on NO<sub>x</sub> emission controls.
- (5) Issuance of CAIR opt-in permit. After calculating the baseline heat input and the baseline NO<sub>x</sub> emissions rate for the unit under paragraphs (E)(3) and (E)(4) of this rule and if the director determines that the CAIR designated representative shows that the unit meets the requirements for a CAIR NO<sub>x</sub> ozone season opt-in unit in paragraph (A) of this rule and meets the elements certified in paragraph (D)(1)(b) of this rule, the director shall issue a CAIR opt-in permit. The director shall provide a copy of the CAIR opt-in permit to the administrator, who shall then establish a compliance account for the source that includes the CAIR NO<sub>x</sub> ozone season opt-in unit unless the source already has a compliance account.
- (6) Issuance of denial of CAIR opt-in permit. Notwithstanding paragraphs (E)(1) to (E)(5) of this rule, if at any time before issuance of a CAIR opt-in permit for the unit, the director determines that the CAIR designated representative fails to show that the unit meets the requirements for a CAIR NO<sub>x</sub> ozone season opt-in unit in paragraph (A) of this rule or meets the elements certified in paragraph (D)(1)(b) of this rule, the director shall issue a denial of a CAIR opt-in permit for the unit.
- (7) Date of entry into CAIR NO<sub>x</sub> ozone season trading program. A unit for which an initial CAIR opt-in permit is issued by the director shall become a CAIR NO<sub>x</sub> ozone season opt-in unit, and a CAIR NO<sub>x</sub> ozone season unit, as of the later of May 1, 2009 or May first of the first control period during which such CAIR opt-in permit is issued.
- (8) Repowered CAIR NO<sub>x</sub> ozone season opt-in unit.
  - (a) If a CAIR designated representative requests, and the director issues a CAIR opt-in permit providing for, allocation to a CAIR NO<sub>x</sub> ozone season opt-in unit of CAIR NO<sub>x</sub> ozone season allowances under paragraph (I)(3) of this rule and such unit is repowered after its date of entry into the CAIR NO<sub>x</sub> ozone season trading program under paragraph (E)(7) of this rule, the repowered unit shall be treated as a CAIR NO<sub>x</sub> ozone season opt-in unit replacing the original CAIR NO<sub>x</sub> ozone season opt-in unit, as of the date of start-up of the repowered unit's combustion chamber.
  - (b) Notwithstanding paragraphs (E)(3) and (E)(4) of this rule, as of the date of start-up under paragraph (E)(8)(a) of this rule, the repowered unit shall be deemed to have the same date of commencement of operation, date of

commencement of commercial operation, baseline heat input, and baseline NOx emission rate as the original CAIR NOx ozone season opt-in unit, and the original CAIR NOx ozone season opt-in unit shall no longer be treated as a CAIR NOx ozone season opt-in unit or a CAIR NOx ozone season unit.

(F) CAIR opt-in permit contents.

(1) Each CAIR opt-in permit shall contain:

- (a) All elements required for a complete CAIR permit application under paragraph (C) of rule 3745-109-16 of the Administrative Code;
- (b) The certification in paragraph (D)(1)(b) of this rule;
- (c) The unit's baseline heat input under paragraph (E)(3) of this rule;
- (d) The unit's baseline NOx emission rate under paragraph (E)(4) of this rule;
- (e) A statement whether the unit is to be allocated CAIR NOx allowances under paragraph (I)(2) or (I)(3) of this rule (subject to the conditions in paragraphs (E)(8) and (G)(7) of this rule);
- (f) A statement that the unit may withdraw from the CAIR NOx ozone season trading program only in accordance with paragraph (G) of this rule; and
- (g) A statement that the unit is subject to, and the owners and operators of the unit must comply with, the requirements of paragraph (H) of this rule.

(2) Each CAIR opt-in permit is deemed to incorporate automatically the definitions of terms under paragraph (B) of rule 3745-109-01 of the Administrative Code and, upon recordation by the administrator under rules 3745-109-18 and 3745-109-19 of the Administrative Code or this rule, every allocation, transfer, or deduction of CAIR NOx ozone season allowances to or from the compliance account of the source that includes a CAIR NOx ozone season opt-in unit covered by the CAIR opt-in permit.

(3) The CAIR opt-in permit shall be included, in a format specified by the permitting authority, in the CAIR permit for the source where the CAIR NOx ozone season opt-in unit is located and in a Title V operating permit or other federally enforceable permit for the source.

(G) Withdrawal from CAIR NOx ozone season trading program.

Except as provided under paragraph (G)(7) of this rule, a CAIR NOx ozone season opt-in unit may withdraw from the CAIR NOx ozone season trading program, but only if the director issues a notification to the CAIR designated representative of the CAIR NOx ozone season opt-in unit of the acceptance of the withdrawal of the

CAIR NO<sub>x</sub> ozone season opt-in unit in accordance with paragraph (G)(4) of this rule.

- (1) Requesting withdrawal. In order to withdraw a CAIR NO<sub>x</sub> ozone season opt-in unit from the CAIR NO<sub>x</sub> ozone season trading program, the CAIR designated representative of the CAIR NO<sub>x</sub> ozone season opt-in unit shall submit to the director a request to withdraw effective as of midnight of September thirtieth of a specified calendar year, which date must be at least four years after September thirtieth of the year of entry into the CAIR NO<sub>x</sub> ozone season trading program under paragraph (E)(7) of rule 3745-109-21 of the Administrative Code. The request must be submitted no later than ninety days before the requested effective date of withdrawal.
- (2) Conditions for withdrawal. Before a CAIR NO<sub>x</sub> ozone season opt-in unit covered by a request under paragraph (G)(1) of this rule may withdraw from the CAIR NO<sub>x</sub> ozone season trading program and the CAIR opt-in permit may be terminated under paragraph (G)(5) of this rule, the following conditions must be met.
  - (a) For the control period ending on the date on which the withdrawal is to be effective, the source that includes the CAIR NO<sub>x</sub> ozone season opt-in unit must meet the requirement to hold CAIR NO<sub>x</sub> ozone season allowances under paragraph (E)(3) of rule 3745-109-01 of the Administrative Code and cannot have any excess emissions.
  - (b) After the requirement for withdrawal under paragraph (G)(2)(a) of this rule is met, the administrator shall deduct from the compliance account of the source that includes the CAIR NO<sub>x</sub> ozone season opt-in unit CAIR NO<sub>x</sub> ozone season allowances equal in amount to and allocated for the same or a prior control period as any CAIR NO<sub>x</sub> ozone season allowances allocated to the CAIR NO<sub>x</sub> ozone season opt-in unit under paragraph (I) of this rule for any control period for which the withdrawal is to be effective. If there are no remaining CAIR NO<sub>x</sub> ozone season units at the source, the administrator shall close the compliance account, and the owners and operators of the CAIR NO<sub>x</sub> ozone season opt-in unit may submit a CAIR NO<sub>x</sub> ozone season allowance transfer for any remaining CAIR NO<sub>x</sub> ozone season allowances to another CAIR NO<sub>x</sub> ozone season allowance tracking system in accordance with rule 3745-109-19 of the Administrative Code.
- (3) Notification.
  - (a) After the requirements for withdrawal under paragraphs (G)(1) and (G)(2) of this rule are met (including deduction of the full amount of CAIR NO<sub>x</sub> ozone season allowances required), the director shall issue a notification to the CAIR designated representative of the CAIR NO<sub>x</sub> ozone season opt-in unit of the acceptance of the withdrawal of the CAIR NO<sub>x</sub> ozone season opt-in unit as of midnight on September thirtieth of the calendar year for which the withdrawal was requested.

- (b) If the requirements for withdrawal under paragraphs (G)(1) and (G)(2) of this rule are not met, the director shall issue a notification to the CAIR designated representative of the CAIR NOx ozone season opt-in unit that the CAIR NOx ozone season opt-in unit's request to withdraw is denied. Such CAIR NOx opt-in unit shall continue to be a CAIR NOx ozone season opt-in unit.
  - (4) Permit amendment. After the director issues a notification under paragraph (G)(3)(a) of this rule that the requirements for withdrawal have been met, the director shall revise the CAIR permit covering the CAIR NOx ozone season opt-in unit to terminate the CAIR opt-in permit for such unit as of the effective date specified under paragraph (G)(3)(a) of this rule. The unit shall continue to be a CAIR NOx ozone season opt-in unit until the effective date of the termination and shall comply with all requirements under the CAIR NOx ozone season trading program concerning any control periods for which the unit is a CAIR NOx ozone season opt-in unit, even if such requirements arise or must be complied with after the withdrawal takes effect.
  - (5) Reapplication upon failure to meet conditions of withdrawal. If the director denies the CAIR NOx ozone season opt-in unit's request to withdraw, the CAIR designated representative may submit another request to withdraw in accordance with paragraphs (G)(1) and (G)(2) of rule 3745-109-21 of the Administrative Code.
  - (6) Ability to reapply to the CAIR NOx ozone season trading program. Once a CAIR NOx ozone season opt-in unit withdraws from the CAIR NOx ozone season trading program and its CAIR opt-in permit is terminated under this section, the CAIR designated representative may not submit another application for a CAIR opt-in permit under paragraph (D) of this rule for such CAIR NOx ozone season opt-in unit before the date that is four years after the date on which the withdrawal became effective. Such new application for a CAIR opt-in permit shall be treated as an initial application for a CAIR opt-in permit under paragraph (E) of this rule.
  - (7) Inability to withdraw. Notwithstanding paragraphs (G)(1) to (G)(6) of this rule, a CAIR NOx ozone season opt-in unit shall not be eligible to withdraw from the CAIR NOx ozone season trading program if the CAIR designated representative of the CAIR NOx opt-in unit requests, and the director issues a CAIR opt-in permit providing for, allocation to the CAIR NOx ozone season opt-in unit of CAIR NOx ozone season allowances under paragraph (I)(3) of this rule.
- (H) Change in regulatory status.
- (1) Notification. If a CAIR NOx ozone season opt-in unit becomes a CAIR NOx ozone season unit under paragraph (C) of rule 3745-109-01 of the Administrative Code, then the CAIR designated representative shall notify in

writing the director and the administrator of such change in the CAIR NOx ozone season opt-in unit's regulatory status, within thirty days of such change.

(2) Director's and administrator's actions.

(a) If a CAIR NOx ozone season opt-in unit becomes a CAIR NOx ozone season unit under paragraph (C) of rule 3745-109-01 of the Administrative Code, the director shall revise the CAIR NOx ozone season opt-in unit's CAIR opt-in permit to meet the requirements of a CAIR permit under paragraph (D) of rule 3745-109-16 of the Administrative Code, and remove the CAIR opt-in permit provisions, as of the date on which the CAIR NOx ozone season opt-in unit becomes a CAIR NOx ozone season unit under paragraph (C) of rule 3745-109-01 of the Administrative Code.

(b) Allowance deductions.

(i) The administrator shall deduct from the compliance account of the source that includes the CAIR NOx ozone season opt-in unit that becomes a CAIR NOx ozone season unit under paragraph (C) of rule 3745-109-01 of the Administrative Code, CAIR NOx ozone season allowances equal in amount to and allocated for the same or a prior control period as:

(a) Any CAIR NOx ozone season allowances allocated to the CAIR NOx ozone season opt-in unit under paragraph (I) of this rule for any control period after the date on which the CAIR NOx ozone season opt-in unit becomes a CAIR NOx ozone season unit under paragraph (C) of rule 3745-109-01 of the Administrative Code; and

(b) If the date on which the CAIR NOx ozone season opt-in unit becomes a CAIR NOx ozone season unit under paragraph (C) of rule 3745-109-01 of the Administrative Code is not September thirtieth, the CAIR NOx ozone season allowances allocated to the CAIR NOx ozone season opt-in unit under paragraph (I) of this rule for the control period that includes the date on which the CAIR NOx ozone season opt-in unit becomes a CAIR NOx ozone season unit under paragraph (C) of rule 3745-109-01 of the Administrative Code, multiplied by the ratio of the number of days, in the control period, starting with the date on which the CAIR NOx ozone season opt-in unit becomes a CAIR NOx ozone season unit under paragraph (C) of rule 3745-109-01 of the Administrative Code divided by the total number of days in the control period and rounded to the nearest whole allowance as appropriate.

(ii) The CAIR designated representative shall ensure that the compliance account of the source that includes the CAIR NOx ozone season unit

that becomes a CAIR NO<sub>x</sub> ozone season unit under paragraph (C) of rule 3745-109-01 of the Administrative Code contains the CAIR NO<sub>x</sub> ozone season allowances necessary for completion of the deduction under paragraph (H)(2)(b)(i) of this rule.

(c) Allowance allocations.

(i) For every control period after the date on which the CAIR NO<sub>x</sub> ozone season opt-in unit becomes a CAIR NO<sub>x</sub> ozone season unit under paragraph (C) of rule 3745-109-01 of the Administrative Code, the CAIR NO<sub>x</sub> ozone season opt-in unit shall be allocated CAIR NO<sub>x</sub> ozone season allocations under paragraph (C) of rule 3745-109-17 of the Administrative Code.

(ii) If the date on which the CAIR NO<sub>x</sub> ozone season opt-in unit becomes a CAIR NO<sub>x</sub> ozone season unit under paragraph (C) of rule 3745-109-01 of the Administrative Code is not September thirtieth, the following amount of CAIR NO<sub>x</sub> ozone season allowances shall be allocated to the CAIR NO<sub>x</sub> ozone season opt-in unit (as a CAIR NO<sub>x</sub> ozone season unit) under paragraph (C) of rule 3745-109-17 of the Administrative Code for the control period that includes the date on which the CAIR NO<sub>x</sub> ozone season opt-in unit becomes a CAIR NO<sub>x</sub> ozone season unit under paragraph (C) of rule 3745-109-01 of the Administrative Code:

(a) The amount of CAIR NO<sub>x</sub> ozone season allowances otherwise allocated to the CAIR NO<sub>x</sub> ozone season opt-in unit (as a CAIR NO<sub>x</sub> ozone season unit) under paragraph (C) of rule 3745-109-17 of the Administrative Code for the control period multiplied by;

(b) The ratio of the number of days, in the control period, starting with the date on which the CAIR NO<sub>x</sub> ozone season opt-in unit becomes a CAIR NO<sub>x</sub> ozone season unit under paragraph (C) of rule 3745-109-01 of the Administrative Code, divided by the total number of days in the control period; and

(c) Rounded to the nearest whole allowance as appropriate.

(I) CAIR NO<sub>x</sub> ozone season allowance allocations to CAIR NO<sub>x</sub> ozone season opt-in units.

(1) Timing requirements.

(a) When the CAIR opt-in permit is issued under paragraph (E)(5) of this rule, the director shall allocate CAIR NO<sub>x</sub> ozone season allowances to the CAIR NO<sub>x</sub> ozone season opt-in unit, and submit to the administrator the allocation for the control period in which a CAIR NO<sub>x</sub> ozone season opt-in unit enters the CAIR NO<sub>x</sub> ozone season trading program under paragraph (E)(7) of this rule, in accordance with paragraph (I)(2) or (I)(3) of this rule.

- (b) By no later than July thirty-first, of the control period after the control period in which a CAIR NOx ozone season opt-in unit enters the CAIR NOx ozone season trading program under paragraph (E)(7) of this rule, and July thirty-first of each year thereafter, the director shall allocate CAIR NOx ozone season allowances to the CAIR NOx ozone season opt-in unit, and submit to the administrator the allocation for the control period that includes such submission deadline and in which the unit is a CAIR NOx ozone season opt-in unit, in accordance with paragraph (I)(2) or (I)(3) of this rule.
- (2) Calculation of allocation. For each control period for which a CAIR NOx ozone season opt-in unit is to be allocated CAIR NOx ozone season allowances, the director shall allocate allowances in accordance with the following procedures:
  - (a) The heat input (in mmBtu) used for calculating the CAIR NOx ozone season allowance allocation shall be the lesser of:
    - (i) The CAIR NOx ozone season opt-in unit's baseline heat input determined under paragraph (E)(3) of this rule; or
    - (ii) The CAIR NOx ozone season opt-in unit's heat input, as determined in accordance with rule 3745-109-20 of the Administrative Code, for the immediately prior control period, except when the allocation is being calculated for the control period in which the CAIR NOx ozone season opt-in unit enters the CAIR NOx ozone season trading program under paragraph (E)(7) of this rule.
  - (b) The NOx emission rate (in pounds per mmBtu) used for calculating CAIR NOx ozone season allowance allocations shall be the lesser of:
    - (i) The CAIR NOx ozone season opt-in unit's baseline NOx emissions rate (in pounds per mmBtu) determined under paragraph (E)(4) of this rule and multiplied by seventy per cent; or
    - (ii) The most stringent state or federal NOx emissions limitation applicable to the CAIR NOx ozone season opt-in unit at any time during the control period for which CAIR NOx ozone season allowances are to be allocated.
  - (c) The director shall allocate CAIR NOx ozone season allowances to the CAIR NOx ozone season opt-in unit in an amount equaling the heat input under paragraph (I)(2)(a) of this rule, multiplied by the NOx emission rate under paragraph (I)(2)(b) of this rule, divided by two thousand pounds per ton, and rounded to the nearest whole allowance as appropriate.
- (3) Notwithstanding paragraph (I)(2) of this rule and if the CAIR designated representative requests, and the director issues a CAIR opt-in permit (based on a demonstration of the intent to repower stated under paragraph (D)(1)(e) of this

rule) providing for, allocation to a CAIR NO<sub>x</sub> ozone season opt-in unit of CAIR NO<sub>x</sub> ozone season allowances under this paragraph (subject to the conditions in paragraphs (E)(8) and (G)(7) of this rule), the director shall allocate to the CAIR NO<sub>x</sub> ozone season opt-in unit as follows:

- (a) For each control period in 2009 to 2014 for which the CAIR NO<sub>x</sub> ozone season opt-in unit is to be allocated CAIR NO<sub>x</sub> ozone season allowances;
  - (i) The heat input (in mmBtu) used for calculating CAIR NO<sub>x</sub> ozone season allowance allocations shall be determined as described in paragraph (I)(2)(a) of this rule;
  - (ii) The NO<sub>x</sub> emission rate (in pounds per mmBtu) used for calculating CAIR NO<sub>x</sub> ozone season allowance allocations shall be the lesser of:
    - (a) The CAIR NO<sub>x</sub> ozone season opt-in unit's baseline NO<sub>x</sub> emissions rate (in pounds per mmBtu) determined under paragraph (E)(4) of this rule; or
    - (b) The most stringent state or federal NO<sub>x</sub> emissions limitation applicable to the CAIR NO<sub>x</sub> ozone season opt-in unit at any time during the control period in which the CAIR NO<sub>x</sub> ozone season opt-in unit enters the CAIR NO<sub>x</sub> ozone season trading program under paragraph (E)(7) of this rule;
  - (iii) The director shall allocate CAIR NO<sub>x</sub> ozone season allowances to the CAIR NO<sub>x</sub> ozone season opt-in unit in an amount equaling the heat input under paragraph (I)(3)(a)(i) of this rule, multiplied by the NO<sub>x</sub> emission rate under paragraph (I)(3)(a)(ii) of this rule, divided by two thousand pounds per ton, and rounded to the nearest whole allowance as appropriate;
- (b) For each control period in 2015 and thereafter for which the CAIR NO<sub>x</sub> ozone season opt-in unit is to be allocated CAIR NO<sub>x</sub> ozone season allowances:
  - (i) The heat input (in mmBtu) used for calculating the CAIR NO<sub>x</sub> ozone season allowance allocations shall be determined as described in paragraph (I)(2)(a) of this rule;
  - (ii) The NO<sub>x</sub> emission rate (in pounds per mmBtu) used for calculating the CAIR NO<sub>x</sub> ozone season allowance allocation shall be the lesser of:
    - (a) 0.15 pound per mmBtu;
    - (b) The CAIR NO<sub>x</sub> ozone season opt-in unit's baseline NO<sub>x</sub> emissions rate (in pounds per mmBtu) determined under paragraph (E)(4) of this rule; or

(c) The most stringent state or federal NO<sub>x</sub> emissions limitation applicable to the CAIR NO<sub>x</sub> ozone season opt-in unit at any time during the control period for which CAIR NO<sub>x</sub> ozone season allowances are to be allocated;

(iii) The director shall allocate CAIR NO<sub>x</sub> ozone season allowances to the CAIR NO<sub>x</sub> ozone season opt-in unit in an amount equaling the heat input under paragraph (I)(3)(a)(i) of this rule, multiplied by the NO<sub>x</sub> emission rate under paragraph (I)(3)(a)(ii) of this rule, divided by two thousand pounds per ton, and rounded to the nearest whole allowance as appropriate.

(4) Recordation.

(a) The administrator shall record, in the compliance account of the source that includes the CAIR NO<sub>x</sub> ozone season opt-in unit, the CAIR NO<sub>x</sub> ozone season allowances allocated by the director to the CAIR NO<sub>x</sub> ozone season opt-in unit under paragraph (I)(1)(a) of this rule.

(b) By September first, after the control period in which a CAIR ozone season opt-in unit enters the CAIR NO<sub>x</sub> ozone season trading program under paragraph (E)(7) of this rule, and September first of each year thereafter, the administrator shall record, in the compliance account of the source that includes the CAIR NO<sub>x</sub> ozone season opt-in unit, the CAIR NO<sub>x</sub> ozone season allowances allocated by the director to the CAIR NO<sub>x</sub> ozone season opt-in unit under paragraph (I)(1)(b) of this rule.

3745-110-01      **Definitions.**

[Comment: For dates of non-regulatory government publications, publications of recognized organizations and associations, federal rules, and federal statutory provisions referenced in this rule, see the last paragraph of this rule titled "Incorporation by reference."]

(A) Except as otherwise provided in this rule, the definitions in rule 3745-15-01 of the Administrative Code shall apply to this chapter.

(B) As used in this chapter:

- (1) "Affected facility" means any facility that meets the applicability requirements in rule 3745-110-02 of the Administrative Code.
- (2) "Affected source" means any source which is located at any affected facility and is not exempt under paragraph (J) of rule 3745-110-03 of the Administrative Code.
- (3) "Auxiliary boiler" means a boiler that produces steam and operates at a capacity factor of less than ten per cent.
- (4) "Black start unit" means any electric generating unit operated only in the event of a complete loss of facility power.
- (5) "British thermal unit" or "Btu" means the amount of heat required to raise one pound of water one degree Fahrenheit.
- (6) "Capacity factor" means either the ratio of gross actual output to the gross rated output or the ratio of actual heat input to potential heat input for the period between April first and October thirty-first of any calendar year, expressed as a percentage.
- (7) "Cell burner" means burner cells that consist of two or three circular burners combined into a vertically oriented assembly that creates a compact, intense flame.
- (8) "Coal" means all solid fuels classified as anthracite, bituminous, sub-bituminous or lignite, as defined by ASTM D388-05, "Standard Specification for Classification of Coals by Rank."
- (9) "Cyclone-fired boiler" means a boiler that combusts fuel in a horizontal water-cooled cylinder before releasing the combustion gases into the boiler.
- (10) "Diesel fuel" means a low sulfur fuel oil of grades 1-D or 2-D, as defined by ASTM D975-05, "Standard Specification for Diesel Fuel Oils."

- (11) "Distillate oil" means fuel oil that complies with the specifications for fuel oil number one or two, as defined by ASTM D396-05, "Standard Specification for Fuel Oils."
- (12) "Dry bottom" means a boiler design in which the coal-fired unit is equipped with an ash disposal hopper bottom with sufficient cooling surface so that the ash particles impinging on the furnace walls or hopper bottom can be removed in a dry state.
- (13) "Dual fuel" means a mixture of diesel fuel or distillate oil and gaseous fuels.
- (14) "Gaseous fuels" means natural gas, blast furnace gas, coke oven gas or refinery fuel gas.
- (15) "Industrial boiler" means a steam generating unit that generates steam to supply power and/or heat to an industrial, institutional, or commercial operation. This term does not include boilers that serve electrical generating units and cogeneration facilities.
- (16) "Internal combustion engine" means any engine in which power, produced by heat and/or pressure developed in the engine cylinder(s) by burning a mixture of air and fuel (including diesel fuel), is subsequently converted to mechanical work by means of one or more pistons.
- (17) "Large boiler" means an industrial boiler with a maximum heat input capacity greater than one hundred mmBtu/hr and equal to or less than two hundred fifty mmBtu/hr.
- (18) "Lean burn engine" means an internal combustion engine where the amount of oxygen in the exhaust gases is one per cent or more, by weight.
- (19) "Low NOx burner" means a burner designed to reduce flame turbulence by the mixing of fuel and air and by establishing fuel-rich zones for initial combustion, thereby reducing the formation of NOx.
- (20) "Mid-size boiler" means an industrial boiler with a maximum heat input capacity greater than fifty mmBtu/hr and equal to or less than one hundred mmBtu/hr.
- (21) "MmBtu/hr" means million British thermal units per hour.
- (22) "Municipal solid waste" means household, commercial/retail, and/or institutional waste. Household waste includes material discarded by single and multiple residential dwellings, hotels, motels, and other similar permanent or temporary housing establishments or facilities. Commercial/retail waste includes material discarded by stores, offices, restaurants, warehouses, non-manufacturing activities at industrial facilities, and similar establishments or facilities. Institutional waste includes material discarded by schools, hospitals,

non-manufacturing facilities and other similar establishments or facilities. Household, commercial/retail, and institutional wastes do not include sewage, wood pallets, construction and demolition wastes, or motor vehicles (including motor vehicle parts or vehicle fluff). Municipal solid waste does include motor vehicle maintenance materials, limited to vehicle batteries, used motor oil, and tires. Municipal solid waste does not include wastes that are solely segregated medical wastes. However any mixture of segregated wastes which contain more than thirty per cent medical waste discards is considered to be municipal solid waste.

- (23) "Municipal waste combustor" means any device that combusts any solid, liquid, or gasified municipal solid waste.
- (24) "N/A" means not applicable.
- (25) "Natural gas" means a naturally occurring mixture of hydrocarbon and non-hydrocarbon gases found in geologic formations beneath the earth's surface, of which the principal constituent is methane.
- (26) "Nitrogen oxides" or "NO<sub>x</sub>" means all oxides of nitrogen which are determined to be ozone precursors, including, but not limited to, nitrogen oxide and nitrogen dioxide, but excluding nitrous oxide, collectively expressed as nitrogen dioxide.
- (27) "Oil" means crude oil or petroleum, or a liquid fuel derived from crude oil or petroleum, including distillate oil and residual oil.
- (28) "Overfeed stoker-fired" means a boiler design that employs a moving grate assembly where the coal is fed into a hopper and then onto a continuous grate that conveys the coal into the furnace. As coal moves through the furnace, it passes over several air zones for staged burning.
- (29) "Peaking unit" means any electric generating unit that operates at a capacity factor of less than ten per cent between April first and October thirty-first of any calendar year.
- (30) "Potential to emit" means the maximum capacity of a facility or stationary source to emit NO<sub>x</sub> under its physical and operational design. Any physical or operational limitation on the capacity of the facility or stationary source to emit NO<sub>x</sub>, including air pollution control equipment and restrictions on hours of operation or on the type or amount of material combusted, stored or processed, shall be treated as part of its design if the limitation or the effect it would have on emissions is federally enforceable or legally and practicably enforceable by the state, except as otherwise provided in rule 3745-21-11 of the Administrative Code.
- (31) "Ppmvd" means parts per million by volume on a dry basis.

- (32) "RACT" means the lowest emissions limitation that a particular source is capable of meeting by the application of control technology that is reasonably available considering technological and economic feasibility.
- (33) "Research and development sources" means a research or laboratory facility the primary purpose of which is to conduct research and development into new processes and products, that is operated under the close supervision of technically trained personnel, and that is not engaged in the manufacture of products for sale or exchange for commercial profit, except in a de-minimis manner.
- (34) "Residual oil" means crude oil, fuel oil that does not comply with the specifications under the definition of "distillate oil," and all fuel oil numbers four, five, or six, as defined by ASTM D396-05, "Standard Specification for Fuel Oils."
- (35) "Rich burn engine" means an internal combustion engine where the amount of oxygen in the engine exhaust gases is less than one per cent, by weight.
- (36) "Small boiler" means an industrial boiler with a maximum heat input capacity greater than twenty mmBtu/hr and equal to or less than fifty mmBtu/hr.
- (37) "Space heating unit " means any fuel burning equipment that is used only for space heating purposes during the period from November first through March thirty-first or during other periods of cold weather conditions.
- (38) "Spreader stoker-fired" means a boiler design where mechanical or pneumatic feeders distribute coal uniformly over the surface of a moving grate.
- (39) "Stand-by fuel burning equipment" means any fuel burning equipment which is used only as a direct substitution for other fuel burning equipment for a limited period due to unpredictable breakdown or failure, or routine scheduled maintenance of such other fuel burning equipment or its associated air pollution control system.
- (40) "Start-up unit" means a unit operated only to start up larger electric generating units.
- (41) "Stationary combustion turbine" means any simple cycle combustion turbine, regenerative cycle combustion turbine, or any combustion turbine portion of a combined cycle steam/electric generating system that is not self-propelled, but which may be mounted on a vehicle for portability.
- (42) "Stationary internal combustion engine" means any reciprocating internal combustion engine that is not self-propelled, but which may be mounted on a vehicle for portability.

- (43) "Tangential-fired" means a furnace firing design where the burners are mounted at the corners of the furnace chamber.
- (44) "Tune-up" means adjustments made to a burner or boiler in accordance with procedures supplied by the manufacturer (or approved specialist) to optimize the combustion efficiency.
- (45) "Very large boiler" means an industrial boiler with a maximum heat input capacity greater than two hundred fifty mmBtu/hr.
- (46) "Wall-fired" means a furnace firing design in which the burners are mounted in an array on one or more vertical walls, including:

- (a) Opposed firing, where the burners are mounted on two opposite walls; and

- (b) Single-wall firing, where the burners are mounted on only one wall.

[Comment: Wall-fired does not include cell burner configurations.]

- (47) "Wet bottom" means a furnace design in which the coal-fired unit is equipped for slag disposal with a two-stage arrangement consisting of a chamber in the lower part of the furnace where the slag is deposited in a liquid state onto a collection surface, and a tank, containing water, into which the liquid slag is tapped.

(C) Incorporation by reference. This chapter includes references to certain matter or materials. The text of the incorporated materials is not included in the regulations contained in this chapter. The materials are hereby made a part of the regulations in this chapter. For materials subject to change, only the specific version specified in the regulation are incorporated. Material is incorporated as it exists on the effective date of this rule. Except for subsequent annual publication of existing (unmodified) Code of Federal Regulation compilations, any amendment or revision to a referenced document is not incorporated unless and until this rule has been amended to specify the new dates.

(1) Availability. The materials incorporated by reference are available as follows:

- (a) American Society for Testing Materials (ASTM). Information and copies of documents may be obtained by writing to: "ASTM International, 100 Bar Harbor Drive, P.O. Box C700, West Conshohocken, Pennsylvania 19426-2959." These documents are also available for purchase at [www.astm.org](http://www.astm.org). ASTM documents are also available for inspection and copying at most public libraries and "The State Library of Ohio."

- (b) Code of Federal Regulations (CFR). Information and copies may be obtained by writing to: "Superintendent of Documents, Attn: New Orders, PO Box 371954, Pittsburgh, PA 15250-7954." The full text of the CFR is also available in electronic format at <http://www.gpoaccess.gov/cfr/index.html>.

The CFR compilations are also available for inspection and copying at most public libraries and "The State Library of Ohio."

- (c) Federal Register (FR). Information and copies may be obtained by writing to: "Superintendent of Documents, Attn: New Orders, PO Box 371954, Pittsburgh, PA 15250-7954." Online access to the Federal Register is available at <http://www.gpoaccess.gov/nara/index.html> . A copy of the Federal Register is also available for inspection and copying at most public libraries and "The State Library of Ohio."
- (d) "Guidance for Estimating Capital and Annual Costs of Air Pollution Systems;" Ohio environmental protection agency Engineering Guide 46. Information and copies of this document may be obtained by writing to: "Ohio environmental protection agency, Division of air pollution control, 122 S. Front Street, Columbus, Ohio, 43215." This document is also available for viewing at <http://www.epa.state.oh.us/dapc/engineer/eguides.html>.

3745-110-02      **Applicability.**

(A) Unless exempted under paragraph (J) of rule 3745-110-03 of the Administrative Code, the requirements of this chapter shall apply to any stationary source of NO<sub>x</sub> emissions that meets one of the following conditions:

(1) Existing sources.

- (a) The source is, as defined in rule 3745-110-01 of the Administrative Code, a very large boiler, large boiler, mid-size boiler, small boiler, stationary combustion turbine, or stationary internal combustion engine; or it is located at a facility that emits or has the potential to emit a total of more than one hundred tons per year of NO<sub>x</sub> emissions from all sources at that facility, including all sources that are exempt under rule 3745-110-03 of the Administrative Code; and
- (b) The source is located in Ashtabula, Cuyahoga, Geauga, Lake, Lorain, Medina, Portage, or Summit County.

(2) New sources.

- (a) The source is, as defined in rule 3745-110-01 of the Administrative Code, a very large boiler, large boiler, mid-size boiler, small boiler, stationary combustion turbine, or stationary internal combustion engine; and
- (b) Except where the emission limitations and requirements of an applicable new source performance standard under 40 CFR Part 60 are more stringent than the emission limitations and requirements of this chapter, any new or modified source issued a permit-to-install after January 1, 2008, shall comply with the requirements of this chapter.

[Comment: If a new source performance standard is determined to be more stringent than the requirements of this chapter, the new source described under this paragraph shall comply with the new source performance standards in lieu of the requirements of this chapter].

Rule Amplifies: 3704.03(A), 3704.03(E)

3745-110-03      **RACT requirements and/or limitations for emissions of NOx from stationary sources.**

[Comment: For dates of non-regulatory government publications, publications of recognized organizations and associations, federal rules, and federal statutory provisions referenced in this rule, see the last paragraph in rule 3745-110-01 of the Administrative Code titled "Incorporation by reference."]

(A) Small boilers.

The owner or operator of a small boiler must annually perform a tune-up and maintain, in a permanently bound log book, or other format approved in writing by the director the following information:

- (1) The date of the last tune-up;
- (2) The name, title and affiliation of the person who performed the tune-up and made any adjustments; and
- (3) Any other information which the Ohio environmental protection agency may require as a condition of approval of any permit for the boiler.

(B) Mid-size boilers.

Except as otherwise provided in paragraphs (I) and (J) of this rule, on and after the compliance deadline specified by rule 3745-110-04 of the Administrative Code, no owner or operator of a mid-size boiler shall allow or permit the discharge into the ambient air of any NOx emissions in excess of the following:

-Emissions limitations [pounds of NOx emissions per mmBtu]-

Fuel Type	Tangential-fired	Wall-fired	Cyclone-fired	Spreader Stoker-fired	Overfeed Stoker-fired
Gas Only	0.10	0.10	N/A	N/A	N/A
Distillate Oil	0.12	0.12	0.12	N/A	N/A
Residual Oil	0.23	0.23	0.23	N/A	N/A
Coal (Wet Bottom)	0.30	0.30	0.30	N/A	N/A
Coal (Dry Bottom)	0.30	0.30	0.30	0.30	0.30

(C) Large boilers.

Except as otherwise provided in paragraphs (I) and (J) of this rule, on and after the compliance deadline specified by rule 3745-110-04 of the Administrative Code, no owner or operator of a large boiler shall allow or permit the discharge into the ambient air of any NO<sub>x</sub> emissions in excess of the following:

-Emissions Limitations [pounds of NO<sub>x</sub> emissions per mmBtu]-

Fuel Type	Tangential-fired	Wall-fired	Cyclone-fired	Spreader Stoker-fired	Overfeed Stoker-fired
Gas Only	0.10	0.10	N/A	N/A	N/A
Distillate Oil	0.12	0.12	0.12	N/A	N/A
Residual Oil	0.23	0.23	0.23	N/A	N/A
Coal (Wet Bottom)	0.30	0.30	0.30	N/A	N/A
Coal (Dry Bottom)	0.30	0.30	0.30	0.30	0.30

(D) Very large boilers.

Except as otherwise provided in paragraphs (I) and (J) of this rule, on and after the compliance deadline specified by rule 3745-110-04 of the Administrative Code, no owner or operator of a very large boiler shall allow or permit the discharge into the ambient air of any NO<sub>x</sub> emissions in excess of the following:

-Emissions Limitations [pounds of NO<sub>x</sub> emissions per mmBtu]-

Fuel Type	Tangential-fired	Wall-fired	Cyclone-fired	Spreader Stoker-fired	Overfeed Stoker-fired
Gas Only	0.10	0.10	N/A	N/A	N/A
Distillate Oil	0.12	0.12	0.12	N/A	N/A
Residual Oil	0.23	0.23	0.23	N/A	N/A
Coal (Wet Bottom)	0.30	0.30	0.30	N/A	N/A
Coal (Dry Bottom)	0.30	0.30	0.30	0.30	0.30

(E) Stationary combustion turbine:

Except as otherwise provided in paragraphs (I) and (J) of this rule, on and after the compliance deadline specified by rule 3745-110-04 of the Administrative Code, no owner or operator of a stationary combustion turbine shall allow or permit the discharge into the ambient air of any NO<sub>x</sub> emissions in excess of the following:

(1) Simple cycle turbines.

- (a) Less than 3.5 megawatts.
    - (i) 150.0 ppmvd, corrected to fifteen per cent oxygen, for combustion turbines firing only natural gas fuel, for both mechanical drive and electrical generation.
    - (ii) 200.0 ppmvd corrected to fifteen per cent oxygen, for combustion turbines firing distillate oil or diesel fuel, for both mechanical drive and electrical generation.
  - (b) 3.5 megawatts up to, and including 25.0 megawatts.
    - (i) 42.0 ppmvd, corrected to fifteen per cent oxygen, for combustion turbines firing only natural gas fuel, for both mechanical drive and electrical generation.
    - (ii) 96.0 ppmvd, corrected to fifteen per cent oxygen, for combustion turbines firing distillate oil or diesel fuel, for both mechanical drive and electrical generation.
  - (c) Greater than 25.0 megawatts and less than 50.0 megawatts.
    - (i) 42.0 ppmvd, corrected to fifteen per cent oxygen, for combustion turbines firing only natural gas fuel.
    - (ii) 96.0 ppmvd, corrected to fifteen per cent oxygen, for combustion turbines firing distillate oil or diesel fuel.
  - (d) Equal to or greater than 50.0 megawatts.
    - (i) 42.0 ppmvd, corrected to fifteen per cent oxygen, for combustion turbines firing only natural gas fuel.
    - (ii) 96.0 ppmvd, corrected to fifteen per cent oxygen, for combustion turbines firing distillate oil or diesel fuel.
- (2) Combined cycle turbines.
- (a) Less than 3.5 megawatts.
    - (i) 150.0 ppmvd, corrected to fifteen per cent oxygen, for combustion turbines firing only natural gas fuel, for both mechanical drive and electrical generation.

- (ii) 200.0 ppmvd corrected to fifteen per cent oxygen, for combustion turbines firing distillate oil or diesel fuel, for both mechanical drive and electrical generation

(b) 3.5 megawatts up to, and including 25.0 megawatts.

- (i) 42.0 ppmvd, corrected to fifteen percent oxygen, for combustion turbines firing only natural gas fuel, for both mechanical drive and electrical generation.

- (ii) 96.0 ppmvd, corrected to fifteen per cent oxygen, for combustion turbines firing distillate oil or diesel fuel, for both mechanical drive and electrical generation.

(c) Greater than 25.0 megawatts and less than 50.0 megawatts.

- (i) 42.0 ppmvd, corrected to fifteen per cent oxygen, for combustion turbines firing only natural gas fuel.

- (ii) 96.0 ppmvd, corrected to fifteen per cent oxygen, for combustion turbines firing distillate oil or diesel fuel.

(d) Equal to or greater than 50.0 megawatts.

- (i) 42.0 ppmvd, corrected to fifteen per cent oxygen, for combustion turbines firing only natural gas fuel.

- (ii) 96.0 ppmvd, corrected to fifteen per cent oxygen, for combustion turbines firing distillate oil or diesel fuel.

(F) Stationary internal combustion engine.

Except as otherwise provided in paragraphs (I) and (J) of this rule, on and after the compliance deadline specified by rule 3745-110-04 of the Administrative Code, no owner or operator of a stationary internal combustion engine shall allow or permit the discharge into the ambient air of any NO<sub>x</sub> emissions in excess of the following:

- (1) For rich burn engines which burn only gaseous fuels, 3.0 grams per horsepower-hour for engines which are greater than two thousand horsepower.
- (2) For lean burn engines which burn only gaseous fuels, 3.0 grams per horsepower-hour for engines which are greater than two thousand horsepower.
- (3) For engines which burn only diesel fuel or distillate oil, 3.0 grams per horsepower-hour for engines which are greater than two thousand horsepower.

- (4) For engines which burn dual fuels, 3.0 grams per horsepower-hour for engines which are greater than two thousand horsepower.
- (G) The emissions limits specified in paragraphs (A) to (F) or pursuant to paragraph (I) of this rule shall be based on the following:
- (1) The average of three one-hour stack test runs if stack testing is used to demonstrate compliance; or
  - (2) A twenty-four-hour daily heat input-weighted average if a continuous emissions monitor is used to demonstrate compliance. A thirty-day rolling heat input-weighted average emission rate may be used to demonstrate compliance with the appropriate emission limit from October first to April thirtieth.
    - (a) Determine the twenty-four-hour daily heat input-weighted average NO<sub>x</sub> emission rate based on the heat input-weighted average of the block hourly arithmetic average emission rates during each twenty-four-hour daily period from twelve a.m. to twelve a.m. the following day using continuous emissions monitor data. The block hourly heat input-weighted average emission rate must be calculated for each one-hour period starting with the period twelve a.m. to one a.m. and continuing through until the last period eleven p.m. to twelve a.m.; or, starting with the period twelve p.m. to one p.m. and continuing through the last period eleven a.m. to twelve p.m. The thirty-day rolling heat input-weighted average must be the average of the twenty-four-hour daily heat input-weighted NO<sub>x</sub> emission rate.
- (H) Emission averaging programs.
- (1) An owner or operator of a source which is subject to this chapter may propose an emission averaging program in lieu of the applicable emission limit(s) specified in paragraphs (A) to (F) of this rule or established in accordance with paragraph (I) of this rule. Both affected sources under rule 3745-110-02 of the Administrative Code and non-affected sources are allowed to be utilized in the averaging program, to the extent that reductions are real, quantifiable and enforceable and are in excess of any state or federal requirements. Any proposed emission averaging program shall comply with all of the following requirements:
    - (a) Specify the RACT emission limit for each affected source in rule 3745-110-02 of the Administrative Code involved in the emission averaging program;
    - (b) Specify a clearly enforceable proposed emission limit for each source or group of sources involved in the emission averaging program;

- (c) Result in actual reductions in NO<sub>x</sub> emissions that are equal to or greater than the actual emission reductions that would be required by this rule if an emission averaging program were not employed; and
  - (d) Achieve compliance with the proposed emission limits in accordance with the compliance deadlines in rule 3745-110-04 of the Administrative Code.
  - (e) Reductions allowed under the emission averaging program are those reductions that are real, quantifiable and enforceable and are in excess of any state or federal requirements. For purposes of determining the reductions, the actual emissions in tons per year, from all sources included in the averaging program, are subtracted from the lesser of either the actual annual average emissions prior to when the actual reduction occurs or the allowable emissions. A shutdown is creditable only to the extent that the owner or operator can demonstrate to the satisfaction of the director that the shutdown does not correspond to load-shifting or other activity which results in or could result in an equivalent or greater emission increase and that the reduction accounts for any increase in NO<sub>x</sub> emissions from other sources as a result of the shutdown.
  - (f) Owners or operators must submit a report to the director by March thirty-first of each year demonstrating that the equivalent reduction requirement in paragraph (H)(1)(c) of rule 3745-110-03 of the Administrative Code has been achieved for the previous calendar year.
- (2) Any emission averaging program approved by the director shall be submitted to and approved by the United States environmental protection agency as a revision of the Ohio state implementation plan.
- (I) RACT studies for stationary sources.
- (1) For any affected source of NO<sub>x</sub> emissions at an affected facility that is not subject to the emissions limits specified in paragraphs (A) to (F) of this rule, or that is subject to the emissions limits specified in paragraphs (A) to (F) of this rule but the owner or operator claims that the applicable limit is technically infeasible and/or economically unreasonable (i.e. not cost-effective) to achieve, the owner or operator shall conduct a detailed engineering study to determine the technical and economic feasibility of reducing the NO<sub>x</sub> emissions and to define RACT for the source. The detailed engineering study shall be conducted by an engineering consulting firm or other person or persons experienced in the field of air pollution control, and it shall provide the following information:
- (a) The complete facility name and address.

- (b) The name, title, address and telephone number of the owner or operator's representative within the company who shall be the contact person for this facility regarding the engineering study and affected sources.
- (c) The name, title, address and telephone number of the official who is responsible for approval of the engineering study.
- (d) The standard industrial classification code number(s) which are applicable to the facility's operation.
- (e) The following general information for each affected source:
  - (i) Ohio environmental protection agency application number(s);
  - (ii) Company identification;
  - (iii) Source description;
  - (iv) Month and year installed;
  - (v) Normal operating schedule (hours per day, days per week, and weeks per year);
  - (vi) Annual production rates for each of the three full calendar years preceding the effective date of this rule;
  - (vii) Average and maximum daily production rates for each of the three full calendar years preceding the effective date of this rule; and
  - (viii) The type of control equipment employed and the date installed.
- (f) A plot plan which shows the general layout of the facility and the affected source(s).
- (g) The following emissions data for each affected source:
  - (i) Average daily NO<sub>x</sub> emissions (pounds per day of operation) based upon the highest average daily production rate for each of the three full calendar years preceding the effective date of this rule or any other year that may be representative of the highest average daily emissions;

[Comment: The average daily production rate for a calendar year may be calculated in the following manner:

$$\text{AverageDailyProductionRate} = \frac{\text{[total production during the calendar year]}}{\text{[number of days production occurred during the calendar year]}}$$

Repeat the calculation for each of the three calendar years preceding the effective date of this rule. the highest value of these three years is the representative value used to calculate the average daily NOx emissions per year.]

- (ii) Maximum daily NOx emissions (pounds per day of operation) based upon the highest maximum daily production rate for each of the three full calendar years preceding the effective date of this rule or any year that may be more representative of the highest maximum daily emissions;
  - (iii) Annual NOx emissions (tons per year) based upon the highest annual production rate for each of the three full calendar years preceding the effective date of this rule or any year period that may be more representative of the annual production rate;
  - (iv) Documentation of the efficiency of the existing control equipment; and
  - (v) Documentation of any emissions testing which has been performed.
- (h) A detailed discussion of the technical feasibility of employing each of the following types of control measures for each affected source (or combination of sources):
- (i) Low-NOx burners;
  - (ii) Close coupled or separated over-fire ports;
  - (iii) Flue gas recirculation;
  - (iv) Burners out of service;
  - (v) Steam/water injection;
  - (vi) Dry low-NOx burners;
  - (vii) Ignition timing retard;
  - (viii) Separate circuit after-cooling;
  - (ix) Fuel emulsification;
  - (x) Selective noncatalytic reduction;
  - (xi) Nonselective catalytic reduction;

- (xii) Selective catalytic reduction using urea ammonia and methane as reducing agents;
- (xiii) Incineration (for sources other than boilers);
- (xiv) Scrubbing (for sources other than boilers);
- (xv) Process modification;
- (xvi) Fuel switching;
- (xvii) Adjustment of air/fuel ratio (for internal combustion engines only);
- (xviii) Low excess air;
- (xix) Gaseous fuels reburn; and
- (xx) Any other such RACT alternatives as are proposed by the owner or operator.

A detailed engineering discussion is not required for those control measures which are not applicable to a particular source.

- (i) For each type of control measure that is determined to be technically feasible, an estimate of the control efficiency that can be achieved.
- (j) For each control measure that is determined to be technically feasible, an estimate of the capital cost, annualized cost (including capital and operating costs), and the cost-effectiveness (annual dollars per ton of NO<sub>x</sub> removed annually).
- (k) A comparison and discussion of the advantages and disadvantages of the control options that are determined to be technically feasible.
- (l) A recommended definition of RACT for the source, including enforceable production limits, emissions limits, control efficiencies, and/or operating requirements.
- (m) An expeditious schedule for implementing the recommended definition of RACT, including milestones for awarding contracts, initiating construction, completing construction, and performing emissions testing, if necessary, to demonstrate compliance with the approved definition of RACT.
- (n) In the engineering study, all calculations of the NO<sub>x</sub> emissions, including all assumptions made, shall be documented clearly and in detail. In addition,

the capital and operating costs and the cost-effectiveness estimates shall be calculated in a manner that is consistent with the Ohio environmental protection agency, division of air pollution control document entitled "Guidance for Estimating Capital and Annual Costs of Air Pollution Systems".

- (2) Any definition of RACT and schedule of compliance for an affected source that are approved by the director shall be submitted to and approved by the United States environmental protection agency as a revision of the Ohio state implementation plan.
- (3) For any source that is subject to an emissions limit(s) contained in paragraphs (A) to (F) of this rule, if the director approves a definition of RACT and a schedule of compliance for the source pursuant to paragraph (I) of this rule, the source shall no longer be subject to the emissions limit(s) contained in paragraphs (A) to (F) of this rule.
- (4) If, within the five years prior to the effective date of this rule, the Ohio environmental protection agency has defined best available technology, pursuant to section 3704.01 of the Revised Code, for NO<sub>x</sub> emissions from a source which is subject to paragraph (I) of this rule, and the owner or operator is employing or has committed to employ the best available technology, the owner or operator may provide the following information to the director in satisfaction of the requirements of paragraph (I)(1) of this rule:
  - (a) All information required by paragraphs (I)(1)(a), (I)(1)(b), (I)(1)(d), (I)(1)(e) and (I)(1)(g) of this rule.
  - (b) Copies of the documents and technical information that support the existing best available technology determination.
  - (c) The name, title, address and telephone number of the official who is responsible for the information submitted in accordance with paragraph (I)(4) of this rule.

If upon review of this information, the director determines that the information does not or may not indicate that the definition of best available technology satisfies the requirements of this chapter, the director shall so notify the owner or operator, and the owner or operator shall conduct a full RACT engineering study in accordance with paragraph (I)(1) of this rule.

- (J) The requirements of paragraphs (A) to (F) of this rule shall not apply to the following sources:
  - (1) Any industrial boiler having a maximum heat input of less than or equal to twenty mmBtu/hr.

- (2) Any emergency standby boiler, stationary internal combustion engine, or stationary combustion turbine which operates less than five hundred hours during any consecutive twelve-month period. However, the owner or operator of the emergency standby engine, boiler, or turbine shall maintain for a period of not less than three years, in a bound log book, or other format acceptable to the director, a list of the dates and number of hours the emergency standby engine operated.
- (3) Any stationary internal combustion engine having an energy output capacity of less than two thousand horsepower.
- (4) Any stationary combustion turbine having an energy input capacity of less than twenty mmBtu/hr.
- (5) Any start-up unit located at an electric generating facility.
- (6) Any black start unit located at an electric generating facility.
- (7) Any peaking unit.
- (8) Any space heating unit.
- (9) Any auxiliary boiler.
- (10) Any CO boiler.
- (11) Any research and development source.
- (12) Any jet engine test cell.
- (13) Any air pollution control device.
- (14) Any municipal waste combustor.
- (15) Any source other than a boiler, gas turbine or internal combustion engine that has the potential to emit less than twenty-five tons per year of NO<sub>x</sub>.
- (16) Any affected source issued a valid air operating permit by Ohio environmental protection agency that restricts such affected source to twenty-five tons per year or less of NO<sub>x</sub> emissions.
- (17) Any boiler, stationary internal combustion engine, or stationary combustion turbine subject to the United States environmental protection agency clean air interstate rule contained in 70 FR 25162.

- (18) Any boiler subject to paragraph (C)(1) of rule 3745-14-01 of the Administrative Code (NOx SIP call).
- (19) Any affected source that is has been issued a permit-to-install that is subject to best available control technology or lowest achievable emission rate standards.
- (20) Any affected source whose utilization in less than ten per cent of its capacity factor on an annual average basis over a three-year rolling period and less than twenty per cent of its capacity factor in any year of the three-year rolling period.

3745-110-04

**Compliance deadlines.**

3745-110-04      **Compliance deadlines.**

(A) Certification and permit application requirements.

(1) By not later than January 1, 2008, any owner or operator of a source subject to paragraphs (A) to (F) of rule 3745-110-03 of the Administrative Code and which is not subject to paragraph (A)(2) of this rule shall either:

(a) Certify in writing to the director that such source is in compliance with all requirements of rule 3745-110-03 of the Administrative Code. Such certification shall include: equipment description, Ohio environmental protection agency permit application number(s) (if assigned), and all necessary data (consistent with the appropriate permit application appendices) and calculations which confirm the compliance status. The certification shall also include an application for a permit-to-operate such source if such source does not possess an effective permit; or

(b) Submit an application for a permit-to-operate or an application for a modification to a permit-to-operate in accordance with either rule 3745-35-02 of the Administrative Code or Chapter 3745-77 of the Administrative Code. Such application shall include a compliance program which will bring the source into compliance with all the requirements of rule 3745-110-03 of the Administrative Code as expeditiously as practicable, but in no event later than the date specified in paragraph (B) of this rule.

(2) Any owner or operator of a source subject to paragraph (I) of rule 3745-110-03 of the Administrative Code shall:

(a) Submit a complete RACT engineering study by not later than January 1, 2009.

(b) Shall implement the approved RACT not later than May 1, 2009, unless the director approves of an alternate schedule for implementing the RACT.

(B) RACT compliance deadline.

Any owner or operator of a source which is subject to the requirements of rule 3745-110-03 of the Administrative Code, including any source for which the director approves a definition of RACT pursuant to paragraph (I) of rule 3745-110-03 of the Administrative Code, shall achieve and demonstrate compliance with said emission limitations and control requirements as expeditiously as practicable, but in no event later than the following, and shall maintain compliance thereafter:

(1) May 1, 2010, if combustion modifications are required to demonstrate compliance with the applicable NO<sub>x</sub> emission limitations; or

- (2) May 1, 2011, if add-on controls are required to demonstrate compliance with the applicable emission limitations.

3745-110-05      **Compliance methods.**

[Comment: For dates of non-regulatory government publications, publications of recognized organizations and associations, federal rules, and federal statutory provisions referenced in this rule, see the last paragraph in rule 3745-110-01 of the Administrative Code titled "Incorporation by reference."]

- (A) Any owner or operator of a source which is subject to the requirements of rule 3745-110-03 of the Administrative Code shall demonstrate compliance with the applicable emissions limit(s) by performing emission tests in accordance with USEPA Method 7, 7A, 7C, 7D, or 7E, and any additional approved USEPA methods as applicable.
- (B) Any continuous emissions monitoring system for NO<sub>x</sub> that is employed to ensure ongoing compliance with an applicable emission limitation shall meet the requirements of Performance Specification 2, 40 CFR Part 60, Appendix B and quality assurance procedures contained in 40 CFR Part 60, Appendix F or 40 CFR Part 75. The continuous emission monitoring system shall be certified at least three months prior to a demonstration of compliance with the applicable emissions limit(s).
- (C) For the compliance demonstrations performed pursuant to paragraph (A) of this rule, the owner or operator shall obtain any additional test data (i.e., flow rates, oxygen concentrations, moisture contents, etc.), continuous diluent monitoring data (carbon dioxide or oxygen), or source fuel usage or horsepower data, concurrent with the required compliance demonstration in order to convert the emission test results or monitoring data to the units of the applicable limit. Compliance demonstrations shall be performed that are representative of the normal operating modes, including fuel types or fuel blends employed and shall exclude periods of startup, shutdown, malfunction, and low load operating conditions.
- (D) For paragraphs (B), (C), and (D) of rule 3745-110-03 of the Administrative Code, compliance demonstrations shall be performed while the affected boiler is operating at or as close as possible to one hundred per cent load.
- (E) For paragraph (E) of rule 3745-110-03 of the Administrative Code, compliance demonstrations shall be performed while the affected stationary combustion turbine is operating at or as close as possible to one hundred per cent load and one hundred per cent speed.
- (F) For paragraph (F) of rule 3745-110-03 of the Administrative Code, compliance demonstrations shall be performed while the affected internal combustion engine is operating at or as close as possible to one hundred per cent load and one hundred per cent speed.

3745-111-01      **Definitions.**

[Comment: For dates of non-regulatory government publications, publications of recognized organizations and associations, federal rules, and federal statutory provisions referenced in this rule, see the "Referenced Materials" paragraph at the end of this rule.]

- (A) Except as otherwise provided in this rule, the definitions in rule 3745-31-01 of the Administrative Code shall apply to this chapter.
- (B) "Emission reduction credit" or "ERC" means a surplus, quantifiable and permanent unit of reduction in actual emissions from an air contaminant source, as defined in rule 3745-31-01 of the Administrative Code, which is expressed in tons of pollutant per year, and that is federally enforceable no later than at the time of use.
- (C) "Ohio EPA" means the Ohio environmental protection agency.
- (D) "Permanent" means that emission reductions used to offset emission increases are assured for the life of the corresponding increase through a federally enforceable mechanism, regardless of whether the corresponding increase is limited or unlimited in duration.
- (E) "Quantifiable" means that the amount, rate and characteristics of emissions and emission reductions can be determined or measured through a reliable and replicable method established by an applicable law or approved by the director.
- (F) "Reasonable further progress" or "RFP" means any incremental emission reductions required to fulfill the requirements of paragraphs (b)(1)(A) and (c)(2)(B) of Section 182 of the Clean Air Act or specified in the Ohio state implementation plan.
- (G) "Surplus" means emission reductions made below an applicable source baseline which are below allowable emission rates and are not relied upon in the Ohio state implementation plan or required attainment demonstration of the national ambient air quality standards and have not been required by any applicable laws. Emission reductions can be used for offsets or ERCs to the extent allowed under federal law.
- (H) "Un-verified ERC" means an owner or operator has identified an emission reduction that may be surplus, quantifiable and permanent but the emission reduction has not been verified and deemed creditable by the Ohio EPA in accordance with this chapter and can not be transferred or used when participating in the banking program until it becomes a verified ERC.
- (I) "Verified" means the Ohio EPA has reviewed the information supplied by the owner or operator in accordance with this chapter to ensure the emission reductions are creditable as permanent, surplus and quantifiable ERCs and are approvable for transfer or use at the time of verification.

(J) "Verified ERC" means an emission reduction that is surplus, quantifiable and permanent as verified by the Ohio EPA in accordance with this chapter.

(K) Referenced materials. This chapter includes references to certain subject matter or materials. The text of the referenced materials is not included in the rules contained in this chapter. Information on the availability of the referenced materials as well as the date of, and/or the particular edition or version of the material is included in this rule. For materials subject to change, only the specific versions specified in this rule are referenced. Material is referenced as it exists on the effective date of this rule. Except for subsequent annual publication of existing (unmodified) Code of Federal Regulation compilations, any amendment or revision to a referenced document is not applicable unless and until this rule has been amended to specify the new dates.

(1) Availability. The referenced materials are available as follows:

(a) Clean Air Act and all sections thereof; information and copies may be obtained by writing to: "Superintendent of Documents, Attn: New Orders, PO Box 371954, Pittsburgh, PA 15250-7954." The full text of the Act as amended in 1990 is also available in electronic format at [www.epa.gov/oar/caa/](http://www.epa.gov/oar/caa/). A copy of the Act is also available for inspection and copying at most public libraries and "The State Library of Ohio."

(b) Code of Federal Regulations (CFR). Information and copies may be obtained by writing to: "Superintendent of Documents, Attention: New Orders, PO Box 371954, Pittsburgh, PA 15250-7954." The full text of the CFR is also available in electronic format at [www.access.gpo.gov/nara/cfr/](http://www.access.gpo.gov/nara/cfr/). The CFR compilations are also available for inspection and copying at most public libraries and "The State Library of Ohio."

(c) United States Code (USC). Information and copies may be obtained by writing to: "Superintendent of Documents, Attn: New Orders, PO Box 371954, Pittsburgh, PA 15250-7954." The full text of the United States Code is also available in electronic format at <http://www4.law.cornell.edu/uscode/>. The USC compilations are also available for inspection and copying at most public libraries and "The State Library of Ohio."

3745-111-02      **ERC banking program for the purpose of enabling the acquisition of offsets.**

[Comment: For dates of non-regulatory government publications, publications of recognized organizations and associations, federal rules, and federal statutory provisions referenced in this rule, see the "Referenced materials" paragraph at the end of rule 3745-111-01 of the Administrative Code.]

(A) Purpose and general clause.

- (1) The purpose of this chapter is to establish a voluntary statewide ERC banking program for the purpose of enabling the acquisition of offsets that shall be implemented in accordance with this chapter.
- (2) Nothing in this chapter shall be construed to be a mandatory requirement except when a person, as specified in paragraph (B)(2) of this rule, chooses to voluntarily participate in the ERC banking program. At such time, the requirements of this chapter shall apply.
- (3) Nothing in this chapter shall be construed to restrict the director's authority to attain and maintain the national ambient air quality standards of the Ohio state implementation plan requirements.
- (4) Nothing in this chapter shall be construed to restrict the use of offsets consistent with Chapter 3745-31 of the Administrative Code; Section 173 of the Clean Air Act; 40 CFR Part 51; 40 CFR Part 51, Appendix S; or 40 CFR Part 52.

(B) Applicability.

- (1) The use of ERCs under this chapter applies to volatile organic compounds and oxides of nitrogen as ozone precursors, sulfur dioxide, carbon monoxide, PM10, PM 2.5 and lead. At the director's discretion, the use of ERCs may also apply to any other pollutant, or precursor thereof, for which a national ambient air quality standard has been set.
- (2) Voluntary participants in this program may include:
  - (a) Any major stationary source or major modification that is to be constructed in an area designated in 40 CFR 81.336 as nonattainment for an air pollutant for which the major stationary source or major modification is major; or
  - (b) Any person who voluntarily chooses to participate in the ERC banking program.

For any ERC generating source that voluntarily participates in the ERC banking program located outside the state of Ohio, this chapter and paragraph (A) of rule 3745-31-27 of the Administrative Code shall be applicable.

(C) General requirements.

- (1) The generation, transfer and use of ERCs shall be consistent with the Ohio state implementation plan, the Clean Air Act, rules promulgated under the Clean Air Act, this chapter, and Chapter 3745-31 of the Administrative Code.
- (2) The use of verified ERCs in a nonattainment area shall result in emission reductions consistent with the requirements for reasonable further progress for the nonattainment area and any attainment demonstration specified in the Ohio state implementation plan.
- (3) Emission reductions made to correct violations or inaccurate reporting of any applicable emission standard of limitation or emission reduction resulting from a source, process, or process equipment in violation shall not be eligible to generate ERCs to be used or transferred under this chapter. Emission reductions in excess of what is required to correct a violation may be eligible to generate ERCs if they meet the requirements contained in this chapter and Chapter 3745-31 of the Administrative Code.
- (4) No ERCs may be allowed for replacing one volatile organic compound with another of lesser reactivity, except where allowed under paragraph (H) of rule 3745-31-24 of the Administrative Code.
- (5) Nothing in this chapter shall be construed to obviate the need to obtain a permit-to-install or PTIO under Chapter 3745-31 of the Administrative Code, or a Title V permit under Chapter 3745-77 of the Administrative Code. The use of verified ERCs which would be inconsistent with the requirements contained in Chapter 3745-31 of the Administrative Code is prohibited.

(D) ERC discounting.

The director may reduce the amount of ERCs under the following conditions:

- (1) Discounting for attaining or maintaining the national ambient air quality standards or Ohio state implementation plan.

The director may reduce the quantity of available ERCs in order to attain or maintain the national ambient air quality standards of the Ohio state implementation plan requirements, provided that the director will exercise such

authority through the Ohio state implementation plan process prior to removing ERCs from the bank established under this chapter.

3745-111-03      **ERC generation for the purpose of enabling the acquisition of offsets.**

[Comment: For dates of non-regulatory government publications, publications of recognized organizations and associations, federal rules, and federal statutory provisions referenced in this rule, see the "Referenced materials" paragraph at the end of rule 3745-111-01 of the Administrative Code.]

(A) Acceptable emission reduction techniques.

When voluntarily participating in the ERC banking program, ERCs shall be generated by the following emission reduction techniques:

- (1) Permanent shutdown of one or more existing air contaminant sources or a facility.
- (2) Permanent curtailment in production or operating hours at an existing air contaminant source or facility operating in accordance with applicable laws, provided the curtailment results in an actual emissions reduction and is not otherwise required to comply with the Clean Air Act.
- (3) The installation and operation of pollution control equipment that reduces emissions below the level required from an existing air contaminant source(s) or facility to less than that required by applicable laws.
- (4) Technologies, materials or processes or process equipment modifications which are not otherwise required by the Clean Air Act.
- (5) The incidental emissions reduction of air pollutants contained in paragraph (B)(1) of rule 3745-111-02 of the Administrative Code resulting from reductions of a collateral pollutant required under the Clean Air Act shall be permitted, provided the emission reduction meets the requirements of this chapter.
- (6) Acceptable mobile source ERC generation that reduces actual emissions shall be approved by the director on a case-by-case basis.
- (7) Any such other emission reduction technique, that reduces actual emissions, approved by the director on a case-by-case basis.

(B) ERC baseline determination.

The emission baseline from which ERCs may be generated shall be established to determine the amount of actual emissions from an air contaminant source, process, or process equipment for the purpose of generating ERCs that result in actual

emission reductions. The emission baseline shall be expressed in tons of pollutant emitted per year.

- (1) In establishing the baseline used to calculate ERCs, the Ohio EPA shall consider emission characteristics and operating conditions which include, at a minimum, the emission rate, capacity utilization, hours of operations and seasonal emission rate variations, in accordance with the following:
  - (a) The definition of actual emissions contained in rule 3745-31-01 of the Administrative Code.
  - (b) The baseline emissions rate may not be inconsistent with the emissions reported in the most recently filed or amended version of all relevant emission statements for the baseline period filed pursuant to Chapter 3745-78 of the Administrative Code for which fees have been paid, when applicable.
  - (c) The baseline emissions rate shall not exceed the allowable emissions rate taking into consideration the definition under paragraph (G) of rule 3745-111-01 of the Administrative Code.
- (2) The baseline determination requirements under rule 3745-31-24 of the Administrative Code shall apply.

(C) ERC initial quantification.

- (1) When participating in the ERC banking program, emission monitoring and quantification protocols to quantify emissions, emission reductions, and the generation of ERCs shall be reliable, enforceable, and replicable and may include the following:
  - (a) Continuous emission monitoring, stack testing, sampling of fuels and materials, or other direct measurements.
  - (b) Calculations using equations that are a function of process and control equipment.
  - (c) Mass-balance calculations.
  - (d) Emission factors, emission calculation methods, or emission quantification protocols approved for use at the time of emission reduction generation by the Ohio EPA.
  - (e) For facilities in which emission rates vary over time, an Ohio EPA approved alternative method for quantifying the reduction and ensuring the continued emissions reduction, if the method is approved by the director.

- (f) Measurement methods, procedures, and calculations shall be approved by the director.

(D) ERC generation notification.

- (1) When participating in the ERC banking program, an ERC generation notification shall be submitted in a form and manner prescribed by the director and shall include the following information, at a minimum:

- (a) Verified ERC generation.

- (i) The name of the owner and operator of the air contaminant source(s) or facility.
- (ii) The initial intended use of the ERCs.

[Comment: identifying an intended use(s) does not obligate the generator to that identified use(s) and does not prohibit the generator from requesting a change to the identified use while the ERCs are in the bank. The intended use information will provide information to the public regarding which ERCs are available for transfer.]

- (iii) The intended or actual date of initiation of emission reductions.
- (iv) Identification of the type of pollutant and quantity of ERCs being generated.
- (v) A description of the emission reduction techniques used to generate the ERCs.
- (vi) Full characterization of the emission reductions in accordance with this chapter.

- (b) Un-verified ERC generation.

- (i) Information consistent with paragraph (D)(1)(a)(i) to (D)(1)(a)(v) of this rule.
  - (ii) An estimation of the emission reductions and the basis of the estimation.
- (c) Except for paragraph (E)(2) of this rule, un-verified ERCs may be submitted via an ERC generation notification for participation in the ERC banking program only by the facility that actually generated the emission reductions, the current owner or operator, or a successor owner or operator.

(E) Shutdown notification and potential forfeiture of ERCs.

- (1) Regardless of any owner or operator choosing to participate in the voluntary banking program, for each air contaminant source(s) or facility permanent shutdown that may result in ERCs, the director may provide a notification through certified mail that requests the owner or operator of the facility to inform Ohio EPA if the owner or operator will participate in the ERC banking program. The owner or operator may submit a response, through certified mail, electronic mail or fax, with one of the following:
  - (a) The owner or operator may inform Ohio EPA that they request to retain possession of the ERCs and intend to do one of the following:
    - (i) Participate in the banking program which shall include submittal of information required under paragraph (D)(1)(a) of this rule for approval of verified ERCs.
    - (ii) Participate in the ERC banking program which shall include submittal of information required under paragraph (D)(1)(b) of this rule for approval of un-verified ERCs.
    - (iii) Participate in the ERC banking program at a future date or not participate in the ERC banking program.
  - (b) The owner or operator may inform Ohio EPA that they request the director to obtain possession of the ERCs to use at the director's discretion.
- (2) Any owner or operator who does not respond to the above shutdown notification shall subject the ERCs to paragraph (E)(2)(d) of this rule provided the conditions of paragraphs (E)(2)(a) to (E)(2)(c) of this rule are met.
  - (a) The facility has permanently shutdown and either:
    - (i) The owner or operator of the facility is undergoing court-supervised liquidation, has had its articles of incorporation or its license to conduct business in Ohio revoked; or
    - (ii) The owner of operator of the facility has otherwise taken formal steps to discontinue conducting business in Ohio.
  - (b) The owner, operator or legal representative responsible for the assets of the facility was provided the notification pursuant to paragraph (E)(1) of this rule but did not provide a response; and

- (c) The director made every effort to contact the owner, operator or legal representative, including public notice in a prominent newspaper in the area of the permanently shutdown air contaminant source(s) or facility.
  - (d) The facility shall forfeit possession of the ERCs to Ohio EPA, upon the date the permanent shutdown is certified with, or verified by Ohio EPA for use at the director's discretion. Forfeited ERCs shall be made available free of charge by Ohio EPA to a stationary source, at the director's discretion, for use as emission offsets provided the use of ERCs meet the requirements of Chapter 3745-31 of the Administrative Code and this chapter. In the event the new or modified stationary source is not installed, the ERCs shall be forfeited back to Ohio EPA.
- (F) Any mobile source or stationary source generating an ERC may be verified by Ohio EPA through compliance monitoring and reporting programs.

3745-111-04      **ERC transfer and use for the purpose of enabling the acquisition of offsets.**

(A) Conditions for approval of the use of ERCs for enabling the acquisition of emission offsets.

The use of ERCs from an existing air contaminant source or facility for the purpose of offsetting emissions of a proposed major stationary source or major modification (whether or not under the same ownership) shall meet the requirements contained in rule 3745-31-22 of the Administrative Code, including that there will be reasonable progress, as determined by the director, toward attainment of the applicable national ambient air quality standard.

- (1) The owner or operator of the proposed air contaminant source or facility shall secure approval from the director to use the ERCs for the purpose of offsetting emissions prior to the time of use.
- (2) ERCs may not be used in an area with a higher nonattainment classification than the one in which they were generated.
- (3) ERCs that are used shall be surplus and quantifiable at the time of use in accordance with paragraphs (E) and (G) of rule 3745-111-01 of the Administrative Code.
- (4) An owner or operator proposing new or increased emissions shall demonstrate that sufficient offsetting ERCs, at the ratio specified in rule 3745-31-26 of the Administrative Code have been acquired from a nonattainment area that meets the requirements of paragraph (B) of this rule.
- (5) A stationary source located in the state of Ohio may use ERCs generated by a source located in a neighboring state only upon the approval of both the director and the appropriate authority within the neighboring state. ERCs generated in another state may not be used at a facility within the state of Ohio unless the facility's generated ERCs are enforceable by the neighboring state and by the Ohio EPA in accordance with this chapter and paragraph (A) of rule 3745-31-27 of the Administrative Code.

(B) Location of emission offsets.

Location of offsetting emissions shall meet the requirements of rule 3745-31-25 of the Administrative Code, paragraph (A)(7) of rule 3745-31-26 of the Administrative Code, and rule 3745-31-27 of the Administrative Code.

(C) Administrative procedures.

(1) Transfer and use of ERCs for the purpose of offsetting emissions shall meet the administrative procedures of rule 3745-31-27 of the Administrative Code.

(2) Mobile source ERCs.

A mobile source owner or operator may generate ERCs, consistent with paragraph (A)(6) of rule 3745-111-03 of the Administrative Code, for the purpose of offsetting emissions of a proposed major stationary source or major modification wishing to locate in an area that meets the location requirements of paragraph (B) of this rule provided the offset ratio requirements of rule 3745-31-26 of the Administrative Code are met. The emission offsets shall come from existing mobile sources. The use of mobile source ERCs must be submitted as a Ohio state implementation plan revision or must be contained in a federally enforceable permit. The use of mobile source ERCs under this paragraph shall be approved by the director on a case-by-case basis.

(D) ERC transfer and use.

When any owner of ERCs elects to participate in the ERC banking program, the requirements of this paragraph are applicable:

(1) Only verified ERCs may be transferred and used through a transfer or use notification in accordance with paragraph (E) of this rule.

(2) Verified ERCs generated in accordance with paragraph (A)(1) of rule 3745-111-03 of the Administrative Code, resulting from the permanent shutdown of an existing air contaminant source or facility, may not be transferred or used prior to Ohio EPA receiving notification from the responsible official of a Title V facility, as defined in rule 3745-77-01 of the Administrative Code, or from the person with signatory authority under rule 3745-31-02 of the Administrative Code for a facility that is not Title V, certifying the permanence of the shutdown.

(3) Verified ERCs generated in accordance with paragraphs (A)(2) to (A)(7) of rule 3745-111-03 of the Administrative Code, may not be transferred until the ERCs are permanent and federally enforceable in accordance with paragraph (C)(2) of rule 3745-111-02 of the Administrative Code.

(E) Notification of transfer or use.

When participating in the ERC banking program, an ERC transfer or use notification shall be submitted in a form and manner prescribed by the director and shall include the following information, at a minimum, except paragraph (E)(6) of this rule shall be optional:

- (1) The name of the owner or operator of the air contaminant source or facility generating the ERC or the name of the person transferring the ERC.
- (2) The name of the person, owner or operator of the air contaminant source(s) or facility, receiving or using the ERC.
- (3) The intended use of the ERCs.

[Comment: identifying an intended use(s) does not obligate the person receiving the ERCs to that identified use(s) and does not prohibit the person receiving the ERCs from requesting a change to the identified use while the ERCs are in the bank. The intended use information will provide information to the public regarding which ERCs are available for transfer.]

- (4) Identification of the type of pollutant and quantity of verified ERCs being transferred or used.
- (5) Identification of the ERC certificate number associated with the ERCs, and if transfer or use of the ERCs identified in the certificate are in part, the exact ERCs contained in the banking system that are included in the transaction.
- (6) The cost, in dollars per ton, of ERCs transferred or used shall be optional.

(F) Public notice.

Consistent with the requirements of Chapter 3745-31 of the Administrative Code, the Ohio EPA shall provide the public with notice of owners or operators proposing to use verified ERCs at the time they are made federally enforceable.

3745-111-05      **ERC banking system.**

The Ohio EPA shall establish a voluntary ERC banking system to track the deposit and withdrawal of ERCs and the generation, transfer and use of ERCs in accordance with this chapter.

(A) Prior to deposit of ERCs into the banking system, the Ohio EPA shall do one of the following:

- (1) Verify the information submitted by the owner or operator in accordance with paragraph (D)(1) of rule 3745-111-03 of the Administrative Code and classify the ERCs as verified ERCs in the banking system.
- (2) Review the information submitted by the owner or operator in accordance with paragraph (D)(2) of rule 3745-111-03 of the Administrative Code and classify the estimated ERCs as un-verified ERCs in the banking system.

(B) The banking system shall identify:

- (1) Whether the ERCs are un-verified or verified ERCs;
- (2) The applicable criteria pollutant;
- (3) The quantity of ERCs;
- (4) A description of the source;
- (5) The county in which the ERCs were generated; and
- (6) The ERC generation date. The ERC generation date entered in the banking system shall reflect the anticipated date of emissions reduction and shall be amended as necessary to reflect the actual emissions reduction date.

(C) ERC certificate.

- (1) Upon registration and deposit of verified ERCs into the ERC banking system an ERC certificate(s) with a unique ERC certificate number shall be generated by the director to the verified ERC holder. Un-verified ERCs will receive an ERC certificate(s) upon verification by Ohio EPA.
- (2) If the owner of an ERC certificate(s) uses or transfers ERCs to a new owner in part or whole, the director shall generate an ERC certificate(s) to the new owner reflecting the transferred amount of ERCs and, if applicable, shall issue an ERC certificate(s) to the current owner reflecting the amount of ERCs remaining after the transfer or use. Upon issuance of a permit allowing the use of verified ERCs for the purpose of offsetting emissions, or upon transfer of ERCs, the banking

transactions shall be updated in the banking system, including identifying any remaining ERCs available for transferring or use after the transaction.

(D) Withdrawal of ERCs from the banking system.

Nothing in this rule shall prohibit the transfer of ERCs that do not meet the requirements of paragraph (D) of rule 3745-111-04 of the Administrative Code if the ERCs are withdrawn from the banking system. ERCs and ERC certificates may be withdrawn by the current owner from the ERC banking system at any time, upon written notice to the director. Upon withdrawal, all ERC certificates shall be terminated and the ERCs shall be withdrawn from the banking system.

(E) The director shall publish a list of deposited ERCs into the banking system that are available for transfer and use on the Ohio EPA website and the list shall be updated on a thirty day basis, at a minimum.

(F) Supporting documentation.

The Ohio EPA shall maintain supporting documentation, including permit decisions, generator information and other information required to sufficiently characterize the emissions, which shall allow the Ohio EPA and ERC users to determine if the ERCs are suitable for use at a specific facility.

(G) Annual publication.

The director may produce an annual publication related to banking transactions.

- (1) The publication may include, at a minimum, the costs, in dollars per ton, of ERCs purchased for transfer or use during the calendar year, the pollutant type and the county where the ERC was generated, transferred or used.
- (2) Information on the identity of any party involved in the ERC transactions and data used to calculate the purchase price of the ERCs shall not be included in the publication.
- (3) The document may be published by the first of March of the following year.

## **Chapter 3745-112: Consumer Products**

*Contact:* Alan Harness 614-644-4838  
Alan.Harness@EPA.State.Oh.US

3745-112-01      **Definitions.**

[Comment: For dates on non-regulatory government publications, publications of recognized organizations and associations, federal rules, and federal statutory provisions referenced in this rule, see the last paragraph of this rule titled "Incorporation by reference."]

(A) Except as otherwise provided in this rule, the definitions in rule 3745-15-01 of the Administrative Code shall apply to this chapter.

(B) As used in Chapter 3745-112 of the Administrative Code.

(1) "Adhesive" means any product that is used to bond one surface to another by attachment. Adhesive does not include products used on humans and animals, adhesive tape, contact paper, wallpaper, shelf liners, or any other product with an adhesive incorporated onto or in an inert substrate. For contact adhesive, construction, panel, and floor covering adhesive, and general purpose adhesive only, adhesive also does not include units of product, less packaging, which weigh more than one pound and consist of more than sixteen fluid ounces. This limitation does not apply to aerosol adhesives.

(2) "Adhesive remover" means a product designed to remove adhesive from either a specific substrate or a variety of substrates. Adhesive removers do not include products that remove adhesives intended for use on humans or animals.

(a) "Floor or wall covering adhesive remover" means a product designed or labeled to remove floor or wall coverings and associated adhesive from the underlying substrate.

(b) "Gasket or thread locking adhesive remover" means a product designed or labeled to remove gaskets or thread locking adhesives. Products labeled for dual use as a paint stripper and gasket remover and/or thread locking adhesive remover are considered gasket or thread locking adhesive remover.

(c) "General purpose adhesive remover" means a product designed or labeled to remove cyanoacrylate adhesives as well as non-reactive adhesives or residue from a variety of substrates. General purpose adhesive remover includes, but is not limited to: products that remove thermoplastic adhesives; pressure sensitive adhesives; dextrine or starch based adhesives; casein glues; rubber or latex-based adhesives; as well as products that remove stickers; decals; stencils; or similar materials. General purpose adhesive remover does not include floor or wall covering adhesive remover.

(d) "Specialty adhesive remover" means a product designed to remove reactive adhesives from a variety of substrates. Reactive adhesives include adhesives that require a hardener or catalyst in order for the bond to occur. Examples of reactive adhesives include, but are not limited to: epoxies; urethanes;

silicones. Specialty adhesive remover does not include gasket or thread locking adhesive remover.

For the purpose of paragraph(B)(2) of this rule, the term adhesive shall mean a substance used to bond one or more materials. Adhesive includes, but is not limited to: caulks; sealants; glues; or similar substances used for the purpose of forming a bond.

- (3) "Aerosol adhesive" means any adhesive packaged as an aerosol product in which the spray mechanism is permanently housed in a non-refillable can designed for hand-held application without the need for ancillary hoses or spray equipment. Aerosol adhesives include: special purpose spray adhesives; mist spray adhesives; and web spray adhesives.
- (4) "Aerosol cooking spray" means any aerosol product designed either to reduce sticking on cooking and baking surfaces or to be applied on food, or both.
- (5) "Aerosol product" means a pressurized spray system that dispenses product ingredients by means of a propellant contained in a product or a product's container, or by means of a mechanically induced force. Aerosol product does not include pump spray.
- (6) "Agricultural use" means the use of any pesticide or method or device for the control of pests in connection with the commercial production, storage or processing of any animal or plant crop. Agricultural use does not include the sale or use of pesticides in properly labeled packages or containers which are intended for: home use; use in structural pest control; or industrial or institutional use. For the purpose of this definition only:
  - (a) "Home use" means use in a household or its immediate environment.
  - (b) "Structural pest control" means a use requiring a license under Chapter 901:5-11 of the Administrative Code.
  - (c) "Industrial use" means use for or in a manufacturing, mining, or chemical process or use in the operation of factories, processing plants, and similar sites.
  - (d) "Institutional use" means use within the lines of, or on property necessary for the operation of buildings such as hospitals, schools, libraries, auditoriums, and office complexes.
- (7) "Air freshener" means any consumer product including, but not limited to, sprays, wicks, powders, and crystals, designed for the purpose of masking odors, or freshening, cleaning, scenting, or deodorizing the air. "Air Freshener" does not include products that are used on the human body, products that function primarily as cleaning products as indicated on a product label, or toilet/urinal care products, disinfectant products claiming to deodorize by killing germs on

surfaces, or institutional/industrial disinfectants when offered for sale solely through institutional and industrial channels of distribution. Air freshener does include spray disinfectants and other products that are expressly represented for use as air fresheners, except institutional and industrial disinfectants when offered for sale through institutional and industrial channels of distribution. To determine whether a product is an air freshener, all verbal and visual representations regarding product use on the label or packaging and in the product's literature and advertising may be considered. The presence of, and representations about, a product's fragrance and ability to deodorize (resulting from surface application) shall not constitute a claim of air freshening.

- (8) "All other carbon-containing compounds" means all other compounds which contain at least one carbon atom and are not a table B compound, as defined in this rule, or a LVP-VOC.
- (9) "All other forms" means all consumer product forms for which no form-specific VOC standard is specified. Unless specified otherwise by the applicable VOC standard, all other forms include, but are not limited to: solids; liquids; wicks; powders; crystals; and cloth or paper wipes (towelettes).
- (10) "Alternative Control Plan" or "ACP" means any emissions averaging program as approved by the CARB.
- (11) "Antimicrobial hand or body cleaner or soap" means a cleaner or soap which is designed to reduce the level of microorganisms on the skin through germicidal activity, and is regulated as an over-the-counter drug by the United States food and drug administration. Antimicrobial hand or body cleaner or soap includes, but is not limited to: antimicrobial hand or body washes/cleaners; food handler hand washes; healthcare personnel hand washes; pre-operative skin preparations and surgical scrubs. Antimicrobial hand or body cleaner or soap does not include: prescription drug products; antiperspirants; astringent/toner; deodorant; facial cleaner or soap; general-use hand or body cleaner or soap; hand dishwashing detergent (including antimicrobial); heavy-duty hand cleaner or soap; medicated astringent/medicated toner; and rubbing alcohol.
- (12) "Antiperspirant" means any product including, but not limited to: aerosols; roll-ons; sticks; pumps; pads; creams; and squeeze-bottles that are intended by the manufacturer to be used to reduce perspiration in the human axilla by at least twenty per cent in at least fifty per cent of a target population.
- (13) "Anti-static product" means a product that is labeled to eliminate, prevent, or inhibit the accumulation of static electricity. Anti-static product does not include: electronic cleaner; floor polish or wax; floor coating; and products that meet the definition of aerosol coating product or architectural coating.
- (14) "Architectural coating" means a coating applied to stationary structures and their appurtenances, to mobile homes, to pavements, or to curbs.

- (15) "ASTM" means the American society for testing and materials.
- (16) "Astringent/toner" means any product not regulated as a drug by the United States food and drug administration which is applied to the skin for the purpose of cleaning or tightening pores. This category also includes clarifiers and substrate-impregnated products. This category does not include: any hand, face, or body cleaner or soap product; medicated astringent/medicated toner; personal fragrance product; cold cream; lotion; or antiperspirant.
- (17) "Automotive brake cleaner" means a cleaning product designed to remove oil, grease, brake fluid, brake pad material or dirt from motor vehicle brake mechanisms.
- (18) "Automotive hard paste wax" means an automotive wax or polish that is:
- (a) Designed to protect and improve the appearance of automotive paint surfaces;
  - (b) A solid at room temperature; and
  - (c) Contains zero per cent water by formulation.
- (19) "Automotive instant detailer" means a product designed for use in a pump spray that is applied to the painted surface of automobiles and wiped off prior to the product being allowed to dry.
- (20) "Automotive rubbing or polishing compound" means a product designed primarily to remove oxidation, old paint, scratches or swirl marks, and other defects from the painted surfaces of motor vehicles without leaving a protective barrier.
- (21) "Automotive wax, polish, sealant or glaze" means a product designed to seal out moisture, increase gloss, or otherwise enhance a motor vehicle's painted surfaces. Automotive wax, polish, sealant or glaze includes, but is not limited to, products designed for use in auto-body repair shops and drive-through car washes, as well as products designed for the general public. Automotive wax, polish, sealant or glaze does not include: automotive rubbing or polishing compounds; automotive wash and wax products; surfactant-containing car wash products; and products designed for use on unpainted surfaces such as bare metal, chrome, glass, or plastic.
- (22) "Automotive windshield washer fluid" means any liquid designed for use in a motor vehicle windshield washer system either as an antifreeze or for the purpose of cleaning, washing, or wetting the windshield. Automotive windshield washer fluid does not include fluids placed by the manufacturer in a new vehicle.

- (23) "Bathroom and tile cleaner" means a product designed to clean tile or surfaces in bathrooms. Bathroom and tile cleaner does not include products designed primarily to clean toilet bowls, toilet tanks, or urinals.
- (24) "Bug and tar remover" means a product labeled to remove either or both of the following from painted motor vehicle surfaces without causing damage to the finish:
- (a) Biological-type residues such as insect carcasses and tree sap; and
  - (b) Road grime, such as road tar, roadway paint markings, and asphalt.
- (25) "CARB" means the California air resource board.
- (26) "Carburetor or fuel-injection air intake cleaners" means a product designed to remove fuel deposits, dirt, or other contaminants from a carburetor, choke, throttle body of a fuel-injection system, or associated linkages. Carburetor or fuel-injection air intake cleaners does not include products designed exclusively to be introduced directly into the fuel lines or fuel storage tank prior to introduction into the carburetor or fuel injectors.
- (27) "Carpet and upholstery cleaner" means a cleaning product designed for the purpose of eliminating dirt and stains on rugs, carpeting, and the interior of motor vehicles and/or on household furniture or objects upholstered or covered with fabrics such as wool, cotton, nylon or other synthetic fabrics. Carpet and upholstery cleaner includes, but is not limited to, products that make fabric protectant claims. Carpet and upholstery cleaner does not include general purpose cleaners; spot removers; vinyl or leather cleaners; dry cleaning fluids; or products designed exclusively for use at industrial facilities engaged in furniture or carpet manufacturing.
- (28) "Charcoal lighter material" means any combustible material designed to be applied on, incorporated in, added to, or used with charcoal to enhance ignition. Charcoal lighter material does not include: electrical starters and probes; metallic cylinders using paper tinder; natural gas; propane; or fat wood.
- (29) "Colorant" means any pigment or coloring material used in a consumer product for an aesthetic effect, or to dramatize an ingredient.
- (30) "Construction, panel, and floor covering adhesive" means any one-component adhesive that is designed exclusively for the installation, remodeling, maintenance, or repair of:
- (a) Structural and building components that include, but are not limited to: beams; trusses; studs; paneling (drywall or dry wall laminates; fiberglass reinforced plastic; plywood; particle board; insulation board; pre-decorated hardboard or tile-board; etc.), ceiling and acoustical tile; molding; fixtures;

countertops or countertop laminates; cove or wall bases; and flooring or sub-flooring; or

- (b) Floor or wall coverings that include, but are not limited to: wood or simulated wood covering; carpet; carpet pad or cushion; vinyl-backed carpet; flexible flooring material; non resilient flooring material; mirror tiles and other types of tiles; and artificial grass.

Construction, panel, and floor covering adhesive does not include floor seam sealer.

- (31) "Consumer" means any person who seeks, purchases, or acquires any consumer product for personal, family, household, or institutional use. Persons acquiring a consumer product for resale are not consumers for that product.

- (32) "Consumer product" means a chemically formulated product used by household and institutional consumers including, but not limited to: detergents; cleaning compounds; polishes; floor finishes; cosmetics; personal care products; home, lawn, and garden products; disinfectants; sanitizers; aerosol paints; and automotive specialty products. Consumer product does not include other paint products, furniture coatings, or architectural coatings. As used in this paragraph consumer product shall also refer to aerosol adhesives, including aerosol adhesives used for consumer, industrial, and commercial uses.

- (33) "Contact adhesive" means an adhesive that:

- (a) Is designed for application to both surfaces to be bonded together;
- (b) Is allowed to dry before the two surfaces are placed in contact with each other;
- (c) Forms an immediate bond that is impossible, or difficult, to reposition after both adhesive-coated surfaces are placed in contact with each other; and
- (d) Does not need sustained pressure or clamping of surfaces after the adhesive-coated surfaces have been brought together using sufficient momentary pressure to establish full contact between both surfaces.

Contact adhesive does not include rubber cements that are primarily intended for use on paper substrates. Contact adhesive also does not include vulcanizing fluids that are designed and labeled for tire repair only.

- (34) "Contact adhesive - general purpose" means any contact adhesive that is not a contact adhesive - special purpose.

- (35) "Contact adhesive - special purpose" means a contact adhesive that:

- (a) Is used to bond melamine-covered board, unprimed metal, unsupported vinyl, Teflon, ultra-high molecular weight polyethylene, rubber, high pressure laminate or wood veneer one sixteenth inch or less in thickness to any porous or nonporous surface, and is sold in units of product, less packaging, that contain more than eight fluid ounces; or
  - (b) Is used in automotive applications that are:
    - (i) Automotive under the-hood applications requiring heat, oil or gasoline resistance; or
    - (ii) Body-side molding, automotive weather strip or decorative trim.
- (36) "Container/packaging" means the part or parts of the consumer or institutional product which serve only to contain, enclose, incorporate, deliver, dispense, wrap or store the chemically formulated substance or mixture of substances which is solely responsible for accomplishing the purposes for which the product was designed or intended. Container/packaging includes any article onto or into which the principal display panel and other accompanying literature or graphics are incorporated, etched, printed or attached.
- (37) "Crawling bug insecticide" means any insecticide product that is designed for use against ants, cockroaches, or other household crawling arthropods, including, but not limited to, mites, silverfish or spiders. Crawling bug insecticide does not include products designed to be used exclusively on humans or animals, or any house dust mite product. For the purpose of this definition only:
- (a) "House dust mite product" means a product whose label, packaging, or accompanying literature states that the product is suitable for use against house dust mites, but does not indicate that the product is suitable for use against ants, cockroaches, or other household crawling arthropods.
  - (b) "House dust mite" means mites which feed primarily on skin cells shed in the home by humans and pets and which belong to the phylum Arthropoda, the subphylum Chelicerata, the class Arachnida, the subclass Acari, the order Astigmata, and the family Pyroglyphidae.
- (38) "Date-code" means the day, month and year on which the consumer product was manufactured, filled, or packaged, or a code indicating such a date.
- (39) "Deodorant" means:
- (a) For products manufactured before January 1, 2009: any product including, but not limited to, aerosols, roll-ons, sticks, pumps, pads, creams, and squeeze-bottles, that is intended by the manufacturer to be used to minimize odor in the human axilla by retarding the growth of bacteria which cause the decomposition of perspiration.

- (b) For products manufactured on or after January 1, 2009: any product including, but not limited to, aerosol, roll-ons, sticks, pumps, pads, creams, and squeeze-bottles, that indicates or depicts on the container or packaging, or on any sticker or label affixed thereto, that the product can be used on or applied to the human axilla to provide a scent and/or minimize odor. A deodorant body spray product that indicates or depicts on the container or packaging, or on any sticker or label affixed thereto, that it can be used on or applied to the human axilla, is a deodorant.
- (40) "Deodorant body spray" means:
- (a) For products manufactured before January 1, 2008: a personal fragrance product with twenty per cent or less fragrance.
- (b) For products manufactured on or after January 1, 2008: a personal fragrance product with twenty per cent or less fragrance, that is designed for application all over the human body to provide a scent. A deodorant body spray product that indicates or depicts on the container or packaging, or on any sticker or label affixed thereto, that it can be used on or applied to the human axilla, is a deodorant.
- (41) "Device" means any instrument or contrivance (other than a firearm) which is designed for trapping, destroying, repelling, or mitigating any pest or any other form of plant or animal life (other than man and other than bacteria, virus, or other microorganism on or in living man or other living animals); but not including equipment used for the application of pesticides when sold separately there from.
- (42) "Disinfectant" means any product intended to destroy or irreversibly inactivate infectious or other undesirable bacteria, pathogenic fungi, or viruses on surfaces or inanimate objects and whose label is registered under the Federal Insecticide, Fungicide, and Rodenticide Act. Disinfectant does not include: products designed solely for use on human or animals; products designed for agricultural use; products designed solely for use in swimming pools, therapeutic tubs, or hot tubs; and products which, as indicated on the principal display panel or label, are designed primarily for use as bathroom and tile cleaners, glass cleaners, general purpose cleaners, toilet bowl cleaners, or metal polishes.
- (43) "Distributor" means any person to whom a consumer product is sold or supplied for the purposes of resale or distribution in commerce, except that manufacturers, retailers, and consumers are not distributors.
- (44) "Double phase aerosol air freshener" means an aerosol air freshener with the liquid contents in two or more distinct phases that requires the product container be shaken before use to mix the phases, producing an emulsion.

- (45) "Dry cleaning fluid" means any non-aqueous liquid product designed and labeled exclusively for use on fabrics which are labeled for dry clean only (such as clothing or drapery) or s-coded fabrics. Dry cleaning fluid includes, but is not limited to: those products used by commercial dry cleaners and commercial businesses that clean fabrics such as draperies at the customer's residence or work place. Dry cleaning fluid does not include spot remover or carpet and upholstery cleaner.

For the purposes of this definition, s-coded fabric means an upholstery fabric designed to be cleaned only with water-free spot cleaning products as specified by the joint industry fabric standards committee.

- (46) "Dusting aid" means a product designed to assist in removing dust and other soils from floors and other surfaces without leaving a wax or silicone based coating. Dusting aid does not include pressurized gas duster.
- (47) "Electrical cleaner" means a product labeled to remove heavy soils such as grease, grime, or oil from electrical equipment, including, but not limited to: electric motors; armatures; relays; electric panels; or generators. Electrical cleaner does not include: general purpose cleaner; general purpose degreaser; dusting aid; electronic cleaner; energized electrical cleaner; pressurized gas duster; engine degreaser; anti-static product; or products designed to clean the casings or housings of electrical equipment.
- (48) "Electronic cleaner" means a product labeled for the removal of dirt, moisture, dust, flux, or oxides from the internal components of electronic or precision equipment such as circuit boards, and the internal components of electronic devices, including but not limited to: radios; compact disc players; digital video disc players; and computers. Electronic cleaner does not include general purpose cleaner; general purpose degreaser; dusting aid; pressurized gas duster; engine degreaser; electrical cleaner, energized electrical cleaner; anti-static product; or products designed to clean the casings or housings of electronic equipment.

- (49) "Energized electrical cleaner" means a product that meets both of the following criteria:
- (a) The product is labeled to clean and/or degrease electrical equipment, where cleaning and/or degreasing is accomplished when electrical current exists, or when there is a residual electrical potential from a component, such as a capacitor; and
  - (b) The product label clearly displays the statements: "energized equipment use only and not to be used for motorized vehicle maintenance, or their parts."

Energized electrical cleaner does not include electronic cleaner.

- (50) "Engine degreaser" means a cleaning product designed to remove grease, grime, oil and other contaminants from the external surfaces of engines and other mechanical parts.
- (51) "Existing product" means any formulation of the same product category and form sold, supplied, manufactured, or offered for sale in Ohio prior to January 1, 2008, or any subsequently introduced identical formulation.
- (52) "Fabric protectant" means a product designed to be applied to fabric substrates to protect the surface from soiling from dirt and other impurities or to reduce absorption of liquid into the fabric's fibers. Fabric protectant does not include waterproofers, products designed for use solely on leather, or products designed for use solely on fabrics which are labeled "for dry clean only" and sold in containers of ten fluid ounces or less.
- (53) "Fabric refresher" means a product labeled to neutralize or eliminate odors on: non-laundered fabric including, but not limited to: soft household surfaces; rugs; carpeting; draperies; bedding, automotive interiors; footwear; athletic equipment; clothing; or household furniture or objects upholstered or covered with fabrics such as, but not limited to: wool; cotton; or nylon. Fabric refresher does not include: anti-static product; carpet and upholstery cleaner; soft household surface sanitizers; footwear or leather care product; spot remover; or disinfectant; or products labeled for application to both fabric and human skin. For the purposes of this definition only, soft household surface sanitizer means a product labeled to neutralize or eliminate odors on surfaces listed above whose label is registered as a sanitizer under the Federal Insecticide, Fungicide, and Rodenticide Act.
- (54) "Facial cleaner or soap" means a cleaner or soap designed primarily to clean the face. Facial cleaner or soap includes, but is not limited to, facial cleansing creams, semisolids, liquids, lotions, and substrate-impregnated forms. Facial cleaner or soap does not include: prescription drug products; antimicrobial hand or body cleaner or soap; astringent/toner; general-use hand or body cleaner or soap; medicated astringent/medicated toner; or rubbing alcohol.
- (55) "Fat wood" means pieces of wood kindling with high naturally-occurring levels of sap or resin which enhance ignition of the kindling. Fat wood does not include any kindling with substances added to enhance flammability, such as wax covered or wax-impregnated wood-based products.
- (56) "Flea and tick insecticide" means any insecticide product that is designed for use against fleas, ticks, their larvae, or their eggs. Flea and tick insecticide does not include products that are designed to be used exclusively on humans or animals and their bedding.
- (57) "Flexible flooring material" means asphalt, cork, linoleum, no-wax, rubber, seamless vinyl and vinyl composite flooring.

- (58) "Floor coating" means an opaque coating that is labeled and designed for application to flooring, including but not limited to, decks, porches, steps, and other horizontal surfaces which may be subject to foot traffic.
- (59) "Floor polish or wax" means a wax, polish, or any other product designed to: polish, protect, or enhance floor surfaces by leaving a protective coating that is designed to be periodically replenished. Floor polish or wax does not include: spray buff products; products designed solely for the purpose of cleaning floors; floor finish strippers; products designed for unfinished wood floors; and coatings subject to architectural coatings regulations.
- (60) "Floor seam sealer" means any product designed and labeled exclusively for bonding, fusing, or sealing (coating) seams between adjoining rolls of installed flexible sheet flooring.
- (61) "Floor wax stripper" means a product designed to remove natural or synthetic floor polishes or waxes through breakdown of the polish or wax polymers, or by dissolving or emulsifying the polish or wax. Floor wax stripper does not include aerosol floor wax strippers or products designed to remove floor wax solely through abrasion.
- (62) "Flying bug insecticide" means any insecticide product that is designed for use against flying insects or other flying arthropods, including but not limited to flies, mosquitoes, moths, or gnats. Flying bug insecticide does not include wasp and hornet insecticide, products that are designed to be used exclusively on humans or animals, or any moth-proofing product. For the purposes of this definition only, moth-proofing product means a product whose label, packaging, or accompanying literature indicates that the product is designed to protect fabrics from damage by moths, but does not indicate that the product is suitable for use against flying insects or other flying arthropods.
- (63) "Footwear or leather care product" means any product designed or labeled to be applied to footwear or to other leather articles/components, to maintain, enhance, clean, protect, or modify the appearance, durability, fit, or flexibility of the footwear or leather article/component. Footwear includes both leather and non-leather foot apparel. Footwear or leather care product does not include: fabric protectant; general purpose adhesive; contact adhesive; vinyl/fabric/leather/polycarbonate coating; rubber and vinyl protectant; fabric refresher; products solely for deodorizing; or sealant products with adhesive properties used to create external protective layers greater than two millimeters thick.
- (64) "Fragrance" means a substance or complex mixture of aroma chemicals, natural essential oils, and other functional components with a combined vapor pressure not in excess of two millimeters of mercury at twenty degrees Celsius, the sole purpose of which is to impart an odor or scent, or to counteract a malodor.

- (65) "Furniture maintenance product" means a wax, polish, conditioner, or any other product designed for the purpose of polishing, protecting or enhancing finished wood surfaces other than floors. Furniture maintenance product does not include: dusting aids; wood cleaners, and products designed solely for the purpose of cleaning; and products designed to leave a permanent finish such as stains, sanding sealers and lacquers.
- (66) "Furniture coating" means any paint designed for application to room furnishings including, but not limited to: cabinets (kitchen, bath and vanity); tables; chairs; beds; and sofas.
- (67) "Gel" means a colloid in which the disperse phase has combined with the continuous phase to produce a semisolid material, such as jelly.
- (68) "General purpose adhesive" means any non-aerosol adhesive designed for use on a variety of substrates. General purpose adhesive does not include: contact adhesives; construction, panel, and floor covering adhesives; adhesives designed exclusively for application on one specific category of substrates (i.e., substrates that are composed of similar materials, such as different types of metals, paper products, ceramics, plastics, rubbers, or vinyls); adhesives designed exclusively for use on one specific category of articles (i.e., articles that may be composed of different materials but perform a specific function, such as gaskets, automotive trim, weather-stripping, or carpets).
- (69) "General purpose cleaner" means a product designed for general all-purpose cleaning, in contrast to cleaning products designed to clean specific substrates in certain situations. General purpose cleaner includes products designed for general floor cleaning, kitchen or countertop cleaning, and cleaners designed to be used on a variety of hard surfaces.
- (70) "General purpose degreaser" means any product labeled to remove or dissolve grease, grime, oil and other oil-based contaminants from a variety of substrates, including automotive or miscellaneous metallic parts. General purpose degreaser does not include: engine degreaser; general purpose cleaner; adhesive remover; electronic cleaner; electrical cleaner; energized electrical cleaner; metal polish/cleanser; products used exclusively in solvent cleaning tanks or related equipment; or products that are sold exclusively to establishments which manufacture or construct goods or commodities; and labeled not for retail sale.

For the purpose of this definition solvent cleaning tanks or related equipment includes, but is not limited to: cold cleaners; vapor degreasers; conveyORIZED degreasers; film cleaning machines; or products designed to clean miscellaneous metallic parts by immersion in a container.

- (71) "General-use hand or body cleaner or soap" means a cleaner or soap designed to be used routinely on the skin to clean or remove typical or common dirt and soils. General-use hand or body cleaner or soap includes, but is not limited to: hand or body washes; dual-purpose shampoo-body cleaners; shower or bath

gels; and moisturizing cleaners or soaps. General-use hand or body cleaner or soap does not include: prescription drug products; antimicrobial hand or body cleaner or soap; astringent/toner; facial cleaner or soap; hand dishwashing detergent (including antimicrobial); heavy-duty hand cleaner or soap; medicated astringent/medicated toner; or rubbing alcohol.

- (72) "Glass cleaner" means a cleaning product designed primarily for cleaning surfaces made of glass. Glass cleaner does not include products designed solely for the purpose of cleaning optical materials used in eyeglasses, photographic equipment, scientific equipment and photocopying machines.
- (73) "Graffiti remover" means a product labeled to remove spray paint, ink, marker, crayon, lipstick, nail polish, or shoe polish, from a variety of non-cloth or non-fabric substrates. Graffiti remover does not include paint remover or stripper, nail polish remover," or spot remover. Products labeled for dual use as both a paint stripper and graffiti remover are considered graffiti removers.
- (74) "Hair mousse" means a hairstyling foam designed to facilitate styling of a coiffure and provide limited holding power.
- (75) "Hair shine" means any product designed for the primary purpose of creating a shine when applied to the hair. Hair shine includes, but is not limited to, dual use products designed primarily to impart a sheen to the hair. Hair shine does not include: hair spray; hair mousse; hair styling product; hair styling gel; or products whose primary purpose is to condition or hold the hair.
- (76) "Hair styling gel" means a consumer product manufactured before January 1, 2008, that is a high viscosity, often gelatinous, product that contains a resin and is designed for the application to hair to aid in styling and sculpting of the hair coiffure.
- (77) "Hair spray" means:
- (a) For products manufactured before January 1, 2008: a consumer product designed primarily for the purpose of dispensing droplets of a resin on and into a hair coiffure which will impart sufficient rigidity to the coiffure to establish or retain the style for a period of time; and
  - (b) For products manufactured on or after January 1, 2008: a consumer product that is applied to styled hair, and is designed or labeled to provide sufficient rigidity, to hold, retain and/or (finish) the style of the hair for a period of time. Hair spray includes: aerosol hair sprays; pump hair sprays; spray waxes; color, glitter, or sparkle hairsprays that make finishing claims; and products that are both a styling and finishing product. Hair spray does not include spray products that are intended to aid in styling but does not provide finishing of a hairstyle. For the purpose of this definition, finish or finishing means the maintaining and/or holding of previously styled hair for a period of time. For the purpose of this definition, styling means the

forming, sculpting, or manipulating the hair to temporarily alter the hair's shape.

- (78) "Hair styling product" means a consumer product manufactured on or after January 1 2008, that is designed or labeled for the application to wet, damp or dry hair to aid in defining, shaping, lifting, styling and/or sculpting of the hair. Hair styling product includes, but is not limited to: hair balm; clay, cream; creme; curl straightener; gel; liquid; lotion; paste; pomade; putty; root lifter; serum; spray gel; stick; temporary hair straightener; wax; spray products that aid in styling but do not provide finishing of a hairstyle; and leave-in volumizers, detanglers and/or conditioners that make styling claims. Hair styling product does not include: hair mousse; hair shine; hair spray; or shampoos and/or conditioners that are rinsed from the hair prior to styling. For the purpose of this definition, finish or finishing means the maintaining and/or holding of previously styled hair for a period of time. For the purpose of this definition, styling means the forming, sculpting, or manipulating the hair to temporarily alter the hair's shape.
- (79) "Heavy-duty hand cleaner or soap" means a product designed to clean or remove difficult dirt and soils such as oil, grease, grime, tar, shellac, putty, printer's ink, paint, graphite, cement, carbon, asphalt, or adhesives from the hand with or without the use of water. Heavy-duty hand cleaner or soap does not include: prescription drug products; antimicrobial hand or body cleaner or soap; astringent/toner; facial cleaner or soap; general-use hand or body cleaner or soap; medicated astringent/medicated toner; or rubbing alcohol.
- (80) "Herbicide" means a pesticide product designed to kill or retard a plant's growth, but excludes products that are for agricultural use; or restricted materials that require a permit for use and possession.
- (81) "High volatility organic compound" or "HVOC" means any volatile organic compound that exerts a vapor pressure greater than eighty millimeters of mercury when measured at twenty degrees Celsius.
- (82) "Household product" means any consumer product that is primarily designed to be used inside or outside of living quarters or residences that are occupied or intended for occupation by individuals, including the immediate surroundings.
- (83) "Innovative product exemption" or "IPE" means a determination that a particular consumer product will result in less VOC emissions as compared to a representative compliant consumer product or as compared to the reformulation of the particular product in order to comply with a VOC content limit due to some characteristic of the product formulation, design, delivery system, or other factor. Such determination must be in accordance with paragraphs (L) and (M) of rule 3745-112-04 of the Administrative Code for a chemically formulated consumer product, and be issued by:

- (a) CARB pursuant to the consumer products regulations (including all amendments and supplements) at Title 17, Subchapter 8.5, Article 1, Section 94503.5 or Article 2, Section 94511 of the California Code of Regulations; or
  - (b) The air pollution control agency of another state pursuant to its consumer product regulations, if those consumer product regulations are based on the OTC "model rule for consumer products."
- (84) "Insecticide" means a pesticide product that is designed for use against insects or other arthropods, but excluding products that are: for agricultural use; or for a use which requires a structural pest control license under chapter 901:5-11 of the Administrative Code; or restricted materials that require a permit for use and possession.
- (85) "Insecticide fogger" means any insecticide product designed to release all or most of its content, as a fog or mist, into indoor areas during a single application.
- (86) "Institutional product", "industrial and institutional product" or "I & I product" means a consumer product that is designed for use in the maintenance or operation of an establishment that:
- (a) Manufactures, transports, or sells goods or commodities, or provides services for profit; or
  - (b) Is engaged in the nonprofit promotion of a particular public, educational, or charitable cause.

Establishments include, but are not limited to: government agencies; factories; schools; hospitals; sanitariums; prisons; restaurants; hotels; stores; automobile service and parts centers; health clubs; theaters; or transportation companies. Institutional product does not include household products and products that are incorporated into or used exclusively in the manufacture or construction of the goods or commodities at the site of the establishment.

- (87) "Label" means any written, printed, or graphic matter affixed to, applied to, attached to, blown into, formed, molded into, embossed on, or appearing upon any consumer product or consumer product package, for purposes of branding, identifying, or giving information with respect to the product or to the contents of the package.
- (88) "Laundry prewash" means a product that is designed for application to a fabric prior to laundering and that supplements and contributes to the effectiveness of laundry detergents and/or provides specialized performance.
- (89) "Laundry starch product" means a product that is designed for application to a fabric, either during or after laundering, to impart and prolong a crisp, fresh look

and may also act to help ease ironing of the fabric. Laundry starch product includes, but is not limited to, fabric finish, sizing, and starch.

- (90) "Lawn and garden insecticide" means an insecticide product labeled primarily to be used in household lawn and garden areas to protect plants from insects or other arthropods. Notwithstanding the requirements of paragraph (C) of rule 3745-110-06 of the Administrative Code, aerosol lawn and garden insecticides may claim to kill insects or other arthropods.
- (91) "Liquid" means a substance or mixture of substances which is capable of a visually detectable flow as determined under ASTM D4359-90(2000)e1. Liquid does not include powders or other materials that are composed entirely of solid particles.
- (92) "Lubricant" means a product designed to reduce friction, heat, noise, or wear between moving parts, or to loosen rusted or immovable parts or mechanisms. Lubricant does not include: automotive power steering fluids; products for use inside power generating motors, engines, and turbines, and their associated power-transfer gearboxes; two cycle oils or other products designed to be added to fuels; products for use on the human body; or animals; or products that are sold exclusively to establishments which manufacture or construct goods or commodities and are labeled not for retail sale.
- (93) "LVP-VOC" means a chemical compound or mixture that contains at least one carbon atom and meets one of the following:
- (a) Has a vapor pressure less than 0.1 millimeters of mercury at twenty degrees Celsius, as determined by CARB Method 310; or
  - (b) Is a chemical compound with more than twelve carbon atoms, or a chemical mixture comprised solely of compounds with more than twelve carbon atoms as verified by formulation data, and the vapor pressure and boiling point are unknown; or
  - (c) Is a chemical compound with a boiling point greater than two hundred sixteen degrees Celsius, as determined by CARB Method 310; or
  - (d) Is the weight per cent of a chemical mixture that boils above two hundred sixteen degrees Celsius, as determined by CARB Method 310.

For the purpose of the definition of LVP-VOC, chemical compound means a molecule of definite chemical formula and isomeric structure, and chemical mixture means a substrate comprised of two or more chemical compounds.

- (94) "Manufacturer" means any person who imports, manufactures, assembles, produces, packages, repackages, or re-labels a consumer product.

- (95) "Medicated astringent/medicated toner" means any product regulated as a drug by the United States food and drug administration which is applied to the skin for the purpose of cleaning or tightening pores. Medicated astringent/medicated toner includes, but is not limited to, clarifiers and substrate-impregnated products. Medicated astringent/medicated toner does not include: hand, face, or body cleaner or soap products; personal fragrance products; astringent/toner; cold cream; lotion; antiperspirants; or products that must be purchased with a doctor's prescription.
- (96) "Medium volatility organic compound" or "MVOC" means any volatile organic compound that exerts a vapor pressure greater than two millimeters of mercury and less than or equal to eighty millimeters of mercury when measured at twenty degrees Celsius.
- (97) "Metal polish/cleanser" means any product designed primarily to improve the appearance of finished metal, metallic, or metallized surfaces by physical or chemical action. To improve the appearance means to remove or reduce stains, impurities, or oxidation from surfaces or to make surfaces smooth and shiny. Metal polish/cleanser includes, but is not limited to, metal polishes used on brass, silver, chrome, copper, stainless steel and other ornamental metals. Metal polish/cleanser does not include: automotive wax, polish, sealant or glaze, wheel cleaner, paint remover or stripper; products designed and labeled exclusively for automotive and marine detailing; or products designed for use in degreasing tanks.
- (98) "Mist spray adhesive" means any aerosol adhesive which is not a special purpose spray adhesive and which delivers a particle or mist spray, resulting in the formation of fine, discrete particles that yield a generally uniform and smooth application of adhesive to the substrate.
- (99) "Multi-purpose dry lubricant" means any lubricant which is:
- (a) Designed and labeled to provide lubricity by depositing a thin film of graphite, molybdenumdisulfide, or polytetrafluoroethylene or closely related fluoropolymer on surfaces, and
  - (b) Designed for general purpose lubrication, or for use in a wide variety of applications.
- (100) "Multi-purpose lubricant" means any lubricant designed for general purpose lubrication, or for use in a wide variety of applications. Multi-purpose lubricant does not include multi-purpose dry lubricants, penetrants, or silicone-based multi-purpose lubricants.
- (101) "Multi-purpose solvent" means any organic liquid designed to be used for a variety of purposes, including cleaning or degreasing of a variety of substrates, or thinning, dispersing or dissolving other organic materials. Multi-purpose solvent includes solvents used in institutional facilities, except for laboratory

reagents used in analytical, educational, research, scientific or other laboratories. Multi-purpose solvent does not include: solvents used in cold cleaners, vapor degreasers, conveyORIZED degreasers or film cleaning machines; or solvents that are incorporated into, or used exclusively in the manufacture or construction of, the goods or commodities at the site of the establishment.

- (102) "Nail polish" means any clear or colored coating designed for application to the fingernails or toenails and including, but not limited to, lacquers, enamels, acrylics, base coats and top coats.
- (103) "Nail polish remover" means a product designed to remove nail polish and coatings from fingernails or toenails.
- (104) "Non-aerosol product" means any consumer product that is not dispensed by a pressurized spray system.
- (105) "Non-carbon containing compound" means any compound which does not contain any carbon atoms.
- (106) "Non-resilient flooring" means flooring of a mineral content which is not flexible. Non-resilient flooring" includes terrazzo, marble, slate, granite, brick, stone, ceramic tile and concrete.
- (107) "Non-selective terrestrial herbicide" means a terrestrial herbicide product that is toxic to plants without regard to species.
- (108) "Ohio sales" means the sales (net pounds of product, less packaging and container, per year) in Ohio for either the calendar year immediately prior to the year that the registration is due or, if that data is not available, any consecutive twelve month period commencing no earlier than two years prior to the due date of the registration. If direct sales data for Ohio is not available, sales may be estimated by prorating national or regional sales data by population.
- (109) "OTC" means the Ozone transport commission.
- (110) "Oven cleaner" means any cleaning product designed to clean and to remove dried food deposits from oven walls.
- (111) "Paint" means any pigmented liquid, liquefiable, or mastic composition designed for application to a substrate in a thin layer which is converted to an opaque solid film after application and is used for protection, decoration or identification, or to serve some functional purpose such as the filling or concealing of surface irregularities or the modification of light and heat radiation characteristics.
- (112) "Paint remover or stripper" means any product designed to strip or remove paints or other related coatings, by chemical action, from a substrate without markedly affecting the substrate. Paint remover or stripper does not include:

multi-purpose solvents; paint brush cleaners; products designed and labeled exclusively as graffiti removers; and hand cleaner products that claim to remove paints and other related coatings from skin.

- (113) "Paint thinner" means any volatile liquid used for reducing the viscosity of coating compositions or components.
- (114) "Penetrant" means a lubricant designed and labeled primarily to loosen metal parts that have bonded together due to rusting, oxidation, or other causes. Penetrant does not include multi-purpose lubricants that claim to have penetrating qualities, but are not labeled primarily to loosen bonded parts.
- (115) "Person" means any individual, public or private corporation, political subdivision, government agency, department or bureau of the state, municipality, industry, co-partnership, association, firm, trust, estate or any legal entity whatsoever.
- (116) "Personal fragrance product" means any product which is applied to the human body or clothing for the primary purpose of adding a scent or masking a malodor, including cologne, perfume, aftershave, and toilet water. Personal fragrance product does not include: deodorant; medicated products designed primarily to alleviate fungal or bacterial growth on feet or other areas of the body; mouthwashes, breath fresheners and deodorizers; lotions, moisturizers, powders or other skin care products used primarily to alleviate skin conditions such as dryness and irritations; products designed exclusively for use on human genitalia; soaps, shampoos, and products primarily used to clean the human body; and fragrance products designed to be used exclusively on non-human animals.
- (117) "Pesticide" means and includes any substance or mixture of substances labeled, designed, or intended for use in preventing, destroying, repelling or mitigating any pest, or any substance or mixture of substances labeled, designed, or intended for use as a defoliant, desiccant, or plant regulator, provided that the term pesticide will not include any substance, mixture of substances, or device which the United States environmental protection agency does not consider to be a pesticide.
- (118) "Pressurized gas duster" means a pressurized product labeled to remove dust from a surface solely by means of mass air or gas flow, including surfaces such as photographs, photographic film negatives, computer keyboards, and other types of surfaces that cannot be cleaned with solvents. Pressurized gas duster does not include dusting aid.
- (119) "Principal display panel or panels" means that part, or those parts of a label that are so designed as to most likely be displayed, presented, shown or examined under normal and customary conditions of display or purchase. Whenever a principal display panel appears more than once, all requirements

pertaining to the principal display panel shall pertain to all such principal display panels.

- (120) "Product brand name" means the name of the product exactly as it appears on the principal display panel of the product.
- (121) "Product category" means the applicable category which best describes the product as listed in the table of standards of paragraph (A) of rule 3745-112-03 of the Administrative Code.
- (122) "Product form," for the purpose of complying with rule 3745-112-06 of the Administrative Code only, means the applicable form which most accurately describes the product's dispensing form as follows:
- A = Aerosol product
- S = Solid
- P = Pump spray
- L = Liquid
- SS = Semisolid
- O = Other
- (123) "Propellant" means a liquefied or compressed gas that is used in whole or in part, such as a co-solvent, to expel a liquid or any other material from the same self-pressurized container or from a separate container.
- (124) "Pump Spray" means a packaging system in which the product ingredients within the container are not under pressure and in which the product is expelled only while a pumping action is applied to a button, trigger or other actuator.
- (125) "Responsible party" means the company, firm or establishment that is listed on the product's label. If the label lists two companies, firms or establishments, the responsible party is the party that the product was manufactured for or distributed by, as noted on the label.
- (126) "Restricted materials" means pesticides established as restricted materials under Chapter 901:5-11 of the Administrative Code.
- (127) "Retailer" means any person who sells, supplies, or offers consumer products for sale directly to consumers.
- (128) "Retail outlet" means any establishment at which consumer products are sold, supplied, or offered for sale directly to consumers.

- (129) "Roll-on product" means any antiperspirant or deodorant that dispenses active ingredients by rolling a wetted ball or wetted cylinder on the affected area.
- (130) "Rubber and vinyl protectant" means any product designed to protect, preserve or renew vinyl, rubber, and plastic on vehicles, tires, luggage, furniture, and household products such as vinyl covers, clothing, and accessories. Rubber and vinyl protectant does not include products primarily designed to clean the wheel rim, such as aluminum or magnesium wheel cleaners, and tire cleaners that do not leave an appearance-enhancing or protective substance on the tire.
- (131) "Rubbing alcohol" means any product containing isopropyl alcohol (also called isopropanol) or denatured ethanol and labeled for topical use, usually to decrease germs in minor cuts and scrapes, to relieve minor muscle aches, as a rubefacient, and for massage.
- (132) "Sealant and caulking compound" means any product with adhesive properties that is designed to fill, seal, waterproof, or weatherproof gaps or joints between two surfaces. Sealant and caulking compound does not include: roof cements and roof sealants; insulating foams; removable caulking compounds; clear/paintable/water resistant caulking compounds; floor seam sealers; products designed exclusively for automotive uses; or sealers that are applied as continuous coatings. Sealant and caulking compound also does not include units of product, less packaging, which weigh more than one pound and consist of more than sixteen fluid ounces. For the purpose of this definition only, removable caulking compounds means a compound which temporarily seals windows or doors for three to six month time intervals, and clear/paintable/water resistant caulking compounds means a compound which contains no appreciable level of opaque fillers or pigments, transmits most or all visible light through the caulk when cured, is paintable, and is immediately resistant to precipitation upon application.
- (133) "Semisolid" means a product that, at room temperature, will not pour, but will spread or deform easily, including but not limited to gels, pastes, and greases.
- (134) "Shaving cream" means an aerosol product which dispenses a foam lather intended to be used with a blade or cartridge razor, or other wet-shaving system, in the removal of facial or other bodily hair. Shaving cream does not include shaving gel.
- (135) "Shaving gel" means an aerosol product which dispenses a post-foaming semisolid designed to be used with a blade, cartridge razor, or other shaving system in the removal of facial or other bodily hair. Shaving gel does not include shaving cream.
- (136) "Silicone-based multi-purpose lubricant" means any lubricant which is:
- (a) Designed and labeled to provide lubricity primarily through the use of silicone compounds including, but not limited to, polydimethylsiloxane; and

- (b) Designed and labeled for general purpose lubrication, or for use in a wide variety of applications. Silicone-based multi-purpose lubricant does not include products designed and labeled exclusively to release manufactured products from molds.
- (137) "Single phase aerosol air freshener" means an aerosol air freshener with the liquid contents in a single homogeneous phase and which does not require that the product container be shaken before use.
- (138) "Solid" means a substance or mixture of substances which, either whole or subdivided (such as the particles comprising a powder), is not capable of visually detectable flow as determined under ASTM D4359-90(2000)e1.
- (139) "Special purpose spray adhesive" means an aerosol adhesive that meets any of the following definitions:
- (a) "Mounting adhesive" means an aerosol adhesive designed to permanently mount photographs, artwork, and any other drawn or printed media to a backing (paper, board, cloth, etc.) without causing discoloration to the artwork.
  - (b) "Flexible vinyl adhesive" means an aerosol adhesive designed to bond flexible vinyl to substrates. Flexible vinyl means a nonrigid polyvinyl chloride plastic with at least five per cent, by weight, of plasticizer content. A plasticizer is a material, such as a high boiling point organic solvent, that is incorporated into a vinyl to increase its flexibility, workability, or distensibility, and may be determined using ASTM E260-96(2006) including any subsequent amendments or from product formulation data.
  - (c) "Polystyrene foam adhesive" means an aerosol adhesive designed to bond polystyrene foam to substrates.
  - (d) "Automobile headliner adhesive" means an aerosol adhesive designed to bond together layers in motor vehicle headliners.
  - (e) "Polyolefin adhesive" means an aerosol adhesive designed to bond polyolefins (e.g. polyethylene, polypropylene, etc.) to substrates.
  - (f) "Laminate repair/edgebanding adhesive" means an aerosol adhesive designed for:
    - (i) The touch-up or repair of items laminated with high pressure laminates (e.g. lifted edges, delaminations, etc.); or for
    - (ii) The touch-up, repair, or attachment of edgebanding materials, including, but not limited to, other laminates, synthetic marble, veneers, wood moulding, and decorative metals.

For the purpose of this definition, high pressure laminate means sheet materials which consist of paper, fabric, or other core material that have been laminated at temperatures exceeding two hundred sixty-five degrees Fahrenheit, and at pressures between one thousand and one thousand four hundred pounds per square inch.

- (g) "Automotive engine compartment adhesive" means an aerosol adhesive designed for use in motor vehicle under-the-hood applications which require oil and plasticizer resistance, as well as high shear strength, at temperatures of two hundred to two hundred seventy-five degrees Fahrenheit.
- (140) "Spot remover" means any product labeled to clean localized areas, or remove localized spots or stains on cloth or fabric such as drapes, carpets, upholstery, and clothing, that does not require subsequent laundering to achieve stain removal. Spot remover does not include dry cleaning fluid, laundry pre-wash, or multi-purpose solvent.
- (141) "Spray buff product" means a product designed to restore a worn floor finish in conjunction with a floor buffing machine and special pad.
- (142) "Stick product" means any antiperspirant or deodorant that contains active ingredients in a solid matrix form, and that dispenses the active ingredients by frictional action on the affected area.
- (143) "Structural waterproof adhesive" means an adhesive whose bond lines are resistant to conditions of continuous immersion in fresh or salt water, and that conforms with federal specification MMM-A-181D (Type 1, Grade A). This definition is as per the federal consumer products regulation contained in 40 CFR Part 59, Subpart C.
- (144) "Table B compound" means any carbon-containing compound listed as an exception to the definition of VOC in paragraph (B)(152) of this rule.
- (145) "Terrestrial" means to live on or grow from land.
- (146) "Tire sealant and inflator" means any pressurized product that is designed to temporarily inflate and seal a leaking tire.
- (147) "Toilet/urinal care product" means any product designed or labeled to clean and/or to deodorize toilet bowls, toilet tanks, or urinals. Toilet bowls, toilet tanks, or urinals includes, but is not limited to: toilets or urinals connected to permanent plumbing in buildings and other structures; portable toilets or urinals placed at temporary or remote locations; or toilet or urinals in vehicles such as buses, recreational motor homes, boats, ships, and aircraft. Toilet/urinal care product does not include bathroom and tile cleaner or general purpose cleaner.

- (148) "Type A propellant" means a compressed gas such as carbon dioxide, nitrogen, nitrogen oxide, or compressed air which is used as a propellant, and is either incorporated with the product or contained in a separate chamber within the product's packaging.
- (149) "Type B propellant" means any halocarbon which is used as a propellant including chlorofluorocarbons, hydrochlorofluorocarbons, and hydrofluorocarbons.
- (150) "Type C propellant" means any propellant which is not a type A or type B propellant, including propane, isobutane, n-butane, and dimethyl ether (also known as dimethyl oxide).
- (151) "Undercoating" means any aerosol product designed to impart a protective, non-paint layer to the undercarriage, trunk interior, and/or firewall of motor vehicles to prevent the formation of rust or to deaden sound. Undercoating includes, but is not limited to, rubberized, mastic, or asphaltic products.
- (152) "Usage directions" means the text or graphics on the product's principal display panel, label, or accompanying literature which describes to the end user how and in what quantity the product is to be used.
- (153) "Vinyl/fabric/leather/polycarbonate coating" means a coating designed and labeled exclusively to coat vinyl, fabric, leather, or polycarbonate substrates.
- (154) "Volatile organic compound" or "VOC" means a compound as defined in paragraph (B)(6) of rule 3745-21-01 of the Administrative Code.
- (155) "VOC content" means, except for charcoal lighter products, the total weight of VOC in a product expressed as a percentage of the product weight (exclusive of the container or packaging), as determined pursuant to rule 3745-112-09 of the Administrative Code.
- (156) "Wasp and hornet insecticide" means any insecticide product that is designed for use against wasps, hornets, yellow jackets or bees by allowing the user to spray from a distance a directed stream or burst at the intended insects, or their hiding place.
- (157) "Waterproofer" means a product designed and labeled exclusively to repel water from fabric or leather substrates. Waterproofer does not include fabric protectants.
- (158) "Wax" means a material or synthetic thermoplastic substance generally of high molecular weight hydrocarbons or high molecular weight esters of fatty acids or alcohols, except glycerol and high polymers (plastics). Wax includes, but is not limited to: substances derived from the secretions of plants and animals such as carnuba wax and beeswax; substances of a mineral origin such as ozocerite and paraffin; or synthetic polymers such as polyethylene.

- (159) "Web spray adhesive" means any aerosol adhesive which is not a mist spray adhesive or special purpose spray adhesive.
- (160) "Wood cleaner" means a product labeled to clean wooden materials including but not limited to: decking; fences; flooring; logs; cabinetry; or furniture. Wood cleaner does not include: dusting aid; general purpose cleaner; furniture maintenance product; floor wax stripper; floor polish or wax; or products designed and labeled exclusively to preserve or color wood.
- (161) "Wood floor wax" means wax-based products for use solely on wood floors.
- (C) Incorporation by Reference. This chapter includes references to certain matter or materials. The text of the incorporated materials is not included in the regulations contained in this chapter. The materials are hereby made a part of the regulations in this chapter. For materials subject to change, only the specific version specified in the regulation are incorporated. Material is incorporated as it exists on the effective date of this rule. Except for subsequent annual publication of existing (unmodified) Code of Federal Regulation compilations, any amendment or revision to a referenced document is not incorporated unless and until this rule has been amended to specify the new dates.
- (1) Availability. The materials incorporated by reference are available as follows:
- (a) American Society for Testing Materials (ASTM). Information and copies of documents may be obtained by writing to: "ASTM International, 100 Bar Harbor Drive, P.O. Box C700, West Conshohocken, Pennsylvania 19426-2959." These documents are also available for purchase at [www.astm.org](http://www.astm.org). ASTM documents are also available for inspection and copying at most public libraries and "The State Library of Ohio."
  - (b) California air resources board (CARB) certification. Information and copies of executive orders, approval letters, equipment advisories, and equivalent test procedures may be obtained by writing to: "California Air Resources Board, Monitoring and Laboratory Division, P.O. Box 2815, Sacramento, CA, 95812-2815" or by calling (916) 327-0900. The full text of all CARB certification documents are also available in electronic format at <http://www.arb.ca.gov/vapor/vapor.htm>.
  - (c) California Code of Regulations. Copies of regulations may be obtained by writing to: "West Customer Service, P.O. Box 64833, St. Paul, MN 55164-0833" or by calling 1-800-888-3600. The full text of regulations are also available in electronic format at <http://ccr.oal.ca.gov/>.
  - (d) Chemical abstract service (CAS). Information can be obtained by writing to: "Chemical Abstract Service, 2540 Olentangy River Road, Columbus, Ohio, 43202," or by visiting their web site at [www.cas.org](http://www.cas.org).

- (e) Code of Federal Regulations. Information and copies may be obtained by writing to: "Superintendent of Documents, Attention: New Orders, PO Box 371954, Pittsburgh, PA 15250-7954." The full text of the CFR is also available in electronic format at [www.access.gpo.gov/nara/cfr/](http://www.access.gpo.gov/nara/cfr/). The CFR compilations are also available for inspection and copying at most public libraries and "The State Library of Ohio."
  - (f) Federal Insecticide, Fungicide and Rodenticide Act. Information and copies may be obtained by writing to: "Superintendent of Documents, Attn: New Orders, PO Box 371954, Pittsburgh, PA 15250-7954." The full text of the Act is also available in electronic format at <http://www.law.cornell.edu/uscode/>. A copy of the Act is also available for inspection and copying at most public libraries and "The State Library of Ohio."
  - (g) Federal Specification MMM-A-181D. Information and copies may be obtained by writing to: "DODSSP, Building 4/Section D, 700 Robbins Avenue, Philadelphia, PA 19111-5098." The full text of the federal specification is also available in electronic format at [http://assist.daps.dla.mil/quicksearch/basic\\_profile.cfm?ident\\_number=53165](http://assist.daps.dla.mil/quicksearch/basic_profile.cfm?ident_number=53165). Federal specifications are also available for inspection and copying at most public libraries and "The State Library of Ohio."
  - (h) Ozone Transport Commission model rule for consumer products. Information and copies may be obtained by writing to: "Ozone Transport Commission, 444 N. Capitol Street., Suite 638, Washington, D.C., 20001" or by calling 1-202-508-3840. The full text of the model rule is also available electronically at <http://www.otcair.org/interest.asp?Fview=stationary>. OTC documents are also available for inspection and copying at most public libraries and "The State Library of Ohio."
  - (i) United States Code. Information and copies may be obtained by writing to: "Superintendent of Documents, Attn: New Orders, PO Box 371954, Pittsburgh, PA 15250-7954." The full text of the United States Code is also available in electronic format at <http://www4.law.cornell.edu/uscode/>. The USC compilations are also available for inspection and copying at most public libraries and "The State Library of Ohio."
- (2) Incorporated materials.
- (a) 40 CFR Part 59, Subpart C; "National volatile organic compound emissions standards for consumer products;" 63 FR 48831, Sept. 11, 1998.
  - (b) Federal Fungicide, Insecticide and Rodenticide Act; contained in 7 USC 136 to 136y; "Environmental Pesticide Control"; published January 3, 2005 in Supplement IV of the 2000 Edition of the United States Code.

- (c) ASTM D86-05; "Standard Test Method for Distillation of Petroleum Products at Atmospheric Pressure;" approved July 1, 2005.
- (d) ASTM D4359-90(2000)e1; "Standard Test Method for Determining Whether a Material Is a Liquid or a Solid;" approved June 10, 2000.
- (e) ASTM E260-96(2006); "Standard Practice for Packed Column Gas Chromatography;" approved March 1, 2006.
- (f) CARB Method 310; "Standard Test Method for Distillation of Petroleum Products at Atmospheric Pressure;" adopted September 25, 1997, amended May 5, 2005.
- (g) Federal specification MMM-A-181D; "Adhesives, Phenols, Resorcinol, or Melamine Base;" effective January 23, 1980.
- (h) Ozone Transport Commission; "Draft Model Rule for Consumer Products;" as issued September 13, 2006.
- (i) Title 17, Division 3, Chapter 1, Subchapter 7, Section 93000; "Substances Identified as Toxic Air Contaminants;" as contained in the California Code of Regulations; August 20, 1999.
- (j) Title 17, Subchapter 8.5, Article 1, Section 94503.5; "Innovative Products;" as contained in the California Code of Regulations; March 30, 1996.
- (k) Title 17, Subchapter 8.5, Article 2, Section 94511; "Innovative Products;" as contained in the California Code of Regulations; November 18, 1997.

[Comment: For dates on non-regulatory government publications, publications of recognized organizations and associations, federal rules, and federal statutory provisions referenced in this rule, see the last paragraph of rule 3745-112-01 of the Administrative Code titled "Incorporation by reference."]

(A) Except as provided in rule 3745-112-04 and rule 3745-112-07 of the Administrative Code, no person shall sell, supply, offer for sale, or manufacture for sale in the state of Ohio any consumer product manufactured on or after January 1, 2009 that contains VOC's in excess of the VOC content limits specified in the following table of standards:

-Table 1: Table of standards-

Product Category	VOC Standard (per cent VOC, by weight)
Adhesives:	
Aerosol Mist Spray	65
Aerosol Web Spray	55
Special Purpose Spray Adhesives:	
Mounting, Automotive Engine Compartment, and Flexible Vinyl	70
Polystyrene Foam and Automotive Headliner	65

<sup>1</sup>See paragraph (G) of rule 3745-112-03 of the Administrative Code regarding charcoal lighter material standards.

<sup>2</sup>See paragraph (I) of rule 3745-112-03 of the Administrative Code regarding floor wax strippers.

(B) No person shall sell, supply, offer for sale, or manufacture for sale in the state of Ohio any antiperspirant or deodorant which contains any compound that has been identified by the CARB in Title 17, California Code of Regulations, Division 3, Chapter 1, Subchapter 7, Section 93000 as a toxic air contaminant.

(C) Products that are diluted prior to use.

(1) For consumer products for which the label, packaging, or accompanying literature specifically states that the product should be diluted with water or non-VOC solvent prior to use, the VOC content limits specified in the table of this rule shall apply to the product only after the minimum recommended dilution has taken place. For purposes of this rule, minimum recommended dilution shall not include recommendations for incidental use of a concentrated product to deal with limited special applications such as hard-to-remove soils or stains.

(2) For consumer products for which the label, packaging, or accompanying literature states that the product should be diluted with any VOC solvent prior to

use, the VOC content limits specified in the table of this rule shall apply to the product only after the maximum recommended dilution has taken place.

(D) Sell-through of products.

Notwithstanding the provisions of paragraph (A) of this rule, a consumer product manufactured prior to January 1, 2009 may be sold, supplied, or offered for sale after January 1, 2009. This does not apply to any consumer product that does not display on the product container or package the date on which the product was manufactured, or a code indicating such date, in accordance with paragraph (A) of rule 3745-112-05 of the Administrative Code.

(E) Products registered under the Federal Insecticide, Fungicide, and Rodenticide Act

For those consumer products that are registered under the Federal Insecticide, Fungicide, and Rodenticide Act, the effective date of the VOC standards is January 1, 2010.

(F) Requirements for charcoal lighter materials.

No person shall sell, supply, or offer for sale after January 1, 2009 any charcoal lighter material product unless at the time of the transaction the manufacturer can demonstrate that the product has been issued a currently effective certification by the CARB. This certification remains in effect in the state of Ohio as long as the CARB certification remains in effect and the certification is approved by the director. Any manufacturer claiming such a certification on this basis must submit to the director a copy of the certification decision (i.e., the Executive Order), including all conditions established by CARB applicable to the certification.

(G) Requirements for aerosol adhesives.

(1) The standards for aerosol adhesives apply to all uses of aerosol adhesives, including consumer, industrial, and commercial uses. Except as otherwise provided in rules 3745-112-04 and 3745-112-07 of the Administrative Code, no person shall sell, supply, offer for sale, use or manufacture for sale in the state of Ohio any aerosol adhesive which, at the time of sale, use, or manufacture, contains VOCs in excess of the limit specified in the table of this rule.

(2) In order to qualify as a special purpose spray adhesive the product must meet one or more of the definitions specified in rule 3745-112-01 of the Administrative Code, but if the product label indicates that the product is suitable for use on any substrate or application not listed in this definition, then the product shall be classified as either a web spray adhesive or a mist spray adhesive. If a product meets more than one of the definitions specified in rule 3745-112-01 of the Administrative Code for a special purpose spray adhesive, and is not classified as a web spray adhesive or mist spray adhesive under paragraph (G)(2) of this

rule, then the VOC content limit for the product shall be the lowest applicable VOC content limit specified in the table of this rule.

- (3) All aerosol adhesives must comply with the labeling requirements specified in rule 3745-112-05 of the Administrative Code.

(H) Requirements for floor wax strippers.

No person shall sell, supply, offer for sale, or manufacture for use in Ohio any floor wax stripper unless the following requirements are met:

- (1) The label of each non-aerosol floor wax stripper must specify a dilution ratio for light or medium build-up of polish that results in an as-used VOC concentration of three per cent by weight or less.
- (2) If a non-aerosol floor wax stripper is also intended to be used for removal of heavy build-up of polish, the label of that floor wax stripper must specify a dilution ratio for heavy build-up of polish that results in an as-used VOC concentration of twelve per cent, by weight, or less.
- (3) The terms light build-up, medium build-up or heavy build-up are not specifically required, as long as comparable terminology is used.

3745-112-04      **Exemptions.**

[Comment: For dates on non-regulatory government publications, publications of recognized organizations and associations, federal rules, and federal statutory provisions referenced in this rule, see the last paragraph of rule 3745-112-01 of the Administrative Code titled "Incorporation by reference."]

- (A) This rule shall not apply to any consumer product manufactured in the state of Ohio solely for shipment and use outside of the state of Ohio.
- (B) The provisions of this rule shall not apply to a manufacturer or distributor who sells, supplies, or offers for sale in the state of Ohio a consumer product that does not comply with the VOC standards specified in paragraph (A) of rule 3745-112-03 of the Administrative Code, as long as the manufacturer or distributor can demonstrate both that the consumer product is intended for shipment and use outside of the state of Ohio, and that the manufacturer or distributor has taken reasonable prudent precautions to assure that the consumer product is not distributed or used in the state of Ohio. The requirement of this paragraph does not apply to consumer products that are sold, supplied, or offered for sale by any person to retail outlets in the state of Ohio.
- (C) The MVOC content standards specified in paragraph (A) of rule 3745-112-03 of the Administrative Code for antiperspirants or deodorants, shall not apply to ethanol.
- (D) The VOC limits specified in paragraph (A) of rule 3745-112-03 of the Administrative Code shall not apply to fragrances up to a combined level of two per cent, by weight, contained in any consumer product and shall not apply to colorants up to a combined level of two per cent, by weight, contained in any antiperspirant or deodorant.
- (E) The VOC limits specified in paragraph (A) of rule 3745-112-03 of the Administrative Code shall not apply to any LVP-VOC.
- (F) The requirements in paragraph (A) of rule 3745-112-03 of the Administrative Code for antiperspirants or deodorants shall not apply to those VOCs that contain more than ten carbon atoms per molecule and for which the vapor pressure is unknown, or that have a vapor pressure of two millimeters of mercury or less at twenty degrees Celsius.
- (G) The requirements specified in paragraph (A) of rule 3745-112-05 of the Administrative Code shall not apply to consumer products registered under the Federal Insecticide, Fungicide, and Rodenticide Act.
- (H) The VOC limits specified in paragraph (A) of rule 3745-112-03 of the Administrative Code shall not apply to air fresheners that are comprised entirely of fragrance, less compounds not defined as VOCs in rule 3745-112-01 of the Administrative Code or

exempted pursuant to paragraph (D) of rule 3745-112-04 of the Administrative Code.

- (I) The VOC limits specified in paragraph (A) of rule 3745-112-03 of the Administrative Code shall not apply to insecticides containing at least ninety-eight per cent para-dichlorobenzene, by weight.
- (J) The VOC limits specified in paragraph (A) of rule 3745-112-03 of the Administrative Code shall not apply to adhesives sold in containers of one fluid ounce or less.
- (K) The VOC limits specified in paragraph (A) of rule 3745-112-03 of the Administrative Code shall not apply to bait station insecticides. For the purpose of this section, bait station insecticides are containers enclosing an insecticidal bait that is not more than 0.5 ounce, by weight, where the bait is designed to be ingested by insects and is composed of solid material feeding stimulants with less than five per cent active ingredients.
- (L) A chemically formulated consumer product is exempt from the requirements of paragraph (A) of rule 3745-112-03 of the Administrative Code if:
  - (1) CARB, pursuant to its consumer products regulations (including all amendments and supplements) at Title 17, Subchapter 8.5, Article 1, Section 94503.5 or Article 2, Section 94511 of the California Code of Regulations, or the air pollution control agency of another state that has adopted a consumer product rule based on or substantially equivalent to the OTC "Model Rule for Consumer Products" has granted to the product's manufacturer an innovative products exemption or ACP for the product; and
  - (2) The innovative products exemption or ACP is valid for use in Ohio pursuant to paragraph (M) of this rule.
- (M) An innovative products exemption or ACP as outlined in paragraph (L) of this rule shall not be valid for use in Ohio unless all the following requirements of paragraphs (M)(1) through (M)(4) of this rule are met:
  - (1) The director determines that the exemption is still in effect and, after consideration of information provided pursuant to paragraphs (M)(2) through (M)(4) of this rule, the director determines that the exemption is acceptable to him or her;
  - (2) The product (including its form) for which the innovative products exemption or ACP is being used to comply with this section meets the following:
    - (a) The product belongs to a chemically formulated consumer product category that is subject to a VOC content limit set in paragraph (A) of rule 3745-112-03 of the Administrative Code;

- (b) The VOC content limit promulgated for this product by the agency that issued the innovative products exemption or ACP is equal to or more stringent than the most stringent applicable VOC content limit contained in paragraph (A) of rule 3745-112-03 of the Administrative Code; and
    - (c) All ACP products used for emission credits within the approved ACP agreement are contained in paragraph (A) of rule 3745-112-03 of the Administrative Code.
  - (3) For an innovative product exemption, the manufacturer demonstrates to the director by clear and convincing evidence that, due to some characteristic of the product formulation, design, delivery systems, or other factor, the use of the product will result in less VOC emissions as compared to either the VOC emissions from a representative chemically formulated consumer product that complies with the VOC content limits specified in paragraph (A) of rule 3745-112-03 of the Administrative Code, or as compared to the calculated VOC emissions from a non-complying representative product, if the product had been reformulated to comply with the VOC limits specified in paragraph (A) of rule 3745-112-03 of the Administrative Code.
  - (4) Prior to relying on an innovative products exemption or ACP for compliance, the manufacturer has submitted to the director, in accordance with paragraph (N) of this rule, the following:
    - (a) A statement that, for a specified chemically formulated consumer product that it manufactures, it intends to comply with this section under an innovative products exemption or ACP rather than meet the applicable VOC content standards in paragraph (A) of rule 3745-112-03 of the Administrative Code;
    - (b) The brand name of the consumer product, and the specific chemically formulated consumer product category in paragraph (A) of rule 3745-112-03 of the Administrative Code to which the product belongs, including its form(s) (if applicable);
    - (c) A copy of the document(s) setting forth the innovative products exemption or ACP; the issuing agency's approval; the issuing agency's conditions of its approval; the demonstration of paragraph (M)(3) of this rule if an innovative products exemption; and any documents from the issuing agency that subsequently modify or terminate its conditions of approval; documentation demonstrating compliance with the innovative products exemption or ACP; and
    - (d) A statement that the innovative products exemption or ACP, as well as the product for which the innovative products exemption or ACP is being used,

conforms with the requirements of paragraphs (M)(1) through (M)(3) of this rule, as applicable.

(N) Any submittal made pursuant to paragraph (M)(4) of this rule shall be sent to the director and the envelope or package shall be labeled as follows:

- (1) For an innovative products exemption, "Attention: Consumer Product Innovative Product Exemption".
- (2) For an ACP, "Attention: Consumer Product Alternative Control Plan".

Submittals of the above-mentioned documents may be sent to the following address:

"State Emergency Response Commission c/o Ohio Environmental Protection Agency P.O. Box 1049 Columbus, Ohio 43216-0149"

[Comment: Any packages and/or certified mail not acceptable for post office box delivery should be sent to street address "50 West Town Street, Suite 700, Columbus, Ohio 43215."]

3745-112-05      **Administrative requirements.**

[Comment: For dates on non-regulatory government publications, publications of recognized organizations and associations, federal rules, and federal statutory provisions referenced in this rule, see the last paragraph of rule 3745-112-01 of the Administrative Code titled "Incorporation by reference."]

(A) Product dating.

- (1) Each manufacturer of a consumer product subject to rule 3745-112-03 of the Administrative Code shall clearly display on each consumer product container or package, the day, month, and year on which the product was manufactured, or a code indicating such date.
- (2) A manufacturer who uses the following code to indicate the date of manufacture shall not be subject to the requirements of paragraph (B) of this rule, if the code is represented separately from other codes on the product container so that it is easily recognizable:

YY DDD = year year day day day;

Where:

YY = two digits representing the year in which the product was manufactured;  
and

DDD = three digits representing the day of the year on which the product was manufactured, with 001 representing the first day of the year, 002 representing the second day of the year, and so forth (i.e. the Julian date).

- (3) This date or code shall be displayed on each consumer product container or package no later than January 1, 2008.
- (4) The date or date-code information shall be located on the container or inside the cover/cap so that it is readily observable or obtainable (by simply removing the cap/cover) without irreversibly disassembling any part of the container or packaging. For the purpose of this paragraph, information may be displayed on the bottom of a container as long as it is clearly legible without removing any product packaging.
- (5) The requirements of this provision shall not apply to products containing no VOCs, or containing VOCs at 0.10 per cent, by weight, or less.

(B) Additional product dating requirements.

- (1) If a manufacturer uses a code indicating the date of manufacture, for any consumer product subject to the applicable standard specified in the tables of rule 3745-112-03 of the Administrative Code an explanation of the date portion of the code must be filed with the Ohio environmental protection agency no later than January 1, 2008.
- (2) If a manufacturer changes any code indicating the date of manufacture for any consumer product subject to paragraph (B)(1) of this rule, an explanation of the modified code must be submitted to the Ohio environmental protection agency before any products displaying the modified code are sold, supplied, or offered for sale in Ohio.
- (3) No person shall erase, alter, deface, or otherwise remove or make illegible any date or code indicating the date of manufacture from any regulated product container without the express authorization of the manufacturer.
- (4) Date code explanations for codes indicating the date of manufacture are public information and may not be claimed as confidential.

(C) Most restrictive limit.

- (1) Products manufactured before January 1, 2009, and Federal Insecticide, Fungicide, and Rodenticide Act registered insecticides manufactured before January 1, 2010.

Notwithstanding the definition of product category, as defined in rule 3745-112-01 of the Administrative Code, if anywhere on the principal display panel of any consumer product manufactured before January 1, 2010, or any Federal Insecticide, Fungicide, and Rodenticide Act registered insecticide manufactured before January 1, 2010, any representation is made that the product may be used as, or is suitable for use as a consumer product for which a lower VOC content limit is specified in the tables of rule 3745-112-03 of the Administrative Code, then the lowest VOC limit shall apply. This requirement does not apply to general purpose cleaners, antiperspirant/deodorant products and insecticide foggers.

- (2) Products manufactured on or after January 1, 2009, and Federal Insecticide, Fungicide, and Rodenticide Act registered insecticides manufactured on or after January 1, 2010.

Notwithstanding the definition of product category, as defined in rule 3745-112-01 of the Administrative Code, if anywhere on the container or packaging of any consumer product manufactured before January 1, 2009, or any Federal Insecticide, Fungicide, and Rodenticide Act registered insecticide manufactured on or after January 1, 2010, or on any sticker or label affixed thereto, any representation is made that the product may be used as, or is suitable for use as a

consumer product for which a lower VOC content limit is specified in the table of rule 3745-112-03 of the Administrative Code, then the lowest VOC limit shall apply. This requirement does not apply to general purpose cleaners, antiperspirant/deodorant products and insecticide foggers.

(D) Additional labeling requirements for aerosol adhesives, adhesive removers, electronic cleaner, electrical cleaner, energized electrical cleaner, and contact adhesives.

(1) In addition to the requirements specified in paragraphs (A) and (C) of this rule and rule 3745-112-06 of the Administrative Code, both the manufacturer and responsible party for each aerosol adhesive, adhesive remover, electronic cleaner, electrical cleaner, energized electrical cleaner, and contact adhesive product subject to chapter 3745-112 of the Administrative Code shall ensure that all products clearly display the following information on each product container that is manufactured on or after the effective date for the category specified in the table of rule 3745-112-03 of the Administrative Code:

(a) The product category as specified in paragraph (A) of rule 3745-112-03 of the Administrative Code or an abbreviation of the category shall be displayed;

(b) The applicable VOC standard for the product that is specified in the table of rule 3745-112-03 of the Administrative Code, except for energized electrical cleaner, expressed as a per cent, by weight, shall be displayed unless the product is included in an alternative control plan approved by the director, as provided in rule 3745-112-04 of the Administrative Code, and the product exceeds the applicable VOC content limit;

If the product is included in an alternative control plan approved by the director and the product exceeds the applicable VOC content limits specified in the table of rule 3745-112-03 of the Administrative Code, the product shall be labeled with the term ACP or ACP product;

(c) If the product is classified as a special purpose spray adhesive, the applicable substrate and/or application or an abbreviation of the substrate/application that qualifies the product as special purpose shall be displayed; and

(d) If the manufacturer or responsible party uses an abbreviation as allowed by paragraph (D) of this rule, an explanation of the abbreviation must be filed with the director before the abbreviation is used.

(2) The information required in paragraph (A)(1) of this rule shall be displayed on the product container such that it is readily observable without removing or disassembling any portion of the product container or packaging. For the purposes of this rule, information may be displayed on the bottom of a container as long as it is clearly legible without removing any product packaging.

- (3) No person shall remove, alter, conceal, or deface the information required in paragraph (D)(1) of this rule prior to final sale of the product.

**Reporting requirements.**

- (A) Upon ninety days written notice, the director may require any responsible party to report any information for any consumer product or products of that responsible party including, but not limited to, all or part of the information specified in paragraphs (A)(1) to (A)(12) of this rule. If the responsible party does not have, or does not provide, the information requested by the director, the director may require the reporting of this information by the person that has the information, including, but not limited to, any formulator, manufacturer, supplier, parent company, private labeler, distributor, or repackager.
- (1) The name of the responsible party and the party's address, telephone number, and designated contact person;
  - (2) Any claim of confidentiality made pursuant to applicable Ohio confidentiality requirements;
  - (3) The product brand name for each consumer product subject to registration and upon request by the director, the product label;
  - (4) The product category to which the consumer product belongs;
  - (5) The applicable product form(s) listed separately;
  - (6) An identification of each product brand name and form as a household product, I & I product, or both;
  - (7) Separate Ohio sales in pounds per year, to the nearest pound, and the method used to calculate Ohio sales for each product form;
  - (8) For information submitted by multiple companies, an identification of each company which is submitting relevant data separate from that submitted by the responsible party. All information from all companies shall be submitted within the timeframe specified in paragraph (A) of this rule;
  - (9) For each product brand name and form, the net per cent, by weight, of the total product, less container and packaging, comprised of the following, rounded to the nearest 0.1 per cent:
    - (a) Total table B compounds, as defined in rule 3745-112-01 of the Administrative Code;
    - (b) Total LVP-VOCs that are not fragrances;
    - (c) Total all other carbon-containing compounds that are not fragrances;

- (d) Total all non-carbon-containing compounds;
  - (e) Total fragrance;
  - (f) For products containing greater than two per cent, by weight, fragrance:
    - (i) The per cent of fragrance that are LVP-VOCs; and
    - (ii) The per cent of fragrance that are all other carbon-containing compounds;
  - (g) Total paradichlorobenzene;
  - (10) For each product brand name and form, the identity, including the specific chemical name and associated "Chemical Abstract Services" number, of the following:
    - (a) Each table B compound, as defined in rule 3745-112-01 of the Administrative Code;
    - (b) Each LVP-VOC that is not a fragrance;
  - (11) If applicable, the weight per cent comprised of propellant for each product; and
  - (12) If applicable, an identification of the type of propellant (Type A, Type B, Type C, or a blend of the different types).
- (B) Any person supplying information pursuant to this rule may request that the information be kept confidential as trade secret information and the Ohio environmental protection agency will evaluate that claim in accordance with Ohio law.

3745-112-07      **Variations.**

- (A) Any person who cannot comply with the requirements set forth in rule 3745-112-03 of the Administrative Code, because of extraordinary reasons beyond the person's reasonable control may apply in writing to the director for a variance. The variance application shall set forth:
  - (1) The specific grounds upon which the variance is sought;
  - (2) The proposed date by which compliance with the provisions of rule 3745-112-03 of the Administrative Code will be achieved; and
  - (3) A compliance report reasonably detailing the method(s) by which compliance will be achieved.
  
- (B) No variance shall be granted unless all of the following findings are made:
  - (1) That, because of reasons beyond the reasonable control of the applicant, requiring compliance with rule 3745-112-03 of the Administrative Code would result in extraordinary economic hardship;
  - (2) That the public interest in mitigating the extraordinary hardship to the applicant by issuing the variance outweighs the public interest in avoiding any increased emissions of air contaminants which would result from issuing the variance; and
  - (3) That the compliance report proposed by the applicant can reasonably be implemented, and will achieve compliance as expeditiously as possible.
  
- (C) Any variance order shall specify a final compliance date by which the requirements of rule 3745-112-03 of the Administrative Code will be achieved. Any variance order shall contain a condition that specifies increments of progress necessary to assure timely compliance, and such other conditions that the director finds necessary.
  
- (D) Upon the application of any person, the director may review, and for good cause, modify or revoke a variance from requirements of rule 3745-112-03 of the Administrative Code.

3745-112-08      **Test methods.**

[Comment: For dates on non-regulatory government publications, publications of recognized organizations and associations, federal rules, and federal statutory provisions referenced in this rule, see the last paragraph of rule 3745-112-01 of the Administrative Code titled "Incorporation by reference."]

- (A) Upon the written request of the director, any manufacturer of a chemically formulated consumer product subject to the requirements of this rule shall test any of its products that are sold, offered for sale, held for sale, distributed, supplied, or manufactured for sale in the state of Ohio to determine the VOC content of the product (or in the case of charcoal lighter material, its emissions per start). Such testing shall be performed utilizing the test methods specified in paragraphs (B) to (G) of this rule, as applicable.
- (B) Testing to determine compliance with the VOC content limitations specified in the table of rule 3745-112-03 of the Administrative Code, shall be performed using:
  - (1) CARB Method 310; or
  - (2) An alternative method which is shown to accurately determine the concentration of VOCs in a product. Such methods must first be approved in writing by the director.
- (C) Compliance with the VOC content limitations specified in the table of rule 3745-112-03 of the Administrative Code, may also be demonstrated through calculation of the VOC content of a consumer product from records of the amounts of constituents used to make the product (excluding packaging), pursuant to the following criteria:
  - (1) Compliance determinations based on these records may not be used unless the manufacturer of a chemically formulated consumer product keeps, for each day of production, accurate records of the amount and chemical composition of the individual product constituents. These records must be kept for at least five years;
  - (2) For the purposes of this section, the VOC content of a product shall be calculated according to the following equation:

$$\text{VOC content} = (B - C)/A \times 100$$

where;

A = Total net weight of a unit of product (excluding any packaging);

B = Total weight of all VOCs in the constituents used to make the product, per unit;

C = Total weight of VOCs exempted under rule 3745-112-04 of the Administrative Code, per unit; and

- (3) If the calculations for VOC content based on product records appear to demonstrate compliance with the VOC limits, but these calculations are contradicted by the results of product testing performed using CARB Method 310, the results of CARB Method 310 shall take precedence over the calculations based on product records and may be used to establish a violation of the requirements of the VOC content limits set forth in this rule.
- (D) Testing to determine whether a product is a liquid or a solid shall be performed using ASTM D4359-90(2000)e1.
- (E) Testing to determine distillation points of petroleum distillate-based charcoal lighter materials shall be performed using ASTM D86-05.
- (F) Testing to determine whether a material is a plasticizer may be determined using ASTM E260-96(2006).
- (G) The director may require any manufacturer that is required to perform testing pursuant to paragraph (A) of this rule to provide to the director product samples that are duplicates of the samples tested.

3745-113-01      **Definitions for architectural and industrial maintenance (AIM) coatings.**

[Comment: For dates of non-regulatory government publications, publications of recognized organizations and associations, federal rules, and federal statutory provisions referenced in this rule, see the last paragraph of this rule titled "Incorporation by reference."]

(A) Except as otherwise provided in this rule, the definitions in rule 3745-15-01 of the Administrative Code shall apply to this chapter.

- (1) "Adhesive" means any chemical substance that is applied for the purpose of bonding two surfaces together other than by mechanical means.
- (2) "Aerosol coating product" means a pressurized coating product containing pigments or resins that dispenses product ingredients by means of a propellant, and is packaged in a disposable can for hand-held application, or for use in specialized equipment for ground traffic/marketing applications.
- (3) "AIM" means architectural and industrial maintenance.
- (4) "Antenna coating" means a coating labeled and formulated exclusively for application to equipment and associated structural appurtenances that are used to receive or transmit electromagnetic signals.
- (5) "Anti-fouling coating" means a coating labeled and formulated for application to submerged stationary structures and their appurtenances to prevent or reduce the attachment of marine or freshwater biological organisms. To qualify as an antifouling coating, the coating must be registered with both USEPA under the Federal Insecticide, Fungicide and Rodenticide Act contained in 7 USC 136 to 136y and with Ohio EPA.
- (6) "Appurtenance" means any accessory to a stationary structure coated at the site of installation, whether installed or detached, including but no limited to: bathroom and kitchen fixtures; cabinets; concrete forms; doors; elevators; fences; hand railings; heating equipment, air conditioning equipment, and other fixed mechanical equipment or stationary tools; lampposts; partitions pipes and piping systems; rain gutters and downspouts; stairways; fixed ladders; catwalks and fire escapes; and window screens.
- (7) "Architectural coating" means a coating to be applied to stationary structures or the appurtenances at the site of installation, to portable buildings at the site of installation, to pavements, or to curbs. Coatings applied in shop applications or to non-stationary structures such as airplanes, ships, boats, railcars, and automobiles, and adhesives are not considered architectural coatings for the purposes of this rule.

- (8) "Bitumens" means black or brown materials including, but not limited to, asphalt, tar, pitch, and asphaltite that are soluble in carbon disulfide, consist mainly of hydrocarbons, and are obtained from natural deposits or as residues from the distillation of crude petroleum or coal.
- (9) "Bituminous roof coating" means a coating which incorporates bitumens that is labeled and formulated exclusively for roofing.
- (10) "Bituminous roof primer" means a primer which incorporates bitumens that is labeled and formulated exclusively for roofing.
- (11) "Bond breaker" means a coating labeled and formulated for application between layers of concrete to prevent a freshly poured top layer of concrete from bonding to the layer over which it is poured.
- (12) "Calcimine recoaters" means flat solvent borne coatings formulated and recommended specifically for recoating calcimine-painted ceilings and other calcimine-painted substrates.
- (13) "Clear brushing lacquers" means clear wood finishes, excluding clear lacquer sanding sealers, formulated with nitrocellulose or synthetic resins to dry by solvent evaporation without chemical reaction and to provide a solid, protective film, which are intended exclusively for application by brush and which are labeled as specified in paragraph (A)(5) of rule 3745-113-04 of the Administrative Code.
- (14) "Clear wood coatings" means clear and semi-transparent coatings, including lacquers and varnishes, applied to wood substrates to provide a transparent or translucent solid film.
- (15) "Coating" means a material applied onto or impregnated into a substrate for protective, decorative, or functional purposes. Such materials include, but are not limited to, paints, varnishes, sealers, and stains.
- (16) "Colorant" means a concentrated pigment dispersion in water, solvent, and/or binder that is added to an architectural coating after packaging in sale units to produce the desired color.
- (17) "Concrete curing compound" means a coating labeled and formulated for application to freshly poured concrete to retard the evaporation of water.
- (18) "Concrete surface retarder" means a mixture of retarding ingredients such as extender pigments, primary pigments, resin, and solvent that interact chemically with the cement to prevent hardening on the surface where the retarder is applied, allowing the retarded mix of cement and sand at the surface to be washed away to create an exposed aggregate finish.

- (19) "Conjugated oil varnish" means a clear or semi-transparent wood coating, labeled as such, excluding lacquers or shellacs, based on a natural occurring conjugated vegetable oil (Tung oil) and modified with other natural or synthetic resins; a minimum of fifty per cent of the resin solids consisting of conjugated oil. Supplied as a single component product, conjugated oil varnishes penetrate and seal the wood. Film formation is due to polymerization of the oil. These varnishes may contain small amounts of pigment to control the final gloss or sheen.
- (20) "Conversion varnish" means a clear acid-curing coating with an alkyd or other resin blended with amino resins and supplied as a single component or two-component product. Conversion varnishes produce a hard, durable, clear finish designed for professional application to wood flooring. Film formation is the result of an acid-catalyzed condensation reaction, affecting a transesterification at the reactive ethers of the amino resins.
- (21) "Dry fog coating" means a coating labeled and formulated only for spray application such that overspray droplets dry before subsequent contact with incidental surfaces in the vicinity of the surface coating activity.
- (22) "Exempt compound" means a compound identified as exempt under the definition of VOC. Exempt compounds content of a coating shall be determined by USEPA Method 24 or SCAQMD Method 303-91.
- (23) "Faux finishing coating" means a coating labeled and formulated as a stain or a glaze to create artistic effects including, but not limited to, dirt, old age, smoke damage, and simulated marble and wood grain.
- (24) "Fire-resistive coating" means an opaque coating labeled and formulated to protect the structural integrity by increasing the fire endurance of interior or exterior steel and other structural materials, that has been fire tested and rated by a testing agency and approved by building code officials for use in bringing assemblies of structural materials into compliance with federal, state, and local building code requirements. The fire-resistive coating and the testing agency must be approved by building code officials. The fire-resistive coating shall be tested in accordance with ASTM E119-05a.
- (25) "Fire-retardant coating" means a coating labeled and formulated to retard ignition and flame spread, that has been fire tested and rated by a testing agency approved by building code officials for use in bringing building and construction materials into compliance with federal, state, and local building code requirements. The fire-retardant coating and the testing agency must be approved by building code officials. The fire-retardant coating shall be tested in accordance with ASTM E84-05e1.
- (26) "Flat coating" means a coating that is not defined under any other definition in this rule and that registers gloss less than fifteen on an eighty-five-degree meter or less than five on a sixty-degree meter according to ASTM D523-89 (1999).

- (27) “Floor coating” means an opaque coating that is labeled and formulated for application to flooring, including, but not limited to, decks, porches, steps, and other horizontal surfaces, which may be subjected to foot traffic.
- (28) “Flow coating” means a coating labeled and formulated exclusively for use by electric power companies or their subcontractors to maintain the protective coating systems present on utility transformer units.
- (29) “Form-release compound” means a coating labeled and formulated for application to a concrete form to prevent the freshly poured concrete from bonding to the form. The form may consist of wood, metal, or some material other than concrete.
- (30) “Graphic arts coating or sign paint” means a coating labeled and formulated for hand-application by artists using brush or roller techniques to indoor and outdoor signs (excluding structural components) and murals including letter enamels, poster colors, copy blockers, and bulletin enamels.
- (31) “High-temperature coating” means a high performance coating labeled and formulated for application to substrates exposed continuously or intermittently to temperatures above two hundred and four degrees Celsius (four hundred degrees Fahrenheit).
- (32) "Impacted immersion coating" means a high performance maintenance coating formulated and recommended for application to steel structures subject to immersion in turbulent, debris-laden water. These coatings are specifically resistant to high-energy impact damage by floating ice or debris.
- (33) “Industrial maintenance coating” means a high performance architectural coating, including primers, sealers, undercoaters, intermediate coats, and topcoats, formulated for application to substrates exposed to one or more of the following extreme environmental conditions listed below and labeled as specified in paragraph (A)(4) of rule 3745-113-04 of the Administrative Code:
- (a) Immersion in water, wastewater, or chemical solutions (aqueous and non-aqueous solutions), or chronic exposures of interior surfaces to moisture condensation;
  - (b) Acute or chronic exposure to corrosive, caustic, or acidic agents, or to chemicals, chemical fumes, or chemical mixtures or solutions;
  - (c) Repeated exposure to temperatures above one hundred twenty-one degrees Celsius (two hundred and fifty degrees Fahrenheit);
  - (d) Repeated (frequent) heavy abrasion, including mechanical wear and repeated (frequent) scrubbing with industrial solvents, cleansers, or scouring agents; or

- (e) Exterior exposure of metal structures and structural components.
- (34) “Lacquer” means a clear or opaque wood coating, including clear lacquer sanding sealers, formulated with cellulosic or synthetic resins to dry by evaporation without chemical reaction and to provide a solid, protective film.
- (35) “Low-solids coating” means a coating containing 0.12 kilogram or less of solids per liter (one pound or less of solids per gallon) of coating material.
- (36) “Magnesite cement coating” means a coating labeled and formulated for application to magnesite cement decking to protect the magnesite cement substrate from erosion by water.
- (37) "Manufacturer's maximum recommendation" means the maximum recommendation for thinning that is indicated on the label or lid of the coating container.
- (38) “Mastic texture coating” means a coating labeled and formulated to cover holes and minor cracks and to conceal surface irregularities, and is applied in a single coat of at least ten mils (0.010 inch) dry film thickness.
- (39) “Metallic pigmented coating” means a coating containing at least forty-eight grams of elemental metallic pigment per liter of coating as applied (0.4 pounds per gallon), when tested in accordance with SCAQMD Method 318-95.
- (40) “Multi-color coating” means a coating that is packaged in a single container and that exhibits more than one color when applied in a single coat.
- (41) “Non-flat coating” means a coating that is not defined under any other definition in this rule and that registers a gloss of fifteen or greater on an eighty-five-degree meter and five or greater on a sixty-degree meter according to ASTM D 523-89 (1999).
- (42) “Non-flat-high-gloss coating” means a non-flat coating that registers a gloss of seventy or above on a sixty-degree meter according to ASTM D523-89 (1999).
- (43) “Nonindustrial” use means any use of architectural coatings except in the construction or maintenance of any of the following:
- (a) Facilities used in the manufacturing of goods and commodities;
  - (b) Transportation infrastructure, including highways, bridges, airports and railroads;
  - (c) Facilities used in mining activities, including petroleum extraction; and
  - (d) Utilities infrastructure, including power generation and distribution, and water treatment and distribution systems.

- (44) "Nuclear coating" means a protective coating formulated and recommended to seal porous surfaces such as steel (or concrete) that otherwise would be subject to intrusions by radioactive materials. These coatings must be resistant to long-term (service life) cumulative radiation exposure [ASTM Method D 4082-89], relatively easy to decontaminate, and resistant to various chemicals to which the coatings are likely to be exposed [ASTM Method D 3912-80].
- (45) "Ohio EPA" means Ohio environmental protection agency.
- (46) "Post-consumer coating" means a finished coating that would have been disposed of in a landfill, having completed its usefulness to a consumer, and does not include manufacturing wastes.
- (47) "Pre-treatment wash primer" means a primer that contains a minimum of 0.5% acid, by weight, when tested in accordance with ASTM D1613-03, that is labeled and formulated for application directly to bare metal surfaces to provide corrosion resistance and to promote adhesion of subsequent topcoats.
- (48) "Primer" means a coating labeled and formulated for application to a substrate to provide a firm bind between the substrate and subsequent coats.
- (49) "Quick-dry enamel" means a non-flat coating that is labeled as specified in paragraph (A)(8) of rule 3745-113-04 of the Administrative Code and that is formulated to have the following characteristics:
- (a) Is capable of being applied directly from the container under normal conditions with ambient temperatures between sixteen and twenty-seven degrees Celsius (sixty and eighty-degrees Fahrenheit);
  - (b) When tested in accordance with ASTM D1640-03, sets to touch in two hours or less, is tack free in four hours or less, and dries hard in eight hours or less by the mechanical test method; and has a dried film gloss of seventy or above on a sixty-degree meter.
- (50) "Quick-dry primer, sealer and undercoater" means a primer, sealer, or undercoater that is dry to the touch in thirty minutes and can be re-coated in two hours when tested in accordance with ASTM D1640-03.
- (51) "Recycled coating" means an architectural coating formulated such that not less than fifty per cent of the total weight consists of secondary and post-consumer coating, with not less than ten per cent of the total weight consisting of post-consumer coating.
- (52) "Residence" means areas where people reside or lodge, including, but not limited to, single and multiple family dwellings, condominiums, mobile homes, apartment complexes, motels, and hotels.

- (53) “Roof coating” means a non-bituminous coating labeled and formulated exclusively for application to roofs for the primary purpose of preventing penetration of the substrate by water or reflecting heat and ultraviolet radiation. Metallic pigmented roof coatings, which qualify as metallic pigmented coatings, shall not be considered in this category, but shall be considered to be in the metallic pigmented coatings category.
- (54) “Rust preventive coating” means a coating formulated exclusively for nonindustrial use to prevent the corrosion of metal surfaces and labeled as specified in paragraph (A)(6) of rule 3745-113-04 of the Administrative Code.
- (55) “Sanding sealer” means a clear or semi-transparent wood coating labeled and formulated for application to bare wood to seal the wood and to provide a coat that can be abraded to create a smooth surface for subsequent applications of coatings. A sanding sealer that also meets the definition of a lacquer is not included in this category, but it is included in the lacquer category.
- (56) "SCAQMD" means the south coast air quality management district in California.
- (57) “Sealer” means a coating labeled and formulated for application to a substrate for one or more of the following purposes: to prevent subsequent coatings from being absorbed by the substrate, or to prevent harm to subsequent coatings by materials in the substrate.
- (58) “Secondary coating (rework)” means a fragment of a finished coating or a finished coating from a manufacturing process that has converted resources into a commodity of real economic value, but does not include excess virgin resources of the manufacturing process.
- (59) “Shellac” means a clear or opaque coating formulated solely with the resinous secretions of the lac beetle (*Lacifer lacca*), thinned with alcohol, and formulated to dry by evaporation without a chemical reaction.
- (60) “Shop application” means an application of a coating to a product or a component of a product in or on the premises of a factory or a shop as part of a manufacturing, production, or repairing process (for example, original equipment manufacturing coatings).
- (61) “Solicit” means to require for use or to specify, by written or oral contract.
- (62) “Specialty primer, sealer, and undercoater” means a coating labeled as specified in paragraph (A)(7) of rule 3745-113-04 of the Administrative Code and that is formulated for application to a substrate to seal fire, smoke or water damage; to condition excessively chalky surfaces; to seal in efflorescence; or to block stains. An excessively chalky surface is one that is defined as having a chalk rating of four or less as determined by ASTM D4214-98.

- (63) "Stain" means a clear, semi-transparent, or opaque coating labeled and formulated to change the color of a surface, but not conceal the grain pattern or texture.
- (64) "Swimming pool coating" means a coating labeled and formulated to coat the interior of swimming pools and to resist swimming pool chemicals.
- (65) "Swimming pool repair and maintenance coating" means a rubber-based coating labeled and formulated to be used over existing rubber-based coatings for the repair and maintenance of swimming pools.
- (66) "Temperature-indicator safety coating" means a coating labeled and formulated as a color-changing indicator coating for the purpose of monitoring the temperature and safety of the substrate, underlying piping, or underlying equipment, and for application to substrates exposed continuously or intermittently to temperatures above two hundred and four degrees Celsius (four hundred degrees Fahrenheit).
- (67) "Thermoplastic rubber coating and mastics" means a coating or mastic formulated and recommended for application to roofing or other structural surfaces and that incorporates no less than forty per cent by weight of thermoplastic rubbers in the total resin solids and may also contain other ingredients including, but not limited to, fillers, pigments and modifying resins.
- (68) "Tint base" means an architectural coating to which colorant is added after packaging in sale units to produce a desired color.
- (69) "Traffic marking coating" means a coating labeled and formulated for marking and striping streets, highways, or other traffic surfaces including, but not limited to, curbs, berets, driveways, parking lots, sidewalks, and airport runways.
- (70) "Undercoater" means a coating labeled and formulated to provide a smooth surface for subsequent coatings.
- (71) "USEPA" means United States environmental protection agency.
- (72) "Varnish" means a clear or semi-transparent wood coating, excluding lacquers and shellacs, formulated to dry by chemical reaction. Varnishes may contain small amounts of pigment to color a surface, or to control the final sheen or gloss of the finish.
- (73) "VOC" or "volatile organic compound" means an organic compound which participates in atmospheric photochemical reactions; that is, an organic compound other than those which the administrator of the US EPA designates in 40 CFR 51.100 (relating to definitions) as having negligible photochemical reactivity.

- (74) "Waterproofing sealer" means a coating labeled and formulated for application to a porous substrate for the primary purpose of preventing the penetration of water.
- (75) "Waterproofing concrete/masonry sealer" means a clear or pigmented film-forming coating that is labeled and formulated for sealing concrete and masonry to provide resistance against water, alkalis, acids, ultraviolet light, and staining.
- (76) "Wood preservative" means a coating labeled and formulated to protect exposed wood from decay or insect attack, that is registered with both USEPA under the Federal Insecticide, Fungicide, and Rodenticide Act contained in 7 USC 136 to 136y and with Ohio EPA.

(B) Incorporation by Reference. This chapter includes references to certain matter or materials. The text of the incorporated materials is not included in the regulations contained in this chapter. The materials are hereby made a part of the regulations in this chapter. For materials subject to change, only the specific version specified in the regulation are incorporated. Material is incorporated as it exists on the effective date of this rule. Except for subsequent annual publication of existing (unmodified) Code of Federal Regulation compilations, any amendment or revision to a referenced document is not incorporated unless and until this rule has been amended to specify the new dates.

(1) Availability. The materials incorporated by reference are available as follows:

- (a) "American Society for Testing Materials" (ASTM). Information and copies of documents may be obtained by writing to: "ASTM International, 100 Bar Harbor Drive, P.O. Box C700, West Conshohocken, Pennsylvania 19426-2959." These documents are also available for purchase at [www.astm.org](http://www.astm.org). ASTM documents are also available for inspection and copying at most public libraries and "The State Library of Ohio."
- (b) Code of Federal Regulations. Information and copies may be obtained by writing to: "Superintendent of Documents, Attention: New Orders, P.O. Box 371954, Pittsburgh, PA 15250-7954." The full text of the CFR is also available in electronic format at [www.access.gpo.gov/nara/cfr/](http://www.access.gpo.gov/nara/cfr/). The CFR compilations are also available for inspection and copying at most public libraries and "The State Library of Ohio."
- (c) Federal Insecticide, Fungicide, and Rodenticide Act. Information and copies may be obtained by writing to: "Superintendent of Documents, Attn: New Orders, P.O. Box 371954, Pittsburgh, PA 15250-7954." The full text of the Act as amended in 1998 is also available in electronic format at <http://www4.law.cornell.edu/uscode>. A copy of the Act is also available for inspection and copying at most public libraries and "The State Library of Ohio."

- (d) "South Coast Air Quality Management District (SCAQMD)". Information and copies of documents may be obtained by writing to: "South Coast AQMD, Public Records Coordinator/Public Records Unit, 21865 Copley Dr., Diamond Bar, CA, 91765." These documents are also available at <http://www.aqmd.gov>. SCAQMD documents are also available for inspection and copying at most public libraries and "The State Library of Ohio."

(2) Incorporated materials

3745-113-02      **Applicability.**

- (A) The rules in Chapter 3745-113 of the Administrative Code are applicable to any person who supplies, sells, offers for sale, or manufacturers any AIM coating for use within the state of Ohio, as well as any person who applies or solicits the application of any AIM coating within the state of Ohio, except;
- (1) Any AIM coating that is sold or manufactured for use outside of the state of Ohio or for shipment to other manufacturers for reformulation or repackaging; or
  - (2) Any aerosol coating product; or
  - (3) Any AIM coating that is sold in a container with a volume of one liter (1.057 quart) or less.

3745-113-03      **Standards for architectural and industrial maintenance (AIM) coatings.**

(A) VOC content limits.

Except as provided in paragraphs (B) and (C) of this rule, on or after January 1, 2009, no person shall:

- (1) Manufacture, blend, or repackage for sale within the state of Ohio;
- (2) Supply, sell or offer for sale within the state of Ohio; or
- (3) Solicit for application or apply within the state of Ohio, any AIM coating with a VOC content in excess of the corresponding limit specified in the table of this paragraph.

Limits are expressed in grams of VOC per liter of coating and pounds of VOC per gallon of coating thinned to the manufacturer's maximum recommendation, excluding the volume of any water, exempt compounds, or colorant added to tint bases.

-Table: VOC Content Limits for AIM Coatings-

Coating Type	Limit (grams/liter)	Limit (pounds/gallon)
Flat coatings	100	0.83
Non-flat coatings	150	1.25
Non-flat-high-gloss coatings	250	2.08
Specialty coatings:		
Antenna coatings	530	4.42
Anti-fouling coatings	400	3.33
Bituminous roof coatings	300	2.50
Bituminous roof primers	350	2.92
Bond breakers	350	2.92
Calcimine recoaters	475	3.96
Clear wood coatings:		
Clear brushing lacquers	680	5.67
Lacquers, including clear lacquer sanding sealers	550	4.59
Sanding sealers, excluding clear lacquers	350	2.92
Varnishes other than conversion varnishes	350	2.92

Conjugated oil varnish	450	3.75
Conversion varnishes	725	6.04
Concrete curing compounds	350	2.92
Concrete surface retarders	780	6.50
Dry fog coatings	400	3.33
Faux finishing coatings	350	2.92
Fire-resistive coatings	350	2.92
Fire-retardant coatings:		
Clear	650	5.42
Opaque	350	2.92
Floor coatings	250	2.08
Flow coatings	420	3.50
Form-release compounds	250	2.08
Graphic arts coatings (sign paints)	500	4.17
High-temperature coatings	420	3.50
Impacted immersion coatings	780	6.50
Industrial maintenance coatings	340	2.83
Low-solids coatings	120	1.00
Magnesite cement coatings	450	3.75
Mastic texture coatings	300	2.50
Metallic pigmented coatings	500	4.17

Waterproofing sealers	250	2.08
Waterproofing concrete/masonry sealers	400	3.33
Wood preservatives	350	2.92

Conversion factor: one pound VOC per gallon (US) = 119.95 grams per liter.

(B) Most restrictive VOC limit.

If anywhere on the container of any AIM coating, or any label or sticker affixed to the container, or in any sales, advertising, or technical literature supplied by a manufacturer or anyone acting on their behalf, any representation is made that indicates that the coating meets the definition of or is recommended for use for more than one of the coating categories listed in the table of paragraph (A)(3) of this rule, then the most restrictive VOC content limit shall apply. This provision does not apply to the coating categories specified below:

- (1) Lacquer coatings (including lacquer sanding sealers);
- (2) Metallic pigmented coatings;
- (3) Shellacs;
- (4) Fire-retardant coatings;
- (5) Pretreatment wash primers;
- (6) Industrial maintenance coatings;
- (7) Low-solids coatings;
- (8) Wood preservatives;
- (9) High-temperature coatings;
- (10) Temperature-indicator safety coatings;

- (11) Antenna coatings;
- (12) Antifouling coatings;
- (13) Flow coatings;
- (14) Bituminous roof primers;
- (15) Specialty primers, sealers, and undercoaters;
- (16) Thermoplastic rubber coatings and mastics;
- (17) Calcimine recoaters;
- (18) Impacted immersion coatings; and
- (19) Nuclear coatings.

(C) Sell-through of coatings.

A coating manufactured prior to January 1, 2009, may be sold, supplied, or offered for sale until December 31, 2012. In addition, a coating manufactured before January 1, 2009 may be applied at any time, both before and after January 1, 2009, so long as the coating complied with the standards in effect at the time the coating was manufactured. This paragraph does not apply to any coating that does not display the date or date code required by paragraph (A) of rule 3745-113-04 of the Administrative Code.

(D) Painting practices.

All AIM coating containers used to apply the contents therein to a surface directly from the container by pouring, siphoning, brushing, rolling, padding, ragging, or other means, shall be closed when not in use. These AIM coatings containers include, but are not limited to, drums, buckets, cans, pails, trays, or other application containers. Containers of any VOC-containing materials used for thinning and cleanup shall also be closed when not in use.

(E) Thinning.

No person who applies or solicits the application of any AIM coating shall apply a coating that is thinned to exceed the applicable VOC limit specified in the table of paragraph (A)(3) of this rule.

(F) Rust preventive coatings.

No person shall apply or solicit the application of any rust preventive coating for industrial use, unless such a rust preventive coating complies with the industrial maintenance coating VOC limit specified in the table of paragraph (A)(3) of this rule. No person shall sell or offer for sale any rust preventative coating for application to any nonmetallic substrate, nor shall any person apply a rust preventative coating to any nonmetallic substrate.

(G) Coatings not listed in the table of paragraph (A)(3) of this rule.

For any coating that does not meet any of the definitions for the specialty coatings categories listed in the table of paragraph (A)(3) of this rule, the VOC content limit shall be determined by classifying the coating as a flat coating, non-flat coating, or non-flat-high-gloss coating as defined in paragraphs (A)(21), (A)(35) and (A)(36) of rule 3745-113-01 of the Administrative Code and the corresponding flat or non-flat coating limit shall apply.

3745-113-04      **Container labeling requirements.**

(A) Effective January 1, 2009, each manufacturer of any AIM coatings subject to this rule shall display the following information on the coating container (or label) in which the coating is sold or distributed:

- (1) Date code: The date the coating was manufactured, or a date code representing the date, shall be indicated on the label, lid, or bottom of the container. If the manufacturer uses a date code for any coating, the manufacturer shall file an explanation of each code with the director.
- (2) Thinning recommendations: A statement of the manufacturer's recommendation regarding thinning of the coating shall be indicated on the label or lid of the container. This requirement does not apply to the thinning of architectural coatings with water. If thinning of the coating prior to use is not necessary, the recommendation must specify that the coating is to be applied without thinning.
- (3) VOC content: Each container of any coating subject to this rule shall display either the maximum or the actual VOC content of the coating, as supplied, including the maximum thinning as recommended by the manufacturer. VOC content shall be displayed in grams of VOC per liter of coating. VOC content displayed shall be calculated using product formulation data, or shall be determined using the test methods in paragraph (A)(2) of rule 3745-113-06 of the Administrative Code. The equations in paragraph (A)(1) of rule 3745-113-06 of the Administrative Code shall be used to calculate VOC content.
- (4) Industrial maintenance coatings: The label or the lid of the container in which the coating is sold or distributed shall display one or more of the following descriptions:
  - (a) "For industrial use only."
  - (b) "For professional use only."
  - (c) "Not for residential use" or "Not intended for residential use."
- (5) Clear brushing lacquers: The labels of all clear brushing lacquers shall prominently display the statements "For brush application only," and "This product must not be thinned or sprayed."
- (6) Rust preventive coatings: The labels of all rust preventive coatings shall prominently display the statement "For metal substrates only."

- (7) Specialty primers, sealers, and undercoaters: The labels of all specialty primers, sealers, and undercoaters shall prominently display one or more of the following:
- (a) For blocking stains.
  - (b) For fire-damaged substrates.
  - (c) For smoke-damaged substrates.
  - (d) For water-damaged substrates.
  - (e) For excessively chalky substrates.
  - (f) To seal in efflorescence.
- (8) Quick dry enamels: The labels of all quick dry enamels shall prominently display the words "Quick Dry" and the dry hard time.
- (9) Non-flat -high-gloss coatings: The labels of all non-flat -high-gloss coatings shall prominently display the words "High Gloss."

3745-113-05      **Reporting requirements.**

- (A) Each manufacturer of a product subject to a VOC content limit in paragraph (A) of rule 3745-113-03 of the Administrative Code, shall keep records demonstrating compliance with the VOC content limits. Such records shall clearly list each product by name (and identifying number, if applicable) as shown on the product label and in applicable sales and technical literature, the VOC content as determined in rule 3745-113-06 of the Administrative Code, the name(s) and chemical abstract service (CAS) number of the VOC constituents in the product, the dates of the VOC content determinations, and the coating category and the applicable VOC content limit. These records shall be kept for a period not less than five years and shall be made available to the director within ninety days of request.
- (B) A responsible official from each manufacturer shall upon request of the director, provide data concerning the distribution and sales of coatings subject to a VOC content limit in paragraph (A) of rule 3745-113-03 of the Administrative Code. The responsible official shall within ninety days provide information including, but not limited to:
- (1) The name and mailing address of the manufacturer;
  - (2) The name, address and telephone number of a contact person;
  - (3) The name of the product as it appears on the label and the coating category in paragraph (A) of rule 3745-113-03 of the Administrative Code under which it is regulated;
  - (4) Whether it is marketed for interior or exterior use or both;
  - (5) The number of gallons sold in the state of Ohio in containers greater than one liter and less than one liter;
  - (6) The actual VOC content and VOC content limit in grams per liter. If thinning is recommended, list the actual VOC content and VOC content limit after recommended thinning. If containers less than one liter have a different VOC content than containers greater than one liter, list separately; and
  - (7) The names and CAS number of the VOC constituents in the product.
- (C) Toxic exempt compounds: For each architectural coating that contains perchloroethylene or methylene chloride, the manufacturer shall, on or before April first of each calendar year beginning with the year 2009, report to the director the following information for products sold in the state during the preceding year:

- (1) The product brand name and a copy of the product label with the legible usage instructions;
  - (2) The product category listed in the table of paragraph (A)(3) of rule 3745-113-03 of the Administrative Code to which the coating belongs;
  - (3) The total sales during the calendar year to the nearest gallon; and
  - (4) The volume percent, to the nearest 0.10 per cent, of perchloroethylene and methylene chloride in the coating.
- (D) Recycled coatings: Manufacturers of recycled coatings must submit a letter to the director certifying their status as a recycled paint manufacturer. The manufacturer shall, on or before April first of each calendar year beginning with the year 2009, submit an annual report to the director. The report shall include, for all recycled coatings, the total number of gallons distributed in the state during the preceding year, and shall describe the method used by the manufacturer to calculate state distribution.
- (E) Bituminous coatings: Each manufacturer of bituminous roof coatings or bituminous roof primers shall, on or before April first of each calendar year beginning with the year 2009, submit an annual report to the director. The report shall specify the number of gallons of bituminous roof coatings or bituminous roof primers sold in the state during the preceding calendar year, and shall describe the method used by the manufacturer to calculate state sales.

[Comment: For dates of non-regulatory government publications, publications of recognized organizations and associations, federal rules, and federal statutory provisions referenced in this rule, see the last paragraph of rule 3745-113-01 titled “Incorporation by reference.”]

(A) For the purpose of determining compliance with the VOC content limits in the table of paragraph (A)(3) of rule 3745-113-03 of the Administrative Code , the VOC content of a coating shall be determined by using the procedures described in paragraphs (A)(1)(a) or (A)(1)(b) of this rule, as appropriate. The VOC content of a tint base shall be determined without colorant that is added after the tint base is manufactured.

(1) Calculation of VOC content.

(a) With the exception of low solids coatings, determine the VOC content in grams of VOC per liter of coating thinned to the manufacturer's maximum recommendation, excluding the volume of any water and exempt compounds. Determine the VOC content using the following equation:

$$\text{VOC Content} = (W_s - W_w - W_{ec}) / (V_m - V_w - V_{ec})$$

where:

VOC content = grams of VOC per liter of coating

$W_s$  = weight of volatiles, in grams

$W_w$  = weight of water, in grams

$W_{ec}$  = weight of exempt compounds, in grams

$V_m$  = volume of coating, in liters

$V_w$  = volume of water, in liters

$V_{ec}$  = volume of exempt compounds, in liters

(b) For low solids coatings, determine the VOC content in units of grams of VOC per liter of coating thinned to the manufacturer's maximum recommendation, including the volume of any water and exempt compounds. Determine the VOC content using the following equation:

$$\text{VOC Content (ls)} = (W_s - W_w - W_{ec}) / (V_m)$$

where:

VOC Content (ls) = the VOC content of a low solids coating in grams per liter of coating

Ws = weight of volatiles, in grams

Ww = weight of water, in grams

Wec = weight of exempt compounds, in grams

Vm = volume of coating, in liters

- (2) VOC content of coatings: To determine the physical properties of a coating in order to perform the calculations in paragraph (A)(1) of this rule, the reference method for VOC content is USEPA Method 24, except as provided in paragraphs (A)(3) and (A)(4) of this rule. An alternative method to determine the VOC content of coatings is SCAQMD Method 304-91. The exempt compounds content shall be determined by SCAQMD Method 303-91 (Revised August 1996). To determine the VOC content of a coating, the manufacturer may use USEPA Method 24, or an alternative method, as provided in paragraph (A)(3) of this rule, formulation data, or any other reasonable means for predicting that the coating has been formulated as intended (e.g., quality assurance checks, recordkeeping). However, if there are any inconsistencies between the results of a test conducted utilizing USEPA Method 24 and any other means for determining VOC content, the results of the test utilizing USEPA Method 24 will govern, except when an alternative method is approved as specified in paragraph (A)(3) of this rule. The director may require the manufacturer to conduct an analysis using USEPA Method 24.
- (3) Alternative test methods: Other test methods demonstrated to provide results that are acceptable for purposes of determining compliance with paragraph (A)(2) of this rule, after review and approval in writing by the director and the USEPA, may also be used.
- (4) Methacrylate traffic coating markings: Analysis of methacrylate multi-component coatings used as traffic marking coatings shall be conducted according to a modification of USEPA Method 24 contained in 40 CFR 59, Subpart D, Appendix A. This method has not been approved for methacrylate multicomponent coatings used for purposes other than as traffic marking coatings or for other classes of multicomponent coatings.

## **Chapter 3745-114: Toxic Air Contaminants**

*Contact:* Paul Koval 614-644-3615  
Paul.Koval@EPA.State.Oh.US

3745-114-01      **Toxic air contaminants.**

(A) Except where exempt under division (F)(4) of section 3704.03 of the Revised Code, the director may require a permit-to-install, issued in accordance with Chapter 3745-31 of the Administrative Code, for any new or modified air contaminant sources that emit a toxic air contaminant that presents, or may present, through inhalation or other routes of exposure, a threat of adverse human health effects, including, but not limited to, substances that are known to be, or may reasonably be anticipated to be, carcinogenic, mutagenic, teratogenic, or neurotoxic, that cause reproductive dysfunction, or that are acutely or chronically toxic, or a threat of adverse environmental effects whether through ambient concentrations, bioaccumulation, deposition, or otherwise, and that is identified in this rule.

methyl hydrazine	00060-34-4
methyl iodide (iodomethane)	00074-88-4
methyl isobutyl ketone (MIBK)	00108-10-1
methyl isocyanate	00624-83-9
methyl isopropyl ketone	00563-80-4
methyl mercaptan	00074-93-1
methyl methacrylate	00080-62-6
methyl styrene, alpha-	00098-83-9
methyl tert-butyl ether (MTBE)	01634-04-4
methyl vinyl ketone	00078-94-4

methylamine	00074-89-5
methylene bis(2-chloroaniline), 4,4- (MBOCA; MOCA)	00101-14-4
methylene dianiline, 4,4-	00101-77-9
methylene diphenyl diisocyanate (monomeric MDI)	00101-68-8
mineral fibers, fine	*
Mirex	02385-85-5
molybdenum, as Mo; soluble compounds, metals and insoluble compounds	07439-98-7
naphthalene	00091-20-3
naphthylamine, 2- or B-	00091-59-8
nickel carbonyl	13463-39-3
nickel, as Ni; elemental; soluble inorganic compounds; insoluble inorganic compounds (NOS); nickel subsulfide, as Ni	07440-02-0
nitric acid	07697-37-2
nitroaniline, para-	00100-01-6
nitrobenzene	00098-95-3
nitrodiphenyl, 4-	00092-93-3
nitrophenol, 4-	00100-02-7
nitropropane, 2-	00079-46-9
nitrosodimethylamine, n-	00062-75-9
nitrosomorpholine, n-	00059-89-2
nitroso-n-methylurea, n-	00684-93-5
octachlorostyrene	29082-74-4
osmium tetroxide	20816-12-0
parathion	00056-38-2
pentaborane	19624-22-7
pentachloronaphthalene	01321-64-8
pentachloronitrobenzene	00082-68-8
pentachlorophenol	00087-86-5
pentyl acetate, all isomers	00620-11-1
perchloromethyl mercaptan	00594-42-3
perchloryl fluoride	07616-94-6
phenol	00108-95-2
phenylenediamine, para-	00106-50-3
phenylhydrazine	00100-63-0
phenylphosphine	00638-21-1
phosgene	00075-44-5
phosphine	07803-51-2
phosphoric acid	07664-38-2
phosphorus	07723-14-0
phosphorus oxychloride	10025-87-3

phosphorus trichloride	07719-12-2
phosphorus pentachloride	10026-13-8
phosphorus pentasulfide	01314-80-3
phthalic anhydride	00085-44-9
platinum metal and soluble salts, as Pt	07440-06-4
polychlorinated biphenyls (PCBs, arcolors)	01336-36-3
polychlorinated dibenzofurans (furans)	00132-64-9
polycyclic organic matter (POM)	*
polymeric methylene diphenyl diisocyanate (PMDI)	09016-87-9
propane sultone, 1,3-	01120-71-4
propionlactone, beta-	00057-57-8
propionaldehyde	00123-38-6
propoxur	00114-26-1
propylene dichloride	00078-87-5
propylene glycol dinitrate	06423-43-4
propylene oxide	00075-56-9
propylenimine (methyl aziridine, 2-)	00075-55-8
quinoline	00091-22-5
quinone	00106-51-4
radionuclides	*
selenium & compounds, as Se	7782-49-2
selenium hexafluoride	07783-79-1
silver metal and soluble compounds, as Ag	07440-22-4
sodium hydroxide	01310-73-2
stoddard solvent	08052-41-3
styrene oxide	00096-09-3
styrene, monomer	00100-42-5
sulfur tetrafluoride	07783-60-0
sulfuric acid	07664-93-9
tellurium hexafluoride	07783-80-4
tetrachlorodibenzo-p-dioxin, 2,3,7,8-	01746-01-6
tetrachloroethane, 1,1,2,2-	00079-34-5
tetrachloroethylene (perchloroethylene)	00127-18-4
tetrafluoroethylene	00116-14-3
tetramethyl succinonitrile	03333-52-6
tetranitromethane	00509-14-8
tin metal, oxide & inorganic compounds, as Sn; Organic compounds	07440-31-5
titanium tetrachloride	07550-45-0
toluene	00108-88-3
toluene-2,4-diamine	00095-80-7
toluene-2,4-diisocyanate or 2,6-diisocyanate (or as a mixture)	00584-84-9; 00091-08-7

toluidine, o-	00095-53-4
toxaphene	08001-35-2
trichlorobenzene, 1,2,4-	00120-82-1
trichloroethane, 1,1,2-	00079-00-5
trichloroethylene	00079-01-6
trichlorophenol, 2,4,5-	00095-95-4
trichlorophenol, 2,4,6-	00088-06-2
trichloropropane, 1,2,3-	00096-18-4
triethylamine	00121-44-8
trifluralin	01582-09-8
trimellitic anhydride	00552-30-7
trimethylpentane, 2,2,4- (isooctane)	00540-84-1
vanadium pentoxide, as V <sub>2</sub> O <sub>5</sub> dust or fume	01314-62-1
vinyl acetate	00108-05-4
vinyl bromide	00593-60-2
vinyl chloride	00075-01-4
vinyl cyclohexene, 4-	00100-40-3
vinyl fluoride	00075-02-5
vinyl-1-cyclohexene dioxide, 4-	00106-87-6
vinylidene chloride	00075-35-4
xylenes	01330-20-7
xylenes, m-,	00108-38-3
xylenes, o-	00095-47-6
xylenes, p-	00106-42-3
zinc chloride fume	07646-85-7
zinc oxide	01314-13-2
